## MACRO

### US

- **Markit Flash U.S. Services PM Business Activity Index** was unchanged at 51.3 in June, and only marginally above the neutral 50.0 threshold. As a result, the average reading for the second quarter of 2016 (51.8) was only slightly stronger than seen during the first three months of the year (51.4).
- **Markit Flash U.S. Composite PMI Output Index** registered 51.2 in June, up only fractionally from 50.9 in May. The latest reading signalled a marginal expansion of U.S. private sector output.
- **Dallas Fed manufacturing index** improved only slightly to -18.3 for June from -20.8 previously with markets expecting a stronger improvement to -15.0. The overall index has been in negative territory since January 2015 and there will be concerns that a recovery in oil prices has not triggered a more significant improvement in business confidence.
