

This is a notice of an extraordinary general meeting of the Neuberger Berman Global High Yield Bond Fund, a sub-fund of Neuberger Berman Investment Funds plc. This circular is important and requires your immediate attention. If you are in doubt as to the action you should take you should seek advice from your stockbroker, bank manager, solicitor, accountant, tax adviser or other independent financial adviser. If you have sold or transferred your holding in the Neuberger Berman Global High Yield Bond Fund please pass this circular at once to the purchaser or transferee or to the stockbroker, bank or other agent through whom the sale or transfer was effected for transmission to the purchaser or transferee as soon as possible.

The directors of the Company (the “Directors”) accept full responsibility for the accuracy of the information contained in this circular and confirm, having made all reasonable enquiries, that, to the best of their knowledge and belief, there are no other facts, the omission of which would make any statement misleading.

This circular has not been reviewed by the Central Bank of Ireland (the “Central Bank”) and it is possible that changes thereto may be necessary to meet the requirements of the Central Bank. The Directors are of the opinion that there is nothing contained in this circular or in the proposals detailed herein that conflicts with the applicable regulations or guidance issued by the Central Bank.

**NEUBERGER BERMAN INVESTMENT FUNDS PLC
(THE “COMPANY”)**

**NEUBERGER BERMAN GLOBAL HIGH YIELD BOND FUND
(THE “PORTFOLIO”)**

**CIRCULAR IN RESPECT OF AN
EXTRAORDINARY GENERAL MEETING OF THE SHAREHOLDERS OF THE FUND
(THE “EGM”)**

Notice of the EGM to be held at 70 Sir John Rogerson’s Quay, Dublin 2, Ireland on 4 April 2022, at 10 am (Irish time). The accompanying proxy card for use by shareholders in the Company at the EGM should be completed and returned, in accordance with the instructions printed thereon, so as to be received by Matsack Trust Limited, 70 Sir John Rogerson’s Quay, Dublin 2, Ireland as soon as possible and, in any event, not later than 10 am (Irish time) on 2 April 2022.

NEUBERGER BERMAN INVESTMENT FUNDS PLC

Registered Office
70 Sir John Rogerson's Quay
Dublin 2, Ireland

An umbrella fund with segregated liability between sub-funds

7 March 2022

Dear Singapore Shareholder

We are writing to you as a shareholder in the Portfolio in connection with the EGM, formal notice of which is enclosed at Appendix II.

The purpose of the EGM is to seek the approval of the shareholders in the Portfolio (the "**Shareholders**") to proposed changes to the Portfolio, including amendments to the Portfolio's investment objective and investment policy. We are also writing to you to notify you of certain other changes to the Portfolio.

Unless otherwise indicated, all capitalised terms shall have the same meaning as otherwise described in the Company's Irish prospectus dated 23 December 2021 (the "**Prospectus**") and in the supplement for the Portfolio dated 23 December 2021 (the "**Supplement**").

Change to the Investment Objective of the Portfolio

It is intended, subject to the approval of: (a) the Central Bank and (b) the Shareholders at the EGM, to amend the investment objective of the Portfolio. At present, the investment objective of the Portfolio is:

"Seeks to maximise current income whilst preserving capital by investing in the global high yield fixed income market."

The proposed change is to amend the Portfolio's investment objective to:

"Seeks to maximise current income whilst preserving capital by investing in securities in the global high yield fixed income market that produce investment returns and support better alignment with the United Nations Sustainable Development Goals by engaging with issuers in support of achieving the United Nations Sustainable Development Goals." (the "**Objective Change**")

The purpose of the Objective Change is to reflect that, if approved, the Portfolio will engage with issuers to seek to contribute towards the achievement of the United Nations Sustainable Development Goals ("**SDGs**").

Changes to the Investment Policy and ESG Policies of the Portfolio

It is intended, subject to the approval of: (a) the Central Bank and (b) the Shareholders at the EGM, to amend the investment policy of the Portfolio and the ESG policies applied by the Portfolio as described in the revised description of the investment policy and ESG policies contained in Appendix I and marked up to show the proposed changes (the "**Policy Changes**"):

The purpose of the Policy Changes is to reflect that, if approved, the Portfolio will promote specific and named environmental and social characteristics through the application of the proprietary NB ESG Quotient tool and the Neuberger Berman Global Standards Policy and the continued application of the Controversial Weapons Policy, Thermal Coal Involvement Policy and ESG Policy on a continuous basis. Additionally, the Portfolio will also not invest in issuers that are involved in tobacco production.

Furthermore, if the Policy Changes are approved the Portfolio will contribute towards the achievement of the United Nations Sustainable Development Goals (“**SDGs**”) by engaging with 100% of corporate issuers, setting key performance indicators aligned to the SDGs which relate to the issuers’ products, services, operations or processes, with the goal of having a positive outcome on the environment and/or society.

Changes to the Instruments / Asset Classes invested in by the Portfolio

Shareholders should note that the Portfolio will no longer have the ability to invest in convertible bonds or equity securities.

Change to the name of the Portfolio

In order to better reflect the changes described above, in the event that the changes to the Objective and the Policy are approved at the EGM, it is proposed to change the name of the Portfolio to the “*Neuberger Berman Global High Yield SDG Engagement Fund*”.

Details of the EGM

The purpose of this circular is to convene the EGM in order to seek your approval, by way of an ordinary resolution, for the Objective Change and the Policy Changes, as described above. An ordinary resolution is a resolution passed by a simple majority of the votes cast by the Shareholders entitled to vote thereon in a general meeting.

The EGM will be held at the offices of the company secretary, Matsack Trust Limited, 70 Sir John Rogerson’s Quay, Dublin 2, Ireland at 10 am (Irish time) on 4 April 2022.

A proxy card is enclosed as Appendix III to enable you to vote at the EGM should you not be attending in person and you are urged to complete and return it as soon as possible and in any event by no later than 10 am (Irish time) on 2 April 2022. Please read the notes printed on the proxy card which will assist you in completing and returning same. You may attend and vote at the EGM even if you have appointed a proxy but in such circumstances the proxy is not entitled to vote. Corporate Shareholders should complete the letter of representation attached hereto at Appendix IV if they wish to appoint an individual to represent them at the EGM.

The quorum for the EGM is two Shareholders present in person or by proxy. If a quorum is not present within half an hour of the time appointed for the EGM, it will be necessary to adjourn it. In that event, the EGM will stand adjourned to the same day in the next week, at the same time and place or to such other day and at such other time and place as the Directors may determine.

In the event that the resolution is passed, the proposed changes will take effect on the same day as the revised Supplement is noted by the Central Bank, which is expected to be on or about 5 April 2022, subject to the approval of the Central Bank. Following the changes taking effect, they will be binding on the Shareholders, irrespective of how (or whether) they voted, and a revised Supplement will be issued reflecting the changes described in this circular.

Please note that further amendments may be made to the Supplement following the date of this circular in order to address any Central Bank comments which arise during its review of the revised documents. Once noted, the revised Supplement may be inspected at the registered office of the Singapore Representative during normal Singapore business hours on any Dealing Day as well as being available on the Investment Manager’s website at www.nb.com.

The Directors believe that the passing of the resolution is in the best interests of the Shareholders as a whole and recommend that you vote in favour of the proposed resolution. The Directors accept responsibility for the information contained in this circular. Finally, the costs incurred in relation to the changes discussed above will be borne by the Investment Manager.

Should you have any queries in relation to this matter, please do not hesitate to contact your sales representative, or contact the Company's Singapore Representative, Neuberger Berman Singapore Pte. Limited, at +65 6645 3786, 10 Collyer Quay #15-05, Ocean Financial Centre, Singapore 049315.

Yours sincerely,

A handwritten signature in black ink, appearing to be 'R. J.', is written above a horizontal line.

Director

Neuberger Berman Investment Funds plc

APPENDIX I

POLICY CHANGES

Investment Approach	<p>The Portfolio will aim to achieve its objective by investing primarily in:</p> <ul style="list-style-type: none">▪ US dollar and non-U.S. dollar denominated high yield fixed income securities that are issued or guaranteed by corporate issuers of any industrial sector; and▪ Short duration, high yield fixed income securities issued by governments and agencies globally that are primarily denominated in US Dollars located throughout the world that are listed, dealt or traded on Recognised Markets. <p>The Portfolio will invest primarily in securities denominated in the currencies included in the Benchmark.</p> <p><u>The Portfolio promotes environmental and social characteristics, as described in greater detail in the “Environmental, Social and Governance” section, whilst contributing towards the achievement of the United Nations Sustainable Development Goals (“SDGs”) by engaging directly with 100% of corporate issuers, primarily through in-person meetings and calls, setting key performance indicators (“KPIs”) aligned to the SDGs which relate to the issuers’ products, services, operations or processes, with the goal of having a positive outcome on the environment and/or society.</u></p> <p>The Portfolio’s investments will be fully hedged into its Base Currency through the use of forward and future contracts as set out below in the “Instruments/Asset Classes” section.</p> <p><u>The Sub-Investment Manager will prioritise investment in corporate issuers that have the ability and willingness to engage with the Sub-Investment Manager on specific KPIs aligned to the SDGs. The investee issuer’s progress relative to the KPIs set is evaluated by the Sub-Investment Manager quarterly. This direct engagement with investee companies is an essential part of the investment process and the Portfolio’s contribution towards the achievement of the SDGs.</u></p> <p>The Portfolio may also invest, on an ancillary basis, in equity securities as set out below in the “Instruments/Asset Classes” section and unlisted money market instruments issued by companies located throughout the world.</p> <p><u>Following the application of the exclusions described in the “Environmental, Social and Governance” section, the Sub-Investment Manager will then assess potential investments, as</u></p>
----------------------------	--

follows:

1) The Sub-Investment Manager systematically considers and evaluates ESG characteristics, as an important component of its credit analysis discipline, when making investment decisions. The Sub-Investment Manager utilises a proprietary Neuberger Berman ESG rating system (the “NB ESG Quotient”) on a continuous basis, as part of the Portfolio construction and investment management process. The NB ESG Quotient assigns weightings to issuers (relative to their peer group) for each of the E&S Characteristics (as defined in the “Environmental, Social and Governance” section) to derive the issuer’s NB ESG Quotient rating. The Sub-Investment Manager prioritises investment in securities issued by issuers with a favourable and/or an improving NB ESG Quotient rating over those issued by issuers with a poor NB ESG Quotient rating, especially where such an NB ESG Quotient rating is not being addressed by an issuer. Such securities may be excluded from the Portfolio.

~~The Manager and the Sub-Investment Manager will seek to select securities from the result of in-depth credit research-~~

2) Creditworthiness is assessed by fundamental analysis aimed at assessing the issuer’s financial performance, such as revenue/earnings before interest, tax, depreciation, and amortisation (“EBITDA”) growth, cash flow growth, capital expenditures, leverage trends and liquidity profile, utilising proprietary analytical tools which. This analysis seeks to assess the strength of a company’s credit profile, examples of which including but are not limited to:

~~(i) its their~~ ability to pay principal and interest, ~~their~~ cash flow and balance sheet composition; and,

~~(ii) its their~~ market position relative to competitors.

~~(iii) the Sub-Investment Manager’s assessment of Environmental, Social, and Governance (ESG) factors through the team’s proprietary scoring system as well as proactive engagement on ESG-related topics.~~

3) ~~The Manager and the Sub-Investment Manager will take a disciplined approach to investing on behalf of the Portfolio by attempting to maintain a portfolio that is typically diversified across issuers, industry sectors and maturities. The securities selected will depend on the Manager and/or use an in-house tool to screen for the likelihood of achieving success in engagement with an issuer prior to investment (the “Engagement Potential Indicator”). The Engagement Potential Indicator, on a scale of 1-5, provides~~

a systematic evaluation of an issuer's willingness and ability to engage with the Sub-Investment Manager on the SDGs. For example, a company determined to be unwilling or unable to engage would receive an Engagement Potential Indicator of "1", whereas a company willing to engage on becoming a leader in contributing to the SDGs would receive an Engagement Potential Indicator of "5". The Sub-Investment Manager does not intend to invest in companies with an Engagement Potential Indicator of below "2". The Engagement Potential Indicator considers a diverse set of factors including the relevance of the SDGs to an issuer's business operations, an issuer's disclosure practices and the Sub-Investment Manager's ~~analysis of the prevailing market conditions and considered in light of the investment objective of the Portfolio.~~ relationship with the issuer, in addition to the financial constraints of the issuers.

- 4) The Sub-Investment Manager then selects investments that seek to maximise current income and preserve capital and progress towards engagement objectives aligned with the SDGs.

In ~~selecting fixed income or equity securities for investment seeking to maximise income and preserve capital,~~ the Manager and the Sub-Investment Manager may seek to (where applicable):

- capitalise on market opportunities in areas of the high yield market which the Manager and the Sub-Investment Manager believe are undervalued; and/or
- generate added value through: (i) avoidance of credit deterioration, either as a result of a decline in credit rating based on internal research and/or external rating agencies or which occurs when the Manager and the Sub-Investment Manager believe, based on research, that the fundamentals of a security are in decline and accordingly will dispose of or will not invest in such securities; (ii) relative value analysis (i.e. seeking to exploit perceived under or over valuation of assets (based on views of, including, but not exhaustive, ratings, corporate fundamentals and industry) carried out as part of the Manager and the Sub-Investment Manager's proprietary research; and (iii) industry and quality rotation by selling out of a security in one industry or credit tier and buying into another.

The Sub-Investment Manager will seek to make progress towards engagement objectives aligned with the SDGs through active and collaborative engagement with issuers, using both in person meetings and correspondence.

- 5) The Sub-Investment Manager uses an internal NB engagement tracker to monitor and track engagements at the issuer level and to measure issuers' progress with respect to their engagement objectives over time. Failure

	<p>by issuers to engage with the Sub-Investment Manager or a lack of progress towards their engagement objectives over time may lead to the Portfolio divesting from issuers' securities; and</p> <p>6) Periodically, the Sub-Investment Manager will report publicly on engagement efforts and progress towards engagement objectives.</p> <p>The Portfolio will invest primarily in securities denominated in the currencies included in the Benchmark.</p> <p>The Portfolio's investments will be fully hedged into its Base Currency through the use of forward and future contracts as set out below in the "Instruments/Asset Classes" section.</p> <p>The Portfolio may also invest, on an ancillary basis, in unlisted money market instruments issued by companies located throughout the world.</p> <p>analysis of the prevailing market conditions and considered in light of the investment objective of the Portfolio.</p> <p>In addition, the Portfolio may also invest in securities of companies located in and governments of Emerging Market Countries, which may involve additional risk, relative to investment in more developed economies.</p> <p>The Portfolio may opportunistically invest up to 10% of its Net Asset Value in participation interests in floating or adjustable rate senior secured loans, which are securitised and freely transferable, and which meet the regulatory criteria to be considered money market instruments.</p> <p>The Portfolio is actively managed and does not intend to track the Benchmark which is included here for performance comparison purposes and because the Portfolio's investment policy restricts the extent to which the Portfolio's holdings may deviate from the Benchmark, as described above. This deviation may be significant.</p>
<p>Environmental, Social and Governance ("ESG")</p>	<p>The Portfolio meets the classification of an Article 8 Portfolio as it promotes environmental and social characteristics and limits investments to companies that follow good governance practices.</p> <p>The environmental and social characteristics promoted by the Portfolio are:</p> <p>ESG risks and opportunities are systematically considered in the selection of securities to be constituents of the Portfolio. The Manager and the Sub Investment Manager assess securities in relation to their exposure to and the management</p>

~~of ESG risks. ESG represents governance, (being the way in which the company is run), environmental issues, (such as the impact on natural resources), and social issues (such as human rights).~~

- Environmental Characteristics: biodiversity and responsible land use; carbon footprint reduction; energy management; environmental management; reduction of greenhouse gas emissions; responsible material sourcing; clean technologies; green building; renewable energy; packaging waste and materials management; recycling; responsible and transparent underwriting; toxic emissions and waste reduction; waste management; and
- Social Characteristics: access to finance; access to healthcare; business ethics & transparency of government relations; chemical safety; controversial sourcing; corporate spending disclosure; drug safety and side effect management; employee satisfaction; engagement with communities/lawmakers/regulators; food safety; gender/race diversity; health and nutrition; health and safety; human capital development; labour management; lobbying management; data privacy and security; product safety and quality; regulatory compliance; supply chain labour standards; litigation & related controversy monitoring; and corporate political disclosure and accountability (measured by issuers' Zicklin index score).

(collectively, the "E&S Characteristics")

The promotion of the E&S Characteristics (which are considered as part of the NB ESG Quotient) will be measured and reported in aggregate at Portfolio level in the Portfolio's periodic reporting.

The Sub-Investment Manager applies the: (i) Global Standards Policy; (ii) Controversial Weapons Policy; and (iii) the Thermal Coal Involvement Policy, when determining what investments to make for the Portfolio. Further details on these screening/exclusion policies are set out in the "Sustainable Investment Criteria" section of the Prospectus.

The Sub-Investment Manager will also manage the Portfolio in accordance with the ESG Policy on a continuous basis. The Sub-Investment Manager has fully integrated the ESG Policy into its overall investment process, in particular, the portfolio construction process. A summary of the ESG Policy is detailed in Annex VI to the Prospectus and is available on the Neuberger Berman website: www.nb.com/esg.

Additionally, the Portfolio is prohibited from purchasing the securities of issuers that are involved in tobacco production such as cigars, cigarettes, e-cigarettes, smokeless tobacco, dissolvable and chewing tobacco. This also includes issuers that grow or process raw tobacco leaves.

In addition, as described in the "Investment Approach" section, the Portfolio also contributes towards the achievement of the SDGs by engaging with 100% of

[corporate issuers and setting KPIs aligned to the SDGs which relate to the issuers' products, services, operations or processes, with the goal of having a positive outcome on the environment and/or society.](#)

Please also refer to Annex VI of the Prospectus which contains additional SFDR disclosures which are applicable to this Portfolio.

APPENDIX II

NEUBERGER BERMAN INVESTMENT FUNDS PLC (the "Company")

An umbrella fund with segregated liability between sub-funds

REGISTERED OFFICE

70 Sir John Rogerson's Quay
Dublin 2

Registered in Ireland under registration no. 336425

NOTICE IS HEREBY GIVEN that the extraordinary general meeting (the "**EGM**") of the Neuberger Berman Global High Yield Bond Fund, a sub-fund of the Company (the "**Portfolio**"), will be held at 70 Sir John Rogerson's Quay, Dublin 2, Ireland on 4 April 2022 at 10 am (Irish time) for the transaction of the following business:

1. That the Objective Change and the Policy Changes, as described in the Circular containing the Notice of Extraordinary General Meeting, be approved in the form, or substantially in the form, set out in the Circular, subject to any such further non-material amendments as may be agreed by the directors of the Company, subject to the approval of the Central Bank of Ireland.

We consider the health of attendees at the EGM and the staff of the Company's service providers a top priority. **Attendees are strongly encouraged to appoint a proxy to vote at the EGM on their behalf, as the preferred means of fully and safely exercising their rights, as personal attendance at the EGM may present a risk to themselves and others.** Insofar as practicable, the EGM will be held in accordance with the guidance of the Health Service Executive (the Irish public health authority), meaning:

- (a) the EGM will be as brief as possible;
- (b) personal attendance is not recommended and the Shareholder is encouraged to appoint proxies to vote on its behalf;
- (c) refreshments will not be provided; and
- (d) in the event that a change of venue is necessitated, this will be communicated to the Shareholder as far in advance of the EGM as practicable.

BY ORDER OF THE BOARD

**FOR AND ON BEHALF OF MATSACK TRUST LIMITED
COMPANY SECRETARY**

Dated: 7 March 2022

NOTES

- A member entitled to attend and vote at the EGM is entitled to appoint one or more proxies to attend and vote instead of him or her.

- A proxy need not be a member of the Company.
- In the case of a body corporate, the proxy form must be either under seal of the body corporate or under the hand of an officer or attorney duly authorised in writing.
- The proxy form together with the power of attorney or other authority, if any, under which it is signed, or a notarially certified copy of that power or authority, must be deposited at 70 Sir John Rogerson's Quay, Dublin 2, Ireland no later than 48 hours before the time of the EGM. An emailed or faxed copy will be accepted and can be sent for the attention of fscompliance@matheson.com or Gavin Coleman on fax number (+) 353 1 232 3333.
- The accidental omission to give notice of the EGM to, or the non-receipt of notice of the EGM by, any person entitled to receive notice shall not invalidate the proceedings at the EGM.
- If you have subscribed through a distributor or other intermediary and your shares are held in their name, please contact your distributor or other intermediary if you wish to vote or appoint a proxy with respect to the EGM and for information regarding the deadlines for doing so.

APPENDIX III

**NEUBERGER BERMAN INVESTMENT FUNDS PLC
(the "Company")**

I/We _____ (the "**Member**")

of _____

being a shareholder in the Neuberger Berman Global High Yield Bond Fund (the "**Portfolio**") hereby appoint the chairperson of the extraordinary general meeting (or failing him/her), Gavin Coleman of 70 Sir John Rogerson's Quay, Dublin 2, Ireland or (failing him), Michael Kavanagh of 70 Sir John Rogerson's Quay, Dublin 2, Ireland or (failing him), Philip Lovegrove of 70 Sir John Rogerson's Quay, Dublin 2, Ireland or (failing him), Dualta Counihan of 70 Sir John Rogerson's Quay, Dublin 2, Ireland or (failing him), Barry O'Connor of 70 Sir John Rogerson's Quay, Dublin 2, Ireland or (failing him) _____ of _____ as the proxy of the Member to attend, speak and vote for the Member on behalf of the Member at the extraordinary general meeting of the Portfolio, a sub-fund of the Company, to be held at 10 am (Irish time) on 4 April 2022 and at any adjournment of the meeting.

The proxy is to vote as follows:

<i>Voting instructions to Proxy (choice to be marked with an "X")</i>			
<i>Name or description of resolution:</i>	<i>In Favour</i>	<i>Abstain</i>	<i>Against</i>
ORDINARY RESOLUTION:			
That the Objective Change and the Policy Changes, as described in the Circular containing the Notice of Extraordinary General Meeting, be approved in the form, or substantially in the form, set out in the Circular, subject to any such further non-material amendments as may be agreed by the directors of the Company, subject to the approval of the Central Bank of Ireland.			
<i>Unless otherwise indicated the proxy shall vote as he or she thinks fit</i>			
Signature of Member _____ Dated:			

NOTES:

- (a) In the case of a body corporate, the proxy form must be either under seal of the body corporate or under the hand of an officer or attorney duly authorised in writing.
- (b) The proxy form together with the power of attorney or other authority, if any, under which it is signed, or a notarially certified copy of that power or authority, must be deposited at 70 Sir

John Rogerson's Quay, Dublin 2, Ireland no later than 48 hours before the time of the EGM. An emailed or faxed copy will be accepted and can be sent for the attention of Fidelma Burke to fscompliance@matheson.com or to fax number (+) 353 1 232 3333.

- (c) Unless otherwise instructed the proxy will vote as he/she thinks fit.
- (d) In the case of joint shareholders the signature of the first named shareholder will suffice.
- (e) If you wish to appoint a proxy of your choice delete the words "the chairperson of the extraordinary general meeting" and insert the name of the proxy you wish to appoint (who need not be a member of the Company).
- (f) The returning of a form of proxy duly completed will not prevent a member in the Company from attending and voting in person.
- (g) If you have subscribed through a distributor or other intermediary and your shares are held in their name, please contact your distributor or other intermediary if you wish to vote or appoint a proxy with respect to the extraordinary general meeting and for information regarding the deadlines for doing so.

APPENDIX IV

LETTER OF REPRESENTATION

To: The Directors
Neuberger Berman Investment Funds plc
70 Sir John Rogerson's Quay
Dublin 2
Ireland

Dear Sirs

We, _____,
of _____

(the "**Company**") being a shareholder in the Neuberger Berman Global High Yield Bond Fund (the "**Portfolio**") hereby notify you that pursuant to a resolution of our board of directors, the chairperson of the extraordinary general meeting to consider the ordinary resolution, or (failing him/her), Gavin Coleman of 70 Sir John Rogerson's Quay, Dublin 2, Ireland or (failing him), Michael Kavanagh of 70 Sir John Rogerson's Quay, Dublin 2, Ireland or (failing him), Philip Lovegrove of 70 Sir John Rogerson's Quay, Dublin 2, Ireland or (failing him), Dualta Counihan of 70 Sir John Rogerson's Quay, Dublin 2, Ireland or (failing him), Barry O'Connor of 70 Sir John Rogerson's Quay, Dublin 2, Ireland or (failing him) _____ of _____ has been appointed as the Company's representative to attend and vote on the Company's behalf at the extraordinary general meeting of the Portfolio to be held at 70 Sir John Rogerson's Quay, Dublin 2, Ireland, on 4 April 2022, at the time set out in the circular dated 7 March 2022, or any adjournment thereof.

Such person so appointed shall be entitled to exercise the same powers at any such meeting in respect of our shares in the Portfolio as we could exercise if we were an individual shareholder and is empowered to sign any necessary consents in connection with any such extraordinary general meeting, with respect to any special business on behalf of the Company.

Signed _____
Duly authorised officer
For and on behalf of

Date _____

Neuberger Berman Investment Funds plc.

IMPORTANT INFORMATION

The sub-funds of NEUBERGER BERMAN INVESTMENT FUNDS PLC (the “Company”) offered in this Singapore Prospectus and as set out in Paragraph 2 of this Singapore Prospectus (each a “Portfolio” and collectively, the “Portfolios”) are recognised schemes under the Securities and Futures Act (Chapter 289) of Singapore (the “SFA”). A copy of this Singapore Prospectus has been lodged with the MAS. The MAS assumes no responsibility for the contents of this Singapore Prospectus. Registration of the Registered Singapore Prospectus by, and lodgement of this Singapore Prospectus with, the MAS does not imply that the SFA, or any other legal or regulatory requirements have been complied with. The MAS has not, in any way, considered the investment merits of the Portfolios.

This Singapore Prospectus does not constitute an offer or solicitation to anyone in any jurisdiction in which such offer or solicitation is not authorised or to any person to whom it is unlawful to make such offer or solicitation and may only be used in connection with this offering of securities to which it relates by distribution as contemplated herein.

This Singapore Prospectus is a replacement prospectus lodged with the MAS on 12 January 2022. This Singapore Prospectus replaces the Singapore Prospectus for the Company that was registered by the MAS on 6 May 2021 (“Registered Singapore Prospectus”) as replaced by a replacement prospectus lodged with the MAS on 8 July 2021, which was in turn replaced by a replacement prospectus lodged with the MAS on 17 August 2021 and shall be valid for a period of 12 months after the date of registration of the Registered Singapore Prospectus with the MAS (i.e., up to and including 5 May 2022) and shall expire on 6 May 2022.

The directors of the Company (the “Directors”) are responsible for the issue of this Singapore Prospectus. To the best of their knowledge and belief, the facts stated in this Singapore Prospectus are true and accurate in all material respects as at the date of this Singapore Prospectus and there are no other material facts, the omission of which makes any statement in this Singapore Prospectus misleading.

You should seek professional advice to ascertain (a) the possible tax consequences, (b) the legal requirements which may be relevant to the subscription, holding or redemption of shares in the Portfolios (“Shares”) and (c) any foreign exchange restrictions or exchange control requirements which you may encounter under the laws of the countries of your citizenship, residence, domicile and which may be relevant to the subscription, holding or redemption of Shares.

Before investing in any Portfolio, you should carefully consider the risks involved in such investment, as set out in Paragraph 8 of this Singapore Prospectus. You may wish to consult your independent financial adviser about the suitability of a Portfolio for your investment needs.

You should note that each of the Portfolios may use financial derivative instruments subject to the general restrictions outlined under “Investment Restrictions” in the “Investment Objectives and Policies” section in the Irish Prospectus. The Portfolios may use financial derivative instruments for efficient portfolio management purposes (i.e. the reduction of risks or costs to the Portfolio or the generation of additional capital or income for the Company) and/or for hedging against market movements, currency exchange or interest rate risks.

Unless otherwise specified in the relevant Supplement to the Irish Prospectus, the Portfolios may also use financial derivative instruments for optimising returns or in other words for investment purposes but, in any event, the following Portfolios will not use financial derivative instruments extensively or primarily for investment purposes:

- Neuberger Berman High Yield Bond Fund
- Neuberger Berman Short Duration High Yield Bond Fund
- Neuberger Berman European High Yield Bond Fund
- Neuberger Berman Global High Yield Bond Fund
- Neuberger Berman Short Duration Emerging Market Debt Fund
- Neuberger Berman US Small Cap Fund
- Neuberger Berman US Multi Cap Opportunities Fund
- Neuberger Berman US Small Cap Intrinsic Value Fund
- Neuberger Berman China Equity Fund

- **Neuberger Berman Emerging Markets Equity Fund**
- **Neuberger Berman 5G Connectivity Fund**
- **Neuberger Berman Systematic Global Sustainable Value Fund**
- **Neuberger Berman Next Generation Mobility Fund**
- **Neuberger Berman US Real Estate Securities Fund**
- **Neuberger Berman Global Real Estate Securities Fund**
- **Neuberger Berman Corporate Hybrid Bond Fund**

Investors in the Neuberger Berman Uncorrelated Strategies Fund should note that this Portfolio uses alternative investment strategies and the risks inherent in the Portfolio are not typically encountered in more traditional funds, which may lead to substantial or total loss of their investment in the Portfolio. The Portfolio is not suitable for investors who cannot afford to take on such risks and investors are advised to consider their own financial circumstances and the suitability of the Portfolio as part of their investment portfolio.

Shares are offered on the basis of the information contained in this Singapore Prospectus and the documents referred to in this Singapore Prospectus. No person is authorised to give any information or to make any representation in connection with the offering of Shares other than as contained in this Singapore Prospectus and, if given or made, such information or representation must not be relied upon as having been authorised by the Company, the Directors, the Manager or any sub-investment manager. Any subscription made by any person on the basis of statements or representations not contained in or inconsistent with the information and representations contained in this Singapore Prospectus will be solely at the risk of the purchaser.

The delivery of this Singapore Prospectus or the issue of Shares in any Portfolio shall not, under any circumstances, create any implication that the affairs of the Company, the Portfolios, the Manager or any sub-investment manager have not changed since the date of this Singapore Prospectus. This Singapore Prospectus may be updated from time to time to reflect material changes and you should investigate whether any more recent Singapore Prospectus is available.

The Shares are capital markets products other than prescribed capital markets products (as defined in the Securities and Futures (Capital Markets Products) Regulations 2018) and Specified Investment Products (as defined in MAS Notice SFA 04-N12: Notice on the Sale of Investment Products and MAS Notice FAA-N16: Notice on Recommendations on Investment Products).

IMPORTANT: PLEASE READ AND RETAIN THIS SINGAPORE PROSPECTUS FOR FUTURE REFERENCE.

1. THE COMPANY

- 1.1 The Company is an investment company with variable capital incorporated in Ireland on 11 December 2000 as a public limited company. The Company is constituted as an umbrella fund with segregated liability between sub-funds. The Company was authorised by the Central Bank of Ireland (the “**Central Bank**”) as an Undertaking for Collective Investment in Transferable Securities (“**UCITS**”) under the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations 1989. The European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations 1989 have been updated and amended by the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations 2011 (S.I. 352 of 2011) as amended.
- 1.2 The Memorandum and Articles of Association of the Company may be inspected during normal Singapore business hours at the Singapore Representative’s office. Information from the register of members of the Company on participants who subscribed for or purchased their units in Singapore is available during normal Singapore business hours at the Singapore Representative’s office.
- 1.3 Further information on the Company is set out in the Irish Prospectus under the sections headed “Important Information” and “The Company”.

[#] Hedged Class

* This Share Class has not been launched as at the date of this Singapore Prospectus. Information on the Initial Offer Period and Initial Offer Price for this Share Class is set out in the relevant Supplement to the Irish Prospectus under the “Subscriptions” section.

^ Shares in the A1 Classes may only be acquired by investors which enter into a separate agreement with the Distributor. You should contact your Singapore distributor on whether you may subscribe for Shares in an A1 Class through such Singapore distributor.

- 2.2 The Share Classes are denominated in different currencies (referred to as the “**class currency**”) and have different distribution policies as indicated in the names of the Share Classes. Details on the distribution policies of the Share Classes are set out in the Irish Prospectus under the section headed “Distribution Policy”. **Certain distributing classes may pay dividends out of capital and such dividends may result in an immediate decrease in the net asset value of the relevant Shares.** Hedged Classes are classes which hedge between the class currency of the Hedged Class and the Base Currency of the Portfolio, with the goal of providing a similar return for the Hedged Class to that which would have been obtained for a Share Class denominated in the Base Currency of the Portfolio. Further details are set out in the Irish Prospectus under the section headed “The Company” under the sub-heading “Share Class Hedging”. Details on the different Share Classes (including the different subscription and/or redemption and/or charges and/or fee arrangements applicable to such Share Classes) are set out in Annex II and the relevant Supplement to the Irish Prospectus.
- 2.3 **Any sub-fund or share class referenced in the Irish Prospectus but which is not set out in Paragraph 2.1 above is not being offered for sale pursuant to this Singapore Prospectus as at the date of this Singapore Prospectus.**

3. MANAGEMENT

3.1 The Directors

Further information on the Directors is set out below and in the Irish Prospectus under the section headed “Management and Administration” under the sub-heading “The Directors and Secretary”. The list of Directors may be changed from time to time without notice.

Gráinne Alexander (resident in Ireland) is an independent non-executive director. A Fellow of the Society of Actuaries in Ireland, she has worked in the investment industry for over twenty years with experience as a senior executive in fund management, investment strategy, investment consultancy and company management. She was a European partner at Mercer Investment Consulting (involved in the establishment of Mercer’s funds business) and following that, chief executive at F&C Management’s Irish asset management firm, F&C Ireland. She was also a director of the Irish Association of Investment Managers and a director of Cayman listed funds. Gráinne is currently a non-executive director of a broad range of investment fund complexes with investment managers Goldman Sachs, Neuberger Berman and Mercer Europe. She received a Diploma in Company Direction from the Institute of Directors in 2013. She is responsible for managing the business affairs of the Company.

Tom Finlay (resident in Ireland) is a barrister by profession who worked for 26 years (February 1975 to May 2001) for Bank of Ireland Asset Management (the Fund Management division of the Bank of Ireland Group). His most recent role was head of Bank of Ireland Asset Management’s Irish Business. In the early 1990’s, Mr Finlay had a direct involvement in setting up Bank of Ireland Group’s fund administration and custodial services to international clients. Over the last 19 years, Mr Finlay’s main professional activity has been acting as an independent director on a number of Funds and Management Company Boards. He also operates as an executive coach. Mr Finlay has a long-standing involvement with the Irish Association of Pension Funds (IAPF) being a Council Member from 1981-1986 and again from 1990-2001. He was Chairman of the Association from 1999-2001. Between 2001 and 2005, Mr Finlay was a member of the Irish Pension Board; In addition, he chaired their key Policy Committee.

Michelle Green (resident in the United Kingdom) joined Neuberger Berman in 2015. Michelle is General Counsel for Neuberger Berman EMEA and is responsible for the legal, compliance and operational risk functions across EMEA and LatAm. Prior to joining Neuberger Berman, Michelle was General Counsel and Chief Legal and Risk Officer for Hermes Investment Management for 17 years. Michelle began her career at the City law firm Druces LLP. Michelle graduated from Middlesex University with an LLB Honours degree in Law as well as the Maxwell Law Prize. Michelle subsequently continued her legal training at the College of Law in London. In 2017, Michelle was awarded an honorary doctorate from Middlesex University. For the last five years Michelle has served as a director of a number of Irish UCITS funds and QIAIFs and is presently a director of the Company and Neuberger Berman Investment Funds II plc.

Naomi Daly (resident in Ireland) currently serves as a full time specialist independent director to a number of Irish domiciled investment funds. She has worked as an independent director and also as an employee and a senior executive of MPMF Fund Management (Ireland) Limited from 2013 to 2018. Prior to joining MPMF Fund Management (Ireland) Limited, Ms Daly spent 10 years with Goldman Sachs in London where she held a number of positions driving operational excellence in the hedge fund industry. From 2007- 2013, Ms Daly led the team responsible for growing the Goldman Sachs Managed Account Platform AUM across multiple jurisdictions (including Ireland, the Cayman Islands and Luxembourg). She was responsible for developing a product to facilitate investment by institutional investors into hedge funds via the Goldman Sachs Managed Account Platform. From 2003-2007, Ms Daly worked as part of the hedge fund consulting team in prime brokerage advising start-up hedge fund managers with launch and on-going operational support required to grow their businesses. Ms Daly was previously a business analyst at Allied Irish Bank in Dublin. Ms Daly holds a Bachelor of Arts Degree (Hons) in Business Studies and an MSc in International Business, from the U.C.D. Michael Smurfit Graduate School of Business. She is responsible for managing the business affairs of the Company.

Alex Duncan (resident in the United Kingdom) joined Neuberger Berman in 2018 and is Director of Operations and Infrastructure in EMEA. Alex has held leadership positions in several asset management firms, most recently serving as chief operating officer at ESO Capital, a European private debt firm, as well as Ashmore and New Star. Alex has a BA in Economics from the University of Durham and is a Fellow of the Institute of Chartered Accountants in England and Wales. He began his career in 1996 as an associate at Price Waterhouse. He is responsible for managing the business affairs of the Company.

3.2 **The Manager and its directors and key executives**

3.2.1 **The Manager**

The Company has appointed Neuberger Berman Asset Management Ireland Limited (the “**Manager**”) to act as its management company pursuant to the Management Agreement. The Manager, subject to the overall responsibility and supervision of the Directors, is responsible for portfolio and risk management services, administrative services, marketing services and certain distribution services to the Company and the Portfolios and, more generally, is responsible for the day to day management of the business affairs of the Company.

In accordance with the UCITS Regulations and with the prior approval of the Company, the Manager has delegated certain of its duties and powers, namely (a) the administration of the Company’s affairs, including responsibility for the preparation and maintenance of the Company’s records and accounts and related fund accounting matters (including the calculation of the Net Asset Value per Share) and Shareholder registration and transfer agency services to the Administrator; (b) the investment, management and disposal of some or all of the assets of each Portfolio to the Sub-Investment Managers; and (c) the marketing, distribution and sale of Shares of certain Portfolios to the Distributors, with the power to sub-delegate these responsibilities to such companies or persons as it may from time to time determine in accordance with the requirements of the Central Bank. Notwithstanding the foregoing, the Manager will also provide investment management and advisory services to certain Portfolios, as specified in the relevant Supplements.

The Manager is domiciled in Ireland and is authorised by the Central Bank to carry on the regulated activity of managing UCITS for the purposes of the UCITS Regulations.

The Manager has been managing collective investment schemes and/or discretionary funds since 2019.

Further information on the Manager (including information on its delegation of certain functions to third parties) is set out in the Irish Prospectus under the section headed “Management and Administration” under the sub-heading “The Manager”.

Past performance of the Manager is not necessarily indicative of its future performance or of the Portfolios.

3.2.2 **Directors of the Manager**

The list of directors of the Manager may be changed from time to time without notice.

James Harvey (UK Resident), Managing Director, joined Neuberger Berman in 2016. James is Managing Director and Head of Finance for EMEA, Latin American and Asia (Asia Pacific and East Asia). Prior to joining Neuberger Berman, James was Head of Finance for Hermes Investment Management. Prior to this, he was at Morgan Stanley Investment Management and JP Morgan, serving in both Finance and Operational roles. He began his career at KPMG, holds a MA Honours in English Language and Literature from the University of St. Andrews and is a Fellow of the Institute of Chartered Accountants.

Michelle Green (UK Resident), please refer to biographical details provided in Paragraph 3.1 above.

Dik van Lomwel (UK Resident), CFA, Managing Director, joined Neuberger Berman in 1997. Dik is the Head of Neuberger Berman for Europe Middle East and Africa (EMEA) and Latin America and is a member of Neuberger Berman’s Partners and Operating Committees. Prior to this role, Dik ran Distribution for Europe and Middle East within the Investment

Management Division of Lehman Brothers and prior to that held several sales management roles within its Equity Division. Previously, Dik worked at UBS and ABN AMRO Hoare Govett in Institutional Sales. Dik graduated from the University Groningen with a Masters in Finance and attended the UCLA Graduate Summer School and has been awarded the Chartered Financial Analyst designation.

Grainne Alexander (Irish Resident), please refer to biographical details provided in Paragraph 3.1 above.

Mary Brady (Irish Resident), Executive Director & Chief Executive Officer of the Manager, rejoined Neuberger Berman in 2019 and is responsible for overseeing the activities of the Manager and its branch offices. Previously, Mary spent 11 years at Neuberger Berman in the US from 2004 to 2015. As Managing Director, Institutional Client Coverage, Mary led Neuberger Berman's global institutional client service teams across the US, Europe and Asia with ultimate responsibility for servicing our institutional client base from 2008-2015. Mary came to Neuberger Berman in 2004 following its acquisition by Lehman Brothers and drove the consolidation of the Fixed Income asset management division within the broader Lehman Brothers and Neuberger Berman asset management platform, with particular focus on client management activities. Prior to joining Neuberger Berman, Mary spent 10 years with J.P. Morgan Administration Services (Ireland) Limited, joining in 1994 early in the emergence of the Dublin funds industry, first in a number of Fund Accounting roles and later building out the Administrator's Client Service capabilities. Mary was awarded a Bachelor of Business Studies with First Class Honours from the Institute of Public Administration in 1998.

John O'Callaghan (Irish Resident), Managing Director, joined Neuberger Berman Group LLC in 2020. John O'Callaghan has over 20 years' experience in the financial services industry. John transferred back to Ireland from the US in 2019 where he had been based in Boston working for a number of asset management firms including Fidelity, GMO, Oechsle and Putnam, mostly in client coverage roles focused on Multi Asset Class solutions. John started his career at Bank of Ireland in Dublin as a Portfolio Manager. John has a combination of Portfolio Management and Client Coverage skills. John holds a B.A.I., M.A., Computer Engineering from Trinity College and is a CFA Charter Holder.

3.2.3 Key Executives of the Manager

The list of key executives of the Manager may be changed from time to time without notice.

John O'Callaghan is Chief Investment Officer of Neuberger Berman Asset Management Ireland Limited (NBAMIL). Prior to joining the firm in February 2020, John spent over 20 years in the US with a variety of firms including Putnam, GMO, and Fidelity covering global equities and multi-asset class strategies. The first part of John's career was at Bank of Ireland Asset Management in Dublin where he was a portfolio manager and head of institutional client services. John graduated from Trinity College with a degree in computer engineering and was the first Irish resident to be awarded the CFA Charter.

Ugo Lancioni, Managing Director, joined the firm in 2007. Ugo is the Head of Global Currency and serves as a co-portfolio manager on multiple fixed income strategies. He is a member of the senior investment team that sets overall portfolio strategy for Global Investment Grade. Ugo also leads the Currency team in determining FX exposures across various portfolio strategies. Prior to joining the firm, Ugo was employed by JP Morgan for 11 years. With their Asset Management group, he gained experience as a currency strategist and portfolio manager in charge of the FX risk in the fixed income book. Prior to this, Ugo worked as a trader at JP Morgan Bank, both in London and Milan, in the short-term interest rate trading group, where he was responsible for foreign exchange forwards market-making and derivatives trading. Ugo received a Master's in Economics from the University "La Sapienza" in Rome.

Rob Drijkoningen, Managing Director, joined the firm in 2013. Rob is a Co-Head of the Emerging Markets Debt team and Senior Portfolio Manager responsible for over \$29.0 bn in AuM in EMD and 34 investment professionals. Rob joined the firm after working at ING Investment Management for almost 18 years, most recently as the global co-head of the

Emerging Markets Debt team responsible for managing over \$16 billion in assets. In 1990, Rob began his career on the sell-side at Nomura and Goldman Sachs, after which he became senior investment manager for global fixed income at ING Investment Management. In 1997 he became global head of the Emerging Markets Debt team and in 2004 was named global head of the Emerging Markets Debt and High Yield teams. From 2007 through 2009 Rob created and led ING Investment Management’s Multi-Asset Group in Europe, managing mandates across asset classes, including fixed income, equities, real estate and commodities. In 2009 he was appointed global head of emerging markets for both emerging markets equity and debt strategies. Rob earned his Macro-Economics degree from Erasmus University in Rotterdam and has authored numerous articles on emerging markets debt subjects. He is a member of DSI.

3.3 The Sub-Investment Managers and Investment Advisers

3.3.4 Further information on the Sub-Investment Managers is set out in the Irish Prospectus under the section headed “Management and Administration” under the sub-heading “The Sub-Investment Managers”.

3.3.5 Past performance of the Sub-Investment Managers and the Investment Advisers is not necessarily indicative of their future performance or of the Portfolios.

4. OTHER PARTIES**4.1 The Singapore Representative and Agent for Service of Process**

Neuberger Berman Singapore Pte. Limited has been appointed by the Manager as the representative in Singapore (the “**Singapore Representative**”) for each of the Portfolios, to carry out or procure the carrying out of certain administrative functions in respect of the Portfolios in Singapore as required under section 287(13) of the SFA.

In addition, the Singapore Representative has also been appointed by the Manager to act as the Company’s local agent in Singapore to accept service of process.

4.2 **The Administrator and Registrar**

The Manager has appointed Brown Brothers Harriman Fund Administration Services (Ireland) Limited to act as Administrator of the Company responsible for performing the day to day administration of the Company and for providing fund accounting for the Company, including the calculation of the Net Asset Value of the Company and the Shares and for providing registrar, transfer agency and related support services to the Company.

Further information on the Administrator is set out in the Irish Prospectus under the section headed “Management and Administration” under the sub-heading “The Administrator and Registrar”.

4.3 **The Depositary**

The Company has appointed Brown Brothers Harriman Trustee Services (Ireland) Limited to act as Depositary for the safekeeping of all the investments, cash and other assets of the Company. The Depositary is regulated by the Central Bank.

The Depositary may delegate its safekeeping duties only in accordance with the UCITS Regulations. However, its liability under the UCITS Regulations will not be affected by any delegation of its safekeeping functions. The Depositary has delegated safekeeping of the Company’s assets to Brown Brothers Harriman & Co., its global sub-custodian, through which it has access to Brown Brothers Harriman & Co.’s global network of sub-custodians.

The criteria upon which a sub-custodian is appointed may include factors such as the expertise, competence and standing of that sub-custodian.

Further information on the Depositary is set out in the Irish Prospectus under the section headed “Management and Administration” under the sub-heading “The Depositary”.

4.4 **The Distributors**

Information on the distributors is set out in the Irish Prospectus under the section headed “Management and Administration” under the sub-heading “The Distributors”.

4.5 **The Auditors**

The auditors of the Company are Ernst & Young.

5. **INVESTMENT OBJECTIVE, FOCUS AND APPROACH**

5.1 Information on the general investment objectives and policies of the Company and the Portfolios is set out in the Irish Prospectus in the section headed “Investment Objectives and Policies”. The Portfolios have different investment objectives and invest in different types of investment instruments. Each Portfolio will be invested in accordance with the investment objective, focus and approach applicable to such Portfolio as specified in the relevant Supplement to the Irish Prospectus. The section headed “Investment Objective” in the Supplement to the Irish Prospectus for each Portfolio is reproduced in the table below. Please refer to the relevant Supplement to the Irish Prospectus for the full investment objective, focus and approach of a Portfolio.

Portfolios	Investment Objectives
Fixed Income Supplement	
Neuberger Berman Strategic Income Fund	Maximize total return from high current income and long-term capital appreciation by opportunistically investing in a diversified mix of fixed rate and floating rate debt securities under varying market environments with a focus on downside protection.
Neuberger Berman Corporate Hybrid Bond Fund	Achieve an attractive level of total return (income plus capital appreciation).
Neuberger Berman Global Opportunistic Bond Fund	Achieve an attractive level of total return (income plus capital appreciation) by opportunistically investing in a diversified mix of fixed rate and floating rate debt

Portfolios	Investment Objectives
	securities globally under varying market environments with a focus on downside protection.
Neuberger Berman Global Flexible Credit Fund	To seek to maximise total return from current income and long-term capital appreciation by investing in a diversified mix of global fixed rate and floating rate debt securities, including high income securities.
High Yield Supplement	
Neuberger Berman High Yield Bond Fund	Achieve an attractive level of total return (income plus capital appreciation) from the high yield fixed income market.
Neuberger Berman Short Duration High Yield Bond Fund	Generate high current income by investing in short-duration high yield fixed income securities that comply with the terms of the Sustainable Exclusion Policy and seek to produce investment returns, support better-functioning capital markets and have a positive social and environmental impact.
Neuberger Berman European High Yield Bond Fund	Seeks to maximise current income whilst preserving capital by investing in the European high yield fixed income market.
Neuberger Berman Global High Yield Bond Fund	Seeks to maximise current income whilst preserving capital by investing in the global high yield fixed income market.
Emerging Market Debt Supplement	
Neuberger Berman Emerging Market Debt – Local Currency Fund	<p>The Portfolio aims to achieve a target average return of 1-2% over its benchmark before fees over a market cycle (typically 3 years) from investing primarily in local currencies and local interest rates of Emerging Market Countries.</p> <p>Investors should note that the target return is not guaranteed over a market cycle, a 12-month or any period and the Portfolio's capital is at risk. Investors should also note that, over the course of a market cycle, there may be significant periods of time during which the performance of the Portfolio will deviate from the targeted return and the Portfolio may experience periods of negative return. There can be no guarantee that the Portfolio will ultimately achieve its investment objective.</p>
Neuberger Berman Emerging Market Debt – Hard Currency Fund	<p>The Portfolio aims to achieve a target average return of 1-2% over its benchmark before fees over a market cycle (typically 3 years) by investing primarily in Hard Currency-denominated debt issued in Emerging Market Countries.</p> <p>Investors should note that the target return is not guaranteed over a market cycle, a 12-month or any period and the Portfolio's capital is at risk. Investors</p>

Portfolios	Investment Objectives
	<p>should also note that, over the course of a market cycle, there may be significant periods of time during which the performance of the Portfolio will deviate from the targeted return and the Portfolio may experience periods of negative return. There can be no guarantee that the Portfolio will ultimately achieve its investment objective.</p>
<p>Neuberger Berman Emerging Market Corporate Debt Fund</p>	<p>The Portfolio aims to achieve a target average return of 1-2% over its benchmark before fees over a market cycle (typically 3 years) by investing primarily in debt issued in Emerging Market Countries.</p> <p>Investors should note that the target return is not guaranteed over a market cycle, a 12-month or any period and the Portfolio's capital is at risk. Investors should also note that, over the course of a market cycle, there may be significant periods of time during which the performance of the Portfolio will deviate from the targeted return and the Portfolio may experience periods of negative return. There can be no guarantee that the Portfolio will ultimately achieve its investment objective.</p>
<p>Neuberger Berman Short Duration Emerging Market Debt Fund</p>	<p>The Portfolio aims to achieve a target average return of 3% over cash before fees over a market cycle (typically 3 years) by investing in a diversified selection of Hard Currency-denominated short duration sovereign and corporate debt issued in Emerging Market Countries.</p> <p>Investors should note that the target return is not guaranteed over a market cycle, a 12-month or any period and the Portfolio's capital is at risk. Investors should also note that, over the course of a market cycle, there may be significant periods of time during which the performance of the Portfolio will deviate from the targeted return and the Portfolio may experience periods of negative return. There can be no guarantee that the Portfolio will ultimately achieve its investment objective.</p>
<p>Neuberger Berman Emerging Market Debt Blend Fund</p>	<p>The Portfolio aims to achieve a target average return of 1-3% over its benchmark before fees over a market cycle (typically 3 years) from a blend of Hard Currency-denominated debt issued in Emerging Market Countries, local currencies of Emerging Market Countries and debt issued by corporate issuers in Emerging Market Countries.</p> <p>Investors should note that the target return is not guaranteed over a market cycle, a 12-month or any period and the Portfolio's capital is at risk. Investors should also note that, over the course of a market cycle, there may be significant periods of time during which</p>

Portfolios	Investment Objectives
	<p>the performance of the Portfolio will deviate from the targeted return and the Portfolio may experience periods of negative return. There can be no guarantee that the Portfolio will ultimately achieve its investment objective.</p>
<p>Neuberger Berman Asian Debt – Hard Currency Fund</p>	<p>The Portfolio aims to achieve a target average return of 1-1.5% over its benchmark before fees over a market cycle (typically 3 years) by primarily investing in Hard Currency-denominated debt issued in Asian countries.</p> <p>Investors should note that the target return is not guaranteed over a market cycle, a 12-month or any period and the Portfolio’s capital is at risk. Investors should also note that, over the course of a market cycle, there may be significant periods of time during which the performance of the Portfolio will deviate from the targeted return and the Portfolio may experience periods of negative return. There can be no guarantee that the Portfolio will ultimately achieve its investment objective.</p>
<p>Neuberger Berman Emerging Market Debt Sustainable Investment Grade Blend Fund</p>	<p>The Portfolio aims to achieve a target average return of 1% over its benchmark before fees over a market cycle (typically 3 years) by investing primarily in a blend of investment grade rated hard and local emerging market currency denominated debt, issued by sovereigns, quasi-sovereigns, sub-sovereigns and corporate credits in Emerging Market Countries that meet the Sustainable Criteria.</p> <p>Investors should note that the target return is not guaranteed over a market cycle, a 12-month or any period and the Portfolio’s capital is at risk. Investors should also note that, over the course of a market cycle, there may be significant periods of time during which the performance of the Portfolio will deviate from the targeted return and the Portfolio may experience periods of negative return. There can be no guarantee that the Portfolio will ultimately achieve its investment objective.</p>
<p>US Equity Supplement</p>	
<p>Neuberger Berman US Small Cap Fund</p>	<p>Achieve capital growth through the selection of investments applying analysis of company key metrics and macro economic factors.</p>
<p>Neuberger Berman US Multi Cap Opportunities Fund</p>	<p>Achieve capital growth through the selection of investments using systematic, sequential research.</p>
<p>Neuberger Berman US Small Cap Intrinsic Value Fund</p>	<p>Seek to achieve long term capital growth.</p>

Portfolios	Investment Objectives
China Supplement	
Neuberger Berman China Equity Fund	Achieve an attractive level of total return (income plus capital appreciation) from the Greater China equity market.
Global Equity Supplement	
Neuberger Berman Emerging Markets Equity Fund	Achieve long-term capital growth.
Quantitative and Multi Asset Supplement	
Neuberger Berman Systematic Global Sustainable Value Fund	The Portfolio seeks to achieve long term capital growth from investing primarily in a portfolio of global equity holdings that comply with the Sustainable Criteria (as this term is defined within the “Sustainable Investment Criteria” section of the Irish Prospectus).
Real Estate Securities Supplement	
Neuberger Berman US Real Estate Securities Fund	Seek total return through investment in real estate securities, emphasizing both capital appreciation and current income.
Neuberger Berman Global Real Estate Securities Fund	The Portfolio seeks total return through investment in securities of real estate companies located globally, emphasizing both capital appreciation and current income.
Liquid Alternatives Supplement	
Neuberger Berman US Long Short Equity Fund	Seek long term capital appreciation with a secondary objective of principal preservation.
Neuberger Berman U.S. Equity Index Putwrite Fund	To seek long term growth of capital and income generation.
Neuberger Berman China Bond Fund Supplement	
Neuberger Berman China Bond Fund	<p>The Portfolio aims to achieve a target average return of 3% over its benchmark before fees over a market cycle (typically 3 years) by primarily investing in fixed income instruments issued in the Chinese local currency markets.</p> <p>Investors should note that the target return is not guaranteed over a market cycle, a 12-month or any period and the Portfolio’s capital is at risk. Investors should also note that, over the course of a market cycle, there may be significant periods of time during which the performance of the Portfolio will deviate from the targeted return and the Portfolio may experience periods of negative return. There can be no guarantee</p>

Portfolios	Investment Objectives
	that the Portfolio will ultimately achieve its investment objective.
Multi Strategy Supplement	
Neuberger Berman Uncorrelated Strategies Fund	<p>The Portfolio aims to achieve a target average return of 5% over cash after Portfolio Costs over a market cycle (typically 3 years) from a diversified portfolio of Uncorrelated¹ investment strategies.</p> <p>Investors should note that the target return is not guaranteed over a market cycle, a 12-month or any period and the Portfolio's capital is at risk. Investors should also note that, over the course of a market cycle, there may be significant periods of time during which the performance of the Portfolio will deviate from the targeted return and the Portfolio may experience periods of negative return. There can be no guarantee that the Portfolio will ultimately achieve its investment objective.</p>
Thematic Equity Supplement	
Neuberger Berman 5G Connectivity Fund	<p>The Portfolio aims to achieve a target average return of 3-5% over its benchmark before fees over a market cycle (typically 3 years) from investing primarily in a portfolio of global equity holdings, focusing on companies that are involved or derive benefit from Next Generation Connectivity².</p> <p>Investors should note that the target return is not guaranteed over a market cycle, a 12-month or any period and the Portfolio's capital is at risk. Investors should also note that, over the course of a market cycle, there may be significant periods of time during which the performance of the Portfolio will deviate from the targeted return and the Portfolio may experience periods of negative return. There can be no guarantee that the Portfolio will ultimately achieve its investment objective.</p>
Neuberger Berman Next Generation Mobility Fund	<p>The Portfolio seeks to achieve long-term capital appreciation through investing primarily in a portfolio of global equity holdings, focusing on companies that are involved or derive benefit from Next Generation Mobility, which may include companies which operate within the long-term trend of the proliferation of autonomous, electric, and connected vehicles.</p>

¹ "Uncorrelated" means strategies which are expected by the Manager and the Sub-Investment Manager to demonstrate low correlation to traditional asset classes (such as global equity and global fixed income markets) over a full investment cycle.

² "Next Generation Connectivity" means mobile internet and 5G connectivity.

- 5.2 Information on the investment restrictions which apply to the Company as well as on the portfolio investment techniques and instruments (including financial derivative instruments) which may be employed by the Manager for the Portfolios is set out in the Irish Prospectus in the sections headed “Investment Restrictions”, “Borrowing Policy” and “Portfolio Investment Techniques” and in the relevant sections of the relevant Supplement to the Irish Prospectus.
- 5.3 The Manager employs an appropriate risk management process in respect of the Company which is designed to enable it to accurately measure, monitor and manage the various risks associated with the use of financial derivative instruments for each Portfolio and will not use any financial derivative instruments which have not been described in its risk management process.
- 5.4 There is no assurance that the use of financial derivative instruments by a Portfolio will achieve the desired result and there may be a risk of loss of capital or that the volatility of a Portfolio’s net asset value may increase due to the use of financial derivative instruments.
- 5.5 At the discretion of the Manager or the Sub-Investment Manager, each Portfolio may enter into repurchase and reverse repurchase agreements (“**Repo Contracts**”) and securities lending transactions (“**Securities Lending Agreements**”), subject to the conditions and limits set out in the Central Bank UCITS Regulations, in respect of each of the types of assets in which the Portfolio may invest, as described in the “*Instruments / Asset Classes*” section of the relevant Supplement to the Irish Prospectus for the Portfolio, and subject to the conditions and limits set out in the Irish Prospectus. Any such Repo Contracts and/or Securities Lending Agreements (as the case may be) may be used for efficient portfolio management purposes. Save for the Neuberger Berman Corporate Hybrid Bond Fund, Neuberger Berman Emerging Market Debt – Hard Currency Fund, Neuberger Berman Emerging Markets Equity Fund, Neuberger Berman European High Yield Bond Fund, Neuberger Berman Global High Yield Bond Fund, Neuberger Berman High Yield Bond Fund, Neuberger Berman Short Duration Emerging Market Debt Fund, Neuberger Berman Short Duration High Yield Bond Fund, Neuberger Berman Strategic Income Fund, and Neuberger Berman US Long Short Equity Fund, the Portfolios currently do not utilise Securities Lending Agreements. The Portfolios currently do not utilise Repo Contracts.
- (i) The maximum proportion of the Neuberger Berman China Bond Fund’s Net Asset Value that can be subject to Repo Contracts is 90%. The expected proportion of the Neuberger Berman China Bond Fund’s Net Asset Value that will be subject to Repo Contracts is 60%.
 - (ii) In respect of the Neuberger Berman Short Duration Emerging Market Debt Fund, Repo Contracts may also be used for liquidity management purposes, subject to the limit of 10% of its Net Asset Value. The expected proportion of the Neuberger Berman Short Duration Emerging Market Debt Fund’s Net Asset Value that will be subject to Repo Contracts for liquidity management purposes is 5%.
 - (iii) Information on conflicts of interest which may arise and how they are mitigated is set out in the Irish Prospectus in the section headed “General” under the sub-heading “Conflicts of Interest” and in the section headed “Management and Administration” under the sub-heading “The Depositary”.
 - (iv) Information on risks associated with Repo Contracts is set out in the Irish Prospectus under the section headed “Investment Risks” under the sub-heading “Repurchase/Reverse Repurchase Risk”.
 - (v) Income generated from Repo Contracts accrues solely to the Portfolios.
- 5.6 **The Portfolios may have or may be expected to have (1) medium to high levels of volatility; or (2) higher levels of price volatility than generally associated with fixed income funds. If this is the case, this will be disclosed in the Supplement to the Irish Prospectus in relation to the relevant Portfolio under the section titled “Investment Approach”, “Risk” and/or “Typical Investor Profile”. In particular, please note the following Portfolios may have or be expected to have medium to high levels of volatility:**

Portfolios
Fixed Income Supplement
Neuberger Berman Strategic Income Fund
Neuberger Berman Global Opportunistic Bond Fund
Emerging Market Debt Supplement
Neuberger Berman Emerging Market Debt – Local Currency Fund
Neuberger Berman Emerging Market Debt – Hard Currency Fund
Neuberger Berman Emerging Market Corporate Debt Fund
Neuberger Berman Short Duration Emerging Market Debt Fund
Neuberger Berman Emerging Market Debt Blend Fund
Neuberger Berman Asian Debt – Hard Currency Fund
Neuberger Berman Emerging Market Debt Sustainable Investment Grade Blend Fund
US Equity Supplement
Neuberger Berman US Small Cap Fund
Neuberger Berman US Multi Cap Opportunities Fund
Neuberger Berman US Small Cap Intrinsic Value Fund
Global Equity Supplement
Neuberger Berman Emerging Markets Equity Fund
Quantitative and Multi Asset Supplement
Neuberger Berman Systematic Global Sustainable Value Fund
Real Estate Securities Supplement
Neuberger Berman US Real Estate Securities Fund
Neuberger Berman Global Real Estate Securities Fund
China Supplement
Neuberger Berman China Equity Fund
Liquid Alternatives Supplement
Neuberger Berman US Long Short Equity Fund
Neuberger Berman China Bond Fund Supplement
Neuberger Berman China Bond Fund
Multi Strategy Supplement
Neuberger Berman Uncorrelated Strategies Fund
Thematic Equity Supplement
Neuberger Berman 5G Connectivity Fund
Neuberger Berman Next Generation Mobility Fund

- 5.7 Certain of the Portfolios use the Commitment Approach (as described in the “Definitions” section of the Irish Prospectus), and other Portfolios may use the value at risk (“VaR”) approach (as described in the “Definitions” section of the Irish Prospectus) to measure and monitor their global exposure to financial derivatives.
- 5.8 In respect of Portfolios that use the VaR approach:
- 5.8.1 The expected level of leverage, based on the sum of the notional of the derivatives used, is disclosed in the Supplement to the Irish Prospectus in relation to the relevant Portfolio under the section titled “Risk”. You should note that higher levels of leverage may be experienced. In particular, the Neuberger Berman Global Opportunistic Bond Fund and the Neuberger Berman Uncorrelated Strategies Fund which uses the VaR approach may be leveraged up to approximately 550% and 750% of its net asset value respectively as a result of its use of financial derivative instruments, although you should note that higher levels of leverage may be experienced. This expected leverage figure is calculated using the sum of the notionals of the derivatives used, as required by the Central Bank of Ireland. Using this methodology does not reflect any netting or hedging that the Neuberger Berman Global Opportunistic Bond Fund and/or Neuberger Berman Uncorrelated Strategies Fund may have in place.
- If the relative VaR approach is used, the relative VaR of the Portfolio will be no greater than twice the VaR of the Portfolio’s benchmark. The Portfolio’s benchmark is disclosed in the Supplement to the Irish Prospectus in relation to the relevant Portfolio. The rationale for using such benchmark is that such benchmark is considered to be appropriate for the Portfolio with regard to its investment objective.
- 5.8.2 If the absolute VaR approach is used, the absolute VaR limit is disclosed in the Supplement to the Irish Prospectus in relation to the relevant Portfolio. The rationale for the absolute VaR limit is that it is a regulatory limit.
- 5.9 In respect of Portfolios that use the Commitment approach, the Global Exposure (as defined in the Irish Prospectus) of the Portfolio will not exceed the Portfolio’s Net Asset Value at any time.

6. INVESTOR PROFILE

The typical investor profile for these Portfolios is as specified in the relevant Supplement to the Irish Prospectus. You should also refer to investment objectives for these Portfolios as specified in the relevant Supplement to the Irish Prospectus.

You should consult your financial adviser if in doubt whether this product is suitable for you.

7. FEES AND CHARGES

7.1 Fees and charges you will have to pay in respect of each Share Class offered in this Singapore Prospectus

Initial Sales Charge	Up to 5.00% The Initial Sales Charge will be applied to the subscription amount and may be charged by distributors. Please note that the Initial Sales Charge will be applied to the subscription amount and the number of Shares issued will be based on the Net Asset Value per Share which may be swung as further described in Paragraph 9.3 of this Singapore Prospectus.
Realisation Fee	Nil (Maximum 3.00%) Currently, no Realisation Fee is charged.
Exchange Charge	Up to 1.00% The Exchange Charge will be applied to the subscription amount into the new Portfolio and may be charged by

	distributors. Please note that the subscription amount will be based on the Net Asset Value per Share of the outgoing Portfolio which may be swung as further described in Paragraph 9.3 of this Singapore Prospectus.
Other fees	Duties and charges to cover dealing costs and to act as an anti-dilution levy may be imposed on a subscription or redemption*. Please refer to the section headed “Fees and Expenses” in the Irish Prospectus under the sub-heading “Duties and Charges” for further information.

**Where swing pricing is adopted in respect of a Portfolio on a Dealing Day (please refer to Paragraph 9.3 of this Singapore Prospectus for further information on swing pricing), no other duties and charges (to act as an anti-dilution levy) will be applied in respect of subscriptions to or redemptions from the relevant Portfolio.*

You may have to pay additional fees to the distributors depending on the specific nature of services provided to you. You should check with the distributors to confirm the applicable fees and charges (including any additional taxes or commissions, where applicable) you may incur on the subscription, redemption or exchange of Shares in Singapore.

7.2 Fees and charges payable by a Portfolio in respect of each Share Class offered in this Singapore Prospectus

Neuberger Berman Next Generation Mobility Fund	1.70% per annum		

Further information on fees and expenses is set out in the Irish Prospectus in the section headed “Fees and Expenses”.

Notes:

1. The maximum Management Fee is 2.50% per annum.
2. The Management Fee, Custody Fee and Administration Fee are based on the Net Asset Value of the relevant Portfolio after taking into account any swing pricing, if applied, as further described in Paragraph 9.3 of this Singapore Prospectus.
3. Of which:
 - (a) 40% to 100% of the Management Fee is retained by the Manager; and
 - (b) 0% to 60%³ of the Management Fee is paid by the Manager to the financial adviser (as trailer fee).

7.3 Neuberger Berman Uncorrelated Strategies Fund (Performance Fees)

In respect of Neuberger Berman Uncorrelated Strategies Fund, an External Adviser may be entitled to receive a performance fee (the “**Adviser Performance Fee**”) payable out of the Portfolio’s assets and as described more fully below. However, for the avoidance of doubt, no performance fees will be paid to the Manager, Sub-Investment Manager or the Internal Adviser on any portion of the Portfolio’s assets which is managed by the Manager, Sub-Investment Manager or the Internal Adviser acting in the capacity of an Adviser. Potential investors into the Neuberger Berman Uncorrelated Strategies Fund should note that the methodology used to calculate the Adviser Performance Fee is not identical to the methodology used to calculate performance fees in the MAS’ Code on Collective Investment Schemes.

All Classes in the Portfolio are PF Classes (i.e. Classes in respect of which the Directors intend to charge a performance fee in accordance with the Articles and as specified in the “Fees and Expenses” section of the Irish Prospectus and the relevant Supplement to the Irish Prospectus).

³ Your financial adviser is required to disclose to you the amount of trailer fee it receives from the Manager. Please note that the trailer fee percentages are subject to change from time to time without prior notification.

Definitions

Allocated Portion	The part of the Portfolio for which an External Adviser is responsible.
Calculation Period	The Calculation Period shall normally run from 1 January to 31 December in each year except that: <ul style="list-style-type: none"> • in the case of the initial appointment of an External Adviser, the Calculation Period will run from the date of appointment to 31 December; • in the case of the termination of an External Adviser, the Calculation Period will terminate on the date of the termination; and • in the case of the termination of the Sub-Investment Management Agreement in any year, the Calculation Period will terminate on the date of the termination.
Crystallisation	The point at which any Adviser Performance Fee becomes payable to the External Adviser. Crystallisation in respect of an External Adviser will occur either (i) at the end of the Calculation Period; (ii) due to the Manager or Sub-Investment Manager reducing the capital allocated to the relevant Allocated Portion (iii) termination of the appointment of that External Adviser.
High Water Mark	In respect of an External Adviser, the greater of: (i) the Net Asset Value of its Allocated Portion at its appointment; and (ii) the value that that Allocated Portion has achieved at the end of any previous Calculation Period in respect of which an Adviser Performance Fee was paid, adjusted for any subscriptions and/or redemptions affecting the Allocated Portion.

Methodology

For each Calculation Period in which the net asset value of the Allocated Portion exceeds the High Water Mark (net of all allocated costs before the deduction of any accrued Performance Fee, provided that in doing so it is in the Shareholder's best interest), the Adviser Performance Fee payable will be equal to the increase in the Allocated Portion's net asset value above the High Water Mark, multiplied by the relevant External Adviser's Adviser Performance Fee rate, as agreed with the Manager and the Sub-Investment Manager, which shall not exceed 20%.

The Adviser Performance Fee will be calculated and accrued daily as at each valuation point. The Adviser Performance Fee is calculated on the unswung net asset value of the relevant Allocated Portion, i.e. before any adjustment for swing pricing (for more information on "swing pricing" please see the "*Determination of Net Asset Value – Adjustments of Valuations and Swing Pricing*" section of the Irish Prospectus).

Portfolio expenses (excluding Management Fees) are allocated pro rata to each Allocated Portion and to the portion of the Portfolio's assets that are not allocated to an External Adviser and the Adviser Performance Fee in respect of each Allocated Portion is calculated and paid after the deduction of the portion of such expenses which is attributable to the relevant Allocated Portion.

The Adviser Performance Fee will normally be payable to an External Adviser in arrears within 30 Business Days of 31 December each year. However, in the event of the Crystallisation of an Adviser Performance Fee during a Calculation Period, the accrued Adviser Performance Fee in respect of such amounts will be payable within 30 Business Days of the end of the calendar quarter during which the Crystallisation occurred.

Crystallised Adviser Performance Fees shall remain in the Portfolio until paid to the External Adviser and shall not participate in subsequent gains and losses of the Allocated Portion. Crystallised Adviser Performance Fees shall not be used or made available to satisfy redemptions or pay any fees and expenses of the relevant Allocated Portion, the Portfolio or the Company (other than Adviser Performance Fees payable to the External Adviser).

The Depositary shall verify the calculation of any Adviser Performance Fee and ensure that it is not open to the possibility of manipulation.

Investors should note that, as the Adviser Performance Fee is calculated and may be payable to an External Adviser with respect to the performance of its Allocated Portion and not the performance of the Portfolio as a whole, it is possible that the Portfolio could pay an Adviser Performance Fee to an External Adviser in circumstances where the overall performance of the Portfolio as a whole is negative. This could occur where, for example, during a Calculation Period one External Adviser's Allocated Portion performs well but the remaining External Advisers' Allocated Portions perform negatively and the aggregate total of the negative performance exceeds that of the positive performance of the External Adviser receiving the Adviser Performance Fee.

Adviser Performance Fees are payable on realised and unrealised capital gains, which for the avoidance of doubt includes investment income, taking into account realised and unrealised losses at the end of the Calculation Period. Consequently, Adviser Performance Fees may be paid on unrealised gains which may subsequently never be realised.

External Advisers may charge research expenses to the Portfolio through the provision of an annual research.

Worked Examples

Examples 1 to 3 show how the Adviser Performance Fee is calculated, accrued and crystallised.

- All valuation points fall within one Calculation Period, hence the High Water Mark is solely adjusted from allocations to or from an External Adviser.
- The examples are based on starting capital of US\$100,000,000 and the Allocable Portfolio Capital is adjusted for inflows or outflows from the Portfolio.
- The Allocated Portion Net Value reflects the expenses that have been assigned to each External Adviser.
- The Net Asset Value per Share reflects the accrual of the Adviser Performance Fee.

Portfolio

Valuation point	1	2	3	4
NAV per Share	US\$10.000	US\$10.100	US\$9.900	US\$10.300

Allocations		US\$2,500,000		

Example 1

Investor A acquires Shares at valuation point 1 for US\$10.000 each.

	Acquisition of Shares	Accrual of Adviser Performance Fees				
		Adviser A	Adviser B	Adviser C	Adviser D	Portfolio
Valuation point 1	US\$10.000	US\$0	US\$0	US\$0	US\$0	US\$0
Valuation point 2		US\$240,000	US\$45,000	US\$0	US\$0	US\$285,000
Valuation point 3		US\$187,000	US\$43,890	US\$0	US\$99,000	US\$329,890
Valuation point 4		US\$334,030	US\$0	US\$0	US\$0	US\$334,030

Example 2

Investor B acquires Shares at valuation point 3 for US\$9.900 each, with US\$329,775 of Adviser Performance Fees accrued within the NAV.

	Acquisition of Shares	Accrual of Adviser Performance Fees				
		Adviser A	Adviser B	Adviser C	Adviser D	Portfolio
Valuation point 1		US\$0	US\$0	US\$0	US\$0	US\$0
Valuation point 2		US\$240,000	US\$45,000	US\$0	US\$0	US\$285,000
Valuation point 3	US\$9.900	US\$187,000	US\$43,890	US\$0	US\$99,000	US\$329,890
Valuation point 4		US\$334,030	US\$0	US\$0	US\$0	US\$334,030

Example 3

Investor C acquires Shares at valuation point 3 for US\$9.900 each, with US\$329,775 of Adviser Performance Fees accrued within the NAV.

	Acquisition of Shares	Accrual of Adviser Performance Fees				
		Adviser A	Adviser B	Adviser C	Adviser D	Portfolio
Valuation point 1	US\$10.000	US\$0	US\$0	US\$0	US\$0	US\$0
Valuation point 2		US\$240,000	US\$45,000	US\$0	US\$0	US\$285,000
Valuation point 3		US\$187,000	US\$43,890	US\$0	US\$99,000	US\$329,890
Valuation point 4	US\$10.300	US\$334,030	US\$0	US\$0	US\$0	US\$334,030

SCENARIOS⁴

All scenarios show the value of the entire Portfolio, each External Adviser has an allocation of US\$25,000,000

Scenario 1

	Period One	Period Two	Period Three
Portfolio GAV	4% growth	-2% growth	3% growth
Adviser A Allocated Portion Growth	8% growth	-5% growth	4% growth
Adviser A High Water Mark	US\$25,000,000	US\$26,948,000	US\$26,948,000
Adviser B Allocated Portion Growth	-1% growth	1% growth	7% growth
Adviser B High Water Mark	US\$25,000,000	US\$25,000,000	US\$25,000,000
Adviser C Allocated Portion Growth	3% growth	1% growth	3% growth
Adviser C High Water Mark	US\$25,000,000	US\$25,698,000	US\$25,957,907
Adviser D Allocated Portion Growth	6% growth	-4% growth	-1% growth
Adviser D High Water Mark	US\$25,000,000	US\$26,448,000	US\$26,448,000

	Period One	Period Two	Period Three
	4% growth	-2% growth	3% growth
Gross Value of Shares at year end	US\$104,000,000	US\$100,149,336	US\$102,120,314
Management Fee 0.75%	US\$780,000	US\$751,120	US\$765,902
Other Expenses 0.20%	US\$208,000	US\$200,299	US\$204,241
Initial Net Asset Value of Shares at year end	US\$103,012,000	US\$99,197,917	US\$101,150,171
Adviser A Performance Fee (20% over High Water Mark)	US\$389,600	US\$-	US\$-
Adviser B Performance Fee (20% over High Water Mark)	US\$-	US\$-	US\$339,457
Adviser C Performance Fee (20% over High Water Mark)	US\$139,600	US\$51,981	US\$129,544
Adviser D Performance Fee (20% over High Water Mark)	US\$289,600	US\$-	US\$-
Total Fees Paid	US\$1,806,800	US\$1,004,400	US\$1,439,144
Final Net Asset Value of Shares at year end	US\$102,193,200	US\$99,145,936	US\$100,681,170

⁴ Investors should note that these scenarios are purely intended to be illustrative of the impact of different investment performance and have been simplified in some non-material respects to aid this understanding. For example, management fees and other expenses are in reality accrued on a daily basis but their calculation is presented in a simplified manner here for ease of review.

Management Fee

A management fee may, depending upon the arrangements with that Adviser, also be paid to an Adviser in respect of its Allocated Portion. The Manager shall pay the management fee payable to any Adviser out of the fees payable to the Manager by the Company.

Neuberger Berman Uncorrelated Strategies Fund does not adopt typical equalisation methodology to achieve equalisation of Performance Fees. There is no adjustment of equalisation credit or equalisation losses on an individual shareholder basis based on the timing that the relevant shareholder subscribes or redeems the relevant shares during a Calculation Period. Nevertheless, the

performance fee has already been factored into the net asset value of the Portfolio based on which shareholders buy and sell Shares of the Portfolio.

8. RISK FACTORS

8.1 General

You should consider and understand the risks of investing in a Portfolio. There can be no assurance that a Portfolio will achieve its investment objectives. You should be aware that the price of Shares, and the income from them, may fall or rise. Your investment in a Portfolio may suffer losses and you may not get back your original investment in a Portfolio. An investment in high yield securities by a Portfolio does not necessarily imply high dividend distribution for its Share Classes.

8.2 Specific risks

8.2.1 Credit risk

Where a Portfolio invests in corporate fixed income securities, corporate issuers of fixed income securities may fail to meet their interest repayments, or repay debt, which may result in the Portfolio suffering temporary or permanent losses. This risk is greater for investments with a lower credit rating.

8.2.2 Credit risk – Sovereign debt risk

Where a Portfolio invests in government/sovereign fixed income securities, the Portfolio will be exposed to direct or indirect consequences of political, social and economic changes in various countries by investing in sovereign debts. These factors may affect a particular government's willingness to make timely payments for its debt obligations. Investment in sovereign debts issued or guaranteed by governments may involve a high degree of risk, as default can occur if the government or sovereign entity is not able or willing to repay the principal and/or interest when due and the Portfolio may suffer significant losses as a result.

8.2.3 Country concentration risk

Where a Portfolio's investments are concentrated in a particular country, information on the risks associated with such investments is set out in the Irish Prospectus under the section headed "Investment Risks" under the sub-heading "Concentration Risk". This should be noted in particular in respect of the Neuberger Berman High Yield Bond Fund, Neuberger Berman Short Duration High Yield Bond Fund, Neuberger Berman US Small Cap Fund, Neuberger Berman US Multi Cap Opportunities Fund, Neuberger Berman US Small Cap Intrinsic Value Fund, Neuberger Berman China Equity Fund, Neuberger Berman US Real Estate Securities Fund, Neuberger Berman US Long Short Equity Fund, Neuberger Berman U.S. Equity Index Putwrite Fund and Neuberger Berman China Bond Fund.

8.2.4 Exchange rate risks

The Base Currency of the Portfolios is US Dollars or Euros or CNY and not Singapore Dollars. If your reference currency is Singapore Dollars, you will therefore be exposed to exchange rate risks.

Further information on exchange rate risks associated with an investment into the Portfolios is set out in the Irish Prospectus under the section headed "Investment Risks" under the sub-headings "Currency Risk" and "Share Class Currency Designation Risk". Information on how the Manager and Sub-Investment Managers may hedge the currency exchange risks is also set out in the Irish Prospectus under the section headed "Portfolio Investment Techniques".

8.2.5 Liquidity risks associated with redemptions of Shares

As of the date of this Singapore Prospectus, the Portfolios are not listed in Singapore and there is no secondary market for the Portfolios in Singapore. Therefore, you can only redeem your Shares in Singapore by submitting redemption requests as described in this Singapore Prospectus. In addition, in certain circumstances as specified in the Irish Prospectus, your right to redeem your Shares may be suspended or your redemption may be deferred for a period.

8.2.6 Epidemics, Pandemics, Outbreaks of Disease and Public Health Issues

The activities of the Company, the Manager and the Sub-Investment Managers, their respective operations and the Company's investments could be adversely affected by outbreaks of disease, epidemics and public health issues either regionally or globally, despite effective business continuity plans being in place.

Any major public health issue could affect individual issuers or related groups of issuers, which would be reasonably likely to adversely affect the business, financial condition and operations of the Company, the Manager and the Sub-Investment Managers.

The ability of the Manager and Sub-Investment Managers and their service providers to operate and implement the Portfolios' investment strategies and objectives may also be affected as a result of any outbreak or disease epidemics, which can ultimately have an adverse impact on the Company's value.

Further information on risks associated with epidemics, pandemics, outbreaks of diseases and public health issues is set out in the Irish Prospectus under the section headed "Investment Risks" under the sub-heading "Epidemics, Pandemics, Outbreaks of Disease and Public Health Issues".

8.2.7 Others

Information on other risks which you should consider before investing in a Portfolio is set out in the Irish Prospectus under the section headed "Investment Risks" and in the relevant sections of the relevant Supplement to the Irish Prospectus.

The above risk factors and those contained in the Irish Prospectus are not purported to be an exhaustive list of the risks which you should consider before investing into any Portfolio.

9. SUBSCRIPTION FOR SHARES

9.1 Subscription Procedure

You may purchase Shares in Singapore through appointed distributors or sub-distributors in Singapore ("**Singapore Distributors**") on any Dealing Day.

To purchase Shares, please:

- fill out the application form prescribed by the Singapore Distributor through which you are purchasing Shares; and
- send your properly completed application form, together with any relevant supporting documents and your payment for the Shares as may be advised by the Singapore Distributor, to the Singapore Distributor.

Subscriptions using Supplementary Retirement Scheme ("**SRS**") monies are currently available through certain Singapore Distributors only. You should contact the relevant Singapore Distributors to check on the availability of such subscriptions. If you intend to purchase Shares using monies in your SRS account, you should instruct the relevant SRS operator bank to withdraw from your SRS account payment for the Shares. If cleared funds from your SRS account are not received in respect of your application for Shares, your application will be deemed to be rejected.

Details on the terms and conditions of subscriptions are set out in the Irish Prospectus under the section headed "Subscriptions & Redemptions". **The Company and the Manager may, in their sole discretion, reject any subscription in whole or in part without reason.**

You should also contact the relevant Singapore Distributor to check whether any additional terms and conditions are imposed by such Singapore Distributor.

9.2 Minimum Initial Subscription and Minimum Subsequent Subscription

The Minimum Initial Subscription for a Portfolio is set out below.

Share Class	Minimum Initial Subscription
AUD A and A1 Classes	AUD 1,000
CNY A Classes	CNY 10,000
EUR A Class	EUR 1,000

Share Class	Minimum Initial Subscription
SGD A and A1 Classes	SGD 1,000
USD A and A1 Classes	USD 1,000

The Directors may, in their absolute discretion, waive the Minimum Initial Subscription Amount for each Share Class. There is currently no Minimum Subsequent Subscription Amount imposed. Singapore Distributors may impose different amount requirements or a minimum subsequent subscription amount on their clients. You should check with the relevant Singapore Distributor whether any such requirements are imposed.

9.3 **Dealing Deadline and Pricing Basis**

Shares are issued on a forward pricing basis. Accordingly, the issue price of Shares shall not be ascertainable at the time of application. The issue price of Shares is based on the Net Asset Value of the relevant Share Class which will vary from day to day. Information on the calculation of the Net Asset Value is set out in the Irish Prospectus under the section headed “Determination of Net Asset Value”. The Manager may, where it so determines, adjust (“**swing**”) the Net Asset Value of a Portfolio to attempt to mitigate the potentially dilutive effects of dealing on the Net Asset Value on any Dealing Day on which there are net subscriptions or redemptions in the Portfolio above a certain predefined threshold of the Portfolio⁵. The direction of the swing will depend on whether there are net subscriptions or redemptions in the relevant Portfolio on the relevant Dealing Day. For example, if the relevant Portfolio is experiencing net inflows, its Net Asset Value will be swung upwards, so that the incoming shareholders are effectively bearing the costs of the dealing that their subscriptions generate by paying a higher Net Asset Value per Share than they would otherwise be charged. Conversely, where there are net redemptions in the Portfolio, the Net Asset Value will be swung downwards, so that the outgoing investors are effectively bearing the costs of the dealing that their redemptions generate by receiving a lower Net Asset Value per Share than they would otherwise receive.

The maximum swing in normal market circumstances where swing pricing is adopted is not expected to exceed 1.5% of the Net Asset Value on the relevant Dealing Day. You should note that in extreme market conditions the factor may exceed that level. While the purpose of swing pricing is to mitigate the potentially dilutive effects of net subscriptions or redemptions in a Portfolio, the application of swing pricing may increase the variability of the Portfolio’s Net Asset Value per Share on a Dealing Day by the amount of the swing. Further information on swing pricing is set out in the Irish Prospectus under the section headed “Determination of Net Asset Value”.

In order to subscribe for Shares at their Net Asset Value per Share as of any particular Dealing Day, a properly completed subscription form must be received by the Administrator before the relevant Dealing Deadline (as set out in the relevant Supplement to the Irish Prospectus). Subscription forms received after the relevant deadline shall be held over until the following Dealing Day, unless the Directors otherwise determine.

To subscribe for Shares in Singapore, you must submit your subscription form to Singapore Distributors. You should therefore confirm with the relevant Singapore Distributor the applicable Singapore cut-off time by which that Singapore Distributor must receive your subscription application in order for you to subscribe for Shares at their Net Asset Value per Share as of a particular Dealing Day. You should also confirm with the relevant Singapore Distributor the dealing procedures prescribed by that Singapore Distributor.

9.4 **Numerical Example of How Shares are Allotted**

The following is an illustration of the number of Shares that will be issued based on an Initial Subscription of \$1,000, a notional issue price of \$1.00 per Share and a notional initial sales charge of 5%. The notional issue price is for illustrative purposes only, and the actual issue price will fluctuate

⁵ Where the Manager determines not to swing the Net Asset Value of a Portfolio, for example, when the net subscription or redemption in a Portfolio does not meet the predefined threshold, the anti-dilutive effects of swing pricing will not be applicable.

according to the Net Asset Value of the relevant Share Class as well as the applicable initial sales charge*:

$$\begin{array}{ccccccccc} \underline{\$1,000} & - & \underline{\$50} & = & \underline{\$950} & \div & \underline{\$1.00} & = & \underline{950} \\ & & & & & & & & \text{Shares} \\ & \text{Initial} & \text{Notional} & & \text{Net} & & \text{Notional} & & \text{Shares} \\ & \text{Subscription} & \text{Initial Sales} & & \text{Subscription} & & \text{Issue} & & \text{Issued} \\ & & \text{Charge of} & & & & \text{Price} & & \\ & & 5\% & & & & & & \end{array}$$

*You may also be subject to Duties and Charges on your subscription. Please refer to the section headed “Fees and Expenses” in the Irish Prospectus under the sub-heading “Duties and Charges” for further information.

9.5 Confirmation of purchase

Written confirmation of ownership will be sent to Shareholders within ten (10) Business Days of registration. If you applied for Shares through a Singapore Distributor, you should contact that Singapore Distributor for details on when you may expect to receive a confirmation of ownership of the number of Shares issued to you as the trade confirmation policy may vary amongst Singapore Distributors.

9.6 Cancellation of Subscription

You should note that the Company does not offer the right to cancel subscriptions into the Portfolios. You may wish to check with the Singapore Distributors through which you wish to purchase the Shares whether that Singapore Distributor will allow you to cancel subscriptions into the Portfolios.

10. REGULAR SAVINGS PLAN (RSP)

Investment into the Portfolios by way of a regular savings plan (“RSP”) is currently not offered by the Company.

You may wish to check with the Singapore Distributors whether any RSP is offered by the Singapore Distributors for any of the Portfolios and, if so, the applicable terms and conditions on which the RSP is being offered.

11. REDEMPTION OF SHARES

11.1 Redemption Procedure

In general, if you had purchased your Shares through a Singapore Distributor, you should redeem your Shares via the same Singapore Distributor.

To redeem your Shares, please:

- fill out the share redemption form prescribed by the relevant Singapore Distributor; and
- send your properly completed redemption form, together with such documents as may be required by the Singapore Distributor, to the Singapore Distributor.

You may redeem your Shares on any Dealing Day at the Net Asset Value per Share on such Dealing Day, provided that the outstanding redemption requests for the relevant Portfolio do not exceed the Redemption Ceiling on that Dealing Day. The Manager may refuse to redeem the number of Shares that is in excess of the applicable Redemption Ceiling and defer the redemption requests to a subsequent Dealing Day(s).

The Manager may activate liquidity management tools to help manage the liquidity of the Portfolios, such as imposition of redemption gates or suspension of redemptions as set out in the Irish Prospectus on “Subscriptions & Redemptions – Information Specific to Redemptions” and “Temporary Suspension of Dealings”. Activation of such liquidity management tools may have an adverse impact on your redemptions from the Portfolios. For instance, a suspension of redemptions will mean that you will not be able to redeem from the Portfolios during the suspension period, and an imposition of a limit on the number of Shares that can be redeemed on any Dealing Day (redemption gate) may mean you may not be able to redeem from the Portfolios on that Dealing Day.

Details on the terms and conditions of redemptions are set out in the Irish Prospectus under the section headed “Subscriptions & Redemptions”.

You should also contact the relevant Singapore Distributor to check whether any additional terms and conditions are imposed by such Singapore Distributor.

11.2 **Minimum Holding and Minimum Redemption**

The Minimum Holding for a Portfolio is set out below.

Share Class	Minimum Holding
AUD A and A1 Classes	AUD 1,000
CNY Classes	CNY 10,000
EUR Class	EUR 1,000
SGD A and A1 Classes	SGD 1,000
USD A and A1 Classes	USD 1,000

Where satisfaction of a redemption request would result in a Shareholder holding a number of Shares in a class with a value less than the Minimum Holding for that class, the Directors and the Manager shall be entitled, at their discretion, to treat the application for redemption as an application for the redemption of all that Shareholder’s Shares of the relevant class or to offer the Shareholder an opportunity to amend or withdraw the redemption request.

There is currently no minimum redemption imposed.

Singapore Distributors may impose a minimum holding or a different minimum holding and may impose a minimum redemption on their clients. You should check with the relevant Singapore Distributor whether any such requirements are imposed.

11.3 **Dealing Deadline and Pricing Basis**

Shares shall be redeemed on a forward pricing basis. Accordingly, the redemption price of Shares will not be ascertainable at the time of the redemption request. The redemption price of Shares is based on the Net Asset Value of the relevant Share Class which will vary from day to day.

Information on the calculation of the Net Asset Value (including information on swing pricing which may be exercised) is set out in the Irish Prospectus under the section headed “Determination of Net Asset Value” and in Paragraph 9.3 of this Singapore Prospectus.

In order to redeem Shares at their Net Asset Value per Share as of any particular Dealing Day, a properly completed redemption form must be received by the Administrator before the relevant Dealing Deadline (as set out in the relevant Supplement to the Irish Prospectus). Redemption forms received after the relevant deadline shall be held over until the following Dealing Day, unless the Directors otherwise determine.

If you had purchased your Shares through a Singapore Distributor, to redeem your shares, you must submit your redemption form to the same Singapore Distributor. You should therefore confirm with the relevant Singapore Distributor the applicable Singapore cut-off time by which that Singapore Distributor must receive your redemption form in order for you to redeem your Shares at their Net Asset Value per Share as of a particular Dealing Day. You should also confirm with the relevant Singapore Distributor the dealing procedures prescribed by that Singapore Distributor.

11.4 **Numerical example of calculation of redemption proceeds**

The following is an illustration of the redemption proceeds payable based on a redemption order for 1,000 Shares and a notional redemption price of \$1.10 per Share. The notional redemption price is for illustrative purposes only, and the actual redemption price will fluctuate according to the Net Asset Value of the relevant Share Class as well as any applicable realisation fee*:

$$\frac{1,000}{\text{Shares}} \times \$1.10 = \$1,100 - \$0 = \$1,100$$

<i>Redemption request</i>	<i>Redemption Price</i>	<i>Gross Redemption Proceeds</i>	<i>Redemption Charge*</i>	<i>Net Redemption Proceeds</i>
---------------------------	-------------------------	----------------------------------	---------------------------	--------------------------------

*There is currently no realisation fee payable. You may be subject to Duties and Charges on a redemption. Please refer to the section headed “Fees and Expenses” in the Irish Prospectus under the sub-heading “Duties and Charges” for further information.

11.5 **Payment of Redemption Proceeds**

Redemption proceeds will be paid in the currency received by the Administrator in respect of the subscription for the Shares being redeemed. Any currency conversion necessary will be undertaken by the Administrator at the investor’s expense at the prevailing rate on the date of redemption. Redemption proceeds will be paid within ten (10) Business Days of the relevant Dealing Day unless payment has been suspended in the circumstances described in the section headed “Temporary Suspension of Dealings” in the Irish Prospectus, although the Company will seek to make such payments within a shorter period of time where possible (up to and including within three (3) Business Days of the relevant Dealing Day) unless otherwise specified in the relevant Supplement to the Irish Prospectus. Unless otherwise agreed with the Company, redemption proceeds will be paid by electronic transfer at the expense of the relevant Shareholder.

Redemption proceeds may, with the consent of the Shareholder concerned, be paid by in specie transfer to the Shareholder in question of assets of the Company.

Further information on the payment of redemption proceeds is set out in the Irish Prospectus under the section headed “Subscriptions & Redemptions” under the sub-heading “Information Specific to Redemptions”.

If you had invested in a Portfolio via a Singapore Distributor, your redemption proceeds will normally be paid to the Singapore Distributor. You will therefore receive your redemption proceeds in such manner and within such period as agreed between you and the Singapore Distributor.

You should therefore contact your Singapore Distributor for details on the payment policy as the payment policy amongst the Singapore Distributors may vary.

If you had purchased your Shares with SRS monies, your redemption proceeds will be paid to you by transferring the proceeds to the relevant bank for credit to your SRS account or otherwise in accordance with the provisions of any applicable law, regulations or guidelines. Where your SRS account has been closed, your redemption proceeds will be paid to you in accordance with the provisions of any applicable law, regulations or guidelines.

