(57)	espite its good performance since IPO: PATMI of RMB19m ('05), RMB36m ('06),
´ //)	RMB33m ('07), RMB40m ('08), RMB64m ('09), RMB86m ('10), and RMB95m
	forecast ('11); its share price has gone nowhere. IPOed at 22¢ on 16 Mar 2005
	it is only 23¢ today. The dividend it paid out might have covered your brokerage.
anwhile	the STI has moved from 2 169 to 2 778, a gain of 28%

If you had put \$1000 in a riskless savings account that is now paying 0.22% p.a., your \$1000 has become \$1020. It certainly outperformed investing in *Sunpower*, counting risk.

In the stock market, sometimes, the good reputation of its management, the reputation of its products, the reputation of its customers, and the continuous (almost always, increasing) profits - count for nothing – as is the case of **Sunpower**. So, why should I continue to tell you its fundamentals?

Its management team, which owns more than 60% of the company, must be very patient people. They still believe in doing their job and letting the market do the voting. We give them credit for an excellent job done all these years after IPO.

However, apart from its first dividend pay-out following last year's result, management has not done more to enhance shareholder value.

Its price is 4.0 X trailing earnings. If **Sunpower** were listed in Shanghai, it would be trading at 40 X P/E. Why not consider a delisting and re-listing somewhere else with a higher P/E?

At 0.80 X book, certainly it is below intrinsic value. If it is below intrinsic value, the company could and should buy back its shares.

If the company is not doing anything to enhance shareholder value, then perhaps minority shareholders can do something (which we detail on page).

On its PV calculation of *RMB1,686m* (page 2 & 3) discounted by - if we assume *Sunpower* continues its behaviour (page 3) going forward, we lose 36%; if it were listed somewhere else like Taiwan, there would be a difference of another 34%, judging by another S-chip's performance (*Hu An Cable*); and, if we assume forex loss of RMB vs SGD before current ECB crisis of 6.88% - a total of 39.3%, *Sunpower* should be fairly valued at <u>SG40¢</u> a share.

However, as we are entering the next phase of market downturn into late January, a downturn likely to be centred on European troubles and Occupy Wall Street, we set a target before our next report (likely in mid-January) to buy Sunpower between 18ϕ and $19\%\phi$. As 18ϕ is 22% below yesterday's 23ϕ , it is <u>technically</u> a **SELL** recommendation.

If you are still interested in the good set of fundamentals, please proceed to page 2.

^{*} upon ex-date #forex at actual or RMB5=SGD1

Result, and Revising Forecast

The fluctuating *gross profit margin* came to 22.2% in 3Q11 as a result of the lower-margin *Heat Exchangers and Pressure Vessels* making up almost 74% of *revenue*. This high proportion in 1Q11 at 78% of *revenue* also resulted in the 22.3% *margin* then. In the last 7 quarters, the highest two *gross profit margin* of 30.7% and 29.9% were achieved when this segment constituted 51.5% and 57% respectively of *revenue*.

We are revising our *gross profit margin* for 4Q11 from 25.9% and FY2012 from 24% (both) to 22.3% to be in line with the latest number. This would also be reflecting the continuing inflationary conditions in China affecting costs; and, a stronger RMB vs USD limiting revenue - both likely to prevail into 2012. The 9M11 margin of 24.7% (see table) will come down to 23.9% (FY2011F) or reduce *RMB32m* in *PATMI* from the previous forecast. Similarly the cut from 24% to 22.3% in FY2012 would reduce *PATMI* by *RMB33m* from the previous forecast. *PATMI* is reduced by only *RMB13m* in FY2013 from the previous forecast because we are using the same margin as previously but on a lower *revenue*.

%age points, in orange; negatives, in brackets

Revenue remains the positive item as an increase of RMB315m in work-in-progress in 3Q11 would result in revenue recognition in 4Q11 and 1Q12. We have revised down our revenue forecast by only 4% of 4Q11; and, by 3% each of FY2012 and FY2013.