11.6 **Mandatory Redemption of Shares**

Information on circumstances under which a Shareholder may be required by the Company to dispose of or redeem his Shares is set out in the Irish Prospectus under the section headed “Mandatory Redemption of Shares”.

12. **SWITCHING**

Except where dealings in Shares have been temporarily suspended in the circumstances described in the Irish Prospectus and subject to the restrictions in respect of certain specific classes or unless otherwise specified in the relevant Supplement to the Irish Prospectus, you may request the exchange of your Shares of any Class in a Portfolio (the “**Original Class**”) on any Business Day for Shares of any Class in any Portfolio (including the same Portfolio as the Original Class)(the “**New Class**”) provided that the New Class is available to you for subscription in Singapore.

To switch your Shares, please:

- fill out the switching form prescribed by the Singapore Distributor through which you originally purchased your Shares; and
- send your properly completed switching form, together with such documents as may be required by the Singapore Distributor, to the Singapore Distributor.

Switching forms can only be submitted to a Singapore Distributor during the opening hours for that Singapore Distributor. Therefore, in order to request for an exchange of Shares on any particular Business Day, you should confirm with the relevant Singapore Distributor the applicable Singapore

cut-off time by which that Singapore Distributor must receive your switching form as well as the dealing procedures prescribed by that Singapore Distributor.
Further information on the terms and conditions of any switching is set out in the Irish Prospectus under the section headed “Exchange Privilege”.

13. OBTAINING PRICE INFORMATION IN SINGAPORE

The Net Asset Value per Share of each Share Class in respect of each Dealing Day is normally available on www.nb.com on the following Business Day.

14. TEMPORARY SUSPENSION OF DEALINGS

The Directors may at any time, with prior notification to the Depositary, or where necessary, consultation with, temporarily suspend the issue, valuation, sale, purchase, redemption or conversion of Shares and/or the payment of redemption proceeds under certain circumstances. Further information on the temporary suspension of dealings of Shares is set out in the Irish Prospectus under the section headed “Temporary Suspension of Dealings”.

15. PERFORMANCE OF THE PORTFOLIOS

15.1 Performance of the Portfolios and their benchmarks

The past performance of each Portfolio and its benchmark (as at 26 February 2021) is set out below.

Portfolio and Share Class / Benchmark	One Year (%)	Three Years (%)	Five Years (%)	Ten Years (%)	Since inception (%)

Hedged Class

Source: Neuberger Berman

Notes:

- Performance returns are calculated in the currency of the relevant Share Class on (i) a NAV to NAV basis (ii) a NAV to NAV basis taking into account a 5% initial sales charge and nil realisation fee indicated in the table above as “with initial sales charge”, and both (i) and (ii) are calculated on the assumption that all dividends and distributions made by the relevant Share Class (if any) are reinvested, taking into account all charges which would have been payable upon such reinvestment.
- Performance returns of the benchmark for a Portfolio (save for the Neuberger Berman European High Yield Bond Fund and Neuberger Berman China Bond Fund) are calculated in USD. Hedged Classes which are designated in a currency other than USD are hedged into the Base Currency of the Portfolios (i.e. USD). Performance returns of the benchmark for the Neuberger Berman European High Yield Bond Fund are calculated in EUR. Hedged Classes which are designated in a currency other than EUR are hedged into the Base Currency of the Neuberger Berman European High Yield Bond Fund (i.e. EUR). Performance returns of the benchmark for the Neuberger Berman China Bond Fund are calculated in CNY. Hedged Classes which are designated in a currency other than CNY are hedged into the Base Currency of the Neuberger Berman China Bond Fund (i.e. CNY).
- Performance returns for Share Classes which have been incepted for less than a year as at 26 February 2021 have not been provided as a track record of at least one year as at 26 February 2021 is not available for these Share Classes.
- Performance figures are calculated after taking into account any swing pricing, if applied, as further described in Paragraph 9.3 of this Singapore Prospectus. While the purpose of swing pricing is to mitigate the potentially dilutive effects of net subscriptions or redemptions in a Portfolio, the application of swing pricing may increase the variability of the Portfolio’s Net Asset Value per Share on a Dealing Day by the amount of the swing.

15.2 **Past performance of a Portfolio and its benchmark is not necessarily indicative of the future performance of that Portfolio.**15.3 **Expense and turnover ratios**

The expense ratios of the Share Classes of the Portfolios and the turnover ratios of the Portfolios, based on the Company’s latest audited accounts as at the date of this Singapore Prospectus (for the financial year ended 31 December 2020), are set out below.

* Incepted in 2020

Notes:

- The expense ratios are calculated in accordance with the guidelines on the disclosure of expense ratios issued by the Investment Management Association of Singapore (IMAS). The following expenses (where applicable) are excluded from the calculation of the expense ratios:
 - brokerage and other transaction costs associated with the purchase and sales of investments;
 - foreign exchange gains and losses of the relevant Portfolio, whether realised or unrealised;
 - front-end loads, back-end loads and other costs arising on the purchase or sale of a foreign unit trust or mutual fund;
 - tax deducted at source or arising on income received, including withholding tax;
 - dividends and other distributions paid to Shareholders; and
 - interest expense.

The Manager agreed to waive its fees on certain Share Classes in order to cap the Portfolios' total expense ratios. These fee waivers are voluntary and may be discontinued by the Manager at any time without prior notice.
- Expense ratios of Share Classes which have not been incepted or were incepted after 31 December 2020 are not available. Expense ratios of Share Classes incepted less than a year as at 31 December 2020 are annualised.
- The turnover ratio of the relevant Portfolio's assets during the year ended 31 December 2020 is calculated based on the lesser of purchases or sales of underlying investments of the Portfolio expressed as a percentage of daily average net assets.

4. The expense ratios and turnover ratios are not audited.

16. SOFT DOLLAR COMMISSIONS / ARRANGEMENTS

The Manager shall notify the Company of any soft commission arrangements. One of the Sub-Investment Managers, Neuberger Berman Investment Advisers LLC, currently engages in soft commission arrangements on behalf of the Portfolios managed by it.

Disclosure on any soft commission arrangements entered into by the Manager will be in the periodic reports for the Company. Further information is set out in the Irish Prospectus in the section headed “General” under the sub-heading “Conflicts of Interest”.

17. CONFLICTS OF INTERESTS

Information on conflicts of interest which may arise in relation to the Portfolio is set out in the Irish Prospectus in the section headed “General” under the sub-heading “Conflicts of Interest” and in the section headed “Management and Administration” under the sub-heading “The Depositary”.

18. REPORTS

The financial year end for the Company is 31 December.

The annual report and audited annual accounts will be forwarded to Shareholders within four months of the end of the relevant accounting period and a half-yearly report (which shall include unaudited half-yearly accounts) will be forwarded to Shareholders within two months of the end of the relevant accounting period. Further information is set out in the Irish Prospectus in the section headed “General” under the sub-heading “Reports and Accounts”.

If you have invested in a Portfolio via a Singapore Distributor, such reports and accounts will normally be forwarded to that Singapore Distributor. You should therefore contact your Singapore Distributor for information on how and when you can expect to receive such reports and accounts. In addition, you may obtain copies of the latest annual report and audited annual accounts or half-yearly report and unaudited half-yearly accounts from www.nb.com or upon request from the Singapore Representative.

19. OTHER MATERIAL INFORMATION

19.1 Obtaining Supplementary Information on Risk Management

You may obtain supplementary information relating to the risk management methods employed by each Portfolio, including the quantitative limits that are applied and any recent developments in the risk and yield characteristics of the main categories of investments, upon request from the Singapore Representative.

19.2 Meetings of the Company

Information on Shareholder meetings that may be held by the Company is set out in the Irish Prospectus in the section headed “General” under the sub-heading “Meetings”.

19.3 Transfer of Shares

Shares may be transferred in line with the terms and conditions set out in the Irish Prospectus in the section headed “Transfer of Shares”.

19.4 Termination of Portfolios or Share Classes and Winding Up

The Company is established for an unlimited period and may have unlimited assets in its Portfolios. However, the Company may terminate any Portfolio or Share Class in certain circumstances, including if the Net Asset Value of the relevant Portfolio does not exceed or falls below the Base Currency equivalent of US\$75,000,000 (or such other amount as may be approved by the Directors in respect of any Portfolio). Further information is set out in the Irish Prospectus in the section headed “Termination of Portfolios or Share Classes”.

Provisions on how the Company may be wound up are also set out in the Irish Prospectus in the section headed “General” under the sub-heading “Winding Up”.

19.5 Tax Considerations

A summary of certain Irish tax consequences of the purchase, ownership and disposal of Shares by Shareholders is set out in the Irish Prospectus in the section headed "Taxation".

In addition, you should be aware that you may be required to pay income tax, withholding tax, capital gains tax, wealth tax, stamp taxes or other kinds of tax on distributions or deemed distributions of the Portfolios, capital gains within the Portfolios, whether or not realised, income received or accrued or deemed received within the Portfolios, under any foreign, state or local tax laws to which you are subject.

If you are in doubt of your tax position, you should consult your independent tax advisor.

19.6 Irish Prospectus

Other material information relating to the Portfolios is set out in the Irish Prospectus which must be read in conjunction with this Prospectus. However if you are an investor in Singapore you should note that information in Annex III of the Irish Prospectus under the sub-heading "Singapore" does not apply to your investments into the Share Classes offered in this Singapore Prospectus.

20. INSOLVENCY OF THE PARTIES

In the event of insolvency of any of the Manager, the Sub-Investment Managers, the Investment Advisers or the Depositary (as the case may be), the appointment of such party may be terminated in accordance with the relevant agreement with such party. In every case a replacement or a successor entity will be appointed in accordance with applicable laws and regulations.

21. QUERIES AND COMPLAINTS

You may visit www.nb.com for further information or contact the Singapore Representative at +65 6645 3786 during normal Singapore business hours to seek any clarification about the Portfolios.

IMPORTANT INFORMATION

This Prospectus describes Neuberger Berman Investment Funds plc (the "Company"), an investment company with variable capital incorporated in Ireland as a public limited company. The Company is constituted as an umbrella fund with segregated liability between sub-funds. The share capital of the Company will be divided into different series of Shares with each series of Shares representing a separate investment portfolio of assets ("Portfolio"). Shares of any Portfolio may be divided into different Classes to accommodate different subscription and/or redemption provisions and/or dividend and/or charges and/or fee arrangements and/or currencies including different total expense ratios. The Directors may from time to time, with the prior approval of the Central Bank, issue different series of Shares representing separate Portfolios.

As further detailed in the "*The Manager*" within the "*Management and Administration*" section, the Directors have appointed the Manager to provide the day to day management of the business affairs of the Company in accordance with the requirements of the Central Bank.

The Portfolios have different investment objectives and invest in different types of investment instruments. Each Portfolio will be invested in accordance with the investment objectives and policies applicable to such Portfolio as specified in the relevant Supplement. Each Portfolio bears its own liabilities and none of the Company, any of the service providers appointed to the Company, the Directors, any receiver, examiner or liquidator, nor any other person, will have access to the assets of a Portfolio in satisfaction of a liability of any other Portfolio. Investors should refer to the paragraph headed "*Umbrella Structure of the Company*" in the "*Investment Risks*" section for further details.

THE COMPANY

Company Structure	An investment company with variable capital and segregated liability between sub-funds incorporated in Ireland.
Incorporation Date	11 December 2000
Registration Number	336425
Company Objective	Collective investment in transferable securities and other liquid financial assets of capital raised from the public, operating on the principle of risk spreading in accordance with the UCITS Regulations. All Shareholders are entitled to the benefit of, are bound by and are deemed to have notice of, the provisions of the Memorandum and Articles of Association of the Company, copies of which are available as described in the "Documents for Inspection" section.
The Manager	Neuberger Berman Asset Management Ireland Limited.

PORTFOLIOS

Under the Articles, the Directors are required to establish a separate Portfolio, with separate records, for each series of Shares in the following manner:

- (a) the Company will keep separate books of records for each Portfolio. The proceeds from the issue of each series of Shares will be applied to the Portfolio established for that series of Shares, and the assets and liabilities and income and expenditure attributable thereto will be applied to such Portfolio;
- (b) any asset derived from another asset in a Portfolio will be applied to the same Portfolio as the asset from which it was derived and any increase or diminution in value of such an asset will be applied to the relevant Portfolio;
- (c) in the case of any asset which the Directors do not consider as readily attributable to a particular Portfolio or Portfolios, the Directors have the discretion to determine, acting in a fair and equitable manner and with the consent of the Depositary, the basis upon which any such asset will be allocated between Portfolios and the Directors may at any time and from time to time vary such basis;
- (d) any liability will be allocated to the Portfolio or Portfolios to which in the opinion of the Directors it relates or if such liability is not readily attributable to any particular Portfolio the Directors will have discretion to determine, acting in a fair and equitable manner and with the consent of the Depositary, the basis upon which any liability will be allocated between Portfolios and the Directors may at any time and from time to time vary such basis;
- (e) the Directors may, with the consent of the Depositary, transfer any assets to and from a Portfolio or Portfolios if, as a result of a creditor proceeding against certain of the assets of the Company or otherwise, a liability would be borne in a different manner from that in which it would have been borne under paragraph (d) above

or in any similar circumstances; and

- (f) where the assets of the Company (if any) attributable to the Subscriber Shares give rise to any net profit, the Directors may allocate assets representing such net profits to such Portfolio or Portfolios as they may deem appropriate, acting in a fair and equitable manner.

Shares of any particular series may, in accordance with the requirements of the Central Bank, be divided into different Classes to accommodate different dividend policies and/or charges and/or currencies and/or investments in FDI in accordance with the requirements of the Central Bank. Investors or potential investors in a Portfolio should refer to the relevant Supplement for further information on the division (if any) of the relevant series into different Classes for such purposes. The Company retains the right to offer only one Class for purchase by investors in any particular jurisdiction in order to conform with local law, custom or business practice or to offer additional Classes or Portfolios in future without Shareholder approval. The Company may adopt standards applicable to Classes of investors or transactions that permit or require the purchase of a particular Class. Any such standards shall be specified in the relevant Supplement. The creation of further Classes shall be effected in accordance with the requirements of the Central Bank.

THE SHARE CAPITAL

The authorised share capital of the Company is 500,000,040,000 Shares of no par value divided into 40,000 Subscriber Shares of no par value and 500,000,000,000 Shares of no par value. The Directors are empowered to issue up to 500,000,000,000 Shares of no par value in the Company on such terms as they think fit.

The Subscriber Shares entitle the holders to attend and vote at general meetings of the Company but do not entitle the holders to participate in the profits or assets of the Company except for a return of capital on a winding-up. The Shares entitle the holders to attend and vote at general meetings of the Company and to participate equally (subject to any differences between fees, charges and expenses applicable to different Classes) in the profits and assets of the Company. The Subscriber Shareholders shall have one vote for each Subscriber Share held.

The Company may from time to time by ordinary resolution increase its capital, consolidate the Shares or any of them into a smaller number of Shares, sub-divide the Shares or any of them into a larger number of Shares or cancel any Shares not taken or agreed to be taken by any person. The Company may by special resolution from time to time reduce its share capital in any way permitted by law.

For the avoidance of doubt, a separate pool of assets will not be maintained for each Class.

SHARE CLASS HEDGING

The Manager and the Sub-Investment Manager may employ techniques and instruments to protect against fluctuations, caused by movements in currency rates, between the class currency of the Hedged Class and the Base Currency of the Portfolio, with the goal of providing a similar return for the Hedged Class to that which would have been obtained for a Class denominated in the Base Currency of the Portfolio. While the Manager and the Sub-Investment Manager (or their agents) may attempt to hedge this currency risk, there can be no guarantee that they will be successful in doing so. In this context, foreign exchange hedging will not be used for speculative purposes. In devising and implementing its hedging strategy the Manager or Sub-Investment Manager may hedge the foreign currency exposure of the Shares to the major currencies in which the assets of the relevant Portfolio are, or are expected to be, denominated but will limit hedging to the extent of this currency exposure and the Hedged Classes will not be leveraged as a result of the hedging.

Changes in the exchange rate between the Base Currency and the class currencies of the Hedged Classes may lead to a difference in the value of the Shares in the Hedged Classes as expressed in such class currencies. The Manager and the Sub-Investment Manager will try to mitigate this risk by using techniques and instruments, including forward currency exchange contracts. Investors in the Hedged Classes should be aware that this strategy may substantially limit them from benefiting if the class currencies of the Hedged Classes fall against the Base Currency. In such circumstances, investors in the Hedged Classes may be exposed to fluctuations in the Net Asset Value per Share reflecting the gains or losses on, and the costs of, the relevant financial instruments.

As the foreign exchange hedging will be utilised solely for the benefit of the Hedged Classes, its cost and related liabilities and/or benefits will be for the account of the holders of the Hedged Classes only. Accordingly, such costs and related liabilities and/or benefits will be reflected in the Net Asset Value per Share of the Hedged Classes. Hedging transactions will be clearly attributable to a specific Hedged Class and the currency exposures of Hedged Classes denominated in different currencies may not be combined or offset. The currency exposures of the assets of a Portfolio may not be allocated to separate Hedged Classes. Where there is more than one Hedged Class in a Portfolio denominated in the same currency and it is intended to hedge the foreign currency exposure of such Hedged Classes into the Base Currency, the Manager or Sub-Investment Manager may aggregate the foreign exchange transactions entered into on behalf of such Classes and apportion the gains/losses on and the costs of the relevant financial instruments pro rata to each such Hedged Class in the Portfolio. The Manager and the Sub-Investment Manager will limit hedging to the extent of the Hedged Classes' currency exposure and the Hedged Classes will not generally be leveraged as a result of the hedging. Although a Hedged Class may not generally be leveraged as a result of the use of such techniques and instruments, the value of such instruments may be up to but may not exceed 105% of the Net Asset Value attributable to the relevant Hedged Class and will not be less than 95% of the portion of the Net Asset Value of the relevant Hedged Class which is to be hedged against this currency risk. The Manager and the Sub-Investment Manager will monitor hedging on at least a monthly basis and will reduce the level of hedging to ensure that any position that is materially in excess of 100% of the Net Asset Value shall not be carried forward from month to month.

In respect of Unhedged Classes, a currency conversion will take place at prevailing market rates on the subscription for and redemption and exchange of Shares and in respect of any distributions made in respect of such Classes.

Investors should refer to the paragraph under the heading "*Share Currency Designation Risk*" in the "*Investment Risks*" section, for a description of the risks associated with hedging the foreign currency exposure of the Hedged Classes. Investors should also note that in addition to the share class hedging described above, the Portfolios may also be hedged at portfolio level as described under "*Currency Transactions*" in the "*Portfolio Investment Techniques*" section.

VOTING RIGHTS

Subject to any special rights or restrictions for the time being attached to any Class, each Shareholder shall be entitled to such number of votes as equals the aggregate net asset value of that Shareholder's shareholding (expressed or converted into US\$ and calculated as of the relevant record date). The "relevant record date" for these purposes shall be a date being not more than thirty (30) days prior to the date of the relevant general meeting or written resolution as determined by the Directors. In relation to a resolution which in the opinion of the Directors gives or may give rise to a conflict of interest between the Shareholders of any series or Class, such resolution shall be deemed to have been duly passed only if, in lieu of being passed through a single meeting of the Shareholders of such series or Class, such resolution shall have been passed at a separate meeting of the Shareholders of each such series or Classes. All votes shall be cast by a poll of Shareholders present in person or by proxy at the relevant Shareholder meeting or by unanimous written resolution of the Shareholders.

VARIATION OF SHAREHOLDERS' RIGHTS

Under the Articles, the rights attached to each series or Class may, whether or not the Company is being wound up, be varied with the consent in writing of the holders of three-fourths of the issued Shares of that series or Class or with the sanction of a special resolution passed at a separate general meeting of the holders of the Shares of that series or Class. The rights attaching to any series or Class shall not be deemed to be varied by the creation or issue of further Shares ranking *pari passu* with Shares already in issue, unless otherwise expressly provided by the terms of issue of those Shares. The provisions of the Articles relating to general meetings shall apply to every such separate general meeting except that the necessary quorum at such a meeting shall be two persons present in person or by proxy holding Shares of the series or Class in question or, at an adjourned meeting, one person holding Shares, of the series or Class in question or his proxy.

INVESTOR RESPONSIBILITY

Prospective investors should review this Prospectus and the relevant Supplement carefully and in their entirety and consult with their legal, tax and financial advisers for independent advice in relation to: (a) the legal requirements within their own countries for the purchase, holding, exchanging, redeeming or disposing of Shares; (b) any foreign exchange restrictions to which they are subject in their own countries in relation to the purchase, holding, exchanging, redeeming or disposing of Shares; (c) the legal, tax, financial or other consequences of subscribing for, purchasing, holding, exchanging, redeeming or disposing of Shares; and (d) the provisions of this Prospectus and the relevant Supplement.

Investors should note that the information contained in the "*Typical Investor Profile*" sections in the relevant Supplement is provided for reference only. Before making any investment decisions investors should consider their own specific circumstances, including, without limitation their own risk tolerance level, financial circumstances and investment objectives.

Neither the admission of the Shares of any Portfolio to the Official List and to trading on the regulated market Euronext Dublin nor the approval of this Prospectus pursuant to the listing requirements of Euronext Dublin shall constitute a warranty or representation by Euronext Dublin as to the competence of service providers to or any party connected with the Company, the adequacy of information contained in this Prospectus or the suitability of the Company for investment purposes.

CENTRAL BANK AUTHORISATION – UCITS

The Company was authorised by the Central Bank as an Undertaking for Collective Investment in Transferable Securities under the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations 1989. The European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations 1989, have been updated and amended by the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations 2011 (S.I. 352 of 2011) as amended. All of the current Portfolios are now subject to the UCITS Regulations. **The authorisation of the Company by the Central Bank shall not constitute a warranty as to the performance of the Company and the Central Bank shall not be liable for the performance or default of the Company. Authorisation of the Company by the Central Bank is not an endorsement or guarantee of the Company by the Central Bank nor is the Central Bank responsible for the contents of this Prospectus.**

DISTRIBUTION AND SELLING RESTRICTIONS

The distribution of this Prospectus and the offering or purchase of Shares may be restricted in certain jurisdictions. This Prospectus does not constitute and may not be treated as an offer or solicitation by or to anyone in any jurisdiction in

which such offer or solicitation is not lawful or in which the person making such offer or solicitation is not qualified to do so or to anyone to whom it is unlawful to make such offer or solicitation. It is the responsibility of any persons in possession of this Prospectus and any persons wishing to apply for Shares pursuant to this Prospectus to inform themselves of and to observe all applicable laws and regulations of any relevant jurisdiction.

Further information on the Company's distribution and selling restrictions with respect to prospective investors in various jurisdictions is contained in Annex III and Annex IV to this Prospectus (including without limitation the United States).

STOCK EXCHANGE LISTING

Application may be made to Euronext Dublin for Shares of any series or Class issued and to be issued to be admitted to its Official List and to trading on the regulated market of Euronext Dublin. This Prospectus comprises Listing Particulars for the purposes of any such application for listing. Neither the admission of Shares to the Official List and to trading on the regulated market of Euronext Dublin nor the approval of this Prospectus pursuant to the listing requirements of Euronext Dublin constitutes a warranty or representation by Euronext Dublin as to the competence of the service providers or any other party connected with the Company, the adequacy of information contained in this Prospectus or the suitability of the Company for investment purposes. Listing information in respect of each of the Portfolios in respect of which an application has been made to Euronext Dublin is contained in the relevant Supplement.

The Directors do not anticipate that an active secondary market will develop in any of the Shares.

The launch and listing of various Classes within a Portfolio may occur at different times and therefore at the time of the launch of given Class(es) the pool of assets to which a given Class relates may have commenced to trade. Financial information in respect of the Company will be published from time to time, and the most recently published audited and unaudited financial information will be available to investors and potential investors upon request.

RELIANCE ON THIS PROSPECTUS

Shares are offered only on the basis of the information contained in this Prospectus and the latest audited annual accounts and any subsequent half-yearly report of the Company. No person has been authorised to give any information or to make any representation in connection with the offering of Shares other than those contained in this Prospectus and in any subsequent half-yearly or annual report for the Company and, if given or made, such information or representations must not be relied on as having been authorised by the Company, the Directors, the Manager or the Sub-Investment Manager. Statements in this Prospectus are in accordance with the law and practice in force in Ireland at the date hereof and are subject to change. Neither the delivery of this Prospectus nor the issue of Shares shall, under any circumstances, create any implication or constitute any representation that the affairs of the Company have not changed since the date hereof.

This Prospectus may also be translated into other languages. Any such translation shall only contain the same information and have the same meaning as the English language Prospectus. To the extent that there is any inconsistency between the English language Prospectus and the Prospectus in another language, this English language Prospectus will prevail, except, to the extent (but only to the extent) required by law of any jurisdiction where the Shares are sold, that in an action based upon disclosure in a Prospectus in a language other than English, the language of the Prospectus on which such action is based shall prevail. Notwithstanding the above, for as long as the Company is authorised by the Hong Kong Securities and Futures Commission, both the English and Chinese language versions of the Prospectus shall have equal standing with respect to Hong Kong investors. All disputes as to the contents of this Prospectus shall be governed in accordance with the laws of Ireland.

RISKS

Investors should be aware that investment in the Company carries with it the potential for above average risk and is only suitable for people who are in a position to take such risks. The value of Shares may go down as well as up, and investors may not get back any of the amount invested. The difference at any one time between the issue and repurchase price of Shares means that an investment in the Company should be viewed as medium- to long-term. Investment in the Company should not constitute a substantial proportion of an investor's portfolio and may not be appropriate for all investors. Risk factors for an investor to consider are set out in the "Investment Risks" section below.

Investors should be aware that the Directors may declare dividends out of capital in respect of certain Distributing Classes and that, in the event that they do, the capital of such Shares will be eroded, such distributions will be achieved by forgoing the potential for future capital growth and that this cycle may be continued until all capital in respect of the Shares is depleted. Such dividends may result in an immediate decrease of the Net Asset Value per Share. Investors in all Distributing Classes should also be aware that the payment of distributions out of capital by the Company may have different tax implications for them to distributions of income and you are therefore recommended to seek tax advice in this regard.

SUPPLEMENTS AND ANNEXES – OTHER IMPORTANT INFORMATION FOR INVESTORS

Prospective investors are advised to review the relevant Supplement, Annex II, Annex III, Annex IV and Annex VI to this Prospectus for important additional information concerning the Company, the Portfolios and the Shares, including the information contained in Annex III and IV pertaining to investment restrictions for potential investors in various jurisdictions, including without limitation, information relating to certain United States regulatory and tax matters.

INVESTMENT OBJECTIVES AND POLICIES

The Company has been established for the purpose of investing in transferable securities and other liquid financial assets in accordance with the UCITS Regulations. The investment objectives and policies for each Portfolio, and any particular investment restrictions in relation thereto, will be set out in the relevant Supplement.

The Company and each Portfolio may, subject to a limit of 10% of net assets, invest its excess cash in money market funds or UCITS eligible deposits, for cash management purposes.

Each Portfolio may, subject to an aggregate limit of 10% of net assets (unless otherwise specified in the relevant Supplement), invest in other collective investment schemes and each Portfolio (in this context, each an “Investing Portfolio”) may invest in any other Portfolio (in this context, each a “Receiving Portfolio”), provided that no Investing Portfolio may invest in any Receiving Portfolio which itself holds any Shares in any other Portfolio. No sales, exchange or redemption charges will be charged on investments by Investing Portfolios in Receiving Portfolios. In addition, investments by an Investing Portfolio in a Receiving Portfolio will not be charged management fees, sub-investment management fees or performance fees by the Receiving Portfolio but will be charged the appropriate management fees, sub-investment management fees and performance fees (if any) by the Investing Portfolio.

Notwithstanding the general UCITS investment restrictions set out at section 3.1 of the “Investment Restrictions” section below, unless otherwise specified in the relevant Supplement, no Portfolio of the Company will invest more than 10% of net assets in any one CIS.

Details of the holdings of each Portfolio and information in relation to them may be made available to Shareholders in those Portfolios on certain conditions. Shareholders are advised to contact the Manager or the Sub-Investment Managers to ascertain whether this information is available in respect of the relevant Portfolio and what conditions (if any) may be applied to its supply to Shareholders.

The primary investment objective and policies of each Portfolio will be adhered to and will not be altered for at least three (3) years following the admission of the Shares of that Portfolio to the Official List and to trading on the regulated market of Euronext Dublin, save in exceptional circumstances and then only with the approval of an ordinary resolution of the Shareholders. Any change to the investment objectives and/or material investment policies of a Portfolio may be amended with the approval by ordinary resolution of Shareholders in that Portfolio at a general meeting and in the event of a change of investment objectives and/or policies a reasonable notification period will be provided by the Company to enable Shareholders to redeem their Shares prior to implementation of these changes.

CLASS ACTIONS POLICY

The Company and/or the Manager may, on behalf of a Portfolio, submit the Portfolio’s name or participate on behalf of the Portfolio in any class action or institute legal actions, in order to recover any damage sustained by the Portfolio, if such would be, in the opinion of the Company/the Manager, beneficial for the Portfolio. However, if the Company/the Manager believe that it is more favourable to enter into a private settlement on behalf of a Portfolio, it may opt out of joining a class action. The Company and the Manager will not act as lead plaintiff in any class action, but nonetheless fees may be incurred in any kind of legal action.

CORPORATE GOVERNANCE

The Manager or the Sub-Investment Manager (including the Sub-Investment Manager’s delegates) may exercise its voting rights on stocks or other assets acquired by a Portfolio throughout the world. The Manager or the Sub-Investment Manager (including the Sub-Investment Manager’s delegates) will do so if it believes that good corporate governance in the longer term is in the interests of Shareholders and any costs of exercising such shareholder votes shall be borne by the Company. The Neuberger Berman Group LLC, including the Manager and the Sub-Investment Manager, has adopted the [NB Votes](#) initiative, which is a firm-wide initiative, whereby voting intentions and supporting rationale are published in advance of select shareholder meetings for companies in which Neuberger Berman has invested on behalf of its clients, addressing a broad range of topics across key governance and engagement principles. The Manager or the Sub-Investment Manager may escalate any engagement with investee issuers via proxy voting, including the NB Votes initiative, public statements and possible divestment in cases of issuer unresponsiveness.

BENCHMARKS REGULATION

The Benchmarks Regulation came into effect on 1 January 2018. Accordingly, the Company is working with the relevant benchmark administrators for the benchmark indices to confirm that they are, or will be included in the register maintained by ESMA under the Benchmarks Regulation. The Company has benchmark selection procedures that apply to new benchmarks and will also apply in the event that benchmarks materially change or cease to be provided. The procedures include an assessment of the suitability of a Portfolio’s benchmark, the proposed communication of changes in benchmarks to Shareholders and approvals by internal governance committees and boards.

INVESTMENT RESTRICTIONS

1	Permitted Investments
	Investments of a UCITS are confined to:
1.1	Transferable securities and money market instruments which are either admitted to official listing on a stock exchange in a Member State or non-Member State or which are dealt on a market which is regulated, operates regularly, is recognised and open to the public in a Member State or non-Member State.
1.2	Recently issued transferable securities which will be admitted to official listing on a stock exchange or other market (as described above) within a year.
1.3	Money market instruments, other than those dealt on a regulated market.
1.4	Units of UCITS.
1.5	Units of AIFs.
1.6	Deposits with credit institutions.
1.7	Financial derivative instruments.
2	Investment Restrictions
2.1	A UCITS may invest no more than 10% of net assets in transferable securities and money market instruments other than those referred to in paragraph 1.
2.2	<p>Recently Issued Transferable Securities</p> <p>(1) Subject to paragraph (2) a responsible person shall not invest any more than 10% of assets of a UCITS in securities of the type to which Regulation 68(1)(d) of the UCITS Regulations 2011 apply.</p> <p>(2) Paragraph (1) does not apply to an investment by a responsible person in US Securities known as “Rule 144 A securities” provided that;</p> <p style="margin-left: 20px;">(a) the relevant securities have been issued with an undertaking to register the securities with the SEC within 1 year of issue; and</p> <p style="margin-left: 20px;">(b) the securities are not illiquid securities i.e. they may be realised by the UCITS within 7 days at the price, or approximately at the price, which they are valued by the UCITS.</p>
2.3	A UCITS may invest no more than 10% of net assets in transferable securities or money market instruments issued by the same body provided that the total value of transferable securities and money market instruments held in the issuing bodies in each of which it invests more than 5% is less than 40%.
2.4	The limit of 10% (in 2.3) is raised to 35% if the transferable securities or money market instruments are issued or guaranteed by a Member State or its local authorities or by a non-Member State or public international body of which one or more Member States are members.
2.5	The transferable securities and money market instruments referred to in 2.4. shall not be taken into account for the purpose of applying the limit of 40% referred to in 2.3.
2.6	Cash booked in accounts and held as ancillary liquidity shall not exceed 20% of the net assets of the UCITS.
2.7	The risk exposure of a UCITS to a counterparty to an OTC derivative may not exceed 5% of net assets. This limit is raised to 10% in the case of a credit institution authorised in the EEA; a credit institution authorised within a signatory state (other than an EEA Member State) to the Basle Capital Convergence Agreement of July 1988; or a credit institution authorised in Jersey, Guernsey, the Isle of Man, Australia or New Zealand.
2.8	Notwithstanding paragraphs 2.3, 2.6 and 2.7 above, a combination of two or more of the following issued by, or made or undertaken with, the same body may not exceed 20% of net assets: <ul style="list-style-type: none"> - investments in transferable securities or money market instruments; - deposits, and/or - counterparty risk exposures arising from OTC derivatives transactions.
2.9	The limits referred to in 2.3, 2.4, 2.5, 2.7 and 2.8 above may not be combined, so that exposure to a single body shall not exceed 35% of net assets.

2.10	Group companies are regarded as a single issuer for the purposes of 2.3, 2.4, 2.5, 2.7 and 2.8. However, a limit of 20% of net assets may be applied to investment in transferable securities and money market instruments within the same group.
2.11	A UCITS may invest up to 100% of net assets in different transferable securities and money market instruments issued or guaranteed by any Member State, its local authorities, non- Member States or public international body of which one or more Member States are members.
	<p>The individual issuers must be listed in the prospectus and may be drawn from the following list: OECD Governments (provided the relevant issues are investment grade), Government of the People's Republic of China, Government of Brazil (provided the issues are of investment grade), Government of India (provided the issues are of investment grade), Government of Singapore, European Investment Bank, European Bank for Reconstruction and Development, International Finance Corporation, International Monetary Fund, Euratom, The Asian Development Bank, European Central Bank, Council of Europe, Eurofima, African Development Bank, International Bank for Reconstruction and Development (The World Bank), The Inter-American Development Bank, European Union, Federal National Mortgage Association (Fannie Mae), Federal Home Loan Mortgage Corporation (Freddie Mac), Government National Mortgage Association (Ginnie Mae), Student Loan Marketing Association (Sallie Mae), Federal Home Loan Bank, Federal Farm Credit Bank, Tennessee Valley Authority, Straight-A Funding LLC.</p>
	The UCITS must hold securities from at least 6 different issues, with securities from any one issue not exceeding 30% of net assets.
3	Investment in Collective Investment Schemes ("CIS")
3.1	A UCITS may not invest more than 20% of net assets in any one CIS.
3.2	Investment in non-UCITS may not, in aggregate, exceed 30% of net assets.
3.3	The CIS are prohibited from investing more than 10 per cent of net assets in other open-ended CIS.
3.4	When a UCITS invests in the units of other CIS that are managed, directly or by delegation, by the UCITS management company or by any other company with which the UCITS management company is linked by common management or control, or by a substantial direct or indirect holding, that management company or other company may not charge subscription, conversion or redemption fees on account of the UCITS investment in the units of such other CIS.
3.5	Where by virtue of investment in the units of another investment fund, a responsible person, an investment manager or an investment advisor receives a commission on behalf of the UCITS (including a rebated commission), the responsible person shall ensure that the relevant commission is paid into the property of the UCITS.
4	Index Tracking UCITS
4.1	A UCITS may invest up to 20% of net assets in shares and/or debt securities issued by the same body where the investment policy of the UCITS is to replicate an index which satisfies the criteria set out in the Central Bank UCITS Regulations and is recognised by the Central Bank.
4.2	The limit in 4.1 may be raised to 35%, and applied to a single issuer, where this is justified by exceptional market conditions.
5	General Provisions
5.1	An investment company, ICAV or management company acting in connection with all of the CIS it manages, may not acquire any shares carrying voting rights which would enable it to exercise significant influence over the management of an issuing body.
5.2	<p>A UCITS may acquire no more than:</p> <ul style="list-style-type: none"> (i) 10% of the non-voting shares of any single issuing body; (ii) 10% of the debt securities of any single issuing body; (iii) 25% of the units of any single CIS; (iv) 10% of the money market instruments of any single issuing body.
	NOTE: The limits laid down in (ii), (iii) and (iv) above may be disregarded at the time of acquisition if at that time the gross amount of the debt securities or of the money market instruments, or the net amount of the

	securities in issue cannot be calculated.
5.3	<p>5.1 and 5.2 shall not be applicable to:</p> <ul style="list-style-type: none"> (i) transferable securities and money market instruments issued or guaranteed by a Member State or its local authorities; (ii) transferable securities and money market instruments issued or guaranteed by a non-Member State; (iii) transferable securities and money market instruments issued by public international bodies of which one or more Member States are members; (iv) shares held by a UCITS in the capital of a company incorporated in a non-Member State which invests its assets mainly in the securities of issuing bodies having their registered offices in that State, where under the legislation of that State such a holding represents the only way in which the UCITS can invest in the securities of issuing bodies of that State. This waiver is applicable only if in its investment policies the company from the non-Member State complies with the limits laid down in 2.3 to 2.10, 3.1, 3.2, 5.1, 5.2, 5.4, 5.5 and 5.6, and provided that where these limits are exceeded, paragraphs 5.5 and 5.6 below are observed; (v) Shares held by an investment company or investment companies or ICAV or ICAV's in the capital of subsidiary companies carrying on only the business of management, advice or marketing in the country where the subsidiary is located, in regard to the repurchase of units at unit-holders' request exclusively on their behalf.
5.4	UCITS need not comply with the investment restrictions herein when exercising subscription rights attaching to transferable securities or money market instruments which form part of their assets.
5.5	The Central Bank may allow recently authorised UCITS to derogate from the provisions of 2.3 to 2.11, 3.1, 3.2, 4.1 and 4.2 for six months following the date of their authorisation, provided they observe the principle of risk spreading.
5.6	If the limits laid down herein are exceeded for reasons beyond the control of a UCITS, or as a result of the exercise of subscription rights, the UCITS must adopt as a priority objective for its sales transactions the remedying of that situation, taking due account of the interests of its unitholders.
5.7	<p>Neither an investment company, ICAV nor a management company or a trustee acting on behalf of a unit trust or a management company of a common contractual fund, may carry out uncovered sales of:</p> <ul style="list-style-type: none"> - transferable securities; - money market instruments*; - units of investment funds; or - financial derivative instruments.
5.8	<p>A UCITS may hold ancillary liquid assets.</p> <p>*Any short selling of money market instruments by UCITS is prohibited.</p>
6	Financial Derivative Instruments ('FDIs')
6.1	The UCITS global exposure relating to FDI must not exceed its total net asset value.
6.2	Position exposure to the underlying assets of FDI, including embedded FDI in transferable securities or money market instruments, when combined where relevant with positions resulting from direct investments, may not exceed the investment limits set out in the Central Bank UCITS Regulations. (This provision does not apply in the case of index based FDI provided the underlying index is one which meets with the criteria set out in the Central Bank UCITS Regulations.)
6.3	UCITS may invest in FDIs dealt in over-the-counter (OTC) provided that the counterparties to over-the-counter transactions (OTCs) are institutions subject to prudential supervision and belonging to categories approved by the Central Bank.
6.4	Investment in FDIs are subject to the conditions and limits laid down by the Central Bank.

VAG REQUIREMENTS

The German Insurance Supervisory Act (Versicherungsaufsichtsgesetz - "VAG") in conjunction with the Ordinance on the Investment of Restricted Assets of Pension Pools, Funeral Expenses Funds and Small Insurance Companies

(Verordnung über die Anlage des Sicherungsvermögens von Pensionskassen, Sterbekassen und kleinen Versicherungsunternehmen - Anlageverordnung) as further interpreted by the Federal Financial Supervisory Authority (Bundesanstalt für Finanzdienstleistungsaufsicht – “BaFin”) provide that, in order to be eligible for investment by certain German insurance companies and other regulated investors, a Portfolio must meet certain minimum requirements with respect to the creditworthiness of its investments. As a result, where the relevant Supplement notes that a Portfolio complies with the “VAG Requirements”, the relevant Portfolio’s investment policy shall comply with the following minimum requirements. For the avoidance of doubt, it is not intended that complying with the VAG Requirements will amend the investment objectives or policies or otherwise impact the management of such Portfolios, as the VAG requirements are either less restrictive than or equivalent to those already contained in the Portfolio’s investment policy.

Under the VAG Requirements, a Portfolio may only purchase

- (a) debt securities which have:
 - (i) a rating from a Recognised Rating Agency or another rating agency that has been examined and registered in accordance with Regulation (EC) No. 1060/2009 (an “**External Rating**”) of at least speculative grade (currently B- by Standard & Poor’s and Fitch or B3 by Moody’s or an equivalent rating by such other rating agency); or
 - (ii) been subject to the Manager’s or the Sub-Investment Manager’s own credit risk assessment (an “**Internal Rating**”) with an equivalent result.
- (b) asset backed securities (ABS), credit linked notes and similar assets (i.e. investments whose yield or repayment is linked to credit risks or that are used to transfer the credit risk of a third party) which have:
 - (i) an External Rating of at least investment grade (currently long-term BBB- ratings by Standard & Poor’s and Fitch or Baa3 by Moody’s or short-term A-3 ratings by Standard & Poor’s, F 3 by Fitch or Prime 3 by Moody’s or an equivalent rating by such other rating agency); or
 - (ii) an equivalent Internal Rating.

In each case, the Manager or the Sub-Investment Manager (as applicable) shall make and document its own credit risk assessment and shall not rely on credit ratings solely or mechanically for assessing the creditworthiness of an entity or financial instrument.

Without prejudice to the Central Bank’s requirements in respect of remedying advertent and inadvertent breaches of investment policies, which shall continue to apply to all Portfolios at all times, in the event that the External Ratings or Internal Ratings of securities held by a Portfolio are downgraded to a rating/credit assessment that is lower than the above-mentioned minimum ratings/credit assessments:

- where the affected securities represent more than 3% of the Portfolio’s Net Asset Value, the Manager or the Sub-Investment Manager (as applicable) will, at a minimum, use its best efforts to sell affected securities within six months of the rating-downgrade so that the amount of affected securities will be below 3% of the Portfolio’s Net Asset Value;
- where the affected securities represent less than 3% of the Portfolio’s Net Asset Value, the Manager or the Sub-Investment Manager (as applicable) will assess, in their own reasonable discretion, if, to which extent and in which timeframe affected securities should be sold.

Where an internal credit risk assessment results in an Internal Rating for a security which is higher than an External Rating for that security, the Internal Rating may be used in preference to the External Rating as follows:

- where only one External Rating is available in respect of a security, the Internal Rating may be used in preference to that External Rating where an appropriate additional quantitative credit risk assessment has been performed by the Manager or the Sub-Investment Manager (as applicable);
- where two External Ratings are available in respect of a security and the Internal Rating is better than the lower of the two External Ratings, the Internal Rating may be used where an appropriate additional quantitative credit risk assessment has been performed by the Manager or the Sub-Investment Manager (as applicable); and
- where three or more External Ratings are available in respect of a security and the Internal Rating is better than the second best of the three or more External Ratings, the Internal Rating may be used where an

appropriate additional quantitative credit risk assessment has been performed by the Manager or the Sub-Investment Manager (as applicable).

Such additional quantitative credit risk assessments must be properly documented.

External Ratings and/or Internal Ratings will be verified at least (i) annually for investment-grade or equivalent securities, (ii) quarterly for speculative-grade or equivalent securities and (iii) in either case more frequently if other negative circumstances indicate that this is necessary. Such verification process must be properly documented.

Where a Portfolio is allowed to invest into other investment funds, such investment funds must have investment policies and restrictions which comply with the rating requirements in this section.

SUSTAINABLE INVESTMENT CRITERIA

The Manager and the Sub-Investment Manager have regard to the terms of the Controversial Weapons Policy when determining what investments to make for all Portfolios.

In addition, the Manager and/or the Sub-Investment Manager may have regard to the terms of the Sustainable Exclusion Policy and Enhanced Sustainable Exclusion Policy (collectively referred to as “**Sustainable Criteria**”) when determining what investments to make for the Portfolios. Where the Sustainable Exclusion Policy or Enhanced Sustainable Exclusion Policy are applied to a Portfolio, this will be indicated in the relevant Supplement.

CONTROVERSIAL WEAPONS POLICY

The Manager and the Sub-Investment Manager are committed to supporting and upholding conventions that seek to ban the production of controversial weapons and have adopted a controversial weapons policy (the “**Controversial Weapons Policy**”) which seeks to prohibit a number of investments by the Manager and/or the Sub-Investment Manager. As a result, none of the Portfolios shall invest in securities that have been identified by the Manager and/or the Sub-Investment Manager through the utilisation of third party data, as having corporate involvement in the end manufacture or manufacture of intended use components of controversial weapons. The Controversial Weapons Policy prevents the Portfolios from investing in such securities (and thereby supporting such businesses) but does not prevent the Portfolios from taking short positions in respect of such securities, i.e. seeking to profit from expected declines in the value of such securities.

The Controversial Weapons Policy defines involvement in the manufacture of controversial weapons as either being responsible for end manufacture and assembly of controversial weapons, or being responsible for the manufacture of intended use components for controversial weapons. The Controversial Weapons Policy does not include dual-use component manufacturers or delivery platform manufacturers. Controversial weapons are defined as:

- (a) **Biological and chemical weapons.** Weapons outlawed by the Biological and Toxin Weapons Convention of 1972, and the Chemical Weapons Convention of 1993.
- (b) **Anti-personnel mines.** Weapons that signatories agreed to prohibit the use, stockpiling, production or transfer of under the 1997 Anti-personnel Landmines Convention. The convention was concluded in Oslo on September 18, 1997 and entered into force on March 1, 1999, six months after it was ratified by 40 states. Today, the treaty is still open for ratification by signatories and for accession by those that did not sign before March 1999. The Convention does not address the issue of financial support for companies that manufacture such weapons.
- (c) **Cluster munitions.** Weapons that signatories agreed to restrict the manufacture, use and stockpiling of, as well as components of these weapons, under the 2008 Convention on Cluster Munitions. The Convention was agreed in Dublin, Ireland on May 30, 2008 and entered into force on August 1, 2010, six months after it was ratified by 30 states. Today, the treaty is still open for ratification by signatories and for accession by those that did not sign before August 2000. The implications for financial support of companies that manufacture cluster munitions is left unclear in the Convention. As a result, signatory states and the institutions based on them have taken a range of approaches to the question of prohibiting or allowing investments in cluster munitions producers: some prohibit all investments, some prohibit only direct investments and some have not yet banned investments.
- (d) **Depleted uranium weapons.** Companies involved in the production of depleted uranium (DU) weapons, ammunition and armour.

A copy of the Controversial Weapons Policy can be found at www.nb.com/UCITScontroversialweaponspolicy

THERMAL COAL INVOLVEMENT POLICY

The Manager and the Sub-Investment Manager are committed to prohibiting the initiation of new investment positions in securities issued by companies that (i) derive more than 25% of their revenue from thermal coal mining; or (ii) are expanding new thermal coal power generation. As a result, none of the Portfolios (with the exception of the Neuberger Berman Uncorrelated Strategies Fund and the Neuberger Berman China Equity Fund) shall make any new investments in securities that have been identified by the Manager and/or the Sub-Investment Manager through the utilisation of third party data, as being issued by such companies.

Thermal Coal Mining. The Manager defines thermal coal mining as the mining of thermal coal including lignite, bituminous, anthracite and steam coal, its sale to external parties and through contract mining services. This does not include revenue from metallurgical coal, intra-company sales of mined thermal coal, revenue from coal trading and royalty income for non-involved parties.

Thermal Coal Power Generation. The Manager defines new thermal coal power generation expansion as the addition of new and substantial thermal coal-fired generation capacity into the construction, development, permitting or planning phase by companies defined as a generating company (>10% of revenue derived from power generation). Investments in existing coal plants for pollution control equipment, regular operations and maintenance spend is not prohibited.

Each of the Neuberger Berman Emerging Market Debt – Local Currency Fund, the Neuberger Berman Emerging Market Debt – Hard Currency Fund, the Neuberger Berman Emerging Market Corporate Debt Fund, the Neuberger Berman Short Duration Emerging Market Debt Fund, the Neuberger Berman Emerging Market Debt Blend Fund and the Neuberger Berman Asian Debt – Hard Currency Fund (collectively the “**EMD Funds**”) is phasing out its exposure to thermal coal and currently prohibits investment in securities issued by companies that derive more than 25% of revenue from thermal coal mining or are expanding new thermal coal power generation, as determined by internal screens, with this revenue threshold declining to 10% by 2022. Each of the EMD Funds also prohibits investments in issuers in the power generation industry that use thermal coal as an energy source for more than 95% of their installed power generation capacity, are expanding into new thermal coal power generation, or whose expansionary capital expenditure budgets do not include a minimum threshold for non-coal investments, as determined by internal screens.

SUSTAINABLE EXCLUSION POLICY

The Manager and/or the Sub-Investment Manager have adopted a sustainable exclusion policy (the “**Sustainable Exclusion Policy**”) which sets out the exclusion criteria (which they will utilise to prohibit investment in securities that the Manager and/or the Sub-Investment Manager do not believe meet a minimum sustainability criteria on behalf of the Portfolio. As noted above, where the Sustainable Exclusion Policy applies to a Portfolio, this will be indicated in the relevant Supplement.

Human Rights. Corporations are expected to uphold fundamental responsibilities as defined by the United Nations Global Compact (“**UNGC**”) in regards to human rights, labour, the environment and anti-corruption. The Portfolio will not invest in the securities of issuers that violate the principles of the UNGC and compliance with the UNGC will continually be monitored. Where an existing holding is deemed to violate the UNGC through change or evolution, the Manager and/or the Sub-Investment Manager will establish a dialogue with the issuer, to understand what led to the violation and what remediation is taking place. If, however, the Manager and/or the Sub-Investment Manager is not satisfied about the speed and satisfactory extent of the remediation after 3 years, the securities will be disposed of.

Tobacco. The Portfolio is prohibited from purchasing the securities of issuers that are involved in tobacco production such as cigars, cigarettes, e-cigarettes, smokeless tobacco, dissolvable and chewing tobacco. This also includes issuers that grow or process raw tobacco leaves.

Civilian Firearms. The Portfolio is prohibited from purchasing the securities of issuers that are involved in the manufacturing of civilian firearms.

Private Prisons. The Portfolio is prohibited from purchasing the securities of issuers that own, operate or primarily provide integral services to private prisons, given significant social controversy, reputational risks, dependency on their local government policies and facilities which are not easily reconfigurable for alternate uses.

Fossil Fuels. The Portfolio will seek to minimise or neutralise its exposure to certain pieces of the fossil fuel value chain, owing to the varied contribution to climate and environmental risk.

- **Coal and unconventional oil and gas supply.** The Portfolio is prohibited from purchasing the securities of issuers which derive substantial revenue from the extraction of coal or the use of unconventional methods to extract oil and gas. Substantial revenue is defined for this purpose as follows:
 - **Thermal coal.** Issuers should not derive more than 10% of revenue from the mining of thermal coal.
 - **Unconventional oil supply (Oil Sands).** Issuers should not derive more than 10% of revenue from oil sands extraction.
- **Electricity generation.** The Portfolio will only purchase the securities of issuers for which power generation makes up more than 10% of revenue, where they are aligned with a lower carbon emissions economy. The Portfolio is therefore prohibited from investing in generators where:
 - **Thermal Coal.** More than 30% of MWh generation is derived from thermal coal.
 - **Liquid Fuels (Oil).** More than 30% of MWh generation is derived from liquid fuels (oil).
 - **Natural Gas Electricity Generation.** More than 90% of MWh generation is derived from natural gas. This threshold may decline over time, to align with a glide path to greater renewables penetration.

- **Conventional oil and gas supply.** The Portfolio is prohibited from investing in the securities of oil and gas producers for whom natural gas makes up less than 20% of their reserves.

ENHANCED SUSTAINABLE EXCLUSION POLICY

The Manager and/or the Sub-Investment Manager have sought to align to enhanced industry sustainable standards, therefore to comply with these standards, additional exclusions or in excess of the exclusions set out in the Sustainable Exclusion Policy, may be applied to certain Portfolios (the “**Enhanced Sustainable Exclusion Policy**”). As noted above, where the Enhanced Sustainable Exclusion Policy applies to a Portfolio, this will be indicated in the relevant Supplement. Where applicable, the Portfolio shall not invest in securities that have been identified by the Manager and/or the Sub-Investment Manager through the utilisation of third party data, as failing to be consistent with these enhanced industry standards. The current list of exclusions is available at <https://www.nb.com/en/gb/esg/enhancedsustainablepolicy.pdf>

PORTFOLIO INVESTMENT TECHNIQUES

The Company may employ investment techniques and instruments for efficient portfolio management of the assets of any Portfolio including hedging against market movements, currency exchange or interest rate risks under the conditions and within the limits stipulated by the Central Bank under the UCITS Regulations and described below.

USE OF FINANCIAL DERIVATIVE INSTRUMENTS

Each of the Portfolios may utilise FDI for investment purposes, efficient portfolio management purposes (i.e. the reduction of risks or costs to the Portfolio or the generation of additional capital or income for the Company), or for hedging against market movements, currency exchange or interest rate risks, subject to the general restrictions outlined under “*Investment Restrictions*” in the “*Investment Objectives and Policies*” section. The Company may use various types of FDI for these purposes, including, without limitation, futures, forward foreign currency contracts, options, swaptions, credit default swaps, contracts for differences, warrants, and swaps.

To the extent that a Portfolio uses FDI for investment purposes or efficient portfolio management purposes, there may be a risk that the volatility of the relevant Portfolio’s Net Asset Value may increase. However, no Portfolio is expected to have an above average risk profile relative to its respective asset classes as a result of its use of FDI.

The Manager employs an appropriate risk management process in respect of the Company which is designed to enable it to accurately measure, monitor and manage the various risks associated with the use of FDI for each Portfolio and will not use any FDI which have not been described in its risk management process. Each Portfolio using FDI for investment purposes has been assessed to determine whether, based on the FDI that it uses, the Commitment Approach or the value at risk approach is more appropriate to use in managing the risks associated with that Portfolio’s use of FDI. For the majority of Portfolios, it has been determined that the Commitment Approach is the more appropriate approach to use, although, where stated in the “*Risk*” section of the description of a Portfolio in the relevant Supplement, the value at risk approach will be used. Although all Portfolios will be leveraged as a result of their use of FDI, the Global Exposure of a Portfolio which uses the Commitment Approach will not exceed the Portfolio’s Net Asset Value at any time. An indication of anticipated leverage levels for Portfolios which apply the value at risk approach will be included in the “*Risk*” section of the description of such Portfolios in the relevant Supplement.

A statement of the Company’s risk management process has been submitted to and cleared by the Central Bank. The Manager will, on request, provide supplementary information to Shareholders relating to any risk management methods to be employed by the Manager in respect of any Portfolio, including the quantitative limits that are applied, and any recent developments in the risk and yield characteristics of the main categories of investments. Investors should also refer to the “*Investment Risks*” section for information in relation to the risks associated with the use of FDI and the description of a Portfolio’s investment objectives and policies contained in the relevant Supplement. Not less than one month’s prior written notice will be given to Shareholders of any material change to a Portfolio’s use of FDI, as outlined in the relevant Supplement.

Any counterparty, which is not a Relevant Institution, to OTC FDI will have a minimum credit rating of A2 or equivalent from a Recognised Rating Agency, or will be deemed by the Manager to have an implied rating of A2. Alternatively, an unrated counterparty will be acceptable where the Portfolio is indemnified against losses suffered as a result of a failure by the counterparty, by an entity which has and maintains a rating of A2.

Each Portfolio will ensure that its Global Exposure to OTC FDI will comply with both the “*Investment Restrictions*” section of this Prospectus and the UCITS Regulations. The relevant Portfolio’s exposure to counterparties in respect of an OTC FDI will be collateralised in accordance with the requirements of the Central Bank, so that the Portfolio’s exposure to a counterparty will be less than 10% of its Net Asset Value at all times, where the relevant counterparty is a Relevant Institution and less than 5% of its Net Asset Value, where the relevant counterparty is not a Relevant Institution. Each Portfolio will monitor the collateral to ensure that the securities provided as collateral will, at all times, fall within the categories permitted by the Central Bank and be fully diversified in accordance with the requirements set out in this Prospectus.

Forward foreign currency contracts are agreements to exchange one currency for another – for example, to exchange a certain amount of Sterling for a certain amount of Euro – at a future date. The date (which may be any agreed-upon fixed number of days in the future), the amount of currency to be exchanged and the price at which the exchange will take place are negotiated and fixed for the term of the contract at the time that the contract is entered into. Options offer the buyer the right, but not the obligation, to buy (in the case of a “call” option) or sell (in the case of a “put” option) specified assets at a pre-agreed price during a certain period of time or on a specific date. All options purchased on behalf of the Company will be traded on a Recognised Market. Warrants are similar to call options but are issued by the company which issued the underlying securities which are the subject of the option.

A swap is an agreement between two parties whereby one party makes payments to the other based on an agreed rate, while the other party makes payments to the first party based on the return of an underlying asset or assets, such as one or more securities, a currency, an index or an interest rate. Excess return swaps are OTC FDI under which one party will agree to pay the other the return of an underlying asset and the other party agrees to pay the first party a fee, either periodically or upfront on entry into the swap. An excess return swap differs from a total return swap because the payment that the other party receives will be based solely on the performance of the underlying asset, while the payment to the other party under a total return swap will also include an element to reflect the return which cash to the value of the notional amount of the swap would have earned on deposit.

Volatility swaps are OTC FDI under which one party will agree to pay the other a return based on the volatility of an underlying asset and the other party agrees to pay the first party a fee, either periodically or upfront on entry into the swap. As such the underlying of the swap is the volatility of a given asset and they allow an investor to speculate solely upon the movement of the asset's volatility without the influence of its price. Volatility of an underlying asset (e.g. an equity index) against the implied volatility of that underlying asset. Under the terms of a typical variance swap, parties agree to exchange, at maturity, a pre-agreed notional amount multiplied by the difference between the realised variance of an equity index over the lifetime of the variance swap and a pre-determined reference level. Realised variance is the mathematical square of realised volatility, i.e. if the realised volatility of the index is 5%, its realised variance will be 25%. The reference level of a variance swap is determined at the inception of the swap by reference to the implied volatility of the relevant equity index. The seller of the variance swap (who is said to have a short variance position) will benefit when realised volatility is lower than the reference level over the period of the swap, in which case the buyer of the variance swap would suffer a loss. Conversely, the buyer of the variance swap (who is said to have a long variance position) will benefit when realised volatility is higher than the reference level, in which case the seller of the variance swap would suffer a loss. Realised volatility is a backward-looking measure of the amount by which the returns of an asset actually varied over a time period and is calculated by reference to the previous day's returns of that asset. Implied volatility is a forward-looking measure, which represents the market's expectation of the future volatility of a particular asset over a particular period.

Swaptions are options to enter into a swap, typically in respect of an interest rate, whereby, in exchange for a fee, the buyer of the swaption acquires an option to enter into a specified swap agreement on a future date.

A credit default swap ("CDS") is a swap used to transfer the risk of default on an underlying security from the holder of the security to the seller of the swap. For example, if a Portfolio buys a CDS (which could be to take a short position in respect of the credit of security's issuer or to hedge an investment in the relevant security), it will be entitled to receive the value of the security from the seller of the CDS, should the security's issuer default on its payment obligations under the security. Where a Portfolio sells a CDS (which is taking a long position in respect of the credit of the security's issuer) it will receive a fee from the purchaser and hope to profit from that fee in the event that the issuer of the relevant security does not default on its payment obligations. The subsidiaries of Neuberger Berman Group LLC have dedicated derivatives servicing teams, including teams within the Sub-Investment Managers that will monitor a Portfolio's compliance with the Central Bank's investment restrictions in respect of its CDS positions, its collateral management and any other terms agreed upon in the agreement underlying the CDS and will employ proprietary quantitative tools to help analyse many aspects of risk to which a Portfolio is exposed due to its positions in CDS, and are subject to the oversight of the Manager. In the event of a default event in respect of a CDS, a Portfolio will have to fulfil its obligations (if any) under that specific CDS and its exposure will depend on various factors including the size of the position, whether it has bought or sold the CDS and the recovery value of the defaulted security.

A contract for difference is an agreement between a buyer and a seller stipulating that the seller will pay the buyer the difference between the current value of the security and its value when the contract is made. If the difference turns out to be negative, the buyer pays the seller.

Where disclosed in the relevant Supplement, Portfolios may also invest in convertible bonds, convertible preferred stock, credit linked notes, index linked notes, structured notes and rights, each of which may embed an FDI and, consequently, leverage.

As a Portfolio may generally purchase FDI using only a fraction of the assets that would be needed to purchase the relevant securities directly, the remainder of the Portfolio's assets may be invested in other types of securities. The Manager or Sub-Investment Manager may therefore seek to achieve greater returns by purchasing FDI and investing a Portfolio's remaining assets in other types of securities to add excess return.

FDI used for efficient portfolio management may be used by the Portfolios for hedging purposes. Hedging is a technique used to seek to minimise an exposure created from an underlying position by counteracting such exposure by means of acquiring an offsetting position. The positions taken for hedging purposes will not be allowed to exceed materially the value of the assets that they seek to offset.

In the event of any Portfolio proposing to use any types of FDI additional to those described above, the risk

management process shall be amended to reflect this intention and such additional types of FDI shall also be disclosed and described in the relevant Supplement in respect of such Portfolio.

USE OF REPURCHASE AND REVERSE REPURCHASE AGREEMENTS

At the discretion of the Manager or the Sub-Investment Manager, each Portfolio may enter into repurchase and reverse repurchase agreements (“**Repo Contracts**”), subject to the conditions and limits set out in the Central Bank UCITS Regulations, in respect of each of the types of assets in which the Portfolio may invest, as described in the “*Instruments / Asset Classes*” section of the relevant Supplement for the Portfolio. Any such Repo Contracts may be used for efficient portfolio management purposes.

Under a repurchase agreement, the Portfolio purchases securities from a Relevant Institution which agrees, at the time of sale, to repurchase the securities at a mutually agreed upon date and price, thereby determining the yield to the Portfolio during the term of the agreement. The resale price reflects the purchase price plus an agreed upon market rate of interest which is unrelated to the purchased security. The Portfolio may also enter into reverse repurchase agreements, under which it sells securities and agrees to repurchase them at a mutually agreed upon date and price.

Portfolios will only enter Repo Contracts which ensure that it is able to (i) recall any security that has been lent or sold and recall any cash that has been paid out; or (ii) terminate Repo Contracts into which it has entered at any time.

All revenues from the use of Repo Contracts, net of direct and indirect operational costs, will be returned to the Portfolios. Full details of any revenue earned and the direct and indirect operational costs and fees incurred with respect to the use of Repo Contracts for the Portfolio will be included in the Company’s annual financial statements. Unless otherwise specified in the relevant Supplement, the maximum proportion of a Portfolio’s Net Asset Value that can be subject to Repo Contracts is 10% and the expected proportion of a Portfolio’s Net Asset Value that will be subject to Repo Contracts is 3%.

Portfolios will only enter into Repo Contracts with counterparties which meet the criteria set out in respect of counterparties to OTC FDI, including in respect of counterparty exposure limits and collateralisation, set out under “*Use of Financial Derivative Instruments*” above. It is not expected that such counterparties will be related to the Manager, the Sub-Investment Manager or the Depositary. All collateral received from a counterparty will meet the requirements and be subject to the restrictions set out under “*Management of Collateral*” below. Investors should also read the “*Repurchase and Reverse Repurchase Agreement Risk*” risk warnings in the “*Investment Risks*” section.

USE OF SECURITIES LENDING AGREEMENTS

At the discretion of the Manager or the Sub-Investment Manager, each Portfolio may enter into securities lending transactions (“**Securities Lending Agreements**”), subject to the conditions and limits set out in the Central Bank UCITS Regulations, in respect of each of the types of assets in which the Portfolio may invest, as described in the “*Instruments / Asset Classes*” section of the relevant Supplement for the Portfolio. Any such Securities Lending Agreements may be used for efficient portfolio management purposes.

Securities Lending Agreements are transactions through which a Portfolio lends its securities to another party, the borrower, which is contractually obliged to return equivalent securities at the end of an agreed period. While securities are on loan, the borrower pays the Portfolio (i) a loan fee and (ii) any income from the securities. Portfolios may enter only into securities lending transactions provided that it complies with the following rules:

- (i) the Portfolio may lend securities to a borrower either directly or through a standardised system organised by a recognised clearing institution or through a lending system organised by counterparties which meet the criteria set out in respect of counterparties to OTC FDI set out under “*Use of Financial Derivative Instruments*” above. It is not expected that such counterparties will be related to the Manager, the Sub-Investment Manager or the Depositary; and
- (ii) the counterparty to a Securities Lending Agreement must meet the criteria set out in respect of counterparties to OTC FDI, including in respect of counterparty exposure limits and collateralisation, set out under “*Use of Financial Derivative Instruments*” above. It is not expected that such counterparties will be related to the Manager, the Sub-Investment Manager or the Depositary.

The Company will receive, for each Portfolio that participates in Securities Lending Agreements, collateral that is at least equivalent to 102% of the value of the lent securities.

Portfolios may only enter into Securities Lending Agreements under which (i) they are entitled at all times to request the return of the securities lent or to terminate any securities lending transactions and (ii) the transactions do not jeopardise the management of the Portfolio’s assets in accordance with its investment policy.

Unless otherwise specified in the relevant Supplement, the maximum proportion of a Portfolio’s Net Asset Value that can be subject to Securities Lending Agreements is 50% and the expected proportion of a Portfolio’s Net Asset Value

that will be subject to Securities Lending Agreements is 0-10%.

The Company has appointed Brown Brothers Harriman & Co., a New York limited partnership with an office in Boston, Massachusetts (the “**Lending Agent**”) to carry out the Securities Lending Agreements, notably the selection of counterparties, subject to the Company’s pre-approval, and the management of the collateral. Portfolios entering into Securities Lending Agreements will receive all revenue generated from the Securities Lending Agreements, net of direct and indirect operational costs, which will represent 90% of the total revenue generated. The remaining 10% will be paid to the Lending Agent in consideration of the direct and indirect operational costs of the provision of its services and the guaranty that it provides.

MANAGEMENT OF COLLATERAL

Subject to the UCITS Regulations, a Portfolio may enter into OTC FDI transactions, Repo Contracts and Securities Lending Agreements (together, “**SFT Transactions**”) in accordance with normal market practice and provided that collateral obtained under the SFT Transactions with the criteria set out below.

- (i) *Liquidity* - collateral (other than cash) should be highly liquid and traded on a regulated market or multi-lateral trading facility with transparent pricing in order that it can be sold quickly at a price that is close to its pre-sale valuation. Collateral should comply with the provisions of Regulation 74 of the UCITS Regulations and shall be used in accordance with the requirements of this Prospectus and the UCITS Regulations.
- (ii) *Valuation* - collateral should be valued on a daily basis and assets that exhibit high price volatility should not be accepted as collateral unless suitably conservative haircuts are in place. Any collateral received by a Portfolio in respect of SFT Transactions will meet the requirements set out in this Prospectus and be valued in accordance with the provisions of the “Determination of Net Asset Value” section hereof and valuations will be marked to market daily and variation margin will be applied daily, as necessary.
- (iii) *Issuer credit quality* - collateral should be of high quality.
- (iv) *Correlation* - collateral should be issued by an entity that is independent from the counterparty and is expected not to display a high correlation with the performance of the counterparty.
- (v) *Diversification* - collateral should be sufficiently diversified in terms of country, markets and issuers. Non-cash collateral will be considered to be sufficiently diversified if the relevant Portfolio receives from a counterparty a basket of collateral with a maximum exposure to any one issuer of 20% of the Portfolio’s net asset value. When the Portfolio is exposed to a variety of different counterparties, the various baskets of collateral are aggregated to ensure exposure to a single issuer does not exceed 20% of net asset value.

By way of derogation from this sub-paragraph, a Portfolio may be fully collateralised in different transferable securities and money market instruments issued or guaranteed by a EU Member State, one or more of its local authorities, a third country, or a public international body to which one or more EU Member States belong. Such a Portfolio will receive securities from at least six different issues and securities from any single issue will not account for more than 30% of the Portfolio’s Net Asset Value. Portfolios that intend to be fully collateralised in securities issued or guaranteed by a EU Member State will disclose this fact in the relevant Supplement and also identify the EU Member States, local authorities, third country, or public international bodies issuing or guaranteeing securities which they are able to accept as collateral for more than 20% of their Net Asset Value.

- (vi) *Immediately available* - collateral received should be capable of being fully enforced by the Portfolio at any time without reference to or approval from the counterparty.

All assets received in respect of a Portfolio in the context of SFT Transactions will be considered as collateral for the purposes of the UCITS Regulations and will comply with the criteria above. The Company seeks to identify and mitigate risks linked to the management of collateral, including operational and legal risks, by risk management procedures employed by the Company.

Where there is a title transfer, the collateral received will be held by the Depositary, or its agent. For other types of collateral arrangement the collateral may be held by a third party custodian which is subject to prudential supervision and which is unrelated to the provider of the collateral.

Permitted types of collateral

In accordance with the above criteria, a Portfolio may accept the following types of collateral:

- (i) cash;

- (ii) government or other public securities;
- (iii) certificates of deposit issued by Relevant Institutions;
- (iv) letters of credit with a residual maturity of three months or less, which are unconditional and irrevocable and which are issued by Relevant Institutions;
- (v) equity securities traded on a stock exchange in Relevant Jurisdictions, Switzerland, Canada, Japan, the United States, Jersey, Guernsey, the Isle of Man, Australia or New Zealand;

Reinvestment of Collateral

Cash received as collateral may only be re-invested in the following instruments:

- (i) deposits or certificates of deposit issued by Relevant Institutions;
- (ii) high-quality government bonds; or
- (iii) a Short Term Money Market Fund, as defined in Article 2(14) and 2(15) of the Money Market Funds Regulation.

Invested cash collateral may not be placed on deposit with, or invested in securities issued by, the counterparty or a related entity.

Re-invested cash collateral will be diversified in accordance with the diversification requirements applicable to non-cash collateral and will be exposed to the risks associated with investment in the instruments described above, including, without limitation, market risks, credit risks and risks associated with fixed income securities. Please see the “*Investment Risks*” section for more information.

Non-cash collateral received cannot be sold, pledged or re-invested.

Stress testing policy

In the event that a Portfolio receives collateral for at least 30% of its net assets, it will implement a stress testing policy to ensure that regular stress tests are carried out under normal and exceptional liquidity conditions in order to allow it to assess the liquidity risk attached to collateral.

Haircut policy

Each Portfolio has implemented a haircut policy in respect of each class of assets received as collateral. This policy takes account of the characteristics of the relevant asset class, including the credit standing of the issuer of the collateral, the price volatility of the collateral and the results of any stress tests which may be performed in accordance with the stress testing policy. The value of the collateral, adjusted in light of the haircut policy, must equal or exceed, in value, at all times, the relevant counterparty exposure.

WHEN-ISSUED AND FORWARD COMMITMENT SECURITIES

Subject to the investment restrictions contained in the “*Investment Restrictions*” section above, a Portfolio may purchase securities on a “when-issued” basis and may purchase or sell securities on a “forward commitment” basis. The price, which is generally expressed in yield terms, is fixed at the time the commitment is made, but delivery and payment for the securities take place at a later date. When-issued securities and forward commitments may be sold prior to the settlement date, but a Portfolio will usually enter into when-issued and forward commitments only with the intention of actually receiving or delivering the securities or to avoid currency risk, as the case may be. No income accrues on securities which have been purchased pursuant to a forward commitment or on a when-issued basis prior to delivery of the securities. If the Portfolio disposes of the right to acquire a when-issued security prior to its acquisition or disposes of its right to deliver or receive against a forward commitment, the Portfolio may incur a gain or loss.

CURRENCY TRANSACTIONS

Each Portfolio is permitted to invest in securities denominated in a currency other than the Base Currency of the Portfolio and may purchase currencies to meet settlement requirements. In addition, subject to the restrictions imposed on the use of financial derivative instruments described above and by the UCITS Regulations, each Portfolio may enter into various currency transactions (i.e. forward foreign currency contracts, currency swaps or foreign currency) to protect against uncertainty in future exchange rates. Forward foreign currency contracts are agreements to exchange one currency for another – for example, to exchange a certain amount of Sterling for a certain amount of Euro – at a future date. The date (which may be any agreed-upon fixed number of days in the future), the amount of currency to be exchanged and the price at which the exchange will take place are negotiated and fixed for the term of the contract at the time that the contract is entered into.

Currency transactions which alter currency exposure characteristics of transferable securities held by a Portfolio may only be undertaken for the purposes of a reduction in risk, a reduction in costs and/or an increase in capital or income returns to the Portfolio. Any such currency transactions will be used in accordance with the investment objective of the Portfolio.

A Portfolio may “cross-hedge” one foreign currency exposure by selling a related foreign currency into the Base Currency of that Portfolio. Also, in emerging or developing markets, local currencies are often expressed as a basket of major market currencies such as the US Dollar, Euro or Japanese Yen. A Portfolio may hedge out the exposure to currencies other than its Base Currency in the basket by selling a weighted average of those currencies forward into the Base Currency.

INVESTMENT RISKS

Investment in the Portfolios carries certain risks, which are described below. These risks are not purported to be exhaustive and potential investors should review this Prospectus in its entirety and consult with their professional advisers, before making an application for Shares.

There can be no assurance that the Portfolios will achieve their respective objectives. While there are some risks described below that may be common to a number or all of the Portfolios, there may also be specific risk considerations which apply only to particular Portfolios. Investors should note that the level of fees that pertain to each Class in a Portfolio can vary as set out in the “*Fees and Expenses*” section. These fees will reduce the return which an investor will receive from the investment in the Company and may prevent an investor from receiving a positive return from such investment.

Reference in this section to “Manager” shall be taken to include each of the Sub-Investment Managers of a Portfolio where relevant.

1. RISKS RELATED TO FUND STRUCTURE

UMBRELLA STRUCTURE OF THE COMPANY

Pursuant to Irish law the Company will not be liable as a whole to third parties and there will be no potential for cross contamination of liabilities between different Portfolios. However, there can be no categorical assurance that, should an action be brought against the Company in the courts of another jurisdiction, the segregated nature of the Portfolios will necessarily be upheld. Accordingly, it is not free from doubt that the assets of any Portfolio of the Company may not be exposed to the liabilities of other Portfolios. As at the date of this Prospectus, the Directors are not aware of any existing or contingent liability of any Portfolio of the Company.

SHARE CLASS RISK

There is no legal segregation of liability between Classes in a given Portfolio. As such, there are certain limited circumstances including, for example, in situations when one or more Hedged Classes suffers material losses, in which the liabilities of a particular Class will affect the Net Asset Value of other Classes.

SHARE CLASS CURRENCY DESIGNATION RISK

Hedged Classes may be available in a Portfolio and are designated in a currency other than the Base Currency of the relevant Portfolio. In such circumstances adverse exchange rate fluctuations between the Base Currency of a Portfolio and the class currency of the Hedged Classes may result in a decrease in return and/or a loss of capital for Shareholders. The Manager or the Sub-Investment Manager will try to mitigate this risk by using efficient portfolio management techniques and instruments or FDI, within the conditions and limits imposed by the Central Bank, to hedge the foreign currency exposure of the Hedged Classes into the Base Currency of the relevant Portfolio and, in the case of some Portfolios as noted in the relevant Supplements, into the currency or currencies in which the assets of the relevant Portfolio are denominated. Unless otherwise disclosed in the relevant Supplement, all Hedged Classes shall hedge 100% of their relevant class currency exposure. In this circumstance, the underlying relevant Portfolio's non-Base Currency exposure may remain exposed to currency fluctuations. Although a Hedged Class may not generally be leveraged as a result of the use of such techniques and instruments, the value of such instruments may be up to but may not exceed 105% of the Net Asset Value attributable to the relevant Hedged Class and will not be less than 95% of the portion of the Net Asset Value of the relevant Hedged Class which is to be hedged against this currency risk. The Manager and the Sub-Investment Manager will monitor hedging on at least a monthly basis and will reduce the level of hedging to ensure that any position that is materially in excess of 100% of the Net Asset Value shall not be carried forward from month to month. It may not be practical or efficient to hedge the foreign currency exposure of the Shares exactly to the currency or currencies in which all the assets of the relevant Portfolio are denominated. Accordingly in devising and implementing its hedging strategy the Manager and the Sub-Investment Manager may hedge the foreign currency exposure of the Shares to the major currencies in which the assets of the relevant Portfolio are, or are expected to be, denominated. In determining the major currencies against which the foreign currency exposure of the relevant Hedged Class should be hedged, the Manager and the Sub-Investment Manager may have regard to any index which is expected to closely correspond to the assets of the relevant Portfolio.

Where there is more than one category of Hedged Class in a Portfolio denominated in the same currency and it is intended to hedge the foreign currency exposure of such Classes, relative to the Base Currency of the relevant Portfolio or into the currency or currencies in which the assets of the relevant Portfolio are denominated, the Manager and the Sub-Investment Manager may aggregate the foreign exchange transactions entered into on behalf of such Hedged Classes and apportion the gains/loss on and the costs of the relevant financial instruments pro rata to each such Hedged Class in the relevant Portfolio.

Investors should be aware that this strategy may substantially limit Shareholders of the relevant Hedged Class from benefiting if the class currency falls against the Base Currency of the relevant Portfolio and/or the currency/currencies in which the assets of the relevant Portfolio are denominated. In such circumstances, Shareholders of the Hedged Class may be exposed to fluctuations in the Net Asset Value per Shares reflecting the gains/loss on and the costs of the relevant financial instruments.

In the case of a Hedged Class, other than a BRL Class or a CLP Class, a currency conversion will take place on subscriptions, redemptions, exchanges and distributions at the rate of exchange available to the Company and the cost of conversion will be deducted from the relevant Hedged Class. Subscriptions and exchanges into and redemptions, exchanges and distributions from BRL Classes and CLP Classes are in US Dollars.

Although hedging strategies may not necessarily be used in relation to each Class within a Portfolio, the financial instruments used to implement such strategies shall be assets/liabilities of the Portfolio as a whole. However, the gains/losses on and the costs of the relevant financial instruments will accrue solely to the relevant Hedged Class. Any currency exposure of a Hedged Class may not be combined with or offset with that of any other Class of the Portfolio.

Unhedged Classes in a Portfolio may provide returns to investors which are significantly different to the returns provided by Hedged Classes or Classes designated in the Base Currency of the relevant Portfolio. In such circumstances adverse exchange rate fluctuations between the Base Currency of a Portfolio and the class currency of the relevant Unhedged Classes may result in a decrease in return and/or a loss of capital for Shareholders in such Unhedged Classes.

Investors should be aware that the class currency of a particular Hedged Class may have a high correlation (negative or positive) with the investments of the underlying Portfolio. In such cases, fluctuations in the Net Asset Value of the Portfolio may be compounded (negatively or positively) by movements in the class currency of the Hedged Class. Investors should be aware that the level of volatility and return outcome of the Hedged Class, in these circumstances, may be materially different to the volatility and return outcome of Classes denominated in the Base Currency of the Portfolio.

CHINESE YUAN RENMINBI SHARE CLASS CURRENCY RISK

The Portfolios offer Classes designated in Chinese Yuan Renminbi the lawful currency of the People's Republic of China and investors should be aware that there may be additional risks involved in investing through CNY over and above those of investing in through other currencies. CNY Currency exchange rates may fluctuate significantly over short periods of time causing, along with other factors, the Net Asset Value per Share of Classes designated in CNY to fluctuate as well. Currency exchange rates generally are determined by the forces of supply and demand in the currency exchange markets and the relative merits of investments in different countries, actual or anticipated changes in interest rates and other complex factors, as seen from an international perspective. However, currency exchange rates in the PRC can also be affected unpredictably by intervention or failure to intervene by relevant governments or central banks or by currency controls or political developments.

The Company will seek to hedge foreign currency risks but as the foreign exchange of CNY is regulated, such hedging may only result in an imperfect hedge. In addition, investors in Portfolios for which the US Dollar is the Base Currency should note that CNY and US Dollar exchange rates have historically been closely correlated and hedging may be expensive in comparison with the actual risk hedged. There can be no assurance that any hedging, particularly such potentially imperfect hedging, will be successful and it may even be counter-productive. Equally, failure to hedge foreign currency risks may result in the Company bearing the burden of exchange rate fluctuations. The Company does not currently intend to hedge the currency exposure of its investments into the Base Currency.

In addition, currency markets in CNY may have lower trading volumes than the currencies of more developed countries and accordingly markets in CNY may be materially less liquid, subject to greater dealing spreads and experience materially greater volatility than those of other currencies. Government supervision and regulation of the exchange of CNY is also less developed than in many more developed countries and there is a greater measure of legal uncertainty concerning the rights and duties of market participants with respect to trades in CNY. As a result, the attention of investors in CNY designated Classes is drawn to the restrictions and limitations referred to under the heading "Information Specific to Redemptions" in the "Subscriptions and Redemptions" section of this Prospectus, including the potential imposition by the Manager of a redemption gate of 10% of all Shares in issue on any Dealing Day.

DEPOSITARY RISK

The assets of the Company and its Portfolios shall be held in custody by the Depositary and its sub-custodian(s) and/or any other custodians, prime broker and/or broker-dealers appointed by the Company and/or the Manager. Investors are hereby informed that cash and fiduciary deposits may not be treated as segregated assets and might therefore not be segregated from the relevant depositary, sub-custodian(s), other custodian/third party bank, prime broker and/or broker

dealer's own assets in the event of the insolvency or the opening of bankruptcy, moratorium, liquidation or reorganisation proceedings of the depository, sub-custodian(s), other custodian/third party bank, prime broker or the broker dealer as the case may be. Subject to specific depositor's preferential rights in bankruptcy proceedings set forth by regulation in the jurisdiction of the relevant depository, sub-custodian(s), other custodian/third party bank, prime broker or the broker dealer, a Portfolio's claim might not be privileged and may only rank pari passu with all other unsecured creditors' claims. Portfolios might not be able to recover all of their assets in full.

CUSTODIAL RISK

As the Company may invest in markets where custodial and/or settlement systems are not fully developed, including in Emerging Market Countries, the assets of the Company which are traded in such markets which have been entrusted to sub-custodians in circumstances where the use of such sub-custodian is necessary, may be exposed to risk in certain limited circumstances (such as, in the case of a loss of assets where such loss is the result of an external event beyond its reasonable control) where the Depository will have no liability. Currently, with the exception of securities depositories such as Clearstream, Euroclear or DTC where the Depository serves as a direct participant, all assets of the Portfolios are custodied within the Depository's global network of sub-custodians whereby the appointment of an agent or sub-custodian in such a market shall not relieve the Depository from its liability as principal for the acts or omissions of the agent.

A clearing broker with which margin assets are deposited in respect of futures and options or other hedging contracts shall not be a sub-custodian or agent of the Depository for such purpose and the Depository shall not be liable for the acts or omissions or any loss directly or indirectly caused by any margin assets transferred to or placed with such clearing brokers, provided the Depository has acted in accordance with proper instructions as provided for in the Depository Agreement in relation to such transfers. For this purpose, the phrase "margin assets" shall include cash or other assets of a Portfolio transferred to such clearing brokers by means of title transfer, for payment of margin due at the time of transfer or for amounts which may be placed with such clearing brokers and utilised for the Portfolio's trading in such futures and options. As these assets are passed to the broker by means of title transfer, once passed by the Company, they are no longer considered to be assets of the Portfolio and the Portfolio's assets in this respect will instead be the futures and options contracts that the margin assets support and the contractual right to the return of the margin assets by the broker on the termination of the relationship between the broker and the Company and/or the Manager.

RELIANCE ON THE MANAGER

The Company will rely on the Manager in implementing its investment strategies. The bankruptcy or liquidation of the Manager may have an adverse impact on the Net Asset Value. Investors must rely on the judgement of the Manager in making investment decisions. The Manager and its principals and affiliates will however devote a substantial degree of their business time to the Company's business.

In addition,

- (a) The Portfolios may be prevented from dealing for legal, regulatory or policy reasons;
- (b) The Manager or its affiliates may have managed or co-managed a public offering of securities in respect of any Portfolio's holding of securities within the last three years from the date of this prospectus or may from time to time perform business for any company whose securities are contained in a Portfolio; and
- (c) The Manager, its affiliates, shareholders, directors, members, officers and/or employees may have long or short positions in any securities contained in the Portfolios' holdings or options, futures and other FDI based on these holdings.

SETTLEMENT RISKS

The equity markets in different countries will have different clearance and settlement procedures and in certain markets there have been times when settlements have been unable to keep pace with the volume of transactions, thereby making it difficult to conduct such transactions. Delays in settlement could result in temporary periods when assets of a Portfolio are uninvested and no return is earned thereon. The inability of a Portfolio to make intended purchases due to settlement problems could cause it to miss attractive investment opportunities. Inability to dispose of portfolio securities due to settlement problems could result either in losses to a Portfolio due to subsequent declines in value of the portfolio security or, if it has entered into a contract to sell the security it could result in a possible liability of it to the purchaser.

INDEMNIFICATION OBLIGATIONS

The Company has agreed to indemnify the Directors, the Manager and the Depository as provided for in the relevant agreements. The Company and the Manager have agreed to indemnify the Administrator as provided for in the

administration agreement. The Manager has agreed to indemnify the Sub-Investment Manager as provided for in the relevant agreements.

PORTFOLIO TRANSACTION CHARGES

Sales, redemption or transaction charges may be payable in respect of any Portfolio if specified in the “Fees and Expenses” section. **In the short-term, these charges will have the effect of reducing the value of an investment. Accordingly, an investor should view its investment in that Portfolio as medium- to long-term.**

NO INVESTMENT GUARANTEE EQUIVALENT TO DEPOSIT PROTECTION

An investment in the Company is not in the nature of a deposit in a bank account and is not protected by any government, government agency or other guarantee scheme which may be available to protect the holder of a bank deposit account. The value of Shares may go down as well as up and investors may not get back any of the amount invested.

PROVISIONAL ALLOTMENTS

As the Company may provisionally allot Shares to proposed investors prior to receipt of the requisite subscription monies for those Shares the Company may suffer losses as a result of the non-payment of such subscription monies, including, for example, the administrative costs involved in updating the records of the Company to reflect Shares allotted provisionally which are not subsequently issued.

The Company will attempt to mitigate this risk by obtaining an indemnity from investors, however, there is no guarantee that the Company will be able to recover any relevant losses pursuant to such indemnity.

BENCHMARK OUTPERFORMANCE RISK

A Portfolio may have an investment objective or policy to outperform a specified benchmark, in the Base Currency of the Portfolio. Any such outperformance target will be a specific amount expressed in percentage terms relative to the benchmark and, unless otherwise stated in the Relevant Supplement, will be assessed after the deduction of any performance or sub-advisory fees but before the deduction of management, custody, administration and distribution (if any) fees and other Portfolio expenses. As such, the return of any investment in a Portfolio and consequently, the ability of a Shareholder in that Portfolio to realise a return in line with any outperformance targets set for the Portfolio against a stated benchmark, will be directly impacted by the level of such fees payable by the Portfolio.

In addition, certain Portfolios may set outperformance targets that are less than the maximum level of management, custody, administration and distribution fees and other Portfolio expenses applicable to certain Classes within such Portfolios. This may in some circumstances, result in Shareholders not receiving a positive return on their investment relative to the benchmark, notwithstanding that the Sub-Fund has achieved its stated outperformance target. Where the maximum level of management, custody, administration and distribution fees and other Portfolio expenses applicable to a Class is less than an outperformance target set for the relevant Portfolio, such fees and expenses will reduce the outperformance which the Class receives relative to the benchmark. In addition, Shareholders in a Hedged Class should note that, the costs of hedging may impact the ability of a Shareholder in that Portfolio to realise a return in line with any outperformance targets set for the Portfolio against a stated benchmark. Additionally, Shareholders in a Class which is denominated in a currency other than the Base Currency should note that, it may be more meaningful to compare the performance of such a Class against a version of this index which is denominated in the relevant Class currency (if available). Investors should also note that there is no guarantee that a Portfolio will achieve any stated outperformance target.

COMMON REPORTING STANDARD

The Council of the EU has adopted Directive 2014/107/EU, which amends Directive 2011/16/EU on administrative cooperation in the field of taxation. This 2014 Directive provides for the adoption of the regime known as the “Common Reporting Standard” proposed by the Organisation for Economic Co-operation and Development and has generalised the automatic exchange of information within the European Union with effect from 1 January 2016. Under these measures, the Company may be required to report information relating to Shareholders, including the identity and residence of Shareholders and income, sale or redemption proceeds received by Shareholders in respect of the Shares to the Irish Revenue. This information may then be shared with tax authorities in other EU Member States and other jurisdictions which have implemented the OECD Common Reporting Standard.

UMBRELLA CASH COLLECTION ACCOUNTS

Subscription monies received in respect of a Portfolio in advance of the issue of Shares will be held in an umbrella level cash collection account (an "Umbrella Cash Collection Account") in the name of the Company. Investors will be unsecured creditors of such Portfolio with respect to the amount subscribed until such Shares are issued and will not benefit from any appreciation in the Net Asset Value of a Portfolio or any other shareholder rights (including dividend entitlement) until such time as Shares are issued. In the event of an insolvency of a Portfolio or the Company, there is no guarantee that the Portfolio or Company will have sufficient funds to pay unsecured creditors in full.

Payment by a Portfolio of redemption proceeds and dividends is subject to receipt by the Administrator of completed subscription documents and compliance with all anti-money laundering procedures. Notwithstanding this, redeeming Shareholders will cease to be Shareholders, with regard to the redeemed Shares, from the relevant Dealing Day. Redeeming Shareholders and Shareholders entitled to distributions will, from the redemption or distribution date, as appropriate, be unsecured creditors of the relevant Portfolio, and will not benefit from any appreciation in the Net Asset Value of the Portfolio or any other Shareholder rights (including further dividend entitlement), with respect to the redemption or distribution amount. In the event of an insolvency of the Portfolio or the Company during this period, there is no guarantee that the Portfolio or Company will have sufficient funds to pay unsecured creditors in full. Redeeming Shareholders and Shareholders entitled to distributions should therefore ensure that any outstanding documentation and information is provided to the Administrator promptly. Failure to do so is at such Shareholder's own risk.

In the event of the insolvency of Portfolio, recovery of any amounts to which any other Portfolio is entitled but which may have transferred to such insolvent Portfolio as a result of the operation of the Umbrella Cash Collection Account, will be subject to the principles of Irish trust law and the terms of the operational procedures for the Umbrella Cash Collection Account. There may be delays in effecting and/or disputes as to the recovery of such amounts and the insolvent Portfolio may have insufficient funds to repay amounts due to the relevant Portfolio. Accordingly, there is no guarantee that such Portfolio or the Company will recover such amounts. Furthermore, there is no guarantee that in such circumstances such Portfolio or the Company would have sufficient funds to repay any unsecured creditors.

2. OPERATIONAL RISKS

BUSINESS AND REGULATORY RISKS

Legal, tax, and regulatory changes are likely to occur during the term of the Company and some of these changes may adversely affect the Company, perhaps materially. The financial services industry generally, and the activities of collective investment schemes and their managers, in particular, have been subject to intense and increasing regulatory scrutiny. Such scrutiny may increase the Company's exposure to potential liabilities and to legal, compliance, and other related costs. Increased regulatory oversight may also impose additional administrative burdens on the Manager, including, without limitation, responding to investigations and implementing new policies and procedures. Such burdens may direct the Manager's time, attention, and resources from portfolio management activities. In addition, certain regulatory changes, including restrictions imposed, may be imposed by reference to the overall assets managed by the Manager rather than solely in respect of the assets of the Company. In such circumstances, compliance by the Manager with such restrictions may give rise to a conflict of interest.

In addition, securities and futures markets are subject to comprehensive statutes, regulations, and margin requirements. The Central Bank, the FCA, other regulators, self-regulatory organisations, and exchanges are authorised to take extraordinary actions in the event of market emergencies. The regulation of derivatives transactions and funds that engage in such transactions is an evolving area of law and is subject to modification by government and judicial actions.

More generally, it is impossible to predict what, if any, changes in regulation applicable to the Company, the Manager, the markets in which they trade and invest, or the counterparties with which they do business may be instituted in the future. The effect of any future regulatory change on the Company could be substantial and adverse.

Investors should understand that the Company's business is dynamic and is expected to change over time. Therefore, the Company may be subject to new or additional regulatory constraints in the future. This Prospectus cannot address or anticipate every possible current or future regulation that may affect the Manager, the Company, or their businesses. Such regulations may have a significant impact on the Shareholders or the operations of the Company, including, without limitation, restricting the types of investments the Company may make, preventing the Company from exercising its voting rights with regard to certain financial instruments, requiring the Company to disclose the identity of its investors, or otherwise. The Directors may cause a Portfolio to be subject to such regulations if they believe that an investment or business activity is in such Portfolio's interests, even if such regulations may have a detrimental effect on one or more Shareholders. Prospective Shareholders are encouraged to consult their own advisers regarding an investment in the Company.

OPERATIONAL RISKS

The Manager's operational risk management framework is based on the Basel II definition of operational risk which is 'the risk of loss resulting from inadequate or failed internal, processes, people and systems or from external events'. The Manager's management of operational risk is therefore aimed at identifying risks in existing processes and improving existing controls to reduce their likelihood of failure and the impact of losses.

The Company relies on the Manager and its affiliates to ensure there are appropriate systems and procedures to identify, assess and manage operational risk. These systems and procedures may not account for every actual or potential disruption of the Company's operations but only for those where an appetite of risk has been set. Given the nature of investment management activities, operational risks are intrinsic to the Company's operations, especially given the volume, diversity and complexity of transactions that the Company is expected to enter into daily.

The Company's control environment is highly dependent on the ability of the Manager and its affiliates to process, on a daily basis, transactions across numerous and diverse markets. Consequently, the Company relies heavily on the Manager's control environment which includes financial, accounting and other data processing systems. The ability of such systems to be scalable and adjust to the complexity of transactions could also constrain the ability of the Company to properly manage its portfolio.

Systemic failures in the systems employed by the Manager, the Depositary, the Administrator and/or counterparties, exchanges and similar clearance and settlement facilities and other parties could result in errors made in the confirmation or settlement of transactions, or in transactions not being properly booked, evaluated or accounted for. These and other similar disruptions in operations may cause a Portfolio to suffer, among other impacts, financial loss, the disruption of its businesses, liability to third parties, regulatory intervention or reputational damage. In such cases the Manager's operational risk framework allows for the appropriate investigation and compensation if required by the party at the root cause of the control failure.

COUNTERPARTY RISK

The Company will be exposed to counterparty risk, which is the risk that a counterparty will fail to comply with the terms of an agreement, potentially resulting in losses to the Company. Counterparty risk may arise from a dispute over the terms of the contract (whether or not bona fide) or because of a liquidity or solvency problem. If there is a default by the counterparty to a transaction, the Company will under most normal circumstances have contractual or regulatory remedies and in some cases collateral pursuant to the agreements related to the transaction. However, exercising such rights may involve delays or costs which could result in the Net Asset Value of the relevant Portfolio being less than if the Portfolio had not entered into the transaction. Insolvency or bankruptcy of a counterparty could reduce or eliminate the amount recoverable by exercising legal rights. The insolvency, bankruptcy or default of a counterparty could result in substantial losses to the Company. Counterparty risk may be increased where the Company has concentrated certain types of transactions with a single or small group of counterparties.

FDI traded by the Company involve counterparty risk. Certain protections are afforded the Company for derivatives traded on an organised exchange and/or through a clearing organisation, such as a performance guarantee of an exchange clearing house. However, trading of such derivatives may expose the Company to the possibility that the futures commission merchant or clearing organisation will default in the performance of its obligations. OTC derivatives are contracts that are traded (and privately negotiated) directly between two parties which allow for tailored terms and generally are thought to pose greater counterparty risk. When the Company uses derivatives generally, it may be required to provide margin or collateral to satisfy contractual undertakings and regulatory requirements. These practices may not prevent the Company from incurring losses on derivatives transactions.

The participants in "over-the-counter" or "interdealer" markets are typically not subject to the regulatory oversight to which members of "exchange-based" markets are subject. The lack of oversight of such markets may expose the Company to greater risk that a counterparty will not settle a transaction in accordance with its terms and conditions because of a dispute over the terms of the contract (whether or not bona fide) or because of a credit or liquidity problem, thus causing the Company to suffer a loss. Such counterparty risk is accentuated for contracts with longer maturities or forward settlements where events may intervene to prevent settlement.

If one or more of the Company's prime brokers, custodians or banks were to become insolvent or the subject of liquidation proceedings, there exists the risk that the recovery of the Company's securities and other assets from such counterparty will be delayed or be of a value less than the value of the securities or assets originally entrusted to such counterparty.

In addition, the Company may use counterparties which are subject to the laws and regulations of various local jurisdictions, the practical effect of which may subject the Company's assets to substantial limitations and uncertainties. Because of the large number of counterparties and jurisdictions involved and the range of possible factual scenarios

involving the insolvency of a counterparty, it is not possible to generalise about the effect of an insolvency on the Company and its assets.

Regardless of any measures implemented to reduce counterparty risk there can be no assurance that a counterparty will not default or that the Company will not sustain losses as a result.

INFORMATION TECHNOLOGY SECURITY

The Manager and Administrator maintain global information technology systems, consisting of infrastructure, applications and communications networks to support the Company's, as well as their own, business activities. These systems could be subject to security breaches such as 'cyber-crime' resulting in theft, a disruption in the ability to close out positions and the disclosure or corruption of sensitive and confidential information. Security breaches may also result in misappropriation of assets and could create significant financial and/or legal exposure for the Company. The Manager and the Administrator seek to mitigate attacks on their own systems but will not be able to control directly the risks to third-party systems to which it may connect. Any breach in security of the Manager's or Administrator's systems could have a material adverse effect on the Manager or the Administrator and may cause the Company to suffer, among other things, financial loss, the disruption of its business, liability to third parties, regulatory intervention or reputational damage. The Manager has a business continuity process in place in case of an event which impacts system availability.

LIMITED OPERATING HISTORY

Newly formed Portfolios have little or no operating history upon which investors can evaluate the anticipated performance. Past investment performance should not be construed as an indication of the future results of an investment in a Portfolio. The investment programme of a Portfolio should be evaluated on the basis that there can be no assurance that the Manager's assessments of the short-term or long-term prospects of investments, will prove accurate or that the Portfolio will achieve its investment objective.

RELIANCE ON THIRD PARTY SERVICE PROVIDERS

The Company has no employees and the Directors have been appointed on a non-executive basis. The Company is therefore reliant upon the performance of third party service providers for their executive functions. In particular the Manager and the Administrator will be performing services which are integral to the operation of the Company. Failure by any service provider to carry out its obligations to the Company in accordance with the terms of its appointment, including in circumstances where the service provider has breached the terms of its contract, could have a materially detrimental impact upon the operations of the Company.

The success of the Company is largely dependent upon the Manager's skills and there can be no assurance that the Manager or the individuals employed by the Manager will remain willing or able to provide advice to, and trade on behalf of, the Company or that its trading will be profitable in the future.

DELAYS TO SETTLEMENT CAUSED BY ADVERSE WEATHER

Investors should note that adverse weather events such as tropical cyclone warning signals (number 8 or higher), black rainstorm warning signals in Hong Kong or other similar events may result in closures of markets and banks and consequent delays to the settlement of cash payments in respect of subscriptions into or redemptions from a Portfolio. In such circumstances, (i) subscription funds may not be available for investment by the Manager/the Sub-Investment Manager, which may have an adverse effect on the performance of the relevant Portfolio; and (ii) settlements in respect of redemption payments may not be received by redeeming investors within the four (4) Business Day target. In addition, delays to settlement in such circumstances may lead to additional transactional costs and interest charges which may be borne by either the Portfolio or the relevant investor.

3. MARKET RISKS

MARKET RISK

The investments of a Portfolio are subject to normal market fluctuations and the risks inherent in investment in international securities markets and there can be no assurances that appreciation will occur. Stock markets can be volatile and stock prices can change substantially. Debt securities are interest rate sensitive and may be subject to price volatility due to various factors including, but not limited to, changes in interest rates, market perception of the creditworthiness of the issuer and general market liquidity. The magnitude of these price fluctuations will be greater when the maturity of the outstanding securities is longer. Since investment in securities may involve currencies other than the Base Currency of a Portfolio, the value of a Portfolio's assets may also be affected by changes in currency rates and exchange control regulations, including currency blockage. The performance of a Portfolio will therefore depend in part

on the ability of the Manager to anticipate and respond to such fluctuations in stock prices, market interest rates and currency rates and to utilise appropriate strategies to maximise returns, while attempting to reduce the associated risks to investment capital.

TEMPORARY DEPARTURE FROM INVESTMENT OBJECTIVE

Where the ability to do so in respect of a Portfolio is disclosed in the relevant Supplement, when the Manager or the Sub-Investment Manager anticipates adverse market, economic, political or other conditions, it may temporarily depart from a Portfolio's investment objective and invest substantially in high-quality, short-term investments. This could help the Portfolio avoid losses but may also mean lost opportunities.

RISKS RELATING TO DOWNSIDE PROTECTION STRATEGY

Where a Portfolio's investment objective and investment approach seeks to provide downside risk management and aims at managing losses or preserve the capital of the Portfolio, through the use of prudent security selection and the implementation of hedging and/or efficient portfolio management techniques through the utilisation of FDI, it may also preclude the Portfolio from fully capturing the upside in rising markets. The Portfolio may therefore underperform funds that do not adopt such a downside protection strategy in rising markets, due to the fact that the hedging strategies implemented will result in lower net exposure to the markets in which the Portfolio invests.

CURRENCY RISK

The Net Asset Value per Share of a Portfolio will be computed in the Base Currency of the relevant Portfolio, whereas the investments held for the account of that Portfolio may be acquired in other currencies. The Base Currency value of the investments of a Portfolio designated in another currency may rise and fall due to exchange rate fluctuations in respect of the relevant currencies. Adverse movements in currency exchange rates can result in a decrease in return and a loss of capital. The Portfolio may attempt to fully or partially hedge into its Base Currency to mitigate the risk. In addition, currency hedging transactions, while potentially reducing the currency risks to which a Portfolio would otherwise be exposed, involve certain other risks, including the risk of a default by a counterparty.

Where a Portfolio engages in foreign exchange transactions which alter the currency exposure characteristics of its investments the performance of such Portfolio may be strongly influenced by movements in exchange rates as currency positions held by the Portfolio may not correspond with the securities positions held.

Where a Portfolio enters into "cross hedging" transactions (eg, utilising currency different than the currency in which the security being hedged is denominated), the Portfolio will be exposed to the risk that changes in the value of the currency used to hedge may not correlate with changes in the value of the currency in which the securities are denominated, which could result in loss on both the hedging transaction and the Portfolio securities.

POLITICAL AND/OR REGULATORY RISKS

The value of the assets of a Portfolio may be affected by uncertainties such as international political developments, changes in government policies, taxation, restrictions on foreign investment and currency repatriation, currency fluctuations and other developments in applicable laws and regulations.

EPIDEMICS, PANDEMICS, OUTBREAKS OF DISEASE AND PUBLIC HEALTH ISSUES

The activities of the Company, the Manager and the Sub-Investment Managers, their respective operations and the Company's investments could be adversely affected by outbreaks of disease, epidemics and public health issues either regionally or globally, despite effective business continuity plans being in place. An example of this is coronavirus, or COVID-19, which is spreading rapidly around the world since its initial emergence in December 2019 and has negatively affected (and may continue to negatively affect or materially impact) the global economy, global markets and supply chains. Although the long-term effects of epidemics and pandemics can be very difficult to predict and it may sometimes even not be possible to predict them, previous occurrences of other epidemics and pandemics had material adverse effects on the economies, equity markets, and operations of those countries and jurisdictions in which they were most prevalent. Any major public health issue could affect individual issuers or related groups of issuers, which would be reasonably likely to adversely affect the business, financial condition and operations of the Company, the Manager and the Sub-Investment Managers.

Additionally, any outbreak of disease epidemics may result in the closure of the Manager's and the Sub-Investment Managers' offices or other businesses, and while the Company, the Manager and the Sub-Investment Managers' have robust remote working and business continuity procedures in place, it could impact the ability of the Manager and the Sub-Investment Managers and their service providers to operate and implement the Portfolios' investment strategies and

objectives which can ultimately have an adverse impact on the Company's value. In addition, the Manager's and the Sub-Investment Managers' personnel may be directly impacted by the spread, both through direct exposure and exposure to family members. Even though the Manager's and the Sub-Investment Manager's business continuity procedures include measures to address the possibility of personnel contracting infectious disease that aim at mitigating the need for the Company to suspend its activities, the spread of a disease among the Manager's and the Sub-Investment Managers' personnel could significantly affect their ability to properly manage the affairs of the Company, resulting in the possibility of the Directors deciding to implement a temporary or permanent suspension of the Company's investment activities or operation, in accordance with the terms of this Prospectus.

Furthermore, the risks related to epidemics, pandemics and outbreaks of disease are heightened due to potential uncertainty as to whether such an event would qualify as a force majeure event for commercial agreements to which the Company is a party. The applicability, or lack thereof, of force majeure provisions could also come into question in connection with contracts that the Company and its investments have entered into, which could ultimately work to their detriment. If a force majeure event is determined to have occurred, a counterparty to the Company or a portfolio investment may be relieved of its obligations under certain contracts to which it is a party, or, if it has not, the Company and its investments may be required to meet their contractual obligations, despite potential constraints on their operations and/or financial stability. Either outcome could adversely impact investments and the Company's performance.

EURO, EUROZONE AND EUROPEAN UNION STABILITY RISK

In light of ongoing concerns on the sovereign debt risk of certain EU Member States within the Eurozone, the Company's investments in the Euro region may be subject to higher volatility, liquidity, currency and default risks. Any adverse events, such as credit downgrade of a sovereign or exit of EU Member States from the Eurozone, may have a negative impact on the value of the Portfolios.

On 23 June 2016 the United Kingdom held a referendum and voted to leave the European Union. This has led to volatility in the financial markets of the United Kingdom and more broadly across Europe and may also lead to weakening in consumer, corporate and financial confidence in such markets. On 31 January 2020, the United Kingdom formally left the European Union and entered into a transition period that lasted until 31 December 2020. On 24 December 2020, a formal withdrawal agreement was agreed between the European Union and the United Kingdom the terms of which dictate the extent and process by which the United Kingdom exits the European Union, and the longer term economic, legal, political and social framework to be put in place between the United Kingdom and the European Union (the "**Withdrawal Agreement**"). The Withdrawal Agreement took effect on 1 January 2021.

Notwithstanding the avoidance of a "no-deal Brexit" and the increased uncertainty that would likely have accompanied such a scenario, the United Kingdom's exit from the European Union will likely lead to exacerbated periods of volatility and economic uncertainty in both the United Kingdom and in wider European markets in the short to mid-term. In particular, the decision made in the British referendum may lead to a call for similar referendums in other European jurisdictions which may cause increased economic volatility in the European and global markets. This uncertainty may have an adverse effect on the economy generally and on the ability of the Portfolios to execute their respective strategies and to receive attractive returns.

Leaving the EU may also result in significant changes to law and regulation in the United Kingdom. It is not currently possible to assess the effect of these changes on the Company or the position of the Shareholders. Investors should be aware that these and other similar consequences following from the referendum result may adversely affect the value of the Shares and the Company's performance.

Other unforeseen investment or operational risks may exist related to the possibility of one or more members exiting the Eurozone or EU, or the Eurozone or EU otherwise not remaining intact.

CESSATION OF LIBOR

The London Inter-bank Offered Rate ("**LIBOR**") is the average of interest rates estimated by leading banks in London, based on what they would be charged to borrow from other banks. The Portfolios may undertake transactions in instruments that are valued using LIBOR rates or enter into contracts which determine payment obligations by reference to LIBOR for risk reducing and efficient portfolio management purposes. However, on 27 July 2017, the FCA announced that LIBOR will be phased out by 2021. Since then, while the Financial Stability Board (the "**FSB**") has stated that timing to phase out LIBOR will remain unchanged and is still targeted for end of 2021, ICE Benchmark Administration, the administrator of LIBOR, announced in mid-November 2020, that LIBOR may continue to be published into 2022 and beyond under certain circumstances. However, on the assumption that the Portfolios' use of LIBOR doesn't fall within the limited circumstances that have been outlined as potentially continuing beyond 2021 the Portfolios may only continue to invest in instruments that reference LIBOR due to favourable liquidity or pricing until the end of 2021. It is anticipated that a transition mechanism will be determined by industry that will allow existing instruments and contracts that reference LIBOR to reference a new rate. Although as at the date of this Prospectus progress has been made in identifying

appropriate LIBOR substitute reference rates, no rate has yet been agreed and adopted universally as a substitute for LIBOR and no transition mechanism is currently in place. There are risks that exist due to LIBOR ceasing. It is not possible to identify exhaustively those risks at this point, but they include the risk that a suitable transition mechanism may not be found or may not be suitable for the Portfolios. In addition, any substitute reference rate and any pricing adjustments imposed unilaterally, by a regulator or by counterparties, may not be suitable for the Portfolios, resulting in costs incurred to close out positions and place replacement trades. LIBOR is administered by ICE Benchmark Administration Limited. ICE Benchmark Administration Limited appears on the ESMA register of administrators and benchmarks.

INVESTMENT SELECTION AND DUE DILIGENCE PROCESS

Before making investments, the Manager will conduct due diligence that it deems reasonable and appropriate based on the facts and circumstances applicable to each investment. The Manager may be required to evaluate important and complex business, financial, tax, accounting, environmental and legal issues. The Manager may select investments on the basis of information and data filed by the issuers of such securities with various regulatory bodies or made directly available to the Manager by the issuers of the securities and other instruments or through sources other than the issuers. Outside consultants, legal advisers, accountants and investment banks may be involved in the due diligence process in varying degrees depending on the type of investment. Although the Manager evaluates all such information and data and seeks independent corroboration when it considers it appropriate and when it is reasonably available, the Manager is not in a position to confirm the completeness, genuineness or accuracy of such information and data. The due diligence investigation that the Manager will carry out with respect to any investment opportunity may not reveal or highlight certain facts that could adversely affect the value of the investment.

EQUITY SECURITIES

Equity securities represent ownership interests in a company or corporation, and include common stock, preferred stock and warrants and other rights to acquire such instruments. Investment in equity securities in general are subject to market risks that may cause their prices to fluctuate over time due to various factors, such as changes in investment sentiment, political and economic conditions and issuer-specific factors. The value of convertible equity securities is also affected by prevailing interest rates, the credit quality of the issuer and any call provisions. Fluctuations in the value of equity securities in which the Portfolio invests would cause the Net Asset Value of the Portfolio to fluctuate.

WARRANTS

When a Portfolio invests in warrants, the Net Asset Value per Share of the Portfolio may fluctuate more than if the Portfolio was invested in the underlying securities because of the greater volatility of the warrant price.

DEPOSITARY RECEIPTS

Portfolios may purchase sponsored or unsponsored American Depositary Receipts, European Depositary Receipts and Global Depositary Receipts (collectively "Depositary Receipts") typically issued by a bank or trust company which evidence ownership of underlying securities issued by a corporation. Generally, Depositary Receipts in registered form are designed for use in the US securities market and Depositary Receipts in bearer form are designed for use in securities markets outside the US. Depositary Receipts may not necessarily be denominated in the same currency as the underlying securities into which they may be converted. Depositary Receipts may be issued pursuant to sponsored or unsponsored programs. In sponsored programs, an issuer has made arrangements to have its securities trade in the form of Depositary Receipts. In unsponsored programs, the issuer may not be directly involved in the creation of the program. Although regulatory requirements with respect to sponsored and unsponsored programs are generally similar, in some cases it may be easier to obtain financial information from an issuer that has participated in the creation of a sponsored program. Accordingly, there may be less information available regarding issuers of securities underlying unsponsored programs and there may not be a correlation between such information and the market value of the Depositary Receipts.

REITS

In respect of a Portfolio which may invest in Real Estate Investment Trust Securities ("REITs"), which are pooled investment vehicles that invest primarily in either real estate or real estate related loans, there are particular risks associated with the direct ownership of real estate by REITs. For example, real estate values may fluctuate as a result of general and local economic conditions, overbuilding and increased competition, increases in property taxes and operating expenses, changes in zoning laws, casualty or condemnation losses, regulatory limitations on rents, changes in neighbourhood values, changes in how appealing properties are to tenants and increases in interest rates. As well as changes in the value of their underlying properties, the value of REITs may also be affected by defaults by borrowers or tenants.

Furthermore, REITs are dependent on specialised management skills. Some REITs may have limited diversification and may be subject to risks inherent in financing a limited number of properties. REITs depend generally on their ability to generate cash flows to make distributions to shareholders or unitholders, and may be subject to defaults by borrowers and to self-liquidations. In addition, the performance of a REIT may be adversely affected if it fails to qualify for tax-free pass-through of income under US tax law or if it fails to maintain exemption from registration under the 1940 Act.

The ability to trade REITs in the secondary market can be more limited than other stocks. The liquidity of REITs on the major US stock exchanges is on average less than the typical stock included in, for example, the S&P 500 Index.

RISKS ASSOCIATED WITH MORTGAGE REITS

Mortgage REITs, which invest the majority of their assets in real estate mortgages and derive their income mainly from interest payments, may be affected by the quality of any credit extended. In addition to the risks which REITs are subject to, mortgage REITs are also subject to interest rate risks. When interest rates decline, the value of a REIT's investments in fixed rate obligations can be expected to rise. Conversely, when interest rates rise, the value of a REIT's investments in fixed rate obligations can be expected to decline. In contrast, as interest rates on adjustable rate mortgage loans are reset periodically, yields on a REIT's investments in such loans will gradually align themselves to reflect changes in market interest rates, causing the value of such investments to fluctuate less dramatically in response to interest rate fluctuations than would investments in fixed rate obligations.

Furthermore, mortgage REITs are dependent upon management skills and generally may not be diversified. Mortgage REITs are also subject to heavy cash flow dependency, defaults by borrowers and self-liquidation. There is also the risk that borrowers under mortgages held by REITs or lessees of a property that REITs may own may be unable to meet their obligations to the REITs. In the event of a default by a borrower or lessee, the REITs may experience delays in enforcing its rights as a mortgagee or lessor and may incur substantial costs associated with protecting its investments.

RISKS ASSOCIATED WITH HYBRID REITS

Hybrid REITs combine the characteristics of both mortgage REITs and equity REITs (which invest the majority of their assets directly in real property and derive their income from rents and capital gains from appreciation realised through property sales). Equity REITs may be affected by changes in the value of the underlying property owned by the REITs, while mortgage REITs may be affected by the quality of any credit extended. Given the diversification between equity REITs and Mortgage REITs, hybrid REITs intend to get the benefit of both asset classes with less risk than investing in one type of REIT. However, depending on whether a balanced approach is taken between investing between the two types, hybrid REITs may take exposure to the risks associated with both mortgage REITs and equity REITs concurrently.

SMALL CAP RISK

In respect of Portfolios which may invest in small capitalisation companies, such investments involve greater risk than is customarily associated with investments in larger, more established companies due to the greater business risks of small size, limited markets and financial resources, narrow product lines and a frequent lack of depth of management. The securities of small or medium-sized companies are often traded over-the-counter, and may not be traded in volumes typical of securities traded on a national securities exchange. Consequently, the securities of smaller companies may have limited market stability and may be subject to more abrupt or erratic market movements than securities of larger, more established companies or the market averages in general. In a declining market these stocks can also be hard to sell at a price that is beneficial to the Portfolio.

EXCHANGE TRADED FUNDS ("ETFs")

ETFs are investment companies whose shares are bought and sold on a securities exchange. ETFs invest in a portfolio of securities designed to track a particular market segment or index. ETFs, like mutual funds, have expenses associated with their operation, including advisory fees. When a Portfolio invests in an ETF, in addition to directly bearing expenses associated with its own operations, it will bear a pro rata portion of the ETF's expenses. Such ETF's expenses may make owning shares of the ETF more costly than owning the underlying securities directly. The risks of owning shares of an ETF generally reflect the risks of owning the underlying securities the ETF is designed to track, although lack of liquidity in an ETF could result in its value being more volatile than the underlying portfolio of securities.

An exchange traded fund (ETF), which is an investment company, may trade in the secondary market at a price below the value of its underlying portfolio and may not be liquid. An actively managed ETF's performance will reflect its adviser's ability to make investment decisions that are suited to achieving the ETF's investment objectives. A passively managed ETF may not replicate the performance of the index it intends to track.

INVESTMENT TECHNIQUES

There are certain investment risks which apply in relation to techniques and instruments which the Manager may employ for efficient portfolio management purposes including, but not limited to, the techniques listed below. To the extent that the Manager's expectations in employing such techniques and instruments are incorrect, a Portfolio may suffer a substantial loss having an adverse effect on the Net Asset Value of the Shares.

QUANTITATIVE RISKS

The investment strategy of certain Portfolios may employ quantitative algorithms and models that rely heavily on the use of proprietary and non-proprietary data, software and intellectual property that may be licensed from a variety of sources. The quality of the resulting analysis and investment selections produced by the portfolio construction process depends on a number of factors including the accuracy of voluminous data inputs into the quantitative models used in the investment process, the mathematical and analytical underpinnings of the coding, the accuracy in translating those analytics into program code, the speed that market conditions change and the successful integration of the various quantitative models in the portfolio selection process. To a significant extent, the performance of a strategy that utilises quantitative investment techniques will depend on the success of implementing and managing the investment models that assist in allocating the Portfolios' assets.

Models that have been formulated on the basis of past market data may not be predictive of future price movements. Models may not be reliable if unusual or disruptive events cause market moves the nature or size of which are inconsistent with the historic performance of individual markets and their relationship to one another or to other macroeconomic events. Models may also have hidden biases or exposure to broad structural or sentiment shifts. In the event that actual events fail to conform to the assumptions underlying such models, losses could be incurred.

Quantitative investment techniques also present the risk that errors may occur and such errors may be extremely hard to detect. In some cases, an error can go undetected for a long period of time. In many cases it is not possible to fully quantify the impact of an error given the dynamic nature of the quantitative models and changing markets. Analytical errors, software errors, development errors and implementation errors as well as data errors are inherent risks. Quantitative investment techniques often require timely and efficient execution of transactions. Inefficient execution of trades can eliminate the ability to capture the pricing differentials that the strategy seeks to capture

SECURITISATION RISKS

Shareholders should be aware that certain Portfolios may become subject to certain risk retention and due diligence requirements (the "**EU Risk Retention and Due Diligence Requirements**") which currently apply to various types of EU regulated investors, including credit institutions, authorised alternative investment fund managers, investment firms, insurance and reinsurance undertakings, institutions for occupational retirement schemes and will apply to UCITS. Amongst other things, the EU Risk Retention and Due Diligence Requirements restrict an investor who is subject to them from investing in securitisations unless: (i) the originator, sponsor or original lender in respect of the relevant securitisation has explicitly disclosed that it will retain, on an on-going basis, a net economic interest of not less than 5% in respect of certain specified credit risk tranches or securitised exposures; and (ii) such investor is able to demonstrate that they have undertaken certain due diligence in respect of various matters including but not limited to its note position, the underlying assets and (in the case of certain types of investors) the relevant sponsor or originator.

Where the EU Risk Retention and Due Diligence Requirements apply to a Portfolio, such Portfolio (and the Manager on its behalf) will be required to take steps to ensure that the relevant Portfolio is in compliance with them and any regulatory technical standards that are imposed on the Portfolio pursuant to them. In particular, the EU Risk Retention and Due Diligence Requirements are likely to require that the relevant Portfolio ensures that all its holdings of securitisations (including certain securitisations issued prior to the EU Risk Retention and Due Diligence Requirements coming into force) are compliant and the Portfolio may be required to dispose of any such holdings that are non-compliant. Under such circumstances, a Portfolio could sustain losses.

CONCENTRATION RISK

Subject to the provisions of the UCITS Regulations, a Portfolio may at certain times hold large positions in a relatively limited number of issuers, investments, industries, markets or countries including, without limitation, as a result of price shifts of its investments, changes in the composition of a Portfolio's overall portfolio and other factors. A Portfolio could be subject to significant losses if it holds a relatively large position in a single issuer or a particular type of investment that declines in value and the losses could increase even further if the investments cannot be liquidated without adverse market reaction or are otherwise adversely affected by changes in market conditions or circumstances. Additionally, where a Portfolio's investments are concentrated in a particular country, the Portfolio will have greater exposure to market, political, legal, economic and social risks of that country than a fund which diversifies country risk across a

number of countries. As a result, the value of such Portfolios may be more volatile than a fund which diversifies across a larger number of countries or investments.

TARGET VOLATILITY

While the Company may seek to manage a Portfolio to a certain target annual volatility, there can be no assurance that this target will be achieved or that the actual annual volatility of such Portfolios will not be in excess or less than the target.

VALUATION RISK

Valuation of the Portfolios' investments may involve uncertainties and judgmental determinations. If such valuation turns out to be incorrect, this may affect the Net Asset Value calculation of a Portfolio

PRIVATE COMPANIES AND PRE-IPO INVESTMENTS

Investments in private companies, including companies that have not yet issued securities publicly in an IPO ("Pre-IPO shares") involve greater risks than investments in securities of companies that have traded publicly on an exchange for extended periods of time. Investments in these companies are generally less liquid than investments in securities issued by public companies and may be difficult for a Portfolio to value. Compared to public companies, private companies may have a more limited management group and limited operating histories with narrower, less established product lines and smaller market shares, which may cause them to be more vulnerable to competitors' actions, market conditions and consumer sentiment with respect to their products or services, as well as general economic downturns. In addition, private companies may have limited financial resources and may be unable to meet their obligations under their existing credit facilities (to the extent that such facilities exist), resulting in a greater likelihood of the dilution or subordination of a Portfolio's investment in such private company.

Additionally, there may be less information, and less reliable information, available in relation to private companies' business, management and earnings potential and other data criteria used to evaluate their investment prospects. Financial reporting obligations for private companies are not as rigorous as public companies, accordingly the information available may be less reliable and it may be difficult to fully assess the rights and values of certain securities issued by private companies.

Although there is a potential for pre-IPO shares to increase in value if the company does issue shares in an IPO, IPOs are risky and volatile and may result in losses to a Portfolio. Moreover, because securities issued by private companies are generally not freely or publicly tradable, a Portfolio may not have the opportunity to purchase or the ability to sell these shares in the amounts or at the prices the Portfolio desires. The private companies that a Portfolio may invest in may not ever issue shares in an IPO and a liquid market for their pre-IPO shares may never develop, which may negatively affect the price at which a Portfolio can sell these shares and make it more difficult to sell these shares, which could also adversely affect a Portfolio's liquidity.

OFF-EXCHANGE TRANSACTIONS

A Portfolio may enter into off-exchange transactions. Off-exchange contracts are not currently regulated and such contracts are not guaranteed by an exchange or clearing house. Consequently, trading in these contracts is subject to more risks than future or options trading on regulated exchanges, including, but not limited to, the risk that a counterparty will default on an obligation. Off-exchange transactions are also subject to legal risks, such as the legal incapacity of a counterparty to enter into a particular contract or the declaration of a class of contracts as being illegal or unenforceable.

SUSTAINABLE INVESTMENT STYLE RISK

Certain Portfolios' application of ESG criteria is designed and utilised to help identify companies that demonstrate the potential to create economic value or reduce risk; however as with the use of any investment criteria in selecting a portfolio of issuers or securities, there is no guarantee that the criteria used by such Portfolios will result in the selection of issuers or securities that will outperform other issuers/securities, or help reduce risk in the relevant Portfolio. The use of the Portfolio's ESG criteria could also affect the Portfolio's exposure to certain sectors or industries, and could impact the Portfolio's investment performance depending on whether the ESG criteria used are ultimately reflected in the market.

ESG criteria considered by certain Portfolios may result in such Portfolios forgoing opportunities to buy certain securities when it might otherwise be advantageous to do so and/or selling securities due to their sustainable characteristics when it might not be advantageous to do so. As such, the application of ESG criteria may restrict the ability of the certain Portfolios to acquire or dispose of their investments at a price and time that they wish to do so and may therefore result in a loss to such Portfolios.

Information used to evaluate a Portfolio's application of ESG factors, like other factors used to identify companies in which to invest, may not be readily available, complete, or accurate, which could negatively impact certain Portfolios' performance or create additional risk in that Portfolio.

There is a lack of a global classification of ESG evaluation methodologies and the way in which different funds will apply ESG criteria may vary, as there are not yet commonly agreed principles and metrics for assessing the sustainable characteristics of investments of ESG funds. The lack of a global classification of ESG evaluation methodologies may also affect the Manager's and a Sub-Investment Manager's ability to measure and assess the environmental and social impact of a potential investment for certain Portfolios.

COMMODITIES RISKS

A Portfolio's exposure to the commodities markets, and/or a particular sector of the commodities markets, may subject the Portfolio to greater volatility than investments in traditional securities, such as stocks and bonds. The commodities markets may fluctuate widely based on a variety of factors, including changes in overall market movements, domestic and foreign political and economic events and policies, war, acts of terrorism, changes in domestic or foreign interest rates and/or investor expectations concerning interest rates, domestic and foreign inflation rates and investment and trading activities of mutual funds, hedge funds and commodities funds. Prices of various commodities may also be affected by factors such as drought, floods, weather, pandemic, livestock disease, embargoes, tariffs and other regulatory developments. The prices of commodities can also fluctuate widely due to supply and demand disruptions in major producing or consuming regions. Such fluctuations might adversely impact the value of the Portfolio.

3.a MARKET RISKS: RISKS RELATING TO DEBT SECURITIES

FIXED INCOME SECURITIES

Fixed income securities are subject to the risk of an issuer's ability to meet principal and interest payments on the obligation (credit risk), and may also be subject to price volatility due to such factors as interest rate sensitivity, market perception of the creditworthiness of the issuer and general market liquidity (market risk). In addition, a Portfolio may invest in fixed-income securities which are interest rate sensitive. An increase in interest rates will generally reduce the value of fixed-income securities, while a decline in interest rates will generally increase the value of fixed-income securities. The performance of such Portfolios will therefore depend in part on the ability to anticipate and respond to such fluctuations on market interest rates, and to utilise appropriate strategies to maximise returns, while attempting to minimise the associated risks to investment capital. Fixed income securities are also exposed to the risk that their or their issuers' credit ratings may be downgraded, which can cause a significant drop in the value of such securities. In the event of such downgrading, the value of a Portfolio may be adversely affected. The Manager or the Sub-Investment Manager may or may not be able to dispose of the debt instruments that are being downgraded.

INTEREST RATE RISK

Portfolios that invest in debt securities or money market instruments are subject to interest rate risk. The value of a debt or debt related security will generally increase when interest rates fall and decrease in value when interest rates rise. Interest rate risk is the chance that such movements in interest rates will negatively affect the value of a security or, in a Portfolio's case, its Net Asset Value. Securities with greater interest rate sensitivity and longer maturities tend to produce higher yields, but are subject to greater fluctuations in value. As a result, securities with a longer maturity tend to offer higher yields for this added risk. While changes in interest rates may affect a Portfolio's interest income, such changes may positively or negatively affect the Net Asset Value of a Portfolio on a daily basis.

CREDIT RISK

A Portfolio will have a credit risk in respect of the issuers of debt securities in which it invests, which will vary, along with the value of the securities themselves depending on the issuer's ability to make principal and interest payments in respect of its obligation or markets' perception of this ability. In addition, not all of the securities in which a Portfolio may invest that are issued by sovereign governments or political subdivisions, agencies or instrumentalities thereof, will have the explicit full faith and credit support of the relevant government. Any failure by any such government to meet the obligations of any such political subdivisions, agencies or instrumentalities may have adverse consequences for a Portfolio and adversely affect the Net Asset Value per Share in such a Portfolio.

Credit ratings provided by Recognised Rating Agencies are relative and subjective and are not absolute standards of quality. Although these ratings are initial criteria for selection of investments, the Manager and/or the Sub-Investment Manager also make their own evaluation of these securities and issuers. Among the factors that are considered are the long-term ability of the issuers to pay principal and interest and general economic trends.

BOND DOWNGRADE RISK

A Portfolio may invest in investment grade bonds, however, where a bond is subsequently downgraded it may continue to be held in order to avoid a distressed sale. To the extent that a Portfolio does hold such bonds, there will be an increased risk of default on repayment, which in turn translates into a risk that the capital value of a Portfolio will be affected. Investors should be aware that the yield or the capital value of a Portfolio (or both) could fluctuate.

LOWER RATED SECURITIES

In respect of Portfolios which may invest in lower rated or unrated (ie, non-investment grade or high yield) securities, such securities are more likely to react to developments affecting market and credit risk than are more highly rated securities, which primarily react to movements in the general level of interest rates. Investors should carefully consider the relative risks of investing in high yield securities and understand that such securities generally are not meant for short-term investing.

The risk of loss due to default by these issuers is significantly greater because lower rated and unrated securities of comparable quality generally are unsecured and frequently are subordinated to the prior payment of senior indebtedness. In addition, Portfolios which invest in such securities may find it more difficult to sell high yield securities or may be able to sell the securities only at prices lower than if such securities were widely traded. Furthermore, such Portfolios may experience difficulty in valuing certain securities at certain times. Prices realised upon the sale of such lower rated or unrated securities, under these circumstances, may be less than the prices used in calculating the Net Asset Value per Share of such Portfolios. Lower rated or unrated fixed income obligations also present risks based on payment expectations. If an issuer calls the obligations for redemption, a Portfolio holding such security may have to replace the security with a lower yielding security, resulting in a decreased return for investors. If such Portfolio experiences unexpected net redemptions, it may be forced to sell its higher rated securities, resulting in a decline in the overall credit quality of its assets and increasing its exposure to the risks of high yield securities.

PRE-PAYMENT RISK

Certain debt or debt-related securities, such as mortgage-backed and asset-backed securities, give an issuer the right to call its securities before their maturity date. The possibility of such prepayment risk may force a Portfolio to reinvest the proceeds of such investments in securities offering lower yields.

RULE 144A SECURITIES

Some of the Portfolios may invest in so-called Rule 144A securities, which are securities that are not required to be registered for resale in the United States under an exemption pursuant to Section 144A of the 1933 Act ("Rule 144A Securities"), but can be sold in the United States to certain institutional buyers. A Portfolio may invest in Rule 144A Securities, provided that its investment objective and policies enable such investment and that such securities are issued with registration rights pursuant to which such securities will be registered under the 1933 Act and traded on the US OTC Fixed Income Securities market within a year of issue and are not considered illiquid. Such securities shall be considered as newly issued transferable securities within the meaning of point 1 of the table "*Investment Restrictions*" section.

In the event that any such securities are not registered under the 1933 Act within one year of issue, such securities shall be considered as falling under section 2.1 of the "*Investment Restrictions*" section, and subject to the 10% limit of the net assets of the Portfolio applicable to the category of securities referred to therein.

SECURITIES LENDING RISK

Where a Portfolio may engage in securities lending, there is a risk that borrowers of securities from the Portfolio may become insolvent or otherwise become unable to meet, or refuse to honour, their obligations to return equivalent securities to the loaned securities. In this event, the Portfolio could experience delays in recovering the securities and may incur a capital loss. There is also the risk that, as a result of portfolio securities being lent, they may not be available to the Portfolio on a timely basis and the Portfolio may, therefore, lose an opportunity to sell the securities at a desirable price. In addition, the Company's right to exercise voting rights in relation to certain investments on behalf of a Portfolio may be impacted as result of such transactions.

If a counterparty to the securities lending transactions defaults and fails to return equivalent securities to those loaned the Portfolio may suffer a loss equal to the shortfall between the value of the realised collateral and the market value of the replacement securities. To the extent that any securities lending is not fully collateralised (for example, due to timing lags associated with the posting of collateral), the Portfolio will have a credit risk exposure to the counterparty of a securities lending contract. The Portfolio could also lose money if the value of collateral falls. These events could trigger adverse tax consequences for the Portfolio.

The use of securities lending may also adversely affect the liquidity of the Portfolio and will be considered by the Manager and the Sub-Investment Manager in managing the Portfolio's liquidity risk.

The Company employs an appropriate liquidity risk management process, which takes the securities lending activity that the Portfolio may engage in into account, in order to ensure that the Portfolio is able to comply with its stated redemption obligations. However, it is possible that in the type of circumstances described above, the Portfolio may not be able to realise sufficient assets to meet all redemption requests that it receives or the Company may determine that the circumstances are such that meeting some or all of such requests is not in the best interests of the Shareholders as a whole. In such circumstances, the Manager may take the decision to apply the redemption gate provisions described under "*Information Specific to Redemptions*" in the "*Subscriptions & Redemptions*" section of the Prospectus or suspend dealings in the relevant Portfolio as described in the "*Temporary Suspension of Dealings*" section of the Prospectus.

REPURCHASE/REVERSE REPURCHASE RISK

The value of the collateral of Repo Contracts will be maintained to at least equal to the value of the assets transferred by the relevant Portfolio, in the event of a sudden market movement there is a risk that the value of such collateral may fall below the value of the securities transferred.

In relation to repurchase transactions, investors must notably be aware that (a) in the event of the failure of the counterparty with which cash of a Portfolio has been placed there is the risk that collateral received may yield less than the cash placed out, whether because of inaccurate pricing of the collateral, adverse market movements, a deterioration in the credit rating of issuers of the collateral, or the illiquidity of the market in which the collateral is traded; that (b) (i) locking cash in transactions of excessive size or duration, (ii) delays in recovering cash placed out, or (iii) difficulty in realising collateral may restrict the ability of a Portfolio to meet redemption requests, security purchases or, more generally, reinvestment; and that (c) Repurchase Transactions will, as the case may be, further expose a Portfolio to risks similar to those associated with option or forward FDI, which risks are further described in other sections of this prospectus.

ASSET-BACKED AND MORTGAGE-BACKED SECURITIES

In respect of Portfolios which may invest in such securities, asset-backed securities are created by the grouping of certain governmental, government-related and private loans, receivables and other lender assets into pools and mortgage-backed securities represent pools of mortgage loans assembled for sale to investors by various US governmental agencies such as the Government National Mortgage Association ("GNMA") and US government-related organisations such as Fannie Mae and the Federal Home Loan Mortgage Corporation ("FHLMC"), as well as by non-governmental issuers such as commercial banks, savings and loan institutions, mortgage bankers, and private mortgage insurance companies. Mortgage-backed securities are instruments that entitle the holder to a share of all interest and principal payments from mortgages underlying the security. The mortgages backing these securities include conventional fifteen- and thirty-year fixed-rate mortgages, graduated payment mortgages, adjustable rate mortgages and balloon mortgages. Asset-backed securities are issued as pass-through certificates, which represent undivided fractional ownership interests in the underlying pool of assets, or as debt instruments that are generally issued as the debt of a special purpose entity, such as a trust, organised solely for the purpose of owning such assets and issuing such debt. As the name implies, a pass-through certificate passes on the monthly principal and interest payments from a pool of mortgage loans to holders of the security. Since the loans held in the asset pool often may be prepaid without penalty or premium, asset-backed securities are generally subject to higher prepayment risks than most other types of debt instruments. The pass-through certificate is also the most common structure for mortgage-backed securities. A pass-through certificate issuer acquires mortgages either by originating them or by purchasing them in the whole-loan market. Many mortgages with similar characteristics are collected into a pool, and undivided ownership interests in the pool are sold as pass-through certificates. The undivided interest entitles the owner of the security to a pro rata share of all interest payments and all scheduled or prepaid principal payments.

Prepayment risks on mortgage-backed securities tend to increase during periods of declining mortgage interest rates. Depending upon market conditions, the yield that a Portfolio receives from the reinvestment of such prepayments, or any scheduled principal payments, may be lower than the yield on the original mortgage-backed security. As a consequence, mortgage-backed securities may be a less effective means of "locking in" interest rates than other types of debt securities having the same stated maturity and may also have more potential for capital depreciation.

For certain types of asset pools, such as collateralised mortgage obligations or collateralised debt obligations (both of which consist of bonds issued by single-purpose, stand-alone finance subsidiaries or trusts of financial institutions, government agencies, investment banks, or companies related to the construction industry), prepayments may be allocated to one tranche of securities ahead of other tranches, in order to reduce the risk of prepayment for the other tranches. Prepayments may result in a capital loss to a Portfolio to the extent that the prepaid mortgage-backed securities were purchased at a market premium over their stated amount.

The asset-backed and mortgage-backed securities in which Portfolios may invest will be transferable securities and in accordance with the UCITS Regulations no more than 10% of any Portfolio's net assets will be invested in asset-backed and mortgage-backed securities and any other transferable securities which are not listed or traded on a Recognised Market.

RISKS OF INVESTING IN CONVERTIBLE BONDS

Convertible bonds are a hybrid between debt and equity, permitting holders to convert into shares in the company issuing the bond at a specified future date. As such, convertibles are exposed to equity movement and greater volatility than traditional bond investments while still being subject to the same interest rate risk, credit risk, liquidity risk and prepayment risk associated with comparable traditional bond investments.

RISKS OF INVESTING IN CONTINGENT CONVERTIBLE BONDS

Generally, convertible securities are subject to the risks associated with both fixed income securities and equities, namely credit, price and interest rate risk.

Trigger risk

Contingent convertible bonds are a type of debt security that may be converted into equity or could be forced to suffer a write down of principal upon the occurrence of a pre-determined event ("the trigger event"). The trigger event is ordinarily linked to the financial position of the issuer and therefore the conversion is likely to occur as a result of a deterioration of the relative capital strength of the underlying. As a result, it is likely that the conversion to equity would occur at a share price, which is lower than when the bond was issued or purchased. In stressed market conditions, the liquidity profile of the issuer can deteriorate significantly and it may be difficult to find a ready buyer which means that a significant discount may be required in order to sell it. Contingent convertible bonds can also be issued as perpetual bonds (ie, bonds without a maturity date), while these will have call dates, there is no guarantee that the issue will be called on this date and there is a possibility that the bond may never be called resulting in a total loss of the original capital investment.

Write-down risks

In some cases, the issuer may cause a convertible security to be written down in value based on the specific terms of the individual security if a pre-specified trigger event occurs. There is no guarantee that a Portfolio will receive return of principal on contingent convertible securities.

Coupon cancellation

Furthermore, coupon payments may be discretionary and can be cancelled at any time, for any reason. As a result, investment in contingent convertible bonds can carry higher risk than investment in traditional debt instruments/convertibles and, in certain cases, equities; the volatility and risk of loss can be significant.

Capital structure inversion risk

Contingent convertible securities are typically structurally subordinated to traditional convertible bonds in the issuer's capital structure. In certain scenarios, investors in contingent convertible securities may suffer a loss of capital ahead of equity holders or when equity holders do not.

Call extension risk

Contingent convertible securities are subject to extension risk. Contingent convertible securities are perpetual instruments and may only be callable at predetermined dates upon approval of the applicable regulatory authority. There is no guarantee that a Portfolio will receive return of principal on contingent convertible securities.

Yield/valuation risk

The valuation of contingent convertible securities is influenced by many unpredictable factors such as:

- (i) the creditworthiness of the issuer and the fluctuations in the issuer's capital ratios;
- (ii) the supply and demand for contingent convertible securities;
- (iii) the general market conditions and available liquidity; and

- (iv) the economic, financial and political events that affect the issuer, the market it is operating in or the financial markets in general.

Liquidity Risk

Contingent convertible securities may experience periods of lower liquidity caused by market events, lower new issues during a period or large sales and such events may raise the risk that these securities will not be able to be sold during those periods or may have to be sold at reduced prices. Those events may challenge a Portfolio to meet significant volumes of redemption requests and may also influence the value of a Portfolio, as the lower liquidity in these assets may be reflected in a corresponding reduction in the Net Asset Value of the Portfolio.

Unknown risk

Contingent convertible bonds are a relatively new instrument and the trigger events are generally untested, therefore it is uncertain how the asset class will perform in stressed market conditions and risk to capital, and volatility could be significant.

Subordinated Instruments

CoCos will, in the majority of circumstances, be issued in the form of subordinated debt instruments in order to provide the appropriate regulatory capital treatment prior to a conversion. Accordingly, in the event of liquidation, dissolution or winding-up of an issuer prior to a conversion having occurred, the rights and claims of the holders of the CoCos, against the issuer in respect of or arising under the terms of the CoCos shall generally rank junior to the claims of all holders of unsubordinated obligations of the issuer. In addition, if the CoCos are converted into the issuer's underlying equity securities following a conversion event, each holder will be subordinated due to their conversion from being the holder of a debt instrument to being the holder of an equity instrument.

Market Value will fluctuate based on unpredictable factors

The value of CoCos is unpredictable and will be influenced by many factors including, without limitation (i) the creditworthiness of the issuer and/or fluctuations in such issuer's applicable capital ratios; (ii) supply and demand for the CoCos; (iii) general market conditions and available liquidity and (iv) economic, financial and political events that affect the issuer, its particular market or the financial markets in general.

RISKS ASSOCIATED WITH COLLATERALISED / SECURITISED PRODUCTS

The Portfolios may invest in collateralised and/or securitised products, such as bonds resulting from the restructuring of syndicated loans or bank loans, structured notes, asset-backed securities and participation interests in loans which are securitised and freely transferable. Such securities may be less liquid than other debt securities and may be prone to substantial price volatility. These instruments may be subject to greater credit, liquidity and interest rate risk compared to other debt securities in general. They are often exposed to extension and prepayment risks and risks that the payment obligations relating to the underlying assets are not met, which may adversely impact the return of the securities. Any collateral received by a Portfolio in respect of OTC FDI will meet the requirements set out in this Prospectus and be valued in accordance with the provisions of the "Determination of Net Asset Value" section hereof.

RISKS OF INVESTING IN COLLATERALISED LOAN OBLIGATIONS

The Company's investments in collateralised loan obligations ("CLOs") will be frequently subordinate in right of payment to other securities sold by the applicable CLO and may not be readily marketable. Depending upon the payment and default rates on the collateral of the CLO, the relevant Portfolio may incur substantial losses on its investments.

In addition, as a holder of CLO equity, a Portfolio will have limited remedies available upon the default of an obligor of the collateral underlying such CLO. For example, from time to time, the market for CLO transactions has been adversely affected by a decrease in the availability of senior and subordinated financing for transactions, in part in response to regulatory pressures on providers of financing to reduce or eliminate their exposure to such transactions. The concentration of an underlying portfolio in any one obligor would subject the related CLOs to a greater degree of risk with respect to defaults by such obligor, and the concentration of a portfolio in any one industry would subject the related CLOs to a greater degree of risk with respect to economic downturns relating to such industry.

CLO securities are generally illiquid and dealer marks and valuations provided may not represent prices where assets can actually be purchased or sold in the market from time to time. Accordingly, the mark-to-market value of CLOs may be volatile and the value of the relevant interests could likewise be volatile. The value of the CLO securities owned by a Portfolio generally will fluctuate with, among other things, the financial condition of the obligors or issuers of the underlying

collateral, general economic conditions, the condition of certain financial markets, political events, developments or trends in any particular industry and changes in prevailing interest rates. Consequently, holders of CLO securities must rely solely on distributions on the collateral or proceeds thereof for payment in respect thereof. If distributions on the collateral are insufficient to make payments on the CLO securities, no other assets will be available for payment of the deficiency and following the realisation of the CLO securities, the obligations of such issuer to pay such deficiency generally will be extinguished. Collateral will consist primarily of loans, but may consist of high yield debt or other securities, which often are rated below investment grade (or of equivalent credit quality). High yield debt securities generally are unsecured (and loans may be unsecured) and may be subordinated to certain other obligations of the issuer thereof. The lower ratings of high yield securities and below investment grade loans reflect a greater possibility that adverse changes in the financial condition of an issuer or in general economic conditions or both may impair the ability of the related issuer or obligor to make payments of principal or interest.

CLO issuers may acquire interests in loans and other debt obligations by way of sale, assignment or participation. The purchaser of an assignment typically becomes a lender under the credit agreement with respect to the loan or debt obligation; however, its rights can be more restricted than those of the assigning institution. In purchasing participations, a CLO issuer will usually have a contractual relationship only with the selling institution, and not the borrower. The CLO issuer generally will have neither the right directly to enforce compliance by the borrower with the terms of the loan agreement, nor any rights of set-off against the borrower, nor have the right to object to certain changes to the loan agreement agreed to by the selling institution. The CLO issuer may not directly benefit from the collateral supporting the related loan and may be subject to any rights of set-off the borrower has against the selling institution. In addition, in the event of the insolvency of the selling institution, under U.S. federal and state laws, the CLO issuer may be treated as a general creditor of such selling institution, and may not have any exclusive or senior claim with respect to the selling institution's interest in, or the collateral with respect to, the loan. Consequently, the CLO may be subject to the credit risk of the selling institution as well as of the borrower.

General Economic and Market Conditions

There exist significant risks for the Company as a result of the global economic conditions especially in a stressed market environment. These risks include, among others, (i) the likelihood that a relevant Portfolio or the CLOs will find it more difficult to sell assets in the secondary market, thus rendering it more difficult to dispose of such assets, (ii) the possibility that the price at which assets can be sold by a Portfolio or any CLO will have deteriorated from their effective purchase price and (iii) the illiquidity of the interests of the CLOs, as there is currently little or no secondary trading in securities issued in connection with such interests. These risks may increase the volatility of the relevant Portfolio's investments and may affect the returns on the Portfolio's interests and the ability of the Portfolio to realise its investments.

A liquidity crisis could severely affect the primary market for leveraged loans and debt securities. A lack of new loans may make it more difficult for the CLOs to acquire investments appropriate for their respective portfolios, and in periods of high demand for leveraged loans by investors may result in such CLOs paying higher prices to acquire their portfolios, leading to reduced yields on the Portfolio's investments.

Subordinated CLO Securities

A substantial amount of a Portfolio's investments may be subordinated to most or all other securities of the relevant CLO issuer and most or all other amounts due under the priority of payments set forth in the operative documents of such CLO issuer. As such, the greatest risk of loss relating to defaults in the collateral underlying such CLO is borne by such Portfolio's investments. A Portfolio, therefore, as holder of such investments, will rank behind most or all of the creditors, whether secured or unsecured and known or unknown, of such CLO issuer. Further, CLO equity will not be a secured debt of the applicable CLO.

Such a Portfolio's investments will expose the relevant Portfolio to highly leveraged investments in the collateral. Furthermore, due to the leverage inherent in CLO structures, changes in the value of a Portfolio's investments could be greater than the changes in the values of the collateral, the assets constituting which are subject to, among other things, credit and liquidity risk. Accordingly, CLO mezzanine debt and equity may not be paid in full and may be subject to total loss. The market value of a Portfolio's investments could be significantly affected by, and the leveraged nature of each subordinated class may magnify the adverse impact on each such class of, among other things, changes in the market value of the collateral, changes in the distribution on the collateral, defaults and recoveries on the collateral, capital gains and losses on the collateral, prepayment on the collateral and the availability, prices and interest rate of the collateral. Investors must consider with particular care the risks of leverage in a Portfolio's investments because, although the use of leverage creates an opportunity for substantial returns for a Portfolio on its investments, it increases substantially the likelihood that the Portfolio could lose its entire investment if the collateral is adversely affected by market developments.

Additionally, interest payments on CLOs (other than the most senior tranche or tranches of a given issue) are generally subject to deferral. If distributions on the collateral underlying a CLO are insufficient to make payments on the CLO securities, no other assets will be available for payment of the deficiency and following realisation of the underlying assets,

the obligations of the CLO issuer to pay such deficiency will be extinguished. CLO securities (particularly subordinated securities) may provide that, to the extent funds are not available to pay interest, such interest will be deferred or paid “in kind” and added to the outstanding principal balance of the related security. Generally, the failure by the CLO issuer to pay interest in cash does not constitute an event of default as long as a more senior class of securities of such CLO issuer is outstanding and the holders of the securities that have failed to pay interest in cash (including the relevant Portfolio) will not have available to them any associated default remedies.

Subordination, “Cramdowns” and Dilution

A CLO, as the senior secured creditor of the issuer of one of the loans or other obligations supporting the CLO, can find itself subordinated to otherwise junior creditors. For example, a bankrupt issuer may apply to a Bankruptcy Court in certain jurisdictions for “Debtor in Possession” financing in order to obtain new capital for its operations. The persons who invest such new capital may take a senior position to that of the CLO held by the Portfolio, even though such CLO was previously senior to such persons.

The reorganisation plan approved by a Bankruptcy Court with respect to certain debts or other obligations underlying a CLO may result in a number of different creditors being compelled to accept materially adverse changes to the terms of the debt that they hold — including reduced interest rates, extended maturities and reduced acceleration rights. Such “cramdowns” may be imposed in the discretion of the Bankruptcy Court in order to give the issuer a better chance of remaining economically viable.

No Legal or Beneficial Interest in Collateral

Neither the relevant Portfolio nor the Manager will have a contractual relationship with the obligors of the collateral underlying the Portfolio’s investments. The Portfolio will have a contractual relationship only with the CLO issuers, and will therefore have rights solely against the CLO issuers. The Portfolio will be dependent on the CLO managers to enforce the rights of the CLO issuers against the obligors of the collateral. A Portfolio generally will have no direct right to enforce compliance by such obligors with the terms of the relevant loan, no rights of set-off or voting or other consensual rights of ownership with respect thereto, will not directly benefit from any collateral supporting the loan and may not have the benefit of the remedies that would normally be available to a holder thereof. In addition, in the event of the insolvency of the counterparty, the relevant Portfolio will be treated as a general creditor and will have no claim of title with respect to the loan. Consequently, the relevant Portfolio may be subject to the credit risk of the counterparty as well as of the obligor.

Interest Rate Risk; Floating/Fixed Rate or Basis Mismatch; Timing Mismatch and Modified Rates

While the assets underlying CLOs are typically floating rate, a portion of the assets of CLO issuers whose securities are held by a Portfolio may be fixed rate assets. On the other hand, the securities issued by CLO issuers are typically floating rate notes that bear interest at rates based on the LIBOR (or a comparable or successor rate after the expected decommission of the LIBOR rate, as described previously and below in further detail, which will be in a manner consistent with general market practice) for specified periods. As a result, there may be a mismatch between a CLO issuer’s issued securities and its underlying fixed rate assets. In addition, there may be a basis or timing mismatch or both between a CLO issuer’s issued securities and its underlying floating rate assets, as the interest rate on such assets may adjust more frequently or less frequently, on different dates and/or based on different indices than the interest rates on the CLO issuer’s issued securities. Furthermore, applicable rates on a CLO’s underlying assets may be subject to interest rate floors, caps or other modifications that would result in such rates not changing with, or changing at a different rate than, corresponding changes in LIBOR levels. Such mismatches and modifications could adversely impact the cash flows and values of the relevant Portfolio’s investments.

On July 27, 2017, the head of the UK Financial Conduct Authority made remarks indicating that LIBOR in its current form will be phased out as a benchmark rate by the end of 2021. Since then and despite the impact of the Covid-19 pandemic since early 2020, the FSB has restated that timing to phase out LIBOR will remain unchanged and is still targeted for end of 2021. However, in mid-November 2020, the FCA announced, that the use of LIBOR may continue in 2022 and beyond under certain circumstances. Actions by regulatory authorities or financial institutions to phase out, modify or eliminate LIBOR may cause one or more of the following to occur: (i) increase the volatility of LIBOR prior to the consummation of any such change, (ii) increase the portion of CLO securities and/or a CLO’s underlying investments that calculate interest based on a benchmark rate other than LIBOR or bear interest at a fixed rate, (iii) increase pricing volatility with respect to CLO securities and/or a CLO’s underlying investments, or (iv) negatively impact the liquidity of CLO securities and/or a CLO’s underlying investments. Despite recommendations from the FSB on appropriate substitute rates to LIBOR, no agreement has yet been reached on LIBOR substitute rates and it is not certain whether such agreement will be reached before LIBOR is phased out. It is also uncertain whether broad replacement conventions in the leveraged loan and CLO markets will develop to transition from LIBOR to another alternative risk free rate and, if conventions develop, what those conventions will be and whether they will create adverse consequences for the relevant Portfolio and/or any CLO in which it invests. If no such agreement is reached and/or such conventions develop, it is uncertain what effect broadly divergent

interest rate calculation methodologies in the markets will have on the price and liquidity of CLO securities and/or a CLO's underlying investments and the ability of the Manager to effectively mitigate interest rate risks.

Prepayment of Loans Underlying CLOs

Loans, the primary assets underlying CLOs, are generally prepayable, in whole or in part, at any time at the option of the obligor thereof at par plus accrued and unpaid interest thereon. Prepayments on loans held by a CLO issuer may be caused by a variety of factors which are difficult to predict. Accordingly, there are several related risks. There exists a risk that loans purchased by a CLO issuer at a price greater than par may experience a capital loss as a result of such prepayment. In such an event, the value of a CLO issuer's equity securities and potentially other securities would be adversely impacted. In addition, principal proceeds received by a CLO issuer upon prepayment, as a general rule, are subject to reinvestment risk. The inability or delay of a CLO issuer to reinvest prepayments, principal proceeds or other proceeds in assets that accrue interest at rates comparable to the assets so prepaid or generating such principal or other proceeds that also need to satisfy such CLO issuer's reinvestment criteria may adversely affect the timing and amount of payments and distributions received by, and the yield to maturity of, the CLO issuer's securities.

Reliance on CLO Managers

There can be no assurance that any CLO manager will be able to operate successfully or that the ratings of underlying borrowers on which CLO managers may rely will reflect current information, and subjective decisions and actions taken by a CLO manager may cause the CLO it manages to incur losses or to miss profit opportunities on which it may otherwise have capitalised. The Manager will not attempt to provide day-to-day management assistance to CLO managers and will have no right to direct or influence their investment decisions with respect to the collateral. Further, if a CLO manager fails to retain key personnel, experiences business disruption or otherwise is compromised in its ability to manage such CLO issuer, the relevant Portfolio's investment in the securities of such CLO issuer could be adversely affected. A default by a CLO manager under its collateral management agreement with the related CLO issuer (or any action by such CLO manager constituting "cause" under the removal provisions thereof) could adversely affect the CLO issuer and could impair its ability to make payments to the relevant Portfolio in respect of the related Portfolio's investment. In addition, some CLOs may have collateral consisting of static pools with little or no active management by the related CLO manager.

The Underlying CLOs will Depend on the Managerial Expertise Available to the CLO Manager and its Key Personnel

The composition and performance of the collateral obligations with respect to the underlying CLOs will depend on the skills of the CLO manager and certain key personnel of the CLO manager in analysing, selecting, managing and effecting acquisitions and sales of the collateral. As a result, the underlying CLOs will be highly dependent on the financial and managerial experience of the investment professionals associated with the CLO manager who are assigned to manage the assets with respect to the underlying CLOs. Employment or other contractual arrangements between such individuals and the CLO manager may exist, but the underlying CLOs are not a direct beneficiary of such arrangements and there is no assurance that such persons will continue to be associated with the CLO manager or will continue to be assigned to manage the assets. The loss of any of these individuals could have a material adverse effect on the performance of the assets. In addition, the CLO manager may add additional employees to manage the assets at any time. The additional employees added to manage the assets may not have the same level of experience in selecting and managing loans and other assets as the persons they replace. The performance of the assets will also depend on the skill of the investment professionals assigned to manage the assets in applying the portfolio criteria and other requirements that apply to the selection, management and disposition of the assets in the CLO transaction.

The Investment Professionals of the CLO Manager May Attend to Matters Unrelated to the Investment Activities of the Underlying CLO

The investment professionals associated with the CLO manager may be actively involved in other investment activities not concerning the underlying CLOs. Although the professional staff of the CLO manager should devote as much time to the management of the collateral as such CLO manager deems appropriate and in accordance with reasonable commercial standards, these professionals will have conflicts in allocating their time and services among the underlying CLOs, other funds and accounts of the CLO manager and other responsibilities and will not be able to devote all of their time to the underlying CLOs' business and affairs. In addition, individuals not currently associated with the CLO manager may become associated with the CLO manager and the performance of the collateral obligations may also depend on the financial and managerial experience of such individuals.

Reliance on Corporate Management and Financial Reporting; Borrower Fraud

The Manager may have difficulty in independently verifying the financial information disseminated by the managers, trustees and administrators of CLOs in which the a Portfolio may invest and will be dependent on the integrity of the CLO

managers, trustees and administrators and the financial reporting process in general. Recent events have demonstrated the material losses which investors can incur as a result of corporate (as well as government agency) mismanagement, fraud and accounting irregularities.

Furthermore, a material misrepresentation or omission on the part of the obligor with respect to a loan underlying a Portfolio investment may adversely affect the valuation of the collateral underlying such loan or may adversely affect the ability of the CLO issuer to perfect or effectuate a lien on the collateral securing the loan. The relevant CLO issuer will rely on the accuracy and completeness of representations made by borrowers to the extent reasonable but cannot guarantee such accuracy or completeness. In addition, the quality of a Portfolio's investments is subject to the accuracy of the representations made by the underlying borrowers. Accordingly, the Portfolio is subject to the risk that the systems used by the CLO managers to control for such accuracy are defective.

Non-Controlling Investments

The CLO equity investments held by the relevant Portfolio will generally not entitle the Portfolio to controlling rights with respect to certain events (including amendments, waivers and the ability to exercise early redemption rights) which may be held by other CLO security holders, and may be limited by the CLO issuer's governing documents. Therefore, the relevant Portfolio may have a limited ability to protect its investment in any such investment. Furthermore, a Portfolio will generally not have substantial influence over the operation of the related CLO while senior securities remain outstanding.

CLO Fees and Expenses; Layering

In addition to the management fee paid to the Manager and the performance fee (where relevant) payable to the Manager and/or the Sub-Investment Manager, the collateral manager of each CLO generally will charge the CLO a collateral management fee consisting of an asset-based fee and an incentive fee. The asset-based fees of the collateral managers are generally expected to range from 0.30% to 0.50%, and the incentive fees are generally expected to range from 15% to 25% of distributions after the equity has realised an internal rate of returning ranging from 10% to 15%. However, such fees may be greater or less than the ranges listed above.

As a result, investors in the relevant Portfolio will indirectly bear the collateral management fees and expenses paid by a CLO (and such fees and expenses will be greater if a Portfolio invests in CLO equity), as well as directly bear the fees and expenses of the relevant Portfolio. These direct and indirect fees, allocations, distributions and expenses, in the aggregate, will exceed the fees that would typically be incurred by a direct investment in a single CLO. In addition, the incentive fee paid by a CLO to its collateral manager may create an incentive for the collateral manager to make investments that are riskier or more speculative than would be the case if such arrangement was not in effect.

Illiquid Investments

The Manager expects that a Portfolio which invests in CLOs will hold investments that are illiquid. There is no public market for CLOs in which a Portfolio may invest and the number of defaults on the underlying collateral may result in a complete loss of any such investment made by a Portfolio. The illiquid nature of the relevant Portfolio's positions may make it difficult for the Portfolio to close out unprofitable positions and redeploy capital.

Bank Loans

A Portfolio may acquire — through such interests constituting underlying collateral for CLOs — interests in bank loans and other debt obligations. As the holder of a CLO or structured credit product, a Portfolio will have no direct rights whatsoever with respect to such loans or other debt obligations. The relevant Portfolio generally will have no right to exercise the rights of the lender under the credit agreement, including the right to enforce compliance by the borrower with the terms of the loan agreement, approve amendments or waivers of terms, nor will the Portfolio have any rights of set-off against the borrower, and the Portfolio may not directly benefit from the collateral supporting the debt obligation in which it has purchased the structured credit product. As a result, the relevant Portfolio will be exposed to the credit risk of both the borrower and the institution selling the structured credit product.

Leverage of Portfolio Investments

The subordination of a Portfolio's investments to other classes of notes issued by the CLOs make the relevant Portfolio's investments leveraged instruments in the assets of the applicable CLO issuers. Accordingly, such investments will be subject to increased exposure to adverse economic factors such as a rise in interest rates, a downturn in the economy or deterioration in the condition of a particular Portfolio's investment and/or its market sector. A Portfolio's investment may become unable to generate sufficient cash flow to meet the principal and interest payments on their outstanding indebtedness. The relevant Portfolio may suffer significant losses on its investment in such an issuer.

Risks of Underlying Collateral

As mentioned above, a Portfolio, as an investor in CLOs, will have no direct rights with respect to the underlying loans or obligations which serve as reference assets for such investment. Furthermore, the relevant Portfolio will also be subject to the creditworthiness of the entity issuing the CLO in question, not just to the risk of a default on the underlying obligations.

Nature of Underlying Collateral

A CLO's underlying collateral is subject to credit, liquidity and interest rate risk. The underlying collateral will include loans or interests therein, which may be below investment grade, non-performing and possibly in default. Furthermore, an underlying obligor may also be in bankruptcy or liquidation. There can be no assurance as to the amount and timing of payments with respect to such loans or interests. Defaulted loans may require substantial workout negotiations or restructuring in the event of a default or liquidation. Any such workout or restructuring is likely to lead to a substantial reduction in the interest rate of such asset and/or a substantial write-down or write-off of all or a portion the principal of such asset. Any such reduction in interest rates or principal will negatively affect the relevant Portfolio.

The amount and nature of such collateral obligations have been established to withstand certain assumed deficiencies in payment occasioned by defaults in respect of such collateral obligations. If any deficiencies exceed such assumed levels, however, payments to noteholders could be adversely affected. To the extent that a default occurs with respect to any collateral securing the CLO's notes and the CLO sells or otherwise disposes of such collateral, it is not likely that the proceeds of such sale or other disposition will be equal to the amount of principal and interest owing to the CLO in respect of such collateral. The market value of the collateral will fluctuate with, among other things, the financial condition of the obligors on or issuers of the collateral, general economic conditions, the condition of the debt trading markets and certain other financial markets, political events, developments or trends in any particular industry and changes in prevailing interest rates.

Cov-Lite Loans

The underlying collateral of the CLOs may be composed of "cov-lite" loans. Cov-lite loans typically do not have maintenance covenants and, as such, may expose the issuer to increased risks compared to other loans that have maintenance covenants, including with respect to liquidity, price volatility and ability to restructure. As a result, a CLO's exposure to losses may be increased, which could result in an adverse impact on the CLO's ability to make payments on the notes it has issued. In addition, in a declining economic environment, the market prices of such loans may be depressed.

Refinancing Risk

A significant portion of a CLO's collateral may consist of loans for which most or all of the principal is due only at maturity. The ability of such obligor to make such a large payment upon maturity typically depends upon its ability either to refinance the collateral prior to maturity or to generate sufficient cash flow to repay the collateral at maturity. The ability of an obligor to accomplish either of these goals will be affected by many factors, including the availability of financing at acceptable rates to such obligor, the financial condition of such obligor, the marketability of the collateral (if any) securing such collateral obligation, the operating history of the related business, tax laws and the prevailing general economic conditions. Consequently, such obligor may not have the ability to repay the collateral at maturity and, unless it is able to refinance such debt, it could default in payment at maturity, which could result in losses to the issuer. Significant numbers of obligors on loans may face the need to refinance their debt over the next few years, and significant numbers of CLO transactions (historically an important source of funding for loans) have reached or are close to reaching the end of their reinvestment periods or the final maturities of their own debt. As a result, there could be significant pressure on the ability of obligors on loans to refinance their debt over the next few years unless a significant volume of new CLO transactions or other sources of funding develop. If such sources of funding do not develop, significant defaults in collateral obligations could occur, and there could be downward pressure on the prices and markets for debt instruments, including collateral obligations.

Limited Disclosure about Collateral

CLOs will not provide noteholders, such as a Portfolio, with financial or other information (which may include material non-public information) the CLOs receive, unless required to do so pursuant to the indenture or other agreements. Noteholders, such as a Portfolio, will not have any right to inspect any records relating to the collateral except in limited circumstances.

Equitable Subordination

Under common law principles that in some cases form the basis for lender liability claims, if a lender (a) intentionally takes an action that results in the undercapitalisation of a borrower or issuer to the detriment of other creditors of such borrower or issuer, (b) engages in other inequitable conduct to the detriment of such other creditors, (c) engages in fraud with respect to, or makes misrepresentations to, such other creditors or (d) uses its influence as a stockholder to dominate or control a borrower or issuer to the detriment of other creditors of such borrower or issuer, a court may elect to subordinate the claim of the offending lender or bondholder to the claims of the disadvantaged creditor or creditors (a remedy called "equitable subordination"). Because of the nature of the debt obligations in which a CLO may invest, it may be subject to claims from creditors of an obligor that debt obligations of such obligor which are held by the issuer should be equitably subordinated.

Reinvestment Risk

The amount and timing of purchases of assets will affect the cash flows available to make payments on, and the return to noteholders. Reduced liquidity and relatively lower volumes of trading in certain collateral obligations, in addition to restrictions on investment under the CLO's indenture, could result in periods of time during which a CLO is not able to fully invest its available cash or during which the assets available for investment will not be of comparable quality. It is unlikely that all of a CLO's available cash will be invested fully in collateral obligations at any time. The level of earnings on reinvestments will depend on the availability of investments and the interest rates thereon. The need to satisfy the relevant investment criteria and identify acceptable investments may require the purchase of collateral having lower yields than that previously acquired, as collateral obligations mature, prepay or are sold or require temporary investment in cash equivalents. Any decrease in the yield on the assets will reduce the amounts available for distribution to noteholders, including the relevant Portfolio.

Risks of Investing in Loans

The underlying collateral will be comprised primarily of loans, which will be obligations of corporations, partnerships or other entities or participation interests in such loans. Loans may become non-performing for a variety of reasons. Non-performing loans may require substantial workout negotiations or restructuring that may entail, among other things, a substantial reduction in the interest rate and/or a substantial write-down of the principal of a loan, in addition to the devotion of substantial resources of the manager and the incurrence of substantial costs to the CLO. In addition, because of the unique and customised nature of a loan agreement and the private syndication of a loan, certain loans may not be purchased or sold as easily or as quickly as publicly traded securities, and historically the trading volume in the loan market has been small relative to the corporate bond market. Loans may encounter settlement delays which may be significant due to their unique and customised nature, and transfers may require the consent of an agent bank, borrower or other persons.

Other special risks associated with loans or interests therein included in the CLOs include: (i) environmental liabilities that may arise with respect to collateral securing the obligations; and (ii) generation of income that is subject to taxation.

Unsecured loans are unsecured obligations of the applicable obligor, may be subordinated to other obligations of the obligor and generally have greater credit, insolvency and liquidity risk than is typically associated with investment grade obligations and secured obligations. Unsecured obligations will generally have lower rates of recovery than secured obligations following a default. Also, in the event of the insolvency of an obligor of any unsecured obligation, the holders of such unsecured obligation will be considered general, unsecured creditors of the obligor, will have fewer rights than secured creditors of the obligor and will be subordinate to the secured creditors with respect to the related collateral.

Senior secured loans are usually rated below investment grade or may also be unrated. As a result, the risks associated with senior secured loans are similar to the risks of below-investment-grade fixed-income instruments, although senior secured loans are senior and secured in contrast to other below-investment-grade fixed-income instruments, which are often subordinated or unsecured.

In general, the secondary trading market for senior secured loans is not well developed. No active trading market may exist for certain senior secured loans, which may make it difficult to value them. Illiquidity and adverse market conditions may mean that the CLOs may not be able to sell senior secured loans quickly or at a fair price. To the extent that a secondary market does exist for certain senior secured loans, the market for them may be subject to irregular trading activity, wide bid/ask spreads and extended trade settlement periods.

A CLO's underlying collateral may include second lien loans, each of which will be secured by a pledge of collateral, but which is subordinated (with respect to liquidation preferences with respect to pledged collateral) to other secured obligations of the obligors secured by all or a portion of the collateral securing such secured loan. Second lien loans are typically subject to intercreditor arrangements, the provisions of which may prohibit or restrict the ability of the holder of

a second lien loan to (i) exercise remedies against the collateral with respect to their second liens; (ii) challenge any exercise of remedies against the collateral by the first lien lenders with respect to their first liens; (iii) challenge the enforceability or priority of the first liens on the collateral; and (iv) exercise certain other secured creditor rights, both before and during a bankruptcy of the borrower. In addition, during a bankruptcy of the obligor, the holder of a second lien loan may be required to give advance consent to (a) any use of cash collateral approved by the first lien creditors; (b) sales of collateral approved by the first lien lenders and the bankruptcy court, so long as the second liens continue to attach to the sale proceeds; and (c) debtor in possession financings.

Investments in Distressed Securities and Restructurings

A CLO may make investments, in restructurings or otherwise, that involve issuers that are experiencing, or are expected to experience, severe financial difficulties. These financial difficulties may never be overcome and may lead to uncertain outcomes, including causing such issuer to become subject to bankruptcy proceedings. In addition, investments in issuers that are experiencing, or are expected to experience, severe financial difficulties could, in certain circumstances, subject the CLOs to certain additional potential liabilities that may exceed the value of their original investment therein.

Loans to Private Companies

The underlying assets of certain of the CLOs may include loans to private and middle market companies. Such involve a number of particular risks that may not exist in the case of large public companies, including: (i) these companies may have limited financial resources and limited access to additional financing, which may increase the risk of their defaulting on their obligations, leaving creditors dependent on any guarantees or collateral they may have obtained; (ii) these companies frequently have shorter operating histories, narrower product lines and smaller market shares than larger businesses, which render them more vulnerable to competitors' actions and market conditions, as well as general economic downturns; (iii) there may not be as much information publicly available about these companies as would be available for public companies, and such information may not be of the same quality; and (iv) these companies are more likely to depend on the management talents and efforts of a small group of persons and as a result, the death, disability, resignation or termination of one or more of these persons could have a material adverse impact on these companies' ability to meet their obligations. Such risks may materially increase the risk of loss to the CLOs with respect to such investments.

Risk Retention Requirements May Adversely Affect a CLO Manager's Operations

CLOs in which a Portfolio may invest may be subject to U.S. and/or EU risk retention requirements as follows:

Credit risk retention requirements imposed by Section 15G of the Securities Exchange Act of 1934, as amended (the "Exchange Act") (such retention requirements, the "U.S. Risk Retention Requirements"). The U.S. Risk Retention Requirements were added to the Exchange Act by Section 941 of the Dodd-Frank Act and are the subject of related implementing rules.

Credit risk requirements imposed by Articles 404-410 of Regulation (EU) No. 575/2013 of the European Parliament, Section 5 of the European Union Commission Delegated Regulation (EU) No. 231/2013, Article 135(2) of Directive 2009/138/EC and Articles 254 through 257 of European Union Commission Delegated Regulation (EU) No. 2015/35 (collectively, the "European Risk Retention Requirements").

The U.S. Risk Retention Requirements and the European Risk Retention Requirements are referred to herein collectively as the "Risk Retention Requirements."

The U.S. Risk Retention Requirements require a sponsor of a securitization transaction to retain certain interests in the issuing entity for the transaction. Those interests must generally represent 5% of the credit risk of the securitized assets, and they may take the form of either equity of the issuer or a vertical strip of all interests issued by the issuer (or a combination of both). A sponsor may satisfy its obligations by causing a "majority-owned affiliate" (an "MOA") of the sponsor to retain risk in accordance with the U.S. Risk Retention Requirements.

For purposes of the U.S. Risk Retention Requirements, the sponsor of a CLO transaction is generally the CLO's manager. Failure by a CLO manager to retain an interest in a CLO in accordance with the U.S. Risk Retention Requirements could have a material adverse effect on the CLO manager and/or the related CLO.

On February 9, 2018, the United States Court of Appeals for the District of Columbia (the "DC Circuit Court") ruled in favor of an appeal brought by the Loan Syndications and Trading Association (the "LSTA") from a district court ("District Court") ruling granting summary judgment to the SEC and the Board of Governors of the Federal Reserve System (the "Applicable Governmental Agencies"). As part of its ruling, the DC Circuit Court remanded the case to the District Court with instructions to grant summary judgment to the LSTA on whether application of the U.S. Risk Retention Rules to CLO

managers is valid under Section 941 of the Dodd-Frank Act. If the decision stands, CLO managers of “open-market CLOs” (described in the ruling as CLOs where assets are acquired from “arms-length negotiations and trading on an open market”) will no longer be required to comply with the U.S. Risk Retention Rules, and no party to this transaction may be required to acquire and retain an economic interest in the credit risk of the securitised assets.

However, the implementation and effectiveness of the ruling could be delayed, modified or reversed. The effective date of the ruling is currently uncertain and will depend on what, if any, actions the Applicable Governmental Agencies take to appeal or implement the ruling. In particular, the Applicable Governmental Agencies will have the right to (a) petition for en banc review of the decision by the entire court or (b) file a petition for certiorari requesting the case to be heard by the Supreme Court. The U.S. Risk Retention Rules will remain in effect until a new judgment is entered in the District Court, which will not occur until the DC Circuit Court issues a mandate to the District Court to do so (which will occur within one week after the deadline for a petition for rehearing has passed). That will not occur if a petition for rehearing is filed; the deadline for a rehearing is 45 days from the issuance of the decision by the DC Circuit Court. If a petition for rehearing is filed, the DC Circuit Court will not issue a mandate to the District Court to issue such judgment during the consideration of the petition. If the petition for rehearing is denied, the mandate from the DC Circuit Court must be issued within a week from such denial unless a motion to stay the mandate is also filed pending a petition for writ of certiorari to the United States Supreme Court. If the motion to stay the mandate is granted and a petition for a writ of certiorari is filed in the United States Supreme Court, the stay will remain in effect until the Supreme Court’s work on the matter (either through a denial of certiorari or a ruling on the merits) is complete.

The European Risk Retention Requirements restrict the ability of certain EEA-regulated financial institutions—including certain credit institutions, investment firms, alternative investment fund managers and insurance and reinsurance undertakings (each, a “Affected EU Investor”)—to invest in asset-backed securities, such as CLO securities. The European Risk Retention Requirements allow Affected EU Investors to invest in asset-backed securities only if a sponsor, originator or original lender in respect of that securitisation has disclosed to the Affected EU Investor that it will retain, on an ongoing basis, a specified minimum net economic interest of not less than 5% in the securitisation transaction.

For purposes of the European Risk Retention Requirements, a CLO manager may qualify as an originator with respect to underlying CLO portfolio assets; it may do so as an “entity which purchases a third party’s exposures for its own account and then securitises them.” As an originator in respect of a CLO, the CLO manager will generally retain, on an ongoing basis, a specified minimum net economic interest of not less than 5% in the CLO. That interest may take one of two forms: either some or all of the CLO’s equity or a portion of each class of the CLO’s securities. Failure by a CLO manager to retain an interest in a CLO in accordance with the European Risk Retention Requirements could have a material adverse effect on the CLO manager and/or the related CLO. Moreover, in order to qualify as an originator, a CLO manager must bear the economic risk of the assets it is originating before they are transferred to an underlying CLO. Thus, in acting as originator, a CLO manager may acquire assets that subsequently become ineligible for sale to underlying CLOs, either because the assets themselves experience credit events (such as defaults) that preclude their sale to the underlying CLOs, or because the underlying CLOs fail to launch successfully. In these cases, a CLO manager may be required to sell or refinance the ineligible asset and/or acquire replacement assets at a loss, which could have a material adverse effect on a CLO manager and/or the related CLO.

New EU risk retention requirements are expected to apply, in place of the existing European Risk Retention Requirements, to securitisations in respect of which the relevant securities are issued on or after January 1, 2019. The principal European Regulation to implement the new EU risk retention requirements and establish a general framework for securitisation (the “EU Securitisation Regulation”) was adopted by the European Parliament on October 26, 2017 and approved by the Council of the EU on November 20, 2017. The risk retention requirements in the Securitisation Regulation are expected to apply to the Affected EU Investors and also to (a) UCITS, and (b) certain institutions for occupational retirement provision (and certain investment managers and authorised entities appointed by such institutions). There are expected to be material differences between the new risk retention requirements in the Securitisation Regulation and the existing European Risk Retention Requirements, and certain aspects of the new requirements are to be specified in new regulatory technical standards that have not yet been published in draft or final form. For example, the new risk retention requirements will impose risk retention obligations directly on the sponsors of securitisations (rather than only restricting the investments made by Affected EU Investors).

More generally, uncertainty remains as to the interpretation and application of the Risk Retention Requirements to CLO managers. Limited guidance has been published by regulatory authorities in respect of the Risk Retention Requirements. There can be no assurances as to whether the CLOs in which a Portfolio may invest, or their managers, will be affected by changes in law or regulation or interpretations thereof relating to the Risk Retention Requirements. Accordingly, it is impossible to determine whether revisions to, or new interpretations of, the Risk Retention Requirements will ultimately have a material adverse effect on the business, financial condition or prospects of a CLO manager or any CLO in which a Portfolio invests or, therefore, of the relevant Portfolio itself. While it is anticipated that each CLO manager of each CLO in which a Portfolio invests will seek to comply with the Risk Retention Requirements, given that CLO managers are navigating new regulatory frameworks, there is no guarantee that CLO managers will comply with the Risk Retention Rules or that such CLO manager’s compliance efforts will be deemed sufficient by relevant regulators.

Changes to the Risk Retention Requirements May Affect the Leveraged Loan Market

It is possible that over time, the Risk Retention Requirements may affect the leveraged loan markets generally, including by reducing liquidity historically provided by CLOs and similar vehicles. A contraction or reduced liquidity in the loan market could reduce opportunities for a CLO manager to sell collateral obligations or to invest in collateral obligations when it believes it is in the interest of the underlying CLOs to do so, which in turn could negatively impact the return on the collateral and reduce the market value or liquidity of the subordinated notes, preferred shares or similar securities. The Risk Retention Requirements may also reduce opportunities for a CLO manager to redeem or refinance its subordinated securities. Any of these could have a material adverse effect on the relevant Portfolio.

ISSUER RISK

The performance of a Portfolio depends on the performance of individual securities to which the Portfolio has exposure. Any issuer of these securities may perform poorly, causing the value of its securities to decline. Poor performance may be caused by poor management decisions, competitive pressures, changes in technology, expiration of patent protection, disruptions in supply, labour problems or shortages, corporate restructurings, fraudulent disclosures or other factors. Issuers may, in times of distress or at their own discretion, decide to reduce or eliminate dividends, which may also cause their stock prices to decline.

3.b MARKET RISKS: RISKS RELATING TO EMERGING MARKETS

EMERGING MARKET ECONOMIES

All securities investing and trading activities risk the loss of capital. While the Manager attempts to moderate these risks, there can be no assurance that the Company's investment and trading activities will be successful or that investors will not suffer significant losses. Investing in emerging markets may involve heightened risks (some of which could be significant) and special considerations not typically associated with investing in other more established economies or securities markets. Such risks may include, but are not limited to: (a) greater social, economic and political uncertainty including war; (b) higher dependence on exports and the corresponding importance of international trade; (c) greater risk of inflation; (d) increased likelihood of governmental involvement in and control over the economies; (e) governmental decisions to cease support of economic reform programs or to impose centrally planned economies; and (f) certain considerations regarding the maintenance of Company's securities and cash with non-US brokers and securities depositories. Separately, bid and offer spreads of the price of securities may be significant and accordingly, the Company may incur significant trading costs. The following discussion sets forth additional risks associated with investing in the securities of emerging markets:

General Economic and Market Conditions

The success of a Portfolio's activities will be affected by general economic and market conditions, such as interest rates, availability of credit, inflation rates, economic uncertainty, changes in laws, trade barriers, currency exchange controls and national and international political circumstances. These factors may affect the level and volatility of securities' prices and the liquidity of the Portfolio's investments. Volatility or illiquidity could impair the Portfolio's profitability or result in losses.

The economies of individual emerging markets may differ favourably or unfavourably from developed economies in such respects as growth of gross domestic product, rate of inflation, currency depreciation, asset reinvestment, resource self-sufficiency and balance of payments position. Further, the economies of emerging markets generally are heavily dependent upon international trade and, accordingly, have been and may continue to be adversely affected by trade barriers, exchange controls, managed adjustments in relative currency values and other protectionist measures imposed or negotiated by the countries with which they trade. These economies also have been and may continue to be adversely affected by economic conditions in the countries with which they trade. The economies of certain of these countries may be based, predominantly, on only a few industries and may have higher levels of debt or inflation.

With respect to certain countries, there is the possibility of nationalisation, expropriation, confiscatory taxation, imposition of withholding or other taxes on dividends, interest, capital gains or other income, limitations on the removal of funds or other assets of a Portfolio, political changes, government regulation, social instability or diplomatic developments (including war), any of which could affect adversely the economies of such countries or the value of the Portfolio's investments in those countries.

Where a Portfolio's assets are invested in narrowly-defined markets or sectors of a given economy, risk is increased by the inability to broadly diversify investments and thereby subjecting the Portfolio to greater exposure to potentially adverse developments within those markets or sectors.

Volatility

Emerging markets are more likely than developed markets to experience periods of extreme volatility. For example, many emerging equity markets fell by 80% or more in 1998, after having risen by more than 100% in the previous year. Such volatility could result in substantial losses for a Portfolio.

Securities Markets

Securities markets in emerging market countries may have substantially less volume of trading and are generally more volatile than securities markets of developed countries. In certain periods, there may be little liquidity in such markets. There is often less government regulation of stock exchanges, brokers and listed companies in emerging market countries than in developed market countries. Commissions for trading on emerging markets stock exchanges are generally higher than commissions for trading on developed market exchanges. In addition, settlement of trades in some non-US markets is much slower and more subject to failure than in US markets. Furthermore, some of a Portfolio's investments may not be listed on any stock market.

Exchange Rate Fluctuations; Currency Considerations

The assets of Portfolios which invest in emerging markets will generally be invested in non-US Dollar denominated securities and any income or capital received by such Portfolio from these Investments will be denominated in the local currency of Investment, whereas Shares in the Portfolio will typically be denominated in a range of more developed country currencies. Accordingly, changes in currency exchange rates (to the extent only partially or fully unhedged) between the currency of the relevant emerging market and the currency in which a Class is denominated may affect the value of the Shares. As the currency exchange rates of emerging market countries tend to be more volatile than those of more developed economies, the effect of changes in exchange rates on the value of Shares in a Portfolio which invests in emerging markets may be more pronounced than it would be for Portfolio which invest in more developed markets.

Furthermore, a Portfolio will accept subscriptions and pay distributions and redemption proceeds, in such typically more developed country currencies, as applicable, while it invests in local currency and will therefore incur costs in connection with conversions between various currencies. Currency exchange dealers realize a profit based on the difference between the prices at which they are buying and selling various currencies. Thus, a dealer normally will offer to sell currency to the Company at one rate, while offering a lesser rate of exchange should the Company desire immediately to resell that currency to the dealer. Due to the relatively small size of the markets for currencies of emerging market countries, the spread between a dealer's sell and offer prices for such currencies may be greater than that for the currencies of more developed economies which may result in relatively higher currency exchange costs for Portfolios which invest in emerging market economies. The Company will conduct its currency exchange transactions either on a spot (ie, cash) basis at the spot rate prevailing in the currency exchange market, or through entering into forward or options contracts to purchase or sell non US currencies. It is anticipated that most of the Portfolios' currency exchange transactions will occur at the time securities are purchased and will be executed through the local broker or custodian acting for the Portfolio.

Risk of Errors and Omissions in Information

Companies in emerging markets are generally subject to less stringent and less uniform accounting, auditing and financial reporting standards, practices and disclosure requirements than those applicable to companies in developed countries. Consequently, there is usually less publicly available information about an emerging markets' company than about a company in a developed country. Furthermore, the quality and reliability of official data published by the government or securities exchanges in emerging markets may not be of the same standard as in more developed economies.

Investment and Repatriation Restrictions

Some emerging markets have laws and regulations that currently preclude direct foreign investment in the securities of their companies. However, indirect foreign investment in the securities of companies listed and traded on the stock exchanges in these countries is permitted by certain emerging markets through investment funds that have been specifically authorised. The Company may invest in these investment funds. If a Portfolio invests in such investment funds, the investors will bear not only the expenses of the Portfolio, but also will indirectly bear similar expenses of the underlying investment funds.

In addition to the foregoing investment restrictions, prior governmental approval for foreign investments may be required under certain circumstances in some emerging markets, and the extent of foreign investment in domestic companies may be subject to limitation in other emerging markets. Foreign ownership limitations also may be imposed by the charters of individual companies in emerging markets. For this and other reasons, some attractive securities may not be available to the Company.

Repatriation of investment income, assets and the proceeds of sales by foreign investors may require governmental registration and/or approval in some emerging markets. The Company could be adversely affected by delays in or a refusal to grant any required governmental registration or approval for such repatriation or by withholding taxes imposed by emerging market countries on interest or dividends paid on securities held by the Company or gains from the disposition of such securities.

Legal Risk

Many of the laws that govern private and foreign investment, securities transactions and other contractual relationships in emerging markets are new and largely untested. As a result, the Company may be subject to a number of unusual risks, including inadequate investor protection, contradictory legislation, incomplete, unclear and changing laws, ignorance or breaches of regulations on the part of other market participants, lack of established or effective avenues for legal redress, lack of standard practices and confidentiality customs characteristic of developed markets and lack of enforcement of existing regulations. Furthermore, it may be difficult to obtain and enforce a judgment in certain of the emerging markets in which assets of the Company are invested. There can be no assurance that this difficulty in protecting and enforcing rights will not have a material adverse effect on the Company and its operations. In addition, the income and gains of the Company may be subject to withholding taxes imposed by foreign governments for which shareholders may not receive a full foreign tax credit.

Regulatory controls and corporate governance of companies in emerging markets usually confer little protection on minority shareholders. Anti-fraud and anti-insider trading legislation is often rudimentary. The concept of fiduciary duty to shareholders by officers and directors is also limited when compared to such concepts in developed markets. In certain instances management may take significant actions without the consent of shareholders and anti-dilution protection also may be limited.

Custodial Risk

A Portfolio that invests in emerging market economies will have certain custodial risks that are described under “*Custodial Risk*”.

EMERGING MARKET DEBT SECURITIES

All or a significant portion of a Portfolio's assets may be invested in debt securities of Emerging Market Countries, including short-term and long-term securities denominated in various currencies, which may be unrated or rated in the lower rating categories by the various credit rating agencies. In addition to the risks related to investments in Emerging Market Countries generally, debt securities of Emerging Market Countries may be subject to greater risk of loss of principal and interest than debt securities issued by obligors in developed countries and may be considered to be predominantly speculative with respect to the issuer's capacity to pay interest and repay principal. They may also be generally subject to greater risk than securities issued by obligors in developed countries in the case of deterioration of general economic conditions.

Additionally, evaluating credit risk for debt securities of Emerging Market Countries may involve greater uncertainty as companies in emerging markets are generally subject to less stringent and less uniform accounting, auditing and financial reporting standards, practices and disclosure requirements than those applicable to companies in developed countries. Consequently, there is usually less publicly available information about an emerging markets' company than about a company in a developed country. Furthermore, the quality and reliability of official data published by the government or securities exchanges in emerging markets may not be of the same standard as in more developed economies. Because investors generally perceive that there are greater risks associated with debt securities of Emerging Market Countries, the yields or prices of such securities may tend to fluctuate more than those for debt securities issued by obligors in developed countries.

The market for debt securities of Emerging Market Countries may be thinner and less active than that for debt securities issued by obligors in developed countries, which can adversely affect the prices at which debt securities of Emerging Market Countries are sold. In addition, adverse publicity and investor perceptions about emerging market debt securities and the economies of Emerging Market Countries generally, whether or not based on fundamental analysis, may be a contributing factor in a decrease in the value and liquidity of such securities. In regards to the fact that a Portfolio may invest in sukuk structures, investors in these Portfolios should be aware that investments in sukuk structures may be less liquid and more volatile in price than other fixed income securities, may be subject to higher dealing costs and may be unrated by Recognised Rating Agencies.

PRC QFI RISKS

A Portfolio may make investments that are tied economically to issuers from the People's Republic of China ("PRC"). This exposure to the China bond market may be obtained via the Qualified Foreign Institutional Investor ("QFII") regime and/or the Renminbi Qualified Foreign Institutional Investor ("RQFII") regime, subject to applicable Chinese regulatory requirements. Under the current Chinese regulations, the QFII regime and RQFII regime have been merged into one qualified foreign investor ("QFI") regime and are governed by the same set of regulations. A foreign institutional investor having held either a QFII licence or a RQFII licence will automatically be regarded as having a QFI licence and there is no need for such foreign institutional investor to re-apply for the QFII/RQFII licence. In light of the merger of the QFII and RQFII regimes, the "QFII" and the "RQFII" are collectively referred to as the "QFI" throughout the Prospectus.

QFI Regulatory Risks

PRC investments by overseas institutions can be made by or through holders of a QFI license, as approved under and subject to applicable Chinese regulations and regulatory requirements (the "QFI Regulations"), which are governed by PRC authorities, including the China Securities Regulatory Commission ("CSRC"), the State Administration of Foreign Exchange ("SAFE") and the People's Bank of China ("PBOC").

Neuberger Berman Europe Limited and Neuberger Berman Singapore Pte. Limited have been granted a QFI license ("QFI License") by CSRC and all references to the Sub-Investment Manager throughout this section shall be construed to mean these entities only. The relevant requirements and restrictions under the QFI Regulations apply to the Sub-Investment Manager (as the QFI License holders) as a whole, and not simply to investments made by a Portfolio. Shareholders should be aware that violations of any QFI Regulations arising from activities through the Sub-Investment Manager's QFI status other than those conducted by a Portfolio could result in the revocation of, or other regulatory action in respect of, the Sub-Investment Manager's QFI status as a whole. As a result, the ability of a Portfolio to make investments and/or repatriate monies through the Sub-Investment Manager's QFI status may be affected adversely by the investments or performance by other investors utilizing the Sub-Investment Manager's QFI status.