Economies-of-scale assumption in *general & admin expense* is proving better than forecast as 9M11 came in at 10.6% increase from 9M10 vs our previous +15% load. We therefore revised this down to a +11% for FY2011. We use a +10% for both FY2012 and FY2013, same as our previous forecast.

Although selling & distribution expense was at a lower rate in 9M11, we are keeping our highish yearly forecast, just in case.

Interest rate hike was one hike less than forecast. Therefore the revised forecast is slightly lower. There were also minor adjustments to *tax* and *minority*.

Balance Sheet and Present Value

Balance sheet forecast had been changed due mainly to changes in the P&L that resulted primarily from a lower *gross profit margin*.

Current assets less total liabilities less minority interest for FY2011 had been revised from RMB295.4m to RMB239.7m. Similarly, the corresponding FY2013 numbers came down from RMB568.4m to RMB466.9m.

As a result, PV (because we do not input any inflation in the forecast numbers as these are computed on volumes alone) is calculated to be FY2013's *current assets* less *total liabilities* less *minority interest* added to 7 x FY2013 *PATMI* added back non-cash items:

RMB174.2m X 7 + RMB466.9m

RMB1,686m (instead of the previous forecast of RMB1,878m).

Price Behaviour

Source: POEMS chart, PSR

After IPO, it moved (shown by rectangle B1 in chart above) under 22ϕ for 18 months. Then, it went up above 22ϕ , all the way to 56ϕ before falling back to 22ϕ again. This took (rectangle A1) 12 months. Another piece of accumulation took place for 19 months, as illustrated by rectangle B2. This can also be interpreted as mark-down/accumulation/mark-up on a shorter time-frame. This was followed by 11 months of uncertainty (more accumulation) in square C1. Finally, we had rectangle A2 of price action above 22ϕ , with a high of 57ϕ . A2 measured 12 months.

Are we going to go through another long period of accumulation?

The area bordered by the price curve and the 22ϕ horizontal red line – vs the 64% being the area bordered by price curve and the same red line. We want to believe the area above 22ϕ as fair value and that below 22ϕ as "un-"fair value.

Valuation & Recommendation

PV is RMB1,686m. The discount (page 1) is the multiple - 36% being the area of "un-"fair value; 34% being the discount that Hu An Cable is trading in SGX vs Taiwan; and, 6.83% being forex loss of RMB vs SGD i.e. 0.64 x 0.66 x 0.9317 = 0.39355. PV x discount = RMB663.5m. At RMB5=SGD1, and divided by 329m shares, we get a fair value of SG40¢.

We do not think management would surprise us with a positive price event like a delisting, substantial share buy-back, privatisation, MBO etc in the next two months.

And, since the market seems likely to be going down until mid-January due to European troubles or Occupy Wall Street, we would want to buy *Sunpower* at a cheaper price. That cheaper price could be a revisit of the square C2 (price chart, same page). The price range at the low end is 18¢. We want to buy there.

As this is 22% below yesterday's closing price of 23¢, this is technically a SELL.

Let's talk about how shareholders can make the destiny of Sunpower's share price (page 4).

Taking charge of the Share Price

Share Buy-back

Our 2012F shows a ROE of 17.4%. Assume the company borrows an additional *RMB10m* at 7% p.a. for 2012. It will earn a net 10.4% return or increase the EPS to RMB30.2f.

But if it borrows the additional RMB10m and buys back its shares at SG23c (assume forex of 5:1) and cancelling these, it will reduce ths outstanding shares by 9m to 320m. EPS, after netting off interest expense, would come to RMB30.6f.

It is a better return for shareholders.

Therefore shareholders at the next AGM should query why management did not do share buy-back.

Professionals at Play

We have gone through TWO major rounds of mark-down/accumulation/mark-up/distribution. In cruder terms, pump-and-dump.

There must be many shareholders out there that bought Sunpower shares at above 22ϕ . Maybe 44ϕ or 33ϕ . Now, sitting on losses of 50% or 33% respectively. Because they are not professionals.

With still 27% free-float, it is difficult to stop the professionals totally but we can reduce their activities.

We can STOP lending out shares. This should hinder their operations on the way down. Make sure when applying to open a trading account, you do not tick a box that permits the broker to lend out all your shares. If it is an exception box, make sure you put *Sunpower* amongst the exceptions.