As the QFI Regulations have a relatively short history and their application and interpretation remain relatively untested, there is uncertainty as to how they will be applied and interpreted by the PRC authorities or how regulators may exercise the wide discretionary powers given to them thereunder in future. Any changes to the relevant rules may have a material adverse impact on investors' investment in a Portfolio.

QFI Status Risks

Investors should note that under the QFI Regulations, the QFI status could be suspended or revoked under certain circumstances where the PRC regulators have discretions. If the QFI status is suspended or revoked, the relevant Portfolios may be required to dispose of their securities held through the QFI and may not be able to access the Chinese securities market via the QFI, which may have an adverse effect on the relevant Portfolios' performance.

QFI Repatriation Risks

Repatriation of funds out of the PRC by the Sub-Investment Manager in respect of a Portfolio, currently monitored by SAFE, may be impacted by restrictions under the QFI Regulations and may have a material adverse impact on a Portfolio's performance and/or liquidity and impact on a Portfolio's ability to meet redemption requests from the Shareholders. Such repatriations are not subject to repatriation restrictions (such as the lock-up period) or prior approval, although authenticity and compliance reviews will be conducted, and monthly reports on remittances and repatriations will be submitted to SAFE by the QFI Custodian(s) (as defined below). In addition, the repatriation process may be subject to certain requirements set out in the relevant regulations such as submission of certain documents, and completion of the repatriation process may be subject to delay. It should be noted that the actual time required for the completion of the relevant repatriation will be beyond the Sub-Investment Manager's control. Shareholders should also note that the QFI Regulations may be amended and repatriation restrictions may be imposed in the future. These repatriation restrictions could result in the Company being obliged to suspend dealings in a Portfolio temporarily, in accordance with the "Temporary Suspension of Dealings" section of the Prospectus so that a redeeming Shareholder may not be able to redeem on its chosen Dealing Day or may experience a delay in receiving the redemption proceeds.

In extreme circumstances, a Portfolio may incur significant losses due to limited investment capabilities, or may not be able fully to implement or pursue its investment objectives or strategies, due to QFI investment restrictions, illiquidity of the PRC's securities market and delay or disruption in execution of trades or in settlement of trades.

PRC Custody Risks

Pursuant to PRC requirements, securities such as fixed income securities traded on the interbank bond market and the exchange markets in the PRC through the QFI regime will be safe-kept by one or more local custodian(s) ("QFI Custodian(s)") through securities accounts with relevant depositories or clearing institutions such as the China Securities

Depository and Clearing Corporation Limited, the China Central Depository & Clearing Co. Ltd and/or the Shanghai Clearing House Co. Ltd. Cash shall be maintained in a cash account with the QFI Custodian(s).

The Depository shall ensure that the PRC Custodian(s) has appropriate procedures to properly safe-keep the assets of a Portfolio including the maintenance of records that a Portfolio's assets are recorded in the name of a Portfolio and segregated from the other assets of the PRC Custodian(s). Under QFI Regulations, any Portfolio's securities held by the Sub-Investment Manager pursuant to its QFI License will be registered in the joint names of the Sub-Investment Manager and the relevant Portfolio for the sole benefit and use of that Portfolio. Although according to QFI Regulations, the ownership of the assets in such securities accounts belongs to the relevant Portfolio, and shall be segregated from the assets of the Sub-Investment Manager (as the QFI) and the QFI Custodian, it is possible that the judicial and regulatory authorities in China may interpret that the Sub-Investment Manager could be the party entitled to the securities in such securities trading account. Such securities may be vulnerable to a claim by a liquidator of the Sub-Investment Manager and may not be as well protected as if they were registered solely in the name of a Portfolio. In particular, the Sub-Investment Manager's creditors may seek to gain control of a Portfolio's assets to meet any liabilities owed by the Sub-Investment Manager to such creditors.

Investors should also note that cash deposited in the cash account(s) of a Portfolio with the QFI Custodian(s) will not be segregated but will be a debt owing from the QFI Custodian(s) to the relevant Portfolio as a depositor. Any such cash may be co-mingled with cash belonging to other clients of the QFI Custodian. In the event of bankruptcy or liquidation of the QFI Custodian(s), the relevant Portfolio will become an unsecured creditor ranking pari passu with all other unsecured creditors and without any proprietary rights to the deposited cash. A Portfolio may not be able to recover it in full or at all, in which case the relevant Portfolio may suffer losses. Also, a Portfolio may incur losses due to the acts or omissions of the QFI Custodian(s) in the execution or settlement of any transaction or in the transfer of any funds or securities.

PRC Brokerage Risks

The execution and settlement of transactions or the transfer of any funds or securities may be conducted by brokers ("PRC Brokers") appointed by the QFI. There is a risk that the Portfolios may suffer losses from the default, bankruptcy or disqualification of the PRC Brokers. In such event, the Portfolios may be adversely affected in the execution or settlement of any transaction or in the transfer of any funds or securities.

In the selection of PRC Brokers, the QFI will have regard to factors such as the competitiveness of commission rates, size of the relevant orders and execution standards. If the QFI considers appropriate, it is possible that a single PRC Broker will be appointed and the Portfolio may not necessarily pay the lowest commission available in the market.

Investment Restrictions

Investments in the PRC securities market via the QFI regime are subject to compliance with certain investment restrictions imposed by the QFI Regulations including the following, which apply to each foreign investor (including the relevant Portfolios) investing through the QFI regime and will affect the Portfolios' ability to invest in the PRC securities market and carry out their investment objectives:

- (i) shares held by each underlying foreign investor (such as the relevant Portfolios) which invests (through the QFI regime or other permissible channels) in one PRC listed company or an National Equities Exchange and Quotations (NEEQ)-admitted company should not exceed 10% of the total shares of such company; and
- (ii) aggregate China A Shares held by all underlying foreign investors (such as the relevant Portfolios and all other foreign investors) which invest (through the QFI regime or other permissible channels) in one PRC listed company or an NEEQ-admitted company should not exceed 30% of the total shares of such company.

Strategic investment in listed companies by qualified foreign investors and other foreign investors in accordance with law is not bound by the restrictions specified in paragraphs (i) and (ii) above.

Although it has not been explicitly provided under the QFI Regulations, in practice, the 10% single foreign shareholding restriction is also applied at the QFI level, under which a QFI may not hold 10% or more shares of any listed company, regardless of the fact that such QFI is holding such shares for a number of different clients. Accordingly, as the QFI status of the Sub-Investment Manager may be utilised by the Portfolios and other investors as well, the capability of the Portfolios to invest in the shares of certain listed company may be limited due to the investments in the shares of such listed company by other investors sharing the QFI status of the Sub-Investment Manager. Specifically, when the shareholding of such other investors in a PRC listed company reaches 10%, the Portfolios may not be able to buy any such shares, even if the then effective price of such shares is advantageous to the Portfolios.

Similarly, since the 30% aggregate foreign shareholding restriction is monitored at the level of all foreign investors, the capability of the Portfolios to invest in China A Shares of certain listed company may also be limited due to the investments made by other foreign investors.

Risk of not obtaining PBOC approval

The Sub-Investment Manager is required to obtain approval from PBOC before it can invest in PRC bonds via the China Interbank Bond Market for a Portfolio. There is no guarantee that any such approval will be obtained or, if obtained, such approval will not be revoked. The investment options available to a Portfolio will be adversely affected and restricted if the required PBOC approval is not obtained or revoked. This may have adverse impact on the performance of a Portfolio.

RMB Currency Risk

RMB is currently not a freely convertible currency and is subject to exchange controls and restrictions. A Portfolio which invests primarily in securities denominated in RMB but its net assets will be quoted in foreign currencies. Accordingly, a Portfolio's investment may be adversely affected by movements of exchange rates between RMB and other currencies. There can be no assurance that the RMB exchange rate will not fluctuate widely against the US Dollar or any other currency in the future. Any depreciation of the RMB will decrease the value of RMB denominated assets, which may have a detrimental impact on the performance of a Portfolio.

The RMB is traded in both the onshore and offshore markets. While both onshore RMB ("CNY") and offshore RMB ("CNH") represent the same currency, they are traded in different and separate markets which operate independently. Therefore CNY and CNH do not necessarily have the same exchange rate and their movement may not be in the same direction. When calculating the Net Asset Value of Shares of a non-RMB denominated Class, the Administrator will apply the exchange rate for offshore RMB market in Hong Kong, i.e. the CNH exchange rate, which may be at a premium or discount to the exchange rate for onshore RMB market in the PRC, i.e. the CNY exchange rate.

Disclosure of Interests

Whereas the PRC disclosure of interest requirements generally apply to the equities investment in PRC listed companies, the convertible bonds (if any) held by an investor which can be converted to shares of the listed company may also be subject to such requirements. In addition, a Portfolio investing in relevant securities via the Sub-Investment Manager's QFI status may be deemed to be acting in concert with other funds or Portfolios managed by the Sub-Investment Manager and therefore may be subject to the risk that the relevant Portfolio's investments may have to be reported in aggregate with the holdings of such other funds or Portfolios above should the aggregate holding trigger the reporting threshold under the PRC law, currently being 5% of the total issued shares of the relevant PRC listed company. This may expose certain of a Portfolio's investments to the public and may adversely impact the performance of the relevant Portfolio.

INVESTING IN THE PRC AND THE GREATER CHINA REGION

A Portfolio may make investments that are tied economically to issuers from the People's Republic of China ("PRC"), or other issuers associated with the greater China region, such as Hong Kong, Macau or Taiwan. Such Portfolios may also invest in issuers which may be listed or traded on recognised or over-the-counter markets located both inside and outside of the greater China region, such as the United Kingdom, Singapore, Japan or the United States.

Investments in PRC-related securities involve certain risks and special considerations not typically associated with Anglo-sphere markets (ie, Australia, Canada, New Zealand, the United Kingdom and the US), such as greater government control over the economy, political and legal uncertainty, controls imposed by the PRC authorities on foreign exchange and movements in exchange rates (which may impact on the operations and financial results of PRC companies), confiscatory taxation, the risk that the PRC government may decide not to continue to support economic reform programs, the risk of nationalisation or expropriation of assets, lack of uniform auditing and accounting standards, less publicly available financial and other information, potential difficulties in enforcing contractual obligations and limitations on the ability to distribute dividends due to currency exchange issues, which may result in risk of loss of favourable tax treatment. Accordingly, a Portfolio's investment in PRC-related securities may be subject to greater price volatility than Anglo-sphere markets, as a result of greater interest rate sensitivity, market perception of the creditworthiness of the issuer and general market liquidity. Furthermore, these risk factors, particularly regarding the PRC government's decision making processes and ability to nationalise or expropriate assets, reduce the Sub-Investment Manager's ability to anticipate interest rate movements, which may affect the value of the relevant Portfolio.

The SSE and the SZSE may have lower trading volumes when compared to exchanges in developed markets and the market capitalizations of many listed companies are small compared to those on exchanges in developed markets. The listed equity securities of many companies in the PRC, such as China A Shares and China B Shares, are accordingly less liquid and may experience greater volatility than in more developed, OECD countries. China A Shares are shares of companies incorporated in the PRC and listed on the SSE and SZSE that may be subscribed for and traded in Chinese Yuan Renminbi by PRC investors and non-PRC investors with QFI status or via the Stock Connects described below (also known as "Chinese Yuan common stock"). China B Shares are shares of companies incorporated in the PRC and listed on the SSE and the SZSE that may be subscribed for and traded in foreign currencies by non-PRC investors (also known as "Chinese Yuan special shares").

Government supervision and regulation of the PRC securities market and of quoted companies is also less developed than in many OECD countries. The PRC stock market has in the past experienced substantial price volatility and no assurance can be given that such volatility will not occur in the future. The above factors could negatively affect the capital growth and performance of such investments and the Net Asset Value of the relevant Portfolio, the ability to redeem Shares in the relevant Portfolio and the price at which such Shares may be redeemed. The evidence of title of exchange-traded securities in the PRC consists only of electronic book entries in the depository and/or registry associated with the exchange. These arrangements of the depositories and registries are new and not fully tested in regard to their efficiency, accuracy and security.

These risks may be more pronounced for the China A Share market than for PRC securities markets generally because the China A Share market is subject to greater governmental restrictions and control. Moreover, information available about PRC companies may not be as complete, accurate or timely as information about listed Anglo-sphere companies. Under the current PRC regulations, foreign investors can only invest directly in the China A Share market through institutions that have obtained QFI status or the Stock Connects. While the Sub-Investment Manager currently hold QFI status, it is anticipated that a Portfolio would gain any exposure that they take to the China A Share market through investments in equity linked products issued by financial institutions which are QFI or through the Stock Connects and would not invest in this market through either a QFI license.

Portfolios may elect to gain exposure to certain issuers in the greater China region by utilising existing or future “access” products or programs. For example, a Portfolio may participate in the Stock Connects, programs approved by the China Securities Regulatory Commission (“CSRC”) and the Securities and Futures Commission of Hong Kong, which is intended to provide mutual stock market access between the PRC and Hong Kong. The Stock Connects are securities trading and clearing linked programs developed by the SEHK, the SSE, the SZSE and ChinaClear.

To the extent that a Portfolio participates in the Stock Connects or any similar access program that is novel, new or under development, the Portfolio may be subject to new, uncertain or untested rules and regulations promulgated by the relevant regulatory authorities. Moreover, current regulations governing a Portfolio’s investment in PRC companies may be subject to change. There can be no assurance that the Stock Connects or any other investment program will not be abolished and a Portfolio may be adversely affected as a result of such changes.

PRC DEBT SECURITIES MARKET RISKS

Settlement Risk

Investment in debt securities will expose relevant Portfolios to counterparty default risks. Exchange traded debt securities may be subject to counterparty risk, although such risk may be reduced by a centralised clearing system. Investors may be subject to a higher counterparty risk in the interbank bond market. Interbank bond market is a quote-driven over-the-counter (OTC) market where deals are negotiated between two counterparties through a trading system. The counterparty which has entered into a transaction with a Portfolio may default in its obligation to settle the transaction. There are various transaction settlement methods in the interbank bond market, such as the delivery of security by the counterparty after receipt of payment by a Portfolio; payment by a Portfolio after delivery of security by the counterparty; or simultaneous delivery of security and payment by each party. Although the Sub-Investment Manager may endeavour to negotiate terms which are favourable to a Portfolio, there is no assurance that settlement risks can be eliminated. Where its counterparty does not perform its obligations under a transaction, the Portfolio will sustain losses.

Liquidity Risk

The CNY denominated debt securities market is at a developing stage and the market capitalisation and trading volume may be lower than those of the more developed markets. Market volatility and potential lack of liquidity due to low trading volume in the CNY denominated debt securities market may result in prices of debt securities traded on such markets fluctuating significantly and may affect the volatility of a Portfolio’s Net Asset Value.

The debt securities in which a Portfolio may invest may not be listed on a stock exchange or a securities market where trading is conducted on a regular basis. Even if the debt securities are listed, the market for such securities may be inactive and the trading volume may be low. In the absence of an active secondary market, a Portfolio may need to hold the debt securities until their maturity date. If sizeable redemption requests are received, a Portfolio may need to liquidate its investments at a substantial discount in order to satisfy such requests and the Portfolio may suffer losses in trading such securities.

The price at which the debt securities are traded may be higher or lower than the initial subscription price due to many factors including the prevailing interest rates. Further, the bid and offer spreads of the price of debt securities in which a Portfolio invests may be high and the Portfolio may therefore incur significant trading costs and may even suffer losses when selling such investments.

Risks relating to Credit Ratings

A Portfolio may invest in securities the credit ratings of which are assigned by the Chinese local credit rating agencies. However, the rating criteria and methodology used by such agencies may be different from those adopted by most of the established international credit rating agencies. Therefore, such rating system may not provide an equivalent standard for comparison with securities rated by international credit rating agencies.

If assessments based on Chinese local credit ratings do not reflect the credit quality of and the risks inherent in a security, investors may suffer losses, possibly greater than originally envisaged.

Credit Rating Downgrading Risk

An issuer of RMB denominated debt instruments may experience an adverse change in its financial condition which may in turn result in a decrease in its credit rating. The adverse change in financial condition or decrease in credit rating of an issuer may result in increased volatility in, and adverse impact on, the price of the relevant RMB denominated debt instruments and negatively affect liquidity, making any such debt instruments more difficult to sell.

PRC Debt Instruments Market Risk

Investment in the Chinese debt instruments market may have higher volatility and price fluctuation than investment in debt instrument products in more developed markets.

Credit Risk of Counterparties to RMB Denominated Debt Instruments

Investors should note that as China's financial market is nascent, most of the RMB denominated debt instruments are and will be unrated. RMB denominated debt instruments can be issued by a variety of issuers inside or outside China including commercial banks, state policy banks, corporations etc. These issuers may have different risk profiles and their credit quality may vary. Furthermore, RMB denominated debt instruments are generally unsecured debt obligations not supported by any collateral. A Portfolio may be fully exposed to the credit/insolvency risk of its counterparties as an unsecured creditor.

Interest Rate Risk

Changes in macro-economic policies of China (i.e. monetary policy and fiscal policy) will have an influence over capital markets affecting the pricing of the debt instruments and thus, the return of a Portfolio. The value of RMB denominated debt instruments held by a Portfolio generally will vary inversely with changes in interest rates and such variation may affect value of the Portfolio's assets accordingly. Typically, when interest rates increase, the value of fixed income assets tend to depreciate. On the contrary, when interest rates decrease, the value of fixed income assets tend to appreciate.

Valuation Risk

RMB denominated debt instruments are subject to the risk of mispricing or improper valuation, i.e. operational risk that the debt instruments are not priced properly. Valuations are primarily based on the valuations from independent third party sources where the prices are available, accordingly valuations may sometimes involve uncertainty and judgemental determination and independent pricing information may not be available at all times.

Unrated or High Yield Debt Instruments

Subject to the QFI Regulations and the investment objective of the relevant Portfolio, the assets of a Portfolio may be invested in unrated or low grade debt instruments which are subject to greater risk of loss of principal and interest than higher-rated debt instruments. The lower ratings of certain debt instruments or unrated debt instruments held for the account of a Portfolio reflect a greater possibility that adverse changes in the financial condition of the issuer, or in general economic conditions, or both, or an unanticipated rise in interest rates, may impair the ability of the issuer to make payments of interest and principal. Such debt instruments generally carry a higher degree of default risk which may affect the capital value of an investment. Unrated debt instruments may be less liquid than comparable rated debt instruments and involve the risk that a Portfolio may not accurately evaluate the debt instrument's comparative credit rating.

Risks of Investing in Urban Investment Bonds

A Portfolio may invest in urban investment bonds which are issued by local government financing vehicles ("LGFVs"). Such bonds are typically not guaranteed by the PRC local governments or the central government. In the event that the LGFVs default on payment of principal or interest of the urban investment bonds, the Portfolio could suffer substantial loss and its Net Asset Value could be adversely affected.

RISKS ASSOCIATED WITH THE SHANGHAI-HONG KONG AND SHENZHEN-HONG KONG STOCK CONNECTS

A Portfolio may invest through Shanghai Stock Connect in certain eligible stocks listed on the SSE (“SSE Securities”) and through the Shenzhen Stock Connect in certain eligible stocks listed on the SZSE (“SZSE Securities”, collectively with the SSE Securities, “Eligible Securities”), which subjects the Portfolio to other risks including, but not limited to the following:

Quota limitations

The Stock Connects are subject to quota limitations. Trading under the Stock Connects will be subject to a daily quota (“Daily Quota”). Northbound trading and Southbound trading are respectively subject to a separate set of Daily Quota. The Northbound Daily Quota limits the maximum net buy value of cross-boundary trades under the Stock Connects on each trading day. In particular, once the remaining balance of the Northbound Daily Quota drops to zero or the Northbound Daily Quota is exceeded during continuous trading or the opening call session, new buy orders will be rejected (though investors will be allowed to sell their cross-boundary securities regardless of the quota balance) for the remainder of the day. The relevant PRC government authority has the power to change the Daily Quota or impose other quota from time to time. Therefore, quota limitations may restrict a Portfolio’s ability to invest in China A Shares through the Stock Connects on a timely basis and the Portfolio may not be able to effectively pursue its investment strategies.

Suspension Risks

It is contemplated that the SEHK, the SSE and the SZSE would reserve the right to suspend Northbound and/or Southbound trading of the respective Stock Connects if necessary for ensuring an orderly and fair market and that risks are managed prudently. Consent from the relevant regulator would be sought before a suspension is triggered. The relevant PRC government authority may also impose “circuit breakers” and other measures to halt or suspend Northbound trading. Where a suspension in the Northbound trading through the Stock Connects is effected, the Portfolios’ ability to access the PRC market will be adversely affected.

Differences in Trading Day

The Stock Connects will only operate on days when both the PRC and Hong Kong markets are open for trading and when banks in both markets are open on the corresponding settlement days. Therefore it is possible that there will be occasions when it is a normal trading day for the PRC market but Hong Kong and other overseas investors (such as a Portfolio) cannot carry out any China A Shares trading. Portfolios may be subject to a risk of price fluctuations in China A Shares during the time when the Stock Connects are not trading as a result.

Operational Risk

The Stock Connects provide a channel for investors from Hong Kong and overseas to access the PRC stock markets directly.

The Stock Connects are premised on the functioning of the operational systems of the relevant market participants. Market participants are able to participate in this program subject to meeting certain information technology capability, risk management and other requirements as may be specified by the relevant exchanges and/or clearing house. It should be appreciated that the securities regimes and legal systems of the Hong Kong and PRC markets differ significantly and in order for the trial program to operate, market participants may need to address issues arising from the differences on an on-going basis.

Further, the “connectivity” in the Stock Connects requires routing of orders across the border. This required the development of new information technology systems on the part of the SEHK and exchange participants (ie, a new order routing system to be set up by the SEHK to which exchange participants need to connect). There is no assurance that the systems of the SEHK and market participants will function properly or will continue to be adapted to changes and developments in both markets. In the event that the relevant systems failed to function properly, trading in both markets through the Stock Connects could be disrupted. Portfolios’ ability to access the China A Share market (and hence to pursue its investment strategy) will be adversely affected where systems fail to function properly as outlined above.

Restrictions on selling imposed by front-end monitoring

PRC regulations require that before an investor sells any share, there should be sufficient shares in the account; otherwise the relevant PRC exchanges will reject the sell order concerned. The SEHK will carry out pre-trade checking on China A Shares sell orders of its participants (ie, the stock brokers) to ensure there is no over-selling.

If a Portfolio desires to sell certain China A Shares it holds, the SEHK requires that the broker involved in the sale of the China A Shares confirms the Portfolio holds sufficient amount of those China A Shares before the market opens on the day of selling (“trading day”). If the broker cannot confirm this prior to the market opens, it will not be able to execute the sale of those China A Shares on behalf of the Portfolio on that trading day. Because of this requirement, the Portfolios need to facilitate this broker confirmation in order to dispose of holdings of China A Shares in a timely manner.

Some local custodians are offering solutions to assist investors in meeting this requirement without the need to pre-deliver the shares to the broker prior to the trading date. For example, certain local custodians are offering an “integrated brokerage/custodian model” where the local custodian will be appointed to act as the sub-custodian to the relevant Portfolio. Subsequently, the brokerage arm of the local custodian will be provided with sufficient evidence that sufficient shares are held by the Portfolio to allow the broker to execute the sale of the relevant China A Shares. This model allows the Portfolio to ensure that all shares remain in custody at all times. Separately, the SEHK has implemented an enhanced pre-trade checking model which investors will no longer need to pre-deliver shares to brokers. Custodians will need to open a “special segregated account” with CCASS (the Central Clearing and Settlement System operated by the HKSCC for the clearing securities listed or traded on SEHK) for investors which will generate a unique investor ID. CCASS will snapshot the securities holdings in that account to facilitate pre-trade checking requirements. Brokers when executing sell orders for investors who opt to use the enhanced model will need to provide the investor ID as an identifier. The aim of the enhanced model is to allow greater flexibility to investors to use multiple brokers. The SEHK will also be implementing a further enhancement by introducing an additional Renminbi interbank bulk settlement run at night time. This further enhancement will allow Renminbi cash settlement to be fully confirmed on the same day, achieving a true delivery-versus-payment arrangement.

The Company has currently adopted the integrated custody/brokerage model in respect of a Portfolio but is investigating the above enhancements. The Company intends to adopt the enhanced pre-trade checking model and utilise the enhanced Renminbi interbank bulk settlement in respect of a Portfolio once all the related operational and implementation issues, have been resolved. However, please note that there is no guarantee that any such proposal will be, or will continue to be, implemented and will not be revoked, how effective and it will be in helping to address the requirement or what the costs associated with using it will be.

Short swing profit rule

According to the PRC securities law, a shareholder of 5% or more of the total issued shares of a PRC listed company (“major shareholder”) has to return to such listed company any profits obtained from the purchase and sale of shares of such PRC listed company if both transactions occur within a six-month period. In the event that the Company or a Portfolio becomes a major shareholder of a PRC listed company by investing in China A Shares via the Stock Connects or market access products, the profits that Portfolios may derive from such investments may be limited, and thus the performance of the Portfolios may be adversely affected.

Restriction on Turnaround (day) Trading

Turnaround (day) trading is not permitted on the China A Share market. Investors cannot purchase and sell the same securities via the Stock Connects on the same trading day. This may restrict the Portfolio’s ability to invest in China A Shares through the Stock Connects and to enter into or exit trades on a timely basis.

Recalling of eligible stocks

When a stock is recalled from the scope of eligible stocks for trading via the Stock Connects, the stock can only be sold and is restricted from being bought. This may affect the investment portfolio or strategies of a Portfolio, for example, when the Manager wishes to purchase a stock which is recalled from the scope of eligible stocks.

Clearing and settlement risk

The HKSCC, a wholly-owned subsidiary of Hong Kong Exchanges and Clearing Limited, and ChinaClear have established the clearing links and each has become a participant of each other to facilitate clearing and settlement of cross-boundary trades. For cross-boundary trades initiated in a market, the clearing house of that market will, on the one hand clear, and settle with its own clearing participants and, on the other hand, undertake to fulfil the clearing and settlement obligations of its clearing participants with the counterparty clearing house.

Should the remote event of ChinaClear default occur and ChinaClear be declared as a defaulter, HKSCC’s liabilities in Northbound trades under its market contracts with clearing participants will be limited to assisting clearing participants in pursuing their claims against ChinaClear. HKSCC will in good faith, seek recovery of the outstanding stocks and monies from ChinaClear through available legal channels or through ChinaClear’s liquidation. In that event, Portfolios may suffer delay in the recovery process or may not be able to fully recover their losses from ChinaClear.

Participation in corporate actions and shareholders' meetings

HKSCC will keep CCASS participants informed of corporate actions of Eligible Securities. Hong Kong and overseas investors (including Portfolios) will need to comply with the arrangement and deadline specified by their respective brokers or custodians (ie, CCASS participants). The time for them to take actions for some types of corporate actions of Eligible Securities may be as short as one business day only. Therefore, Portfolios may not be able to participate in some corporate actions in a timely manner.

Hong Kong and overseas investors (including Portfolios) hold Eligible Securities traded via the Stock Connects through their brokers or custodians. Multiple proxies are currently not available in the PRC market. Therefore Portfolios will not be able to attend meetings as proxy in person in respect of the Eligible Securities.

Investor compensation

Investment through the Stock Connects is conducted through broker(s), and is subject to the risks of default by such brokers' in their obligations. The Hong Kong's Investor Compensation Fund is established to pay compensation to investors of any nationality who suffer pecuniary losses as a result of default of a licensed intermediary or authorised financial institution in relation to exchange-traded products in Hong Kong. Examples of default are insolvency, in bankruptcy or winding up, breach of trust, defalcation, fraud, or misfeasance.

For defaults occurring on or after 1 January 2020, the Investor Compensation Fund also covers investors' losses in relation to securities traded on a stock market operated by the SSE or the SZSE and in respect of which an order for sale or purchase is permitted to be routed through the northbound link of a Stock Connect arrangement.

On the other hand, since the Portfolios are carrying out Northbound trading through securities brokers in Hong Kong but not brokers in Mainland China, therefore they are not protected by China Securities Investor Protection Fund in Mainland China.

Government Intervention

Chinese stock markets may be more volatile and unstable due to governmental intervention. The Chinese government has been known to intervene in China's securities markets in a manner that may significantly affect market price and liquidity. Government interventions, such as imposing limits on the sale of shares and trading of index futures, devaluation of the RMB and channelling capital into equities, may increase stock market fluctuations and create uncertainties in the stock markets, which may materially affect a Portfolio's investments.

Currency Risk

Further devaluation of the RMB can materially affect a Portfolio's investments. There is no assurance that the RMB will not be subject to devaluation. Shareholders should also note the downside risk associated with RMB. Any devaluation of the RMB could adversely affect a Portfolio's investment, especially if that Portfolio seeks to focus on equities of Greater China companies and companies with significant exposure to China.

Regulatory risk

The Stock Connects are novel in nature and will be subject to regulations promulgated by regulatory authorities and implementation rules made by the stock exchanges in the PRC and Hong Kong. Further, new regulations may be promulgated from time to time by the regulators in connection with operations and cross-border legal enforcement in connection with cross-border trades under the Stock Connects.

It should be noted that the regulations are untested and there is no certainty as to how they will be applied. Moreover, the current regulations are subject to change. There can be no assurance that the Stock Connects will not be abolished. Portfolios which invest in the PRC markets through the Stock Connects may be adversely affected as a result of such changes.

Taxation risk

PRC tax authorities announced temporary tax exemptions on capital gains realised by non-PRC investors on trading of China A Shares under the Stock Connects. However, there is no guarantee that such temporary tax exemptions will be granted or will continue to apply, will not be repealed or re-imposed retrospectively, or that no new tax regulations and practice relating to the Stock Connects will be promulgated in future. A Portfolio may be subject to uncertainties in its PRC tax liabilities where it invests through the Stock Connects.

Risks associated with the Small and Medium Enterprise board and/or the ChiNext market

A Portfolio may invest in the Small and Medium Enterprise (“SME”) board and/or the ChiNext market of the SZSE via the Shenzhen Stock Connect. Investments in the SME board and/or the ChiNext market may result in significant losses for the Portfolio and its investors. The following additional risks apply:

Higher fluctuation on stock prices: Companies listed on the SME board and/or the ChiNext market are usually of an emerging nature, with a smaller operating scale. Hence, they are subject to higher fluctuation in stock prices and liquidity and have higher risks and turnover ratios than companies listed on the main board of the SZSE.

Over-valuation risk: Stocks listed on the SME board and/or the ChiNext market may be overvalued and such exceptionally high valuation may not be sustainable. Stock prices may be more susceptible to manipulation, due to the relatively smaller number of shares in such companies in circulation.

Differences in regulations: The rules and regulations regarding companies listed on the ChiNext market are less stringent in terms of profitability and share capital than those regarding the main board and the SME board.

Delisting risk: It may be more common and faster for companies listed on the SME board and/or the ChiNext to delist. If companies that a Portfolio has invested in delist, it may have an adverse impact on the Portfolio.

RISKS ASSOCIATED WITH INVESTMENT IN THE CHINA INTERBANK BOND MARKET THROUGH BOND CONNECT

A Portfolio may invest through Bond Connect in eligible bonds traded on the China Interbank Bond Market, which exposes the Portfolio to other risks including but not limited to:

Suspension Risk

It is contemplated that the Mainland Chinese authorities will reserve the right to suspend Northbound trading of Bond Connect if necessary for ensuring an orderly and fair market and that risks are managed prudently. Where a suspension in the Northbound trading through Bond Connect is effected, the relevant Portfolios’ ability to access the PRC bond market to achieve their investment objectives will be adversely affected.

Differences in Trading Day

Northbound trading through Bond Connect is able to be undertaken on days upon which the China Interbank Bond Market is open to trade, regardless of whether they are a public holiday in Hong Kong. Accordingly, it is possible that bonds traded through Bond Connect may be subject to fluctuation at times where the Portfolio is unable to buy or sell bonds, as its Hong Kong or globally-based intermediaries are not available to assist with trades. Accordingly, this may cause the Portfolio to be unable to realise gains, avoid losses or to benefit from an opportunity to invest in mainland Chinese bonds at an attractive price.

Operational Risk

Bond Connect provides a channel for investors from Hong Kong and overseas to access Mainland China bond markets directly.

The “connectivity” in Bond Connect requires routing of orders across the border, requiring development of new trading platforms and operational systems. There is no assurance that these platforms and systems will function properly or will continue to be adapted to changes and developments in both markets. In the event that the relevant systems fail to function properly, trading through Bond Connect may be disrupted. A Portfolio’s ability to trade through Bond Connect to pursue its investment strategy may therefore be adversely affected.

For investments via Bond Connect, the relevant filings, registration with the PBoC and account opening have to be carried out via offshore custody agent, registration agent or other third parties (as the case may be). As such, the relevant Portfolios investing via Bond Connect are subject to the risk of default or errors on the part of such third parties.

Regulatory risk

Bond Connect is novel in nature and will be subject to regulations promulgated by regulatory authorities and implementation rules made by regulators in Mainland China and Hong Kong. It should be noted that the regulations are untested and there is no certainty as to how they will be applied. Moreover, the current regulations are subject to change which may have retrospective effect. There can be no assurance that Bond Connect will not be abolished. The relevant Portfolios which invest in the Mainland China markets through Bond Connect may be adversely affected as a result of regulatory changes.

Taxation risk

In accordance with Caishui [2018] No. 108 (“Circular 108”) jointly issued by the PRC State Administration of Taxation and the Ministry of Finance, bond interest income derived by foreign institutional investors from investments in the Mainland China onshore bond market was temporarily exempted from Withholding Income Tax and Value-Added Tax for the period from 7 November 2018 to 6 November 2021 and that exemption period has since been extended by the PRC State Council to run to 31 December 2025. Accordingly, no Withholding Income Tax and Value-Added Tax will be accrued on interest income derived from such investments during the captioned period. Tax withheld on non-government bond interest income prior to the commencement of the above exemption will continue to remain accrued until further guidance is issued by the Mainland China tax authorities.

TAXATION IN THE PRC – INVESTMENT IN PRC EQUITIES

Please note that this disclosure is only relevant for Portfolios which are stated in the relevant Supplement to invest in PRC equity securities via Stock Connect or through the QFI.

A Portfolio’s direct investment in China A Shares (through the Stock Connects) and China B shares is subject to PRC tax regulations. A Portfolio’s investment in equity linked products may also be indirectly affected by any taxation levied against the relevant QFI, issuers or sponsors. The PRC taxation regime that will apply to the Stock Connects, QFI and investments through the QFI regime has some uncertainties. It should be noted that the position with regard to PRC taxation of a Portfolio and its gains and profits in respect of such investments remains unclear in some aspects.

Tax regulations in the PRC are subject to change, possibly with retroactive effect. Changes in PRC tax regulations could have a significant adverse effect on a Portfolio and its Investments, including reducing returns, reducing the value of a Portfolio’s Investments and possibly impairing capital invested by a Portfolio.

Corporate Income Tax (“CIT”) Law

If the Company or a Portfolio is considered a tax resident enterprise of the PRC, it will be subject to PRC CIT at 25% on its worldwide taxable income. If the Company or a Portfolio is considered a non-tax resident enterprise with a permanent establishment or place of establishment of business (“PE”) in the PRC, the profits attributable to that PE would be subject to CIT at 25%.

Under the PRC CIT Law effective from 1 January 2008, a non-PRC tax resident enterprise without a PE in the PRC will generally be subject to PRC withholding income tax (“WIT”) of 10% on its PRC sourced income, including but not limited to passive income (e.g. dividends, interest) and gains arising from transfer of assets, etc., unless it is exempt or reduced under specific PRC tax circulars or relevant tax treaty.

The relevant portfolio manager intends to manage and operate the Company or the relevant Portfolio in such a manner that the Company or the Portfolio should not be treated as a tax resident enterprise of the PRC or a non-PRC tax resident enterprise with a PE in the PRC for CIT purposes, although due to uncertainty in tax laws and practices in the PRC, this result cannot be guaranteed.

Although the CIT regulations aim to clarify the application of certain rules under the CIT Law, significant uncertainties remain. Such uncertainties may prevent a Portfolio from achieving certain tax results sought when structuring its investments in the PRC.

(i) Dividend

Under the current PRC CIT Law, non-PRC tax resident enterprises without a PE in the PRC are subject to WIT on cash dividends and bonus distributions from PRC tax resident enterprises. The general WIT rate applicable is 10%, subject to reduction under an applicable double tax agreement/arrangement by the PRC tax authorities. The PRC resident enterprises who distribute the dividends and bonus distributions to non-PRC tax resident enterprises should be the withholding agent to withhold the WIT.

(ii) Capital gain

Based on the CIT Law and its Implementation Rules, “income from the transfer of property” sourced from the PRC by non-PRC tax resident enterprises without a PE in the PRC should be subject to 10% WIT unless exempt or reduced under specific PRC tax circulars or an applicable tax treaty agreement/arrangement by the PRC tax authorities.

Trading of PRC equity investments including China A Shares and China B Shares through QFI and the Stock Connects

Under Circular Caishui [2014] no. 79 jointly issued by the PRC Ministry of Finance (“MOF”), the State Administration of Tax (“SAT”) and the CSRC on 14 November 2014 (“Circular 79”), effective from 17 November 2014, QFI shall be temporarily exempted from the WIT on capital gains derived from trading China A Shares, China B Shares and other PRC equity investments; however, QFI shall be subject to WIT on capital gains obtained before 17 November 2014 pursuant to the laws.

According to Circular Caishui [2014] No. 81 (“Circular 81”) and Circular Caishui [2016] No. 127 (“Circular 127”), both jointly issued by MOF, SAT and CSRC, capital gains derived by overseas investors from the trading of China A Shares via Shanghai Stock Connect and Shenzhen Stock Connect are temporarily exempt from WIT.

It is uncertain how long these temporary exemptions will last, whether any of them will be repealed and whether any tax will be re-imposed retrospectively.

Trading of China B Shares

Under the current PRC CIT regulations, there are no specific rules or regulations governing the taxation of the disposal of China B Shares. Hence, the tax treatment for investment in such securities is governed by the general tax provisions of the CIT Law. Under such general tax provisions, a Portfolio could be technically subject to a 10% WIT on the PRC sourced capital gains (except through the QFI regime), unless exempt or reduced under laws and regulations or the relevant double tax treaties.

However, in practice, the PRC tax authorities have not actively enforced WIT on gains realised by non-resident enterprises from the disposal of China B Shares of PRC enterprises whereby both the purchase and sale of such shares are conducted on public stock exchanges.

In light of the above circulars as well as the current practice, (i) the Portfolio has ceased withholding 10% of realised and unrealised gains on its investments linked to China A Shares, China B Shares and other PRC equity interest investment traded via QFI regime as a tax provision from 17 November 2014, on the basis that any gains realised from 17 November 2014 onwards will be temporarily exempted from WIT; (ii) the amount of tax provision for unrealised gains on a Portfolio’s investments linked to China A Shares, China B Shares and other PRC equity interest investments traded via QFI regime withheld by a Portfolio as a tax provision up to 17 November 2014 has been released to the relevant Portfolio; and (iii) the amount withheld up to 17 November 2014 as a tax provision with respect to realised gains on its investments linked to China A Shares, China B Shares and other PRC equity interest investments traded via QFI regime has been applied to pay for the relevant PRC tax liabilities and any remaining balance has been released back to the relevant Portfolio as other income. The relevant Portfolios will generally continue to make a provision for WIT of 10% on dividend income received from PRC investee companies in case such WIT is not withheld at source. With respect to the Stock Connects, as a result of Circular 81 and Circular 127, the relevant Portfolios will not make any PRC WIT provision for realised and unrealised gains derived from trading China A Shares under the Stock Connects until and unless a tax provision is required by any further guidance issued by the PRC tax authorities, which may have a substantial negative impact on the Net Asset Value of the relevant Portfolio. In the event that any relevant exemption is not granted or is revoked or repealed, the Manager may, in its discretion, make additional tax provision on the relevant gains or income and withhold tax for the account of the relevant Portfolio.

Value-added Tax (“VAT”) and Other Surcharges

According to Circular Caishui [2016] No.36 (“Circular 36”), the pilot program of the collection of value-added tax (“VAT”) in lieu of business tax has been launched nationwide in the PRC in a comprehensive manner as of 1 May 2016 and all taxpayers of business tax are included in the scope of the pilot program with regard to VAT liabilities instead of business tax liabilities.

Gains derived from trading of marketable securities are generally subject to VAT at 6% on net gains (i.e. gains offset against losses). However, Circular 36, Circular Caishui [2016] No.70, Circular 81 and Circular 127 specifically provide that gains derived by (a) QFI from the trading of marketable securities (including China A Shares and China B Shares) in the PRC, or (b) overseas investors (including entities and individuals) from trading of China A Shares through the Stock Connects are temporarily exempted from VAT.

In addition, deposit interest income is not subject to VAT. Dividend income or profit distributions on equity investment derived from Mainland China are also not included in the taxable scope of VAT.

Under the current VAT regulations, there are no specific rules or regulations governing the taxation for the gains derived from trading of China B Shares. Hence, the tax treatment for investment in such securities is governed by the general VAT regulations. Under such general VAT provisions, a Portfolio could be technically subject to a 6% VAT plus local surcharges of up to 12% based on the VAT paid on gains derived from the trading of China B Shares (except through the QFI regime). However, the PRC tax authorities have not actively collected VAT and local surcharges from non-PRC

tax resident enterprises on gains realised from China B Shares whereby both the purchase and sale of such shares are conducted on public stock exchanges in practice.

Urban maintenance and construction tax (currently at the rate ranging from 1% to 7%), educational surcharge (currently at the rate of 3%) and local educational surcharge (currently at the rate of 2%) are imposed based on the VAT liabilities.

Taking into account of the current VAT regulations, the relevant portfolio manager would not make VAT provision for gross realised or unrealised gains derived by the relevant Portfolios from trading of China A Shares, China B Shares and other China equity investments via QFI regime or Stock Connects.

Stamp Duty (“SD”)

SD under the PRC laws generally applies to the execution and receipt of all taxable documents listed in the PRC's Provisional Rules on SD. SD is generally imposed on the seller for the sale of shares of Chinese companies listed on the PRC stock exchanges at a rate of 0.1% of the sales consideration.

Change in Tax Policy or Regulation

There is no guarantee that the temporary tax exemption with respect to QFI and Stock Connects described above will continue to apply, will not be repealed and re-imposed retrospective, or that no new tax regulations and practice in PRC specifically relating to the QFI and Stock Connects will not be promulgated in the future. Such uncertainties may operate to the advantage or disadvantage of Shareholders and may result in an increase or decrease in net asset value of a Portfolio.

In the event that any relevant exemption is not granted or is revoked or repealed, the relevant portfolio manager may, in its discretion, make additional tax provision on the relevant gains or income and withhold tax for the account of the relevant Portfolio.

Investors should inform themselves of, and where appropriate consult their professional advisors on, the possible tax consequences of subscribing for, buying, holding, converting, redeeming or otherwise disposing of Shares under the laws of their country of citizenship, residence, or domicile or incorporation.

TAXATION IN THE PRC – INVESTMENT IN PRC ONSHORE BONDS

Please note that this disclosure is only relevant for Portfolios which are stated in the relevant Supplement to invest in PRC bonds via the QFI regime or invest in the China Interbank Bond Market (including via China Bond Connect).

Tax regulations in the PRC are subject to change, possibly with retroactive effect. Changes in PRC tax regulations could have a significant adverse effect on a Portfolio and its Investments, including reducing returns, reducing the value of a Portfolio's Investments and possibly impairing capital invested by a Portfolio.

Taxation on QFI

The PRC has not issued guidance with respect to the taxpayer for the income derived from securities held through an intermediary for PRC tax purposes. In addition, there is a general lack of guidance in the PRC tax law with respect to the application of PRC taxes in situations where legal title to assets are held by an intermediary on behalf of the beneficial owners of such assets. Based on current PRC administrative practice, an intermediary that holds Chinese assets is generally treated as the taxpayer with respect to those assets for PRC tax purposes notwithstanding the fact that such assets may be beneficially owned by another entity. It is therefore expected that, although a Portfolio may be the beneficial legal owner of securities held through the Sub-Investment Manager (as QFI license holder), the Sub-Investment Manager may be treated as the taxpayer relating to the trading of securities for PRC tax purposes. In the event the PRC tax authorities issue guidance with respect to the application of PRC taxes in situations where legal title to assets are held by an intermediary on behalf of the beneficial owners of such assets, the expected treatment described above could change, possibly with retroactive effect. In case the Sub-Investment Manager would be considered as the PRC taxpayer of income derived by the Company/Portfolio, the Sub-Investment Manager has the authority to recover the PRC taxes suffered from the Portfolio's assets.

WIT

Unless a specific exemption or reduction is available under the current PRC tax laws and regulations or relevant tax treaties, non-tax resident enterprises without a PE in the PRC are subject to WIT, generally at a rate of 10%, to the extent that it directly derives PRC sourced passive income. PRC sourced passive income (such as dividend income or interest

income) may arise from investments in the PRC securities. Accordingly, a Portfolio will be subject to 10% WIT (which may be exempt or reduced by specific PRC tax circulars or the applicable tax treaty) on interest it receives from its investment in PRC debt securities. The PRC entity distributing interest is required to withhold such WIT, if applicable. On the other hand, interest derived from government bonds issued by the MOF or bonds issued by local government of a province, autonomous regions, municipalities directly under the PRC government or municipalities separately listed on the state plan, as approved by the State Council of the PRC are exempt from PRC WIT under the prevailing PRC tax regulations. In accordance with Circular 108, bond interest income derived by foreign institutional investors from investments in the PRC onshore bond market was temporarily exempted from WIT for the period from 7 November 2018 to 6 November 2021 and that exemption period has since been extended by the PRC State Council to 31 December 2025. Accordingly, no WIT will be accrued on interest income derived from such investments during the captioned period. WIT withheld on non-government bond interest income derived by the relevant Portfolio prior to the commencement of the above exemption will continue to remain accrued until further guidance issued by China's tax authorities. The Sub-Investment Manager will make a WIT provision of 10% for the account of the relevant Portfolio on interest received from investment in non-government bonds traded on China Interbank Bond Market and PRC stock exchange prior to the commencement of the above exemption if the WIT is not withheld at source.

Specific rules governing WIT on capital gains derived by QFI from the trading of PRC debt securities have yet to be announced. In the absence of such specific rules, the PRC WIT treatment should be governed by the general tax provisions of the PRC CIT Law. Circular 79 issued in 2014, which clarified the taxation of capital gains on the transfer of PRC equity investment assets derived by QFI, is silent as to the PRC CIT treatment of capital gains realised by QFI from the trading of PRC debt securities. Based on the current interpretation of the SAT and the local tax authorities, on the basis that debt securities are treated as movable assets, gains realised by foreign investors (including QFI, qualified foreign investors investing in China Interbank Bond Market directly) from investment in PRC debt securities should be treated as non-PRC sourced income and thus should not be subject to PRC WIT. However, there are no written tax regulations issued by the PRC tax authorities to confirm such interpretation.

Therefore, it remains uncertain as to the PRC tax authorities' position on whether gains derived from the disposal of debt securities by foreign investors will be treated as a PRC sourced income and hence subject to PRC WIT. However, as a matter of practice, the PRC tax authorities have not levied PRC WIT on capital gains realised by QFI or qualified foreign investors investing in China Interbank Bond Market directly from the trading of debt securities.

In light of the current practice and the interpretation of the regulations by the PRC tax authorities, currently, the Sub-Investment Manager will not provide for any WIT payable for the account of the relevant Portfolio on the gross realised and unrealised capital gains derived from the disposal of onshore debt instruments issued by PRC tax resident enterprises. However, the Sub-Investment Manager reserves the right to provide for WIT on such gains or non-government bond interest income and withhold the tax for the account of the relevant Portfolio.

Investors should note that the provisions at any time may be excessive or inadequate to meet the actual PRC tax liabilities on investments made by the relevant Portfolio. Given the possibility of the PRC tax authorities not implementing the current tax rules, the tax rules being changed and the taxes being applied retrospectively, any provision for taxation made by the Sub-Investment Manager, as arranged with the Depositary/Trustee, may be excessive or inadequate to meet the actual PRC tax liabilities in connection with investments made by the Sub-Investment Manager for the account of the relevant Portfolio in the PRC. Accordingly, the value and the profitability of the relevant Portfolio may be affected. Upon the availability of a definitive tax assessment or the issue of announcements or regulations by the competent authorities promulgating definitive tax assessment rules, any sums withheld in excess of the tax liability incurred or is expected to be incurred by the relevant Portfolio shall be released and transferred to that Portfolio's accounts forming part of that Portfolio's assets.

Any tax provision, if made, will be reflected in the Net Asset Value of the relevant Portfolio at the time of debit or release of such provision and thus will only impact Shares which remain in the Portfolio at the time of debit or release of such provision. Shares which are redeemed prior to the time of debit of such provision will not be affected by reason of any insufficiency of the tax provision. In the event that it is satisfied (based on tax advice) that part of the tax provisions are not required, the Sub-Investment Manager will arrange with the Depositary/Trustee to release such provisions back into the relevant Portfolio.

Investors may be advantaged or disadvantaged depending upon the final outcome of how such gains will be taxed and when they subscribed and/or redeemed the Shares of the Portfolio. Investors should note that no Shareholders who have redeemed their Shares in the relevant Portfolio before the release of any excess tax provision shall be entitled to claim in whatsoever form any part of the tax provision or withholding amounts released to the relevant Portfolio, which amount will be reflected in the value of Shares in the Portfolio. Shareholders should seek their own tax advice on their tax position with regard to their investment in the relevant Portfolio.

VAT and Other Surcharges

According to Circular 36, the pilot program of the collection of VAT in lieu of business tax has been launched nationwide in the PRC in a comprehensive manner as of 1 May, 2016 and all taxpayers of business tax are included in the scope of the pilot program with regard to payment of VAT instead of business tax.

The gains derived by QFI from trading of marketable securities (including debt securities) are exempted from VAT in the PRC under Circular 36 and Circular Caishui [2016] No.70. Capital gains realised from the disposal of PRC onshore bonds by qualified foreign investors on the China Interbank Bond Market are also exempted from VAT. In addition, deposit interest income is not subject to VAT and interest income received from government bonds issued by the MOF, or bonds issued by local government of a province, autonomous regions, and municipalities directly under the Central Government or municipalities separately listed on the state plan, as approved by the State Council is also exempted from VAT. Accordingly, the Sub-Investment Manager will not provide for any VAT payable for the account of the relevant Portfolio on the gross realised and unrealised capital gains derived from the disposal of onshore debt instruments issued by PRC tax resident enterprises via the QFI regime or via the China Interbank Bond Market.

The prevailing VAT regulations do not specifically exempt VAT on non-government bond interest received by QFIs or qualified non-PRC investors investing in the China Interbank Bond Market. Hence, technically, interest income on non-government bonds issued by PRC entities technically should be subject to 6% VAT, effective from 1 May 2016. In accordance with Circular 108, bond interest income derived by foreign institutional investors from investments in the PRC onshore bond market was temporarily exempted from VAT for the period from 7 November 2018 to 6 November 2021 and that exemption period has since been extended by the PRC State Council to run to run to 31 December 2025. Accordingly, no VAT will be accrued on interest income derived from such investments during the captioned period. VAT withheld on non-government bond interest income derived by the relevant Portfolio prior to the commencement of the above exemption will continue to remain accrued until further guidance issued by China's tax authorities. As at the date of this Prospectus, the relevant Portfolios make a provision for VAT of 6% and local surcharges up to 12% based on the VAT payable with respect to bond interest received from investment in non-government bonds traded on China Interbank Bond Market and PRC stock exchange prior to the commencement of the above exemption.

In addition, urban maintenance and construction tax (currently at the rate ranging from 1% to 7%), educational surcharge (currently at the rate of 3%) and local educational surcharge (currently at the rate of 2%) are imposed based on the VAT liabilities.

It is uncertain how long the above-mentioned VAT exemptions will last, whether any of them will be repealed and whether any tax will be re-imposed retrospectively which may have a negative impact on the relevant Portfolio.

In the event that any relevant exemption is not granted or is revoked or repealed, the Sub-Investment Manager may, in its discretion, make additional tax provision on the relevant gains or non-government bond interest income and withhold tax for the account of the relevant Portfolio. Investors should inform themselves of, and where appropriate consult their professional advisors on, the possible tax consequences of subscribing for, buying, holding, converting, redeeming or otherwise disposing of Shares under the laws of their country of citizenship, residence, or domicile or incorporation.

SD

SD under the PRC laws generally applies to the execution and receipt of all taxable documents listed in the PRC's Provisional Rules on SD. SD is not imposed on the purchase or sale of bonds traded in the PRC.

Potential Changes in PRC Tax Policy or Regulation

There is no guarantee that there will not be any new tax regulations and practice in China specifically relating to QFI as well as non-PRC investors' investing in the China Interbank Bond Market directly promulgated in the future. Such uncertainties may operate to the advantage or disadvantage of Shareholders of the relevant Portfolio and may result in an increase or decrease in the total value of the Portfolio. For example, to the extent that the PRC tax authority retrospectively imposes taxes on the capital gains realised by the relevant Portfolio through QFI, the total value of the Portfolio would be adversely affected but the amount previously paid to a redeeming Shareholder would not be adjusted. As a result, any detriment from such change would be suffered by the remaining Shareholders.

RUSSIAN INVESTMENT RISK

Investors should note that there are significant risks inherent where a Portfolio invests in Russia. These risks include: delays in settling transactions and the risk of loss arising out of Russia's system of securities registration and custody; the lack of corporate governance provisions, under-developed or non-existent rules regarding management's duties to shareholders, and the lack of general rules or regulations relating to investor protection or investments; pervasiveness of

corruption, insider trading and crime in the Russian economic system; difficulties associated in obtaining accurate market valuations of many Russian securities, based partly on the limited amount of publicly available information; the risk of imposition of arbitrary or onerous taxes due to tax regulations that are ambiguous and unclear; the general financial condition of Russian companies, which may involve particularly large amounts of inter-company debt; banks and other financial systems are not well developed or regulated and as a result tend to be untested and have low credit ratings; the lack of local laws and regulations that prohibit or restrict a company's management from materially changing the company's structure without shareholder consent; difficulties involved with seeking redress in a court of law of breach of local laws, regulations or contracts, arbitrary and inconsistent application of laws and regulations by courts; the risk of further economic and political sanctions being imposed against Russia, Russian issuers of securities or individuals in Russia may compromise the ability of a Portfolio to pursue its investment objectives or may adversely affect the value of Russian investments which the relevant Portfolio holds; and the risk that the government of Russia or other executive or legislative bodies may decide not to continue to support the economic reform programs implemented since the dissolution of the Soviet Union.

Securities in Russia are issued only in book entry form and ownership records are maintained by registrars who are under contract with the issuers. The registrars are neither agents of, nor responsible to, the Depositary or its local agents in Russia. Transferees of securities have no proprietary rights in respect of securities until their name appears in the register of holders of the securities of the issuer. The law and practice relating to registration of holders of securities are not well developed in Russia and registration delays and failures to register securities can occur. Although Russian sub-custodians will maintain copies of the registrar's records ("Extracts") on its premises, such Extracts may not, however, be legally sufficient to establish ownership of securities. Furthermore, a quantity of forged or otherwise fraudulent securities, Extracts or other documents are in circulation in the Russian markets and there is therefore a risk that a Portfolio's purchases may be settled with such forged or fraudulent securities. In common with other emerging markets, Russia has no central source for the issuance or publication of corporate actions information. The Depositary therefore cannot guarantee the completeness or timeliness of the distribution of corporate actions notifications.

Investments in securities listed or traded in Russia will only be made in securities that are listed or traded on the Moscow Exchange.

4. LIQUIDITY RISKS

LIQUIDITY RISK

Under certain market conditions, such as decreased trading volume, increased price volatility, concentrated trading positions, limitations on the ability to transfer or liquidate positions and changes in industry or changes in government regulations, or when trading in a financial market is otherwise impaired, the liquidity of a Portfolio's investments (and thereby the liquidity of the Portfolio itself) may be reduced. In addition, certain Portfolios may invest in fixed income securities, the markets for which may experience periods of lower liquidity in circumstances outlined under this heading and under "*Fixed Income Securities*" above, which may further limit the liquidity of a Portfolio.

Under the aforementioned market conditions, Portfolios may be unable to dispose of certain of its investments, including longer-term or lower credit quality investments, which may adversely affect its ability to meet redemption requests or further negatively impact the overall liquidity of the portfolio, if more liquid assets are sold to meet redemptions. In addition, such circumstances may force Portfolios to dispose of their investments at reduced prices, thereby adversely affecting the Portfolios' performance.

This situation could be worsened where other market participants are seeking to dispose of similar investments at the same time and Portfolios may ultimately be unable to sell such investments readily at a favourable time or price or at prices approximating those at which the Portfolio values them at that time, potentially incurring substantial losses.

Furthermore, certain segments of global fixed income markets may experience periods of lower liquidity caused by market events or large sales and raise the risk that securities or other fixed-income instruments cannot be sold during those periods or can only be sold at reduced prices. Those events may challenge affected Portfolios to meet significant volumes of redemption requests and may also influence the value of the relevant Portfolios, as the lower liquidity may be reflected in a reduction in the value of the Portfolios' assets.

Investments suffering from a lack of market liquidity may be subject to wide fluctuations in market value and it may be difficult for a Portfolio to value such investments accurately. Illiquid investments may also entail transaction costs that are higher than those for more liquid investments.

The Company is an investment company with variable capital due to its ability to issue and redeem Shares on demand. The share capital of the Company is divided into different series of Shares with each series of Shares representing a separate investment portfolio of assets. The Portfolios manage capital in accordance with the UCITS Regulations and

the investment objectives and policies applicable to such Portfolio as specified in this Prospectus and the relevant Supplement. The Portfolios are not subject to externally imposed capital requirements. While the Portfolios invest in transferable securities and other liquid financial assets, the Manager also employs an appropriate liquidity risk oversight process, which takes into account efficient portfolio management transactions employed by the Portfolios, in order that each Portfolio is able to comply with its stated redemption terms and conditions.

In order to mitigate potential liquidity risks, the Manager tailors its controls to different investment strategies, liquidity terms and historic client behaviour. As part of its risk oversight, the Manager may employ various liquidity tests, the results of which may lead to a variety of possible solutions, including adjusting asset composition, drawing on applicable overdraft or credit facilities or taking other appropriate actions that would maintain an acceptable level of liquidity. Any Portfolio specific arrangements will be reviewed by the Manager's risk function, portfolio managers of the relevant Portfolio, Chief Investment Officer of the Manager as well as the board of directors of the Manager and the Directors. The Manager's risk team stress-tests each Portfolio on a regular basis in the context of portfolio composition and current/potential market conditions. Stress scenarios are run at different hypothetical redemption levels and the ability of the Portfolios to meet redemption requests in an orderly fashion at these levels are evaluated. Should analysis reveal that any of the Portfolios have low liquidity coverage ratios, conversation and steps are taken by the Manager's risk team and the portfolio team to evaluate these risks and the best way to mitigate them. In addition, daily liquidity buffer reports are monitored to gauge the liquidity risk of each Portfolio. Furthermore, market liquidity factors are monitored in order to capture potential anomalies in market liquidity.

The Manager, the Sub-Investment Managers and the Company seek to ensure that adequate liquidity exists in the Portfolios to provide for Shareholder redemptions in normal market conditions and normal levels of redemptions. However, it is possible that in the type of circumstances described above, a Portfolio may not be able to realise sufficient assets to meet all redemption requests that it receives or the Company may determine that the circumstances are such that meeting some or all of such requests is not in the best interests of the Shareholders in a Portfolio as a whole. In such circumstances, the Manager may take the decision to apply the redemption gate provisions described under "Information Specific to Redemptions" in the "Subscription and Redemptions" section of this Prospectus or suspend dealings in the relevant Portfolio as described in the "Temporary Suspension of Dealings" section of this Prospectus.

SUBSTANTIAL SUBSCRIPTIONS AND REDEMPTIONS

In the event that a Portfolio receives a substantial subscription in respect of a Dealing Day, the Manager may not be able to make arrangements to invest all of the net subscription proceeds on or before the relevant Dealing Day. To the extent that a Portfolio's assets are not invested on the relevant Dealing Day, this could have a negative impact on the performance of that Portfolio, as the Portfolio's exposure to its relevant targeted investments will be reduced in respect of the portion of its assets held in cash or other liquid assets.

Similarly, in the event that a Portfolio receives substantial redemption requests in respect of a Dealing Day, the Manager may not be able to make arrangements to realise sufficient assets of the Portfolio to meet such redemption requests on or before the relevant Dealing Day or may not be able to do so in such a manner as to protect the best interests of all of the Shareholders of the relevant Portfolio. In seeking to meet such requests, the Manager will have to balance the competing interests of the redeeming investor to receive their redemption proceeds in accordance with the Company's redemption policy (as described in the "Subscriptions and Redemptions" section) and those of the remaining investors in the Portfolio to minimise the impact and potential for current and future losses to the Portfolio through selling a large proportion of the Portfolio's assets in a short space of time. In this respect, investors should note that the Directors have certain abilities to calculate the Net Asset Value of Shares in a Portfolio using "swing pricing" and/or apply Duties and Charges to the Net Asset Value which redeeming investors receive in order to prevent the dilution of the Portfolio's assets. In certain circumstances, in accordance with the Articles and as disclosed in the "Subscriptions and Redemptions" and "Temporary Suspension of Dealings" sections, the Manager may also apply a redemption gate or suspend dealings in a Portfolio.

SWING PRICING

As described in the "Determination of Net Asset Value" section, the Manager may, where it so determines, "swing" the Net Asset Value of a Portfolio to attempt to mitigate the potentially dilutive effects of dealing on the Net Asset Value on any Dealing Day on which there are net subscriptions or redemptions in the Portfolio above a certain predefined threshold of the Portfolio. In such cases, investors should be aware that swing pricing may not always prevent the dilution of the Net Asset Value through dealing costs and the adjustments made to the Net Asset Value may also benefit certain investors relative to the Shareholders in the Portfolio as a whole. For example a subscriber into a Portfolio on a day on which the Net Asset Value is swung downwards as a result of net redemptions from the Portfolio may benefit from paying a lower Net Asset Value per Share in respect of his subscription than he would otherwise have been charged. In addition, the Portfolio's Net Asset Value and short-term performance may experience greater volatility as a result of this valuation methodology. The application of Swing Pricing may also increase the variability of a Portfolio's returns.

CREDIT FACILITIES

In order to assist in facilitating the prompt payment of redemption proceeds on behalf of a Portfolio, the Company has entered into an agreement (and may enter into additional agreements) whereby a syndicate of lenders agrees to provide a credit facility to the Company. Any such credit facility will provide for a standing fee which will be payable by the Company in return for the lenders making the facility available to the Company and will also provide for the payment of interest and other charges in the event that the Company or a Portfolio accesses the facility. The costs of accessing the facility will be borne by the relevant Portfolio or Portfolios but the standing fee will be borne pro rata by the Company as a whole, notwithstanding that individual Portfolios may never access the facility. When accessing the facility, the Directors shall inform and, where appropriate, consult with the Depositary.

Any credit facility provided to the Company may be secured by all or any portion of the Company's assets and a secured creditor to the Company may take commercial steps in its own interest, such as requiring repayment of all or part of a loan at a time that may not be desirable for the Company. Any such actions may also have a material adverse effect on the Company or a Portfolio. In addition, actions taken by the Company which result in adverse performance or diminution in value of the Company's or a Portfolio's assets could cause the Company or relevant Portfolio to be in default, or to take certain actions to avoid being in default, in connection with a credit facility. This could have a material adverse effect on the Company and the Portfolios. In the event of the winding up of the Company, secured amounts owed to third party credit facility providers will be paid out in priority over the payment of proceeds to Shareholders.

GENERAL SUSPENSION RISK

Securities of issuers traded on exchanges may be suspended, either by the issuers themselves, by an exchange or by government authorities. The likelihood of such suspensions may be higher for securities of issuers in emerging or less-developed market countries than in countries with more developed markets. Trading suspensions may be applied from time to time to the securities of individual issuers for reasons specific to that issuer, or may be applied broadly by exchanges or governmental authorities in response to market events. Suspensions may last for significant periods of time, during which trading in the securities and instruments that reference the securities, such as participatory notes (or "P-notes") or other FDI, may be halted. In the event that a Portfolio holds material positions in such suspended securities or instruments, the Portfolio's ability to liquidate its positions or provide liquidity to investors may be compromised and the Portfolio could incur significant losses.

5. FINANCE-RELATED RISKS

FEES AND EXPENSES

Whether or not a Portfolio is profitable, it is required to pay fees and expenses including organisation and offering expenses, brokerage commissions, management, administrative and operating expenses and custodian fees. A portion of these expenses may be offset by interest income.

SEED INVESTMENT

As part of its launch, a Portfolio may receive a subscription from an Affiliate as a seed investment, which may be substantial. Investors wishing any further information in respect of any such subscription should contact the Manager. Investors should be aware that the Affiliate may i) hedge any of its investments in whole or part (ie, reducing the Affiliate's exposure to the performance of the Portfolio) and ii) redeem its investment in the Portfolio at any time, without notice to Shareholders and that the Affiliate is not under any obligation to take the interests of other Shareholders into account when making its investment decisions. As any large redemption from the Portfolio will have the indirect effect of increasing the proportion of the Portfolio's costs that the remaining Shareholders will have to bear, Shareholders should note that any redemption of its seed money by the Affiliate may have a negative effect on the value of their investment.

INCENTIVE ARRANGEMENTS

The incentive arrangement involves the payment of performance fees and could create an incentive for the Manager and the Sub-Investment Managers to select riskier or more speculative trades than would be the case in the absence of such an arrangement. The payment of the performance fee will be based on performance which may include investment income and net realised and net unrealised gains and losses as at the end of each Calculation Period. As a result, payments of performance fees may be made in respect of unrealised gains which may subsequently never be realised.

PERFORMANCE FEE METHODOLOGY

The methodology used by the Company in calculating the performance fees in respect of certain Portfolios may result in inequalities as between Shareholders in relation to the payment of performance fees (with some investors paying

disproportionately higher performance fees in certain circumstances) and may also result in certain Shareholders having more of their capital at risk at any time than others. Shareholders should note that the performance fee is based on net realised and net unrealised gains and losses as at the end of each calculation period and as a result, performance fees may be paid on unrealised gains which may subsequently never be realised. Shareholders should also note that a performance fee may be paid in times of negative performance where a Portfolio has outperformed its reference benchmark index, but, overall has a negative performance.

FOREIGN TAXES

The Company may be liable to taxes (including withholding taxes) in countries other than Ireland on income earned and capital gains arising on its investments. The Company may not be able to benefit from a reduction in the rate of such foreign tax by virtue of the double taxation treaties between Ireland and other countries. The Company may not, therefore, be able to reclaim any foreign withholding tax suffered by it in particular countries. If this position changes and the Company obtains a repayment of foreign tax, the Net Asset Value of the Company will not be restated and the benefit will be allocated to the then-existing Shareholders rateably at the time of repayment.

FATCA

The Company will require Shareholders to certify information relating to their status for FATCA purposes and to provide other forms, documentation and information in relation to their FATCA status. The Company may be unable to comply with its FATCA obligations if Shareholders do not provide the required certifications or information. In such circumstances, the Company could become subject to US FATCA withholding tax in respect of its US source income if the US Internal Revenue Service specifically identified the Company as being a 'non-participating financial institution' for FATCA purposes. Any such US FATCA withholding tax would negatively impact the financial performance of the Company and all Shareholders may be adversely affected in such circumstances.

FUTURE DEVELOPMENTS POTENTIALLY IMPACTING TAXATION OF SHAREHOLDERS

There are a number of national and international tax initiatives currently in progress which could, if enacted, impact the Company, a Portfolio and/or Shareholders in the future. At this time it cannot be predicted whether these tax initiatives will be enacted, and, if enacted, what their form will be and how they will impact the Company, a Portfolio or Shareholders. As a result, Shareholders should consult their own tax advisors regarding the possible implications of any such future developments on their investments in a Portfolio.

6. RISKS RELATED TO FINANCIAL DERIVATIVE INSTRUMENTS ("FDI")

GENERAL

There are certain investment risks that apply in relation to the use of FDI. A Portfolio may use FDI as a cheaper or more liquid alternative to other investments, to attempt to hedge or reduce the overall risk of its investments, or as part of the investment policies and strategies used in the pursuit of its investment objectives. A Portfolio's ability to use these strategies may be limited by market conditions, regulatory limits and tax considerations. Investments in FDI are subject to normal market fluctuations and other risks inherent in investment in securities. In addition, the use of FDI involves special risks, and risks different from, and, in certain cases, greater than, the risks presented by more traditional investments, including:

- dependence on the Manager's and Sub-Investment Manager's ability to accurately predict movements in the price of the underlying security and the fact that the skills needed to use these strategies are different from those needed to select portfolio securities;
- imperfect correlation between the movements in securities or currency on which an FDI contract is based and movements in the securities or currencies in a Portfolio;
- the absence of a liquid market for any particular instrument at any particular time which may inhibit the ability of a Portfolio to liquidate an FDI at an advantageous price; and
- possible impediments to efficient portfolio management or the ability to meet repurchase requests or other short term obligations because a percentage of a Portfolio's assets may be segregated to cover its obligations.

Should the Manager's and Sub-Investment Manager's expectations in employing such techniques and instruments be incorrect or ineffective, a Portfolio may suffer a substantial loss, having an adverse effect on the Net Asset Value. Such strategies might also be unsuccessful and incur losses for a Portfolio, due to market conditions.

The use of FDI also means that the Net Asset Value of a Portfolio may at times be volatile. The Manager employs a risk management process which enables it to accurately measure, monitor and manage the various risks associated with FDI.

PARTICULAR RISKS OF FDI

General

The Manager may make use of FDI in a Portfolio's investment program. Certain swaps, options and other FDI may be subject to various types of risks, including market risk, liquidity risk, counterparty credit risk, legal risk and operations risk. In addition, swaps and other derivatives can involve significant economic leverage and may, in some cases, involve high risk of significant loss. The Global Exposure of a Portfolio which uses the Commitment Approach to manage the risks associated with their use of FDI will not exceed the Portfolio's Net Asset Value at any time. Portfolios which use the value at risk approach to manage the risks associated with their use of FDI may have a net leveraged exposure of over 100% of their Net Asset Value as a result of their use of FDI, which may result in a significant or a total loss to the Portfolio.

Liquidity; Requirement to Perform

From time to time, the counterparties with which a Portfolio effects transactions might cease making markets or quoting prices in certain of the instruments. In such instances, a Portfolio might be unable to enter into a desired transaction or to enter into any offsetting transaction with respect to an open position, which might adversely affect its performance. Further, in contrast to exchange-traded instruments, forward or spot contracts do not provide a trader with the right to offset its obligations through an equal and opposite transaction. For this reason, entering into forward or spot contracts, the Company may be required to and must be able to, perform its obligations under the contract.

Necessity for Counterparty Trading Relationships

Participants in the OTC markets typically enter into transactions only with those counterparties which they believe to be sufficiently creditworthy, unless the counterparty provides super collateral, letters of credit or other credit enhancements. While the Manager believes that the Company will be able to establish the necessary counterparty business relationships to enable it to effect transactions in the OTC markets, including the swaps markets, there can be no assurance that it will be able to do so. An inability to establish such relationships would limit its activities and could require it to conduct a more substantial portion of such activities in the futures markets. Moreover, the counterparties with which it expects to establish such relationships will not be obligated to maintain the credit lines extended to it, and such counterparties could decide to reduce or terminate such credit lines at their discretion.

Correlation Risk

Although the Manager believes that taking exposure to underlying assets through the use of FDI will benefit Shareholders in certain circumstances, due to reduced operational costs and other efficiencies which investment through FDI can bring, there is a risk that the performance of the Portfolio will be imperfectly correlated with the performance which would be generated by investing directly in the underlying assets.

Futures

Positions in futures contracts may be closed out only on an exchange which provides a secondary market for such futures. However, there can be no assurance that a liquid secondary market will exist for any particular futures contract at any specific time. Thus, it may not be possible to close a futures position. In the event of adverse price movements, a Portfolio would continue to be required to make daily cash payments to maintain its required margin. In such situations, if a Portfolio has insufficient cash, it may have to sell portfolio securities to meet daily margin requirements at a time when it may be disadvantageous to do so. In addition, a Portfolio may be required to make delivery of the instruments underlying futures contracts it holds.

The inability to close options and futures positions also could have an adverse impact on the ability to effectively hedge a Portfolio.

The risk of loss in trading futures contracts in some strategies can be substantial, due both to the low margin deposits required, and the extremely high degree of leverage involved in futures pricing. As a result, a relatively small price movement in a futures contract may result in immediate and substantial loss (as well as gain) to the investor. For example, if at the time of purchase, 10% of the value of the futures contract is deposited as margin, a subsequent 10% decrease in the value of the futures contract would result in a total loss of the margin deposit, before any deduction for the transaction costs, if the account were then closed out. A 15% decrease would result in a loss equal to 150% of the original margin deposit if the contract were closed out. Thus, a purchase or sale of a futures contract may result in losses

in excess of the amount of investment in the contract. The relevant Portfolio also assumes the risk that the Manager will incorrectly predict future stock market trends.

It is also possible that a Portfolio could both lose money on futures contracts and also experience a decline in value of its portfolio securities. There is also a risk of loss by a Portfolio of margin deposits in the event of bankruptcy of a broker with whom a Portfolio has an open position in a futures contract or related option.

Futures positions may be illiquid because certain commodity exchanges limit fluctuations in certain futures contract prices during a single day by regulations referred to as “daily price fluctuation limits” or “daily limits.” Under such daily limits, during a single trading day, no trades may be executed at prices beyond the daily limits. Once the price of a particular futures contract has increased or decreased by an amount equal to the daily limit, positions in that contract can neither be taken nor liquidated unless traders are willing to effect trades at or within the limit. It is also possible that an exchange or the CFTC may suspend trading in a particular contract, order immediate liquidation and settlement of a particular contract, or order that trading in a particular contract be conducted for liquidation only. This constraint could prevent the Manager from promptly liquidating unfavourable positions and subject a Portfolio to substantial losses. This could also impair a Portfolio’s ability to withdraw its investments in order to make distributions to a redeeming Shareholder in a timely manner. Therefore, although the Company is open to all classes of investors and it is not expected that its investments will impact on its ability to meet redemption requests, it may be more suitable for sophisticated investors that will not be materially impacted by postponements of a Portfolio’s normal redemption dates.

PARTICULAR RISKS OF OTC FDI

Absence of Regulation; Counterparty Default

In general, there is less government regulation and supervision of transactions in the over-the-counter markets than of transactions entered into on organised exchanges. In addition, many of the protections afforded to some participants on some organised exchanges, such as the performance guarantee of an exchange clearing house, might not be available in connection with transactions in OTC FDI. Therefore, although any counterparty with whom a Portfolio enters into a SFT Transaction will be rated at or in excess of the requirements of the Central Bank by a Recognised Rating Agency and the Portfolio may further reduce its exposure to the counterparty through the use of collateral, the Portfolio will be subject to the risk that the counterparty will not perform its obligations under the transactions. In the event that the counterparty is unable or unwilling to meet its contractual liabilities, there may be a limited but detrimental impact on the Portfolio.

Tax

There may also be a detrimental impact on a Portfolio in circumstances where there has been a change in the relevant taxation legislation or practice, regarding the OTC FDI in which the Portfolio has invested, whereby an unforeseen tax liability may have to be borne by the Portfolio. There is also a risk of loss due to the unexpected application of a law or regulation.

Legal

Unlike exchange-traded options, which are standardised with respect to the underlying instrument, expiration date, contract size, and strike price, the terms of OTC FDI, are generally established through negotiation with the other party to the instrument. While this type of arrangement allows a Portfolio greater flexibility to tailor the instrument to its needs, OTC FDI may involve greater legal risk than exchange-traded instruments, as there may be a risk of loss if OTC FDI are deemed not to be legally enforceable or are not documented correctly.

There also may be a legal or documentation risk that the parties to the OTC FDI may disagree as to the proper interpretation of its terms. If such a dispute occurs, the cost and unpredictability of the legal proceedings required for the Company to enforce its contractual rights may lead the Company to decide not to pursue its claims under the OTC FDI. The Company thus assumes the risk that it may be unable to obtain payments owed to it under OTC arrangements, that those payments may be delayed or made only after the Company has incurred the costs of litigation.

Forward Contracts

The Manager may enter into forward contracts and options thereon on behalf of a Portfolio which are not traded on exchanges and are generally not regulated. There are no limitations on daily price moves of forward contracts. The swap dealers with whom a Portfolio may maintain accounts may require the relevant Portfolio to deposit margin with respect to such trading. The Portfolios’ counterparties are not required to continue to make markets in such contracts and these contracts can experience periods of illiquidity, sometimes of significant duration. There have been periods during which certain counterparties have refused to continue to quote prices for forward contracts or have quoted prices

with an unusually wide spread (the price at which the counterparty is prepared to buy and that at which it is prepared to sell). Arrangements to trade forward contracts may be made with only one or a few counterparties, and liquidity problems therefore might be greater than if such arrangements were made with numerous counterparties. The imposition of credit controls by governmental authorities might limit such forward trading to less than that which the Manager would otherwise recommend, to the possible detriment of a Portfolio. Market illiquidity or disruption could result in major losses to a Portfolio. In addition, a Portfolio may be exposed to credit risks with regard to counterparties with whom they trade as well as risks relating to settlement default. Such risks could result in substantial losses to a Portfolio.

Valuation Risk

FDI and forward exchange contracts which are not dealt on a Recognised Market shall either be valued by the counterparty at least daily, provided that the valuation is verified at least weekly either by the Manager or other independent party such person to be independent of the counterparty and approved for that purpose by the Depositary, or by using an alternative valuation. If using an alternative valuation, the Company will follow international best practice and adhere to the principles on valuation of OTC instruments established by bodies such as IOSCO and AIMA. In the event that the Company opts to use an alternative valuation, the Company will use a competent person appointed by the Directors, approved for this purpose by the Directors and the Depositary, or will use such other method approved by the Depositary and such alternative valuation will be reconciled with the counterparty's valuation on a monthly basis. Any significant differences to the counterparty valuation will be promptly investigated and explained.

Investors should note that there is often no single market value for instruments such as OTC FDI. The discrepancies between bid offer spread on OTC FDI may be partly explained by various estimates on their pricing parameters. The Company has put procedures in place to reconcile any differences in valuation between the counterparties as well as pricing anomalies.

RISKS ASSOCIATED WITH EXCHANGE-TRADED FUTURES CONTRACTS

A particular risk associated with this type of contract is the means by which the futures contract is required to be terminated. A futures contract can only be terminated by entering into an offsetting transaction. This needs a liquid secondary market on the exchange on which the original position was established. However, there can be no assurance that such a market will exist for any particular contract at any point in time. In that event, it might not be possible to establish or liquidate a position. In addition, because the instrument underlying a futures contract traded by a Portfolio will often be different from the instrument or market being hedged or to which exposure is sought, the correlation risk could be significant and could result in losses to a Portfolio. The use of futures involves basis risk – the risk that changes in the value of the underlying instrument will not be fully reflected in the value of the futures contract. The liquidity of a secondary market in futures contracts is also subject to the risk of trading halts, suspensions, exchange or clearing house equipment failures, government intervention, insolvency of a brokerage firm, clearing house or exchange or other disruptions of normal trading activity. Each securities exchange typically has the right to suspend or limit trading in all securities which it lists. Such a suspension would render it impossible for a Portfolio to liquidate positions and, accordingly, could expose a Portfolio to losses and potentially have an adverse impact on its ability to redeem Shares. There is also a degree of leverage inherent in futures trading (ie, the loan margin deposits normally required in futures trading means that such trading may be highly leveraged). Accordingly, a relatively small price movement in a futures contract may result in an immediate and substantial loss to a Portfolio.

OPTIONS

A Portfolio may enter into option contracts. These contracts give the right, but not the obligation, to buy or sell an underlying asset or instrument at a specified strike price on or before a specified date.

A put option gives the holder the right to sell the underlying assets to the option writer at an agreed price, whereas a call option gives the holder the right to purchase the underlying assets from the option writer at an agreed price. A Portfolio may sell put options in respect of securities and may, in order to generate additional income, sell call options by setting target 'strike' prices at which those securities may be sold or bought in the future. This will create exposure for the Portfolio, as it may have to deliver the underlying securities and, should the market move unfavourably, this may result in a loss. The maximum loss for the writer of a put option is equal to the strike price less the premium received. The maximum loss for the writer of a call option is potentially unlimited if the writer does not hold the physical asset that must be delivered. In the case of a written option or a future, the underlying security is not delivered upon exercise, as the contract is cash settled. A Portfolio's financial liability is therefore linked to the marked-to-market value of the notional underlying investments.

An option writing strategy used by a Portfolio carries the risks detailed above. Such an option writing strategy may also limit the potential for capital growth and increase the risk that the Net Asset Value of a Portfolio will underperform global equities markets.

CONTRACTS FOR DIFFERENCES

A contract for differences (“CFD”) is an OTC derivative transaction providing synthetic exposure to an underlying asset such as a listed equity, an index or a basket of securities. Such contracts are subject to risks related to OTC investments. They are subject to daily margin adjustment payments and in case of significant market movement, holders of CFDs may sustain more loss than the margin accounts and expose the Portfolio to losses. In addition, if there is no liquidity in the relevant reference security, the Portfolio may be unable to trade the respective CFD which could have impact on the Portfolio’s performance and liquidity. In addition, CFDs are exposed to counterparty risk as described in the Operational Risk section.

TOTAL AND EXCESS RETURN SWAPS

Certain Portfolios may use Total Return (TR) or Excess Return (ER) Swaps. A TR Swap is a swap agreement in which the total return of a security is exchanged for some other cash flow, usually tied to LIBOR (or a comparable or successor rate after the expected decommission of the LIBOR rate) or some other loan or credit-sensitive security/market. TR and ER Swaps are subject to interest rate risk with an additional risk that underlying security/market movements may vary from expectations at the point the position is entered into. Adverse movements in either case would result in losses to the relevant Portfolios. TR Swaps are also subject to counterparty credit risk, which is the possibility that the other party to the swap contract may default on its obligations. Collateralisation arrangements will be in place to minimise this counterparty credit risk. Any collateral received by the Portfolios in respect of OTC FDI will meet the requirements set out in this Prospectus and be valued in accordance with the provisions of the “Determination of Net Asset Value” section hereof.

FORWARD CURRENCY CONTRACTS

Forward contracts are not traded on exchanges, are not standardised and each transaction tends to be negotiated on an individual basis. Forward trading is substantially unregulated.

There is no requirement that the principals who deal in the forward markets are required to continue to make markets in the currencies they trade and these markets can experience periods of illiquidity, sometimes of significant duration. Disruptions can occur in any market traded by a Portfolio due to unusually high trading volume, political intervention or other factors. In respect of such trading, a Portfolio is subject to the risk of counterparty failure or the inability or refusal by a counterparty to perform with respect to such contracts. Market illiquidity or disruption could result in major losses to a Portfolio.

COMMODITY POOL OPERATOR – “DE MINIMIS EXEMPTION”

While certain Portfolios may trade commodity interests (which for CFTC purposes include, but are not limited to, commodity futures contracts, commodity options contracts and/or swaps), including security futures products, the Manager is exempt from registration with the CFTC as a CPO with respect to those Portfolios pursuant to CFTC Rule 4.13(a)(3). Therefore, unlike a registered CPO, the Manager is not required to deliver a CFTC disclosure document to prospective investors, nor is it required to provide investors with certified annual reports that satisfy the requirements of CFTC rules applicable to registered CPOs.

Reliance upon CFTC Rule 4.13(a)(3), the so-called “de minimis exemption”, requires limiting each such Portfolio’s exposure to the commodity markets. CFTC Rule 4.13(a)(3) requires that a pool for which such exemption is filed must meet one or the other of the following tests with respect to its commodity interest positions, including positions in security futures products, whether entered into for bona fide hedging purposes or otherwise: (a) the aggregate initial margin, premiums, and required minimum security deposit for retail forex transactions, will not exceed 5 per cent. of the liquidation value of the pool’s portfolio, after taking into account unrealised profits and unrealised losses on any such positions it has entered into; or (b) the aggregate net notional value of such positions does not exceed 100 per cent. of the liquidation value of the pool’s portfolio, after taking into account unrealised profits and unrealised losses on any such positions it has entered into. Additional conditions for reliance upon this exemption are detailed in Annex IV.

INVESTMENT IN LEVERAGED CIS

The Company and the Manager will not generally have control over the activities of any company or collective investment scheme invested in by a Portfolio. Managers of collective investment schemes and companies in which a Portfolio may invest may take undesirable tax positions, employ excessive leverage, or otherwise manage the collective investment schemes or be managed in a manner not anticipated by the Manager. Any leverage employed by managers of collective investment schemes and companies in which a Portfolio may invest, may involve the same leverage risks as those arising where a Portfolio employs leverage, as described in the “Investment Risks” section of this Prospectus and the “Risk” section of the description of such Portfolio in the relevant Supplement.

LEVERAGE RISK

The Portfolios may achieve some leverage through the use of FDI for the purpose of making investments. The use of leverage creates special risks and may significantly increase the Portfolios' investment risk. Leverage creates an opportunity for greater yield and total return but, at the same time, may result in a significant or a total loss of the Portfolio.

RISKS OF CLEARING HOUSES, COUNTERPARTIES OR EXCHANGE INSOLVENCY

The liquidity of a secondary market in derivatives is subject to the risk of trading halts, suspensions, exchange or clearing house equipment failures, government intervention, insolvency of a brokerage firm, clearing house or exchange or other disruptions of normal trading activity.

SHORT POSITIONS

Holding a short position is when a security that the Portfolios do not physically own is sold. This is done if the price of that security is expected to fall so that it can be purchased at a later date for a lower price to make a profit. Uncovered selling of securities is prohibited under the UCITS Regulations but the creation of synthetic short positions through the use of FDI is permitted, as long as any exposure created is covered by the assets of the relevant Portfolio. A short position in a security could create greater risks than would occur with a long position. These include the possibility of an unlimited loss due to potentially unlimited price increases in the securities concerned.

CASH COLLATERAL

Cash collateral re-use or reinvestment could lead to a reduction of the value of the eligible collateral capital. This, in turn may cause losses to the Company and the relevant Portfolio because it is obliged to return collateral to the counterparty.

INDEX RISK

The structure and composition of the relevant index, including the transaction costs which are inherent in the index and are designed to replicate the trading costs which would be borne by an investor seeking to gain access to the exposures provided by the index, will affect the performance, volatility and risk of the index (in absolute terms and by comparison with other indices) and consequently, the performance, volatility and risk of the Portfolio. An index tracking Portfolio may not be successful in selecting a portfolio of investments that will provide a return that correlates closely with that of the relevant index. Application of such screens or techniques may result in investment performance below that of the relevant index and may not produce results expected by the Portfolio. Investors should review the index rules for the relevant Portfolio and the risk disclosures and limitations on liability contained therein prior to investing in such a Portfolio. Additional information on relevant indices (including information on the rebalancing frequency of such indices) shall be made available in the annual report of the Company.

Index License Risk

If in respect of an index, at any time, the licence granted (if required) in respect of any relevant Portfolio or the Manager (or its affiliates) to replicate or otherwise use the index for the purposes of an index tracking Portfolio terminates, or such a licence is otherwise disputed, impaired or ceases (for any reason), the Directors and/or the Manager may be forced to replace the index with another index which they determine to track substantially the same market as the index in question and which they consider to be an appropriate index for the Portfolio to track and such a substitution or any delay in such a substitution may have an adverse impact on the Portfolio. In the event that the Directors and/or the Manager are unable to identify a suitable replacement for the relevant index, they may be forced to terminate the Portfolio.

Index Tracking Risk

Where a Portfolio tracks an index, there is no guarantee that the investment objective of that Portfolio will be achieved. In particular, no financial instrument enables the returns of any index to be reproduced or tracked exactly and any use of portfolio optimisation techniques by a Portfolio instead of full replication may increase the risk of tracking error. Changes in the investments of a Portfolio and re-weightings of the index may give rise to various transaction costs (including in relation to the settlement of foreign currency transactions), operating expenses or inefficiencies which may adversely impact the performance of the relevant index and the Portfolio's tracking of the index. Furthermore, the total return on investment in the Shares will be reduced by certain costs and expenses which are not taken into account in the calculation of the index, such as the trading costs and fees and expenses borne by a Portfolio. Moreover, in the event of the temporary suspension or interruption of trading in the investments comprising the relevant index, or of market disruptions, rebalancing a Portfolio's investment portfolio may not be possible and may result in deviations from the return of the relevant index.

The ability of an index tracking Portfolio to achieve significant correlation between the performance of the Portfolio and the index it tracks may be affected by changes in securities markets, changes in the composition of the relevant index, cash flows into and out of the Portfolio and the fees and expenses of the Portfolio. Such a Portfolio will seek to track index returns regardless of the current or projected performance of the relevant index or of the actual securities comprising the index. Further, the relevant Portfolio generally will not sell a security included in the index as long as such security is part of the index regardless of any sudden or material decline in value or foreseeable material decline in value of such security, even though the Manager/the Sub-Investment Manager may make a different investment decision for other accounts or portfolios that hold such security. As a result, an index-trading Portfolio's performance may be less favourable than that of a portfolio managed using an active investment strategy.

BORROWING POLICY

Under the Articles the Directors are empowered to exercise all of the borrowing powers of the Company subject to any limitations under the UCITS Regulations and to charge the assets of the Company as security for such borrowings.

The Company may not borrow money, grant loans or act as guarantor on behalf of third parties, except:

- (i) foreign currency may be acquired by means of a back-to-back loan (i.e. borrowing one currency against the deposit of an equivalent amount of another currency) provided that where foreign currency borrowings exceed the value of the "back-to-back" deposit, any excess shall be regarded as borrowing and therefore aggregated with other borrowing for the purposes of the 10% limit referred to below; and
- (ii) the Company may incur temporary borrowings (including to finance temporary cash flow mismatches in respect of covering FDI positions which a Portfolio may enter into) in an amount not exceeding 10% of its net asset value and may charge its assets as security for such borrowings.

DISTRIBUTION POLICY

ACCUMULATING CLASSES

The Directors have determined to accumulate all net investment income and net realised capital gains attributable to the Accumulating Classes and therefore do not intend to declare dividends in respect of Shares in such Classes.

DISTRIBUTING CLASSES

Source of Distributions

Pursuant to the Articles, the Directors may declare dividends, in respect of any Shares out of net income (including dividend and interest income) and/or the excess of realised and unrealised capital gains over realised and unrealised losses in respect of investments of the Company (collectively "Net Income") and also out of capital. Dividends paid out of capital amount to a return or withdrawal of part of a Shareholder's original investment or from any capital gains attributable to that original investment. Such dividends may result in an immediate decrease in the net asset value of the relevant Shares.

The Directors may pay dividends out of capital and/or Net Income for certain Distributing Classes. However, Shareholders should note that the Directors may, in their discretion, decide not to make such declaration and payment in respect of a Distributing Class.

In respect of Distributing Classes, the Directors may declare and pay a weekly, monthly, quarterly, semi-annual or annual dividend respectively, attributable to the Shares of each such Class out of a combination of Net Income and capital, so that where Net Income during the relevant period is less than the amount declared, the balance will be paid of the capital represented by the relevant Shares, which will enable the Classes to distribute regular, set dividends. In the event that the Net Income attributable to the Distributing Classes exceeds the amount declared during the relevant period, the excess of Net Income over this amount will be retained in a distribution account in respect of the relevant Shares and will form part of the dividend payable in respect of the succeeding distribution period. Further, in the case of the Gross Income Distributing Classes, the Directors may, pay dividends attributable to the Shares of each such Class out of a combination of Net Income and capital with the intention that the amounts distributed will equal the gross income (i.e. total income before the deduction of any fees or expenses) attributable to the relevant Classes. While the foregoing represents the Directors' current intention in respect of the declaration and payment of dividends in respect of certain Distributing Classes, the Directors may in their discretion decide not to make such declaration and payment and there is no guarantee that any such dividends will be paid. Investors should note that dividends declared in respect of a Portfolio may not reflect the dividend characteristics of the underlying investments of that Portfolio.

Frequency of Distributions

Under normal circumstances, the Directors intend that dividends in respect of:

- (a) each of the (Weekly) Distributing Classes (where offered by a Portfolio) shall be declared and paid on or prior to the last Business Day of each week;
- (b) each of the (Monthly) Distributing Classes in all Portfolios shall be declared on or prior to the last Business Day of each month and paid within three Business Days thereafter;
- (c) each of the (CG) Distributing Classes in all Portfolios shall be declared on a semi-annual basis and, unless specified in the relevant Supplement, paid within thirty Business Days thereafter;
- (d) any Distributing Classes which have been designated as quarterly distributing Classes shall be declared on a quarterly basis and, unless otherwise provided in the relevant Supplement, paid within thirty Business Days thereafter;
- (e) each of the (Monthly) Gross Income Distributing Classes in all Portfolios shall be declared on or prior to the last Business Day of each month and paid within three Business Days thereafter;
- (f) all other (Gross) Income Distributing Classes in all Portfolios shall be declared on a quarterly basis and paid within thirty Business Days thereafter;
- (g) all other Distributing Classes in all Portfolios shall be declared and paid on the frequency stated in the relevant Supplement in respect of each Portfolio.

Subject to income being available for distribution, the Directors may also decide to declare and pay interim dividends in relation to any of the Distributing Classes. All Shares in issue in a Distributing Class on any date on which the Directors determine to declare a dividend in respect of such Distributing Class will be eligible for such dividend.

Method of Payment and Other Conditions

Dividends will be paid by wire transfer in accordance with the bank account details nominated by the Shareholder on the subscription application form unless the Shareholder shall have elected that dividends otherwise payable in cash be automatically re-invested in further Shares in the relevant Distributing Class. Dividends paid in cash will be paid in the class currency of the relevant Distributing Class, except in the case of BRL Classes and CLP Classes, in respect of which distributions will be paid in US Dollars.

The Directors reserve the right to change the dividend policy of any Class at its discretion on not less than one month's prior notice to Shareholders of the relevant Class and this Prospectus will be updated to reflect any such change. Any dividend unclaimed after a period of six years from the date of declaration of such dividend shall be forfeited and shall revert to the relevant Portfolio.

Information on Past Distributions

The compositions (i.e. the relative amounts paid from income and capital) of dividends paid for the previous 12 months (if any) in respect of Portfolios which have been authorised in Hong Kong for retail distribution can be obtained from www.nb.com

SUBSCRIPTIONS & REDEMPTIONS

The Directors may issue Shares of any series or Class, and create new series or Classes, on such terms as they may from time to time determine in relation to any Portfolio. For the avoidance of doubt, there will only ever be one (1) series in respect of each Portfolio. Shares of any particular series may be divided into different Classes to accommodate different subscription and/or redemption and/or dividend provisions and/or charges and/or fee arrangements. Investors should note that not all Portfolios described in this Prospectus are currently available for subscription and should refer to the information in the relevant Supplement for further details in respect of the Portfolios in which they intend to invest. Details of the Classes available in each Portfolio are contained in Annex II to this Prospectus and in the relevant Supplement.