We can buy without leveage so that there is no panic to cut loss when the price is falling.

We can buy when it is near intrinsic value. There are many definitions of intrinsic value but a conservative interpretation is the example given above for share buy-back.

One can never tell if the next rise is real or just another pump-and-dump. But the length of the accumulation and the magnitude of the rise should give some indication.

Be an Activist

Get yourself a book to find out how these professionals operate. You may want to split your investment into two lots. Part is for holding. And, part is for trading *Sunpower* like the professionals. When they have to share the gains with you, they may feel crowded out and go play some other stock.

Be an Advocate

If you have friends, who are long-only buy-and-hold type of fund managers, tell them about **Sunpower**'s fundamentals. When they buy, they will help cripple the professionals' ability.

Attend the next AGM and keep asking management to enhance shareholder value. Ask for dividends, dividends, and more dividends. Put more pressure when the RMB400m loan is being paid down.

Ask why listing elsewhere is not a good move.

All the best!

Phillip Research Stock Selection Systems	TRADING BUY	Share price may exceed 10% on the upside over the next 3
		months, however longer-term outlook remains uncertain
	BUY	>15% upside from the current price
	HOLD	-10% to 15% from the current price
	SELL	>10% downside from the current price
	TRADING	Share price may exceed 10% on the downside over the next 3
	SELL	months, however longer-term outlook remains uncertain
	We do not base our recommendations entirely on the above quantitative return bands. We consider qualitative factors like (but not limited to) a stock's risk reward profile, market sentiment, recent rate of share price appreciation, presence or absence of stock price catalysts, and speculative undertones surrounding the stock, before making our final recommendation	

Important Information

This publication is prepared by Phillip Securities Research Pte Ltd., 250 North Bridge Road, #06-00, Raffles City Tower, Singapore 179101 (Registration Number: 198803136N), which is regulated by the Monetary Authority of Singapore ("Phillip Securities Research"). By receiving or reading this publication, you agree to be bound by the terms and limitations set out below.

This publication has been provided to you for personal use only and shall not be reproduced distributed or published by you in whole or in part, for any purpose. If you have received this document by mistake, please delete or destroy it, and notify the sender immediately. Phillip Securities Research shall not be liable for any direct or consequential loss arising from any use of material contained in this publication.

The information contained in this publication has been obtained from public sources which Phillip Securities Research has no reason to believe are unreliable and any analysis, forecasts, projections, expectations and opinions (collectively, the "Research") contained in this publication are based on such information and are expressions of belief of the individual author or the indicated source (as applicable) only. Phillip Securities Research has not verified this information and no representation or warranty, express or implied, is made that such information or Research is accurate, complete, appropriate or verified or should be relied upon as such. Any such information or Research contained in this publication is subject to change, and Phillip Securities Research shall not have any responsibility to maintain or update the information or Research made available or to supply any corrections, updates or releases in connection therewith. In no event will Phillip Securities Research or persons associated with or connected to Phillip Securities Research, including but not limited its officers, directors, employees or persons involved in the preparation or issuance of this report, (i) be liable in any manner whatsoever for any consequences (including but not limited to any special, direct, indirect, incidental or consequential losses, loss of profits and damages) of any reliance or usage of this publication or (ii) accept any legal responsibility from any person who receives this publication, even if it has been advised of the possibility of such damages. You must make the final investment decision and accept all responsibility for your investment decision including but not limited to your reliance on the information, data and/or other materials presented in this publication.

Any opinions, forecasts, assumptions, estimates, valuations and prices contained in this material are as of the date indicated and are subject to change at any time without prior notice.

Past performance of any product referred to in this publication is not indicative of future results.

This report does not constitute, and should not be used as a substitute for, tax, legal or investment advice. This publication should not be relied upon exclusively or as authoritative without further being subject to the recipient's own independent verification and exercise of judgment. The fact that this publication has been made available constitutes neither a recommendation to enter into a particular transaction nor a representation that any product described in this material is suitable or appropriate for the recipient. Recipients should be aware that many of the products which may be described in this publication involve significant risks and may not be suitable for all investors, and that any decision to enter into transactions involving such products should not be made unless all such risks are understood and an independent determination has been made that such transactions would be appropriate. Any discussion of the risks contained herein with respect to any product should not be considered to be a disclosure of all risks or a complete discussion of such risks.