Application forms, together with supporting documentation in relation to money laundering prevention checks should be sent by facsimile, or by any other electronic means as agreed with the Administrator, to the Distributor or relevant sub-distributor, if any, for onward transmission to the Administrator in accordance with the details set out in the application form or to the Company at the address set out in the application form.

Subscriptions for Shares in New Classes at the Initial Offer Price will be considered during the Initial Offer Period for the relevant Portfolio, upon receipt by the Administrator of completed share applications and subscription monies as specified below. Such Shares will be issued on the last day of the Initial Offer Period. Details of the Initial Offer Price and Initial Offer Period in respect of each Portfolio are contained in the relevant Supplement. Investors should note that the Directors may, in their absolute discretion, amend the Initial Offer Price in respect of a Class, provided that notice of any such change is provided to all subscribers for such Class before the end of the relevant Initial Offer Period.

Shareholders may request the Company to redeem their Shares on any Dealing Day at their Net Asset Value per Share on such Dealing Day in accordance with the redemption procedures.

In order to receive or redeem Shares at their Net Asset Value per Share as of any particular Dealing Day, a properly completed subscription or redemption form must be received by the Administrator before the relevant Dealing Deadline.

Subscription or redemption application forms received after the relevant deadlines shall be held over until the following Dealing Day, unless the Directors otherwise determine.

Subscriptions or redemptions for Shares may be submitted to the Administrator by fax, or by any other electronic means as agreed with the Administrator (including electronic messaging services such as SWIFT), using the relevant subscription or redemption form as appropriate, provided that all ongoing anti-money laundering checks are complete. If applicable, redemption requests must be accompanied by a share certificate in respect of the Shares (duly endorsed by the Shareholder) or such other evidence of ownership as the Administrator may request.

Investors should review the Prospectus in conjunction with any relevant Key Investor Information Documents.

Information Specific to Subscriptions

Unless stated otherwise in the relevant Supplement, subscriptions in each Portfolio will be accepted either as a subscription for Shares of a cash value or subscriptions for a specific number of Shares.

Subscription monies should be sent by wire transfer to the relevant account specified in the subscription application form, or by transfer of assets in accordance with the provisions described below, no later than three (3) Business Days after the relevant Dealing Day.

If cleared funds representing the subscription monies are not received by the Company by close of business on the relevant due date, the Directors reserve the right to cancel the provisional allotment of Shares. In such an event the investor shall indemnify the Company, the Manager and the Administrator for any loss suffered by the Company as a result of the investor's failure to transmit the subscription monies in a timely fashion. In the event that the Directors decide not to cancel a provisional allotment of Shares notwithstanding that cleared funds have not been received by the Company by the relevant cut-off time, the Directors reserve the right to charge interest (at a rate equal to LIBOR + 3.5% (or a comparable or successor rate after the expected decommission of the LIBOR rate) or such other rate as the Directors may from time to time determine) on such subscription monies commencing on the third Business Day following the relevant Dealing Day. Subscription monies received from applicants prior to the receipt of a completed subscription application form will be maintained (without interest) in an account opened by the Depositary in the name of the Company, the monies will not be available for investment and will remain the property of the applicant until the relevant share application is accepted by the Company. Investors should also note that where subscription monies received in advance of the relevant Dealing Day are subject to negative interest rates or other charges, the relevant investor will be liable for such costs, which will be billed to the investor in due course.

Subscription monies are to be paid in the specified currency to the bank account indicated in the relevant subscription

application form, except in the case of BRL Classes and CLP Classes, in respect of which subscriptions must be paid in US Dollars.

The Directors, or the Administrator as their delegate, may also issue Shares in exchange for assets which the Company is permitted to hold under the investment restrictions of the relevant Portfolio. No Shares may be issued in exchange for such assets unless the Directors are satisfied that:

- (a) the number of Shares issued will not be more than the number which would have been issued for settlement in cash, having valued the assets to be exchanged in accordance with the valuation provisions set out in the Articles and summarised in the “*Determination of Net Asset Value*” section;
- (b) all fiscal Duties and Charges arising in connection with the vesting of such assets in the Depository for the account of the relevant Portfolio are paid by the person to whom the Shares are to be issued or, at the discretion of the Directors, out of the assets of such Portfolio; and
- (c) the assets would qualify as assets of the relevant Portfolio in accordance with the investment objective, policies and restrictions of such Portfolio;

and the Depository is satisfied that:

- (i) the terms of such exchange shall not materially prejudice the Shareholders; and
- (ii) that the assets have been vested in the Depository.

The Minimum Initial Subscriptions and Minimum Holdings that apply to each Portfolio are contained in Annex II to this Prospectus. The Directors may, in their absolute discretion, waive the Minimum Initial Subscription and Minimum Holding for each Class. The Initial Offer Prices for each Portfolio are set out in the relevant Supplement and the Directors may, in their absolute discretion, amend them in respect of a Class, provided that notice of any such change is provided to all subscribers for such Class before the end of the relevant Initial Offer Period.

Measures aimed towards the prevention of money laundering may require a detailed verification of the applicant’s identity. Depending on the circumstances of each application, a detailed verification might not be required where (a) the applicant makes the payment from an account held in the applicant’s name at a recognised financial institution; or (b) the application is made through a recognised intermediary. These exceptions will only apply if the financial institution or intermediary referred to above is within a country recognised by Ireland as having equivalent anti-money laundering regulations.

The Company, and the Administrator acting on behalf of the Company, reserve the right to request such information as is necessary to verify the identity of an applicant. In the event of delay or failure by the applicant to produce any information required for verification purposes, the Company, and the Manager and the Administrator acting on behalf of the Company, may refuse to accept the application and all subscription monies. Shareholders will not be permitted to request the redemption of their Shares unless the completed subscription application form has been received by the Administrator, and all anti-money laundering checks required by the Central Bank have been completed in respect of the relevant subscription. Investors should note that the Administrator reserves the right to take any and all actions deemed appropriate to address any concerns regarding the authenticity of the completed subscription form, which may include requesting any document to be provided in original, wet-ink form (or certified true copy or certified copy form). Investors should also note that where the processing of a subscription is delayed as a result of a failure by investors to provide the necessary complete and accurate documentation, if subscription monies received are subject to negative interest rates or other charges, the relevant investor will be liable for such costs, which will be billed to the investor in due course.

Investors should also note that by completing the Application Form they have provided or will provide information to the Company, which may constitute personal data within the meaning of the Data Protection Legislation and should be aware that personal data of investors and Shareholders shall be processed by the Company in accordance with the Privacy Statement.

All Shares issued will be in registered form and written confirmation of ownership will be sent to Shareholders within ten (10) business days of registration. Share certificates will not be issued unless the Directors otherwise determine. The number of Shares issued will be rounded to the nearest one thousandth of a share and any surplus money will be credited to the Company. The Directors and the Manager may, in their absolute discretion refuse to accept any subscription for Shares, in whole or in part.

Sub-distributors appointed by a Distributor may impose deadlines for receipt of applications which are earlier than those set out above, to facilitate such sub-distributor forwarding those applications to the Administrator. However, no subscription application form will be processed by the Administrator on any Dealing Day unless the relevant subscription application form is received in accordance with the provisions outlined above. Applicants should also note that they may be unable to purchase Shares through a sub-distributor on days that such sub-distributor is not open for business.

The Company will not knowingly issue any Shares to any U.S. Person except in a transaction which does not contravene US securities laws. Each applicant for Shares will be required to provide such representations, warranties or documentation as may be required by the Company to ensure that these requirements are met prior to the issue of Shares. Refer to Annex IV for further information.

Information Specific to Redemptions

Shareholders will not be entitled to withdraw redemption requests unless otherwise agreed by the Administrator in consultation with the Directors. The Directors, the Manager or the Administrator shall be entitled to refuse to redeem any Shares until the share certificates (if any) in respect of those Shares have been returned to the Company. The requests for redemptions must be received in writing by the Administrator in order for payment to be made, provided, however, that payment may be made where a redemption request has been submitted by fax and where payment is made to the account specified by the Shareholder in its original subscription application form, or such other account as may be specified by original notice in writing to the Administrator. Investors should note that the Administrator reserves the right to take any and all actions deemed appropriate to address any concerns regarding the authenticity of the completed redemption form, which may include requesting any document to be provided in original, wet-ink form (or certified true copy or certified copy form). Investors should also note that where the payment of a redemption is delayed as a result of a failure by an investor to provide the necessary complete and accurate documentation, if redemption monies are subject to negative interest rates or other charges, the relevant investor will be liable for such costs, which will be billed to the investor in due course.

The Shares shall be redeemed at the Net Asset Value per Share on the Dealing Day on which redemption is effected as calculated in accordance with the Articles of Association. Investors in some Portfolios may also be subject to Duties and Charges on a redemption. Investors' attention is drawn to the "*Fees and Expenses*" section.

Redemption Proceeds may, with the consent of the Shareholder concerned, be paid by in specie transfer to the Shareholder in question of assets of the Company. The assets to be transferred shall be selected at the discretion of the Directors and the Manager, subject to the approval of the Depositary and the Manager and taken at their value used in determining the redemption price of the Shares being so repurchased. If requested by the Shareholder, the Company must sell the assets on behalf of the Shareholder at the Shareholder's expense and give the Shareholder cash. Such distributions will not materially prejudice the interests of remaining Shareholders.

That notwithstanding, if on any Dealing Day a Shareholder requests the redemption of Shares equal to 5% or more of the number of Shares in issue in a particular series on such Dealing Day and on such Dealing Day redemption requests from all holders of Shares of that series total an aggregate of more than 25% of all the Shares in issue in that series on such Dealing Day, the Company may, with the prior consent of such Shareholder, taking prevailing market conditions and the best interests of the Shareholders of that series as a whole into account, distribute underlying investments rather than cash in respect of such Shareholder's redemption request. In such circumstances, subject always to the principle that any such distribution shall not materially prejudice the interests of other Shareholders and the approval of the Depositary and the Manager for the allocation of assets as part of such distribution, such distributions will be structured so as to provide such redeeming Shareholder with a pro-rated proportion of each asset held by the relevant Portfolio.

In the event that the Company exercises the power to distribute underlying investments rather than cash in respect of a redemption request, the relevant Shareholder will have the right to instruct the Company to procure the sale of such underlying investments on their behalf, in which case the Shareholder will receive the proceeds net of all Duties and Charges incurred in connection with the sale of such underlying investments.

If on any Dealing Day outstanding redemption requests from all holders of Shares of a particular series total more than such amount as may be determined by the Manager from time to time in respect of a series and disclosed in the relevant Supplement, subject always to a minimum of 10% of the Shares of such series in issue on such Dealing Day, (the "Redemption Ceiling") the Manager shall be entitled, in its discretion, to refuse to redeem such number of Shares in that series in excess of the Redemption Ceiling on that Dealing Day, as the Manager shall determine. When exercising this discretion, the Manager shall inform and, where appropriate, consult with the Depositary. Where no Redemption Ceiling is specified in the relevant Supplement, the Redemption Ceiling shall be 10% of the Shares of such series in issue on such Dealing Day.

If the Manager refuses to redeem Shares for this reason, all requests for redemption on such Dealing Day shall be reduced rateably and the Shares to which each request relates which are not redeemed on that Dealing Day shall be redeemed on each subsequent Dealing Day in accordance with the provisions of the Articles until all the Shares of the series to which the original requests related have been redeemed, provided always that in no case will the Company be obliged to redeem Shares of a particular series in excess of the Redemption Ceiling on any Dealing Day.

Redemption proceeds will be paid in the currency received by the Administrator in respect of the subscription for the Shares being redeemed. Any currency conversion necessary will be undertaken by the Administrator at the investor's expense at

the prevailing rate on the date of redemption. Redemption proceeds will be paid within ten (10) Business Days of the relevant Dealing Day unless payment has been suspended in the circumstances described under “*Temporary Suspension of Dealings*” below, although the Company will seek to make such payments within a shorter period of time where possible (up to and including within three (3) Business Days of the relevant Dealing Day). Unless otherwise agreed with the Company, redemption proceeds will be paid by electronic transfer at the expense of the relevant Shareholder to the Shareholder’s account as specified in the Shareholder’s subscription application form or as otherwise specified by original notice in writing by the Shareholder to the Company.

Where satisfaction of a redemption request would result in a Shareholder holding a number of Shares in a Class of with a value less than the Minimum Holding for that Class, the Directors and the Manager shall be entitled, at their discretion, to treat the application for redemption as an application for the redemption of all of that Shareholder’s Shares of the relevant Class or to offer the Shareholder an opportunity to amend or withdraw the redemption request.

Operation of the Subscription and Redemption Collection Accounts

The Company has established a collection account at umbrella level in the name of the Company (the “Umbrella Cash Collection Account”) and has not established such accounts in respect of each Portfolio. All subscriptions (including subscriptions received in advance of the issue of Shares) attributable to, and all redemptions, dividends or cash distributions payable from, a Portfolio will be channelled and managed through the Umbrella Cash Collection Account.

Monies in the Umbrella Cash Collection Account, including subscription monies received in respect of a Portfolio in advance of the issue of Shares, will not be subject to the Central Bank (Supervision and Enforcement) Act 2013 (Section 48(1)) Investor Money Regulations 2015 for Fund Service Providers. Pending the issue of Shares or pending payment of redemption proceeds or distributions, the relevant investor will be an unsecured creditor of the Portfolio in respect of amounts paid by or due to it.

Subscriptions amounts paid into the Umbrella Cash Collection Account will be paid into an account in the name of the Depository on behalf of the relevant Portfolio on the contractual settlement date. Where subscription monies are received in the Umbrella Cash Collection Account without sufficient documentation to identify the investor or the relevant Portfolio, such monies shall, subject to compliance with relevant anti-money laundering requirements, be returned to the relevant investor within the timescales and as specified in the operating procedure in respect of the Umbrella Cash Collection Account.

Redemptions and distributions, including blocked redemptions or distributions, will be held in the Umbrella Cash Collection Account until payment due date (or such later date as blocked payments are permitted to be paid) and will then be paid to the relevant or redeeming Shareholder.

Failure to provide the necessary complete and accurate documentation in respect of subscriptions, redemptions or dividends is at the investor’s risk. In particular, investors should note that where:

- (i) subscription monies received into the Umbrella Cash Collection Account in advance of the relevant Dealing Day; or
- (ii) subscription, redemption or distribution monies which are held in the Umbrella Cash Collection Account due to failures by investors to provide the necessary complete and accurate documentation

are subject to negative interest rates or other charges, the relevant investor will be liable for such costs, which will be billed to the investor in due course.

The Umbrella Cash Collection Account has been opened in the name of the Company. The Depository will be responsible for safe-keeping and oversight of the monies in the Umbrella Cash Collection Account and for ensuring that relevant amounts in the Umbrella Cash Collection Account are attributable to the appropriate Portfolios.

The Company and the Depository have agreed an operating procedure in respect of the Umbrella Cash Collection Account, which identifies the participating Portfolios, the procedures and protocols to be followed in order to transfer monies from the Umbrella Cash Collection Accounts, the daily reconciliation processes and the procedures to be followed where there are shortfalls in respect of a Portfolio due to late payment of subscriptions, and/or transfers to a Portfolio of monies attributable to another Portfolio due to timing differences.

MANDATORY REDEMPTION OF SHARES

Shareholders are required to notify the Company immediately in the event that they become Irish Residents, U.S. Persons, Benefit Plans or cease to be Exempt Irish Investors, or the Declaration made by or on their behalf is no longer valid. Shareholders are also required to notify the Company immediately in the event that they hold Shares for the account or benefit of Irish Residents, U.S. Persons, Benefit Plans, or otherwise hold Shares in breach of any law or regulation or otherwise in circumstances having or which may have, adverse regulatory, tax or fiscal consequences or be a material administrative disadvantage for the Company or the Shareholders as a whole. In addition, Shareholders are required to notify the Company if any information provided or representations made by them on any subscription application form is no longer correct. It is the responsibility of each Shareholder to ensure that correct and accurate information is provided to the Company and kept up to date.

Where the Company becomes aware that a Shareholder is (a) a U.S. Person or is holding Shares for the account or benefit of a U.S. Person and such person is not an “accredited investor” (as defined in Rule 501(a) of Regulation D under the 1933 Act) and a “qualified purchaser” (as defined in Section 2(a)(51) of the 1940 Act); (b) a Benefit Plan or is holding Shares for the account or benefit of a Benefit Plan; (c) holding Shares in breach of any law or regulation or otherwise in circumstances having or which may have adverse regulatory, legal, pecuniary or tax consequences or material administrative disadvantage for the Company or the Shareholders as a whole; or (d) not holding Shares equal to or greater than the Minimum Holding, the Company may, at its absolute discretion, acting in accordance with applicable laws and regulations and in good faith and on reasonable grounds: (i) direct the Shareholder to dispose of those Shares to a person who is entitled to own the Shares within such time period as the Company stipulates; or (ii) redeem the Shares at their Net Asset Value per Share as at the next Business Day after the date of notification to the Shareholder or following the end of the period specified for disposal pursuant to (i) above.

Under the Articles, any person who becomes aware that he is holding Shares in contravention of any of the above provisions and who fails to transfer, or deliver for redemption, his Shares pursuant to the above provisions or who fails to make the appropriate notification to the Company shall indemnify and hold harmless each of the Directors, the Company, the Manager, the Sub-Investment Manager, the Administrator, the Depositary and the Shareholders (each an “Indemnified Party”) from any claims, demands, proceedings, liabilities, damages, losses, costs and expenses directly or indirectly suffered or incurred by such Indemnified Party arising out of or in connection with the failure of such person to comply with his obligations pursuant to any of the above provisions. The potential costs to the Indemnified Parties, in respect of which the aforementioned indemnity is provided, may be substantial and may exceed the value of their investment in the Company.

The Company shall be entitled to redeem Shares in respect of any Portfolio or Class in the circumstances described in the “*Termination of Portfolios or Share Classes*” section.

EXCHANGE PRIVILEGE

Except where dealings in Shares have been temporarily suspended in the circumstances described in this Prospectus and subject to the restrictions in respect of specific Classes below, Shareholders may request the exchange of Shares of any Class in a Portfolio (the "Original Class") on any Business Day for Shares of any Class in any Portfolio (including the same Portfolio as the Original Class). A properly completed exchange request form must be received by the Administrator before the relevant Dealing Deadline.

Requests for exchanges of Shares shall be effected by notice in writing to the Company in such form as the Directors may approve. The general provisions and procedures relating to redemptions of Shares of the Original Class and subscriptions for Shares of the New Class will apply to any exchange of Shares. Accordingly, for these purposes, an exchange request will be treated as a redemption request in respect of the Original Class and as a subscription application request in respect of Shares of the New Class. Exchange fees, if any, will be disclosed in the "*Fees and Expenses*" section and the relevant Supplement.

Exchange request forms should be sent by post or facsimile to the Distributor or relevant sub-distributor for onward transmission to the Administrator at the address specified above in the "*Subscriptions*" section or to the Administrator. Exchange requests forms received after the above deadlines will be held over and dealt with on the following Business Day. The price at which Shares will be exchanged will be determined by reference to the Net Asset Value per Share of the relevant Shares on the relevant Business Day.

When requesting the exchange of Shares as an initial investment in a New Class, Shareholders should ensure that the Net Asset Value of the Shares exchanged is equal to or exceeds the Minimum Initial Subscription for the New Class, except and insofar as the Directors may in their absolute discretion vary or waive such requirement, either generally or in any specific case. If the number of Shares of the New Class to be issued on exchange is not an integral number of Shares, the Company may issue fractional new Shares or return the surplus arising to the Shareholder seeking to convert the Shares of the Original Class. The Directors may, in their absolute discretion refuse to accept any request for exchange for Shares, whole or in part.

Class-Specific Restrictions

B Shares

B Shares can only be exchanged for B Shares of another Portfolio which continues to issue B Shares of the same currency and which are subject to the same CDSC. The aging of the Shares exchanged will be carried over to the New Class and no CDSC will be payable at the time of such exchange. No other Class may be exchanged for B Shares. The attention of Shareholders is drawn to this restriction, which may limit their ability to acquire Shares in another Portfolio through exchanging because B Shares are not available in all Portfolios and the further issue of B Shares in any Portfolio may be suspended at any time by the Directors and there can be no guarantee that B Shares of any currency in any Portfolio will continue to be offered by the Company.

C1 Shares

C1 Shares can only be exchanged for C1 Shares of another Portfolio which continues to issue C1 Shares of the same currency and which are subject to the same CDSC. The aging of the Shares exchanged will be carried over to the New Class and no CDSC will be payable at the time of such exchange. No other Class may be exchanged for C1 Shares. The attention of Shareholders is drawn to this restriction, which may limit their ability to acquire Shares in another Portfolio through exchanging because C1 Shares are not available in all Portfolios and the further issue of C1 Shares in any Portfolio may be suspended at any time by the Directors and there can be no guarantee that C1 Shares of any currency in any Portfolio will continue to be offered by the Company.

C2 Shares

C2 Shares can only be exchanged for C2 Shares of another Portfolio which continues to issue C2 Shares of the same currency and which are subject to the same CDSC. The aging of the Shares exchanged will be carried over to the New Class and no CDSC will be payable at the time of such exchange. No other Class may be exchanged for C2 Shares. The attention of Shareholders is drawn to this restriction, which may limit their ability to acquire Shares in another Portfolio through exchanging because C2 Shares are not available in all Portfolios and the further issue of C2 Shares in any Portfolio may be suspended at any time by the Directors and there can be no guarantee that C2 Shares of any currency in any Portfolio will continue to be offered by the Company.

C Shares

C Shares can only be exchanged for C Shares of another Portfolio which continues to issue C Shares of the same currency and which are subject to the same CDSC. The aging of the Shares exchanged will be carried over to the New

Class and no CDSC will be payable at the time of such exchange. The attention of Shareholders is drawn to this restriction, which may limit their ability to acquire Shares in another Portfolio through switching because C Shares are not available in all Portfolios and the further issue of C Shares in any Portfolio may be suspended at any time by the Directors and there can be no guarantee that C Shares in any currency in any Portfolio will continue to be offered by the Company.

E Shares

E Shares can only be exchanged for E Shares of another Portfolio which issues E Shares denominated in the same currency and which are subject to the same CDSC. The aging of the Shares exchanged will be carried over to the New Class and no CDSC will be payable at the time of such exchange. No other Class may be exchanged for E Shares. The attention of Shareholders is drawn to this restriction, which may limit their ability to acquire Shares in another Portfolio through exchanging because E Shares are not available in all Portfolios and the further issue of E Shares in any Portfolio may be suspended at any time by the Directors and there can be no guarantee that E Shares of any currency in any Portfolio will continue to be offered by the Company.

TRANSFER OF SHARES

Transfers of Shares must be effected by transfer in writing in any usual or common form or in any other form approved by the Directors from time to time. Every form of transfer must state the full name and address of each of the transferor and the transferee and must be signed by or on behalf of the transferor. The Directors or their delegate may decline to register any transfer of Shares unless the transfer form is deposited at the registered office of the Company, or such other place as the Directors may reasonably require, accompanied by such other evidence as the Directors may reasonably require to show the right of the transferor to make the transfer and to determine the identity of the transferee. The transferor shall be deemed to remain the holder of the Shares until the name of the transferee is entered in the register of Shareholders. A transfer of Shares will not be registered unless the transferee, if not an existing Shareholder, has completed a subscription application form with respect to the relevant Shares to the satisfaction of the Directors. The Directors may also, at their absolute discretion, decline to register a transfer which would result in either the transferee holding Shares with a Net Asset Value less than the Minimum Initial Subscription, or the transferor holding Shares with a Net Asset Value less than the Minimum Holding for the relevant Class.

Shares are freely transferable except that the Directors may decline to register a transfer of Shares (a) if the transfer is in breach of US securities laws; (b) in the absence of satisfactory evidence that the proposed transferee is not a Benefit Plan; (c) if in the opinion of the Directors the transfer would be unlawful or result or be likely to result in any adverse regulatory, legal, pecuniary or tax consequences or material administrative disadvantage for the Company or the Shareholders as a whole; (d) in the absence of satisfactory evidence of the transferee's identity; or (e) where the Company is required to redeem appropriate or cancel such number of Shares as are required to meet the appropriate tax of the Shareholder on such transfer. A proposed transferee may be required to provide such representations, warranties or documentation as the Directors may require in relation to the above matters. In the event that the Company does not receive a Declaration in respect of the transferee, the Company will be required to deduct appropriate tax in respect of any payment to the transferee or any sale, transfer, cancellation, redemption, repurchase, cancellation or other payment in respect of the Shares as described in the section headed "*Taxation*" below.

TEMPORARY SUSPENSION OF DEALINGS

The Directors may at any time, with prior notification to, or, where necessary, consultation with, the Depositary, temporarily suspend the issue, valuation, sale, purchase, redemption or conversion of Shares and/or the payment of redemption proceeds at any time during:

- (a) any period when any Recognised Market on which a substantial portion of the investments for the time being comprised in the relevant Portfolio are quoted, listed or dealt in is closed otherwise than for ordinary holidays, or during which dealings on any such Recognised Market are restricted or suspended;
- (b) any period when, as a result of political, military, economic or monetary events or other circumstances beyond the control, responsibility and power of the Directors, the disposal or valuation of investments for the time being comprised in the relevant Portfolio cannot, in the opinion of the Directors, be effected or completed normally or without prejudicing the interests of Shareholders;
- (c) any breakdown in the means of communication normally employed in determining the value of any investments for the time being comprised in the relevant Portfolio or during any period when for any other reason the value of investments for the time being comprised in the relevant Portfolio cannot, in the opinion of the Directors, be promptly or accurately ascertained;
- (d) any period when the Company is unable to repatriate funds for the purposes of making redemption payments or during which the realisation of investments for the time being comprised in the relevant Portfolio, or the transfer or payment of funds involved in connection therewith cannot, in the opinion of the Directors, be effected at normal prices or normal rates of exchange;
- (e) any period when, as a result of adverse market conditions, the payment of redemption proceeds may, in the opinion of the Directors, have an adverse impact on the relevant Portfolio or the remaining Shareholders in such Portfolio;
- (f) any period after a notice convening a meeting of Shareholders for the purpose of dissolving the Company or terminating a Portfolio has been issued, up to and including the date of such meeting of Shareholders;
- (g) any period during which dealings in a collective investment scheme in which the Portfolio has invested a significant portion of its assets are suspended;
- (h) any period in which the repurchase of the Shares would, in the opinion of the Directors, result in a violation of applicable laws; or
- (i) any period when the Directors determine that it is in the best interests of the Shareholders to do so.

Notice of any such suspension shall be published by the Company at its registered office and in such newspapers and through such other media as the Directors may from time to time determine, if in the opinion of the Directors, it is likely to exceed thirty (30) days, and shall be transmitted immediately to the Central Bank, Euronext Dublin, where applicable, and the Shareholders. Shareholders who have requested the issue or redemption of Shares of any series or Class will have their subscription or redemption request dealt with on the first Dealing Day after the suspension has been lifted unless applications or redemption requests have been withdrawn prior to the lifting of the suspension. The Directors will take all necessary steps to resume normal operations as soon as practicable and regularly review any prolonged suspension of dealings.

DETERMINATION OF NET ASSET VALUE

The Net Asset Value of each Portfolio, and the Net Asset Value per Share in each Portfolio, shall be calculated by the Administrator to the nearest two (2) decimal places in the Base Currency as at the Valuation Point for each Dealing Day in accordance with the valuation provisions set out in the Articles and summarised below.

The Net Asset Value of a Portfolio shall be calculated by ascertaining the value of the assets of the relevant Portfolio and deducting from such amount the liabilities of the Portfolio, which shall include all fees and expenses payable and/or accrued and/or estimated to be payable out of the assets of the Portfolio.

In the event that a Portfolio is divided into different Classes to accommodate different dividend policies and/or charges and/or fee arrangements and/or currencies and/or investments in FDI in accordance with the requirements of the Central Bank, the amount of the Net Asset Value of the Portfolio attributable to a Class shall be determined by establishing the number of Shares issued in the Class at the relevant Valuation Point and by allocating the relevant fees and expenses and any costs, liabilities and/or benefits of any foreign exchange hedging or any investments in FDI entered into in respect of a Class, to the Class, making appropriate adjustments to take account of distribution, subscriptions, redemptions, gains and expenses of that Class and apportioning the Net Asset Value of the Portfolio accordingly. The Net Asset Value per Share in respect of a Class will be calculated by dividing the Net Asset Value of the relevant Class by the number of Shares of the relevant Class in issue. The Net Asset Value of a Portfolio attributable to a Class and the Net Asset Value per Share in respect of a Class will be expressed in the relevant Class Currency, if it is different to the Base Currency.

The Net Asset Value of each Portfolio and the Net Asset Value per Share in each Portfolio in respect of any Dealing Day will be calculated using the value of each the relevant assets or liabilities as at their respective Valuation Point. They will be determined at the Net Asset Value Calculation Time on the relevant Dealing Day.

The currency exposures of the assets of the Portfolios will not be allocated to separate Classes. The Manager or Sub-Investment Manager shall seek to limit hedging to the extent of the particular Hedged Class' currency exposure. Foreign exchange hedging shall not be used for speculative purposes. The periodic reports of the Company will indicate how hedging transactions have been utilised.

Each asset which is quoted, listed or traded on or under the rules of any Recognised Market shall be valued at the latest available dealing price or, if unavailable or if bid and offer quotations are made, the latest available middle market quotation (i.e. the mean of the bid and offer price quoted) on the relevant Recognised Market at close of business on such Recognised Market on each Dealing Day. Prices will be obtained for this purpose by the Administrator from independent sources, such as recognised pricing services or brokers specialising in the relevant markets, which in the opinion of the Administrator represent objective and accurate sources of information. If the investment is normally quoted, listed or traded on or under the rules of more than one Recognised Market, the relevant Recognised Market shall be that which the Directors determine provides the fairest criterion of value for the investment. If prices for an investment quoted, listed or traded on the relevant Recognised Market are not available at the relevant time, or are unrepresentative in the opinion of the Directors or their delegates, such investment shall be valued at such value as shall be estimated with care and in good faith as the probable realisation value of the investment by a competent person appointed for such purpose by the Directors or their delegates and approved for the purpose by the Depositary. If the investment is quoted, listed or traded on a Recognised Market but acquired or traded at a premium or discount outside of or off the Recognised Market, the investment shall be valued taking into account the level of premium or discount as of the date of valuation of the instrument with the approval of the Depositary. Neither the Directors or their delegates nor the Depositary shall be under any liability if a price reasonably believed by them to be the latest available dealing price or, as the case may be, middle market quotation for the time being, may be found not to be such.

The value of any investment which is not normally quoted, listed or traded on or under the rules of a Recognised Market, will be valued at its probable realisation value estimated with care and in good faith by the Directors (who shall be approved for the purpose by the Depositary) in consultation with the Administrator or by a competent person appointed by the Directors and approved for such purpose by the Depositary.

Fixed income securities may be valued by reference to the valuation of the securities which are considered comparable in rating, yield, due date and other characteristics where reliable market quotations are not available, using a methodology which will be compiled by the Directors or their delegate.

Cash deposits and similar investments shall be valued at their face value together with accrued interest unless in the opinion of the Directors (in consultation with the Manager, the Administrator and the Depositary) any adjustment should be made to reflect the fair value thereof.

Units or shares in collective investment schemes (including Shares held by a Portfolio in another Portfolio) shall be valued on the basis of the latest available net asset value per unit as published by the collective investment scheme. If such prices are unavailable, the units will be valued at their probable realisation value estimated with care and in good faith by the Manager (who shall be approved for the purpose by the Depositary) in consultation with the Administrator or by a

competent person appointed for such purpose by the Administrator and approved for such purpose by the Manager and the Depositary.

In determining a Portfolio's Net Asset Value per Share, all assets and liabilities initially expressed in foreign currencies will be converted into the Base Currency of the relevant Portfolio using the market rates prevailing at the Valuation Point. If such quotations are not available, the rate of exchange will be determined in accordance with policies established in good faith by the Manager.

Derivative instruments including swaps, interest rate futures contracts and other financial futures and options contracts which are traded on a Recognised Market shall be valued at the settlement price as determined by the relevant Recognised Market at the close of business on such Recognised Market, provided that where it is not the practice of the relevant Recognised Market to quote a settlement price, or if a settlement price is not available for any reason, such instruments shall be valued at their probable realisation value estimated with care and in good faith by the Manager (who shall be approved for the purpose by the Depositary) in consultation with the Administrator.

In accordance with the requirements of the Central Bank, OTC derivatives will be valued at least daily at such value as shall be estimated with care and in good faith as the probable realisation value of the investment by the Manager, by a competent person (appointed for such purpose by the Manager and approved for such purpose by the Depositary) or by any other means (provided the value is approved by the Depositary). This verification procedure is described in greater detail in the RMP Statement.

In order to help prevent market timing and protect investors in the relevant Portfolios, the Directors, with the approval of the Depositary, have appointed ICE Data Pricing & Reference Data, LLC ("IDPR") as a competent person for the purposes of valuing the assets held by each Portfolio in certain circumstances. IDPR will follow international best practice and adhere to the principles on valuation of such instruments.

Forward foreign exchange and interest rate swap contracts may be valued in accordance with the preceding provisions or alternatively by reference to freely available market quotations.

Adjustment of Valuations and Swing Pricing

Notwithstanding the above provisions the Manager may, with the approval of the Depositary (a) adjust the valuation of any listed investment; or (b) in relation to a specific asset permit some other method of valuation approved by the Depositary to be used if, having regard to currency, applicable rate of interest, maturity, marketability and/or such other considerations as they deem relevant, they consider that such adjustment or alternative method of valuation is required to reflect more fairly the value thereof.

In addition, on any Dealing Day on which there are net subscriptions into or net redemptions out of a Portfolio, the actual cost of acquiring or disposing of assets on behalf of the Portfolios, due to dealing charges, taxes, and any spread between acquisition and disposal prices of assets, may be such as to affect the Net Asset Value of the Portfolio to the detriment of Shareholders in the Portfolio as a whole. The adverse effect that these costs could have on the Net Asset Value is known as "dilution".

In order to seek to mitigate the potentially dilutive effect of dealing on the Net Asset Value of a Portfolio on any Dealing Day on which there are net subscriptions or redemptions in a Portfolio above a certain predefined threshold of the relevant Portfolio, the Manager may determine, at their discretion, to "swing" the Net Asset Value to counter the possible negative effects of dilution. Where they so determine, the Administrator will calculate the Net Asset Value for the relevant Portfolio, as described above, and then adjust ("swing") the Net Asset Value by a pre-determined amount. The direction of the swing will depend on whether there are net subscriptions or redemptions in the relevant Portfolio on the relevant Dealing Day, while the magnitude of the swing will be based on pre-determined estimates of the average trading costs in the relevant asset class(es) in which the Portfolio is invested. For example, if the relevant Portfolio is experiencing net inflows, its Net Asset Value will be swung upwards, so that the incoming shareholders are effectively bearing the costs of the dealing that their subscriptions generate by paying a higher Net Asset Value per Share than they would otherwise be charged. Conversely, where there are net redemptions in the Portfolio, the Net Asset Value will be swung downwards, so that the outgoing investors are effectively bearing the costs of the dealing that their redemptions generate by receiving a lower Net Asset Value per Share than they would otherwise receive. These swings are intended to protect non-dealing Shareholders from the impact of trading costs triggered by dealing investors.

The determination to swing the Net Asset Value in respect of a Portfolio will be made following a consideration of the dealing activity (i.e. level of subscriptions and redemptions) in the relevant Portfolio on a Dealing Day, in accordance with criteria approved by the Manager from time to time. These criteria will include whether the costs of investing or divesting the net inflows into or outflows from a Portfolio on a Dealing Day will create, in the Manager's opinion, a significant dilutive impact. Swing pricing will only be exercised for the purpose of reducing dilution in the interests of the Shareholders in a Portfolio as a whole and will be applied consistently in respect of a Portfolio and in respect of all assets of that Portfolio.

The maximum swing in normal market circumstances where swing pricing is adopted is not expected to exceed 1.5% of the Net Asset Value on the relevant Dealing Day. Investors should note that in extreme market conditions the factor may exceed that level. The application of Swing Pricing may increase the variability of a Portfolio's returns. The Manager reserves the right to increase or vary the 'swing' of the Net Asset Value without notice to Shareholders.

Indicative Net Asset Value

The Company may cause an indicative net asset value ("**INAV**"), which is an estimate of the Net Asset Value per Share calculated using market data, to be calculated in respect of any Class, on any Business Day that is not a Dealing Day, in respect of any Portfolio. Any such INAV will be based on recent prices available for the securities and other investments held by a Portfolio, calculated using the methodologies outlined above. Premiums and discounts between the INAV and the market prices of the relevant Portfolio's assets may occur and the INAV should not be viewed as a "real-time" update of the Net Asset Value per Share, which is calculated only on each Dealing Day. The INAV is not an official Company record. None of the Company, the Manager, any of their affiliates, or any third party calculation agents involved in, or responsible for, the calculation or publication of such INAVs makes any warranty as to their accuracy and/or agree to update any INAV if it determines that the INAV was materially inaccurate. Details as to whether or not an INAV is available in respect of any Portfolio, as well as details of any INAV calculated, where available, shall be available to Shareholders from the Manager upon request.

Publication

Save where the determination of the Net Asset Value per Share in respect of the Company has been temporarily suspended in the circumstances described under "*Temporary Suspension of Dealings*" above, the Net Asset Value per Share of each Portfolio shall be made public at the registered office of the Manager and may also be published by the Administrator on Bloomberg and various other publications as required (see Annex III) and will be notified immediately and without delay upon calculation to Euronext Dublin on each Dealing Day and published by Euronext Dublin on its website (<https://www.euronext.com/en/markets/dublin>), where such delay impacts any Portfolio that is listed on Euronext Dublin.

TERMINATION OF PORTFOLIOS OR SHARE CLASSES

The Company is established for an unlimited period and may have unlimited assets in its Portfolios. However, the Company is obliged to (in the case of (a) and (b) below) and may, but is not obliged to (in the case of (c), (d) and (e) below), redeem all of the Shares of any series or Class in issue if:

- (a) the Shareholders in that Portfolio or Class pass a special resolution providing for such redemption at a general meeting of the holders of the Shares of that Portfolio or Class;
- (b) the redemption of the Shares in that Portfolio or Class is approved by a resolution in writing signed by all of the holders of the Shares in that Portfolio or Class;
- (c) the Net Asset Value of the relevant Portfolio does not exceed or falls below the Base Currency equivalent of US\$75,000,000 (or such other amount as may be approved by the Directors in respect of any Portfolio); or
- (d) the Directors have determined to redeem all Shares in the Portfolio in accordance with the provisions specified under the heading "*Termination of appointment of the Manager, the Sub-Investment Manager or any other sub-investment manager at the initiative of the Shareholders*" in the "*The Sub-Investment Manager*" section; or
- (e) the Directors deem it appropriate because of adverse political, economic, fiscal or regulatory changes affecting the relevant Portfolio or Class.

If the Depositary has given notice of its intention to retire and no new custodian acceptable to the Central Bank has been appointed within ninety (90) days of such notice, the Company shall apply to the Central Bank for revocation of its authorisation and shall redeem all of the Shares of any series or Class in issue.

In each such case, the Shares of the relevant Portfolio or Class shall be redeemed after giving not less than one month's but no more than three (3) months' prior notice to all holders of such Shares. The Shares will be redeemed at the Net Asset Value per Share on the relevant Dealing Day less such sums as the Company in its discretion may from time to time determine as an appropriate provision for Duties and Charges in relation to the estimated realisation costs of the assets of the relevant Portfolio and in relation to the redemption and cancellation of the Shares to be redeemed.

Unamortised establishment and organisational expenses shall be borne by the Company or Portfolio as applicable.

Any unclaimed termination proceeds of a Portfolio or a Class may be paid into court at the expiration of 12 months, or if impossible, impractical or the Company otherwise determines it to be inappropriate to do so (for whatever reason), may be paid to charity at the expiration of 3 years, from the date of termination, subject to the right of Depositary to deduct therefrom any expense that it may incur in making such payment. During such period as unclaimed termination proceeds are held on behalf of the Company, Shareholders who are entitled to the relevant part of the unclaimed termination proceeds may make a claim to the Company, the Manager or the Administrator for payment of its entitlement and will be paid upon provision of all required information and/or documents as required by the Company, the Manager and/or the Administrator.

MANAGEMENT AND ADMINISTRATION

THE DIRECTORS AND SECRETARY

The Directors are responsible for the overall management and control of the Company in accordance with the Articles. The Directors review the operations of the Company at their regular meetings. The Directors have appointed the Manager to provide the day to day management of the Company's business affairs and have for this purpose delegated certain of their duties and powers to the Manager. The Directors will receive periodic reports from the Manager detailing, inter alia, its review of the performance of the Company and the Portfolios and providing an analysis of their respective investment portfolios. The Manager will also provide such other information as may from time to time be reasonably required by the Directors for the purposes of such meetings. The Directors have appointed the Depositary in respect of the safekeeping of the Company's assets.

The Directors are listed below with their principal occupations. None of the Directors has entered into an employment or service contract with the Company nor is any such contract proposed. Consequently, the Directors are all non-executive Directors. The Company has granted indemnities to the Directors in respect of any loss or damages which they may suffer save where this results from the Directors' negligence, default, breach of duty or breach of trust in relation to the Company. The Articles do not stipulate a retirement age for Directors, nor do they provide for retirement of Directors by rotation. However, the Directors may be removed by the Shareholders by ordinary resolution in accordance with the procedures established under the Irish Companies Act 2014. The address of the Directors is the registered office of the Company.

Gráinne Alexander (resident in Ireland) is an independent non-executive director. A Fellow of the Society of Actuaries in Ireland, she has worked in the investment industry for over twenty years with experience as a senior executive in fund management, investment strategy, investment consultancy and company management. She was a European partner at Mercer Investment Consulting (involved in the establishment of Mercer's funds business) and following that, chief executive at F&C Management's Irish asset management firm, F&C Ireland. She was also a director of the Irish Association of Investment Managers and a director of Cayman listed funds. Gráinne is currently a non-executive director of a broad range of investment fund complexes with investment managers Goldman Sachs, Neuberger Berman and Mercer Europe. She received a Diploma in Company Direction from the Institute of Directors in 2013.

Tom Finlay (resident in Ireland) is a barrister by profession who worked for 26 years (February 1975 to May 2001) for Bank of Ireland Asset Management (the Fund Management division of the Bank of Ireland Group). His most recent role was head of Bank of Ireland Asset Management's Irish Business. In the early 1990's, Mr Finlay had a direct involvement in setting up Bank of Ireland Group's fund administration and custodial services to international clients. Over the last 19 years, Mr Finlay's main professional activity has been acting as an independent director on a number of Funds' and Management Company Boards. He also operates as an executive coach. Mr Finlay has a long-standing involvement with the Irish Association of Pension Funds (IAPF) being a Council Member from 1981-1986 and again from 1990-2001. He was Chairman of the Association from 1999-2001. Between 2001 and 2005, Mr Finlay was a member of the Irish Pension Board; In addition, he chaired their key Policy Committee.

Michelle Green (resident in the United Kingdom) joined Neuberger Berman in 2015. Michelle is General Counsel for Neuberger Berman EMEA and is responsible for the legal, compliance and operational risk functions across EMEA and LatAm. Prior to joining Neuberger Berman, Michelle was General Counsel and Chief Legal and Risk Officer for Hermes Investment Management for 17 years. Michelle began her career at the City law firm Druces LLP. Michelle graduated from Middlesex University with an LLB Honours degree in Law as well as the Maxwell Law Prize. Michelle subsequently continued her legal training at the College of Law in London. In 2017, Michelle was awarded an honorary doctorate from Middlesex University. For the last five years Michelle has served as a director of a number of Irish UCITS funds and QIAIFs and is presently a director of the Company, the Manager and Neuberger Berman Investment Funds II plc.

Naomi Daly (resident in Ireland) currently serves as a full time specialist independent director to a number of Irish domiciled investment funds. She has worked as an independent director and also as an employee and a senior executive of MPMF Fund Management (Ireland) Limited from 2013 to 2018. Prior to joining MPMF Fund Management (Ireland) Limited, Ms Daly spent 10 years with Goldman Sachs in London where she held a number of positions driving operational excellence in the hedge fund industry. From 2007- 2013, Ms Daly led the team responsible for growing the Goldman Sachs Managed Account Platform AUM across multiple jurisdictions (including Ireland, the Cayman Islands and Luxembourg). She was responsible for developing a product to facilitate investment by institutional investors into hedge funds via the Goldman Sachs Managed Account Platform. From 2003-2007, Ms Daly worked as part of the hedge fund consulting team in prime brokerage advising start-up hedge fund managers with launch and on-going operational support required to grow their businesses. Ms Daly was previously a business analyst at Allied Irish Bank in Dublin. Ms Daly holds a Bachelor of Arts Degree (Hons) in Business Studies and an MSc in International Business, from the U.C.D. Michael Smurfit Graduate School of Business.

Alex Duncan (resident in the United Kingdom) has held leadership positions in several asset management firms, most recently serving as chief operating officer at ESO Capital, a European private debt firm, as well as Ashmore and New Star. Alex has a BA in Economics from the University of Durham and is a Fellow of the Institute of Chartered Accountants

in England and Wales. He began his career in 1996 as an associate at Price Waterhouse.

Save for the information given in this document, no further information is required to be given in respect of the Directors pursuant to the listing requirements of Euronext Dublin, where relevant.

The Company Secretary is Matsack Trust Limited.

THE MANAGER

The Company has appointed Neuberger Berman Asset Management Ireland Limited to act as its management company pursuant to the Management Agreement. The Manager, subject to the overall responsibility and supervision of the Directors, is responsible for portfolio and risk management services, administrative services, marketing services and certain distribution services to the Company and the Portfolios and, more generally, is responsible for the day to day management of the business affairs of the Company. The Manager is the financial group promoting the Company.

The Manager is responsible for ensuring the Company's compliance with the UCITS Regulations, including the investment and reinvestment of each Portfolio's assets, having regard to the investment objective and policies of each Portfolio.

In accordance with the UCITS Regulations and with the prior approval of the Company, the Manager has delegated certain of its duties and powers, namely (a) the administration of the Company's affairs, including responsibility for the preparation and maintenance of the Company's records and accounts and related fund accounting matters (including the calculation of the Net Asset Value per Share) and Shareholder registration and transfer agency services to the Administrator; (b) the investment, management and disposal of some or all of the assets of each Portfolio to the Sub-Investment Managers; and (c) the marketing, distribution and sale of Shares of certain Portfolios to the Distributors, with the power to sub-delegate these responsibilities to such companies or persons as it may from time to time determine in accordance with the requirements of the Central Bank. Notwithstanding the foregoing, the Manager will also provide investment management and advisory services to certain Portfolios, as specified in the relevant Supplements.

The Manager is a private limited liability company, incorporated under registration number 629805 on 5 July 2018 under the laws of Ireland whose registered office is 32 Molesworth Street, Dublin 2, Ireland. The Manager is a subsidiary of Neuberger Berman Group LLC, a management controlled company. The Manager's main business includes provision of fund management services to collective investment schemes such as the Company. The Manager is authorised by the Central Bank to carry on the regulated activity of managing UCITS for the purposes of the UCITS Regulations. The company secretary of the Manager is MFD Secretaries Limited.

The directors of the Manager are:

James Harvey (UK resident)

James Harvey, Managing Director, joined Neuberger Berman Group LLC in 2016. James is Managing Director and Head of Finance for EMEA, LatAm & Asia (Asia Pacific and East Asia). Prior to joining the Firm, James was Head of Finance for Hermes Investment Management. Prior to this, he was at Morgan Stanley Investment Management and JP Morgan, serving in both Finance and Operational roles. He began his career at KPMG, holds a MA Honours in English Language and Literature from the University of St. Andrews and is a Fellow of the Institute of Chartered Accountants.

Michelle Green (UK resident)

Biographical details provided in the "*The Directors and Secretary*" section.

Dik van Lomwel (UK resident)

Dik van Lomwel, CFA, Managing Director, joined Neuberger Berman Group LLC in 1997. Dik is the Head of Neuberger Berman for EMEA and Latin America and is a member of the Neuberger Berman Group LLC's Partners and Operating Committees. Prior to this role, Dik ran Distribution for Europe and Middle East within the Investment Management Division of Lehman Brothers and prior to that held several sales management roles within its Equity Division. Previously, Dik worked at UBS and ABN AMRO Hoare Govett in Institutional Sales. Dik graduated from the University of Groningen with a Masters in Finance and attended the UCLA Graduate Summer School and has been awarded the Chartered Financial Analyst designation.

Grainne Alexander (Irish resident)

Biographical details provided in the "*The Directors and Secretary*" section above.

Mary Brady (Irish resident)

Mary M. Brady, Executive Director & Chief Executive Officer of the Manager, rejoined Neuberger Berman in 2019 and is responsible for overseeing the activities of the Manager and its branch offices. Previously, Mary spent 11 years at Neuberger Berman in the US from 2004 to 2015. As Managing Director, Institutional Client Coverage, Mary led Neuberger Berman's global institutional client service teams across the US, Europe and Asia with ultimate responsibility for servicing our institutional client base from 2008-2015. Mary came to Neuberger Berman in 2004 following its acquisition by Lehman Brothers and drove the consolidation of the Fixed Income asset management division within the broader Lehman Brothers and Neuberger Berman asset management platform, with particular focus on client management activities. Prior to joining Neuberger Berman, Mary spent 10 years with J.P. Morgan Administration Services (Ireland) Limited, joining in 1994 early in the emergence of the Dublin funds industry, first in a number of Fund Accounting roles and later building out the Administrator's Client Service capabilities. Mary was awarded a Bachelor of Business Studies with First Class Honours from the Institute of Public Administration in 1998.

John O'Callaghan (Irish resident)

John O'Callaghan, Managing Director, joined Neuberger Berman Group LLC in 2020. John O'Callaghan has over 20 years' experience in the financial services industry. John transferred back to Ireland from the US in 2019 where he had been based in Boston working for a number of asset management firms including Fidelity, GMO, Oechsle and Putnam, mostly in client coverage roles focused on Multi Asset Class solutions. John started his career at Bank of Ireland in Dublin as a Portfolio Manager. John has a combination of Portfolio Management and Client Coverage skills. John holds a B.A.I., M.A., Computer Engineering from Trinity College and is a CFA Charter Holder.

Pursuant to the Management Agreement, the Manager has been appointed as the manager to the Company. The Manager will be entitled to receive fees as described in each Supplement and in the "Fees and Expenses" section. The Management Agreement may be terminated by either party on giving not less than ninety (90) days' prior written notice to the other party. The Management Agreement may also be terminated forthwith by either party giving notice in writing to the other party upon certain breaches as outlined in the Management Agreement or upon the insolvency of a party (or upon the happening of a like event).

The Manager (or any of its directors, officers, employees or agents) shall not be liable to the Company or any Shareholder or otherwise for any loss or damage suffered by the Company or any such Shareholder arising directly or indirectly out of or in connection with the performance of its obligations and duties under the Management Agreement unless such loss or damage arose out of or in connection with the negligence, wilful default, fraud or bad faith of or by the Manager (or any of its directors, officers, employees or agents) in the performance of its duties under the Management Agreement. The Company has agreed to indemnify the Manager and the directors, officers, employees, delegates and agents of the Manager, out of the assets of the relevant Portfolio, from and against any and all actions, proceedings, claims, demands, losses, damages, costs and expenses (including reasonable legal and professional fees and expenses arising therefrom or incidental thereto) which may be made or brought against or directly or indirectly suffered or incurred by the Manager (or any of its directors, officers, employees, delegates or agents) arising out of or in connection with the performance of its obligations and duties under the Management Agreement in the absence of any negligence, wilful default, fraud or bad faith of or by the Manager (or any of its directors, officers, employees, delegates or agents) in the performance of its duties under the Management Agreement or as otherwise may be required by law.

THE MANAGER – REMUNERATION

The Manager is subject to remuneration policies, procedures and practices (together, the "Remuneration Policy"). The Remuneration Policy is consistent with and promotes sound and effective risk management. It is designed not to encourage risk-taking which is inconsistent with the risk profile of the Portfolios. The Remuneration Policy is in line with the business strategy, objectives, values and interests of the Manager and includes measures to avoid conflicts of interest. The Remuneration Policy applies to staff whose professional activities have a material impact on the risk profile of the Manager and ensures that no individual will be involved in determining or approving their own remuneration. The Remuneration Policy will be reviewed annually.

Details of the Manager's remuneration policy are available at <http://www.nb.com/remuneration> and a paper copy is also available free of charge upon request.

THE SUB-INVESTMENT MANAGERS

Pursuant to an amended and restated investment management and distribution agreement between the Manager and Neuberger Berman Europe Limited dated 30 June 2021, Neuberger Berman Europe Limited has been appointed as a sub-investment manager, advisor and distributor to, inter alia, provide (i) investment management and advisory services to certain Portfolios as specified in the relevant Supplements; and (ii) market and promote the sale and distribution of Shares.

Pursuant to an amended and restated investment management and distribution agreement between the Manager and Neuberger Berman Asia Limited dated 30 June 2021, Neuberger Berman Asia Limited has been appointed as a sub-investment manager, advisor and distributor to, inter alia, provide (i) investment management and advisory services to certain Portfolios as specified in the relevant Supplements; and (ii) market and promote the sale and distribution of Shares.

Pursuant to an amended and restated investment management and distribution agreement between the Manager and Neuberger Berman Singapore Pte. Limited dated 30 June 2021, Neuberger Berman Singapore Pte. Limited has been appointed as a sub-investment manager, advisor and distributor to, inter alia, provide (i) investment management and advisory services to certain Portfolios as specified in the relevant Supplements; and (ii) market and promote the sale and distribution of Shares.

Pursuant to an amended and restated investment management agreement between the Manager and Neuberger Berman Investment Advisers LLC dated 30 June 2021, Neuberger Berman Investment Advisers LLC has been appointed as a sub-investment manager to provide investment management and advisory services to certain Portfolios as specified in the relevant Supplements.

Pursuant to an amended and restated investment management agreement between the Manager and Neuberger Berman Canada ULC dated 30 June 2021, Neuberger Berman Canada ULC has been appointed as a sub-investment manager to provide investment management and advisory services to certain Portfolios as specified in the relevant Supplements.

Pursuant to an amended and restated investment management agreement between the Manager and Neuberger Berman East Asia Limited dated 30 June 2021, Neuberger Berman East Asia Limited has been appointed as a sub-investment manager to provide investment management and advisory services to certain Portfolios as specified in the relevant Supplements.

Pursuant to an amended and restated investment management agreement between the Manager and NB Alternatives Advisers LLC dated 30 June 2021, NB Alternatives Advisers LLC has been appointed as a sub-investment manager to provide investment management and advisory services to certain Portfolios as specified in the relevant Supplements.

Pursuant to an investment management agreement between Neuberger Berman Europe Limited and Green Court Capital Management Limited dated 28 April 2017 (as novated to the Manager by way of a novation agreement between Green Court Capital Management Limited, Neuberger Berman Europe Limited and the Manager dated 30 June 2021), Green Court Capital Management Limited has been appointed as a sub-investment manager to provide investment management and advisory services to certain Portfolios as specified in the relevant Supplements.

Neuberger Berman Europe Limited, Neuberger Berman Investment Advisers LLC, Neuberger Berman Asia Limited, Neuberger Berman Singapore Pte. Limited, Neuberger Berman Canada ULC and NB Alternatives Advisers LLC are registered as Investment Advisers with the Securities and Exchange Commission in the United States and are wholly-owned indirect subsidiaries of Neuberger Berman Group LLC. Neuberger Berman Europe Limited is authorised and regulated by the FCA in the UK to conduct designated investment business.

Neuberger Berman Asia Limited is regulated by the Securities and Futures Commission of Hong Kong, Neuberger Berman Singapore Pte. Limited is regulated by the Monetary Authority of Singapore and Neuberger Berman East Asia Limited is regulated by the Japanese Financial Services Agency.

As noted above, the Manager will also provide investment management and advisory services to certain Portfolios as specified in the relevant Supplements.

The agreements between the Manager and the Sub-Investment Managers described above are referred to in this section as the "Sub-Investment Management Agreements".

Sub-Investment Management Agreements with Neuberger Berman Europe Limited, Neuberger Berman Investment Advisers LLC, Neuberger Berman Asia Limited, Neuberger Berman Singapore Pte. Limited, Neuberger Berman East Asia Limited, NB Alternatives Advisers LLC, Green Court Capital Management Limited and Neuberger Berman Canada ULC

Under the above Sub-Investment Management Agreements, none of the Sub-Investment Managers or any of their directors, officers, employees or agents shall be liable for any loss or damage arising directly or indirectly out of or in connection with the performance by the Sub-Investment Managers (and their directors, officers, employees and agents) of their obligations and duties unless such loss or damage arises out of or in connection with the negligence, wilful default, fraud or bad faith of or by the Sub-Investment Managers (or any of their directors, officers, employees or agents) in the performance of their duties thereunder, and in no circumstances shall the Sub-Investment Managers or their directors, officers, employees or agents be liable for special, indirect or consequential damages, or for lost profits or loss of

business, arising out of the performance of their duties, or the exercise their powers. In addition, the Manager has agreed to indemnify and keep indemnified (out of the assets of the relevant Portfolio) and hold harmless the Sub-Investment Managers (and each of their directors, officers, employees, delegates and agents) from and against any and all actions, proceedings, claims, liabilities, demands, losses, damages, costs and expenses (including legal and professional fees and expenses arising therefrom or incidental thereto) which may be made or brought against or directly or indirectly suffered or incurred by the Sub-Investment Managers (or any of their directors, officers, employees or agents) arising out of or in connection with the performance of their obligations and duties thereunder in the absence of any negligence, wilful default, fraud or bad faith of or by the Sub-Investment Managers (or any of their directors, officers, employees, delegates or agents) in the performance of their duties thereunder or as otherwise may be required by law.

The Sub-Investment Management Agreements shall continue in force until terminated by either the Manager or the relevant Sub-Investment Manager at any time upon ninety (90) days' prior notice in writing to the other party or until terminated by either the Manager or the relevant Sub-Investment Manager forthwith by notice in writing to the other party in certain circumstances as specified in the Sub-Investment Management Agreements, and in the event that a Force Majeure Event (as defined in the Sub-Investment Management Agreements) continues for longer than fourteen (14) consecutive days or until otherwise terminated by either the Manager or the relevant Sub-Investment Manager in accordance with the terms of the Sub-Investment Management Agreements.

The Sub-Investment Managers may from time to time, with the prior approval of the Manager and the Central Bank, appoint sub-investment managers in respect of any particular Portfolio. Details of any such appointment may be obtained, on request, from the Manager and will be included in the periodic reports of the Company. The fees payable to such sub-investment manager(s) shall be met by the Sub-Investment Manager and shall not be payable by the Company.

Termination of appointment of the Manager, the Sub-Investment Managers or any other sub-investment manager at the initiative of the Shareholders

Shareholders representing 10% or more of the Net Asset Value of a Portfolio, may at any time serve notice on the Directors requiring them as soon as practical to convene an extraordinary general meeting of the Company and to include as an agenda item a proposal to terminate the appointment of the Manager, any Sub-Investment Manager or any other sub-investment manager (each referred to in this section as the "investment adviser") to act in respect of the relevant Portfolio. A Shareholder proposing to terminate the appointment of an investment adviser in this manner must request the Directors to select a replacement investment adviser for the relevant Portfolio.

In order to be approved, the proposal to terminate the appointment of the investment adviser must be passed by Shareholders representing more than 50% of the Net Asset Value of that proportion of the Net Asset Value of the relevant Portfolio not held by the incumbent investment adviser or any of its affiliates, save for any Shares held under a nominee arrangement, on the date of the general meeting. If the proposal is approved by the Shareholders of the relevant Portfolio, the Directors shall as soon as practical serve six (6) months' notice of termination on the investment adviser and direct that the Independent Directors use their reasonable endeavours to ensure that all necessary steps are taken in relation to the selection and/or appointment of the replacement investment adviser, including, without limitation, obtaining all necessary consents and approvals from the Central Bank and Euronext Dublin, where applicable. The Independent Directors, may, in following such direction from the Directors, in their absolute discretion appoint such advisers as they deem reasonable, with the costs of such appointments to be borne by the relevant Portfolio.

In the event that the Independent Directors, in their sole discretion, having used their reasonable endeavours, at any time believe that it will not be possible to finalise the appointment of a suitable new investment adviser before the termination of the agreement in respect of the incumbent investment adviser, they shall notify the Directors who shall serve not less than one (1) months' notice on all Shareholders of the relevant Portfolio of their intention to redeem all Shares in the Portfolio on or before the termination of the appointment of the incumbent investment adviser.

In the event that agreement on the terms of a new agreement is reached by the Independent Directors and the proposed new investment adviser, the Directors shall convene a general meeting of the Shareholders of the relevant Portfolio in order to consider a resolution to approve the terms of such new agreement. In order to be accepted, the terms of the new agreement must be approved by Shareholders representing more than 50% of the Net Asset Value of that proportion of the Net Asset Value of the relevant Portfolio not held by the incumbent investment adviser or any of its affiliates, save for any Shares held under a nominee arrangement on the date of the general meeting of the Shareholders. In the event that the Shareholders do not accept the terms of the new agreement, the Directors shall serve not less than one month's notice on all Shareholders of the relevant Portfolio of their intention to redeem all Shares in the Portfolio on or before the termination of the appointment of the incumbent investment adviser.

In the event that the appointment of the Manager and/or a Sub-Investment Manager is terminated as described above and a company which is not a related company is appointed in its place as the management company or a sub-investment manager, prior to or immediately following such termination becoming effective, the Directors may consider a proposal that the name of the Company and/or the relevant Portfolio be changed to remove the words "Neuberger Berman" from it.

THE ADMINISTRATOR AND REGISTRAR

The Manager has appointed Brown Brothers Harriman Fund Administration Services (Ireland) Limited to act as Administrator of the Company responsible for performing the day to day administration of the Company and for providing fund accounting for the Company, including the calculation of the Net Asset Value of the Company and the Shares, and for providing registrar, transfer agency and related support services to the Company.

The Administrator was incorporated with limited liability in Ireland on 29 March 1995 under registration number 231236.

The administration agreement shall continue in force until terminated by the Manager, the Company or the Administrator on ninety (90) days' notice in writing to the other parties or until terminated by the Manager, the Company or the Administrator in accordance with the terms of the administration agreement, which provide that the administration agreement may be terminated forthwith by any party giving notice in writing to the other parties if at any time: (i) any party shall go into liquidation (except for a voluntary liquidation for the purposes of reconstruction or amalgamation upon terms previously approved in writing by the non-defaulting party/parties) or a receiver or examiner is appointed to such party or upon the happening of a like event whether at the direction of an appropriate regulatory agency or court of competent jurisdiction or otherwise; or (ii) any party shall commit any breach of the provisions of the administration agreement which, if capable of remedy, shall not have been remedied within thirty (30) consecutive calendar days after the service of written notice requiring it to be remedied; or (iii) any party ceases to be permitted to act as in its current capacity under any applicable laws.

The Administrator shall use reasonable care in performing its duties hereunder, but shall not be held accountable or liable for any losses, damages or expenses to the Company or any Shareholder or former Shareholder, the Manager or any other person may suffer or incur arising from acts, omissions, errors or delays of the Administrator in the performance of its obligations and duties including, without limitation, any error of judgment or mistake of law, except a damage, loss or expense resulting from the Administrator's wilful malfeasance, bad faith, fraud, recklessness or negligence in the performance of such obligations and duties. In addition, the Manager and the Company have agreed (out of the assets of the relevant Portfolio) to indemnify the Administrator against and hold it harmless from any and all losses, claims, damages, liabilities or expenses (including reasonable counsel's fees and expenses) resulting from any act, omission, error or delay or any claim, demand, action or suit, in connection with or arising out of performance of its obligations and duties under the administration agreement, not resulting from the wilful malfeasance, bad faith, fraud, recklessness or negligence of the Administrator in the performance of such obligations and duties.

THE DEPOSITARY

The Company has appointed Brown Brothers Harriman Trustee Services (Ireland) Limited to act as Depositary for the safekeeping of all the investments, cash and other assets of the Company and to ensure that the issue and repurchase of Shares by the Company and the calculation of the Net Asset Value and Net Asset Value per Share is carried out and that all income received and investments made are in accordance with the Articles and the UCITS Regulations. In addition, the Depositary is obliged to enquire into the conduct of the Company in each financial year and report thereon to Shareholders. The Depositary is a private limited company incorporated under the laws of Ireland to provide custody and trustee services to Irish domiciled collective investment schemes and to international and Irish institutions.

Pursuant to the Depositary Agreement, the Depositary will provide safekeeping for the Company's assets in accordance with the UCITS Regulations and will collect any income arising on such assets on the Company's behalf. In addition, the Depositary has the following main duties, which may not be delegated:

- (i) ensuring that the sale, issue, repurchase, redemption and cancellation of Shares are carried out in accordance with the UCITS Regulations and the Articles;
- (ii) ensuring that the value of the Shares is calculated in accordance with the UCITS Regulations and the Articles;
- (iii) carrying out the instructions of the Company unless they conflict with the UCITS Regulations and the Articles;
- (iv) ensuring that in transactions involving the Company's assets or the assets of any Portfolio that any payment in respect of same is remitted to the relevant Portfolio within the usual time limits;
- (v) ensuring that the income of the Company or of any Portfolio is applied in accordance with the UCITS Regulations and the Articles;
- (vi) enquire into the conduct of the Company in each accounting period and report thereon to Shareholders; and
- (vii) ensure that the Company's cash flows are properly monitored in accordance with the UCITS Regulations.

The Depositary Agreement provides that the Depositary shall be liable to the Company and the Shareholders (i) in respect of a loss of a financial instrument held in its custody (or in the custody of any third party to whom the Depositary's safekeeping functions have been delegated in accordance with the UCITS Regulations) unless the Depositary can prove that the loss has arisen as a result of an external event beyond its reasonable control, the consequences of which would have been unavoidable despite all reasonable efforts to the contrary; and (ii) in respect of all other losses arising as a result of the Depositary's negligent or intentional failure to properly fulfil its obligations pursuant to the UCITS Regulations.

The Company has agreed to indemnify the Depositary against any losses (as defined in the Depositary Agreement) suffered by it in acting as the Company's depositary other than losses (as defined above) in respect of which the Depositary is found to be liable to the Company and/or the Shareholders in accordance with the terms of the Depositary Agreement or applicable law.

The Depositary Agreement shall continue in force until terminated by any party thereto on 90 calendar days' advance written notice to the other party or immediately by written notice to the other party if (i) a receiver or examiner is appointed to such party or upon the happening of a like event whether at the direction of an appropriate regulatory agency or court of competent jurisdiction or otherwise; (ii) the other party shall commit any breach of the provisions of the Depositary Agreement which, if capable of remedy, shall not have been remedied within thirty (30) calendar days after the service of written notice requiring it to be remedied; or (iii) the Depositary ceases to be permitted to act as a depositary of collective investment schemes authorised by the Central Bank under Irish law.

If within 90 days from the date of the Depositary serving a termination notice, a replacement depositary acceptable to the Company and the Central Bank has not been appointed to act as depositary, the Company shall at the request of the Depositary serve notice on all Shareholders convening a general meeting of the Shareholders at which a resolution will be tabled to approve the redemption of all participating Shares in accordance with the provisions of the Articles and shall procure that, immediately following the redemption of such Shares, the Company be wound up. In the event of such redemption, the Depositary's appointment under the Depositary Agreement will not terminate until the authorisation of the Company has been revoked by the Central Bank.

The Depositary may delegate its safekeeping duties only in accordance with the UCITS Regulations and provided that: (i) the tasks are not delegated with the intention of avoiding the requirements of the UCITS Regulations; (ii) the Depositary can demonstrate that there is an objective reason for the delegation; and (iii) the Depositary has exercised all due, skill, care and diligence in the selection and appointment of any third party to whom it has delegated its safekeeping duties either wholly or in part and continues to exercise all due skill, care and diligence in the periodic review and ongoing monitoring of any such third party and of the arrangements of such third party in respect of the matters delegated to it. Any third party to whom the Depositary delegates its safekeeping functions in accordance with the UCITS Regulations may, in turn, sub-delegate those functions subject to the same requirements as apply to any delegation effected directly by the Depositary. The liability of the Depositary under the UCITS Regulations will not be affected by any delegation of its safekeeping functions.

The Depositary has delegated safekeeping of the Company's assets to Brown Brothers Harriman & Co., its global sub-custodian, through which it has access to BBH&Co.'s global network of sub-custodians. The entities to whom safekeeping of the Company's assets have been sub-delegated by Brown Brothers Harriman & Co. as at the date of this Prospectus are set out at Annex V. The Depositary does not anticipate that there would be any specific conflicts of interest arising as a result of any such delegation. The Depositary will notify the Directors of any such conflict should it so arise.

In accordance with the UCITS Regulations, the Depositary must not carry out activities with regard to the Company or the Manager that may create conflicts of interest between itself and (i) the Company; (ii) the Manager acting on behalf of the Company and/or (iii) the Shareholders unless it has separated the performance of its depositary tasks from its other potentially conflicting tasks in accordance with the UCITS Regulations and the potential conflicts are identified, managed, monitored and disclosed to Shareholders.

Up-to-date information in relation to the Depositary, its duties, the safe-keeping functions delegated by the Depositary, the list of delegates and sub-delegates to whom safe-keeping functions have been delegated and any relevant conflicts of interest that may arise will be made available to Shareholders upon request.

THE DISTRIBUTORS

The Manager has appointed Neuberger Berman Europe Limited to market and promote the sale and distribution of Shares pursuant to the amended and restated investment management and distribution agreement between the Manager and Neuberger Berman Europe Limited dated 30 June 2021.

The Manager has appointed Neuberger Berman Asia Limited to market and promote the sale and distribution of Shares pursuant to the amended and restated investment management and distribution agreement between the Manager and Neuberger Berman Asia Limited dated 30 June 2021.

The Manager has appointed Neuberger Berman Singapore Pte. Limited to market and promote the sale and distribution

of Shares pursuant to the amended and restated investment management and distribution agreement between the Manager and Neuberger Berman Singapore Pte. Limited dated 30 June 2021.

The Manager has appointed Neuberger Berman BD LLC to market and promote the sale and distribution of Shares pursuant to a distribution agreement between the Manager and Neuberger Berman BD LLC dated 30 June 2021.

The Manager has appointed Neuberger Berman Taiwan (SITE) Limited to act as master agent and distributor with respect to the offer and sale of certain Portfolios in the Republic of China pursuant to a master agent and distribution agreement dated 16 November 2012 as novated and amended by way of a novation and amendment agreement dated 30 June 2021.

The agreements between the Manager and the Distributors described above are referred to in this section as the "Distribution Agreements".

Distribution Agreements with Neuberger Berman Europe Limited, Neuberger Berman Asia Limited, Neuberger Berman Singapore Pte. Limited and Neuberger Berman BD LLC

Under the Distribution Agreements, none of the Distributors or any of their directors, officers, employees or agents shall be liable for any loss or damage arising directly or indirectly out of or in connection with the performance by the Distributors (or any of their directors, officers, employees or agents) of their obligations and duties unless such loss or damage arises out of or in connection with the negligence, wilful default, fraud or bad faith of or by the Distributors (or any of their directors, officers, employees or agents) in the performance of their duties thereunder, and in no circumstances shall the Distributors or their directors, officers, employees or agents be liable for special, indirect or consequential damages, or for lost profits or loss of business, arising out of the performance of their duties, or the exercise their powers. In addition, the Manager has agreed to indemnify and keep indemnified (out of the assets of the relevant Portfolio) and hold harmless the Distributors (and each of their directors, officers, employees, delegates and agents) from and against any and all actions, proceedings, claims, liabilities, demands, losses, damages, costs and expenses (including legal and professional fees and expenses arising therefrom or incidental thereto) which may be made or brought against or directly or indirectly suffered or incurred by the Distributors (or any of their directors, officers, employees, delegates or agents) arising out of or in connection with the performance of their obligations and duties thereunder in the absence of any negligence, wilful default, fraud or bad faith of or by the Distributors (or any of their directors, officers, employees, delegates or agents) in the performance of their duties thereunder or as otherwise may be required by law.

The Distribution Agreements shall continue in force until terminated by either the Manager or the relevant Distributor at any time upon ninety (90) days' prior notice in writing to the other party or until terminated by either the Manager or the relevant Distributor forthwith by notice in writing to the other party in certain circumstances as specified in the Distribution Agreements, and in the event that a Force Majeure Event (as defined in the Distribution Agreements) continues for longer than fourteen (14) consecutive days or until otherwise terminated by either the Manager or the relevant Distributor in accordance with the terms of the Distribution Agreements.

Distribution Agreement with Neuberger Berman Taiwan (SITE) Limited

Under the Distribution Agreement, the Distributor shall be liable for any loss, damages, expenses, liabilities, costs or claims resulting from its negligence, fraud, malice or wilful default in the performance or non-performance of its obligations thereunder.

The Distribution Agreement may be terminated by either the Manager or the Distributor by providing three (3) months written notice to the other party or until terminated by either party forthwith by notice in writing to the other party in certain circumstances as specified in the Distribution Agreement.

Pursuant to the Management Agreement, the Manager will also provide distribution services to certain Portfolios.

TAXATION

The following is primarily a summary of certain Irish tax consequences of the purchase, ownership and disposal of Shares by Shareholders. The summary does not purport to be a comprehensive description of all of the Irish tax considerations that may be relevant. The summary is based on Irish tax laws and the practice of the Irish Revenue Commissioners in effect on the date of this Prospectus (and is subject to any prospective or retroactive change). Potential investors in Shares should consult their own advisors as to the Irish or other tax consequences of the purchase, ownership and disposal of Shares. The summary relates only to the position of persons who are the absolute beneficial owners of Shares and may not apply to certain other classes of persons.

TAXATION OF THE COMPANY

The Company intends to conduct its affairs so that it is Irish tax resident. On the basis that the Company is Irish tax resident, the Company qualifies as an “investment undertaking” for Irish tax purposes and, consequently, is exempt from Irish corporation tax on its income and gains.

The Company may be obliged to account for Irish tax to the Irish Revenue Commissioners in certain circumstances, as described below. Explanations of the terms “resident” and “ordinarily resident” are set out at the end of this summary.

TAXATION OF NON-IRISH SHAREHOLDERS

Where a Shareholder is not resident (or ordinarily resident) in Ireland for Irish tax purposes, the Company will not deduct any Irish tax in respect of the Shareholder’s Shares once the declaration set out in the application form accompanying this Prospectus has been received by the Company confirming the Shareholder’s non-resident status. The declaration may be provided by an Intermediary who holds Shares on behalf of investors who are not resident (or ordinarily resident) in Ireland, provided that, to the best of the Intermediary’s knowledge, the investors are not resident (or ordinarily resident) in Ireland. An explanation of the term ‘Intermediary’ is set out at the end of this summary.

If this declaration is not received by the Company, the Company will in most cases deduct Irish tax (at a rate of 25% or 41% depending on the circumstances) in respect of distributions, redemptions, transfers and deemed disposal events relating to that Shareholder as if the Shareholder was not an Exempt Irish Investor (see below). The Company will also deduct Irish tax if the Company is in possession of any information which reasonably suggests that a Shareholder’s declaration is not (or is no longer) materially correct. A Shareholder will generally have no entitlement to recover such Irish tax, unless the Shareholder is a company and holds the Shares through an Irish branch and in certain other limited circumstances. The Company must be informed if a Shareholder becomes Irish tax resident.

The Company may, in limited cases, make payments without the deduction of Irish tax to an Intermediary who has not provided this declaration where that Intermediary held Shares in the Company before 12 December 2019. However, such Intermediary remains obliged to inform the Company if it becomes aware that any investor who is beneficially entitled to the Shares held by the Intermediary may be resident or ordinarily resident in Ireland for Irish tax purposes. The Company will be obliged to deduct Irish tax if the Intermediary so informs the Company.

Generally, Shareholders who are not Irish tax resident will have no other Irish tax liability with respect to their Shares. However, if a Shareholder is a company which holds its Shares through an Irish branch or agency, the Shareholder may be liable to Irish corporation tax in respect of profits and gains arising in respect of the Shares (on a self-assessment basis).

TAXATION OF EXEMPT IRISH SHAREHOLDERS

Where a Shareholder is an Exempt Irish Investor, the Company will not deduct Irish tax in respect of the Shareholder’s Shares once the declaration set out in the application form accompanying this Prospectus has been received by the Company confirming the Shareholder’s exempt status.

Exempt Irish Investors who claim exempt status will be obliged to account for any Irish tax due in respect of Shares on a self-assessment basis.

If this declaration is not received by the Company in respect of a Shareholder, the Company will deduct Irish tax in respect of the Shareholder’s Shares as if the Shareholder was a non-exempt Irish resident Shareholder (see below). A Shareholder will generally have no entitlement to recover such Irish tax, unless the Shareholder is a company within the charge to Irish corporation tax and in certain other limited circumstances.

TAXATION OF OTHER IRISH SHAREHOLDERS

Where a Shareholder is resident (or ordinarily resident) in Ireland for Irish tax purposes and is not an Exempt Irish

Investor, the Company will deduct Irish tax on distributions, redemptions and transfers and, additionally, on 'eighth anniversary' events, as described below.

Distributions by the Company

If the Company pays a distribution to a non-exempt Irish resident Shareholder, the Company will deduct Irish tax from the distribution. The amount of Irish tax deducted will be:

1. 25% of the distribution, where the distributions are paid to a Shareholder who is a company which has made the appropriate declaration for the 25% rate to apply; and
2. 41% of the distribution, in all other cases.

The Company will pay this deducted tax to the Irish Revenue Commissioners.

Generally, a Shareholder will have no further Irish tax liability in respect of the distribution. However, if the Shareholder is a company for which the distribution is a trading receipt, the gross distribution (including the Irish tax deducted) will form part of its taxable income for self-assessment purposes and the Shareholder may set off the deducted tax against its corporation tax liability.

Redemptions and Transfers of Shares

If the Company redeems Shares held by a non-exempt Irish resident Shareholder, the Company will deduct Irish tax from the redemption payment made to the Shareholder. Similarly, if such an Irish resident Shareholder transfers (by sale or otherwise) an entitlement to Shares, the Company will account for Irish tax in respect of that transfer. The amount of Irish tax deducted or accounted for will be calculated by reference to the gain (if any) which has accrued to the Shareholder on the Shares being redeemed or transferred and will be equal to:

1. 25% of such gain, where the Shareholder is a company which has made the appropriate declaration for the 25% rate to apply; and
2. 41% of the gain, in all other cases.

The Company will pay this deducted tax to the Irish Revenue Commissioners. In the case of a transfer of Shares, to fund this Irish tax liability the Company may appropriate or cancel other Shares held by the Shareholder. This may result in further Irish tax becoming due.

Generally, a Shareholder will have no further Irish tax liability in respect of the redemption or transfer. However, if the Shareholder is a company for which the redemption or transfer payment is a trading receipt, the gross payment (including the Irish tax deducted) less the cost of acquiring the Shares will form part of its taxable income for self-assessment purposes and the Shareholder may set off the deducted tax against its corporation tax liability.

If Shares are not denominated in Euro, a Shareholder may be liable (on a self-assessment basis) to Irish capital gains taxation on any currency gain arising on the redemption or transfer of the Shares.

Eighth Anniversary' Events

If a non-exempt Irish resident Shareholder does not dispose of Shares within eight years of acquiring them, the Shareholder will be deemed for Irish tax purposes to have disposed of the Shares on the eighth anniversary of their acquisition (and any subsequent eighth anniversary). On such deemed disposal, the Company will account for Irish tax in respect of the increase in value (if any) of those Shares over that eight year period. The amount of Irish tax accounted for will be equal to:

1. 25% of such increase in value, where the Shareholder is a company which has made the appropriate declaration for the 25% rate to apply; and
2. 41% of the increase in value, in all other cases.

The Company will pay this tax to the Irish Revenue Commissioners. To fund the Irish tax liability, the Company may appropriate or cancel Shares held by the Shareholder.

However, if less than 10% of the Shares (by value) in the Company in the relevant Sub-Fund are held by non-exempt Irish resident Shareholders, the Company may elect not to account for Irish tax on this deemed disposal. To claim this election, the Company must:

1. confirm to the Irish Revenue Commissioners, on an annual basis, that this 10% requirement is satisfied and provide the Irish Revenue Commissioners with details of any non-exempt Irish resident Shareholders (including the value of their Shares and their Irish tax reference numbers); and
2. notify any non-exempt Irish resident Shareholders that the Company is electing to claim this exemption.

If the exemption is claimed by the Company, any non-exempt Irish resident Shareholders must pay to the Irish Revenue Commissioners on a self-assessment basis the Irish tax which would otherwise have been payable by the Company on the eighth anniversary (and any subsequent eighth anniversary).

Any Irish tax paid in respect of the increase in value of Shares over the eight year period may be set off on a proportionate basis against any future Irish tax which would otherwise be payable in respect of those Shares and any excess may be recovered on an ultimate disposal of the Shares.

Share Exchanges

Where a Shareholder exchanges Shares on arm's length terms for other Shares in the Company or for Shares in another Sub-Fund of the Company and no payment is received by the Shareholder, the Company will not deduct Irish tax in respect of the exchange.

STAMP DUTY

No Irish stamp duty (or other Irish transfer tax) will apply to the issue, transfer or redemption of Shares. If a Shareholder receives a distribution in specie of assets from the Company, a charge to Irish stamp duty could potentially arise.

GIFT AND INHERITANCE TAX

Irish capital acquisitions tax (at a rate of 33%) could apply to gifts or inheritances of the Shares (irrespective of the residence or domicile of the donor or donee) because the Shares could be treated as Irish situate assets because they have been issued by an Irish company. However, any gift or inheritance of Shares will be exempt from Irish capital acquisitions tax once:

1. the Shares are comprised in the gift or inheritance both at the date of the gift or inheritance and at the 'valuation date' (as defined for Irish capital acquisitions tax purposes);
2. the person from whom the gift or inheritance is taken is neither domiciled nor ordinarily resident in Ireland at the date of the disposition; and
3. the person taking the gift or inheritance is neither domiciled nor ordinarily resident in Ireland at the date of the gift or inheritance.

MEANING OF TERMS

Meaning of 'Residence' for Companies

A company which has its central management and control in Ireland is tax resident in Ireland irrespective of where it is incorporated. A company which does not have its central management and control in Ireland but which was incorporated in Ireland on or after 1 January 2015 is tax resident in Ireland except where the company is regarded as not resident in Ireland under a double taxation treaty between Ireland and another country.

Until 1 January 2021, a company which does not have its central management and control in Ireland but which was incorporated before 1 January 2015 in Ireland is resident in Ireland except where:

1. the company (or a related company) carries on a trade in Ireland and either the company is ultimately controlled by persons resident in EU Member States or countries with which Ireland has a double tax treaty, or the company (or a related company) are quoted companies on a recognised stock exchange in the EU or in a tax treaty country; or
2. the company is regarded as not resident in Ireland under a double tax treaty between Ireland and another country.

Finally, until 1 January 2021 a company that was incorporated in Ireland before 1 January 2015 will also be regarded as resident in Ireland if the company is (i) managed and controlled in a territory with which a double taxation agreement with Ireland is in force (a 'relevant territory'), and such management and control would have been sufficient, if exercised in Ireland, to make the company Irish tax resident; and (ii) the company would have been tax resident in that relevant

territory under its laws had it been incorporated there; and (iii) the company would not otherwise be regarded by virtue of the law of any territory as resident in that territory for the purposes of tax.

Meaning of 'Residence' for Individuals

An individual will be regarded as being tax resident in Ireland for a calendar year if the individual:

1. spends 183 days or more in Ireland in that calendar year; or
2. has a combined presence of 280 days in Ireland, taking into account the number of days spent in Ireland in that calendar year together with the number of days spent in Ireland in the preceding year. Presence in Ireland by an individual of not more than 30 days in a calendar year will not be reckoned for the purposes of applying this 'two year' test.

An individual is treated as present in Ireland for a day if that individual is personally present in Ireland at any time during that day.

Meaning of 'Ordinary Residence' for Individuals

The term 'ordinary residence' (as distinct from 'residence') relates to a person's normal pattern of life and denotes residence in a place with some degree of continuity. An individual who has been resident in Ireland for three consecutive tax years becomes ordinarily resident with effect from the commencement of the fourth tax year. An individual who has been ordinarily resident in Ireland ceases to be ordinarily resident at the end of the third consecutive tax year in which the individual is not resident. For example, an individual who is resident and ordinarily resident in Ireland in 2020 and departs Ireland in that year will remain ordinarily resident in Ireland up to the end of the tax year in 2023.

Meaning of 'Intermediary'

An 'intermediary' means a person who:

1. carries on a business which consists of, or includes, the receipt of payments from a regulated investment undertaking resident in Ireland on behalf of other persons; or
2. holds units in such an investment undertaking on behalf of other persons.

OECD COMMON REPORTING STANDARD

The Council of the EU has adopted Directive 2014/107/EU, which amends Directive 2011/16/EU on administrative cooperation in the field of taxation. This 2014 Directive provides for the adoption of the regime known as the "Common Reporting Standard" proposed by the Organisation for Economic Co-operation and Development and has generalised the automatic exchange of information within the European Union with effect from 1 January 2016. Under these measures, the Company may be required to report information relating to Shareholders, including the identity and residence of Shareholders and income, sale or redemption proceeds received by Shareholders in respect of the Shares to the Irish Revenue. This information may then be shared with tax authorities in other EU Member States and other jurisdictions which have implemented the OECD Common Reporting Standard.

FATCA

The provisions commonly known as the Foreign Accounts Tax Compliance Act in the enactment of the United States of America known as Hiring Incentives to Restore Employment Act 2010 ("**FATCA**") represent an expansive information reporting regime enacted by the U.S. which is aimed at ensuring that U.S. persons with financial assets outside the U.S. are paying the correct amount of U.S. tax. FATCA will generally impose a withholding tax of up to 30% with respect to certain U.S. source income (including dividends and interest) and gross proceeds from the sale or other disposal of property that can produce U.S. source interest or dividends paid to a foreign financial institution ("**FFI**") unless the FFI complies with certain obligations including disclosure of certain information about U.S. investors to the US Internal Revenue Service ("**IRS**" or the "**Service**") and the imposition of withholding tax in the case of non-compliant investors. The Company is an FFI for the purpose of FATCA.

Ireland has an intergovernmental agreement with the United States of America (the "**IGA**") in relation to FATCA, of a type commonly known as a 'model 1' agreement. Ireland has also enacted regulations to introduce the provisions of the IGA into Irish law. The Company intends to carry on its business in such a way as to ensure that it is treated as complying with FATCA, pursuant to the terms of the IGA. The Company has registered with the IRS as a 'reporting financial institution' for FATCA purposes and will report information to the Irish Revenue Commissioners relating to Shareholders who, for FATCA purposes, are specified US persons, non-participating financial institutions or passive non-financial foreign entities that are controlled by specified US persons. Any information reported by the Company to the Irish

Revenue Commissioners will be communicated to the IRS pursuant to the IGA. It is possible that the Irish Revenue Commissioners may also communicate this information to other tax authorities pursuant to the terms of any applicable double tax treaty, intergovernmental agreement or exchange of information regime.

The Company should generally not be subject to the FATCA withholding tax of 30% in respect of its US source income for so long as it complies with its FATCA obligations. FATCA withholding tax should only arise on US source payments to the Company if the Company did not comply with its FATCA registration and reporting obligations and the IRS specifically identified the Company as being a 'non-participating financial institution' for FATCA purposes. Nevertheless, there is no guarantee that the Company will be absolutely free from future FATCA related direct or indirect withholding implications which may be borne by the Company and therefore adversely impact the Net Asset Value per Share of the respective Portfolio and the Company remains subject to other withholding taxes, including withholding taxes applicable to U.S. source income that exist outside of the FATCA regime. Any such US FATCA withholding tax would negatively impact the financial performance of the Company and all Shareholders may be adversely affected in such circumstances. In addition, in order to comply with its obligations under the IGA, the Company will generally be required to obtain proper documentation from each of its investors to establish such investor's tax status for FATCA purposes.

Shareholders should consult their own tax advisors regarding the possible implications of this legislation on their investments in a Portfolio.

FEES AND EXPENSES

MANAGEMENT AND DISTRIBUTION FEES

In respect of each Class, the Manager shall be entitled to a fee in respect of the management services provided by it to each Portfolio (the "**Management Fee**"). The Management Fee shall accrue daily and be payable monthly in arrears at the end of each calendar month. The Manager will pay any Sub-Investment Managers or investment advisers appointed in respect of a Portfolio out of its Management Fee, unless otherwise specified in the Supplement for the relevant Portfolio.

The maximum annual fee which the Company will be charged in respect of a Portfolio is 2.5% of its Net Asset Value, however the current Management Fee payable in respect of each Portfolio shall be disclosed in the relevant Supplement. Shareholder consent will be required and an extraordinary general meeting will be convened or a written resolution passed by all Shareholders if there is any increase beyond the maximum annual fee.

The Manager shall also be entitled to a fee in respect of the administrative support services it provides to the Company, further details of which are set out below under the "*Administration Fees*" section.

The Manager shall be entitled to recover from the Company all out-of-pocket expenses suffered or incurred by it (or its delegates) in the performance of its duties and shall pay any such expenses recovered to the appropriate service provider.

Where the Management Agreement is terminated prior to the end of a month, the Manager shall be entitled to the fees in respect of such services accrued up to the date of termination on a pro-rata basis.

In respect of the B Shares, C Shares, E Shares, C1 Shares and C2 Shares in each Portfolio, the Manager and/or the relevant Distributor shall be entitled to a distribution fee at the annual rate of 1% of the Net Asset Value of the relevant Classes in respect of the distribution services provided to such Classes, which shall accrue daily and be payable monthly in arrears at the end of each calendar month.

In respect of the M Shares in each Portfolio, the Manager and/or the relevant Distributor shall be entitled to a distribution fee at an annual rate expressed as a percentage of the Net Asset Value of the relevant Classes in respect of the distribution services provided to such Classes, which shall accrue daily and be payable monthly in arrears at the end of each calendar month. The rate of such distribution fee varies between Portfolios and is disclosed in the Supplement for each Portfolio.

In respect of all other Classes, the Manager may pay the Distributor a fee (which shall be at normal commercial rates), in respect of its distribution services, which shall also be payable out of the Management Fee.

Without prejudice to the above, the Manager and any Sub-Investment Manager or Distributor may from time to time and at their sole discretion and out of their own resources decide to waive, share or rebate to associated companies or to some or all Shareholders or to intermediaries, part or all of the management, investment management, performance and/or distribution fees. Rebates to Shareholders or intermediaries may be applied in paying up additional Shares to be issued to the Shareholder. Such Shares shall be issued to the Shareholders at their Net Asset Value.

Investment in other CIS

If a Portfolio invests in Shares in other collective investment schemes, the Portfolio will be liable as an investor in such collective investment schemes for its proportion of the fees of such collective investment schemes and investors may be subject to higher fees arising from the layered investment structure. The Portfolio will invest in collective investment schemes, which generally charge management fees of up to 2.5% of their net asset value. In addition to these fees, subscription and redemption fees of up to 3%, may apply to the Portfolio's investments in and redemptions from the collective investment schemes. On an exceptional basis, the Manager and/or the Sub-Investment Manager may decide to invest in collective investment schemes which apply higher fees.

However, where a Portfolio invests in other collective investment schemes (including Portfolios) which are managed directly or indirectly by the Manager, the Sub-Investment Manager or by any other company with which the Manager or the Sub-Investment Manager is linked by common management or control or by a substantial direct or indirect holding of more than 10% of the share capital or of the votes, (an "Affiliate"), or any person acting on behalf of the Company, the Manager, the Sub-Investment Manager or an Affiliate, the Manager, the Sub-Investment Manager or such Affiliate will not receive any quantifiable monetary benefits or charge any investment management fee or initial charge in respect of such investment and the Portfolio will not be charged any subscription, conversion or redemption fees on account of its investment in such collective investment schemes.

Performance Fees

The Manager and a Sub-Investment Manager may, for one or more Portfolios charge a performance fee. If applicable,

such performance fee will be set out in the relevant Supplement. In addition, investment advisers appointed in respect of a Portfolio may be entitled to receive a performance fee payable out of the Portfolio's assets, as described in the relevant Supplement.

Performance fees will be charged at the level of specific performance fee Classes, which will be labelled "PF".

CUSTODY FEES

The Company will pay the Depositary a fee in respect of the trustee services for each Portfolio which shall not exceed 0.02% per annum of the Net Asset Value of the relevant Portfolio and which will accrue monthly and be payable monthly in arrears. The Depositary will also be entitled to reimbursement by the Company out of the assets of the Portfolio for safekeeping fees, transaction charges and reasonable out-of-pocket expenses incurred for the benefit of the Portfolio including the fees (which will not exceed normal commercial rates) and reasonable out-of-pocket expenses of any sub-custodian appointed by the Depositary. The Company will also bear the cost of any value added tax applicable to any fees or other amounts payable to the Depositary in relation to the Company. At the date of this Prospectus it is not envisaged that any such value added tax shall be payable.

ADMINISTRATION FEES

The Company will pay Administration Fees which shall not exceed 0.20% per annum of the Net Asset Value of the relevant Portfolio. The Administration Fee shall comprise of a fee payable to the Administrator in respect of the administration services which it provides for each Portfolio and a fee payable to the Manager in respect of the administrative support services which it provides for each Portfolio and will accrue monthly and be payable monthly in arrears. The administrative support services which the Manager include, among other things: (i) assisting in the preparation of all periodic reports by the Company to Shareholders; (ii) assisting in the preparation of all reports and filings required to maintain the registration and qualification of the Company and its Shares, or to meet other regulatory or tax requirements applicable to the Company; and (iii) compliance monitoring, operational and investment risk management, legal and administrative services and portfolio accounting services.

In addition to the fee payable out of the Administration Fee, the Administrator shall receive reimbursement for any other fees and expenses at normal commercial rates, including fees in respect of transfer agency, transaction processing fees and tax reclaim services and all out-of-pocket expenses reasonably and properly incurred by the Administrator in the performance of its duties.

EXCHANGE CHARGE

There is no charge payable to the Company for exchanging Shares in a Portfolio for Shares in any other Portfolio established by the Company, although investors should note that fees and other service charges in respect of exchanges of Shares may be payable to any intermediaries through whom they invest, as described below under the "*Sub-Distributor/Intermediary Charges*" section.

DUTIES AND CHARGES

In calculating the Net Asset Value per Share of a Portfolio in connection with any subscription application or redemption request, the Directors may on any Dealing Day when there are net subscriptions or redemptions adjust the Net Asset Value per Share by adding or deducting Duties and Charges to cover dealing costs and to act as an anti-dilution levy to preserve the value of the underlying assets of the relevant Portfolio. Any such Duties and Charges will account for actual expenditure on the purchase of the purchase or sale of the assets of the Portfolio and will be retained for the benefit of the Portfolio. The Directors reserves the right to waive such charge at any time.

Where Swing Pricing is adopted in respect of a Portfolio on a Dealing Day, as described in the "Determination of Net Asset Value" section, no other Duties and Charges will be applied in respect of subscriptions to or redemptions from the relevant Portfolio.

CONTINGENT DEFERRED SALES CHARGE

Contingent deferred sales charges will be payable in respect of the following Classes at the rates specified below, unless otherwise specified in the relevant Supplement, depending on the period that has elapsed since the issue of the Shares being redeemed and will be charged on the lower of the Net Asset Value per Share on the relevant Dealing Day in respect of which the relevant Shares were (i) initially subscribed or (ii) redeemed. Any such contingent deferred sales charges will be paid to the relevant Distributor, the Manager or the relevant Sub-Investment Manager:

Class	Redemption Period in Calendar Days				
	< 365	365 - 729	730 - 1094	1095 – 1459	> 1459
B	4%	3%	2%	1%	0%
E	3%	2%	1%	0%	0%
C2	2%	1%	0%	0%	0%
C, C1	1%	0%	0%	0%	0%

ESTABLISHMENT AND ORGANISATIONAL EXPENSES

The Company's organisational expenses have been amortised.

Each Portfolio's establishment and organisational expenses (including expenses relating to the negotiation and preparation of the contracts to which it is a party, the costs of preparing and printing the Prospectus and related marketing materials, the costs of obtaining a listing on Euronext Dublin, where applicable, and the fees and expenses of its professional advisors), which will be payable out of the assets of the Portfolio, are estimated not to have exceeded US\$100,000. These expenses will be amortised over the first three (3) annual accounting periods of each Portfolio or such other period as may be determined by the Directors.

MISCELLANEOUS FEES, COSTS AND EXPENSES

The Company and the Portfolios will also pay certain other costs, charges, fees and expenses incurred in its operation, including without limitation fees and expenses incurred in relation to banking (including the costs associated with the provision and accessing of any credit facilities) and brokerage in respect of the purchase and sale of Portfolio securities, taxes, insurance, the costs and expenses of maintaining its books of account and of preparing, printing, publishing and distributing (in such languages as may be necessary) prospectuses, supplements, annual and semi-annual reports and other documents or information to current and prospective Shareholders, the expense of publishing price and yield information, in relevant media, the costs and expenses of obtaining authorisations or registrations of the Company or of any Shares with the regulatory authorities in various jurisdictions, including any levy applied by the Central Bank, the cost of listing and maintaining a listing of Shares on any stock exchange, the cost of convening and holding Directors and Shareholders meetings, the costs of exercising voting rights attached to the Company's investments in the best interests of the Shareholders, professional fees and expenses for legal, auditing and other consulting services, any and all expenses arising in respect of the termination or liquidation of the Company and such other costs and expenses (including non-recurring and extraordinary costs and expenses) as may arise from time to time and which have been approved by the Directors as necessary or appropriate for the continued operation of the Company or of any Portfolio. In connection with the registration of the Company or the Shares for sale in certain jurisdictions, the Company may pay the fees and expenses of paying agents, information agents and/or correspondent banks, such payments to be made at normal commercial rates.

The Manager will directly pay for all research which it consumes, regardless of where the research originates. Sub-Investment Managers that are located outside the EU, which do not send any research that they receive into the EU, may charge research expenses to the relevant Portfolio through the provision of an annual research budget for each Portfolio.

The Directors shall be entitled to a fee as remuneration for their services at a rate to be determined from time to time by the Directors, provided that in accordance with the restrictions set out in this respect in the Articles, the amount of remuneration payable to any Director in any one year in respect of the Company shall not exceed €75,000 (or €85,000, in the case of the chairperson of the Company) or such other amount as the Directors may from time to time determine and disclose to the Shareholders in the latest annual or semi-annual report. The Directors, and any alternate Directors, shall also be entitled to be paid all travelling, hotel and other expenses properly incurred by them in attending Directors or Shareholders meetings or any other meetings in connection with the business of the Company. None of the Directors have entered into a service contract with the Company nor is any such contract proposed and none of the Directors is an executive of the Company. The Directors who are also employees of Neuberger Berman Europe Limited will receive a nil fee for their services as directors of the Company.

The expenses of each Portfolio of the Company are deducted from the total income of such Portfolio before dividends are paid. Expenses of the Company which are not directly attributable to the operation of a particular Portfolio are allocated among all Portfolios in a manner determined by the Directors. Expenses of the Company which are not directly attributable to a specific Class and which are directly attributable to a specific Portfolio are allocated among all Classes of such Portfolio in a manner determined by the Directors acting fairly and equitably. In such cases, the expenses will normally be allocated among all Classes of such Portfolio pro-rata to the value of the net assets of the Portfolio which are attributable to those Classes. Expenses of the Company which are directly attributable to a specific Class shall be allocated to that Class.

The Company shall also discharge any fees or expenses payable to any agent appointed in connection with the registration of the Company or any of the Portfolios in any jurisdiction, which fees shall be at normal commercial rates.

Where a Portfolio invests in a (proprietary) strategy managed by an affiliate of the Manager or a third party or in a

(proprietary) index, the Portfolio may be required to pay fees in respect of such strategies based on the value of assets under management in those strategies or exposure to such an index. An affiliate of the Manager or a third party may therefore benefit from any additional exposure taken to a strategy or index.

The Manager may also act as investment manager or adviser to parties other than the Company, including parties who are counterparties to OTC FDI entered into on behalf of a Portfolio, and may receive remuneration in respect of those services which will not be paid into the assets of the Portfolio. The Manager or, as the case may be, an affiliate may benefit from any exposure taken by a counterparty to OTC FDI seeking to hedge its exposure there under by investing in strategies or funds managed by either the Manager or an affiliate. Such fees will not be paid into the assets of the Portfolio.

The Manager and the Sub-Investment Manager will at all times have regard to their obligations to the Company and, in particular, but without limitation to their obligations to act in the best interests of the Shareholders, when undertaking any investments where conflicts of interest may arise and will endeavour to ensure that such conflicts are resolved fairly and, in particular, the Manager and the Sub-Investment Manager has agreed to act in a manner which it in good faith considers fair and equitable in allocating investment opportunities to the Portfolio.

SUB-DISTRIBUTOR / INTERMEDIARY CHARGES

Additional fees and other service charges in respect of subscriptions for, redemptions of and exchanges of Shares, may be payable by Shareholders or investors to intermediaries through whom they invest in such amount as they may agree with the relevant intermediaries and this may result in differing yields to different investors in relation to their Shares. Such fees and charges may include:

- (a) an initial sales charge of up to 5% in respect of all A Shares, P Shares and T Shares, up to 3% in respect of all U Shares and up to 2% in respect of all M Shares; and
- (b) an exchange fee of up to 1% in respect of exchanges by Shareholders into all A Shares, M Shares and P Shares (including exchanges into such Classes from within the same Portfolio). For the avoidance of doubt, Shareholders exchanging into such Classes and paying an exchange fee will not be subject to contingent deferred sales charges or initial sales charges in respect of such exchanges.

Any such fees or charges will not be payable to and will not directly benefit the Company and accordingly are not disclosed in this document or elsewhere by the Company. The initial sales charge and exchange fee may be shared between the intermediary and a Distributor.

The investor is advised to carefully consider these fees charged by the intermediary. The intermediary might be required to make appropriate disclosures to its clients (including, but not limited to, disclosure of any inducements and/or fees received or paid).

GENERAL**CONFLICTS OF INTEREST**

The Depositary, the Administrator, the Manager, the Sub-Investment Managers, the Directors, the Distributors and their affiliates (the "Interested Parties") may from time to time act as manager, registrar, administrator, trustee, custodian, investment manager, adviser, director, FDI counterparty or distributor in relation to, or be otherwise involved in, other funds or collective investment schemes which have similar investment objectives to those of the Company and/or in any of the Portfolios, or be otherwise involved in securities distribution, research and trading. It is, therefore, possible that any of them may, in the due course of their business, have potential conflicts of interests with the Company or any Portfolio, or a material interest or potential conflict of interest in services or transactions with or for the Company or any Portfolio. Each will at all times have regard in such event to its obligations under the Articles and/or any agreements to which it is party or by which it is bound in relation to the Company or any Portfolio and, in particular, but without limitation to its obligations to act in the best interests of the Shareholders so far as practicable, having regard to its obligations to other clients, when undertaking any investments where conflicts of interest may arise and will endeavour to ensure that such conflicts are resolved fairly and, in particular, the Manager has agreed to act in a manner which it in good faith considers fair and equitable in allocating investment opportunities to the Company.

While a conflict of interest may arise when the Manager simultaneously manages Portfolios that charge only management fees and Portfolios that charge both management fees and performance fees, in that a Portfolio with a performance fee will offer the potential for higher profitability when compared to a Portfolio with only a management fee, the Manager has appropriate policies and procedures in place to manage any such potential and actual conflicts of interest, including policies to ensure investment opportunities are allocated on a fair and equitable basis, and without regard to whether any performance fees are charged to a Portfolio.

The Interested Parties may invest in, directly or indirectly, or manage or advise other investment funds or accounts which invest in assets which may also be purchased or sold by the Company. Subject to applicable law, the Interested Parties may purchase or sell securities of, or otherwise invest in or finance, issuers in which the Company has an interest. The Interested Parties also may manage, advise or service other accounts or investment funds that have investment objectives similar or dissimilar to those of the Company and which engage in transactions in the same type of securities, currencies and instruments as the Company. Trading activities of the Interested Parties are carried out without reference to positions held directly or indirectly by the Company and may have an effect on the value of the positions so held or may result in the Interested Parties having an interest adverse to that of the Company. The Interested Parties are under no obligation to offer investment opportunities of which any of them becomes aware to the Company or to account to the Company in respect of (or share with the Company or inform the Company of) any such transaction or any benefit received by any of them from any such transaction, but will allocate any such opportunities on an equitable basis between the Company and other clients. As a result, the Interested Parties may compete with the Company for appropriate investment opportunities.

The Manager may have a conflict of interest when determining whether to invest or maintain Portfolio assets in registered collective investment schemes, managed by the Manager or an Affiliate (each an "Affiliated Underlying Fund"). The Manager seeks to mitigate this conflict by waiving or reimbursing any investment management, performance-based fees or similar fees charged by Affiliated Underlying Funds in respect of such investment or allocations. The Manager and its affiliates may derive indirect benefits such as increased assets under management from using Portfolio assets to invest in an Affiliated Underlying Fund, which benefits would not be present if investments were made in unaffiliated pooled investment vehicles.

In addition, while the above-referenced fees charged by the Affiliated Underlying Fund will be waived or reimbursed, the relevant Portfolio will be charged its pro-rata share of any other fees or expenses associated with such investment in accordance with the expense provisions set forth in each Affiliated Underlying Fund's governing documents and such fees or expenses may be paid to the Manager, an Affiliate or a third party.

In addition, investments by an Investing Portfolio in a Receiving Portfolio will not be charged management fees, investment management fees or performance fees by the Receiving Portfolio but will be charged the appropriate management fees, investment management fees and performance fees (if any) by the Investing Portfolio.

The Manager and its delegates will have no obligation to purchase, sell or exchange any investment for the Company which the Manager or its delegates may purchase, sell or exchange for the account of one or more of its other clients if the Manager and its delegates believe in good faith at the time the investment decision is made that such transaction or investment would be unsuitable, impractical or undesirable for the Company. As a general policy, investment opportunities will be allocated among those accounts for which participation in the respective opportunity is considered appropriate pro rata based on the relative capital size of the accounts. In addition, the Manager and its delegates may also take into consideration such other factors as the investment programs of the accounts, tax consequences, legal or regulatory restrictions, the relative historical participation of an account in the investment, the difficulty of liquidating an investment for more than one account, new accounts with a substantial amount of investable cash and such other factors considered relevant. Such considerations

may result in allocations among the Company and one or more other clients on other than a *pari passu* basis (which could result in different performance among them).

The Manager or its delegates or affiliates may manage the assets (“Discretionary Assets”) of one or more pooled investment vehicles or separate accounts that provide the Manager or its delegates or affiliates with discretion to allocate such Discretionary Assets among various investment strategies through separate accounts or other pooled investment vehicles managed by the Manager or its delegates or affiliates (including the Company). In these instances, the Manager or its delegates or affiliates will, from time to time, exercise full discretion to determine the investment strategies to which Discretionary Assets should be allocated and the amount of each such allocation, subject to any applicable investment guidelines. In addition to making an initial allocation among strategies, the Manager or its delegates or affiliates are typically vested with discretion to rebalance, adjust or make different allocations for Discretionary Assets from time to time, solely in their discretion, as market conditions or the needs of owners of Discretionary Assets dictate. Therefore, Discretionary Assets invested in the Company or in funds that invest in the Company, if applicable, will generally be directed by the Manager or its delegates or affiliates and the Manager or its delegates or affiliates could effect a redemption or other adjustment of such investment. The Manager has no duty or responsibility to inform or advise any Shareholder to undertake the same or similar action with respect to its own investments. To the extent that the Manager or its delegates or affiliates determines to cause certain Discretionary Assets to redeem from the Company or another fund that invests in the Company, if applicable, each Shareholder will bear its pro rata share of any transaction costs associated with the sale of the Company’s assets to meet such redemption and may experience increased Company expenses, especially in the event of a large redemption relative to the size of the Company. Each Shareholder is responsible for making its own decision as to the timing of any redemption it wishes to make.

The Manager and its officers and employees will devote as much of their time to the activities of the Company as they deem necessary and appropriate. The Manager and its delegates and affiliates are not restricted from forming additional investment funds, from entering into other investment advisory relationships or from engaging in other business activities, even though such activities may be in competition with the Company and/or may involve substantial time and resources. These activities could be viewed as creating a conflict of interest in that the time and effort of the Manager, its delegates and their officers and employees will not be devoted exclusively to the business of the Company but will be allocated between the business of the Company and such other activities. Future activities by the Manager and its delegates and affiliates, including the establishment of other investment funds, may give rise to additional conflicts of interest.

The relationship between the Manager and the Company is as described in the Management Agreement. Neither that relationship, nor the services the Company or Manager provides nor any other matter, will give rise to any fiduciary or equitable duties on the Company or Manager’s part or on the part of the Company or Manager’s affiliates which would prevent or hinder the Company, the Manager, or any of their affiliates in doing business under those agreements, acting as both market maker and broker, principal and agent or in doing business with or for affiliates, connected customers or other customers or investors and generally acting as provided in the agreements.

In providing services to the Company, neither, the Manager, any Sub-Investment Manager, nor their affiliates shall be obliged to disclose to the Company or take into consideration any information, fact, matter or thing if:

- (i) such information is held solely on the other side of a Chinese Wall from the individual making the decision or taking the step in question; and
- (ii) disclosure or use of such information would breach a duty or confidence to any other person or result in a breach of the law; and
- (iii) such information has not come to the actual notice of the individual making the decision or taking the step in question (whether or not such information comes to the notice of any officer, director, member, employee or agent of the Manager’s or any affiliate).

No further disclosure to, or consent from, the Company is required in relation to or as a result of any matter referred to above.

Where the competent person valuing unlisted securities is an Interested Party the fees payable by the Company which are based on Net Asset Value may increase as the value of the Company’s investments increase.

There is nothing to prevent the Directors or other Interested Parties from dealing as principal in the sale or purchase of assets to or from the Company, or to prevent the Depositary from acting as custodian and/or trustee in any other capacity for other clients, or from buying, holding and dealing in any assets for its own account or for the account of any client notwithstanding that similar or the same assets may be held or dealt in by or for the account of the Company. The Depositary shall not be deemed to be affected by notice of, or to be under any duty to disclose to the Company, information which has come into its or its associates’ possession as a result of any such arrangements. Neither the Depositary nor any of its associates shall be liable to account to the Company for any profits or benefits made or derived by or in connection with any such transaction. However, any such transactions must be carried out as if effected on normal commercial terms negotiated

at arm's length and consistent with the best interest of Shareholders. Transactions will be deemed to have been effected on normal commercial terms negotiated at arm's length if: (a) a certified valuation of the transaction by a person approved by the Depositary as independent and competent is obtained; (b) execution of the transaction is on best terms on organised investment exchanges in accordance with the rules of the exchange; or (c) where (a) and (b) are not practical, the transaction is executed on terms which the Depositary is satisfied (or, in the case of a transaction involving the Depositary, on terms which the Directors are satisfied) conform to the principle of execution on normal commercial terms negotiated at arm's length and in the best interest of Shareholders.

A Director may be a party to, or otherwise interested in, any transaction or arrangement with the Company or in which the Company is interested, provided that he has disclosed to the Directors prior to the conclusion of any such transaction or arrangement the nature and extent of any material interest of his therein. Unless the Directors determine otherwise, a Director may vote in respect of any contract or arrangement or any proposal whatsoever in which he has a material interest, having first disclosed such interest. With that exception, at the date of this Prospectus no Director or any connected person of any Director has any interest, beneficial or non-beneficial, in the share capital of the Company or any material interest in the Company or in any agreement or arrangement with the Company except that one or more of the Directors may hold Subscriber Shares. The Directors shall endeavour to ensure that any conflict of interest is resolved fairly.

Michelle Green is general counsel for EMEA and Latin America at Neuberger Berman. Alex Duncan is Director of Operations and Infrastructure for Neuberger Berman Europe Limited. Michelle Green and Grainne Alexander are both directors of the Manager.

In selecting brokers to make purchases and sales for the Company for the account of a Portfolio, the Manager will choose those brokers who have agreed to provide best execution to the Company. In this regard, best execution means taking all reasonable steps to obtain the best possible result for the Company, taking into account price, costs, speed, likelihood of execution and settlement, the size and nature of the order and any other considerations relevant to the execution of the order. In managing the assets of each Portfolio, the Manager may receive or purchase certain research and statistical and other information and assistance from brokers. The Manager may allocate brokerage business to brokers who have provided such research and assistance to the Company and/or other accounts for which the Manager exercises investment discretion provided that (i) the transaction execution is consistent with best execution standards (as described above) and brokerage rates are not in excess of customary institutional full-service brokerage rates; and (ii) the availability of soft commission arrangements is not the sole or primary purpose to perform or arrange transaction with such broker or dealer. The benefits provided under any soft commission arrangements must assist in the provision of investment services to the Company and be of demonstrable benefit to the Shareholders. The Manager shall notify the Company of any soft commission arrangements and these arrangements shall be disclosed in the periodic reports, including the annual audited accounts of the Company and in this Prospectus.

In circumstances where the Manager or any Sub-Investment Manager recaptures a portion of brokerage fees from a broker in relation to the purchase and/or sale of securities for a Portfolio, such rebate (less any reasonable properly vouched fees and expenses directly incurred by the Manager or the Sub-Investment Manager in arranging such rebate and agreed with the Company) must be paid into that Portfolio.

Neuberger Berman Investment Advisers LLC currently engages in soft commission arrangements on behalf of the Portfolios managed by it. Appropriate disclosure will be in the periodic reports.

From time to time, and in order to manage its balance sheet in an efficient manner, the Manager may hedge its investment in a Portfolio through the use of FDI or other instruments. Such hedging activity is designed to protect the Manager's investment in a Portfolio in the event that such Portfolio fails to achieve its investment objectives.

Material Non-Public Information

The Manager and its affiliates (collectively, the "Firm") have implemented policies and procedures, including certain information barriers within the Firm, reasonably designed to prevent the misuse of material information regarding issuers of securities that has not been publicly disseminated ("material non-public information") by the Firm and its personnel, in accordance with the requirements of the US Investment Advisers Act and other US federal securities laws. In general, under such policies and procedures and applicable law, when the Firm is in possession of material non-public information related to a publicly-traded security or the issuer of such security, whether acquired unintentionally or otherwise, neither the Firm nor its personnel are permitted to render investment advice as to, or otherwise trade or recommend a trade in, the securities of such issuer until such time as the information that the Firm has is no longer deemed to be material non-public information.

In the ordinary course of operations, however, certain businesses within the Firm may seek access to material non-public information. For instance, the Manager may utilise material non-public information in purchasing investments and from time to time, the Manager may be offered the opportunity on behalf of applicable clients to participate on a creditors' or other similar committee, which participation may provide access to material non-public information. The Firm maintains procedures that address the process by which material non-public information may be acquired intentionally by the Firm and shared between different businesses within the Firm. When considering whether to acquire or share material non-public

information, the Firm will attempt to balance the interests of all clients, taking into consideration relevant factors, including but not limited to, the extent of the prohibition on trading that may occur, the size of the Firm's existing position in the issuer, if any, and the value of the information as it relates to the investment decision-making process. The intentional acquisition of material non-public information may give rise to a potential conflict of interest since the Firm may be prohibited from rendering investment advice to clients regarding the public securities of such issuer and thereby potentially limiting the universe of public securities that the Manager on behalf of the Company, may purchase or potentially limiting the ability of the Firm, including the Company, to sell such securities. Similarly, where the Firm declines access to (or otherwise does not receive or share within the Firm) material non-public information regarding an issuer, the Manager may base its investment decisions for its clients, including the Company, with respect to the securities of such issuer solely on public information, thereby limiting the amount of information available to the Manager in connection with such investment decisions. In determining whether or not to elect to receive material non-public information, the Firm will endeavour to act fairly to its clients as a whole. The Firm reserves the right to decline access to material non-public information, including declining to join a creditors' or similar committee.

MiFID Implementation

Where the Manager executes an order on the Company's behalf and when placing an order with, or passing an order to, other entities, the Manager will do so in accordance with its order execution policy, as may be amended from time to time.

The Manager's Conflict of Interest Policy

In accordance with the current Central Bank's requirements and the requirements of the SEC as applicable, the Manager has in place arrangements to manage conflicts of interest between itself and its clients and between different clients. The Manager will operate in accordance with a conflicts of interest policy. Where the Manager does not consider that the arrangements under its conflicts of interest policy are sufficient to manage a particular conflict, it will inform the Company of the nature of the conflict so that it can decide how to proceed.

MEETINGS

At least one general meeting of the Company shall be held in each year as the Company's annual general meeting. At least twenty one (21) days' notice (inclusive of the day on which the notice is served or deemed to be served and of the day for which the notice is given) shall be given to Shareholders. The notice shall specify the place, day and hour of the meeting and the terms of the resolutions to be proposed. A proxy may attend on behalf of any Shareholder. The voting rights attached to the Shares are set out under the heading "Voting Rights" in this Prospectus.

REPORTS AND ACCOUNTS

The Directors shall cause to be prepared an annual report and audited annual accounts for the Company and each Portfolio for the period ending 31 December in each year. These will be forwarded to Shareholders and the Companies Announcements Office of Euronext Dublin, where applicable, within four months of the end of the relevant accounting period end and at least twenty one (21) days before the annual general meeting. In addition, the Directors shall cause to be prepared a half-yearly report which shall include unaudited half-yearly accounts for the Company and each Portfolio. Half-yearly accounts for each Portfolio will be forwarded to Shareholders in the relevant Portfolio and the Companies Announcements Office of Euronext Dublin, where applicable, within two months of the end of the relevant accounting period. The annual report and the half-yearly report will be sent to Shareholders by electronic mail or other electronic means of communication, although Shareholders may also, on request, receive reports by hard copy mail. The Manager will give the Shareholders at least one month's prior notice in the event of any change in the mode of distributing the annual report and audited annual accounts, and half-yearly report and unaudited half-yearly accounts, of the Company.

WINDING UP

The Articles contain provisions to the following effect:

- (a) If the Company shall be wound up the liquidator shall apply the assets of the Company in such manner and order as he thinks fit in satisfaction of creditors' claims.
- (b) The assets available for distribution among the Shareholders shall then be applied in the following priority:
 - (i) First, in the payment to the holders of the Shares or Class of each series of a sum in the currency in which that series or Class is designated (or in any other currency selected by the liquidator) as nearly as possible equal (at a rate of exchange determined by the liquidator) to the Net Asset Value of the Shares of such series or Class held by such holders respectively as at the date of commencement to wind up provided that there are sufficient assets available in the relevant Portfolio to enable such payment in full to be made. In the event that there are insufficient assets as aforesaid, to enable such

payment in full to be made, no recourse shall be had to any of the assets comprised within any of the Portfolios.

- (ii) Secondly, in the payment to the holders of the Subscriber Shares of sums up to the nominal amount paid thereon out of the assets of the Company not comprised within any Portfolios remaining after any recourse thereto under sub-paragraph (i) above. In the event that there are insufficient assets as aforesaid to enable such payment in full to be made, no recourse shall be had to the assets comprised within any of the Portfolios.
 - (iii) Thirdly, in the payment to the holders of each series or Class of any balance then remaining in the relevant Portfolio, such payment being made in proportion to the number of Shares of that series held.
 - (iv) Fourthly, in the payment to the holders of the Shares of any balance then remaining and not comprised within any of the Portfolios, such payment being made in proportion to the number of Shares held.
- (c) If the Company shall be wound up (whether the liquidation is voluntary, under supervision or by the Court) the liquidator may, with the authority of a special resolution and any other sanction required by the Irish Companies Act 2014, divide among the Shareholders in specie the whole or any part of the assets of the Company, and whether or not the assets shall consist of property of a single kind, and may for such purposes set such value as he deems fair upon any one or more class or classes of property, and may determine how such division shall be carried out as between the Shareholders or different classes of Shareholders. Shareholders may request that assets which are to be distributed to them in specie will be first liquidated to cash. The liquidator may, with the like authority, vest any part of the assets in trustees upon such trusts for the benefit of Shareholders as the liquidator, with the like authority, shall think fit, and the liquidation of the Company may be closed and the Company dissolved, but so that no Shareholder shall be compelled to accept any assets in respect of which there is liability.

MATERIAL CONTRACTS

The following contracts, which are summarised in the “*Management and Administration*” and “*Fees and Expenses*” sections in this Prospectus, have been entered into and are, or may be, material:

- (a) Management Agreement dated 30 June 2021 between the Company and the Manager;
- (b) Amended and restated administration agreement dated 30 June 2021 between the Company, the Manager and the Administrator pursuant to which the Administrator has been appointed to provide administration, accounting and Shareholder registration and transfer agency services to the Company;
- (c) Depositary agreement dated 12 October 2016 between the Company and the Depositary pursuant to which the Depositary has been appointed as custodian of the Company’s assets;
- (d) Amended and restated investment management and distribution agreement dated 30 June 2021 between the Manager and Neuberger Berman Europe Limited, pursuant to which Neuberger Berman Europe Limited has been appointed to provide (i) investment management and advisory services to certain Portfolios as specified in the relevant Supplements; and (ii) market and promote the sale and distribution of Shares;
- (e) Amended and restated investment management and distribution agreement dated 30 June 2021 between the Manager and Neuberger Berman Singapore Pte. Limited pursuant to which Neuberger Berman Singapore Pte. Limited has been appointed to provide (i) investment management and advisory services to certain Portfolios as specified in the relevant Supplements; and (ii) market and promote the sale and distribution of Shares;
- (f) Amended and restated investment management and distribution agreement dated 30 June 2021 between the Manager and Neuberger Berman Asia Limited, pursuant to which Neuberger Berman Asia Limited has been appointed to provide (i) investment management and advisory services to certain Portfolios as specified in the relevant Supplements; and (ii) market and promote the sale and distribution of Shares;
- (g) Amended and restated investment management agreement dated 30 June 2021 between the Manager and Neuberger Berman Canada ULC, pursuant to which Neuberger Berman Canada ULC has been appointed to provide investment management and advisory services to certain Portfolios;
- (h) Amended and restated investment management agreement dated 30 June 2021 between the Manager and Neuberger Berman East Asia Limited, pursuant to which Neuberger Berman East Asia Limited has been appointed to provide investment management and advisory services to certain Portfolios;
- (i) Amended and restated investment management agreement dated 30 June 2021 between the Manager and NB

Alternatives Advisers LLC, pursuant to which NB Alternatives Advisers LLC has been appointed to provide investment management and advisory services to certain Portfolios;

- (j) Amended and restated investment management agreement dated 30 June 2021 between the Manager and Neuberger Berman Investment Advisers LLC, pursuant to which Neuberger Berman Investment Advisers LLC has been appointed to provide investment management and advisory services to certain Portfolios;
- (k) Investment management agreement dated 28 April 2017 between Neuberger Berman Europe Limited and Green Court Capital Management Limited (as novated to the Manager by way of a novation agreement between Green Court Capital Management Limited, Neuberger Berman Europe Limited and the Manager dated 30 June 2021), pursuant to which Green Court Capital Management Limited has been appointed to provide investment management and advisory services to certain Portfolios;
- (l) Distribution agreement dated 30 June 2021 between the Manager and Neuberger Berman BD LLC, pursuant to which Neuberger Berman BD LLC has been appointed to market and promote the sale and distribution of Shares; and
- (m) Master agent and distribution agreement dated 16 November 2012 as novated and amended and restated by way of a novation agreement dated 30 June 2021, pursuant to which Neuberger Berman Taiwan (SITE) Limited has been appointed to act as master agent with respect to the offer and sale of certain Portfolios in the Republic of China.

DOCUMENTS FOR INSPECTION

Copies of the following documents may be inspected at the registered office of the Administrator during normal business hours on any Dealing Day:

- (a) the material contracts referred to above;
- (b) the Memorandum and Articles of Association of the Company;
- (c) the UCITS Regulations and the Central Bank Regulations issued pursuant thereto;
- (d) a list of all directorships and partnerships held by each of the Directors at any time in the previous 5 years; and
- (e) the most recent audited financial statements for the Company.

In addition, the annual audited financial statements for the Company will be sent to shareholders and prospective investors on request. The Memorandum and Articles of Association of the Company and any yearly or half-yearly reports may also be obtained from the Administrator free of charge or may be inspected at the registered office of the Administrator during normal business hours on any Dealing Day.

DEFINITIONS

In this Prospectus the following words and phrases shall have the meanings indicated below:

Accumulating Classes	any Class in respect of which the Directors have determined to accumulate all net investment income and net realised capital gains attributable to such Classes and in respect of which it is not intended to declare dividends;
Administrator	Brown Brothers Harriman Fund Administration Services (Ireland) Limited, or such other company in Ireland as may from time to time be appointed to provide administration, accounting, registration and transfer agency and related support services to the Company;
Articles	the articles of association of the Company for the time being in force and as may be modified from time to time;
A Shares	Shares which have been issued in any Class which the Directors have designated and labelled as an "A" Class;
Associate	<ol style="list-style-type: none"> 1. any person who is a director, officer, employee, servant or agent of the Manager or a person connected to any director of the Company within the meaning of Section 22 of the Companies Act 2014; 2. any company which is related to the Manager within the meaning of Section 559 of the Companies Act 2014 or which would be so related if it was incorporated in Ireland; 3. any person or body of persons or any company, partnership, consortium, joint venture, related or affiliated to or controlled or managed by the Manager or by any person or group of persons connected to any director of the Manager within the meaning of Section 220 of the Companies Act 2014 or by any company which is related to the Manager within the meaning of Section 599 of the Companies Act 2014 or which would be so related if it was incorporated in Ireland;
AUD	the lawful currency of the Australia;
Base Currency	the currency in which the Net Asset Value of each Portfolio is calculated, as specified in the relevant Supplement;
Benchmarks Regulation	Regulation (EU) 2016/1011 of the European Parliament and of the Council of 8 June 2016 on indices used as benchmarks in financial instruments and financial contracts or to measure the performance of investment funds (and amending Directives 2008/48/EC and 2014/17/EU and Regulation (EU) No 596/2014);

EU Member State	a member state of the EU;
Eurozone	the EU Member States which have adopted the Euro as their national currency;
Exempt Irish Investor	any of the following Irish Residents: <ul style="list-style-type: none"> (i) a qualifying management company or a specified company as referred to in Section 739B; (ii) a company carrying on life business within the meaning of Section 706 TCA; (iii) a pension scheme as referred to in Section 739B; (iv) any other investment undertaking as referred to in Section 739B; (v) a special investment scheme as referred to in Section 739B; (vi) a unit trust of a type referred to in Section 739D(6)(e) TCA; (vii) an investment limited partnership as referred to in Section 739J TCA; (viii) a person who is entitled to exemption from income tax or corporation tax by virtue of Section 207(1)(b) TCA; (ix) a person who is entitled to exemption from income tax and capital gains tax by virtue of Section 784A(2) TCA or 848E TCA in circumstances where the Shares held are assets of an approved retirement fund, an approved minimum retirement fund or a special savings incentive account; (x) a person entitled to exemption from income tax and capital gains tax by virtue of Section 787I TCA and the shares he owns are assets of a PRSA (within the meaning of Chapter 2A of Part 30 TCA); (xi) a credit union as referred to in Section 739B; (xii) the Courts Service as referred to in Section 739B; (xiii) a qualifying company within the meaning of Section 110 TCA as referred to in Section 739D(6)(m) TCA; (xiv) the National Treasury Management Agency; (xv) the National Asset Management Agency; and (xvi) the Motor Insurers' Bureau of Ireland in respect of an investment made by it of moneys paid to the Motor Insurers Insolvency Compensation Fund under the Insurance Act 1964 (amended by the Insurance (Amendment) Act 2018).
FCA	the Financial Conduct Authority of the United Kingdom;
FDI	financial derivative instruments, as such term is used in the UCITS Regulations;

F Shares	Shares which have been issued in any Class which the Directors have designated and labelled as an “F” Class;
GBP	the lawful currency of the United Kingdom;
Global Exposure	refers to the measure of a Portfolio risk exposure that factors in the market risk exposure of underlying investments, inclusive of the implied leverage associated with financial derivative instruments held in the portfolio. Under the UCITS Regulations, a Portfolio is required to use either a “Commitment Approach” or a “Value-at-Risk (VaR) Approach” to measure their Global Exposure (see separate definitions for these terms);
Gross Income Distributing Class	any Distributing Class in respect of which the Directors intend to declare dividends out of Net Income and capital on a quarterly basis, with the intention that the amounts distributed will equal the gross income attributable to the Class, in accordance with the Articles and as specified in the “ <i>Distribution Policy</i> ” section;
(Monthly) Gross Income Distributing Class	any Class in respect of which the Directors intend to declare dividends out of Net Income and capital on a monthly basis, with the intention that the amounts distributed will equal the gross income attributable to the Class in accordance with the Articles and as specified in the “ <i>Distribution Policy</i> ” section;
Hedged Class	a Class which is denominated in a currency other than the Base Currency of the Portfolio, and in respect of which the Manager or the Sub-Investment Manager employ techniques and instruments with a view to protecting against fluctuations between the class currency of the relevant Class and the Base Currency of its Portfolio;
HKD	the lawful currency of Hong Kong;
HKSCC	Hong Kong Securities Clearing Company Limited;
ILS	the lawful currency of Israel;
Independent Director	any Director who is not also an employee of the Manager or its Associates;
Initial Offer Period	in respect of each Portfolio, the period specified in the relevant Supplement, or such earlier or later time as the Directors may determine at their discretion and notify to the Central Bank and to subscribers;
Initial Offer Price	in respect of each Class, the price specified in the relevant Supplement as may be amended by the Directors from time to time;
Intermediary	a person who carries on a business which consists of, or includes, the receipt of payments from an investment undertaking on behalf of other persons or holds shares in an investment undertaking on behalf of other persons;
Irish Resident	any company resident or other person resident or ordinarily resident, in the Republic of Ireland for the purposes of Irish tax. Please see the “ <i>Taxation</i> ” section for the summary of the concepts of residence and ordinary residence issued by the Irish Revenue Commissioners;
Irish Revenue Commissioners	the Irish authority responsible for taxation;
I Shares	Shares which have been issued in any Class which the Directors have designated and labelled as an “I” Class;
I2 Shares	Shares which have been issued in any Class which the Directors have designated and labelled as an “I2” Class;
I3 Shares	Shares which have been issued in any Class which the Directors have designated and labelled as an “I3” Class;

I4 Shares	Shares which have been issued in any Class which the Directors have designated and labelled as an “I4” Class;
I5 Shares	Shares which have been issued in any Class which the Directors have designated and labelled as an “I5” Class;
JPY	the lawful currency of Japan;
Management Agreement	the management agreement dated 30 June 2021 between the Company and the Manager, as may be amended, supplemented or modified from time to time;
Manager	Neuberger Berman Asset Management Ireland Limited or any successor thereto duly appointed with the prior approval of the Central Bank;
M Shares	Shares which have been issued in any Class which the Directors have designated and labelled as an “M” Class;
MiFID	the Directive 2014/65/EU on markets in financial instruments (as may be amended from time to time);
Minimum Initial Subscription	in respect of each Portfolio, the minimum initial subscription amount required for investment in a Class, as specified in Annex II to this Prospectus;
Minimum Holding	in respect of each Portfolio, the minimum holding required for investment in a Class, as specified in Annex II to this Prospectus;
Money Market Funds Regulation	Regulation (EU) 2017/1131 of the European Parliament and of the Council as amended or supplemented from time to time, including any delegated acts adopted thereunder and any implementing rules or conditions that may from time to time be imposed thereunder by the Central Bank or ESMA;
(Monthly) Distributing Class	any Class in respect of which the Directors intend to declare dividends out of Net Income and capital on a monthly basis in accordance with the Articles and as specified in the “ <i>Distribution Policy</i> ” section;
Net Asset Value	the net asset value of a Portfolio calculated as described in the “ <i>Determination of Net Asset Value</i> ” section of this Prospectus;
Net Asset Value Calculation Time	such time in respect of a Portfolio as shall be specified in the relevant Supplement, or such other time as the Directors may determine in respect of a Portfolio and notify to the Administrator and to Shareholders in advance, provided always that shall be after the relevant Valuation Point;
Net Asset Value per Share	in relation to any Portfolio, the Net Asset Value divided by the number of Shares in the relevant Portfolio in issue or deemed to be in issue in respect of that Portfolio on the relevant Dealing Day and, in relation to any Class, subject to such adjustments, if any, as may be required in relation to such Class;
Neuberger Berman	Neuberger Berman Group LLC and its subsidiaries as such context requires;
NOK	the lawful currency of Norway;
NZD	the lawful currency of New Zealand;
OECD	the Organisation for Economic Co-Operation and Development;
OTC	“over-the-counter”;
PF Classes	any Class in respect of which the Directors intend to charge a performance fee in accordance with the Articles and as specified in the “ <i>Fees and Expenses</i> ” section and the relevant Supplement;

Portfolio	a portfolio of assets established by the Directors (with the prior approval of the Depositary and the Central Bank) and constituting a separate fund represented by a separate series of Shares and invested in accordance with the investment objective and policies applicable to such Portfolio as specified in the relevant Supplement;
primarily	each time that the word “primarily” is used in the description of the investment objectives and policies of a Portfolio, it means that at least two thirds of the assets of the relevant Portfolio are directly invested in the currency, the country, the type of security or other material element described in the name of the Portfolio;
Prospectus	this document and any Supplement or addendum designed to be read and construed together with and to form part of this document;
P Shares	Shares which have been issued in any Class which the Directors have designated and labelled as a “P” Class;
Privacy Statement	the data privacy statement adopted by the Company and the Manager (as may be amended from time to time), the current version of which is available at the following link: http://www.nb.com/privacystatement
Recognised Rating Agency	Standard & Poor’s Ratings Group (“S&P”), Moody’s Investors Services (“Moody’s”), Fitch IBCA or an equivalent rating agency as the Directors may from time to time determine;
Recognised Market	any recognised exchange or market listed or referred to in Annex I to this Prospectus and in such other markets as Directors may from time to time determine in accordance with the UCITS Regulations and specify in Annex I to this Prospectus;
Relevant Institution	(a) a credit institution authorised in the EEA (EU Member States, Norway, Iceland, Liechtenstein); (b) a credit institution authorised within a signatory state (other than an EEA Member State) to the Basle Capital Convergence Agreement of July 1988 (Switzerland, Canada, Japan, United States); or (c) a credit institution authorised in Jersey, Guernsey, the Isle of Man, Australia or New Zealand;
Relevant Jurisdictions	one or more of Austria, Belgium, Bulgaria, Croatia, Cyprus, Czech Republic, Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Latvia, Liechtenstein, Lithuania, Luxembourg, Malta, the Netherlands, Norway Poland, Portugal, Romania, Slovakia, Slovenia, Spain, Sweden and the United Kingdom;
RMP Statement	the Company’s risk management process statement, a copy of which has been submitted to and cleared by the Central Bank;
Section 739B	Section 739B of TCA;
SEHK	The Stock Exchange of Hong Kong Limited;
SEK	the lawful currency of Sweden;
series	a series of Shares which may be further sub-divided into Classes;
SFDR	Regulation (EU) 2019/2088 of the European Parliament and of the Council of 27 November 2019 on sustainability-related disclosures in the financial services sector;
SGD	the lawful currency of Singapore;
Share or Shares	a share or shares of whatsoever series or Class in the capital of the Company (other than Subscriber Shares) entitling the holders to participate in the profits of the Company attributable to the relevant Portfolio as described in this Prospectus;
Shareholder	a person registered in the share register of the Company as a holder of Shares;
SSE	the Shanghai Stock Exchange;
Stock Connects	the Shanghai Stock Connect and Shenzhen Stock Connect;

Sub-Investment Manager	Neuberger Berman Europe Limited, Neuberger Berman Canada ULC, Neuberger Berman East Asia Limited, NB Alternatives Advisers LLC, Neuberger Berman Investment Advisers LLC, Neuberger Berman Singapore Pte. Limited, Neuberger Berman Asia Limited, Green Court Capital Management Limited or such other firm or company as may be from time to time appointed, with the prior approval of the Central Bank, as a sub-investment manager as specified in the relevant Supplement;
Subscriber Shares	the issued share capital of 2 subscriber shares of no par value issued at one EUR each and initially designated as "Subscriber Shares" but which do not entitle the holders to participate in the profits of the Company attributable to any Portfolio;
Subscriber Shareholder	a person/persons registered in the register of members of the Company as a holder or holders of Subscriber Shares;
Sum of Notional	measures the expected level of leverage in a Portfolio by calculating the absolute sum of market risk exposure of the underlying securities in the relevant Portfolio, where the calculation of derivatives instruments exposure is converted, per the UCITS rules, into the market value of an equivalent position in the underlying asset of that derivative. This methodology does not i) make a distinction between financial derivative instruments that are used for investment, efficient portfolio management or hedging purposes; ii) allow the netting of derivative positions. As a result, derivative roll-overs (such as FX forwards) and strategies relying on a combination of long and short positions may disclose a significant level of leverage which might not necessarily reflect the risk profile of the Portfolio; or iii) take into account any other risk characteristics of the derivatives or assets;
Supplement	a supplement in respect of any Portfolio or group of Portfolios and any addendum thereto designed to be read and construed together with and to form part of this document;
Sustainability Factors	environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters;
Sustainable Investment	(1) an investment in an economic activity that contributes to an environmental objective, as measured by key resource efficiency indicators on (i) the use of energy, (ii) renewable energy, (iii) raw materials, (iv) water and land, (v) on the production of waste, (vi) greenhouse gas emissions, or (vii) its impact on biodiversity and the circular economy, or (2) an investment in an economic activity that contributes to a social objective (in particular an investment that contributes to tackling inequality or that fosters social cohesion, social integration and labour relations), or (3) an investment in human capital or economically or socially disadvantaged communities, provided that such investments do not significantly harm any of those objectives and that the investee companies follow good governance practices;
Sustainability Risks	environmental, social or governance event or condition that, if it occurs, could cause an actual or a potential material negative impact on the value of an investment, including but not limited to, risks stemming from climate change, natural resource depletion, environmental degradation, human rights abuses, bribery, corruption and social and employee matters;
SZSE	the Shenzhen Stock Exchange;
TARGET	the Trans-European Automated Real-time Gross settlement Express Transfer system for the Euro, offered by the Eurosystem;
Taxonomy Regulation	Regulation EU/2020/852 of the European Parliament and of the Council of 18 June 2020 on the establishment of a framework to facilitate sustainable investment and amending SFDR, as may be supplemented, consolidated, substituted in any form or otherwise modified from time to time;
TCA	the Taxes Consolidation Act 1997;
T Shares	Shares which have been issued in any Class which the Directors have designated and labelled as a "T" Class;
UCITS	an undertaking for collective investment in transferable securities within the meaning of the UCITS Regulations;

UCITS Regulations	the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations 2011 (S.I. 352 of 2011) (as amended) and all applicable Central Bank Regulations or notices made or conditions imposed or derogations granted thereunder by the Central Bank;
Unhedged Classes	a Class which is denominated in a currency other than the Base Currency of the Portfolio and in respect of which the Manager or the Sub-Investment Manager do not employ techniques and instruments to protect against fluctuations between the class currency of the relevant Class and the Base Currency of its Portfolio;
U Shares	Shares which have been issued in any Class which the Directors have designated and labelled as a "U" Class;
US Investment Advisers Act	US Investment Advisers Act of 1940, as amended;
US or United States	the United States of America, its territories and possessions including the States and the District of Columbia;
US\$, USD or US Dollars	the lawful currency of the United States of America;
VaR	represents an approach for measuring risk or "Global Exposure" based on Value-at-Risk or VaR, which is a measure of the maximum potential loss of a Portfolio that can arise at a given confidence level over a specific time period under normal market conditions. Depending on which VaR approach is suitable for a Portfolio, VaR may be expressed in absolute terms as a percentage of the Portfolio assets or in relative terms, where the VaR of the Portfolio is divided by the VaR of its relevant benchmark, generating a ratio known as relative VaR. Under the UCITS Regulations, VaR is measured at 99% level of confidence over 1 month horizon.
Valuation Point	<p>means with respect to:</p> <ul style="list-style-type: none"> (i) transferable securities and listed FDI, such time on a Business Day which reflects the close of business on the markets relevant to such assets and liabilities; (ii) collective investment schemes, the time of publication of the NAV by the relevant collective investment scheme; and (iii) OTC FDI and portfolio management techniques, the close of business of the relevant Business Day; <p>or such other time as the Directors may determine in respect of a Portfolio from time to time and notify to Shareholders.</p> <p>For the avoidance of doubt, the time at which the Net Asset Value is determined will always be after the Dealing Deadline;</p>
(Weekly) Distributing Class	any Class in respect of which the Directors intend to declare dividends out of Net Income and capital on a weekly basis in accordance with the Articles and as specified in the " <i>Distribution Policy</i> " section;
Y Shares	Shares which have been issued in any Class which the Directors have designated and labelled as a "Y" Class
ZAR	the lawful currency of South Africa;
Z Shares	Shares which have been issued in any Class which the Directors have designated and labelled as a "Z" Class;
1933 Act	the US Securities Act of 1933, as amended; and
1940 Act	the US Investment Company Act of 1940, as amended.

ANNEX I RECOGNISED MARKETS

ANNEX II SHARE CLASS INFORMATION

CLASSES

Shares are available in each Portfolio in the A, B, C, C1, C2, D, E, I, I2, I3, I4, I5, M, P, T, U, X, Y and Z Classes (the “Categories”).

Unless otherwise disclosed in the relevant Supplement, Shares are available in each Portfolio in each Category in Hedged Classes and Unhedged Classes denominated in the following currencies: AUD, BRL, CAD, CHF, CLP, CNY, DKK, EUR, GBP, HKD, ILS, JPY, NOK, NZD, SEK, SGD and ZAR and in USD-denominated Classes.

Shares in each Category and currency are available in each Portfolio as Accumulating Classes, Distributing Classes and (Monthly) Distributing Classes. Where disclosed in the relevant Supplement, a Portfolio may also offer (Weekly) Distributing Classes, (CG) Distributing Classes, Gross Income Distributing Classes, (Monthly) Gross Income Distributing Classes, quarterly or annual Distributing Classes.

Details of any other Classes available in a particular Portfolio (e.g. PF Classes) will be included in the relevant Supplement.

Subject to any transitional period or other arrangement with Shareholders in the relevant Classes at the date of this Prospectus, Shares in the Category B, C2 and E Classes will automatically convert into Shares in the corresponding T Class upon the expiry of four years (Category B Classes), two years (Category C2 Classes) and three years (Category E Classes) from the date of the initial subscription into the relevant B, C2 or E Class.

Category I Class Shares are intended for use by institutions such as pension funds, corporates and official institutions. Category I Class Shares may also be utilised by distributors that are restricted either due to regulatory constraints or due to the nature of the individual fee arrangements with their clients, or meet such other requirements as may be determined by the Directors or by the Manager. In such circumstances no trail will be paid to any sales partners and the minimum investment amounts may be waived for investments made by a distributor on behalf of their clients.

Category I2, I3, I4, I5 and P Class Shares are intended for use by institutions such as pension funds, corporates and official institutions. Category I2, I3, I4, I5 and P Class Shares may also be utilised by distributors that are restricted either due to regulatory constraints or due to the nature of the individual fee arrangements with their clients, or meet such other requirements as may be determined by the Directors or the Manager. In such circumstances no trail will be paid to any sales partners and the minimum investment amounts may be waived for investments made by a distributor on behalf of their clients. Investment into these Classes is subject to approval by the Directors and execution of a separate agreement between the investor and the Manager or a Sub-Investment Manager.

Shares in the X and Y Classes may only be acquired by investors that meet the minimum investment limits and such other requirements as may be determined by the Directors. Investment into these Classes are subject to the execution of a separate agreement between the investor and the Manager or a Sub-Investment Managers or a Distributor.

Shares in the Category Z Classes may only be acquired by investors which enter into a separate agreement with the Manager or the Company or a Sub-Investment Manager or a Distributor.

MINIMUM INITIAL SUBSCRIPTION AND MINIMUM HOLDING AMOUNTS

Shares in each Portfolio will be subject to the following minimum initial subscription and minimum holding amounts:

Category	Currency	Minimum Initial Subscription Amount	Minimum Holding Amount
A, B, C, C1, C2, E, M and T	AUD	1,000	1,000
	BRL	2,500	2,500
	CAD	1,000	1,000
	CHF	1,000	1,000

ANNEX III OTHER IMPORTANT INFORMATION FOR INVESTORS

ARGENTINA

The Shares of the Portfolios offered herein have not been submitted to the Comisión Nacional de Valores (“CNV”) for approval. Accordingly, the Shares may not be offered or sold to the public in Argentina. This prospectus (and any information contained herein) may not be used or supplied to the public in connection with any public offer or sale of Shares in Argentina.

AUSTRALIA

This Prospectus and any other document or material in connection with the offer or sale, or invitation for subscription or purchase, of Shares may not be circulated or distributed, nor may Shares be offered or sold, or be made the subject of an invitation for subscription or purchase, whether directly or indirectly, to the public or any member of the public in Australia or to Australian domiciled persons except where such persons are “wholesale investors” as defined in section 761G of the Corporations Act 2001 (Cth) and where disclosure would not be required under Chapter 6D or Part 7.9 of the Corporations Act 2001 (Cth).

AUSTRIA

By virtue of its registration with the Finanzmarktaufsicht (“FMA”), the Company is authorised to sell Shares in certain Portfolios to investors in Austria.

This information must be read in conjunction with the Prospectus, the Key Investor Information Documents, the most recent annual report and, if published thereafter, the most recent semi-annual report of the Company. Material amendments to the Prospectus, the Key Investor Information Documents and the Articles will be filed with the FMA.

Paying Agent in Austria

The Manager has appointed Erste Bank der oesterreichischen Sparkassen AG (the “Paying Agent”) to act as the paying agent and tax representative for the Manager in respect to the Company in Austria. The Paying Agent has agreed to provide the following from their office at AM Belvedere 1, 1100 Wien, Austria to the Company’s investors:

- (i) facilities, in accordance with Article 92 of Directive (EU) 2019/1160, at which subscriptions and redemption requests for Shares can be submitted to the Paying Agent. Upon request, redemption proceeds, distributions or any other payments to the Shareholder may be paid via the Paying Agent; and
- (ii) this Prospectus (together with any addenda thereto), the Memorandum and Articles of Association of the Company, the most recent semi-annual and annual accounts free of charge and facilities to inspect the material described below under “Supply and Inspection of Documents”.

Further Shareholder information, if any, and information on the availability of the Portfolios in this jurisdiction is available at office of the Paying Agent who can also be reached at foreignfunds0540@erstebank.at.

Publication of prices

Details of the most recent prices of Shares may be obtained from the Manager and may be published daily if required by local regulation.

BELGIUM

By virtue of its registration with the Financial Services and Markets Authority (the “FSMA”), the Company is authorised to sell Shares to investors in Belgium.

This information must be read in conjunction with the Prospectus, the Key Investor Information Documents, the most recent annual report and, if published thereafter, the most recent semi-annual report of the Company. Material amendments to the Prospectus, the Key Investor Information Documents and the Articles will be filed with the FSMA.

Financial Servicing Agent in Belgium

The Manager has appointed BNP Paribas Securities Services S.C.A., having its registered office at 3 rue d’Antin, 75002 Paris, France and acting from its Brussels branch at Boulevard Louis Schmidt 2, 1040 Brussels, as the Manager’s financial servicing agent in respect to the Company in Belgium in connection with the processing of issues, redemptions, switches and transfers of Shares and in connection with the payment of dividends on the Shares.

BRAZIL

The Shares of the Portfolios may not be offered or sold to the public in Brazil. Accordingly, the Shares of the Portfolios have not been nor will be registered with the Brazilian Securities Commission – CVM nor have they been submitted to the foregoing agency for approval. Documents relating to the Shares of the Portfolios, as well as the information contained therein, may not be supplied to the public in Brazil, as the offering of Shares in the Portfolios is not a public offering of securities in Brazil, nor used in connection with any offer for subscription or sale of securities to the public in Brazil.

BRUNEI

IMPORTANT INFORMATION FOR BRUNEI INVESTORS

Relating to specific Portfolios recognized for distribution in Brunei.

This Prospectus relates to a foreign collective investment scheme which is not subject to any form of domestic regulation by the Autoriti Monetari Brunei Darussalam (the “**Authority**”). The Authority is not responsible for reviewing or verifying any prospectus or other documents in connection with this collective investment scheme. The Authority has not approved this Prospectus or any other associated documents nor taken any steps to verify the information set out in this Prospectus and is not responsible for it.

The Shares to which this Prospectus relates may be illiquid or subject to restrictions on their resale. Prospective purchasers should conduct their own due diligence on the Shares.

If you do not understand the contents of this Prospectus you should consult a licensed financial adviser.

With respect to Portfolios which are not recognized for distribution in Brunei.

This Prospectus relates to a foreign collective investment scheme which is not subject to any form of domestic regulation by the Authority. This Prospectus is addressed to a specific and selected class of investors only who are an accredited investor, an expert investor or an institutional investor as defined in the Securities Market Order, 2013 so that they may consider an investment and subscription in the Shares. As such, this Prospectus must not be delivered to, or relied on by, a retail client. The Authority is not responsible for approving, reviewing or verifying the content of this document or other documents in connection with this collective investment scheme. The Shares to which this Prospectus relates may be illiquid or subject to restrictions on their resale. Prospective purchasers of the Shares should conduct their own due diligence on the Shares. If you do not understand the contents of this document you should consult a licensed financial adviser.

For further information on the availability of the Portfolios in this jurisdiction, please contact the Distributors listed in the Prospectus.

CANADA

Investors in Canada should read the Prospectus together with the required Canadian disclosure contained in the Canadian “wrapper” supplement to the Prospectus – a copy of which can be obtained from the Manager on request.

CAYMAN ISLANDS

The Company does not intend to establish a place of business or otherwise intend to conduct business in the Cayman Islands. Accordingly, the Company should not be subject to the supervision of any Cayman Islands authority.

CHILE

Neither the Company nor the Shares of the Portfolios have been registered with the Superintendencia de Valores y Seguros pursuant to Law No. 18.045, the Ley de Mercado de Valores and regulations thereunder. This Prospectus does not constitute an offer of, or an invitation to subscribe for or purchase, the Shares of the Portfolios in the Republic of Chile, other than to individually identified buyers pursuant to a private offering within the meaning of Article 4 of the Ley de Mercado de Valores (an offer that is not addressed to the public at large or to a certain sector or specific group of the public).

COLOMBIA

This document does not constitute a public offer in the Republic of Colombia. The offer of the Portfolios is addressed to less than one hundred specifically identified investors. The Portfolios may not be promoted or marketed in Colombia or to Colombian residents, unless such promotion and marketing is made in compliance with Decree 2555 of 2010 and other applicable rules and regulations related to the promotion of foreign funds in Colombia.

The distribution of this Prospectus and the offering of Shares of the Portfolios may be restricted in certain jurisdictions. The information contained in this Prospectus is for general guidance only, and it is the responsibility of any person or persons in possession of this Prospectus and wishing to make application for Shares of the Portfolios to inform themselves of, and to observe, all applicable laws and regulations of any relevant jurisdiction. Prospective applicants for Shares of the Portfolios should inform themselves of any applicable legal requirements, exchange control regulations and applicable taxes in the countries of their respective citizenship, residence or domicile.

COSTA RICA

This Prospectus has been produced for the purpose of providing information about the Shares of the Portfolios and will be provided to a maximum of 50 investors per fund in Costa Rica who are Institutional or Sophisticated Investors in accordance with the exemptions established pursuant to the Regulations on Public Offers of Values. This Prospectus is made available on the condition that it is for the use only by the recipient and may not be passed onto any other person or be reproduced in any part. The Shares of the Portfolios have not been and will not be offered in the course of a public offering or of equivalent marketing in Costa Rica.

DENMARK

By virtue of its registration with the Danish Financial Supervisory Authority (the "Danish FSA"), the Company is authorised to sell Shares to investors in Denmark.

This information must be read in conjunction with the Prospectus, the Key Investor Information Documents, the most recent annual report and, if published thereafter, the most recent semi-annual report of the Company. Material amendments to the Prospectus, the Key Investor Information Documents and the Articles will be filed with the Danish FSA.

Representative Agent in Denmark

The Manager has appointed Nordea Denmark, Filial af Nordea Bank Abp, Finland, having its registered office at Groenjordsvej 10, DK-2300 Copenhagen S, Denmark as its Representative Agent in respect to the Company in Denmark.

The obligations of the representative are, in particular, to forward queries from Danish investors in regards to subscriptions, redemptions and dividend payments to the Manager and to distribute the latest Prospectus, application form, electronic copies of the latest articles of incorporation and electronic copies of the latest annual and semi-annual reports of the Company upon the request of a Danish investor.

DUBAI INTERNATIONAL FINANCE CENTRE

This Prospectus relates to Shares which are not subject to any form of regulation or approval by the Dubai Financial Services Authority ("DFSA"). The DFSA has no responsibility for reviewing or verifying any Prospectus or other documents in connection with the Portfolios. Accordingly, the DFSA has not approved this Prospectus or any other associated documents nor taken any steps to verify the information set out in this Prospectus, and has no responsibility for it. Prospective purchasers should conduct their own due diligence on the Shares. If you do not understand the contents of this document you should consult an authorised financial advisor.

EL SALVADOR

This Prospectus has been produced for the purpose of providing information about the Shares of the Portfolios. This Prospectus is made available on the condition that it is for use only by the recipient and may not be passed on to any other person or be reproduced in any part. The Shares of the Portfolios have not been and will not be offered in the course of a public offering or of equivalent marketing in El Salvador and therefore, the provisions of the Stock Market Law of 1994 (Ley del Mercado de Valores) as amended, relating to registration requirements and to prospectus requirements do not apply. The Shares of the Portfolios have thus neither been registered for public distribution in El Salvador with the Stock Superintendency nor been the subject matter of a prospectus compliant with the Stock Market Law. Any subscription application by any person other than the initial recipient of the Prospectus will be rejected.

FINLAND

By virtue of its registration with the Finnish Financial Supervision Authority, the Company is authorised to sell Shares in certain Portfolios to investors in Finland. For further information on the availability of the Portfolios in this jurisdiction, please contact the Distributors listed in the Prospectus.

This information must be read in conjunction with the Prospectus, the Key Investor Information Documents, the most recent annual report and, if published thereafter, the most recent semi-annual report of the Company. Material

amendments to the Prospectus, the Key Investor Information Documents and the Articles will be filed with the Finnish Financial Supervision Authority.

FRANCE

By virtue of its registration with the Autorité des Marchés Financiers (the “AMF”), the Company is authorised to sell Shares to investors in France.

This information must be read in conjunction with the Prospectus, the Key Investor Information Documents, the most recent annual report and, if published thereafter, the most recent semi-annual report of the Company. Material amendments to the Prospectus, the Key Investor Information Documents and the Articles will be filed with the AMF.

Centralising Correspondent in France

The Manager has appointed CACEIS Bank, a French public limited company (*société anonyme*), registered with the Paris Trade and Company Register under No. 692 024 722, (the “Centralising Correspondent”) to act as the centralising correspondent for the Manager in respect to the Company in France. The Centralising Correspondent has agreed to provide the following from their office at 1-3, Place Valhubert, F-75013 Paris, France to the Company’s investors:

- (a) facilities at which subscriptions and redemption requests for Shares can be submitted to the Centralising Correspondent. Upon request, redemption proceeds, distributions or any other payments to the Shareholder may be paid via the Centralisation Agent; and
- (b) this Prospectus (together with any addenda thereto), the Memorandum and Articles of Association of the Company, the most recent semi-annual and annual accounts free of charge and facilities to inspect the material described below under “Supply and Inspection of Documents”.

Further Shareholder information, if any, is available at the office of the Centralising Correspondent.

Publication of prices

Details of the most recent prices of Shares may be obtained from the Manager and may be published daily if required by local regulation.

GERMANY

By virtue of its registration with the Bundesanstalt für Finanzdienstleistungsaufsicht (the “BaFin”) the Company is authorised to sell Shares to investors in Germany.

Paying Agent in Germany

The Manager has appointed JP Morgan AG as paying agent for the Company in the Federal Republic of Germany (the “German Paying Agent”).

Exchange and redemption requests for the Shares can be submitted to the German Paying Agent at the following address:

J.P. Morgan AG
Taunustor 1 (TaunusTurm)
60310 Frankfurt am Main
Germany

Upon request, the redemption proceeds, distributions or other payments, if any, to the Shareholder are paid in Euro via the German Paying Agent.

Information Agent in Germany

The Manager has also appointed J.P. Morgan AG as information agent for the Company in the Federal Republic of Germany (the “German Information Agent”).

The Prospectus, the Key Investor Information Documents, the Articles, the semi-annual and annual accounts of the Company can be received free of charge in paper form or electronic form and the material described above under “Documents for Inspection” can be inspected free of charge at the office of the German Information Agent at the aforementioned address. Furthermore, Shareholder information, if any, is available free of charge in paper form or electronic form at the German Information Agent.

The Net Asset Value per Share of each Portfolio and the purchase and redemption prices together with the interim profit and the aggregate amount of income deemed to be received by the Shareholder for the Shares are available free of charge at the German Information Agent on every banking business day in Frankfurt am Main.

Publication of prices and notices to Shareholders

The most recent issue and redemption prices of Shares may be obtained free of charge from the Manager and from the German Information Agent and will generally be published daily on www.morningstar.de

Furthermore notices to Shareholders, if any, will also be published in a durable medium (dauerhafter Datentraeger).

In the following cases notifications to the Shareholders in Germany will be published via a durable medium and additionally, in the German Federal Gazette (*Bundesanzeiger*):

- Suspension of repurchase of the Shares in the Company;
- Termination of the management of or dissolution of the Company;
- Changes to the terms and conditions which are not consistent with the existing investment policy, which affect essential Shareholder rights or which affect the reimbursement of expenses that may be taken from the Company, including the reasons for the changes and investors rights in an understandable manner and their means of obtaining information thereon;
- In the event of a merger of the Company or one of its Portfolios, in the form of merger information to be prepared in accordance with Article 43 of Directive 2009/65/EC;
- In the event of conversion of the Company or one of its Portfolios into a feeder fund or in the event of a change to a master fund, in the form of information to be prepared in accordance with Article 64 of Directive 2009/65/EC.

Distributors

Prospective investors should contact their distributor for information on fees paid to the Distributor by the Company.

GREECE

The Company is authorised to sell Shares in certain Portfolios to investors in Greece. Greek investors who are interested in acquiring Shares should check with the Manager or their financial adviser about whether Shares in which they wish to invest are authorised for sale in Greece. Piraeus Bank S.A. has been appointed to act as distributor and representative and paying agent for the Company in Greece.

HONG KONG

Please note that (i) Shares in any Portfolio which has not been authorised by the Hong Kong Securities and Futures Commission ("HKSF") may not be offered or sold in Hong Kong by means of this Prospectus or any other document other than to "professional investors" as defined in Part I of Schedule 1 to the SFO and any rules made thereunder, and (ii) no person shall issue or possess for the purposes of issue, whether in Hong Kong or elsewhere, any advertisement, invitation or document relating to Shares in any such Portfolio which is directed at, or the contents of which are likely to be accessed or read by, the public in Hong Kong (except if permitted to do so under the securities laws of Hong Kong) other than with respect to Shares which are or are intended to be disposed of only to persons outside Hong Kong or only to "professional investors" as defined in Part I of Schedule 1 to the SFO and any rules made thereunder.

For so long as the Company is authorised by the HKSF, commissions payable to sales agents arising out of any dealing in Shares in Hong Kong authorised Portfolios will not be paid out of the Company's or the relevant Portfolio's assets.

HUNGARY

This Prospectus relates to Shares offered by way of through private placement, and it does not constitute or form part of any offer or invitation to the public in Hungary to subscribe for or purchase Shares and shall not be construed as such.

ICELAND

This Prospectus has been issued in Iceland for use by Institutional Investors in Iceland only and exclusively for the purposes of the described investment opportunities. Accordingly, this Prospectus and relevant information may not be

used for any other purpose or passed on to any other person in Iceland. The investment described in this Prospectus is not a public offering of securities. It is not registered for public distribution in Iceland with the Financial Supervisory Authority pursuant to the Icelandic Act on Undertakings for Collective Investment in Transferable Securities (UCITS) and Investment Funds No. 30/2003 and supplementary regulations. The investment may not be offered or sold by means of this Prospectus or anyway later resold otherwise than in accordance with Article 13 of the Regulation on UCITS and Investment Funds No. 792/2003.

INDIA

The offering contemplated in this Prospectus is not, and shall not under any circumstances be construed as a public offering in India. This document will not be registered as a prospectus with the Registrar of Companies, or any other regulatory authority in India. The Shares are not being offered to the public for sale or subscription.

Shares may be privately placed with a limited number of investors directly with the issuer or only through selected intermediaries who have agreed with the issuer, directly or indirectly, on an arrangement to offer Shares on such private placement basis. Investors who invest through intermediaries who do not have such a private placement arrangement in place with the issuer will not be able to subscribe to the Shares in India via private placement.

Prospective investors must consult their own advisors on whether they are entitled or permitted to acquire the Shares. The Prospectus is strictly confidential and is intended for the exclusive use of the person to whom it is delivered and any circulation, distribution, reproduction or other use of all or any portion of the Prospectus is prohibited.

INDONESIA

This Prospectus and any other material relating to the Portfolios has not been registered and will not be registered with the Financial Service Authority in the Republic of Indonesia (i.e. Otoritas Jasa Keuangan/OJK). This Prospectus or any other material relating to the Portfolios must not be circulated or distributed, whether directly or indirectly, in the Republic of Indonesia or to Indonesian citizens, corporations or residents in a manner which constitutes a public offer under the laws of the Republic of Indonesia.

IRELAND

Irish residents may purchase Shares at the discretion of the Company.

Investors in Ireland should review the Prospectus, the Key Investor Information Documents, the most recent annual report and, if published thereafter, the most recent semi-annual report of the Company as part of any investment decisions in respect of the Company. Amendments to the Prospectus, the Key Investor Information Documents and the Articles will be filed with the Central Bank.

ISRAEL

This Prospectus has not been approved by the Israeli Securities Authority and will only be distributed to Israeli residents in a manner that will not constitute "an offer to the public" under sections 15 and 15a of the Securities Law, 1968 (the "Securities Law") or section 25 of the Joint Investment Trusts Law, 1994 (the "Joint Investment Trusts Law"), as applicable.

The Shares are being offered to a limited number of investors (35 investors or fewer during any given 12 month period) and/or those categories of investors listed in the first schedule (the "Schedule") to the Securities Law ("Sophisticated Investors"), as amended from time to time, who also qualify as Qualified Clients (as defined in the Regulation of Investment Advice, Investment Marketing and Investment Portfolio Management, 1995 (the "Investment Advice Law")); in all cases under circumstances that will fall within the private placement exemption or other exemptions of the Securities Law, the Joint Investment Trusts Law and any applicable guidelines, pronouncements or rulings issued from time to time by the Israel Securities Authority.

An offeree identifying itself as a Sophisticated Investor will be required to confirm in writing that it falls within one of the criteria for being deemed as such (and, in certain cases, additionally to provide third party confirmation of the same) and that it is aware of the consequences of being classified as a Sophisticated Investor.

This Prospectus may not be reproduced or used for any other purpose, nor be furnished to any other person other than those to whom copies have been sent. As a prerequisite to the receipt of a copy of this Prospectus, a recipient may be required by the issuer to provide confirmation that it is a Sophisticated Investor purchasing Shares for its own account or, where applicable, for other Sophisticated Investors. If any recipient in Israel of a copy of this Prospectus is not a Sophisticated Investor or has not been notified by the Manager that it falls within the limited number of investors referred to above, such recipient should promptly return this Prospectus to the Manager.

Any offeree who purchases Shares is purchasing such Shares for his or its own benefit and account and not with the aim or intention of distributing or offering such Shares to other parties (other than, in the case of an offeree which is a Sophisticated Investor by virtue of it being a banking corporation, portfolio manager or member of the Tel Aviv Stock Exchange, as defined in the Schedule, where such offeree is purchasing Shares for another party which is a Sophisticated Investor).

Nothing in this Prospectus should be considered as investment advice or investment marketing, as defined in the Investment Advice Law. The Manager is not licensed under the Investment Advice Law, nor does it carry the insurance as required of a licensee thereunder. Investors are encouraged to seek competent investment advice from a locally licensed investment adviser prior to making the investment, as well as legal, business and tax advice from competent local advisers.

This Prospectus does not constitute an offer to sell or solicitation of an offer to buy any securities or fund units other than the Shares offered hereby, nor does it constitute an offer to sell to or solicitation of an offer to buy from any person or persons in any state or other jurisdiction in which such offer or solicitation would be unlawful, or in which the person making such offer or solicitation is not qualified to do so, or to a person or persons to whom it is unlawful to make such offer or solicitation.

ITALY

By virtue of its registration with the Commissione Nazionale per le Società e la Borsa (“CONSOB”) the Company is authorised to sell Shares to investors in Italy.

This information must be read in conjunction with the Prospectus, the Key Investor Information Documents, the most recent annual report and, if published thereafter, the most recent semi-annual report of the Company. Material amendments to the Prospectus, the Key Investor Information Documents, and the Articles will be filed with the CONSOB.

Correspondent Bank in Italy

The Manager has appointed Allfunds Bank, S.A.U. to act as its paying agent in respect to the Company in Italy (the “Paying Agent”). The Paying Agent has agreed to provide the following from their offices at Calle de los Padres Dominicos, 7-C.P. 28050 Madrid, and operating for this purpose from its branch office in Milan, Italy:

- facilities at which subscriptions, conversion and redemption requests for Shares can be submitted to the Paying Agent and redemption proceeds, distributions or any other payments to the Shareholder may be paid to investors;
- the Memorandum and Articles of Association of the Company, the most recent semi-annual and annual accounts, the documents described in the Prospectus under “Supply and Inspection of Documents”, the notice of the annual general meeting of the Company and the text of any resolutions passed at the most recent annual general meeting and facilities at which investors may inspect them.

On request, the Paying Agent will send copies of this information to investors free of charge.

JAPAN

The Shares have not been and will not be registered pursuant to Article 4, Paragraph 1 of the Financial Instruments and Exchange Law of Japan (Law no. 25 of 1948, as amended) and, accordingly, none of the Shares nor any interest therein may be offered or sold, directly or indirectly, in Japan or to, or for the benefit, of any Japanese person or to others for re-offering or resale, directly or indirectly, in Japan or to any Japanese person except under circumstances which will result in compliance with all applicable laws, regulations and guidelines promulgated by the relevant Japanese governmental and regulatory authorities and in effect at the relevant time. For this purpose, a “Japanese person” means any person resident in Japan, including any corporation or other entity organised under the laws of Japan.

JERSEY

This Prospectus relates to a private placement and does not constitute an offer to the public of Jersey to subscribe for the Shares offered hereby. No regulatory approval has been sought to the offer in Jersey. The offer of the Shares is personal to the person to whom this Prospectus is being delivered by or on behalf of the Company, and a subscription for the Shares will only be accepted from such person. The Prospectus may not be produced or used for any other purpose, nor be furnished to any other person other than those to whom it has been so delivered.

LIECHTENSTEIN

By virtue of its registration with the Finanzmarktaufsicht (the “FMA”), the Company is authorised to sell Shares to investors in Liechtenstein.

This information must be read in conjunction with the Prospectus, the Key Investor Information Documents, the most recent annual report and, if published thereafter, the most recent semi-annual report of the Company. Material amendments to the Prospectus, the Key Investor Information Documents and the Articles will be filed with the FMA.

Representative and Paying Agent in Liechtenstein

The Manager has appointed SIGMA Bank AG, Feldkircher Strasse 2, FL-9494 Schaan, Liechtenstein as Representative and Paying Agent in respect to the Company in Liechtenstein.

The Prospectus, the Key Investor Information Documents, the Articles and the annual report and semi-annual report of the Company can be obtained free of charge from the Liechtenstein Representative's office.

LUXEMBOURG

By virtue of its registration with the Commission de Surveillance du Secteur Financier (the "CSSF"), the Company is authorised to sell Shares to investors in Luxembourg.

This information must be read in conjunction with the Prospectus, the Key Investor Information Documents, the most recent annual report and, if published thereafter, the most recent semi-annual report of the Company. Material amendments to the Prospectus, the Key Investor Information Documents and the Articles will be filed with the CSSF.

Paying Agent in Luxembourg

The Manager has appointed J.P. Morgan Bank Luxembourg S.A., European Bank Business Center 6, route de Treves L-2633 Senningerberg, Luxembourg, as Luxembourg Paying Agent.

The Articles, the Key Investor Information Documents, the Prospectus and the annual report and semi-annual report of the Company can be obtained free of charge from the Luxembourg Paying Agent's office.

MALAYSIA

As the approval of the Malaysian Securities Commission pursuant to section 212 of the Malaysian Capital Markets and Services Act 2007 has not been/will not be obtained nor will this Prospectus be lodged or registered with the Malaysian Securities Commission, the Shares hereunder are not being and will not be deemed to be issued, made available, offered for subscription or purchase to or by the public in Malaysia, and neither this Prospectus nor any document or other material in connection therewith should be distributed, caused to be distributed or circulated to the public in Malaysia. Shares and this Prospectus may only be made available in Malaysia to individuals or other legal entities who fall under paragraphs 8, 9, 11, 12 or 13 of Schedule 6 to the Capital Markets and Services Act 2007.

MEXICO

The Shares of the Portfolios have not been and will not be registered with the National Registry of Securities, maintained by the Mexican National Banking Commission and, as a result, may not be offered or sold publicly in Mexico. The Company and any underwriter or purchaser may offer and sell the Shares of the Portfolios in Mexico, to Institutional and Accredited Investors, on a private placement basis, pursuant to Article 8 of the Mexican Securities Market Law.

NEW ZEALAND

This Prospectus has not been, and will not be, lodged with the Registrar of Financial Service Providers in New Zealand and is not a product disclosure statement under the Financial Markets Conduct Act 2013.

The only New Zealand-based investors who are eligible to invest in the Shares and to whom the offer contained in this Prospectus is made are investors to whom disclosure under the Financial Markets Conduct Act 2013 is not required by virtue of clause 3(2) of Schedule 1 to the Financial Markets Conduct Act 2013. Specifically, investors who are "wholesale investors" within the meaning of Clause 3(2) of Schedule 1 of the Financial Markets Conduct Act 2013, being persons who fall within one or more of the following categories of "wholesale investor": (1) a person that is an "investment business" within the meaning of Clause 37 of Schedule 1 of the Financial Markets Conduct Act 2013, (2) a person that meets the investment activity criteria specified in Clause 38 of Schedule 1 of the Financial Markets Conduct Act 2013, (3) a person that is "large" within the meaning of Clause 39 of Schedule 1 of the Financial Markets Conduct Act 2013 or (4) a person that is a "government agency" within the meaning of Clause 40 of Schedule 1 of the Financial Markets Conduct Act 2013, or in other circumstances where there is no contravention of the Financial Markets Conduct Act 2013.

This Prospectus is not intended as an offer for sale or subscription to any persons in New Zealand who require prescribed disclosures to be made to them in accordance with Part 3 of the Financial Markets Conduct Act 2013. New Zealand residents should seek their own legal, tax and financial advice as to the implications of investing in the Shares.

PANAMA

The Shares have not been and will not be registered with the National Securities Commission of the Republic of Panama under Decree Law N°1 of July 8, 1999 (the "Panamanian Securities Act") and may not be publicly offered or sold within Panama, except in certain limited transactions exempt from the registration requirements of the Panamanian Securities Act. The Shares do not benefit from the tax incentives provided by the Panamanian Securities Act and are not subject to regulation or supervision by the National Securities Commission of the Republic of Panama.

PEOPLE'S REPUBLIC OF CHINA

Shares may not be offered or sold directly or indirectly to the public in the People's Republic of China (the "PRC") (which, for such purposes, does not include the Hong Kong or Macau Special Administrative Regions or Taiwan). This Prospectus has not been, and will not be, submitted to or approved/verified by or registered with the China Securities Regulatory Commission ("CSRC") or other relevant governmental and regulatory authorities in the PRC pursuant to relevant laws and regulations, and may not be supplied to the public in the PRC or used in connection with any offer for the subscription or sale of Shares to the public in the PRC. This Prospectus does not constitute an offer to sell or the solicitation of an offer to buy any securities by the public in the PRC. Shares may only be offered or sold to the eligible PRC investors that have obtained the license/approval from the PRC regulatory and governmental authorities to make offshore investment into the securities and/or financial instruments launched and offered outside the PRC, including the Shares of the type being offered or sold, either directly with the issuer or only through selected intermediaries who have agreed with the issuer, directly or indirectly, to make available Shares on such basis, provided, however, investors who invest through intermediaries who do not have an arrangement in place with the issuer will not be able to subscribe to the Shares in the PRC on such basis. PRC investors are responsible for obtaining all relevant government regulatory approvals/licences, verification and/or registrations themselves, including, but not limited to, any which may be required from CSRC, the State Administration of Foreign Exchange, and complying with all relevant PRC regulations, including, but not limited to, all relevant foreign exchange regulations and/or foreign investment regulations.

PERU

The Shares of the Portfolios have not been registered with the Superintendencia del Mercado de Valores (the "SMV") and are being placed by means of a private offer. The SMV has not reviewed the information provided to the investor. This Prospectus is only for the exclusive use of institutional investors in Peru and is not for public distribution.

PHILIPPINES

THE SHARES BEING OFFERED OR SOLD HAVE NOT BEEN REGISTERED WITH THE SECURITIES AND EXCHANGE COMMISSION UNDER THE SECURITIES REGULATION CODE OF THE PHILIPPINES (THE "CODE"). ANY FUTURE OFFER OR SALE THEREOF IS SUBJECT TO REGISTRATION REQUIREMENTS UNDER THE CODE UNLESS SUCH OFFER OR SALE QUALIFIES AS AN EXEMPT TRANSACTION THEREUNDER.

An exempt transaction includes Shares being sold to an investor on the basis that the investor is a "Qualified Buyer" as defined under 10.1(l) of the Code.

Where an offer or sale is not made pursuant to an exempt transaction under the Code, by a purchase of the Shares, the investor will be deemed to acknowledge that the issue of, offer for subscription or purchase of, or invitation to subscribe for or purchase, such Shares was made outside the Philippines.

PORTUGAL

By virtue of its registration with the Comissão do Mercado dos Valores Mobiliários (the "CMVM"), the Company is authorised to sell Shares to investors in Portugal pursuant to Decree-Law 252/2003 of 17 October, republished by Decree Law No. 71/2010 of 18 June, as amended from time to time (the "Decree-Law") and the Portuguese Securities Code

This information must be read in conjunction with the Prospectus of the Company, the Key Investor Information Documents, most recent annual report and, if published thereafter, the most recent semi-annual report. Material amendments to the Prospectus, the Key Investor Information Documents and the Articles will be filed with the CMVM.

SOUTH KOREA

Only certain series or Classes have been or will be registered for sale with the Financial Services Committee pursuant to the Financial Investment Services and Capital Markets Act (the "FSCMA"). Therefore, except for the specific series and Classes that have been registered under the FSCMA, the Shares shall not be offered, sold or delivered directly or indirectly, or offered, sold or delivered to any person for re-offering or resale, directly or indirectly, in Korea or to any Korean resident (as such term is defined in the Foreign Exchange Transaction Act), except as otherwise permitted under

applicable Korean laws and regulations.

The sale of the Shares that have been registered under the FSCMA shall be made via a licensed Korean distributor and in accordance with the FSCMA and other applicable Korean laws and regulations.

SPAIN

By virtue of its registration with the Comisión Nacional del Mercado de Valores (the “CNMV”), the Company is authorised to sell Shares to investors in Spain.

This information must be read in conjunction with the Prospectus of the Company, the Key Investor Information Documents, the most recent annual report and, if published thereafter, the most recent semi-annual report. Material amendments to the Prospectus, the Key Investor Information Documents and the Articles will be filed with the CNMV.

Publication of prices

Details of the most recent prices of Shares may be obtained from the Manager and will be published daily if required by local regulation.

SINGAPORE

The offer or invitation to subscribe for Shares, which is the subject of this Prospectus, does not (in respect of Portfolios which are not recognised under Section 287 of the Securities and Futures Act, Chapter 289 of Singapore (the “Restricted Portfolios”)) relate to collective investment schemes which are authorised under Section 286 of the Securities and Futures Act, Chapter 289 of Singapore (the “SFA”) or recognised under section 287 of the SFA. The Restricted Portfolios are not authorised or recognised by the Monetary Authority of Singapore (the “MAS”) and Shares in the Restricted Portfolios are not allowed to be offered to the retail public. This Prospectus and any other document or material issued in connection with the offer or sale of the Restricted Portfolios is not a prospectus as defined in the SFA. Accordingly, statutory liability under the SFA in relation to the content of prospectuses does not apply. You should consider carefully whether the investment is suitable for you.

This Prospectus has not been registered as a prospectus with the MAS. Accordingly, this Prospectus and any other document or material in connection with the offer or sale, or invitation for subscription or purchase, of Shares may not be circulated or distributed, nor may Shares be offered or sold, or be made the subject of an invitation for subscription or purchase, whether directly or indirectly, to persons in Singapore other than (i) to an institutional investor under Section 304 of the SFA, (ii) to a relevant person pursuant to Section 305(1), or any person pursuant to Section 305(2), and in accordance with the conditions specified in Section 305 of the SFA or (iii) otherwise pursuant to, and in accordance with the conditions of, any other applicable provision of the SFA.

Where Shares are subscribed or purchased under Section 305 by a relevant person which is:

- (a) a corporation (which is not an accredited investor (as defined in Section 4A of the SFA)) the sole business of which is to hold investments and the entire share capital of which is owned by one or more individuals, each of whom is an accredited investor; or
- (b) a trust (where the trustee is not an accredited investor) whose sole purpose is to hold investments and each beneficiary of the trust is an individual who is an accredited investor, securities (as defined in Section 239(1) of the SFA) of that corporation or the beneficiaries’ rights and interest (howsoever described) in that trust shall not be transferred within six months after that corporation or that trust has acquired the Shares pursuant to an offer made under Section 305 of the SFA except:
 - (1) to an institutional investor or to a relevant person defined in Section 305(5) of the SFA, or to any person arising from an offer referred to in Section 275(1A) or Section 305A(3)(i)(B) of the SFA;
 - (2) where no consideration is or will be given for the transfer;
 - (3) where the transfer is by operation of law;
 - (4) as specified in Section 305A(5) of the SFA; or
 - (5) as specified in Regulation 36 of the Securities and Futures (Offers of Investments) (Collective Investment Schemes) Regulations 2005 of Singapore.

SWEDEN

By virtue of a ruling of the Finansinspektionen (the “Swedish Financial Supervisory Authority”) dated 8 August 2006, the

Company is authorised to sell its Shares to members of the public in Sweden.

The information below describes the facilities available to investors resident in Sweden and the procedures which apply to dealing in Shares in the Company. This information must be read in conjunction with the Prospectus, the Key Investor Information Documents, the most recent annual report and, if published thereafter, the most recent semi-annual report of the Company. Amendments to the Prospectus, the Key Investor Information Documents, the Articles, or any other information will be made available at the offices of Skandinaviska Enskilda Banken AB (the "Swedish Paying Agent"). Material amendments to the Prospectus, the Key Investor Information Documents and the Articles will be filed with the Swedish Financial Supervisory Authority.

Paying Agent in Sweden

The Manager has appointed Skandinaviska Enskilda Banken AB, Kungsträdgårdsgatan 8, SE-106 40 Stockholm, Sweden, as the Swedish Paying Agent.

The Articles, the Key Investor Information Documents, the Prospectus and the (semi-) annual report can be obtained free of charge from the Paying Agent's office.

Investors may also apply to redeem Shares and obtain payment through the Swedish Paying Agent.

Publication of prices

Details of the most recent prices of Shares may be obtained from the Manager and may be published daily if required by local regulation.

SWITZERLAND

Representative

The representative of Neuberger Berman Investment Funds plc (for the purposes of this section only defined hereafter as the "Fund") in Switzerland is BNP PARIBAS SECURITIES SERVICES, Paris, succursale de Zurich, Selnaustrasse 16, CH-8002 Zurich, Switzerland.

Paying agent

The paying agent of the Company appointed by the Manager in Switzerland is BNP PARIBAS SECURITIES SERVICES, Paris, succursale de Zurich, Selnaustrasse 16, CH-8002 Zurich, Switzerland.

Place where the relevant documents may be obtained

The Company's Memorandum and Articles of Association, Prospectus, Key Investor Information Documents as well as the annual and semi-annual reports may be obtained free of charge from the Representative in Switzerland.

Publication

- (a) Publications concerning the Company and the relevant Portfolios are made in Switzerland on the website of Swiss Fund Data AG (www.swissfunddata.ch).
- (b) At each time Shares are issued or redeemed, the issue and the redemption prices or NAV, together with a reference stating "excluding commissions" will be published on the website of Swiss Fund Data AG (www.swissfunddata.ch). Prices will be published for every Dealing Day.

Payment of retrocessions and rebates

- (a) The Company and its agents may pay retrocessions as remuneration for distribution activity in respect of the Shares distributed in or from Switzerland. This remuneration may be deemed payment for the following services in particular:
 - setting up processes for subscribing, holding and safe custody of the Shares;
 - establishing a broad distribution of Shares to bona fide investors;
 - subscribing for Shares as a "nominee" for several clients;
 - forwarding or providing access to marketing documents, legally required documents and other publications of the Company;
 - responding to questions or forwarding these questions to the representative in Switzerland for answering;
 - assisting prospective investors in subscribing for the Shares;

- keeping documentary records under Art. 24 para. 3 of the Federal Act on Collective Investment Schemes ("CISA") appointing and monitoring additional distributors;
- performing due diligence in areas such as money laundering, ascertaining client needs and distribution restrictions;
- working together with the Manager to prevent orders that serve the purposes of market timing;
- operating and maintaining an electronic distribution and/or information platform;
- mandating an authorized auditor to check compliance with certain duties of the Distributor, in particular with the provisions for distributors in the Guidelines on the Distribution of Collective Investment Schemes issued by the Swiss Funds & Asset Management Association SFAMA;
- central relationship management and centralized contract management;
- training client advisors in collective investment schemes/investment funds; and
- drawing up research material.

Retrocessions are not deemed to be rebates even if they are ultimately passed on, in full or in part, to the investors.

The recipients of the retrocessions must ensure transparent disclosure and inform investors, unsolicited and free of charge, about the amount of remuneration they may receive for distribution.

On request, the recipients of retrocessions must disclose the amounts they actually receive for distributing the collective investment schemes of the investors concerned.

(b) In the case of distribution activity in or from Switzerland, the Company's agents, may, upon request, pay rebates directly to investors. The purpose of rebates is to reduce the fees or costs incurred by the investors in question. Rebates are permitted provided that:

- they are paid from fees received by the Manager, the Sub-Investment Manager or the Distributor and therefore do not represent an additional charge on the Portfolio's assets;
- they are granted on the basis of objective criteria;
- all investors who meet these objective criteria and demand rebates are also granted these within the same timeframe and to the same extent.

The objective criteria for the granting of rebates by the Company's agents are as follows:

- the volume subscribed by the investors or the total volume they hold in the Portfolio or, where applicable, in the product range of the promoter;
- the amount of the fees generated by the investor;
- the investment behaviour shown by the investor (e.g. expected investment period);
- the investor's willingness to provide support in the launch phase of a collective investment scheme.

At the request of the investor, the Company's agents must disclose the amounts of such rebates free of charge.

Place of performance and jurisdiction

In respect of the Shares distributed in and from Switzerland, the place of performance and jurisdiction is the registered office of the representative in Switzerland.

TAIWAN

Certain Portfolios have been approved by the Financial Supervisory Commission R.O.C. ("FSC") for the offering and sale to the public by Neuberger Berman Taiwan Limited (the "Master Agent") and its sales agents in Taiwan. These approved Portfolios are not intended to be sold in Taiwan through channels other than the Master Agent and its sales agents unless otherwise permitted by the laws, regulations or the FSC. Investors shall read the Prospectus along with the investor brochure carefully before any investment. The Chinese translation of the Prospectus, if any, is for reference only. Should there be any discrepancy between the Prospectus and its Chinese translation, the Prospectus shall prevail.

In relation to the Portfolios that are not registered in Taiwan ("**Unregistered Portfolios**"), such Unregistered Portfolios may not be sold, issued or offered in Taiwan, except on a private placement basis through an arrangement directly with the issuer or only through selected intermediaries who have agreed with the issuer, directly or indirectly, on an arrangement to make available Shares on such basis only to banks, bills houses, trust enterprises, insurance enterprises, securities firms, financial holding companies and other qualified entities or institutions approved by the FSC (collectively, "**Qualified Financial Institutions**") and other entities and individuals meeting specific criteria ("**Other Qualified Investors**") pursuant to the private placement provisions of the Taiwan Regulations Governing Offshore Funds. **Subscribers and purchasers of shares and/or units of funds under private placement in Taiwan must be aware that no resale of the shares and/or units of funds is permitted except for: (i) redemption by the offshore fund institution; (ii) transfer to Qualified Financial Institutions and/or Other Qualified Investors; (iii) transfer by operation of law; or (iv) as**

otherwise approved by the FSC. **Subscribers who invest through intermediaries who do not have such a private placement arrangement in place with the issuer will not be able to subscribe to the Shares in Taiwan via private placement.**

The Unregistered Portfolios may be made available through offshore banking units (as defined in the R.O.C. statute for offshore banking operations) of Taiwan banks, the offshore securities units (as defined in the R.O.C. statute for offshore banking operations) of Taiwan securities firms or the offshore insurance units (as defined in the R.O.C. statute for offshore banking operations) of Taiwan insurance companies. The Unregistered Portfolios may also be made available to Taiwanese investors outside of Taiwan.

Except as set out herein, no person or entity in Taiwan has been authorised to offer, sell, give advice regarding or otherwise intermediate the offering and sale of the Unregistered Portfolios in Taiwan. No other offer or sale of the Unregistered Portfolios in Taiwan is permitted.

For further information on the availability of the Portfolios in this jurisdiction, please contact the Distributors listed in the Prospectus.

THAILAND

The entity offering the Shares, which are the subject of the Prospectus, does not maintain any licenses, authorisations or registrations in Thailand. The Shares being offered herein have not been and will not be registered with or approved by the Office of the Securities and Exchange Commission of Thailand or any other regulatory authority in Thailand. Accordingly, the Shares would not be, directly or indirectly, offered or sold to the general public within Thailand except pursuant to applicable laws and regulations of Thailand.

This Prospectus and any other documents or materials in connection with the Shares are provided for information purposes only. They have not been, and will not be, filed with, or reviewed, approved or endorsed by, the Office of the Securities and Exchange Commission of Thailand or any other regulatory authority in Thailand. They must not be circulated or distributed or caused to be circulated or distributed, whether directly or indirectly, to the general public in Thailand, except as in compliance with applicable laws and regulations of Thailand, and must not be copied, published, reproduced, circulated, distributed or redistributed or caused to be done so, whether directly or indirectly, to the general public in Thailand. They shall in no way constitute an offer, invitation, solicitation, advertisement or advice of, or in relation to, the Shares to the general public in Thailand, except under circumstances that are in compliance with applicable laws and regulations of Thailand.

THE BAHAMAS

Shares of the Portfolios shall not be offered or sold into The Bahamas except in circumstances that do not constitute an offer to the public. Shares of the Portfolios may not be offered or sold or otherwise disposed of in any way to persons deemed by the Central Bank of The Bahamas (the "Bank") to be resident for exchange control purposes without the prior written permission of the Bank.

THE NETHERLANDS

By virtue of its registration with the Netherlands Authority for the Financial Markets (the "AFM"), the Company is authorised to sell Shares to investors in the Netherlands.

This information must be read in conjunction with the Prospectus, the Key Investor Information Documents of the Company, the most recent annual report and, if published thereafter, the most recent semi-annual report. Material amendments to the Prospectus, the Key Investor Information Documents and the Articles will be filed with the AFM.

Publication of prices

Details of the most recent prices of Shares may be obtained from the Manager and will be published daily if required by local regulation.

UNITED ARAB EMIRATES

This Prospectus and the information contained herein, does not constitute, and is not intended to constitute, a public offer of securities in the United Arab Emirates ("UAE") and accordingly should not be construed as such. Unless the provisions of the SCA Board of Directors' Chairman Decision No. 9/R.M. of 2016 concerning the regulations of mutual funds do not apply or unless the exemptions to the regulations relating to promotion or offering of units in foreign funds or foreign shares (SCA Board of Directors Decision no 3/RM of 2017 concerning the organization of promotion and introduction, as further revised and updated) apply, the Shares are only being offered to a limited number of sophisticated investors in the UAE who are willing and able to conduct an independent investigation of the risks involved in an investment in such

Shares. Consequently, based on the aforementioned exemptions, the offering of the securities in the UAE will only be available to a limited number of exempt investors in the UAE who fall under one of the following categories of Exempt Qualified Investors: the corporate person that meets any of the following conditions: (a) the federal government, local governments, and governmental entities, institutions and authorities, or companies wholly-owned by any of the aforementioned; (b) foreign governments, their respective entities, institutions and authorities or companies wholly owned by any such entities; (c) international entities and organisations; (d) entities licensed by the SCA or by a similar regulatory authority; or (e) a corporate person that meets, as at the date of its most recent financial statements, at least two of the following conditions: (i) it has a total assets of AED 75 million; (ii) it has a net annual income of AED 150 million; (iii) it has net equity or paid-up capital at the minimum of AED 7 million; (each an “Exempt Qualified Investor”). This Prospectus is for the use of the named addressee only and should not be given or shown to any other person (other than employees, agents or consultants in connection with the addressee’s consideration thereof).