Nothing in this report shall be construed to be an offer or solicitation for the purchase or sale of any product. Any decision to purchase any product mentioned in this research should take into account existing public information, including any registered prospectus in respect of such product.

Phillip Securities Research, or persons associated with or connected to Phillip Securities Research, including but not limited to its officers, directors, employees or persons involved in the preparation or issuance of this report, may provide an array of financial services to a large number of corporations in Singapore and worldwide, including but not limited to commercial / investment banking activities (including sponsorship, financial advisory or underwriting activities), brokerage or securities trading activities. Phillip Securities Research, or persons associated with or connected to Phillip Securities Research, including but not limited to its officers, directors, employees or persons involved in the preparation or issuance of this report, may have participated in or invested in transactions with the issuer(s) of the securities mentioned in this publication, and may have performed services for or solicited business from such issuers. Additionally, Phillip Securities Research, or persons associated with or connected to Phillip Securities Research, including but not limited to its officers, directors, employees or persons involved in the preparation or issuance of this report, may have provided advice or investment services to such companies and investments or related investments as may be mentioned in this publication.

Phillip Securities Research or persons associated with or connected to Phillip Securities Research, including but not limited to its officers, directors, employees or persons involved in the preparation or issuance of this report may, from time to time maintain a long or short position in securities referred to herein, or in related futures or options, purchase or sell, make a market in, or engage in any other transaction involving such securities, and earn brokerage or other compensation in respect of the foregoing. Investments will be denominated in various currencies including US dollars and Euro and thus will be subject to any fluctuation in exchange rates between US dollars and Euro or foreign currencies and the currency of your own jurisdiction. Such fluctuations may have an adverse effect on the value, price or income return of the investment.

To the extent permitted by law, Phillip Securities Research, or persons associated with or connected to Phillip Securities Research, including but not limited to its officers, directors, employees or persons involved in the preparation or issuance of this report, may at any time engage in any of the above activities as set out above or otherwise hold a interest, whether material or not, in respect of companies and investments or related investments which may be mentioned in this publication. Accordingly, information may be available to Phillip Securities Research, or persons associated with or connected to Phillip Securities Research, including but not limited to its officers, directors, employees or persons involved in the preparation or issuance of this report, which is not reflected in this material, and Phillip Securities Research, or persons associated with or connected to Phillip Securities Research, including but not limited to its officers, directors, employees or persons involved in the preparation or issuance of this report, may, to the extent permitted by law, have acted upon or used the information prior to or immediately following its publication. Phillip Securities Research, or persons associated with or connected to Phillip Securities Research, including but not limited its officers, directors, employees or persons involved in the preparation or issuance of this report, may have issued other material that is inconsistent with, or reach different conclusions from, the contents of this material.

The information, tools and material presented herein are not directed, intended for distribution to or use by, any person or entity in any jurisdiction or country where such distribution, publication, availability or use would be contrary to the applicable law or regulation or which would subject Phillip Securities Research to any registration or licensing or other requirement, or penalty for contravention of such requirements within such jurisdiction.

Section 27 of the Financial Advisers Act (Cap. 110) of Singapore and the MAS Notice on Recommendations on Investment Products (FAA-N01) do not apply in respect of this publication.

This material is intended for general circulation only and does not take into account the specific investment objectives, financial situation or particular needs of any particular person. The products mentioned in this material may not be suitable for all investors and a person receiving or reading this material should seek advice from a professional and financial adviser regarding the legal, business, financial, tax and other aspects including the suitability of such products, taking into account the specific investment objectives, financial situation or particular needs of that person, before making a commitment to invest in any of such products.

Please contact Phillip Securities Research at [65 65311240] in respect of any matters arising from, or in connection with, this document.

This report is only for the purpose of distribution in Singapore.