Please note that the majority of the Portfolios have not been approved by or licensed or registered with the UAE Central Bank, the Securities and Commodities Authority or any other relevant licensing authorities or governmental agencies in the UAE (the “Regulators”). However, the sale of Shares in certain Portfolios that have been registered with the relevant Regulators shall be made via a licensed UAE distributor and in accordance with applicable UAE laws and regulations.

For further information on the availability of the Portfolios in this jurisdiction, please contact the Distributors listed in the Prospectus.

UNITED KINGDOM

The Company is a recognised collective investment scheme for the purposes of section 264 of the Financial Services and Markets Act 2000 of the United Kingdom.

The information below describes the facilities available to investors resident in the United Kingdom and the procedures which apply to dealing in Shares. This information must be read in conjunction with the Prospectus, the Key Investor Information Documents, the most recent annual report and, if published thereafter, the most recent semi-annual report of the Company. Material amendments to the Prospectus, the Key Investor Information Documents and the Articles will be filed with the UK Financial Conduct Authority.

Facilities Agent in the United Kingdom

The Manager has appointed Neuberger Berman Europe Limited (the “Facilities Agent”) to act as the facilities agent for the Company in the United Kingdom. The Facilities Agent has agreed to provide the following from its office at The Zig Zag Building, 70 Victoria Street, London, SW1E 6SQ, England to the Company’s investors:

1. facilities at which the following documents in the English language can be inspected free of charge and copies obtained:
 - (a) the Articles establishing the Company in its original form and an updated instrument incorporating the changes (if any) contemplated in paragraph (b) below;
 - (b) any special resolutions amending the Articles of the Company;
 - (c) the latest Prospectus and any addenda;
 - (d) the latest annual and half-yearly reports of the Company; and
 - (e) Key Investor Information Documents.
2. facilities at which:
 - (a) a Shareholder may arrange for redemption of Shares and arrange payment of the redemption proceeds;
 - (b) information in the English language can be obtained orally and in writing about the Company’s most recently published Net Asset Value per Share; and
 - (c) facilities at which any person who has a complaint to make about the operation of the Company can submit his or her complaint for transmission to the Company.

Taxation

The following is a summary of the expected United Kingdom tax treatment of Shareholders based upon current law and practice (which in either case may change and potentially with retrospective effect). The summary below is addressed to

investors who hold their interest as an investment and not as part of a trade such as dealing in securities. This summary does not cover all aspects of United Kingdom tax law. It does not constitute legal or tax advice and prospective investors should consult their own professional advisers on the tax implications of their investment in the Company.

Shareholders

Subject to their personal circumstances, Shareholders resident in the United Kingdom for United Kingdom tax purposes will be liable to United Kingdom income tax or corporation tax in respect of dividends or other distributions of an income nature made by the Company (including deemed distributions or distributions that are automatically reinvested). United Kingdom resident individual Shareholders may, in certain circumstances, be entitled to a non-payable tax credit, which may reduce their liability to United Kingdom income tax in respect of such distributions.

Shareholders who are resident or ordinarily resident in the United Kingdom for United Kingdom taxation purposes should be aware that their Shares will constitute interests in an "offshore fund" for the purposes of the United Kingdom Offshore Funds (Tax) Regulations 2009 (the "Regulations"). Where such a person holds such an interest, any gain arising to that person on the sale, redemption or other disposal of that interest (including a deemed disposal on death) will be taxed at the time of such sale, redemption or other disposal as income and not as capital gain, unless the offshore fund (or the particular class of interests in the fund held by that person, which class is deemed to be a separate "offshore fund" for these purposes) has been for United Kingdom tax purposes a "reporting fund" throughout the period during which that person has held that interest.

The Manager intends to make an application to the United Kingdom HM Revenue & Customs ("HMRC") in respect of certain Classes for Shares of such Classes to be treated as Shares in a "Reporting Fund" United Kingdom tax purposes with effect from the beginning of the Company's accounting period which commenced on 1 January 2010 (each a "Reporting Fund Class"). Accordingly, any gain realised by United Kingdom resident or ordinary resident Shareholders upon the sale, redemption or other disposal of Shares of a Reporting Fund Class will be taxed at the time of such sale, redemption or other disposal as capital gains and not as income. However, under the Regulations, a reporting fund is also required to make available to each investor in the fund for each account period of the fund a report of the income of the fund for that account period which is attributable to the investor's interest in the fund (whether or not such income has been distributed), and such reported income is treated as an additional distribution made by the fund to the investor. A United Kingdom resident or ordinarily resident Shareholder in a Reporting Fund Class will therefore receive from the Company for each account period a report of the income of the Company for that account period which is attributable to their Shares, and will (subject to their particular United Kingdom tax position) be potentially subject to United Kingdom tax on that reported income as if such reported income were a distribution upon their Shares.

The Directors do not intend to apply for any Class other than the Reporting Fund Classes to be a deemed reporting fund. Accordingly, any United Kingdom resident or ordinarily resident holders of Shares of any Class other than the Reporting Fund Classes should be aware that any gain realised upon the sale, redemption or other disposal of their Shares (including a deemed disposal on death) will be subject to tax as income and not as capital gains.

The precise consequences of the taxation of gains realised upon a disposal of Shares as income or as capital gains will depend upon the particular tax position of each Shareholder, but United Kingdom resident or ordinarily resident Shareholders who are individuals should be aware that capital gains are generally taxed at lower rates of tax than income, and also that where gains are taxed as capital gains it may be possible to utilise capital gains tax exemptions and relief to reduce the tax liability on such gains where such exemptions and reliefs could not be utilised in the case of gains taxed as income. However, Shareholders who are not domiciled in the United Kingdom (and who, where relevant, elect to be taxed on the remittance basis of taxation for the tax year in which such gain is realised) will only be subject to United Kingdom tax on gains realised upon the disposal of their Shares – whether such gains are in principle taxable as capital gains or as income - to the extent that they remit the proceeds of disposal of such Shares to the United Kingdom. Shareholders which are United Kingdom gross funds should also be unaffected by these rules, since their exemption from UK tax on capital gains will extend to gains treated as income.

Shareholders who are within the charge to United Kingdom corporation tax should be aware that where such an investor holds a material interest in an offshore fund and that offshore fund fails, at any time in an accounting period in which the investor holds its material interest, to satisfy the "qualifying investments test", the investor is required to treat its material interest for that accounting period as if it were rights under a creditor relationship for the purposes of the "loan relationships" regime (which governs the United Kingdom taxation of most forms of corporate debt) contained in the United Kingdom Corporation Tax Act 2009. Shares will constitute material interests in an offshore fund for this purpose. An offshore fund fails to satisfy the qualifying investments test at any time when its investments consist as to more than 60% by market value of, inter alia, government and corporate debt securities, money placed at interest, certain derivative contracts or holdings in collective investment schemes which do not themselves satisfy the qualifying investments test. The investment policies of the Company are such that the Company could fail the qualifying investments test. Shareholders within the charge to United Kingdom corporation tax would in these circumstances be required to account for their interest in the Company under the loan relationships regime, in which case all returns on their Shares in the relevant accounting period (including gains and losses) would be taxed or relieved as income receipt or expense on a

"fair value" basis. Such Shareholders might therefore, depending upon their particular circumstances, incur a charge to United Kingdom corporation tax on an unrealised increase in the value of their Shares (or obtain relief against United Kingdom corporation tax for an unrealised diminution in the value of their Shares).

In the event that the Company is considered "close" for UK tax purposes then any Shareholder resident or ordinarily resident in the United Kingdom with an entitlement exceeding 10% of any gain that accrues to the Company may be subject to certain anti-avoidance legislation (contained in section 13 Taxation of Chargeable Gains Act 1992 ("TCGA")) in respect of any capital gains made by the Company. In the event that a liability arises, it may be applied in reducing or extinguishing any liability to income tax, capital gains tax or corporation tax in respect of a subsequent distribution from the Company of the capital gain made by the Company which gave rise to the liability under section 13 TCGA.

The attention of individuals ordinarily resident in the United Kingdom is drawn to the provisions of Sections 714 - 751 of the United Kingdom Income Taxes Act 2007 which may render such individuals liable to taxation in respect of any undistributed income of the Company.

The attention of companies resident in the United Kingdom is drawn to the fact that "controlled foreign companies provisions" contained in Sections 747 - 756 of the United Kingdom Income and Corporation Taxes Act 1988 (the "UK Taxes Act") could be material to any company so resident that holds alone, or together with certain other associated persons, 25% or more of Shares, if at the same time the Company is controlled by companies or other persons who are resident in the United Kingdom for taxation purposes. Persons who may be treated as "associated" with each other for these purposes include two or more companies one of which controls the other(s) or all of which are under common control. The effect of such provisions could be to render such United Kingdom companies liable to United Kingdom corporation tax in respect of undistributed income and profits of the Company.

The attention of United Kingdom resident and domiciled investors is drawn to Sections 703 to 709 of the UK Taxes Act (under which HMRC may seek to cancel tax advantages from certain transactions in securities). On the basis of current HMRC practice the Directors do not anticipate that the provisions of Section 703 should apply to the winding up of the Company.

Transfers of shares will not be liable to United Kingdom stamp duty unless the instrument of transfer is executed within the United Kingdom where the transfer would be liable to United Kingdom ad valorem stamp duty at the rate of 50p for every £100 or part of £100 of the consideration paid. United Kingdom stamp duty reserve tax will be payable at the rate of 50p for every £100 or part of £100 if shares of the company are listed in the United Kingdom.

The Company

The Directors intend to conduct the affairs of the Company so that it does not become resident in the United Kingdom for taxation purposes. Accordingly, and provided that the Company does not carry on a trade in the United Kingdom (whether or not through a branch or agency situated there), the Company will not be subject to United Kingdom income tax or corporation tax other than on any United Kingdom source income.

UNITED STATES OF AMERICA

Refer to Annex IV.

URUGUAY

The sale of the Shares of the Portfolios qualifies as a private placement pursuant to section 2 of Uruguayan Law 18,627. The Shares of the Portfolios must not be offered or sold to the public in Uruguay, except in circumstances which do not constitute a public offering or distribution under Uruguayan laws and regulations. The Shares of the Portfolios are not and will not be registered with the Financial Services Superintendency of the Central Bank of Uruguay. The Portfolios correspond to investment funds that are not investment funds registered by Uruguayan Law 16, 774 dated 27 September 1996, as amended.

VENEZUELA

Under the laws of the Republica Bolivariana de Venezuela, no offer of the securities described in this Prospectus may take place in Venezuela. This Prospectus may not be publicly distributed within the territory of Venezuela.

**ANNEX IV
OTHER IMPORTANT INFORMATION FOR U.S. PERSONS**

The Shares being offered hereby have not been approved or disapproved by the US Securities and Exchange Commission ("SEC") or by the securities regulatory authority of any state or of any other US jurisdiction or the CFTC, nor has the SEC or any such securities regulatory authority or the CFTC passed upon the accuracy or adequacy of this Prospectus, as it may be amended, restated or supplemented from time to time. Any representation to the contrary is a criminal offence.

The Shares have not been and will not be registered under the 1933 Act or the securities laws of any state or the United States, nor is any such registration contemplated. The Shares are being offered and will be offered and sold in the United States and to U.S. Persons under the exemption provided by Section 4(a)(2) of the 1933 Act and Regulation D promulgated thereunder. The offer and sale of the Shares outside the United States or to non-U.S. Persons will not be registered under the 1933 Act in reliance upon the exemption from registration provided by Regulation S promulgated thereunder.

Any re-offer, resale or transfer of Shares of the Company and/or any Portfolio in the United States or to U.S. Persons (as defined below) may constitute a violation of US law under certain circumstances; accordingly, any prospective investor or applicant for a subscription for the Shares and subsequent transferor and transferee involving the Shares, will be required to certify whether it is a U.S. Person in order to promote compliance with applicable US law in respect of the Shares, any Portfolio and the Company.

There is no public market for the Shares and no such market is expected to develop in the future. The Shares offered hereby may be sold, transferred, hypothecated or otherwise disposed of only upon the terms set out in this Prospectus and subject to the Articles which include the requirement to obtain the prior written consent of the Directors which may be withheld without the provision of any reasons.

The Shares are subject to restrictions on transferability and resale and may not be transferred or resold except as permitted by the Prospectus and the Articles and otherwise subject to compliance with the 1933 Act and other applicable securities laws, whether pursuant to registration thereunder or exemption therefrom.

The Company and each Portfolio have not been and will not be registered under the 1940 Act in reliance upon the exemption from such registration in Section 3(c)(7) of the 1940 Act for certain issuers based upon the status of each U.S. Person investor as a "qualified purchaser" within the meaning of Section 2(a)(51) of the 1940 Act.

Neuberger Berman Europe Limited, Neuberger Berman Asia Limited, Neuberger Berman Investment Advisers LLC, Neuberger Berman Singapore Pte. Limited, Neuberger Berman Canada ULC and NB Alternatives Advisers LLC are registered with the SEC as investment advisers.

The Shares are being offered outside the United States pursuant to an exemption from registration under the 1933 Act and the 1940 Act and if offered in the United States or to U.S. Persons will be offered to a limited number of "accredited investors" (as defined in Rule 501(a) of Regulation D under the 1933 Act) who are also "qualified purchasers" (as defined in Section 2(a)(51) of the 1940 Act), in reliance on the private placement exemption from the registration requirements of the 1933 Act provided by Section 4(a)(2) thereof and Regulation D thereunder and the exception to the definition of "investment company" in Section 3(c)(7) of the 1940 Act.

The Company will not admit as investors entities that are Benefit Plans. The Shares may not be offered, sold or transferred to any entity that is a Benefit Plan. Each transferor and each transferee of Shares will be deemed to represent and warrant that it is not a Benefit Plan and that it will not become a Benefit Plan while it holds Shares or an interest therein.

The Directors may refuse an application for Shares by or for the account or benefit of any U.S. Person or Benefit Plan or decline to register a transfer of Shares to or for the account or benefit of any U.S. Person or Benefit Plan and may require the mandatory redemption or transfer of Shares beneficially owned by any U.S. Person or Benefit Plan. See the "*Transfer of Shares*" and "*Mandatory Redemption of Shares*" sections for more details.

No offering materials will or may be employed in the offering of Shares except for this Prospectus (including appendices, exhibits, amendments, addenda and supplements hereto) and the documents summarised herein. No person has been authorised to make representations or give any information with respect to the Company or the Shares except for the information contained herein. Investors should not rely on information not contained in this Prospectus or the documents summarised herein.

The information and data set out in this Prospectus reflects or is based upon general information and data that are current as at the date of this Prospectus, unless otherwise stated. Certain information set out in this Prospectus is derived from or based upon information provided by independent third party sources, as to which the Directors, the Manager and their

affiliates and associated persons reasonably believes is accurate and reliable as to source without conducting separate or independent verification; accordingly, no guarantee is intended or may be inferred or implied as to the accuracy and reliability of such information or the assumptions on which such information may be premised or provided.

Certain information and data set out in this Prospectus may constitute forward-looking statements which generally reflect certain expectations, projections or future anticipated events based upon underlying conditions that may be subject to change. Due to the various risks and uncertainties inherent to any such forward-looking statements, including potential conflicts of interest, the actual outcome of various events or results and the actual performance of an investment in the Shares may differ materially from those reflected or contemplated in light of such forward-looking statements.

This Prospectus and the information contained herein are intended solely for use on a confidential basis by those persons to whom it is transmitted by or on behalf of the Company in connection with the contemplated private placement of the Shares. Recipients, by their acceptance and retention of this Prospectus, acknowledge and agree to preserve the confidentiality of the contents of this Prospectus and all accompanying documents and to return this Prospectus and all such documents to the Administrator if the recipient does not purchase any Shares. Neither this Prospectus nor any of the accompanying documents may be reproduced in whole or in part, nor may they be used for any purpose other than that for which they have been submitted, without the prior written consent of the Company or its authorized agents or representatives.

Notwithstanding the confidentiality conditions applicable to the information referred to in this Prospectus, each investor (including any appropriate employee, representative or agent of the investor) may disclose to any and all persons, without limitation, the tax treatment and tax structure of an investment in the Shares and related materials (including any opinions or tax information) that are provided to the investor relating to such tax treatment and tax structure.

None of the Company, any Portfolio, the Directors, the Administrator, the Manager or any affiliate or associated person of the foregoing is making any representation to any offeree or prospective investor in respect of the Shares regarding the legality of investment by such offeree or prospective investor under applicable investment or similar laws.

The Manager has claimed an exemption with respect to the Company and each Portfolio where relevant, under CFTC Rule 4.13(a)(3) from registration with the CFTC as a commodity pool operator and, accordingly, is not subject to certain regulatory requirements with respect to the Company or any such Portfolios (which are intended to provide certain regulatory safeguards to investors) that would otherwise be applicable absent such an exemption. In addition, the Manager will provide commodity interest trading advice to certain Portfolios, in each case pursuant to an exemption from registration as a commodity trading advisor in CFTC Rule 4.14(a)(5). Certain Sub-Investment Managers may rely upon an exemption from registration with the CFTC as a commodity trading advisor under CFTC Rule 4.14(a)(8) and act in an unregistered capacity with respect to one or more of the Company's Portfolios, despite the fact that such Sub-Investment Managers are registered as commodity trading advisors.

WHILE CERTAIN PORTFOLIOS MAY TRADE COMMODITY INTERESTS, INCLUDING BUT NOT LIMITED TO, SWAPS, COMMODITY FUTURES AND/OR COMMODITY OPTIONS CONTRACTS, THE MANAGER IS EXEMPT FROM REGISTRATION WITH THE CFTC AS A COMMODITY POOL OPERATOR ("CPO") WITH RESPECT TO THOSE PORTFOLIOS PURSUANT TO CFTC RULE 4.13(a)(3). THEREFORE, UNLIKE A REGISTERED CPO, THE MANAGER IS NOT REQUIRED TO DELIVER A CFTC DISCLOSURE DOCUMENT TO PROSPECTIVE SHAREHOLDERS, NOR IS IT REQUIRED TO PROVIDE SHAREHOLDERS WITH CERTIFIED ANNUAL REPORTS THAT SATISFY THE REQUIREMENTS OF CFTC RULES APPLICABLE TO REGISTERED CPOs.

THE MANAGER QUALIFIES FOR THE EXEMPTION UNDER CFTC RULE 4.13(a)(3) WITH RESPECT TO CERTAIN PORTFOLIOS THAT MAY TRADE COMMODITY INTERESTS ON THE BASIS THAT, AMONG OTHER THINGS, (A) SUCH PORTFOLIO'S COMMODITY INTEREST POSITIONS (WHETHER OR NOT ENTERED INTO FOR BONA FIDE HEDGING PURPOSES) ARE LIMITED SUCH THAT EITHER: (I) THE AGGREGATE INITIAL MARGIN, PREMIUMS AND REQUIRED MINIMUM SECURITY DEPOSIT FOR RETAIL FOREX TRANSACTIONS REQUIRED TO ESTABLISH SUCH POSITIONS, DETERMINED AT THE TIME THE MOST RECENT POSITION WAS ESTABLISHED, WILL BE LIMITED TO 5% OF THE LIQUIDATION VALUE OF SUCH PORTFOLIO'S INVESTMENTS, AFTER TAKING INTO ACCOUNT UNREALIZED PROFITS AND UNREALIZED LOSSES ON ANY SUCH POSITIONS IT HAS ENTERED INTO; OR (II) THE AGGREGATE NET NOTIONAL VALUE OF SUCH POSITIONS (CALCULATED AS FURTHER DESCRIBED IN CFTC RULE 4.13(A)(3)), DETERMINED AT THE TIME THE MOST RECENT POSITION WAS ESTABLISHED, DOES NOT EXCEED 100% OF THE LIQUIDATION VALUE OF SUCH PORTFOLIO'S INVESTMENTS, AFTER TAKING INTO ACCOUNT UNREALIZED PROFITS AND UNREALIZED LOSSES ON ANY POSITIONS IT HAS ENTERED INTO; (B) THE SHARES OF SUCH PORTFOLIO ARE EXEMPT FROM REGISTRATION UNDER THE 1933 ACT AND ARE OFFERED AND SOLD WITHOUT MARKETING TO THE PUBLIC IN THE UNITED STATES; (C) THE MANAGER REASONABLY BELIEVES, AT THE TIME A U.S. PERSON INVESTOR MAKES HIS INVESTMENT IN SUCH PORTFOLIO (OR AT THE TIME THE CPO BEGAN TO RELY ON RULE 4.13(A)(3)), THAT SUCH U.S. PERSON INVESTOR IN SUCH PORTFOLIO IS (I) AN "ACCREDITED INVESTOR," AS DEFINED IN RULE 501(a) OF REGULATION D UNDER THE 1933 ACT, (II) A TRUST THAT IS NOT AN ACCREDITED INVESTOR BUT THAT WAS FORMED BY AN ACCREDITED INVESTOR FOR THE BENEFIT OF A FAMILY MEMBER, (III) A "KNOWLEDGEABLE

EMPLOYEE,” AS DEFINED IN RULE 3c-5 UNDER THE 1940 ACT, OR (IV) A “QUALIFIED ELIGIBLE PERSON,” AS DEFINED IN CFTC RULE 4.7(a)(2)(viii)(A); AND (D) SHARES OF SUCH PORTFOLIO ARE NOT MARKETED AS OR IN A VEHICLE FOR TRADING IN THE COMMODITY FUTURES OR COMMODITY OPTIONS MARKETS].

Subscriptions by and Transfers to U.S. Persons

The Directors may authorise the purchase by or transfer of Shares to or on behalf of a U.S. Person if:

- (a) such purchase or transfer does not result in a violation of the 1933 Act or the securities laws of any state of the United States;
- (b) such purchase or transfer would not require the Company or any Portfolio to register under the 1940 Act, or the Manager to register as a CPO; and
- (c) there will be no adverse regulatory, tax or fiscal consequences or material administrative disadvantage to a Portfolio or its Shareholders as a whole as a result of such a purchase or transfer.

Each applicant for Shares who is in the United States or a U.S. Person will be required to provide such representations, warranties or documentation as may be required by the Directors to ensure that such requirements are met prior to approval of such sale or transfer by the Directors. The Directors shall determine from time to time the number of U.S. Persons who may be admitted into the Company. The Directors have determined to permit the private sale of Shares in the United States or to U.S. Persons to a limited number of “accredited investors” (as defined in Rule 501(a) of Regulation D under the 1933 Act) who are also “qualified purchasers” (as defined in Section 2(a)(51) of the 1940 Act) under restrictions and other circumstances designed to preclude any requirement to register the Shares under the 1933 Act or any securities law of any state of the United States, or cause the Company or any Portfolio to become subject to the registration requirements of the 1940 Act, including presentation by such investors, prior to the delivery to them of Shares, of a letter containing specified representations and agreements.

Accordingly, amongst other things, each investor that is a U.S. Person will be required to represent, among other customary private placement representations, that it: (i) is an “accredited investor” as defined in Regulation D; (ii) it will not transfer or deliver all or any part of its Shares except in accordance with the restrictions set forth in the Prospectus and the Articles; (iii) is acquiring the Shares for the its own account, for investment purposes only and not with a view to resale or distribution; and (iv) is a “qualified purchaser” for purposes of the 1940 Act. A “qualified purchaser” generally includes a natural person who owns not less than US\$5,000,000 in investments or a company acting for its own account or the accounts of other qualified purchasers which owns and invests on a discretionary basis not less than US\$25,000,000 in investments (as defined in the 1940 Act) and certain trusts. Further, the subscription application form and the Articles contain restrictions on transfer designed to assure that these conditions will be met.

Unless otherwise agreed by the Directors, each non-US investor will be required to represent, amongst other things, that it: (i) is not a U.S. Person; (ii) will not transfer or deliver all or any part of its Shares except in accordance with the restrictions set forth in the Articles and this Prospectus; (iii) will notify the Directors immediately if it becomes a U.S. Person at any time during which it holds or owns any Shares; (iv) is not acquiring Shares on behalf of or for the benefit of, a U.S. Person; (v) is acquiring the Shares for its own account, for investment purposes only and not with a view to resale or distribution; and (vi) received information as to offers to sell and communicated offers to buy the Shares, as the case may be, whilst it was outside the United States and was outside the United States at the time it originated its application to buy the Shares.

The Directors may refuse an application for Shares by or for the account or benefit of any U.S. Person or decline to register a transfer of Shares to or for the account or benefit of any U.S. Person and may require the mandatory redemption or transfer of Shares beneficially owned by any U.S. Person.

A “**U.S. Person**” for the purposes of this Prospectus is a person who is in one of the following categories: (i) (A) a “U.S. Person” as defined under Regulation S under the 1933 Act; (B) a “United States person” as defined under the Code; or (C) a “U.S. Person” as defined under the CFTC’s “Interpretive Guidance and Policy Statement Regarding Compliance with Certain Swap Regulations,” (each as described in further detail below); or (ii) a person excluded from the definition of a “Non-United States person” as used in CFTC Rule 4.7 (as described in further detail below). For the avoidance of doubt, a person is excluded from this definition of U.S. Person only if he or it does not satisfy any of the definitions of “U.S. Person” or “United States person” set forth below and qualifies as a “Non-United States person” under CFTC Rule 4.7. Further details regarding each of these definitions is provided below.

With respect to any person, any individual or entity that would be a “U.S. Person” under Regulation S of the 1933 Act.

1. Pursuant to Regulation S of the 1933 Act, “U.S. Person” includes:
 - (a) any natural person resident in the United States;

- (b) any partnership or corporation organised or incorporated under the laws of the United States;
 - (c) any estate of which any executor or administrator is a U.S. Person;
 - (d) any trust of which any trustee is a U.S. Person;
 - (e) any agency or branch of a foreign entity located in the United States;
 - (f) any non-discretionary account or similar account (other than an estate or trust) held by a dealer or other fiduciary for the benefit or account of a U.S. Person;
 - (g) any discretionary account or similar account (other than an estate or trust) held by a dealer or other fiduciary organised, incorporated, or (if an individual) resident in the United States; or
 - (h) any partnership or corporation if:
 - (i) organised or incorporated under the laws of any foreign jurisdiction; and
 - (ii) formed by a U.S. Person principally for the purpose of investing in securities not registered under the 1933 Act, unless it is organised or incorporated and owned, by accredited investors (as defined in Rule 501(a) under the 1933 Act) who are not natural persons, estates or trusts.
2. Notwithstanding 1. above, any discretionary account or similar account (other than an estate or trust) held for the benefit or account of a non-U.S. Person by a dealer or other professional fiduciary organised, incorporated, or (if an individual) resident in the United States shall not be deemed a U.S. Person.
 3. Notwithstanding 1. above, any estate of which any professional fiduciary acting as executor or administrator is a U.S. Person shall not be deemed a U.S. Person if:
 - (a) an executor or administrator of the estate who is not a U.S. Person has sole or shared investment discretion with respect to the assets of the estate; and
 - (b) the estate is governed by foreign law.
 4. Notwithstanding 1. above, any trust of which any professional fiduciary acting as trustee is a U.S. Person shall not be deemed a U.S. Person if a trustee who is not a U.S. Person has sole or shared investment discretion with respect to the trust assets and no beneficiary of the trust (and no settlor if the trust is revocable) is a U.S. Person.
 5. Notwithstanding 1. above, an employee benefit plan established and administered in accordance with the law of a country other than the United States and customary practices and documentation of such country shall not be deemed a U.S. Person.
 6. Notwithstanding 1. above, any agency or branch of a U.S. Person located outside the United States shall not be deemed a U.S. Person if:
 - (a) the agency or branch operates for valid business reasons; and
 - (b) the agency or branch is engaged in the business of insurance or banking and is subject to substantive insurance or banking regulation, respectively, in the jurisdiction where located.
 7. The International Monetary Fund, the International Bank for Reconstruction and Development, the Inter-American Development Bank, the Asian Development Bank, the African Development Bank, the United Nations and their agencies, affiliates and pension plans and any other similar international organisations, their agencies, affiliates and pension plans shall not be deemed "U.S. Persons."

With respect to individuals, any US citizen or "resident alien" within the meaning of US income tax laws as in effect from time to time. Currently, the term "resident alien" is defined under US income tax laws to generally include any individual who (i) holds an Alien Registration Card (a "green card") issued by the US Immigration and Naturalization Service or (ii) meets a "substantial presence" test. The "substantial presence" test is generally met with respect to any current calendar year if (i) the individual was present in the US on at least 31 days during such year and (ii) the sum of the number of days on which such individual was present in the US during the current year, 1/3 of the number of such days during the first preceding year and 1/6 of the number of such days during the second preceding year, equals or exceeds 183 days.

With respect to persons other than individuals: (i) a corporation or partnership created or organised in the US or under

the laws of the US or any state or the District of Columbia; (ii) a trust where (A) a US court is able to exercise primary supervision over the administration of the trust or (B) one or more U.S. Persons have the authority to control all substantial decisions of the trust; and (iii) an estate other than a foreign estate. A “foreign estate” is defined as an estate the income of which, from sources without the US which is not effectively connected with the conduct of a trade or business within the US, is not includible in gross income under the US Internal Revenue Code of 1986, as amended.

A “U.S. Person” as defined under the CFTC’s “Interpretive Guidance and Policy Statement Regarding Compliance with Certain Swap Regulations,” July 26, 2013, 78 Fed. Reg. 45291 (July 26, 2013), which generally includes, but is not limited to: (a) any natural person who is a resident of the United States; (b) any estate of a decedent who was a resident of the United States at the time of death; (c) any corporation, partnership, limited liability company, business or other trust, association, joint-stock company, fund or any form of enterprise similar to any of the foregoing (other than an entity described in prongs (d) or (e), below) (a “legal entity”), in each case that is organized or incorporated under the laws of a state or other jurisdiction in the United States or having its principal place of business in the United States; (d) any pension plan for the employees, officers or principals of a legal entity described in prong (c), unless the pension plan is primarily for foreign employees of such entity; (e) any trust governed by the laws of a state or other jurisdiction in the United States, if a court within the United States is able to exercise primary supervision over the administration of the trust; (f) any commodity pool, pooled account, investment fund, or other collective investment vehicle that is not described in prong (c) and that is majority-owned by one or more persons described in prong (a), (b), (c), (d) or (e), except any commodity pool, pooled account, investment fund, or other collective investment vehicle that is publicly offered only to non-U.S. persons and not offered to U.S. persons; (g) any legal entity (other than a limited liability company, limited liability partnership or similar entity where all of the owners of the entity have limited liability) that is directly or indirectly majority-owned by one or more persons described in prong (a), (b), (c), (d) or (e) and in which such person(s) bears unlimited responsibility for the obligations and liabilities of the legal entity; and (h) any individual account or joint account (discretionary or not) where the beneficial owner (or one of the beneficial owners in the case of a joint account) is a person described in prong (a), (b), (c), (d), (e), (f) or (g). Under this interpretation, the term “U.S. person” generally means that a foreign branch of a U.S. person would be covered by virtue of the fact that it is a part, or an extension of, a U.S. person.

CFTC Rule 4.7 currently provides in relevant part that the following persons are considered “Non-United States persons”:

- (a) a natural person who is not a resident of the United States;
- (b) a partnership, corporation or other entity, other than an entity organised principally for passive investment, organised under the laws of a non-U.S. jurisdiction and which has its principal place of business in a non-U.S. jurisdiction;
- (c) an estate or trust, the income of which is not subject to U.S. income tax regardless of source;
- (d) an entity organised principally for passive investment such as a pool, investment company or other similar entity, provided, that units of participation in the entity held by persons who do not qualify as Non-United States persons or otherwise as qualified eligible persons (as defined in CFTC Rule 4.7(a)(2) or (3)) represent in the aggregate less than ten per cent. of the beneficial interest in the entity and that such entity was not formed principally for the purpose of facilitating investment by persons who do not qualify as Non-United States persons in a pool with respect to which the operator is exempt from certain requirements of Part 4 of the CFTC’s regulations by virtue of its participants being Non-United States persons; and
- (e) a pension plan for the employees, officers or principals of an entity organised and with its principal place of business outside the United States.

Taxation

THE DISCUSSION HEREIN IS FOR INFORMATIONAL PURPOSES ONLY AND IS A DISCUSSION PRIMARILY OF THE U.S. TAX CONSEQUENCES TO PROSPECTIVE SHAREHOLDERS. EACH PROSPECTIVE SHAREHOLDER SHOULD CONSULT ITS PROFESSIONAL TAX ADVISOR WITH RESPECT TO THE TAX ASPECTS OF AN INVESTMENT IN THE COMPANY. TAX CONSEQUENCES MAY VARY DEPENDING UPON THE PARTICULAR STATUS OF A PROSPECTIVE SHAREHOLDER. IN ADDITION, SPECIAL CONSIDERATIONS (NOT DISCUSSED HEREIN) MAY APPLY TO PERSONS WHO ARE NOT DIRECT SHAREHOLDERS IN THE COMPANY BUT WHO ARE DEEMED TO OWN SHARES AS A RESULT OF THE APPLICATION OF CERTAIN ATTRIBUTION RULES.

Neither the Company nor any Portfolios has sought a ruling from the IRS or any other U.S. federal, state or local agency with respect to any of the tax issues affecting the Company or such Portfolio, nor has the Company or a Portfolio obtained an opinion of counsel with respect to any tax issues.

The following is a summary of certain potential U.S. federal tax consequences which may be relevant to prospective shareholders. The discussion contained herein is not a full description of the complex tax rules involved and is based

upon existing laws, judicial decisions and administrative regulations, rulings and practices, all of which are subject to change, retroactively as well as prospectively. A decision to invest in the Company should be based upon an evaluation of the merits of the trading program and not upon any anticipated U.S. tax benefits.

U.S. Tax Status

Each Portfolio intends to operate as a separate corporation for U.S. federal tax purposes. The remainder of the U.S. tax discussion herein assumes that the Portfolios will be treated as separate corporations for U.S. federal tax purposes.

U.S. Trade or Business

Section 864(b)(2) of the U.S. Internal Revenue Code of 1986, as amended (the "IRC"), provides a safe harbor (the "Safe Harbor") applicable to a non-U.S. corporation (other than a dealer in securities) that engages in the U.S. in trading securities (including contracts or options to buy or sell securities) for its own account pursuant to which such non-U.S. corporation will not be deemed to be engaged in a U.S. trade or business. The Safe Harbor also provides that a non-U.S. corporation (other than a dealer in commodities) that engages in the U.S. in trading commodities for its own account is not deemed to be engaged in a U.S. trade or business if "the commodities are of a kind customarily dealt in on an organized commodity exchange and if the transaction is of a kind customarily consummated at such place."

Pursuant to proposed regulations, a non-U.S. taxpayer (other than a dealer in stocks, securities or derivatives) that effects transactions in the United States in derivatives (including (i) derivatives based upon stocks, securities and certain commodities and currencies and (ii) certain notional principal contracts based upon an interest rate, equity, or certain commodities and currencies) for its own account is not deemed to be engaged in a United States trade or business. Although the proposed regulations are not final, the Service has indicated in the preamble to the proposed regulations that for periods prior to the effective date of the proposed regulations, taxpayers may take any reasonable position with respect to the application of Section 864(b)(2) of the IRC to derivatives and that a position consistent with the proposed regulations will be considered a reasonable position.

Based on the foregoing, each Portfolio intends to conduct its business in a manner so as to meet the requirements of the Safe Harbor. Thus, each Portfolio's securities and commodities trading activities should not constitute a U.S. trade or business and, except in the limited circumstances discussed below, the Portfolios should not be subject to the regular U.S. income tax on any of their trading profits. However, if a certain Portfolio's activities were determined not to be of the type described in the Safe Harbor, such Portfolio's activities may constitute a U.S. trade or business, in which case such Portfolio would be subject to U.S. income and branch profits tax on the income and gain from those activities.

Even if the Portfolios' securities trading activities do not constitute a U.S. trade or business, gains realized from the sale or disposition of stock or securities (other than debt instruments with no equity component) of U.S. Real Property Holding Corporations (as defined in Section 897 of the IRC) ("USRPHCs"), including stock or securities of certain Real Estate Investment Trusts ("REITs"), will be generally subject to U.S. income tax on a net basis. However, a principal exception to this rule of taxation may apply if such USRPHC has a class of stock which is regularly traded on an established securities market and the applicable Portfolio generally did not hold (and was not deemed to hold under certain attribution rules) more than 5% of the value of a regularly traded class of stock or securities of such USRPHC at any time during the five year period ending on the date of disposition. Moreover, if a Portfolio were deemed to be engaged in a U.S. trade or business as a result of owning a limited partnership interest in a U.S. business partnership or a similar ownership interest, income and gain realized from that investment would be subject to U.S. income and branch profits tax.

U.S. Withholding Tax

In general, under Section 881 of the IRC, a non-U.S. corporation which does not conduct a U.S. trade or business is nonetheless subject to tax at a flat rate of 30% (or lower tax treaty rate, if applicable) on the gross amount of certain U.S. source income which is not effectively connected with a U.S. trade or business, generally payable through withholding. Income subject to such a flat tax rate is of a fixed or determinable annual or periodic nature, including dividends and certain interest income. The Portfolios are not eligible under the U.S.-Ireland tax treaty for reduced withholding tax rates on U.S.-source dividends and interest.

Certain types of income are specifically exempted from the 30% tax and thus withholding is not required on payments of such income to a non-U.S. corporation. The 30% tax does not apply to U.S. source capital gains (whether long or short-term) or to interest paid to a non-U.S. corporation on its deposits with U.S. banks. The 30% tax also does not apply to interest which qualifies as portfolio interest. The term "portfolio interest" generally includes interest (including original issue discount) on an obligation in registered form which has been issued after July 18, 1984 and with respect to which the person who would otherwise be required to deduct and withhold the 30% tax receives the required statement that the beneficial owner of the obligation is not a U.S. person within the meaning of the IRC. Under certain circumstances, interest on bearer obligations may also be considered portfolio interest.

The U.S. tax treatment of any rebate of fees made by a U.S. Sub-Investment Manager to a non-U.S. Person is not entirely clear. A U.S. withholding tax may be imposed on such a rebate. Non-U.S. Persons are urged to consult their own tax advisors concerning the U.S. tax consequence of an investment in the Company and the receipt of such payments.

Redemption of Shares

Gain realized by shareholders who are not U.S. persons within the meaning of the IRC ("non-U.S. shareholders") upon the sale, exchange or redemption of Shares held as a capital asset should generally not be subject to U.S. federal income tax provided that the gain is not effectively connected with the conduct of a trade or business in the U.S. However, in the case of non-resident alien individuals, such gain will be subject to the 30% (or lower tax treaty rate) U.S. tax if (i) such person is present in the U.S. for 183 days or more during the taxable year (on a calendar year basis unless the non-resident alien individual has previously established a different taxable year) and (ii) such gain is derived from U.S. sources.

Generally, the source of gain upon the sale, exchange or redemption of Shares is determined by the place of residence of the shareholder. For purposes of determining the source of gain, the IRC defines residency in a manner that may result in an individual who is otherwise a non-resident alien with respect to the U.S. being treated as a U.S. resident only for purposes of determining the source of income. Each potential individual shareholder who anticipates being present in the U.S. for 183 days or more (in any taxable year) should consult his tax advisor with respect to the possible application of this rule.

Gain realized by a non-U.S. shareholder engaged in the conduct of a U.S. trade or business will be subject to U.S. federal income tax upon the sale, exchange or redemption of Shares if such gain is effectively connected with its U.S. trade or business.

Non-U.S. shareholders may be required to make certain certifications to the Company or the Portfolios as to the beneficial ownership of the Shares and the non-U.S. status of such beneficial owner, in order to be exempt from U.S. information reporting and backup withholding on a redemption of Shares.

Tax-Exempt U.S. Persons

The term "Tax-Exempt U.S. Person" means a U.S. person within the meaning of the IRC that is exempt from payment of U.S. federal income tax. Generally, a Tax-Exempt U.S. Person is exempt from federal income tax on certain categories of income, such as dividends, interest, capital gains and similar income realized from securities investment or trading activity. This type of income is exempt even if it is realized from securities trading activity which constitutes a trade or business. This general exemption from tax does not apply to the "unrelated business taxable income" ("UBTI") of a Tax-Exempt U.S. Person. Generally, except as noted above with respect to certain categories of exempt trading activity, UBTI includes income or gain derived from a trade or business, the conduct of which is substantially unrelated to the exercise or performance of the Tax-Exempt U.S. Person's exempt purpose or function. UBTI also includes (i) income derived by a Tax-Exempt U.S. Person from debt-financed property and (ii) gains derived by a Tax-Exempt U.S. Person from the disposition of debt-financed property.

In 1996, Congress considered whether, under certain circumstances, income derived from the ownership of the shares of a non-U.S. corporation should be treated as UBTI to the extent that it would be so treated if earned directly by the shareholder. Subject to a narrow exception for certain insurance company income, Congress declined to amend the IRC to require such treatment. Accordingly, based on the principles of that legislation, a Tax-Exempt U.S. Person investing in a non-U.S. corporation such as a Portfolio should not realize UBTI with respect to an unleveraged investment in Shares. The U.S. tax treatment of any rebate of fees made by the Manager, any Sub-Investment Manager or the Distributor to a Tax-Exempt U.S. Person is not entirely clear. Tax-Exempt U.S. Persons are urged to consult their own tax advisors concerning the U.S. tax consequences of an investment in a Portfolio and the receipt of such payments.

There are special considerations which should be taken into account by certain beneficiaries of charitable remainder trusts that invest in the Portfolios. Charitable remainder trusts should consult their own tax advisors concerning the tax consequences of such an investment on their beneficiaries.

U.S. Persons that are not Tax-Exempt U.S. Persons

Each Portfolio will be classified as a passive foreign investment company ("PFIC") for federal income tax purposes. It is possible that a Portfolio will hold interests in one or more other PFICs (any such underlying PFIC, an "Underlying PFIC"). In addition, it is possible that a Portfolio or an Underlying PFIC will be a controlled foreign corporation ("CFC"). Under the PFIC rules, U.S. persons within the meaning of the IRC that are not Tax Exempt U.S. Persons ("Non Tax-Exempt U.S. Persons") are subject to U.S. federal income taxation with respect to their direct or indirect investment in a Portfolio or an Underlying PFIC under one of three methods. Under the "interest charge" method, a Non Tax-Exempt U.S. Person

is generally liable for tax (at ordinary income rates) plus an interest charge reflecting the deferral of tax liability (which is not deductible by an individual) when it pledges or sells its Shares at a gain or receives a distribution from such Portfolio or an Underlying PFIC. Furthermore, the estate of a deceased individual Non Tax-Exempt U.S. Person will be denied a tax-free "step-up" in the tax basis to fair market value for PFIC shares held by that deceased individual that were subject to the "interest charge" method.

Alternatively, a Non Tax-Exempt U.S. Person can make an election under the PFIC rules to have a Portfolio or an Underlying PFIC treated as a qualified electing fund ("QEF") with respect to its Shares. A Shareholder that has made the QEF election, which may only be revoked with the consent of the Service, is generally taxed currently on its proportionate share of the ordinary earnings and net long-term capital gains of such Portfolio or Underlying PFIC, whether or not the earnings or gains are distributed. However, a Portfolio or Underlying PFIC expenses, if any, that are properly capitalized will not be deductible for purposes of calculating the income included as a result of the QEF election. If a Portfolio or an Underlying PFIC realizes a net loss in a particular year, under the QEF rules, that loss will not pass through to the Non Tax-Exempt U.S. Person nor will it be netted against the income of any other PFIC with respect to which a QEF election has been made. Moreover, the loss also cannot be carried forward to reduce inclusions of income with respect to such Portfolio or Underlying PFIC, as applicable, in subsequent years. Instead, a Non Tax-Exempt U.S. Person would only realize the loss in calculating its gain or loss when its interest in the Portfolio or Underlying PFIC is disposed of. A Non Tax-Exempt U.S. Person should also note that under the QEF rules, it may be taxed on income related to unrealized appreciation in a Portfolio's or Underlying PFIC's assets attributable to periods prior to the investor's investment in the PFIC if such amounts are recognized by the PFIC after the investor acquires Shares. Moreover, any net short-term capital gains of a Portfolio or Underlying PFIC will not pass through as capital gains, but will be taxed as ordinary income. In order for a shareholder to be eligible to make a QEF election, the PFIC would have to agree to provide certain tax information to such shareholder on an annual basis. The Portfolios and the Underlying PFICs, if any, have not committed to providing such information.

Finally, if a Portfolio's or an Underlying PFIC's shares are considered "marketable", a Non Tax-Exempt U.S. Person would be able to elect to mark its shares to market at the end of every year. Any such mark to market gain or loss would be considered ordinary. Ordinary mark to market losses would only be allowed to the extent of prior mark to market gains. However, as a result of the definition of "marketable" adopted in regulations, the Portfolios do not anticipate that the Shares or shares of an Underlying PFIC would be eligible for the mark to market election.

Even though the PFIC rules apply, if a Portfolio or an Underlying PFIC is also a CFC, other rules could apply in addition to the PFIC rules that could cause a Non Tax-Exempt U.S. Person to (i) recognize taxable income prior to his or her receipt of distributable proceeds or (ii) recognize ordinary taxable income that would otherwise have been treated as long-term or short-term capital gain.

INASMUCH AS NON TAX-EXEMPT U.S. PERSONS ARE SUBJECT TO POTENTIALLY ADVERSE TAX CONSEQUENCES IF THEY INVEST IN A PORTFOLIO AND THE FOREGOING SUMMARY IS ONLY A BRIEF OVERVIEW OF HIGHLY COMPLEX RULES, SUCH POTENTIAL INVESTORS ARE STRONGLY URGED TO CONSULT WITH THEIR OWN TAX ADVISORS BEFORE INVESTING IN A PORTFOLIO.

Reporting Requirements for U.S. Persons

Any U.S. person within the meaning of the IRC owning 10% or more (taking certain attribution rules into account) of either the total combined voting power or total value of all classes of the shares (the "10% Amount") of a non-U.S. corporation such as a Portfolio will likely be required to file an information return with the Service containing certain disclosure concerning the filing shareholder, other shareholders and the corporation. Any U.S. person within the meaning of the IRC who within such U.S. person's tax year (A) acquires shares in a non-U.S. corporation such as a Portfolio, so that either (i) without regard to shares already owned, such U.S. person acquires the 10% Amount or (ii) when added to shares already owned by the U.S. person, such U.S. person's total holdings in the non-U.S. corporation goes above the 10% Amount or (B) disposes of shares in a non-U.S. corporation so that such U.S. person's total holdings in the non-U.S. corporation falls below the 10% Amount (in each such case, taking certain attribution rules into account), will likely be required to file an information return with the Service containing certain disclosure concerning the filing shareholder, other shareholders and the corporation. The Portfolios have not committed to provide all of the information about the Portfolios or their shareholders needed to complete these returns. In addition, a U.S. person within the meaning of the IRC that transfers cash to a non-U.S. corporation such as a Portfolio may be required to report the transfer to the Service if (i) immediately after the transfer, such person holds (directly, indirectly or by attribution) at least 10% of the total voting power or total value of such corporation or (ii) the amount of cash transferred by such person (or any related person) to such corporation during the twelve-month period ending on the date of the transfer exceeds \$100,000.

Certain U.S. persons who have an interest in a foreign financial account during a calendar year are generally required to file FinCEN Form 114 (an "FBAR") with respect to such account. Failure to file a required FBAR may result in civil and criminal penalties. Investors should consult with their own advisors as to whether they are obligated to file an FBAR with respect to an investment in a Portfolio.

Furthermore, certain U.S. persons within the meaning of the IRC may have to file Form 8886 ("Reportable Transaction Disclosure Statement") with their U.S. tax return and submit a copy of Form 8886 with the Office of Tax Shelter Analysis of the Service if the Portfolio in which they are invested or the Company engages in certain "reportable transactions" within the meaning of recently issued U.S. Treasury Regulations. If the Service designates a transaction as a reportable transaction after the filing of a reporting shareholder's tax return for the year in which such Portfolio or such reporting shareholder participated in the transaction, the reporting shareholder may have to file Form 8886 with respect to that transaction within 90 days after the Service makes the designation. Shareholders required to file this report include a U.S. person within the meaning of the IRC if either (1) a Portfolio is treated as a CFC and such U.S. person owns a 10% voting interest or (2) such U.S. person owns 10% (by vote or value) of a Portfolio and makes a QEF election with respect to the such Portfolio. In certain situations, there may also be a requirement that a list be maintained of persons participating in such reportable transactions, which could be made available to the Service at its request. Moreover, if a U.S. person within the meaning of the IRC recognizes a loss upon a disposition of Shares, such loss could constitute a "reportable transaction" for such shareholder and such shareholder would be required to file Form 8886. A significant penalty is imposed on taxpayers who fail to make the required disclosure. The penalty is generally \$10,000 for natural persons and \$50,000 for other persons (increased to \$100,000 and \$200,000, respectively, if the reportable transaction is a "listed" transaction). Shareholders who are U.S. persons within the meaning of the IRC (including Tax-Exempt U.S. Persons) are urged to consult their own tax advisors concerning the application of these reporting obligations to their specific situations and the penalty discussed above.

Estate and Gift Taxes

Individual holders of Shares who are neither present nor former U.S. citizens or U.S. residents (as determined for U.S. estate and gift tax purposes) are not subject to U.S. estate and gift taxes with respect to their ownership of such Shares.

Other Jurisdictions

Interest, dividend and other income realized by a Portfolio from non-U.S. sources and capital gains realized on the sale of securities of non-U.S. issuers, may be subject to withholding and other taxes levied by the jurisdiction in which the income is sourced. It is impossible to predict the rate of foreign tax such Portfolio will pay since the amount of the assets to be invested in various countries and the ability of the such Portfolio to reduce such taxes, are not known.

Future Changes in Applicable Law

The foregoing description of U.S. income tax consequences of an investment in and the operations of the Company and the Portfolios is based on laws and regulations which are subject to change through legislative, judicial or administrative action. Other legislation could be enacted that would subject the Company or the Portfolios to income taxes or subject shareholders to increased income taxes.

FATCA

Investors should also refer to the "FATCA" sub-section of the "Taxation" section.

Other Taxes

Prospective shareholders should consult their own counsel regarding tax laws and regulations of any other jurisdiction which may be applicable to them.

THE TAX AND OTHER MATTERS DESCRIBED IN THIS PROSPECTUS DO NOT CONSTITUTE AND SHOULD NOT BE CONSIDERED AS, LEGAL OR TAX ADVICE TO PROSPECTIVE SHAREHOLDERS.

ANNEX V
LIST OF DELEGATES AND SUB-DELEGATES

COUNTRY WHERE ASSETS HELD	SUBCUSTODIAN
Argentina	CITIBANK, N.A. BUENOS AIRES BRANCH
Australia	HSBC BANK AUSTRALIA LIMITED FOR THE HONGKONG AND SHANGHAI BANKING CORPORATION LIMITED (HSBC)
Austria	UNICREDIT BANK AUSTRIA AG
Bahrain *	HSBC BANK MIDDLE EAST LIMITED, BAHRAIN BRANCH FOR THE HONGKONG AND SHANGHAI BANKING CORPORATION LIMITED (HSBC)
Belgium	BNP PARIBAS SECURITIES SERVICES
Bermuda *	HSBC BANK BERMUDA LIMITED FOR THE HONGKONG AND SHANGHAI BANKING CORPORATION LIMITED (HSBC)
Botswana *	STANDARD CHARTERED BANK BOTSWANA LIMITED FOR STANDARD CHARTERED BANK
Brazil *	CITIBANK, N.A. - SAO PAULO
Canada	RBC INVESTOR SERVICES TRUST FOR ROYAL BANK OF CANADA (RBC)
Chile *	BANCO DE CHILE FOR CITIBANK, N.A.
China *	STANDARD CHARTERED BANK (CHINA) LIMITED FOR STANDARD CHARTERED BANK
China *	HSBC BANK (CHINA) COMPANY LIMITED FOR THE HONGKONG AND SHANGHAI BANKING CORPORATION LIMITED (HSBC)

ANNEX VI SUSTAINABLE FINANCE DISCLOSURE REGULATION

This Annex VI has been prepared in accordance with the requirements of SFDR. Prospective investors should review the Supplement for the relevant Portfolio for information pertaining to the investment objective, investment policies, investment restrictions as well as the investment risks pertaining to an investment in the relevant Portfolio. This Annex VI (the "**SFDR Annex**") contains additional information pertaining to SFDR. This SFDR Annex forms part of and should be read in conjunction with the Prospectus and the Supplement for the relevant Portfolio. In the event of any inconsistency between the terms of this SFDR Annex in relation to SFDR and the terms of the relevant Supplement, this SFDR Annex shall prevail.

SFDR seeks to establish a pan-European framework to facilitate Sustainable Investment, by providing for a harmonised approach in respect of sustainability-related disclosures to investors within the European Union's financial services sector. In the absence of such harmonisation, individual EU Member States would be free to adopt divergent disclosure standards or develop different approaches, resulting in an uneven playing field and/or creating barriers to entry for asset managers looking to make available financial products within the internal market of the European Union. The scope of SFDR is extremely broad, covering a very wide range of financial products (e.g. UCITS funds, AIFs, pension schemes etc) and financial market participants (e.g. EU authorised investment managers and advisers). It seeks to achieve more transparency regarding how financial market participants integrate Sustainability Risks into their investment decisions and the consideration of adverse sustainability impacts into the investment process. The objectives of SFDR are to (i) strengthen protection for investors of financial products, (ii) improve the disclosures made available to investors from financial market participants and (iii) improve the disclosures made available to investors regarding the financial products, to amongst other things, enable investors make informed investment decisions.

For the purposes of SFDR, each Portfolio of the Company qualifies as a financial product.

Accordingly, SFDR compliant disclosures in respect of each Portfolio are set out below under the heading "*Sustainability Related Disclosures*", including confirmation on whether the relevant Portfolio (i) promotes environmental or social characteristics, or a combination of these (an "**Article 8 Portfolio**"), or (ii) has Sustainable Investment as its investment objective (an "**Article 9 Portfolio**").

For further details on how a Portfolio complies with the requirements of SFDR, please see below where the disclosures for the relevant Portfolios are set out.

TAXONOMY REGULATION

The Taxonomy Regulation seeks to establish a framework to classify environmentally sustainable economic activities (otherwise known as Taxonomy-aligned activities), whilst also amending certain disclosure requirements of SFDR. It sets out harmonised criteria for determining whether an economic activity qualifies as environmentally sustainable and outlines a range of disclosure obligations to enhance transparency and to provide for an objective comparison of financial products regarding the proportion of their investments that contribute to environmentally sustainable economic activities.

The Taxonomy Regulation sets out a list of economic activities and performance criteria for assessing the contribution of these activities to six environmental objectives, namely (i) climate change mitigation; (ii) climate change adaptation; (iii) sustainable use and protection of water and marine resources; (iv) transition to a circular economy; (v) pollution prevention and control and protection; and (vi) restoration of biodiversity and ecosystems (the "**Environmental Objectives**"). Whilst the Taxonomy Regulation is effective from 1 January 2022, the Environmental Objectives will apply on a phased basis. Consideration of whether or not the underlying investments of Article 8 Portfolios and Article 9 Portfolios contribute to climate change mitigation and/or climate change adaptation will apply from 1 January 2022. Consideration with regard to the other four Environmental Objectives will apply from 1 January 2023.

In accordance with the Taxonomy Regulation, a Portfolio's investments shall be considered as an *environmentally sustainable economic activity* where: (1) such activity contributes substantially to one or more of the Environmental Objectives; (2) such activity does not significantly harm any of the Environmental Objectives, in accordance with the Taxonomy Regulation; (3) such activity is carried out in compliance with minimum safeguards, prescribed in the Taxonomy Regulation; and (4) such activity complies with technical screening criteria established by the European Commission in accordance with the Taxonomy Regulation. It should be noted that the "do no significant harm" principle applies only to investments underlying the Portfolios that take into account the EU criteria for environmentally sustainable economic activities.

The Taxonomy Regulation also builds on the SFDR requirements for Article 8 Portfolios and Article 9 Portfolios by placing additional disclosure obligations on such Portfolios that invest in economic activities that contribute to one or more of the Environmental Objectives. The Taxonomy Regulation requires the Manager to disclose (i) how and to what extent it has used the Taxonomy Regulation to determine the sustainability of the Portfolios' underlying investments; and (ii) to what Environmental Objective(s) the underlying investments contribute.

The analysis and disclosure requirements introduced by the Taxonomy Regulation are very detailed and compliance with them requires the availability of multiple, specific data points in respect of each investment which an Article 8 Portfolio or an Article 9 Portfolio makes. Due to the delay to the publication of the final regulatory technical standards supplementing the Taxonomy Regulation and the absence of sufficient reliable, timely and verifiable data to enable the Manager to assess such Portfolios' investments, the Manager is not currently in a position to ascertain the proportion of such Portfolios' investments that contribute to environmentally sustainable economic activities. Therefore, for the purposes of the Taxonomy Regulation, at present the Manager cannot definitively disclose whether the investments underlying such Portfolios will take into account the EU criteria for environmentally sustainable economic activities.

The Manager remains committed to complying with the Taxonomy Regulation and is keeping this situation under active review. When the requirements of the Taxonomy Regulation (as outlined in the regulatory technical standards) are finalised and sufficient reliable, timely and verifiable data on such Portfolios' investments become available, the Manager will provide detail on the extent to which such Portfolios' investments qualify as environmentally sustainable economic activities, in which case this Prospectus or the Relevant Supplement will be updated.

For the purpose of the Taxonomy Regulation, the investments underlying all Portfolios which are neither Article 8 Portfolios nor Article 9 Portfolios do not take into account the EU criteria for environmentally sustainable economic activities.

ESG POLICY

Neuberger Berman has a long-standing belief that material environmental, social and governance (“**ESG**”) factors are an important driver of long-term investment returns from both an opportunity and a risk-mitigation perspective. ESG factors can be employed in a variety of ways to help generate enhanced returns and meet specific investor objectives within a Portfolio. Neuberger Berman's approach not only benefits investors, but can also support better-functioning capital markets and have a positive impact for people and the planet. For over three decades, Neuberger Berman has been on the forefront of integrating ESG criteria into the investment process. Neuberger Berman recognises that ESG factors, like any other factor, should be incorporated in a manner consistent with the specific asset class, strategy and style of each investment strategy. Neuberger Berman integrates ESG considerations across its investment platform and offers a range of solutions to meet investor objectives. Neuberger Berman is also a signatory to the United Nation's Principles of Responsible Investment (“**PRI**”). In the 2020 PRI Assessment, Neuberger Berman obtained the highest score, A+, for its overarching approach to ESG strategy and governance.

Neuberger Berman's ESG policy (the “**ESG Policy**”) provides a broad framework for the firm's approach to ESG integration. The ESG Policy is a guideline for formalising and focusing the firm's responsible investment efforts, with the recognition that ESG issues have a meaningful impact on delivering investment results for investors. In managing certain Portfolios, the Manager and the Sub-Investment Manager consider the ESG Policy when determining what investments to make for that Portfolio. In doing so, the Manager and/or the Sub-Investment Manager integrate ESG factors (including the consideration of Sustainability Risks) into the investment decision-making process. The specific approach to ESG integration taken by the Manager and/or the Sub-Investment Manager, in respect of a Portfolio, will depend on multiple factors, including (i) the objectives of the Portfolio's strategy, (ii) the assets held by that Portfolio, (iii) the investment time horizon, (iv) any specific research undertaken by the Manager and/or the Sub-Investment Manager, (v) an assessment of the likely impact of Sustainability Risks on the returns of the Portfolio and (vi) the overall investment process.

The portfolio management team at the Manager and/or the Sub-Investment Manager, as the case may be, selects an approach from the Neuberger Berman ESG integration framework: (i) Avoid, (ii) Assess, (iii) Amplify, or (iv) Aim for Impact. That choice will determine whether to simply exclude particular companies (“**Avoid**”), reach a more holistic understanding of risk and return (“**Assess**”), tilt the portfolio to best-in-class corporate issuers based on ESG characteristics (“**Amplify**”), or invest in companies that are intentionally generating positive social/environmental impact (“**Aim for Impact**”) alongside a financial return.

The portfolio management team at the Manager and/or the Sub-Investment Manager, as the case may be, determines how to (i) achieve its ESG integration objective (ii) undertake ESG analysis to mitigate risk (including Sustainability Risk) and enhance opportunity, and (iii) analyse and measure investee companies/issuers. Each of those steps influences portfolio construction. The ESG Policy requires that each portfolio management team undertake its own research on ESG factors so they can consider them alongside other inputs as part of the overall investment process. The portfolio management team also has access to a wide range of ESG data sources and research providers, as well as the advanced analytics capabilities of Neuberger Berman's Big Data team. The portfolio management team may also access third-party ESG research providers for ESG analysis to supplement their own research.

Where indicated in the Supplement or this SFDR Annex, the portfolio managers engage directly with management teams of the investee companies for certain Portfolios. Those engagements can include in person meetings and conference calls with senior management to understand the issuer's risks and opportunities. Neuberger Berman believes that engagement is important and that it is the responsibility of each portfolio management team to engage on ESG topics as part of their ongoing dialogue with senior management of investee issuers. Portfolio managers are encouraged to evaluate governance

structures of companies, the quality of oversight of boards, as well as shareholder rights features.

The ESG Policy is available on the Neuberger Berman website, www.nb.com/esg

In managing certain Portfolios, the Manager and/or the Sub-Investment Manager may disregard the ESG Policy (including the consideration of Sustainability Risks), where the particular strategy does not support the integration of ESG factors.

ASSESSMENT OF THE IMPACT ON LIKELY RETURNS

The Manager and/or the Sub-Investment Manager will apply the ESG Policy in respect of each Portfolio (and in certain cases the Sustainable Exclusion Policy and/or the Enhanced Sustainable Exclusion Policy), save for those Portfolios where Sustainability Risks are not relevant to the particular strategy, as further detailed below. In addition all of the Portfolios (with the exception of the Neuberger Berman Uncorrelated Strategies Fund and the Neuberger Berman China Equity Fund) will apply the Thermal Coal Involvement Policy. In applying these policies, the Manager and the Sub-Investment Manager may deliberately forego opportunities for a Portfolio to gain exposure to certain companies, industries, sectors or countries and it may choose to sell a security when, in hindsight, it might be seen to have been disadvantageous to do so. Those Portfolios may focus on investments in companies that relate to certain sustainable development themes and demonstrate adherence to environmental, social and good governance practices. Accordingly, as the universe of investments for those Portfolios is smaller than that of other funds with similar investment policies, the Manager and the Sub-Investment Manager have determined that those Portfolios may potentially underperform the market as a whole if the investments underperform the market, which could negatively impact on returns.

Notwithstanding the foregoing, the ESG Policy seeks to formalise and focus Neuberger Berman's responsible investment efforts, with the belief that material ESG characteristics are an important driver of long-term investment returns, and can also support better-functioning capital markets and have a positive impact for people and the planet.

CONSIDERATION OF ADVERSE SUSTAINABILITY IMPACTS OF INVESTMENT DECISIONS ON SUSTAINABILITY FACTORS

Notwithstanding that the Manager and/or the Sub-Investment Manager will integrate the consideration of Sustainability Risks into the investment decision-making process save for those Portfolios indicated below, the Manager and the Sub-Investment Manager do not currently consider the principal adverse impacts of its investment decisions on Sustainability Factors. The Manager and the Sub-Investment Manager have opted against doing so, primarily as the regulatory technical standards ("RTS") supplementing SFDR which will set out the content, methodology and information required in the principal adverse sustainability impact ("PASI") statement remain in draft form and have been delayed.

SUSTAINABILITY RELATED DISCLOSURES

For certain Portfolios the Manager and/or the Sub-Investment Manager do not apply the ESG Policy and deem Sustainability Risks not to be relevant as the particular strategy of the relevant Portfolio does not support the integration of same. The relevant Portfolios are:

1. Neuberger Berman US Equity Index Putwrite Fund	2. Neuberger Berman US Small Cap Intrinsic Value Fund
3. Neuberger Berman Uncorrelated Strategies Fund	4. Neuberger Berman China Equity Fund
5. Neuberger Berman Macro Opportunities FX Fund	

For the purposes of SFDR, the following Portfolios are classified as Article 8 Portfolios:

1. Neuberger Berman High Yield Bond Fund	2. Neuberger Berman Asian Debt – Hard Currency Fund
3. Neuberger Berman European High Yield Bond Fund	4. Neuberger Berman Global High Yield Bond Fund
5. Neuberger Berman Corporate Hybrid Bond Fund	6. Neuberger Berman Euro Bond Absolute Return Fund
7. Neuberger Berman Global Opportunistic Bond Fund	8. Neuberger Berman Ultra Short Term Euro Bond Fund
9. Neuberger Berman Emerging Market Debt – Local Currency Fund	10. Neuberger Berman Euro Opportunistic Bond Fund
11. Neuberger Berman Emerging Market Debt – Hard Currency Fund	12. Neuberger Berman Multi-Asset Income Fund

13. Neuberger Berman Emerging Market Corporate Debt Fund	14. Neuberger Berman CLO Income Fund
15. Neuberger Berman Short Duration Emerging Market Debt Fund	16. Neuberger Berman US Long Short Equity Fund
17. Neuberger Berman Emerging Market Debt Blend Fund	18. Neuberger Berman US Multi Cap Opportunities Fund
19. Neuberger Berman Emerging Market Debt Sustainable Investment Grade Blend Fund	20. Neuberger Berman Japan Equity Engagement Fund
21. Neuberger Berman Emerging Markets Sustainable Equity Fund	22. Neuberger Berman China Bond Fund
23. Neuberger Berman US Equity Fund	24. Neuberger Berman Global Thematic Equity Fund
25. Neuberger Berman Emerging Markets Equity Fund	26. Neuberger Berman 5G Connectivity Fund
27. Neuberger Berman Next Generation Mobility Fund	28. Neuberger Berman Global Real Estate Securities Fund
29. Neuberger Berman US Real Estate Securities Fund	30. Neuberger Berman Global Bond Fund
31. Neuberger Berman China A-Share Equity Fund	32. Neuberger Berman Global Flexible Credit Fund
33. Neuberger Berman Strategic Income Fund	34. Neuberger Berman Global High Yield FMP-2025
35. Neuberger Berman Global Diversified Income FMP-2024	36. Neuberger Berman InnovAsia 5G Fund
37. Neuberger Berman US Small Cap Fund	38. Neuberger Berman Global Investment Grade Credit Fund
39. Neuberger Berman Short Duration High Yield Bond Fund	40. Neuberger Berman Sustainable Asia High Yield Fund
41. Neuberger Berman US Large Cap Value Fund	

For the purposes of SFDR, the following Portfolios are classified as Article 9 Portfolios:

1. Neuberger Berman Global Sustainable Equity Fund	2. Neuberger Berman European Sustainable Equity Fund
3. Neuberger Berman Global High Yield Sustainable Action Fund	4. Neuberger Berman Systematic Global Sustainable Value Fund
5. Neuberger Berman Sustainable Emerging Market Debt – Hard Currency Fund	

Neuberger Berman Emerging Market Debt – Local Currency Fund

This Portfolio meets the classification of an Article 8 Portfolio as it promotes environmental and social characteristics and limits investments to companies and government bond issuers that follow good governance practices.

Environmental or social characteristics promoted by the Portfolio

As noted in the Supplement, the Portfolio will invest primarily in debt securities and money market instruments which are issued by governments, government agencies or corporate issuers which have their head office or exercise an overriding part of their economic activity in Emerging Market Countries and which are denominated in or are exposed to the currencies of such Emerging Market Countries.

The Manager and the Sub-Investment Manager will manage the Portfolio in accordance with the ESG Policy on a continuous basis. The Manager and the Sub-Investment Manager have fully integrated the ESG Policy into the overall investment process. A summary of the ESG Policy is detailed above in this SFDR Annex and it is available on the Neuberger Berman website, www.nb.com/esg

The Manager and the Sub-Investment Manager shall also apply the Controversial Weapons Policy when determining what investments to make for the Portfolio. Further details on this screening/exclusion policy is set out in the "Sustainable Investment Criteria" section of the Prospectus. In addition, the Portfolio excludes companies which are involved in direct child labour, in the tobacco industry, as well as certain companies with significant exposure to thermal coal or oil sands.

ESG factors are integral to the Manager's and the Sub-Investment Manager's investment process, and are tracked and considered by all analysts and portfolio managers, with regular research and data management conducted by the Manager's and the Sub-Investment Manager's economists. The Manager and the Sub-Investment Manager look at a wide array of ESG factors that seek to capture immediate developments and long-term trends.

In relation to Emerging Market Countries, the Manager and the Sub-Investment Manager shall consider **environmental factors** including (i) the energy intensity of gross domestic product ("**GDP**"), (ii) carbon dioxide ("**CO2**") emissions levels per GDP and per capita, and (iii) the degree to which electricity is being produced from coal sources. The Manager and the Sub-Investment Manager also monitor countries' contributions/adherence to the UN Sustainable Development Goals.

In terms of **social factors**, the Manager and the Sub-Investment Manager analyse a country's relative position on (i) income, (ii) education and (iii) health as tracked by local and international organisations and development banks, as well as (iv) factors related to the effectiveness and legitimacy of the administration through public opinion surveys.

The **governance factors** that the Manager and the Sub-Investment Manager track in relation to Emerging Market Countries include (i) the political sphere of the relevant country, (ii) the adherence to the rule of law, (iii) control of corruption, political uncertainty related to upcoming elections and (iv) a focus of the quality of economic governance, namely the government's role as an effective regulator and support of the private sector through responsible financial, macroeconomic and international trade policies.

The Manager and the Sub-Investment Manager make assessments on these ESG factors on a regular basis, at least at each quarterly portfolio review and expands upon these factors from time to time.

In addition to integrating the aforementioned screening/exclusion policy into the portfolio construction process, the Manager and the Sub-Investment Manager utilise a proprietary ESG scoring system for Emerging Market corporate issuers, to identify qualitative risks and opportunities in the overall credit assessment. This scoring system includes an in-house governance assessment tool and a specific

scoring methodology for environmental and social factors whereby the Manager and the Sub-Investment Manager select a number of underlying factors from different ESG research providers, which are material for corporate fundamental and spread developments. The ESG factors applied are sector-specific depending on their materiality for each sector. Companies that have a low score (i.e. of 33/100 or lower) are excluded from the investment universe, unless the Manager's and the Sub-Investment Manager's engagement efforts with the investee company result in a positive outlook regarding the ESG score.

The Manager and the Sub-Investment Manager shall also engage directly with management teams of the investee companies through a robust qualitative ESG engagement program. This program is focused on in-person meetings and conference calls to understand risks and opportunities at investee companies. The Manager and the Sub-Investment Manager view this direct engagement with investee companies, as an essential part of its investment process.

Benchmark Index

The Benchmark has not been designated as a reference benchmark for the purposes of SFDR. Therefore, it is not consistent with the promotion of environmental or social characteristics. For further details on the Benchmark, please refer to the Supplement.

Neuberger Berman Emerging Market Debt – Hard Currency Fund

This Portfolio meets the classification of an Article 8 Portfolio as it promotes environmental and social characteristics and limits investments to companies and sovereign issuers that follow good governance practices.

Environmental or social characteristics promoted by the Portfolio

As noted in the Supplement, the Portfolio will invest primarily in debt securities and money market instruments issued by public or private issuers in Emerging Market Countries which are denominated in Hard Currency (as defined in the Supplement).

The Manager and the Sub-Investment Manager will manage the Portfolio in accordance with the ESG Policy on a continuous basis. The Manager and the Sub-Investment Manager have fully integrated the ESG Policy into the overall investment process. A summary of the ESG Policy is detailed above in this SFDR Annex and it is available on the Neuberger Berman website, www.nb.com/esg

The Manager and the Sub-Investment Manager shall also apply the Controversial Weapons Policy when determining what investments to make for the Portfolio. Further details on this screening/exclusion policy are set out in the "*Sustainable Investment Criteria*" section of the Prospectus. In addition, the Portfolio excludes companies which are involved in direct child labour, in the tobacco industry, as well as certain companies with significant exposure to thermal coal or oil sands.

Neuberger Berman Emerging Market Debt Sustainable Investment Grade Blend Fund

This Portfolio meets the classification of an Article 8 Portfolio as it promotes environmental and social characteristics and limits investments to companies and sovereign issuers that follow good governance practices.

Environmental or social characteristics promoted by the Portfolio

As noted in the Supplement, the Portfolio will invest primarily in investment grade debt securities and money market instruments which are issued by governments of, government agencies in or corporate issuers which have their head office or exercise an overriding part of their economic activity in Emerging Market Countries and which are denominated in or are exposed to the currencies of such Emerging Market Countries ("**Local Currency**") or denominated in Hard Currency (as defined in the Supplement).

The Manager and the Sub-Investment Manager will manage the Portfolio in accordance with the ESG Policy on a continuous basis. The Manager and the Sub-Investment Manager have fully integrated the ESG Policy into the overall investment process, in particular, the portfolio construction process. A summary of the ESG Policy is detailed above in this SFDR Annex and it is available on the Neuberger Berman website, www.nb.com/esg

The Manager and the Sub-Investment Manager shall also apply the (i) Controversial Weapons Policy, and (ii) the Sustainable Exclusion Policy and (iii) the Enhanced Sustainable Exclusion Policy, when determining what investments to make for the Portfolio. Further details on these screening/exclusion policies are set out in the "*Sustainable Investment Criteria*" section of the Prospectus. In addition, the Portfolio excludes companies which are involved in direct child labour, in the tobacco industry, as well as certain companies with significant exposure to thermal coal or oil sands.

ESG factors are integral to the Manager's and the Sub-Investment Manager's investment process, and are tracked and considered by all analysts and portfolio managers, with regular research and data management conducted by the Manager's and the Sub-Investment Manager's economists. The Manager and the Sub-Investment Manager make assessments on these ESG factors on a regular basis, at least at each quarterly portfolio review and expands upon these factors from time to time.

In addition to integrating the aforementioned screening/exclusion policies into the

portfolio construction process, the Manager and the Sub-Investment Manager utilises a proprietary ESG scoring system for Emerging Market corporate issuers, to identify qualitative risks and opportunities in the overall credit assessment. This scoring system includes an in-house governance assessment tool and a specific scoring methodology for environmental and social factors whereby the Manager and the Sub-Investment Manager select a number of underlying factors from different ESG research providers, which are material for corporate fundamental and spread developments. The ESG factors applied are sector-specific depending on their materiality for each sector. Companies that have a low score (i.e. of 33/100 or lower) are excluded from the investment universe, unless the Manager's and the Sub-Investment Manager's engagement efforts with the investee company result in a positive outlook regarding the ESG score.

Based on the aforementioned ESG scoring process for countries and companies, the Manager and the Sub-Investment Manager apply a best-in-class process, whereby only the top 75% ranked countries and companies in terms of ESG score are eligible for investment.

The Manager and the Sub-Investment Manager shall also engage directly with management teams of the investee companies through a robust qualitative ESG engagement program. This program is focused on in-person meetings and conference calls to understand risks and opportunities at investee companies. The Manager and the Sub-Investment Manager view this direct engagement with investee companies, as an essential part of its investment process.

Benchmark Index

The Benchmark has not been designated as a reference benchmark for the purposes of SFDR. Therefore, it is not consistent with the promotion of environmental or social characteristics. For further details on the Benchmark, please refer to the Supplement.

Neuberger Berman Asian Debt – Hard Currency Fund

This Portfolio meets the classification of an Article 8 Portfolio as it promotes environmental and social characteristics and limits investments to companies and sovereigns that follow good governance practices.

Environmental or social characteristics promoted by the Portfolio

As noted in the Supplement, the Portfolio will invest primarily in debt securities and money market instruments, which are issued by governments of, government agencies or corporate issuers which have their head office or exercise an overriding part of their economic activity in Asian countries and which are denominated in Hard Currency (as defined in the Supplement).

The Manager and the Sub-Investment Manager will manage the Portfolio in accordance with the ESG Policy on a continuous basis. The Manager and the Sub-Investment Manager have fully integrated the ESG Policy into the overall investment process, in particular, the portfolio construction process. A summary of the ESG Policy is detailed above in this SFDR Annex and it is available on the Neuberger Berman website, www.nb.com/esg

The Manager and the Sub-Investment Manager shall also apply the Controversial Weapons Policy when determining what investments to make for the Portfolio. Further details on this screening/exclusion policy are set out in the "*Sustainable Investment Criteria*" section of the Prospectus. In addition, the Portfolio excludes companies which are involved in direct child labour, in the tobacco industry, as well as certain companies with significant exposure to thermal coal or oil sands.

ESG factors are integral to the Manager's and the Sub-Investment Manager's investment process, and are tracked and considered by all analysts and portfolio managers, with regular research and data management conducted by the Manager's and the Sub-Investment Manager's economists. The Manager and the Sub-Investment Manager look at a wide array of ESG factors that seek to capture immediate developments and long-term trends.

In relation to Emerging Market Countries, the Manager and the Sub-Investment Manager shall consider **environmental factors** including (i) the energy intensity of GDP, (ii) CO2 emissions levels per GDP and per capita and (iii) the degree to which electricity is being produced from coal sources. The Manager and the Sub-Investment Manager also monitor countries' contributions/adherence to the UN Sustainable Development Goals.

In terms of **social factors**, the Manager and the Sub-Investment Manager analyse a country's relative position on (i) income, (ii) education and (iii) health as tracked by local and international organisations and development banks, as well as (iv) factors related to the effectiveness and legitimacy of the administration through public opinion surveys.

The **governance factors** that the Manager and the Sub-Investment Manager track in relation to Emerging Market Countries include (i) the political sphere of the relevant country, (ii) the adherence to the rule of law, (iii) control of corruption, political uncertainty related to upcoming elections and (iv) a focus of the quality of economic governance, namely the government's role as an effective regulator and support of the private sector through responsible financial, macroeconomic and international trade policies.

The Manager and the Sub-Investment Manager make assessments on these ESG factors on a regular basis, at least at each quarterly portfolio review and expands upon these factors from time to time.

In addition to integrating the aforementioned screening/exclusion policy into the portfolio construction process, the Manager and the Sub-Investment Manager utilise a proprietary ESG scoring system for Emerging Market corporate issuers, to identify qualitative risks and opportunities in the overall credit assessment. This scoring system includes an in-house governance assessment tool and a specific scoring methodology for environmental and social factors whereby the Manager and the Sub-Investment Manager select a number of underlying factors from

different ESG research providers, which are material for corporate fundamental and spread developments. The ESG factors applied are sector-specific depending on their materiality for each sector. Companies that have a low score (i.e. of 33/100 or lower) are excluded from the investment universe, unless the Manager's and the Sub-Investment Manager's engagement efforts with the investee company result in a positive outlook regarding the ESG score.

The Manager and the Sub-Investment Manager shall also engage directly with management teams of the investee companies through a robust qualitative ESG engagement program. This program is focused on in-person meetings and conference calls to understand risks and opportunities at investee companies. The Manager and the Sub-Investment Manager view this direct engagement with investee companies, as an essential part of its investment process.

Benchmark Index

The Benchmark has not been designated as a reference benchmark for the purposes of SFDR. Therefore, it is not consistent with the promotion of environmental or social characteristics. For further details on the Benchmark, please refer to the Supplement.

Neuberger Berman Emerging Markets Equity Fund

This Portfolio meets the classification of an Article 8 Portfolio as it promotes environmental and social characteristics and limits investments to companies that follow good governance practices.

Environmental or social characteristics promoted by the Portfolio

As noted in the Supplement, the Portfolio will invest primarily in equity and equity-linked securities which are listed or traded on Recognised Markets globally and issued by companies that: (1) trade principally on a recognised stock exchange in Emerging Market Countries; (2) are organised under the laws of and have a principal office in Emerging Market Countries; or (3) derive 50% or more of their total revenues from, and/or have 50% or more of their total assets in, goods produced, sales made, profits generated or services performed in Emerging Market Countries.

The Sub-Investment Manager will manage the Portfolio in accordance with the ESG Policy on a continuous basis. The Sub-Investment Manager has fully integrated the ESG Policy into the overall investment process, in particular, the portfolio construction process. A summary of the ESG Policy is detailed above in this SFDR Annex and it is available on the Neuberger Berman website, www.nb.com/esg

The Controversial Weapons Policy shall also be applied when determining what investments to make for the Portfolio. Further details on this screening/exclusion policy are set out in the "Sustainable Investment Criteria" section of the Prospectus.

The Sub-Investment Manager integrates material ESG factors in the investment process by applying country and sector specific analysis in order to determine the quality of the company and to identify higher quality companies that could present lower long-term risk. The Sub-Investment Manager's strategy is built on the belief that responsibility is a hallmark of quality and invests in companies that have a sustainable competitive advantage derived from ESG factors. The Sub-Investment Manager shall seek to generate a positive social and environmental impact alongside a financial return.

The Sub-Investment Manager shall consider **environmental factors** including (i) environmental management system (i.e. minimise penalties, liabilities and contingencies), (ii) water management (i.e. more efficient use of resources and reduced costs); and (iii) clean tech innovations (i.e. product innovation and competitiveness).

In terms of **social factors** the Sub-Investment Manager shall consider (i) employee health and safety (i.e. lower turnover, absenteeism/higher productivity), (ii) labour relations (lower risk and business interruption), (iii) employee and board diversity (i.e. attracting and retaining talent and improved governance).

The Sub-Investment Manager shall also consider **governance factors** including (i) independence and board diversity (i.e. improved oversight and increased accountability), (ii) executive compensation (i.e. to ensure management is aligned with shareholder interest).

The Sub-Investment Manager considers a company's record in its management of environmental, social and, in particular, governance matters to be an indicator of management quality, which is an important consideration in its research work. The Sub-Investment Manager also evaluates material ESG factors by leveraging third-party data providers for common global ESG factors (e.g. resource productivity from MSCI ESG) complemented with country and sector-specific sources (e.g. South African integrated reports under the King Code).

The Sub-investment Manager shall also participate in engagement with prospective investee companies and existing companies held in the Portfolio. The engagement process employed by the Sub-Investment Manager is a three-step process consisting of (i) identifying engagement priorities; (ii) developing a company engagement strategy; and (iii) tracking, monitoring and following-up. The purposes of the engagement process is to address ESG disclosure gaps, to

address ESG material issues of concern and to discuss best practices and opportunities.

The Sub-Investment Manager's engagement process includes face-to-face meetings, frequent phone contact with senior management and board members, all in an attempt to understand the company as well as the competitive environment in which it is operating. These meetings provide the Sub-Investment Manager with a holistic view of a company, which allows it to assess the growth prospects of the company during its entire investment process and whether or not returns are sustainable in the future. The Sub-Investment Manager views this direct engagement, as an essential part of its investment process.

In addition, the Sub-Investment Manager meets regulators, government officials, and independent consultants and attends numerous conferences to meet with customers, suppliers, and competitors in a less formal setting. The Sub-Investment Manager also relies on additional information sources including industry research, competitive analysis, third party research, non-governmental organisations, government agencies, UN agencies, media and academia.

Benchmark Index

The Benchmark has not been designated as a reference benchmark for the purposes of SFDR. Therefore, it is not consistent with the promotion of environmental or social characteristics. For further details on the Benchmark, please refer to the Supplement.

Neuberger Berman Japan Equity Engagement Fund

This Portfolio meets the classification of an Article 8 Portfolio as it promotes environmental and social characteristics and limits investments to companies that follow good governance practices.

Environmental or social characteristics promoted by the Portfolio

As noted in the Supplement, the Portfolio will primarily invest in listed or traded equity securities issued by small and mid-capitalisation companies, which have either their head office or exercise an overriding part of their economic activity in Japan and that are listed or traded on Recognised Markets globally.

The Sub-Investment Manager will manage the Portfolio in accordance with the ESG Policy on a continuous basis. The Sub-Investment Manager has fully integrated the ESG Policy into the overall investment process, in particular, the portfolio construction process. A summary of the ESG Policy is detailed above in this SFDR Annex and it is available on the Neuberger Berman website, www.nb.com/esg

The Controversial Weapons Policy shall also be applied when determining what investments to make for the Portfolio. Further details on this screening/exclusion policy are set out in the "Sustainable Investment Criteria" section of the Prospectus.

ESG factors are integrated in the Sub-Investment Manager's investment process, and are tracked and considered by all analysts and portfolio managers, with regular research conducted by the Sub-Investment Manager. As part of this, the Sub-Investment Manager looks at a wide array of ESG factors including corporate governance, environmental and social factors.

The Sub-Investment Manager's analysis on corporate governance factors is qualitative, based on the view of the company's governance standards taking into consideration (i) board diversity (i.e. skillset, gender and nationality) and independence (i.e. minimum 1/3 independence ratio), (ii) board structure; and (iii) management vision (i.e. long term vision and strategy in place).

The Sub-Investment Manager believes that in addition to the engagement of governance factors, engagement of environmental and social factors enhances long term sustainability of a business.

The Sub-Investment Manager believes core to the success of ESG engagement is (i) to select the right companies, based on in-depth qualitative/quantitative analysis and dialogue with the management, and (ii) set clear engagement plans and roadmaps based on past successes and internal knowhow. As part of this engagement plan, the Sub-Investment Manager interacts directly with management teams of the investee companies through in-person meetings and calls to understand risks and opportunities at investee companies. This engagement enables the Sub-Investment Manager to monitor for any changes in the business quality and to address material ESG issues that will help achieve sustainable growth. The Sub-Investment Manager seeks to generate additional value by offering insights and knowledge sharing on ESG investing with investee companies. The Sub-Investment Manager views this direct engagement with investee companies, as an essential part of its investment process and believes engaging companies on ESG matters enables it to improve the fundamental quality of their holdings over the medium to long term horizon.

The Sub-Investment Manager also utilises a proprietary ESG scoring system. The ratings on this scoring system also leverage third party ESG data sources including the Sustainability Accounting Standards Board framework ("SASB") to identify all the material environmental and social issues affecting the industry. This analysis is used to form the basis of an investment opinion, which is further supported by the Sub-Investment Manager participating in direct engagement with investee companies (as noted above).

Examples of environmental and social factors covered in direct engagement with investee companies include: air quality, biodiversity and land use, water

management, access to healthcare, workforce diversity and inclusion and supply chain labour standards.

Benchmark Index

The Benchmark has not been designated as a reference benchmark for the purposes of SFDR. Therefore, it is not consistent with the promotion of environmental or social characteristics. For further details on the Benchmark, please refer to the Supplement.

Neuberger Berman Systematic Global Sustainable Value Fund

This Portfolio is classified as an Article 9 Portfolio as it has Sustainable Investment as its objective. It invests in companies that contribute to both environmental and social objectives. In pursuing its sustainable investment objective the Portfolio will also take appropriate measures to ensure that (i) its investments do not significantly harm any of the environmental objectives; and (ii) that companies it invests in follow good governance practices.

Environmental or social characteristics promoted by the Portfolio

As noted in the Supplement, the Portfolio's objective is to seek to achieve long term capital growth from investing primarily in a portfolio of global equity holdings that comply with the Sustainable Criteria (as this term is defined within the "*Sustainable Investment Criteria*" section of the Prospectus) and may also invest in excess of 20% of its Net Asset Value in equity securities issued by companies domiciled in Emerging Market Countries.

The Sub-Investment Managers will manage the Portfolio in accordance with the ESG Policy on a continuous basis. The Sub-Investment Managers have fully integrated the ESG Policy into the overall investment process, in particular, the portfolio construction process. A summary of the ESG Policy is detailed above in this SFDR Annex and it is available on the Neuberger Berman website, www.nb.com/esg

The Controversial Weapons Policy, the Sustainable Exclusion Policy and the Enhanced Sustainable Exclusion Policy shall also be applied when determining what investments to make for the Portfolio. Further details on these screening/exclusion policies are set out in the "*Sustainable Investment Criteria*" section of the Prospectus.

ESG risks and opportunities are considered in the selection of securities to be constituents of the Portfolio. The Sub-Investment Managers assess securities in relation to their exposure to and the management of ESG risks. ESG represents governance, (being the way in which the company is run), environmental issues, (such as the impact on natural resources), and social issues (such as human rights).

As noted in the Supplement, the Portfolio may invest in securities which provide exposure to the Investable Universe (as defined in the Supplement), where they meet, at a minimum, the Sustainability Criteria, as this term is defined within the "*Sustainable Investment Criteria*" section of the Prospectus. A list of securities which do not fulfil the Sustainability Criteria is provided to the Sub-Investment Managers by the Manager. The Sub-Investment Managers consider ESG risks and opportunities (as described below and in the "*ESG*" section below), among other risk and return factors described above, in the evaluation of securities for the purposes of holding and weighting securities in the Portfolio.

ESG analysis: the Sub-Investment Manager will first exclude companies from the investment universe that are involved in controversial activities and behaviour, such as the production of controversial weapons, fur manufacturers, gambling, nuclear power or non-compliance with the United Nations Global Compact. The application of the Enhanced Sustainable Exclusion Policy, as such terms are defined within the "*Sustainable Investment Criteria*" section of the Prospectus, also means that companies involved in tobacco, civilian firearms, private prisons and fossil fuels will also be excluded.

The Sub-Investment Managers shall consider **environmental factors** which may include but are not limited to (i) carbon emissions and climate change, (ii) natural resource use, (iii) pollution and toxic emissions, and (iv) use of green technologies, where applicable. In terms of **social factors**, the Sub-Investment Managers shall consider, including but not limited to, (i) data privacy and security, (ii) labour relations, (iii) human capital management, and (iv) product safety, where applicable. The **governance factors** that the Sub-Investment Managers shall consider may include, but are not limited to, (i) corporate governance, (ii) board independence and quality, and (iii) business ethics.

The Sub-Investment Managers seek to evaluate public companies by utilising a proprietary ESG score which is developed by combining external, third-party ESG data with internal proprietary ESG ratings provided by the Sub-Investment Managers. By combining the proprietary ESG score with the Sub-Investment Managers' other proprietary factors (momentum, quality, low risk, income, and value), the Sub-Investment Managers assess the attractiveness of securities within its investable universe and then seeks to position the portfolio accordingly, favouring securities that rank higher based on this combined multi-factor score and underweighting securities that rank lower. Additionally, the dedicated ESG team and equity analysts also proactively engage a portion of the companies held within the Portfolio to help drive these companies to make positive changes in environmental, social, and/or governance issues which the Sub-Investment Managers believe to be a potential driver of attractive returns.

The Sub-Investment Manager will then assess the investment universe, which involves in-depth research and analysis of companies' ESG profiles and will also exclude companies that show poorly on this ESG assessment. The Sub-Investment Manager will ensure that securities representing at least 90% of the Net Asset Value of the Portfolio are covered by the ESG assessment.

Through these two ESG exclusionary steps, the Sub-Investment Manager will exclude at least 20% of components of the investment universe and will ensure at 90% ESG coverage rate of the Net Asset Value of the Portfolio.

Collective investment schemes may be used to take certain regional exposures which would be inefficient to obtain via individual securities or for cash management purposes. Some constituents of these collective investment schemes may not comply with the Sustainable Exclusion Policy.

Benchmark Indices

The Benchmarks have not been designated as reference benchmarks for the purposes of SFDR. Therefore, they are not consistent with the promotion of environmental or social characteristics. For further details on the Benchmarks, please refer to the Supplement.

Neuberger Berman Emerging Markets Sustainable Equity Fund

This Portfolio meets the classification of an Article 8 Portfolio as it promotes environmental and social characteristics and limits investments to companies that follow good governance practices.

Environmental or social characteristics promoted by the Portfolio

As noted in the Supplement, the Portfolio seeks to achieve its investment objective by investing primarily in equity and equity-linked securities which are listed or traded on Recognised Markets globally and issued by companies that: (1) trade principally on a recognised stock exchange in Emerging Market Countries; (2) are organised under the laws of and have a principal office in Emerging Market Countries; or (3) derive 50% or more of their total revenues from, and/or have 50% or more of their total assets in, goods produced, sales made, profits generated or services performed in Emerging Market Countries.

The Sub-Investment Manager will manage the Portfolio in accordance with the ESG Policy on a continuous basis. The Sub-Investment Manager has fully integrated the ESG Policy into the overall investment process, in particular, the portfolio construction process. A summary of the ESG Policy is detailed above in this SFDR Annex and it is available on the Neuberger Berman website, www.nb.com/esg

The Controversial Weapons Policy and the Sustainable Exclusion Policy shall also be applied when determining what investments to make for the Portfolio. Further details on these screening/exclusion policies are set out in the "*Sustainable Investment Criteria*" section of the Prospectus.

The Sub-Investment Manager integrates material ESG factors in the investment process by applying country and sector specific analysis in order to determine the quality of the company and to identify higher quality companies that could present lower long-term risk. The Sub-Investment Manager's strategy is built on the belief that responsibility is a hallmark of quality and invests in companies that have a sustainable competitive advantage derived from ESG factors. The Sub-Investment Manager shall seek to generate a positive social and environmental impact alongside a financial return.

The Sub-Investment Manager shall consider **environmental factors** including (i) environmental management system (i.e. minimise penalties, liabilities and contingencies), (ii) water management (i.e. more efficient use of resources and reduced costs); and (iii) clean tech innovations (i.e. product innovation and competitiveness).

In terms of **social factors**, the Sub-Investment Manager shall consider (i) employee health and safety (i.e. lower turnover, absenteeism/higher productivity), (ii) labour relations (lower risk and business interruption), (iii) employee and board diversity (i.e. attracting and retaining talent and improved governance).

The Sub-Investment Manager shall also consider **governance factors** including (i) independence and board diversity (i.e. improved oversight and increased accountability), (ii) executive compensation (i.e. to ensure management is aligned with shareholder interest); and (iii) political spending (i.e. for enhanced transparency and disclosure).

The Sub-Investment Manager considers a company's record in its management of environmental, social and, in particular, governance matters to be an indicator of management quality, which is an important consideration in its research work. The Sub-Investment Manager also evaluates material ESG factors by leveraging third-party data providers for common global ESG factors (e.g. resource productivity from MSCI ESG) complemented with country and sector-specific sources (e.g. South African integrated reports under the King Code).

In addition to integrating the aforementioned screening/exclusion policies into the portfolio construction process, the Sub-Investment Manager utilises a proprietary ESG scoring system for corporate issuers. This scoring system includes an in-house governance assessment tool and a specific scoring methodology, which

takes into account material ESG factors based on the specific industry.

The Sub-investment Manager shall also participate in engagement with prospective investee companies and existing companies held in the Portfolio. The engagement process employed by the Sub-Investment Manager is a three-step process consisting of (i) identifying engagement priorities; (ii) developing a company engagement strategy; and (iii) tracking, monitoring and following-up. The purposes of the engagement process is to address ESG disclosure gaps, to address ESG material issues of concern and to discuss best practices and opportunities.

The Sub-Investment Manager's engagement process includes face-to-face meetings, frequent phone contact with senior management, outreach to multi-stakeholders, roundtables and workshops (to address issues and best practices), all in an attempt to understand the company as well as the competitive environment in which it is operating. These meetings provide the Sub-Investment Manager with a holistic view of a company, which allows it to assess the growth prospects of the company during its entire investment process and whether or not returns are sustainable in the future. The Sub-Investment Manager views this direct engagement, as an essential part of its investment process.

In addition, the Sub-Investment Manager meets regulators, government officials, and independent consultants and attends numerous conferences to meet with customers, suppliers, and competitors in a less formal setting. The Sub-Investment Manager also relies on additional information sources including industry research, competitive analysis, third party research, non-governmental organisations, government agencies, UN agencies, media and academia.

Benchmark Index

The Benchmark has not been designated as a reference benchmark for the purposes of SFDR. Therefore, it is not consistent with the promotion of environmental or social characteristics. For further details on the Benchmark, please refer to the Supplement.

Neuberger Berman High Yield Bond Fund

This Portfolio is classified as an Article 8 Portfolio as it promotes environmental and social characteristics and limits investments to companies that follow good governance practices.

Environmental or social characteristics promoted by the Portfolio

As noted in the Supplement, the Portfolio will invest primarily in high yield fixed income securities issued by US corporations and foreign corporations, (which have their head office or exercise an overriding part of their economic activity in the US); and high yield fixed income securities issued by governments and agencies in the US that are denominated in US Dollars, that are listed, dealt or traded on Recognised Markets without any particular focus on any one industrial sector.

The Sub-Investment Manager will manage the Portfolio in accordance with the ESG Policy on a continuous basis. The Sub-Investment Manager has fully integrated the ESG Policy into the overall investment process, in particular, the portfolio construction process. A summary of the ESG Policy is detailed above in this SFDR Annex and it is available on the Neuberger Berman website, www.nb.com/esg

The Sub-Investment Manager shall also apply the Controversial Weapons Policy when determining what investments to make for the Portfolio. Further details on this screening/exclusion policy is set out in the "*Sustainable Investment Criteria*" section of the Prospectus.

ESG research is a critical component of the Sub-Investment Manager's portfolio management team's (the "**Team**") fundamental research process. The Team believes that integrating ESG factors into its investment process adds value by helping to identify risks generally not captured by traditional corporate credit analysis and by shedding light on non-financial aspects of an issuer's business.

The Team has integrated its proprietary ESG scoring system into its overall credit best practices research process. This ESG analysis is performed internally by the Team, not outsourced to a centralised group within the firm or to a third party ESG rating service. These proprietary scores are assigned to all issuers held in the Portfolio and are a key component of each issuer's internal credit rating. These internal credit ratings are notched up or down depending on the issuer's ESG profile. This integration creates a direct link between the ESG analysis and the portfolio construction.

The proprietary ESG scoring system is built around the concept of sector specific criteria, which focuses on the ESG issues that are the largest drivers of credit risk in each industry. The Team uses the SASB framework for sector specific criteria as a starting point, but then customises each set of sector criteria based on their own judgement, leveraging their significant sector/industry expertise. The Team also assigns weightings to environmental, social and governance factors, which vary by sector and are aimed at enhancing credit risk assessment.

At the investee company/corporate issuer level, the Sub-Investment Manager consider; **environmental factors** including (i) water, waste management and waste intensity, (ii) climate change, (iii) carbon intensity and (iv) pollution and mitigation management; **social factors** including (i) labour relations, (ii) health and safety, (iii) ethical marketing practices, (iv) data security practices (v) community/government relations; and **governance factors** including (i) board independence and quality, (ii) compensation structure and compensation concerns, (iii) board skillset, (iv) transparency, (v) adaptability and (vi) diversity of board or management team.

Engaging with management is a critical component of the Team's investment process. The research Team maintains an active dialogue with all issuers and these discussions cover, among other things, ESG issues, capital structure, corporate strategy and business / industry trends. The Team closely monitors these engagement activities (through its ESG engagement tracker) and reports on these discussions to the Neuberger Berman credit committee. The Team believes this consistent engagement with companies can help reduce credit risk.

Oversight of the ESG process and the development of data measuring the impact of ESG in the fixed income markets are also important priorities for the Team. The Team provides quarterly ESG portfolio reviews (touching on key updates and the performance impact of ESG related decision making), tracks closely its management engagement activities through the ESG engagement tracker, monitors its climate-value at risk and works collaboratively within the firm's fixed income ESG working group and ESG committee.

Benchmark Index

The Benchmark has not been designated as a reference benchmark for the purposes of SFDR. Therefore, it is not consistent with the promotion of environmental or social characteristics. For further details on the Benchmark, please refer to the Supplement.

Neuberger Berman Short Duration High Yield Bond Fund

This Portfolio meets the classification of an Article 8 Portfolio as it promotes environmental and social characteristics and limits investments to companies and sovereign issuers that follow good governance practices.

Environmental or social characteristics promoted by the Portfolio

As noted in the Supplement, the Portfolio will invest primarily in short duration, high yield fixed income securities issued by US corporations and non-U.S. corporations, (which have their head office or exercise an overriding part of their economic activity in the US) and by governments and agencies in the US that are primarily denominated in US Dollars, that comply with the terms of the Sustainable Exclusion Policy and listed, dealt or traded on Recognised Markets without any particular focus on any one industrial sector.

Accordingly, the Sub-Investment Manager applies the (i) Controversial Weapons Policy, and (ii) the Sustainable Exclusion Policy, when determining what investments to make for the Portfolio. Further details on these screening/exclusion policies are set out in the "*Sustainable Investment Criteria*" section of the Prospectus.

The Sub-Investment Manager will also manage the Portfolio in accordance with the ESG Policy on a continuous basis. The Sub-Investment Manager has fully integrated the ESG Policy into the overall investment process, in particular, the portfolio construction process. A summary of the ESG Policy is detailed in this SFDR Annex and is available on the Neuberger Berman website, www.nb.com/esg

In respect to the Portfolio, the Sub-Investment Manager aims to achieve (i) a carbon emission intensity reduction of at least 30% relative to the broader U.S. high yield market, which is represented by the ICE / BAML U.S. High Yield Index, and (ii) a 7% per annum reduction in carbon intensity compared to a 2019 baseline.

The Sub-Investment Manager directly engages with investee companies and establishes engagement objectives for each investee company / corporate issuer, aligned with the UN Sustainable Development Goals. The investee company's / corporate issuer's progress in implementing these objectives are evaluated semi-annually. This direct engagement is an essential part of the investment process and the Portfolio's promotion of environmental and social characteristics.

ESG factors are integral to the Sub-Investment Manager's investment process. In particular, investment is prioritised in corporate issuers whose current business products and services are aligned with the UN Sustainable Development Goals (or where there is potential for increased alignment with these goals, following engagement with those companies by the Sub-Investment Manager, as described above).

ESG analysis is performed by the Sub-Investment Manager along with the support of third-party data. The research analysts use their sector expertise to customise criteria for each industry, using the SASB framework as a starting point.

The Sub-Investment Manager also utilise a proprietary ESG scoring system for corporate issuers. This scoring system includes an in-house governance assessment tool and an assessment of industry specific environmental and social factors. The ESG factors applied are sector-specific with customised sector weightings. Companies ranked in the bottom quartile are excluded from the investment.

As noted in the Supplement, the Sub-Investment Manager will ensure that securities representing at least 90% of the Net Asset Value of the Portfolio are covered by the ESG assessment. Through ESG exclusionary steps, the Sub-Investment Manager will also exclude at least 20% of components of the investment universe which are rated the weakest in terms of their ESG assessment.

Benchmark Index

Non-applicable. The Portfolio is actively managed; no benchmark is used for performance comparison purposes or as a universe for selection. ICE / BAML U.S. High Yield Index is used exclusively for ESG rating comparison purposes and carbon intensity reduction comparison purposes only.

Neuberger Berman European High Yield Bond Fund

This Portfolio is classified as an Article 8 Portfolio as it promotes environmental and social characteristics and limits investments to companies that follow good governance practices.

Environmental or social characteristics promoted by the Portfolio

As noted in the Supplement, the Portfolio will invest primarily in corporate high yield fixed income securities, which are (i) denominated in a European currency or (ii) issued or guaranteed by companies of any industrial sector that are domiciled in, or exercise the main part of their economic activity in a European country that are listed, dealt or traded on Recognised Markets.

The Sub-Investment Manager will manage the Portfolio in accordance with the ESG Policy on a continuous basis. The Sub-Investment Manager has fully integrated the ESG Policy into the overall investment process, in particular, the portfolio construction process. A summary of the ESG Policy is detailed above in this SFDR Annex and it is available on the Neuberger Berman website, www.nb.com/esg

The Sub-Investment Manager shall also apply the Controversial Weapons Policy when determining what investments to make for the Portfolio. Further details on this screening/exclusion policy is set out in the "*Sustainable Investment Criteria*" section of the Prospectus.

ESG research is a critical component of the Sub-Investment Manager's portfolio management team's (the "**Team**") fundamental research process. The Team believes that integrating ESG factors into its investment process adds value by helping to identify risks generally not captured by traditional corporate credit analysis and by shedding light on non-financial aspects of an issuer's business.

The Team has integrated its proprietary ESG scoring system into its overall credit best practices research process. This ESG analysis is performed internally by the Team, not outsourced to a centralised group within the firm or to a third party ESG rating service. These proprietary scores are assigned to all issuers held in the Portfolio and are a key component of each issuer's internal credit rating. These internal credit ratings are notched up or down depending on the issuer's ESG profile. This integration creates a direct link between the ESG analysis and the portfolio construction.

The proprietary ESG scoring system is built around the concept of sector specific criteria, which focuses on the ESG issues that are the largest drivers of credit risk in each industry. The Team uses the SASB framework for sector specific criteria as a starting point, but then customises each set of sector criteria based on their own judgement, leveraging their significant sector/industry expertise. The Team also assigns weightings to environmental, social and governance factors, which vary by sector and are aimed at enhancing credit risk assessment.

At the investee company/corporate issuer level, the Sub-Investment Manager consider; **environmental factors** including (i) water, waste management and waste intensity, (ii) climate change, (iii) carbon intensity and (iv) pollution and mitigation management; **social factors** including (i) labour relations, (ii) health and safety, (iii) ethical marketing practices, (iv) data security practices (v) community/government relations; and **governance factors** including (i) board independence and quality, (ii) compensation structure and compensation concerns, (iii) board skillset, (iv) transparency, (v) adaptability and (vi) diversity of board or management team.

Engaging with management is a critical component of the Team's investment process. The research Team maintains an active dialogue with all issuers and these discussions cover, among other things, ESG issues, capital structure, corporate strategy and business / industry trends. The Team closely monitors these engagement activities (through its ESG engagement tracker) and reports on these discussions to the Neuberger Berman credit committee. The Team believes this

consistent engagement with companies can help reduce credit risk.

Oversight of the ESG process and the development of data measuring the impact of ESG in the fixed income markets are also important priorities for the Team. The Team provides quarterly ESG portfolio reviews (touching on key updates and the performance impact of ESG related decision making), tracks closely its management engagement activities through the ESG engagement tracker, monitors its climate-value at risk and works collaboratively within the firm's fixed income ESG working group and ESG committee.

Benchmark Index

The Benchmark has not been designated as a reference benchmark for the purposes of SFDR. Therefore, it is not consistent with the promotion of environmental or social characteristics. For further details on the Benchmark, please refer to the Supplement.

Neuberger Berman Global High Yield Bond Fund

This Portfolio is classified as an Article 8 Portfolio as it promotes environmental and social characteristics and limits investments to companies that follow good governance practices.

Environmental or social characteristics promoted by the Portfolio

As noted in the Supplement, the Portfolio will invest primarily in US dollar and non-U.S. dollar denominated high yield fixed income securities issued or guaranteed by corporate issuers of any industrial sector or issued by governments and agencies globally that are primarily denominated in US Dollar, located throughout the world that are listed, dealt or traded on Recognised Markets.

The Manager and the Sub-Investment Manager will manage the Portfolio in accordance with the ESG Policy on a continuous basis. The Manager and the Sub-Investment Manager have fully integrated the ESG Policy into the overall investment process, in particular, the portfolio construction process. A summary of the ESG Policy is detailed above in this SFDR Annex and it is available on the Neuberger Berman website, www.nb.com/esg

The Manager and the Sub-Investment Manager shall also apply the Controversial Weapons Policy when determining what investments to make for the Portfolio. Further details on this screening/exclusion policy is set out in the "Sustainable Investment Criteria" section of the Prospectus.

ESG research is a critical component of the Manager's and the Sub-Investment Manager's portfolio management teams' (the "Team") fundamental research process. The Team believes that integrating ESG factors into its investment process adds value by helping to identify risks generally not captured by traditional corporate credit analysis and by shedding light on non-financial aspects of an issuer's business.

The Team has integrated its proprietary ESG scoring system into its overall credit best practices research process. This ESG analysis is performed internally by the Team, not outsourced to a centralised group within the firm or to a third party ESG rating service. These proprietary scores are assigned to all issuers held in the Portfolio and are a key component of each issuer's internal credit rating. These internal credit ratings are notched up or down depending on the issuer's ESG profile. This integration creates a direct link between the ESG analysis and the portfolio construction.

The proprietary ESG scoring system is built around the concept of sector specific criteria, which focuses on the ESG issues that are the largest drivers of credit risk in each industry. The Team uses the SASB framework for sector specific criteria as a starting point, but then customises each set of sector criteria based on their own judgement, leveraging their significant sector/industry expertise. The Team also assigns weightings to environmental, social and governance factors, which vary by sector and are aimed at enhancing credit risk assessment.

At the investee company/corporate issuer level, the Manager and the Sub-Investment Manager consider; **environmental factors** including (i) water, waste management and waste intensity, (ii) climate change, (iii) carbon intensity and (iv) pollution and mitigation management; **social factors** including (i) labour relations, (ii) health and safety, (iii) ethical marketing practices, (iv) data security practices (v) community/government relations; and **governance factors** including (i) board independence and quality, (ii) compensation structure and compensation concerns, (iii) board skillset, (iv) transparency, (v) adaptability and (vi) diversity of board or management team.

Engaging with management is a critical component of the Team's investment process. The research Team maintains an active dialogue with all issuers and these discussions cover, among other things, ESG issues, capital structure, corporate strategy and business / industry trends. The Team closely monitors these engagement activities (through its ESG engagement tracker) and reports on these discussions to the Neuberger Berman credit committee. The Team believes this consistent engagement with companies can help reduce credit risk.

Oversight of the ESG process and the development of data measuring the impact of ESG in the fixed income markets are also important priorities for the Team. The Team provides quarterly ESG portfolio reviews (touching on key updates and the performance impact of ESG related decision making), tracks closely its management engagement activities through the ESG engagement tracker, monitors its climate-value at risk and works collaboratively within the firm's fixed income ESG working group and ESG committee.

Benchmark Index

The Benchmark has not been designated as a reference benchmark for the purposes of SFDR. Therefore, it is not consistent with the promotion of environmental or social characteristics. For further details on the Benchmark, please refer to the Supplement.

Neuberger Berman Global High Yield Sustainable Action Fund

This Portfolio is classified as an Article 9 Portfolio as it has a Sustainable Investment as its objective. It invests in companies/corporate issuers that contribute to both environmental and social objectives. The Portfolio actively engages with companies/corporate issuers to encourage and progress their alignment with the UN Sustainable Development Goals. In pursuing its sustainable investment objective, the Portfolio will also take appropriate measures to ensure that (i) its investments do not significantly harm any of the social or environmental objectives; and (ii) that companies it invests in follow good governance practices.

Sustainable Investment Objective of the Portfolio

As noted in the Supplement, the Portfolio's investment objective is to achieve a total return (income plus capital appreciation) with an emphasis on current income, from investments in an actively managed portfolio of global high yield fixed income securities that comply with the Sustainable Criteria (as defined in the Prospectus). Accordingly, the Manager and the Sub-Investment Manager apply the (i) Controversial Weapons Policy, (ii) the Sustainable Exclusion Policy and (iii) the Enhanced Sustainable Exclusion Policy, when determining what investments to make for the Portfolio. Further details on these screening/exclusion policies are set out in the "*Sustainable Investment Criteria*" section of the Prospectus.

The Manager and the Sub-Investment Manager will also manage the Portfolio in accordance with the ESG Policy on a continuous basis. The Manager and the Sub-Investment Manager have fully integrated the ESG Policy into the overall investment process, in particular, the portfolio construction process. A summary of the ESG Policy is detailed above in this SFDR Annex and it is available on the Neuberger Berman website, www.nb.com/esg

The Manager and the Sub-Investment Manager directly engage with investee companies, and establish engagement objectives for each investee company/corporate issuer, aligned with the UN Sustainable Development Goals. The investee company's/corporate issuer's progress in implementing these objectives are evaluated semi-annually. This direct engagement is an essential part of the investment process and ensures that the Portfolio's sustainable objectives are attained.

As noted in the Supplement, ESG factors are integral to the Manager's and the Sub-Investment Manager's investment process. A summary of how the Manager and the Sub-Investment Manager integrate ESG factors into its investment process and portfolio construction is set out in section entitled "*Investment Approach*" in the Supplement. In particular, investment is prioritised in corporate issuers whose current business products and services are aligned with the UN Sustainable Development Goals (or where there is potential for increased alignment with these goals, following engagement with those companies by the Manager and the Sub-Investment Manager).

In addition, the Manager and the Sub-Investment Manager will regularly assess climate risk to seek to construct a more resilient portfolio. This includes undertaking climate value-at-risk scenario analysis, i.e. a top down systematic measure of exposure to transition climate risks (those risks, which arise from the economic shift to a low carbon economy) and physical climate risks (the consequences of damage to physical assets from climate events and extreme weather). The Manager and the Sub-Investment Manager may rebalance the portfolio if analysis shows excessive climate risks and limited paths to mitigate those risks.

ESG analysis is performed by the Manager and the Sub-Investment Manager, and is not outsourced. The research analysts use their sector expertise to customise criteria for each industry, using the SASB as a starting point.

The Manager and the Sub-Investment Manager also utilise a proprietary ESG scoring system for corporate issuers. This scoring system includes an in-house governance assessment tool and an assessment of industry specific environmental and social factors. The ESG factors applied are sector-specific with customised sector weightings. Companies ranked in the bottom quartile are excluded from the investment.

Benchmark Index

Non-applicable. The Portfolio does not have a benchmark index.

Neuberger Berman 5G Connectivity Fund

This Portfolio meets the classification of an Article 8 Portfolio as it promotes environmental and social characteristics and limits investments to companies that follow good governance practices.

Environmental or social characteristics promoted by the Portfolio

As noted in the Supplement, the Portfolio will invest primarily in a portfolio of global equity holdings, focusing on companies that are involved or derive benefit from a universe of companies that offer exposure to the development and enhancement of mobile internet and 5G connectivity ("**Next Generation Connectivity**").

The Sub-Investment Managers will manage the Portfolio in accordance with the ESG Policy on a continuous basis. The Sub-Investment Managers have fully integrated the ESG Policy into the overall investment process, in particular, the portfolio construction process. A summary of the ESG Policy is detailed above in this SFDR Annex and it is available on the Neuberger Berman website, www.nb.com/esg

ESG themed investing is a core component of the Sub-Investment Managers' strategy for the Portfolio.

The Sub-Investment Managers shall also apply the (i) Controversial Weapons Policy, (ii) the Sustainable Exclusion Policy and (iii) the Enhanced Sustainable Exclusion Policy, when determining what investments to make for the Portfolio. Further details on these screening/exclusion policies are set out in the "*Sustainable Investment Criteria*" section of the Prospectus.

The Portfolio's initial investment universe consists of public listed companies across the world that have relevance to the theme of Next Generation Connectivity. For inclusion into the Portfolio, the Sub-Investment Managers seek to narrow this initial investment universe by finding companies that are most likely to sustain (i) leadership positions (e.g. market size, technology, etc.) in Next Generation Connectivity, (ii) maintain attractive financial metrics, (iii) generate earnings growth and (iv) have reasonable valuations. Thematic relevance is measured by having at least 50% of sales/earnings growth or investments related to Next Generation Connectivity. Leadership position is determined by a fundamental analysis of market share trends (in terms of revenues, orders, and/or contracts), technologies and/or business models employed as well as product or service offerings related to next generation mobility.

Systematic evaluation of material ESG factors is embedded in the investment decision-making process pre and post investment and is undertaken for every company within the initial investment universe, which the Sub-Investment Managers follow. The Sub-Investment Managers further evaluate those companies, seeking to identify the best in class companies, with sustainable advantages around the world, such as market leading technology, existing products or market access. The Sub-Investment Managers believe sustainable advantages are demonstrated through best in class product, technology, processes and market access.

In addition to integrating the aforementioned screening/exclusion policies into the portfolio construction process, the Sub-Investment Managers utilise a proprietary ESG scoring system for each company in the strategy that is generated through collaboration with Neuberger Berman centralised ESG team. The ratings on this scoring system leverage existing third party ESG data sources, non-traditional ESG data and analyst judgment on particularly hard to measure factors to create materiality-driven industry relative ratings. The Sub-Investment Managers shall prefer higher ESG rated companies over lower if the higher rated companies would better advance the theme of Next Generation Connectivity in a sustainable way. A written comprehensive ESG analysis is created for every company that is in the bottom 25% of this scoring system, to assess risks highlighted by the rating and steps the Sub-Investment Managers plan to be taking to address or mitigate potential issues.

The Sub-Investment Managers also participate in direct engagement with investee

companies (e.g. face-to-face meetings, frequent phone contact with senior management, discussions with customers, suppliers and competitors and attendance at industry and company conferences). Engagement with investee companies is encouraged to mitigate risks and improve ESG and financial outcomes. The Sub-Investment Managers view this direct engagement, as an essential part of its investment process.

Benchmark Index

The Benchmark has not been designated as a reference benchmark for the purposes of SFDR. Therefore, it is not consistent with the promotion of environmental or social characteristics. For further details on the Benchmark, please refer to the Supplement.

Neuberger Berman Global Thematic Equity Fund

This Portfolio meets the classification of an Article 8 Portfolio as it promotes environmental and social characteristics and limits investments to companies that follow good governance practices.

Environmental or social characteristics promoted by the Portfolio

As noted in the Supplement, the Portfolio investing primarily in globally listed equity securities.

The Sub-Investment Manager will manage the Portfolio in accordance with the ESG Policy on a continuous basis. The Sub-Investment Manager has fully integrated the ESG Policy into the overall investment process, in particular, the portfolio construction process. A summary of the ESG Policy is detailed above in this SFDR Annex and it is available on the Neuberger Berman website, www.nb.com/esg

The Sub-Investment Manager shall also apply the Controversial Weapons Policy, when determining what investments to make for the Portfolio. Further details on this screening/exclusion policy is set out in the "Sustainable Investment Criteria" section of the Prospectus.

ESG factors are integral to the Sub-Investment Manager's investment process, and are tracked and considered by all analysts and portfolio managers, with regular research and data management conducted by the Sub-Investment Manager. The Sub-Investment Manager looks at a wide array of ESG factors that seek to capture immediate developments and long-term trends. The investment process, inter alia identifies secular themes (i.e. broad changes and trends affecting societies, economies and industries) that have the potential for long-term influence (e.g. the rising value of water). A summary of how the Sub-Investment Manager integrates ESG factors into its investment process and portfolio construction is set out in section entitled "Investment Approach" in the Supplement.

As noted in the Supplement, the Sub-Investment Manager also conducts fundamental research to seek to identify multiple globally applicable long-term themes that result from secular shifts based on factors such as demographic, technological, environmental and societal changes.

This research leverages a variety of third party data sources. The Sub-Investment Manager utilises a proprietary ESG scoring system for each company in the strategy. The ratings on this scoring system also leverage the third party ESG data sources. This analysis is used to form the basis of an investment opinion, which is further supported by the Sub-Investment Manager participating in direct engagement with investee companies (e.g. face-to-face meetings, frequent phone contact with senior management, discussions with customers, suppliers and competitors and attendance at industry and company conferences). Engagement with investee companies is encouraged to mitigate risks and improve ESG and financial outcomes. The Sub-Investment Manager views this direct engagement, as an essential part of its investment process.

Benchmark Index

The Benchmark has not been designated as a reference benchmark for the purposes of SFDR. Therefore, it is not consistent with the promotion of environmental or social characteristics. For further details on the Benchmark, please refer to the Supplement.

Neuberger Berman Next Generation Mobility Fund

This Portfolio meets the classification of an Article 8 Portfolio as it promotes environmental and social characteristics and limits investments to companies that follow good governance practices.

Environmental or social characteristics promoted by the Portfolio

As noted in the Supplement, the Portfolio focuses on companies that are involved within the long-term trend of the proliferation of autonomous, electric and connected vehicles ("**Next Generation Mobility**"), as well as companies that are well positioned to benefit from the new business models related to Next Generation Mobility.

The Sub-Investment Manager will manage the Portfolio in accordance with the ESG Policy on a continuous basis. The Sub-Investment Manager has fully integrated the ESG Policy into the overall investment process, in particular, the portfolio construction process. A summary of the ESG Policy is detailed above in this SFDR Annex and it is available on the Neuberger Berman website, www.nb.com/esg

The Sub-Investment Manager shall also apply the Controversial Weapons Policy, when determining what investments to make for the Portfolio. Further details on this screening/exclusion policy is set out in the "*Sustainable Investment Criteria*" section of the Prospectus.

ESG factors are integral to the Sub-Investment Manager's investment process. A summary of how the Sub-Investment Manager integrates ESG factors into its investment process and portfolio construction is set out in section entitled "Investment Approach" in the Supplement.

As noted in the Supplement, in applying this process, the Sub-Investment Manager further evaluates those companies, seeking to identify the best in class companies, with sustainable advantages around the world. The Sub-Investment Manager believes sustainable advantages are demonstrated through best in class product, technology, processes and market access.

This research leverages a variety of third party data sources. The Sub-Investment Manager utilises a proprietary ESG scoring system for each company in the strategy. The ratings on this scoring system also leverage the third party ESG data sources. This analysis is used to form the basis of an investment opinion, which is further supported by the Sub-Investment Manager participating in direct engagement with investee companies (e.g. face-to-face meetings, frequent phone contact with senior management, discussions with customers, suppliers and competitors and attendance at industry and company conferences). Engagement with investee companies is encouraged to mitigate risks and improve ESG and financial outcomes. The Sub-Investment Manager views this direct engagement, as an essential part of its investment process.

Benchmark Index

The Benchmark has not been designated as a reference benchmark for the purposes of SFDR. Therefore, it is not consistent with the promotion of environmental or social characteristics. For further details on the Benchmark, please refer to the Supplement.

Neuberger Berman US Long Short Equity Fund

This Portfolio meets the classification of an Article 8 Portfolio as it promotes environmental and social characteristics and limits investments to companies that follow good governance practices.

Environmental or social characteristics promoted by the Portfolio

As noted in the Supplement, the Portfolio will primarily take long and synthetic short positions in equity and equity-linked securities listed or traded in US equity markets and in Exchange Traded Funds ("ETFs"), which are exposed to such securities.

The Sub-Investment Manager will manage the Portfolio in accordance with the ESG Policy on a continuous basis. The Sub-Investment Manager has fully integrated the ESG Policy into the overall investment process, in particular, the portfolio construction process. A summary of the ESG Policy is detailed above in this SFDR Annex and it is available on the Neuberger Berman website, www.nb.com/esg

The Sub-Investment Manager shall also apply the Controversial Weapons Policy, when determining what investments to make for the Portfolio. Further details on this screening/exclusion policy is set out in the "Sustainable Investment Criteria" section of the Prospectus.

The Sub-Investment Manager considers financially material ESG factors as part of its investment decision making process from both an opportunity and a risk mitigation perspective. ESG integration is an essential part of the Sub-Investment Manager's rigorous and disciplined investment process. The Sub-Investment Manager focuses on companies and business models that demonstrate: strong corporate governance, high quality management, environmental and social leadership, and efficient capital allocation. This ESG framework particularly applies to the long side of the Portfolio which takes a multi-year time horizon. The Sub-Investment Manager's short positions are short-term (typically within a year) and more tactical and therefore may or may not take ESG factors into consideration which are long term by nature.

The Sub-Investment Manager conducts fundamental research, whilst also leveraging a broad range of sources, which combines both investee company reported and third party research. This leads the Sub-Investment Manager to early identification of sustainability trends that are not otherwise recognised by the market. In addition, through proprietary scenario analysis, investee companies are allocated climate risk profiles, which are taken into consideration by the Sub-Investment Manager.

The Sub-Investment Manager utilises a proprietary ESG scoring system for each company in the strategy. The ratings on this scoring system also leverage third party ESG data sources. This analysis is further supported by the Sub-Investment Manager participating in direct engagement with investee companies e.g. face-to-face meetings, frequent phone contact with senior management. Engagement with investee companies is encouraged to mitigate risks and improve ESG and financial outcomes. The Sub-Investment Manager views this direct engagement, as an essential part of its investment process.

Benchmarks Index

The Benchmarks have not been designated as reference benchmarks for the purposes of SFDR. Therefore, they are not consistent with the promotion of environmental or social characteristics. For further details on the Benchmarks, please refer to the Supplement.

Neuberger Berman China Bond Fund

This Portfolio meets the classification of an Article 8 Portfolio as it promotes environmental and social characteristics and limits investments to companies that follow good governance practices.

Environmental or social characteristics promoted by the Portfolio

As noted in the Supplement, the Portfolio will invest in debt securities and money market instruments which are issued within the PRC by PRC government, PRC government agencies or corporate issuers which have their head office or exercise an overriding part of their economic activity in the PRC and which are denominated in or are exposed to the currency of the PRC.

The Sub-Investment Manager will manage the Portfolio in accordance with the ESG Policy on a continuous basis. The Sub-Investment Manager has fully integrated the ESG Policy into the overall investment process, in particular, the portfolio construction process. A summary of the ESG Policy is detailed above in this SFDR Annex and it is available on the Neuberger Berman website, www.nb.com/esg

The Sub-Investment Manager shall also apply the (i) Controversial Weapons Policy, when determining what investments to make for the Portfolio. Further details on this screening/exclusion policy is set out in the "Sustainable Investment Criteria" section of the Prospectus. In addition, the Portfolio excludes companies which are involved in direct child labour, in the tobacco industry, as well as certain companies with significant exposure to thermal coal or oil sands.

ESG factors are integral to the investment process, and are tracked and considered by all analysts and portfolio managers. ESG data coverage for the China universe is still evolving; therefore proprietary ESG scores are available only for part of the designated China bond universe currently.

The **environmental factors** considered include (i) the green procurement chain, (ii) CO2 emissions levels, (iii) greenhouse gases reduction programmes, (iv) environmental management systems and (v) water stresses. An example of some of the **social factors** which the Sub-Investment Manager considers includes: (i) social supply chain incidents (ii) product safety (iii) privacy and data security and (iv) human capital development. The **governance factors** considered at the corporate issuer level, include (i) senior management quality/board quality, (ii) financial and accounting strategy and disclosure, as well as (iii) regulatory and legal track record. Companies that have a low ESG score (i.e. of 33/100 or lower) are excluded from the investment, unless the Sub-Investment Manager's engagement efforts with the investee company result in a positive outlook regarding ESG performance.

The Sub-Investment Manager makes assessments on these ESG factors on a regular basis, at least at each quarterly portfolio review and expands upon these factors from time to time. The Sub-Investment Manager shall also utilise a proprietary ESG scoring system, which includes multiple non-financial metrics to improve credit risk assessment. This scoring system includes an in-house governance assessment tool and a specific scoring methodology for environmental and social factors.

The Sub-Investment Manager shall also engage directly with the senior management team of investee companies, to understand risks and opportunities. The Sub-Investment Manager views this direct engagement as an essential part of its investment process.

Benchmark Index

The Benchmark has not been designated as a reference benchmark for the purposes of SFDR. Therefore, it is not consistent with the promotion of environmental or social characteristics. For further details on the Benchmark, please refer to the Supplement.

Neuberger Berman US Multi Cap Opportunities Fund

This Portfolio meets the classification of an Article 8 Portfolio as it promotes environmental and social characteristics and limits investments to companies that follow good governance practices.

Environmental or social characteristics promoted by the Portfolio

As noted in the Supplement, the Portfolio shall primarily invest in equity and equity-linked securities, listed or traded on Recognised Markets in the US and related securities and American Depositary Receipts (ADRs) that are selected using a fundamental, bottom-up research approach. The Portfolio may hold stocks of companies of any market capitalisation and in any economic sector.

The Sub-Investment Manager will manage the Portfolio in accordance with the ESG Policy on a continuous basis. The Sub-Investment Manager has fully integrated the ESG Policy into the overall investment process, in particular, the portfolio construction process. A summary of the ESG Policy is detailed above in this SFDR Annex and it is available on the Neuberger Berman website, www.nb.com/esg

The Sub-Investment Manager shall also apply the (i) Controversial Weapons Policy, when determining what investments to make for the Portfolio. Further details on this screening/exclusion policy is set out in the "*Sustainable Investment Criteria*" section of the Prospectus.

The Sub-Investment Manager considers financially material ESG factors as part of its investment decision-making process from both an opportunity and a risk mitigation perspective. ESG integration is an essential part of the Sub-Investment Manager's rigorous and disciplined investment process. The portfolio management team's evaluation of current and prospective investments on material ESG factors, focuses on companies and business models that demonstrate: strong corporate governance, high quality management, environmental and social leadership, and efficient capital allocation.

The Sub-Investment Manager conducts fundamental research, whilst also leveraging a broad range of sources, which combines both investee company reported and third party research. This leads the Sub-Investment Manager to early identification of sustainability trends that are not otherwise recognised by the market. In addition, through proprietary scenario analysis, investee companies are allocated climate risk profiles, which are taken into consideration by the Sub-Investment Manager.

The Sub-Investment Manager utilises a proprietary ESG scoring system for each company in the strategy. The ratings on this scoring system also leverage third party ESG data sources. This analysis is further supported by the Sub-Investment Manager participating in direct engagement with investee companies e.g. face-to-face meetings, frequent phone contact with senior management. Engagement with investee companies is encouraged to mitigate risks and improve ESG and financial outcomes. The Sub-Investment Manager views this direct engagement, as an essential part of its investment process.

Benchmark Index

The Benchmark has not been designated as a reference benchmark for the purposes of SFDR. Therefore, it is not consistent with the promotion of environmental or social characteristics. For further details on the Benchmark, please refer to the Supplement.

Neuberger Berman US Equity Fund

This Portfolio meets the classification of an Article 8 Portfolio as it promotes environmental and social characteristics and limits investments to companies that follow good governance practices.

Environmental or social characteristics promoted by the Portfolio

As noted in the Supplement, the Portfolio will principally take long positions in equity and equity-linked securities, listed or traded on Recognised Markets in the US.

The Sub-Investment Manager will manage the Portfolio in accordance with the ESG Policy on a continuous basis. The Sub-Investment Manager has fully integrated the ESG Policy into the overall investment process, in particular, the portfolio construction process. A summary of the ESG Policy is detailed above in this SFDR Annex and it is available on the Neuberger Berman website, www.nb.com/esg

The Sub-Investment Manager shall also apply the Controversial Weapons Policy, when determining what investments to make for the Portfolio. Further details on this screening/exclusion policy is set out in the "*Sustainable Investment Criteria*" section of the Prospectus.

The Sub-Investment Manager considers financially material ESG factors as part of its investment decision making process from both an opportunity and a risk mitigation perspective. ESG integration is an essential part of the Sub-Investment Manager's rigorous and disciplined investment process. The Sub-Investment Manager focuses on companies and business models that demonstrate: strong corporate governance, high quality management, environmental and social leadership, and efficient capital allocation. This ESG framework allows the Portfolio to take a multi-year time horizon.

The Sub-Investment Manager conducts fundamental research and utilises proprietary in-house research tools, whilst also leveraging a broad range of sources, which combines both investee company reported and third party research. The Sub-Investment Manager analyses data at both industry level and investee company level, in order to develop a data driven differentiated view to investment decision making.

This leads the Sub-Investment Manager to early identification of sustainability trends that are not otherwise recognised by the market. In addition, through proprietary scenario analysis, investee companies are allocated climate risk profiles, which are taken into consideration by the Sub-Investment Manager.

The Sub-Investment Manager utilises the in-house proprietary ESG scoring system for each company in the strategy. The ratings on this scoring system also leverage third party ESG data sources. Neuberger Berman Corporate Hybrid Bond Fund

This Portfolio is classified as an Article 8 Portfolio as it promotes environmental and social characteristics and limits investments to companies that follow good governance practices.

Environmental or social characteristics promoted by the Portfolio

As noted in the Supplement, the Portfolio seeks to achieve an attractive level of total return (income plus capital appreciation) by investing primarily in investment grade and sub-investment grade corporate hybrid bonds.

The Sub-Investment Manager will manage the Portfolio in accordance with the ESG Policy on a continuous basis. The Sub-Investment Manager has fully integrated the ESG Policy into the overall investment process, in particular, the portfolio construction process. A summary of the ESG Policy is detailed above in this SFDR Annex and it is available on the Neuberger Berman website, www.nb.com/esg

The Sub-Investment Manager shall also apply the Controversial Weapons Policy when determining what investments to make for the Portfolio. Further details on this screening/exclusion policy is set out in the "Sustainable Investment Criteria" section of the Prospectus.

ESG analysis is an important component of the fundamental credit research, and identifies business risks, which would cause deterioration in an issuer's credit profile. A proprietary ESG scoring system is utilised which focuses on the ESG issues that are the largest drivers of credit risk in each industry. These proprietary scores are assigned to all issuers. By integrating proprietary ESG analysis into internal credit ratings, there is a direct link between the analysis of material ESG factors and portfolio construction.

Material ESG factors are identified and assessed during the credit research process by:

- utilising the **environmental and social factors** identified by the SASB as potentially material for the given industry. Not all factors identified by SASB are relevant for fixed income investors, or for the time horizon over which the Sub-Investment Manager is valuing a security and therefore the factors are modified based on specific sectors and the expert judgment of the Sub-Investment Manager.
- the factors identified are reviewed and discussed and the rationale is debated and any modifications made. This discussion also includes the relative weight to place on each factor.
- a score is given to each issuer and where possible robust data sources are used to complete this scoring.

Sector specific **environmental factors** analysed include (i) carbon footprint, (ii) ecological incidents, (iii) water usage and remediation in the exploration and production sector; (v) carbon footprint in the pharmaceuticals sector and (vi) responsible and transparent underwriting in the banking sector.

Sector specific **social factors** analysed include (i) workforce health and safety, (ii) engagement with relevant communities in the exploration and production sector; (iii) affordability and fair pricing and (iv) drug safety in the pharmaceuticals sector; (v) privacy and data security, (vi) regulatory compliance and (vii) track record of litigation and controversies in the banking sector.

A proprietary investment grade credit governance score is applied which is standardised across all sectors, which considers: (i) level of independence of board members; (ii) capability of the board; (iii) compensation tied to cash flow and long-term viability; (iv) capability of management; and (v) financial statements quality and disclosures.

Assessments on these ESG factors are made on a regular basis, at least at each quarterly portfolio review and expands upon these factors from time to time.

ESG scores allow credit analysts to (i) reach more comprehensive views on relative value between issuers and (ii) prioritise additional research and engagement efforts on the specific ESG factors on which a given issuer appears to be lagging. In this way, credit analysts are focusing on the material ESG factors, which they believe are likely to be most financially material to the Portfolio as a whole.

In addition to the aforementioned internal research, other multiple sources of ESG research is utilised including company information, meetings with management, industry peers, academic organisations, trade publications and conferences, third party ESG research, government agencies, labour organisations and non-governmental organisations (NGOs).

Benchmark Index

The Benchmark has not been designated as a reference benchmark for the purposes of SFDR. Therefore, it is not consistent with the promotion of environmental or social characteristics. For further details on the Benchmark, please refer to the Supplement.

Neuberger Berman Global Opportunistic Bond Fund

This Portfolio is classified as an Article 8 Portfolio as it promotes environmental and social characteristics and limits investments to companies that follow good governance practices.

Environmental or social characteristics promoted by the Portfolio

As noted in the Supplement, the Portfolio seeks to achieve an attractive level of total return (income plus capital appreciation) by opportunistically investing in a diversified mix of fixed rate and floating rate debt securities globally under varying market environments with a focus on downside protection.

The Manager and the Sub-Investment Manager will manage the Portfolio in accordance with the ESG Policy on a continuous basis. The Manager and the Sub-Investment Manager have fully integrated the ESG Policy into the overall investment process, in particular, the portfolio construction process. A summary of the ESG Policy is detailed above in this SFDR Annex and is also available on the Neuberger Berman website, www.nb.com/esg

The Manager and the Sub-Investment Manager shall also apply the Controversial Weapons Policy when determining what investments to make for the Portfolio. Further details on this screening/exclusion policy is set out in the "*Sustainable Investment Criteria*" section of the Prospectus.

The Manager and the Sub-Investment Manager incorporate ESG factors into their sector research and security selection process. As such, the Manager and the Sub-Investment Manager have developed a proprietary ESG scoring system for corporate holdings across global developed credit markets, both investment grade and non-investment grade, as well as for emerging market debt (local rates, FX, sovereign credit and corporate credit). The Manager and the Sub-Investment Manager also integrates ESG factors into its municipal research process.

ESG Factors in Global Investment Grade Credit and Global Non-Investment Grade Credit (Developed Markets)

The Manager and the Sub-Investment Manager systematically consider and evaluate ESG factors as an important component of their credit analysis discipline when making investment decisions. Proprietary ESG scores are a key component of the internal credit ratings. These proprietary scores are assigned to all issuers. The proprietary ESG scoring system is built around the concept of sector specific criteria, which focuses on the ESG issues that are the largest drivers of credit risk in each industry. The SASB framework for sector specific criteria are used as a starting point, but the Manager and the Sub-Investment Manager customise each set of sector criteria based on their judgement, leveraging their significant sector/industry expertise. They also assign weightings to environmental, social and governance factors, which vary by sector and are aimed at enhancing their credit risk assessment.

ESG Factors in Emerging Market Corporate Debt

ESG factors are integrated at three different levels:

1) Exclusion lists

The Manager and the Sub-Investment Manager exclude companies, which are involved in controversial weapons (as noted above), child labour, and the tobacco industry and thermal coal mining companies.

2) Integration of ESG factors in fundamental analysis

ESG scores are assigned to each issuer using the proprietary ESG scoring system.

3) Analysis of Controversies and Direct Engagement

The Manager and the Sub-Investment Manager engage with corporate issuers which have high impact controversies or which have low internal ESG scores to assess if the issues are being addressed.

ESG Factors in Emerging Market Debt Country Analysis

The Manager and the Sub-Investment Manager assess ESG factors at least quarterly with the aim of capturing the qualitative factors driving the credit quality of Emerging Market countries.

The **environmental factors** considered are (i) energy intensity of GDP, (ii) global adaptation ranking, (iii) carbon emissions per GDP, (iv) carbon emissions per capita, (v) coal use in electricity generation, (vi) CO₂ emissions levels per GDP and per capita and (vii) the degree to which electricity is being produced from coal sources. The Manager and the Sub-Investment Manager also monitor countries' contributions/adherence to the UN Sustainable Development Goals.

The **social factors** considered are (i) government effectiveness, (ii) regulatory quality, (iii) political stability and security, (iv) human development and (v) voice and accountability. Other social factors considered in respect of country analysis include a country's relative position on income, education and health as tracked by local and international organisations and development banks, as well as factors related to the effectiveness and legitimacy of the administration through public opinion surveys.

The **governance factors** considered are (i) rule of law, (ii) corruption, (iii) politics and election calendar, (iv) banking system strength/non-performing loans, (v) ease of doing business and (vi) trade openness. There is also a focus on the quality of economic governance.

Municipal Bonds

The credit process focuses on four primary factors: economy, leverage, financial performance and management and/or political leadership. The quality of issuers' governance and management practices are assessed, including corruption, sound budgetary practices, and responsible use of debt. Other factors are also considered such as environmental (i.e. polluted drinking water) and social risks (i.e. crime) that may affect the borrower's ability to repay. Once a bond is found to be an acceptable credit risk, the issuer's governance, policies, and management of material social and environmental factors are reviewed. If an issuer is determined to have systemic concerns, the bond is not eligible for purchase. If the issuer meets the required standards, the Manager and the Sub-Investment Manager review the bonds' use of proceeds and score accordingly based on the proprietary methodology.

Benchmark Index

The Benchmark has not been designated as a reference benchmark for the purposes of SFDR. Therefore, it is not consistent with the promotion of environmental or social characteristics. For further details on the Benchmark, please refer to the Supplement.

Neuberger Berman Global Bond Fund

This Portfolio is classified as an Article 8 Portfolio as it promotes environmental and social characteristics and limits investments to companies that follow good governance practices.

Environmental or social characteristics promoted by the Portfolio

As noted in the Supplement, the Portfolio seeks to achieve an attractive level of total return (income plus capital appreciation) from global fixed income markets.

The Manager and the Sub-Investment Manager will manage the Portfolio in accordance with the ESG Policy on a continuous basis. The Manager and the Sub-Investment Manager have fully integrated the ESG Policy into the overall investment process, in particular, the portfolio construction process. A summary of the ESG Policy is detailed above in this SFDR Annex and is also available on the Neuberger Berman website, www.nb.com/esg

The Manager and the Sub-Investment Manager shall also apply the Controversial Weapons Policy when determining what investments to make for the Portfolio. Further details on this screening/exclusion policy is set out in the "Sustainable Investment Criteria" section of the Prospectus.

The Manager and the Sub-Investment Manager incorporate ESG factors into their sector research and security selection process. As such, the Manager and the Sub-Investment Manager have developed a proprietary ESG scoring system for corporate holdings across global developed credit markets, both investment grade and non-investment grade, as well as for emerging market debt (local rates, FX, sovereign credit and corporate credit). The Manager and the Sub-Investment Manager also integrates ESG factors into its municipal research process.

ESG Factors in Global Investment Grade Credit and Global Non-Investment Grade Credit (Developed Markets)

The Manager and the Sub-Investment Manager systematically consider and evaluate ESG factors as an important component of their credit analysis discipline when making investment decisions. Proprietary ESG scores are a key component of the internal credit ratings. These proprietary scores are assigned to all issuers. The proprietary ESG scoring system is built around the concept of sector specific criteria, which focuses on the ESG issues that are the largest drivers of credit risk in each industry. The SASB framework for sector specific criteria are used as a starting point, but the Manager and the Sub-Investment Manager customise each set of sector criteria based on their judgement, leveraging their significant sector/industry expertise. They also assign weightings to environmental, social and governance, which vary by sector and are aimed at enhancing their credit risk assessment.

ESG Factors in Emerging Market Corporate Debt

ESG factors are integrated at three different levels:

1) Exclusion lists

The Manager and the Sub-Investment Manager exclude companies, which are involved in controversial weapons (as noted above), child labour, and the tobacco industry and thermal coal mining companies.

2) Integration of ESG factors in fundamental analysis

ESG scores are assigned to each issuer using the proprietary ESG scoring system.

3) Analysis of Controversies and Direct Engagement

The Manager and the Sub-Investment Manager engage with corporate issuers which have high impact controversies or which have low internal ESG scores to assess if the issues are being addressed.

ESG Factors in Emerging Market Debt Country Analysis

The Manager and the Sub-Investment Manager assess ESG factors at least quarterly with the aim of capturing the qualitative factors driving the credit quality of Emerging Market countries.

The **environmental factors** considered are (i) energy intensity of GDP, (ii) global adaption ranking, (iii) carbon emissions per GDP, (iv) carbon emissions per capita, (v) coal use in electricity generation, (vi) CO2 emissions levels per GDP and per capita and (vii) the degree to which electricity is being produced from coal sources. The Manager and the Sub-Investment Manager also monitor countries' contributions/adherence to the UN Sustainable Development Goals.

The **social factors** considered are (i) government effectiveness, (ii) regulatory quality, (iii) political stability and security, (iv) human development and (v) voice and accountability. Other social factors considered in respect of country analysis include a country's relative position on income, education and health as tracked by local and international organisations and development banks, as well as factors related to the effectiveness and legitimacy of the administration through public opinion surveys.

The **governance factors** considered are (i) rule of law, (ii) corruption, (iii) politics and election calendar, (iv) banking system strength/non-performing loans, (v) ease of doing business and (vi) trade openness. There is also a focus on the quality of economic governance.

Benchmark Index

The Benchmark has not been designated as a reference benchmark for the purposes of SFDR. Therefore, it is not consistent with the promotion of environmental or social characteristics. For further details on the Benchmark, please refer to the Supplement.

Neuberger Berman Strategic Income Fund

This Portfolio is classified as an Article 8 Portfolio as it promotes environmental and social characteristics and limits investments to companies that follow good governance practices.

Environmental or social characteristics promoted by the Portfolio

As noted in the Supplement, the Portfolio seeks to achieve an attractive level of total return (income plus capital appreciation) by investing in a diversified mix of fixed rate and floating rate debt securities globally under varying market environments with a focus on downside protection.

The Manager and the Sub-Investment Manager will manage the Portfolio in accordance with the ESG Policy on a continuous basis. The Manager and the Sub-Investment Manager have fully integrated the ESG Policy into the overall investment process, in particular, the portfolio construction process. A summary of the ESG Policy is detailed above in this SFDR Annex and is also available on the Neuberger Berman website, www.nb.com/esg

The Manager and the Sub-Investment Manager shall also apply the Controversial Weapons Policy when determining what investments to make for the Portfolio. Further details on this screening policy is set out in the "*Sustainable Investment Criteria*" section of the Prospectus.

The Manager and the Sub-Investment Manager incorporate ESG factors into their sector research and security selection process. Benchmark Index

The Benchmark has not been designated as a reference benchmark for the purposes of SFDR. Therefore, it is not consistent with the promotion of environmental or social characteristics. For further details on the Benchmark, please refer to the Supplement.

Neuberger Berman Euro Bond Absolute Return Fund

This Portfolio is classified as an Article 8 Portfolio as it promotes environmental and social characteristics and limits investments to companies that follow good governance practices.

Environmental or social characteristics promoted by the Portfolio

As noted in the Supplement, the Portfolio seeks to generate positive absolute returns over a market cycle (typically 3-5 years), irrespective of market conditions with a moderate level of volatility. It aims to achieve this by implementing an unconstrained strategy combining long and synthetic short positions in a diversified portfolio of predominantly Euro-denominated debt securities.

The Manager will manage the Portfolio in accordance with the ESG Policy on a continuous basis. The Manager has fully integrated the ESG Policy into the overall investment process, in particular, the portfolio construction process. A summary of the ESG Policy is detailed above in this SFDR Annex and is also available on the Neuberger Berman website, www.nb.com/esg

The Manager shall also apply the Controversial Weapons Policy, when determining what investments to make for the Portfolio. Further details on this screening/exclusion policy is set out in the "Sustainable Investment Criteria" section of the Prospectus.

ESG research is a critical component of the Manager's portfolio management team's (the "Team") fundamental research process. The Team believes that integrating ESG factors into its investment process adds value by helping to identify risks generally not captured by traditional corporate credit analysis and by shedding light on non-financial aspects of an issuer's business.

The Team has integrated its proprietary ESG scoring system into its overall credit best practices research process. This ESG analysis is performed internally by the Team, not outsourced to a centralised group within the firm or to a third party ESG rating service. These proprietary scores are assigned to all issuers held in the Portfolio and are a key component of each issuer's internal credit rating. These internal credit ratings are notched up or down depending on the issuer's ESG profile. This integration creates a direct link between the ESG analysis and the portfolio construction.

The proprietary ESG scoring system is built around the concept of sector specific criteria, which focuses on the ESG issues that are the largest drivers of credit risk in each industry. The Team uses the SASB framework for sector specific criteria as a starting point, but then customises each set of sector criteria based on their own judgement, leveraging their significant sector/industry expertise. The Team also assigns weightings to environmental, social and governance factors, which vary by sector and are aimed at enhancing credit risk assessment.

Engaging with management is a critical component of the Team's investment process. The research Team maintains an active dialogue with all issuers and these discussions cover, among other things, ESG issues, capital structure, corporate strategy and business / industry trends. The Team closely monitors these engagement activities (through its ESG engagement tracker) and reports on these discussions to the Neuberger Berman credit committee. The Team believes this consistent engagement with companies can help reduce credit risk.

Oversight of the ESG process and the development of data measuring the impact of ESG in the fixed income markets are also important priorities for the Team. The Team provides quarterly ESG portfolio reviews (touching on key updates and the performance impact of ESG related decision making), tracks closely its management engagement activities through the ESG engagement tracker, monitors its climate-value at risk and works collaboratively within the firm's fixed income ESG working group and ESG committee.

Benchmark Index

The Benchmark has not been designated as a reference benchmark for the purposes of SFDR. Therefore, it is not consistent with the promotion of environmental or social characteristics. For further details on the Benchmark, please refer to the Supplement.

Neuberger Berman Ultra Short Term Euro Bond Fund

This Portfolio is classified as an Article 8 Portfolio as it promotes environmental and social characteristics and limits investments to companies that follow good governance practices.

Environmental or social characteristics promoted by the Portfolio

As noted in the Supplement, the Portfolio's objective to achieve an attractive level of outperformance over the Euro cash return over a period of 1 year irrespective of the market environment by taking exposure to a diversified mix of short-term Euro-denominated fixed and floating rate debt securities.

The Manager will manage the Portfolio in accordance with the ESG Policy on a continuous basis. The Manager has fully integrated the ESG Policy into the overall investment process, in particular, the portfolio construction process. A summary of the ESG Policy is detailed above in this SFDR Annex and is also available on the Neuberger Berman website, www.nb.com/esg

The Manager shall also apply the Controversial Weapons Policy, when determining what investments to make for the Portfolio. Further details on this screening/exclusion policy is set out in the "Sustainable Investment Criteria" section of the Prospectus.

ESG research is a critical component of the Manager's portfolio management team's (the "Team") fundamental research process. The Team believes that integrating ESG factors into its investment process adds value by helping to identify risks generally not captured by traditional corporate credit analysis and by shedding light on non-financial aspects of an issuer's business.

The Team has integrated its proprietary ESG scoring system into its overall credit best practices research process. This ESG analysis is performed internally by the Team, not outsourced to a centralised group within the firm or to a third party ESG rating service. These proprietary scores are assigned to all issuers held in the Portfolio and are a key component of each issuer's internal credit rating. These internal credit ratings are notched up or down depending on the issuer's ESG profile. This integration creates a direct link between the ESG analysis and the portfolio construction.

The proprietary ESG scoring system is built around the concept of sector specific criteria, which focuses on the ESG issues that are the largest drivers of credit risk in each industry. The Team uses the SASB framework for sector specific criteria as a starting point, but then customises each set of sector criteria based on their own judgement, leveraging their significant sector/industry expertise. Engaging with management is a critical component of the Team's investment process. The research Team maintains an active dialogue with all issuers and these discussions cover, among other things, ESG issues, capital structure, corporate strategy and business / industry trends. The Team closely monitors these engagement activities (through its ESG engagement tracker) and reports on these discussions to the Neuberger Berman credit committee. The Team believes this consistent engagement with companies can help reduce credit risk.

Oversight of the ESG process and the development of data measuring the impact of ESG in the fixed income markets are also important priorities for the Team. The Team provides quarterly ESG portfolio reviews (touching on key updates and the performance impact of ESG related decision making), tracks closely its management engagement activities through the ESG engagement tracker, monitors its climate-value at risk and works collaboratively within the firm's fixed income ESG working group and ESG committee.

Benchmark Index

The Benchmark has not been designated as a reference benchmark for the purposes of SFDR. Therefore, it is not consistent with the promotion of environmental or social characteristics. For further details on the Benchmark, please refer to the Supplement.

Neuberger Berman Euro Opportunistic Bond Fund

This Portfolio is classified as an Article 8 Portfolio as it promotes environmental and social characteristics and limits investments to companies that follow good governance practices.

Environmental or social characteristics promoted by the Portfolio

As noted in the Supplement, the Portfolio seeks to outperform the Benchmark (as specified in the "Benchmark" section of the Supplement) before fees over a market cycle (typically 3 years) by investing in a diversified mix of Euro-denominated fixed and floating rate debt securities.

The Manager will manage the Portfolio in accordance with the ESG Policy on a continuous basis. The Manager has fully integrated the ESG Policy into the overall investment process, in particular, the portfolio construction process. A summary of the ESG Policy is detailed above in this SFDR Annex and is also available on the Neuberger Berman website, www.nb.com/esg

The Manager shall also apply the Controversial Weapons Policy, when determining what investments to make for the Portfolio. Further details on this screening/exclusion policy is set out in the "*Sustainable Investment Criteria*" section of the Prospectus.

ESG research is a critical component of the Manager's portfolio management team's (the "**Team**") fundamental research process. The Team believes that integrating ESG factors into its investment process adds value by helping to identify risks generally not captured by traditional corporate credit analysis and by shedding light on non-financial aspects of an issuer's business.

The Team has integrated its proprietary ESG scoring system into its overall credit best practices research process. This ESG analysis is performed internally by the Team, not outsourced to a centralised group within the firm or to a third party ESG rating service. These proprietary scores are assigned to all issuers held in the Portfolio and are a key component of each issuer's internal credit rating. These internal credit ratings are notched up or down depending on the issuer's ESG profile. This integration creates a direct link between the ESG analysis and the portfolio construction.

The proprietary ESG scoring system is built around the concept of sector specific criteria, which focuses on the ESG issues that are the largest drivers of credit risk in each industry. The Team uses the SASB framework for sector specific criteria as a starting point, but then customises each set of sector criteria based on their own judgement, leveraging their significant sector/industry expertise. The research Team maintains an active dialogue with all issuers and these discussions cover, among other things, ESG issues, capital structure, corporate strategy and business / industry trends. The Team closely monitors these engagement activities (through its ESG engagement tracker) and reports on these discussions to the Neuberger Berman credit committee. The Team believes this consistent engagement with companies can help reduce credit risk.

Oversight of the ESG process and the development of data measuring the impact of ESG in the fixed income markets are also important priorities for the Team. The Team provides quarterly ESG portfolio reviews (touching on key updates and the performance impact of ESG related decision making), tracks closely its management engagement activities through the ESG engagement tracker, monitors its climate-value at risk and works collaboratively within the firm's fixed income ESG working group and ESG committee.

Benchmark Index

The Benchmark has not been designated as a reference benchmark for the purposes of SFDR. Therefore, it is not consistent with the promotion of environmental or social characteristics. For further details on the Benchmark, please refer to the Supplement.

Neuberger Berman Multi-Asset Income Fund

This Portfolio is classified as an Article 8 Portfolio as it promotes environmental and social characteristics and limits investments to companies that follow good governance practices.

Environmental or social characteristics promoted by the Portfolio

As noted in the Supplement, the Portfolio aims to provide an income distribution of 7% per annum before fees, whilst also seeking to preserve capital and offering the potential for capital growth over a market cycle (typically 3 years) by investing in a diversified range of assets and markets worldwide.

The Manager and the Sub-Investment Managers will manage the Portfolio in accordance with the ESG Policy on a continuous basis. The Manager and the Sub-Investment Managers have fully integrated the ESG Policy into the overall investment process, in particular, the portfolio construction process. A summary of the ESG Policy is detailed above in this SFDR Annex and it is available on the Neuberger Berman website, www.nb.com/esg

The Manager and the Sub-Investment Managers shall also apply the Controversial Weapons Policy when determining what investments to make for the Portfolio. Further details on this screening/exclusion policy is set out in the "*Sustainable Investment Criteria*" section of the Prospectus.

The Manager and the Sub-Investment Managers shall consider environmental factors which may include but are not limited to (i) carbon emissions and climate change, (ii) natural resource use, (iii) pollution and toxic emissions, and (iv) use of green technologies, where applicable. In terms of social factors, the Manager and the Sub-Investment Manager shall consider, including but not limited to, (i) data privacy and security, (ii) labor relations, (iii) human capital management, and (iv) product safety, where applicable. The governance factors that the Manager and the Sub-Investment Manager shall consider may include, but are not limited to, (i) corporate governance, (ii) board independence and quality, and (iii) business ethics.

The Manager and the Sub-Investment Managers seek to evaluate public companies by utilising a proprietary ESG score which is developed by combining external, third-party ESG data with internal proprietary ESG ratings provided by the Manager and the Sub-Investment Managers. The proprietary ESG score is used within the Manager's and the Sub-Investment Managers' proprietary factor score that combines Momentum, Quality, Low Risk, Income, and Value. This score allows the Manager and the Sub-Investment Managers to assess the attractiveness of securities within their investable universe and then seek to position the portfolio accordingly, favouring securities that rank higher based on this combined multi-factor score and underweighting securities that rank lower. Additionally, the firm's dedicated ESG team and equity analysts also proactively engage a portion of the companies held within the Portfolio to help drive these companies to make positive changes in environmental, social, and/or governance issues which the Manager and the Sub-Investment Manager believe to be a potential driver of attractive returns.

Benchmark Index

Non-applicable. The Portfolio does not have a benchmark index.

Neuberger Berman CLO Income Fund

This Portfolio is classified as an Article 8 Portfolio as it promotes environmental and social characteristics and limits investments to companies that follow good governance practices.

Environmental or social characteristics promoted by the Portfolio

As noted in the Supplement, the Portfolio invests primarily in USD and EUR denominated floating rate collateralised loan obligations (“CLO”) debt securities and typically maintains exposure to the US high yield market.

The Sub-Investment Manager will manage the Portfolio in accordance with the ESG Policy on a continuous basis. The Sub-Investment Manager has fully integrated the ESG Policy into the overall investment process, in particular, security selection and CLO collateral manager evaluation process. A summary of the ESG Policy is detailed above in this SFDR Annex and it is available on the Neuberger Berman website, www.nb.com/esg

The Sub-Investment Manager shall also apply the Controversial Weapons Policy when determining what investments to make for the Portfolio. Further details on this screening/exclusion policy is set out in the “Sustainable Investment Criteria” section of the Prospectus.

ESG factors are integrated into the security selection investment process through the monitoring and avoidance of CLOs with relatively significant underlying corporate investments that generate a significant portion of their revenues from coal mining/extraction, cluster munitions, nuclear weapons, tobacco products, for-profit correctional facilities, severe environmental damage and other sectors identified by the team. The Sub-Investment Manager re-assesses the sector exclusion list at least annually based on environmental, social and governance factors.

Engaging with CLO collateral managers is a critical component of the investment process. An active dialogue is maintained with CLO collateral managers the Portfolio is exposed to and these discussions cover, among other things, ESG integration to the investment process, new developments in ESG frameworks, governance for the CLO manager, changes in the credit conditions of underlying investments and other trends relevant to the performance of the Portfolio.

As part of engagement with CLO collateral managers, due diligence questionnaires are requested to be completed that seek to ascertain the sophistication, integration and importance that ESG factors have in CLO portfolio management. Based on the feedback provided in the questionnaires, the team may seek to encourage a CLO collateral manager to adopt certain changes to their investment process or reduce the Portfolio’s exposure to such CLO collateral manager.

The Portfolio utilises the proprietary ESG scoring system of the Neuberger Berman Non-Investment Grade platform as it relates to underlying CLO exposures. These proprietary scores are assigned to the majority of loans in CLOs held in the Portfolio and are a key component of the underlying portfolio’s evaluation and monitoring. These internal credit ratings are notched up or down depending on the issuer’s ESG profile. This integration creates a direct link between the ESG analysis and the construction of the Portfolio.

Benchmark Index

The Benchmark has not been designated as a reference benchmark for the purposes of SFDR. Therefore, it is not consistent with the promotion of environmental or social characteristics. For further details on the Benchmark, please refer to the Supplement.

Neuberger Berman US Real Estate Securities Fund

This Portfolio meets the classification of an Article 8 Portfolio as it promotes environmental and social characteristics and limits investments to companies that follow good governance practices.

Environmental or social characteristics promoted by the Portfolio

As noted in the Supplement, the Portfolio shall invest in equity securities issued by real estate companies, which have either their head office or exercise an overriding part of their economic activity in the US.

The Sub-Investment Manager will manage the Portfolio in accordance with the ESG Policy on a continuous basis. The Sub-Investment Manager has fully integrated the ESG Policy into the overall investment process, in particular, the portfolio construction process. A summary of the ESG Policy is detailed above in this SFDR Annex and it is available on the Neuberger Berman website, www.nb.com/esg

The Sub-Investment Manager shall also apply the Controversial Weapons Policy, when determining what investments to make for the Portfolio. Further details on this screening/exclusion policy is set out in the "Sustainable Investment Criteria" section of the Prospectus.

The Sub-Investment Manager's team (the "Team") considers financially material ESG factors as part of its investment decision making process from both an opportunity and a risk mitigation perspective. ESG integration is an essential part of the Team's rigorous and disciplined investment process. The Team focuses on companies and business models that demonstrate: strong corporate governance, high quality management, environmental and social leadership, and efficient capital allocation.

ESG factors are an integral part of the Sub-Investment Manager's investment process. The Sub-Investment Manager conducts fundamental research and utilises proprietary in-house research tools, which analyse data at both industry level and investee company level, in order to develop a data driven differentiated view to investment decision making.

At the investee company/corporate issuer level, the Sub-Investment Manager considers; **environmental factors** including (i) green building opportunities, (ii) green house gas emissions profiles, (iii) waste water management, (iv) solar panel installations; **social factors** including (i) employee and board diversity, (ii) employee and tenant health and safety, (iii) workforce development and mobility and **governance factors** including (i) board independence, (ii) management compensation ties to absolute and relative total shareholder returns, (iii) shareholder rights, and (iv) conservative use of financial leverage and conservative dividend policies.

The Sub-Investment Manager actively engages with the senior management of investee or prospective investee companies, participating in direct engagement with investee companies (e.g. face-to-face meetings, frequent phone contact with senior management). The Sub-Investment Manager views this direct engagement as an essential part of its investment process.

The Sub-Investment Manager utilises a proprietary ESG scoring system for each company in the strategy. The ratings on this scoring system also leverage third party ESG data sources. The Sub-Investment Manager integrates its proprietary ESG scores into its proprietary REIT valuation model to reflect the significance of ESG in the investment process and investment decisions.

Benchmark Index

The Benchmark has not been designated as a reference benchmark for the purposes of SFDR. Therefore, it is not consistent with the promotion of environmental or social characteristics. For further details on the Benchmark, please refer to the Supplement.

Neuberger Berman Global Real Estate Securities Fund

This Portfolio meets the classification of an Article 8 Portfolio as it promotes environmental and social characteristics and limits investments to companies that follow good governance practices.

Environmental or social characteristics promoted by the Portfolio

As noted in the Supplement, the Portfolio shall invest in equity securities issued by real estate companies globally.

The Sub-Investment Manager will manage the Portfolio in accordance with the ESG Policy on a continuous basis. The Sub-Investment Manager has fully integrated the ESG Policy into the overall investment process, in particular, the portfolio construction process. A summary of the ESG Policy is detailed above in this SFDR Annex and it is available on the Neuberger Berman website, www.nb.com/esg

The Sub-Investment Manager shall also apply the Controversial Weapons Policy, when determining what investments to make for the Portfolio. Further details on this screening/exclusion policy is set out in the "*Sustainable Investment Criteria*" section of the Prospectus.

Benchmark Index

The Benchmark has not been designated as a reference benchmark for the purposes of SFDR. Therefore, it is not consistent with the promotion of environmental or social characteristics. For further details on the Benchmark, please refer to the Supplement.

Neuberger Berman China A-Share Equity Fund

This Portfolio meets the classification of an Article 8 Portfolio as it promotes environmental and social characteristics and limits investments to companies that follow good governance practices.

Environmental or social characteristics promoted by the Portfolio

As noted in the Supplement, the Portfolio shall invest in a portfolio of China A Share equity holdings that provide exposure to economic development in the PRC.

The Sub-Investment Manager has integrated the ESG Policy into the overall investment process, in particular, the portfolio construction process. A summary of the ESG Policy is detailed above in this SFDR Annex and it is available on the Neuberger Berman website, www.nb.com/esg

The Sub-Investment Manager shall also apply the Controversial Weapons Policy, when determining what investments to make for the Portfolio. Further details on this screening/exclusion policy is set out in the "*Sustainable Investment Criteria*" section of the Prospectus.

The Sub-Investment Manager integrates material ESG factors in the investment process by applying sector specific analysis in order to determine the quality of the company and to identify higher quality companies that could present lower long-term risk. The Sub-Investment Manager's strategy is built on the belief that responsibility is a hallmark of quality and invests in companies that have a sustainable competitive advantage derived from ESG factors. The Sub-Investment Manager shall seek to generate a positive social and environmental impact alongside a financial return.

The Sub-Investment Manager shall consider **environmental factors** including (i) environmental policies and clean tech investment (i.e. resource reduction policy/expense, environmental management system certifications), (ii) climate change (i.e. reduce energy plan, reduce the consumption of materials and plan for waste disposal and transportation) (iii) energy use and greenhouse gas emissions (i.e. toxic/carbon emissions, water stress).

In terms of **social factors**, the Sub-Investment Manager shall consider (i) fair labour (i.e. lower turnover, higher medical insurance coverage), (ii) welfare, training and development (higher employee welfare per capita, enough training hours, open and fair promotion mechanism), (iii) health and working conditions and employee incidents (i.e. work injury rate, safe working condition protection expense absenteeism/higher productivity).

The Sub-Investment Manager shall also consider **governance factors** including (i) independence and board diversity (i.e. improved oversight and increased accountability) and (ii) executive compensation (i.e. to ensure management is aligned with shareholder interest).

The Sub-Investment Manager considers a company's record in its management of environmental, social and, in particular, governance matters to be an indicator of management quality, which is an important consideration in its research work. The Sub-Investment Manager also evaluates material ESG factors by internal ESG framework and analysis, together with third-party data providers for common global ESG factors (e.g. resource productivity from MSCI ESG).

The Sub-Investment Manager shall also participate in engagement with prospective investee companies and existing companies held in the Portfolio. The engagement process employed by the Sub-Investment Manager is a three-step process consisting of: (i) identifying engagement priorities; (ii) developing a company engagement strategy; and (iii) tracking, monitoring and following-up. The purposes of the engagement process is to address ESG disclosure gaps, to address ESG material issues of concern and to discuss best practices and opportunities.

The Sub-Investment Manager's engagement process includes face-to-face meetings, frequent phone contact with senior management, and board members, all in an attempt to understand the company as well as the competitive environment in

which it is operating. These meetings provide the Sub-Investment Manager with a holistic view of a company, which allows it to assess the growth prospects of the company during its entire investment process and whether or not returns are sustainable in the future. The Sub-Investment Manager views this direct engagement, as an essential part of its investment process.

In addition, the Sub-Investment Manager meets regulators, government officials, and independent consultants and attends numerous conferences to meet with customers, suppliers, and competitors in a less formal setting. The Sub-Investment Manager also relies on additional information sources including industry research, competitive analysis, third party research, non-governmental organisations, government agencies, UN agencies, media and academia.

Benchmark Index

The Benchmark has not been designated as a reference benchmark for the purposes of SFDR. Therefore, it is not consistent with the promotion of environmental or social characteristics. For further details on the Benchmark, please refer to the Supplement.

Neuberger Berman Global Sustainable Equity Fund

This Portfolio is classified as an Article 9 Portfolio as it has Sustainable Investment as its objective. It invests in companies that contribute to both environmental and social objectives. In pursuing its sustainable investment objective the Portfolio will also take appropriate measures to ensure that (i) its investments do not significantly harm any of the environmental objectives; and (ii) that companies it invests in follow good governance practices.

Sustainable Investment Objective of the Portfolio

As noted in the Supplement, the Portfolio invests primarily in a portfolio of global equity holdings that comply with the Sustainable Criteria (as defined in the Prospectus) with the aim of achieving a minimum excess annualised return of 2% over the Benchmark before fees over a 3-5 year investment horizon.

The Manager and the Sub-Investment Manager will manage the Portfolio in accordance with the ESG Policy on a continuous basis. The Manager and the Sub-Investment Manager have fully integrated the ESG Policy into the overall investment process, in particular, the portfolio construction process. A summary of the ESG Policy is detailed above in this SFDR Annex and it is available on the Neuberger Berman website, www.nb.com/esg

The Portfolio will invest primarily in equity securities issued by companies whose behaviours, processes and operations contribute to system-level progress towards environmental and social objectives.

The Manager and the Sub-Investment Manager invest in high quality companies, which (i) provide attractive sustainable products or services, (ii) demonstrate a commitment to sustainability in their operations, and (iii) are economically competitive, as described in greater detail in the Supplement.

The Manager and the Sub-Investment Manager (i) exclude securities issued by companies that are involved in controversial activities and behaviour and those which rated worst in terms of its ESG assessment from the investment universe, such that at least 20% of the investment universe is excluded on these bases; and (ii) ensure at least 90% ESG coverage rate of the Net Asset Value of the Portfolio. Companies will then be selected based on either their positive contribution to environmental and social outcomes through their operations, practices and behaviour, or through their products and services. This allows the Portfolio to drive strong, continually improving performance on material environmental and social factors which contribute to a more sustainable world.

ESG Screening

The Portfolio shall also apply the (i) Controversial Weapons Policy, (ii) the Sustainable Exclusion Policy and (iii) the Enhanced Sustainable Exclusion Policy. Further details on these screening/exclusion policies are set out in the "*Sustainable Investment Criteria*" section of the Prospectus.

The Manager and the Sub-Investment Manager also excludes companies from the investment universe that are (i) not compliant with the United Nations Global Compact, (ii) in violation of the UN Declaration of Human Rights, (iii) in violation of the International Labour Organisation's Core Conventions, (iv) in violation of the OECD guidelines for multinational enterprises, (v) involved in dictatorial regimes/high ESG controversies and/ or (vi) exhibit very poor behaviours in terms of environmental pollution, human rights' issues or governance controversies. Companies that aren't transparent on ESG or score very poorly on ESG metrics overall are also excluded.

Fundamental analysis of ESG factors and engagement

The Manager and the Sub-Investment Manager incorporate investment-led proprietary, bottom-up ESG analysis, focusing on material issues that affect a company's sustainable performance as well as company engagements to identify ESG momentum. Companies are selected by the Manager and the Sub-Investment Manager based on either their positive contribution to environmental and social

outcomes through their operations, practices and behaviour, or through their products and services, assessed using the team's proprietary ESG rating metrics.

Please refer to the sections of the Supplement entitled "*Investment Approach*" and "*Environmental, Social and Governance ("ESG")*" for further information in respect of the Article 9 Portfolio classification.

Benchmark Index

The Benchmark has not been designated as a reference benchmark for the purposes of SFDR. Therefore, it is not consistent with the promotion of environmental or social characteristics. For further details on the Benchmark, please refer to the Supplement.

Neuberger Berman European Sustainable Equity Fund

This Portfolio is classified as an Article 9 Portfolio as it has Sustainable Investment as its objective. It invests in companies that contribute to both environmental and social objectives. In pursuing its sustainable investment objective the Portfolio will also take appropriate measures to ensure that (i) its investments do not significantly harm any of the environmental objectives; and (ii) that companies it invests in follow good governance practices.

Sustainable Investment Objective of the Portfolio

As noted in the Supplement, the Portfolio invests primarily in a portfolio of European equity holdings that comply with the Sustainable Criteria (as defined in the Prospectus) with the aim of achieving a minimum excess annualised return of 2% over the Benchmark before fees over a 3-5 year investment horizon.

The Manager and the Sub-Investment Manager will manage the Portfolio in accordance with the ESG Policy on a continuous basis. The Manager and the Sub-Investment Manager have fully integrated the ESG Policy into the overall investment process, in particular, the portfolio construction process. A summary of the ESG Policy is detailed above in this SFDR Annex and it is available on the Neuberger Berman website, www.nb.com/esg

The Portfolio will invest primarily in equity securities issued by companies whose behaviours, processes and operations contribute to system-level progress towards environmental and social objectives.

The Manager and the Sub-Investment Manager invest in high quality companies, which (i) provide attractive sustainable products or services, (ii) demonstrate a commitment to sustainability in their operations, and (iii) are economically competitive, as described in greater detail in the Supplement.

The Manager and the Sub-Investment Manager (i) exclude securities issued by companies that are involved in controversial activities and behaviour and those which rated worst in terms of its ESG assessment from the investment universe, such that at least 20% of the investment universe is excluded on these bases; and (ii) ensure at least 90% ESG coverage rate of the Net Asset Value of the Portfolio. Companies will then be selected based on either their positive contribution to environmental and social outcomes through their operations, practices and behaviour, or through their products and services. This allows the Portfolio to drive strong, continually improving performance on material environmental and social factors which contribute to a more sustainable world.

ESG Screening

The Portfolio shall also apply the (i) Controversial Weapons Policy, (ii) the Sustainable Exclusion Policy and (iii) the Enhanced Sustainable Exclusion Policy. Further details on these screening/exclusion policies are set out in the "*Sustainable Investment Criteria*" section of the Prospectus.

The Manager and the Sub-Investment Manager also exclude companies from the investment universe that are (i) not compliant with the United Nations Global Compact, (ii) in violation of the UN Declaration of Human Rights, (iii) in violation of the International Labour Organisation's Core Conventions, (iv) in violation of the OECD guidelines for multinational enterprises, (v) involved in dictatorial regimes/high ESG controversies and/ or (vi) exhibit very poor behaviours in terms of environmental pollution, human rights' issues or governance controversies. Companies that aren't transparent on ESG or score very poorly on ESG metrics overall are also excluded.

Fundamental analysis of ESG factors and engagement

The Manager and the Sub-Investment Manager incorporate investment-led proprietary, bottom-up ESG analysis, focusing on material issues that affect a company's sustainable performance as well as company engagements to identify ESG momentum. Companies are selected by the Manager and the Sub-Investment Manager based on either their positive contribution to environmental and social

outcomes through their operations, practices and behaviour, or through their products and services, assessed using the team's proprietary ESG rating metrics.

Please refer to the sections of the Supplement entitled "*Investment Approach*" and "*Environmental, Social and Governance ("ESG")*" for further information in respect of the Article 9 Portfolio classification.

Benchmark Index

The Benchmark has not been designated as a reference benchmark for the purposes of SFDR. Therefore, it is not consistent with the promotion of environmental or social characteristics. For further details on the Benchmark, please refer to the Supplement.

Neuberger Berman US Small Cap Fund

This Portfolio meets the classification of an Article 8 Portfolio as it promotes environmental and social characteristics and limits investments to companies that follow good governance practices.

Environmental or social characteristics promoted by the Portfolio

As noted in the Supplement, the Portfolio shall invest in equity securities issued by small-capitalisation companies ("**Small Cap**"), which have either their head office or exercise an overriding part of their economic activity in the US and that are listed or traded on Recognised Markets.

The Sub-Investment Manager will manage the Portfolio in accordance with the ESG Policy on a continuous basis. The Sub-Investment Manager has fully integrated the ESG Policy into the overall investment process, in particular, the portfolio construction process. A summary of the ESG Policy is detailed above in this SFDR Annex and it is available on the Neuberger Berman website, www.nb.com/esg

The Sub-Investment Manager shall also apply the (i) Controversial Weapons Policy, when determining what investments to make for the Portfolio. Further details on this screening/exclusion policy is set out in the "*Sustainable Investment Criteria*" section of the Prospectus.

As the Portfolio is Small Cap focused, a longstanding component of the Sub-Investment Manager's investment process has been a focus on governance (given the size of companies). Over time, the Sub-Investment Manager has increasingly incorporated material environmental and social factors that might affect the financial sustainability of the business.

ESG factors are an integral part of the Sub-Investment Manager's investment process. The Sub-Investment Manager conducts fundamental research and utilises proprietary in-house research tools, which analyse data at both industry level and investee company level, in order to develop a data driven differentiated view to investment decision making. At industry level, the factors considered include environmental, social, workforce (e.g. health and safety, human capital development), supply chain, leadership and governance (e.g. innovation, policy and regulatory risk).

At the investee company/corporate issuer level, the Sub-Investment Manager considers: **environmental factors** including (i) carbon intensity, (ii) emission reduction strategy; **social factors** including (i) labour relations, (ii) employee satisfaction, (iii) workforce diversity and inclusion and **governance factors** including (i) board independence, (ii) compensation concerns, (iii) board skillset and (iv) shareholder rights.

As noted above, corporate governance is highly material in the Small Cap market given the size of companies. Accordingly, the Sub-Investment Manager actively engages with the senior management of investee or prospective investee companies. The Sub-Investment Manager views this direct engagement as an essential part of its investment process and given the historically low turnover at Small Cap companies, it enables the Sub-Investment Manager to build longstanding relationships with the senior management of such entities.

Benchmark Index

The Benchmark has not been designated as a reference benchmark for the purposes of SFDR. Therefore, it is not consistent with the promotion of environmental or social characteristics. For further details on the Benchmark, please refer to the Supplement.

Neuberger Berman InnovAsia 5G Fund

This Portfolio meets the classification of an Article 8 Portfolio as it promotes environmental and social characteristics and limits investments to companies that follow good governance practices.

Environmental or social characteristics promoted by the Portfolio

As noted in the Supplement, the Portfolio meets the classification of an Article 8 Portfolio as it promotes environmental and social characteristics and only invests in companies that follow good governance practices.

The Sub-Investment Managers will manage the Portfolio in accordance with the ESG Policy on a continuous basis. The Sub-Investment Managers have fully integrated the ESG Policy into the overall investment process, in particular, the portfolio construction process. A summary of the ESG Policy is detailed above in this SFDR Annex and it is available on the Neuberger Berman website, www.nb.com/esg

ESG themed investing is a core component of the Sub-Investment Managers' strategy for the Portfolio. The Sub-Investment Managers shall also apply the (i) Controversial Weapons Policy, (ii) the Sustainable Exclusion Policy and (iii) the Enhanced Sustainable Exclusion Policy, when determining what investments to make for the Portfolio. Further details on these screening/exclusion policies are set out in the "*Sustainable Investment Criteria*" section of the Prospectus.

Systematic evaluation of material ESG factors is embedded in the investment decision-making process pre- and post-investment and is undertaken for every company within the initial investment universe, which the Sub-Investment Managers follow. The Sub-Investment Managers further evaluate those companies, seeking to identify the best in class companies, with sustainable advantages primarily in Asia, such as market leading technology, existing products or market access. The Sub-Investment Managers believe sustainable advantages are demonstrated through best in class product, technology, processes and market access.

In addition to integrating the aforementioned screening/exclusion policies into the portfolio construction process, the Sub-Investment Managers utilise a proprietary ESG scoring system for each company in the strategy that is generated through collaboration with Neuberger Berman's centralised ESG team. The ratings on this scoring system leverage existing third party ESG data sources, non-traditional ESG data and analyst judgment particularly on hard to measure factors to create materiality-driven industry relative ratings. The Sub-Investment Managers prefer higher ESG rated companies over lower if the higher rated companies would better advance the theme of Innovative Technologies in a sustainable way. For the avoidance of doubt, while the Sub-Investment Managers will collaborate with Neuberger Berman's centralised ESG team, no entity other than the Sub-Investment Managers will have discretion over the investment policy of the Portfolio.

A comprehensive written ESG analysis is created for every company that is in the bottom 25% of this scoring system, to assess risks highlighted by the rating and the steps the Sub-Investment Managers plan to take to address or mitigate potential issues.

The Sub-Investment Managers also participate in direct engagement with investee companies (e.g. face-to-face meetings, frequent phone contact with senior management, discussions with customers, suppliers and competitors and attendance at industry and company conferences). Engagement with investee companies is encouraged to mitigate risks and improve ESG and financial outcomes. The Sub-Investment Managers view this direct engagement, as an essential part of its investment process.

Benchmark Index

The Benchmark has not been designated as a reference benchmark for the purposes of SFDR. Therefore, it is not consistent with the promotion of environmental or social characteristics. For further details on the Benchmark, please refer to the Supplement.

Neuberger Berman Global Investment Grade Credit Fund

This Portfolio meets the classification of an Article 8 Portfolio as it promotes environmental and social characteristics and limits investments to companies that follow good governance practices.

Environmental or social characteristics promoted by the Portfolio

As noted in the Supplement, the Portfolio is classified as an Article 8 Portfolio as it promotes environmental and social characteristics and limits investments to companies that follow good governance practices.

The Manager and Sub-Investment Managers will manage the Portfolio in accordance with the ESG Policy on a continuous basis. The Manager and Sub-Investment Managers have fully integrated the ESG Policy into the overall investment process, in particular, the portfolio construction process. A summary of the ESG Policy is detailed above in this SFDR Annex and is available on the Neuberger Berman website, www.nb.com/esg

The Manager and Sub-Investment Managers shall also apply the Controversial Weapons Policy when determining what investments to make for the Portfolio. Further details on this screening policy is set out in the "*Sustainable Investment Criteria*" section of the Prospectus.

ESG analysis is an important component of the fundamental credit research and identifies business risks, which would cause deterioration in an issuer's credit profile. A proprietary ESG scoring system is utilised which focuses on the ESG issues that are the largest drivers of credit risk in each industry. These proprietary scores are assigned to all issuers. By integrating proprietary ESG analysis into internal credit ratings, there is a direct link between the analysis of material ESG factors and portfolio construction.

Material ESG factors are identified and assessed during the credit research process by:

- utilising the **environmental and social factors** identified by the Sustainability Accounting Standards Board ("**SASB**") framework as potentially material for the given industry. Not all factors identified by SASB are relevant for fixed income investors, or for the time horizon over which the Manager and Sub-Investment Managers are valuing a security and therefore the factors are modified based on specific sectors and the expert judgement of the Manager and Sub-Investment Managers.
- the factors identified are reviewed and discussed and the rationale is debated and any modifications made. This discussion also includes the relative weight to place on each factor.
- a score is given to each issuer and where possible robust data sources are used to complete this scoring.

Sector specific **environmental factors** analysed include (i) carbon footprint, (ii) ecological incidents, (iii) water usage and remediation in the exploration and production sector, (iv) carbon footprint in the pharmaceuticals sector and (v) responsible and transparent underwriting in the banking sector.

Sector specific **social factors** analysed include (i) workforce health and safety, (ii) engagement with relevant communities in the exploration and production sector, (iii) affordability and fair pricing, (iv) drug safety in the pharmaceuticals sector, (v) privacy and data security, (vi) regulatory compliance and (vii) track record of litigation and controversies in the banking sector.

A proprietary investment grade credit governance score is applied which is standardised across all sectors, which considers: (i) level of independence of board members, (ii) capability of the board, (iii) compensation tied to cash flow and long-term viability, (iv) capability of management and (v) financial statements quality and disclosures.

Assessments on these ESG factors are made on a regular basis, at least at each quarterly portfolio review and expands upon these factors from time to time.

ESG scores allow credit analysts to (i) reach more comprehensive views on relative value between issuers and (ii) prioritise additional research and engagement efforts on the specific ESG factors on which a given issuer appears to be lagging. In this way, credit analysts are focusing on the material ESG factors, which they believe are likely to be most financially material to the Portfolio as a whole.

In addition to the aforementioned internal research, other multiple sources of ESG research are utilised including company information, meetings with management, industry peers, academic organisations, trade publications and conferences, third party ESG research, government agencies, labour organisations and non-governmental organisations (NGOs).

Benchmark Index

The Benchmark has not been designated as a reference benchmark for the purposes of SFDR. Therefore, it is not consistent with the promotion of environmental or social characteristics. For further details on the Benchmark, please refer to the Supplement.

Neuberger Berman Global Flexible Credit Fund

This Portfolio is classified as an Article 8 Portfolio as it promotes environmental and social characteristics and limits investments to companies that follow good governance practices.

Environmental or social characteristics promoted by the Portfolio

As noted in the Supplement, the Portfolio seeks to achieve an attractive level of total return (income plus capital appreciation) by investing in a diversified mix of fixed rate and floating rate debt securities globally under varying market environments with a focus on downside protection.

The Manager and the Sub-Investment Manager will manage the Portfolio in accordance with the ESG Policy on a continuous basis. The Manager and the Sub-Investment Manager have fully integrated the ESG Policy into the overall investment process, in particular, the portfolio construction process. A summary of the ESG Policy is detailed above in this SFDR Annex and is also available on the Neuberger Berman website, www.nb.com/esg

The Manager and the Sub-Investment Manager shall also apply the Controversial Weapons Policy when determining what investments to make for the Portfolio. Further details on this screening/exclusion policy is set out in the "*Sustainable Investment Criteria*" section of the Prospectus.

The Manager and the Sub-Investment Manager incorporate ESG factors into their sector research and security selection process. As such, the Manager and the Sub-Investment Manager have developed a proprietary ESG scoring system for corporate holdings across global developed credit markets, both investment grade and non-investment grade, as well as for emerging market debt (local rates, FX, sovereign credit and corporate credit). The Manager and the Sub-Investment Manager also integrates ESG factors into its municipal and CLO research process.

ESG Factors in Global Investment Grade Credit and Global Non-Investment Grade Credit (Developed Markets)

The Manager and the Sub-Investment Manager systematically consider and evaluate ESG factors as an important component of their credit analysis discipline when making investment decisions. Proprietary ESG scores are a key component of the internal credit ratings. These proprietary scores are assigned to all issuers. The proprietary ESG scoring system is built around the concept of sector specific criteria, which focuses on the ESG issues that are the largest drivers of credit risk in each industry. The SASB framework for sector specific criteria are used as a starting point, but the Manager and the Sub-Investment Manager customise each set of sector criteria based on their judgement, leveraging their significant sector/industry expertise. They also assign weightings to environmental, social and governance factors, which vary by sector and are aimed at enhancing their credit risk assessment.

Engaging with management is a critical component of the Manager's and the Sub-Investment Manager's portfolio management teams' (the "**Team**") investment process. The Team maintains an active dialogue with all issuers and these discussions cover, among other things, ESG issues, capital structure, corporate strategy and business / industry trends. The Team closely monitors these engagement activities (through its ESG engagement tracker) and reports on these discussions to the Neuberger Berman credit committee. The Team believes this consistent engagement with companies can help reduce credit risk.

ESG Factors in Emerging Market Corporate Debt

ESG factors are integrated at three different levels:

1) Exclusion lists

The Manager and the Sub-Investment Manager exclude companies, which are

involved in controversial weapons (as noted above), child labour, and the tobacco industry and thermal coal mining companies.

2) Integration of ESG factors in fundamental analysis

ESG scores are assigned to each issuer using the proprietary ESG scoring system.

3) Analysis of Controversies and Direct Engagement

The Manager and the Sub-Investment Manager engage with corporate issuers which have high impact controversies or which have low internal ESG scores to assess if the issues are being addressed.

ESG Factors in Emerging Market Debt Country Analysis

The Manager and the Sub-Investment Manager assess ESG factors at least quarterly with the aim of capturing the qualitative factors driving the credit quality of Emerging Market countries.

The **environmental factors** considered are (i) energy intensity of GDP, (ii) global adaptation ranking, (iii) carbon emissions per GDP, (iv) carbon emissions per capita, (v) coal use in electricity generation, (vi) CO₂ emissions levels per GDP and per capita and (vii) the degree to which electricity is being produced from coal sources. The Manager and the Sub-Investment Manager also monitor countries' contributions/adherence to the UN Sustainable Development Goals.

The **social factors** considered are (i) government effectiveness, (ii) regulatory quality, (iii) political stability and security, (iv) human development and (v) voice and accountability. Other social factors considered in respect of country analysis include a country's relative position on income, education and health as tracked by local and international organisations and development banks, as well as factors related to the effectiveness and legitimacy of the administration through public opinion surveys.

The **governance factors** considered are (i) rule of law, (ii) corruption, (iii) politics and election calendar, (iv) banking system strength/non-performing loans, (v) ease of doing business and (vi) trade openness. There is also a focus on the quality of economic governance.

Municipal Bonds

The credit process focuses on four primary factors: economy, leverage, financial performance and management and/or political leadership. The quality of issuers' governance and management practices are assessed, including corruption, sound budgetary practices, and responsible use of debt. Other factors are also considered such as environmental (i.e. polluted drinking water) and social risks (i.e. crime) that may affect the borrower's ability to repay. Once a bond is found to be an acceptable credit risk, the issuer's governance, policies, and management of material social and environmental factors are reviewed. If an issuer is determined to have systemic concerns, the bond is not eligible for purchase. If the issuer meets the required standards, the Manager and the Sub-Investment Manager review the bonds' use of proceeds and score accordingly based on the proprietary methodology.

Collateralised Loan Obligations

ESG factors are integrated into the security selection investment process through the monitoring and avoidance of CLOs with relatively significant underlying corporate investments that generate a significant portion of their revenues from coal mining/extraction, cluster munitions, nuclear weapons, tobacco products, for-profit correctional facilities, severe environmental damage and other sectors identified by the Team. The Manager and the Sub-Investment Manager re-assess the sector exclusion list at least annually based on environmental, social and governance factors.

Engaging with CLO collateral managers is a critical component of the investment process. An active dialogue is maintained with CLO collateral managers the Portfolio is exposed to and these discussions cover, among other things, ESG integration to the investment process, new developments in ESG frameworks, governance for the CLO manager, changes in the credit conditions of underlying investments and other trends relevant to the performance of the Portfolio.

As part of engagement with CLO collateral managers, due diligence questionnaires are requested to be completed that seek to ascertain the sophistication, integration and importance that ESG factors have in CLO portfolio management. Based on the feedback provided in the questionnaires, the Team may seek to encourage a CLO collateral manager to adopt certain changes to their investment process or reduce the Portfolio's exposure to such CLO collateral manager.

The Portfolio utilises the proprietary ESG scoring system of the Neuberger Berman Non-Investment Grade platform as it relates to underlying CLO exposures. These proprietary scores are assigned to the majority of loans in CLOs held in the Portfolio and are a key component of the underlying portfolio's evaluation and monitoring. These internal credit ratings are notched up or down depending on the issuer's ESG profile. This integration creates a direct link between the ESG analysis and the construction of the Portfolio.

Benchmark Index

N/A the Portfolio does not have a Benchmark.

Neuberger Berman Global Diversified Income FMP-2024

This Portfolio is classified as an Article 8 Portfolio as it promotes environmental and social characteristics and limits investments to companies that follow good governance practices.

Environmental or social characteristics promoted by the Portfolio

As noted in the Supplement, the Portfolio seeks to maximise current income over the term of the Portfolio, by investing in a diversified mix of global fixed income securities, including high income securities.

The Manager and the Sub-Investment Manager will manage the Portfolio in accordance with the ESG Policy on a continuous basis. The Manager and the Sub-Investment Managers have fully integrated the ESG Policy into the overall investment process, in particular, the portfolio construction process. A summary of the ESG Policy is detailed above in this SFDR Annex and is also available on the Neuberger Berman website, www.nb.com/esg

The Manager and the Sub-Investment Manager shall also apply the Controversial Weapons Policy when determining what investments to make for the Portfolio. Further details on this screening/exclusion policy is set out in the "Sustainable Investment Criteria" section of the Prospectus.

The Manager and the Sub-Investment Manager incorporate ESG factors into their sector research and security selection process. As such, the Manager and the Sub-Investment Manager have developed a proprietary ESG scoring system for corporate holdings across global developed credit markets, both investment grade and non-investment grade, as well as for emerging market debt (local rates, FX, sovereign credit and corporate credit). The Manager and the Sub-Investment Managers also integrates ESG factors into its municipal research process.

ESG Factors in Global Investment Grade Credit and Global Non-Investment Grade Credit (Developed Markets)

The Manager and the Sub-Investment Manager systematically consider and evaluate ESG factors as an important component of their credit analysis discipline when making investment decisions. Proprietary ESG scores are a key component of the internal credit ratings. These proprietary scores are assigned to all issuers. The proprietary ESG scoring system is built around the concept of sector specific criteria, which focuses on the ESG issues that are the largest drivers of credit risk in each industry. The SASB framework for sector specific criteria are used as a starting point, but the Manager and the Sub-Investment Manager customise each set of sector criteria based on their judgement, leveraging their significant sector/industry expertise. They also assign weightings to environmental, social and governance factors, which vary by sector and are aimed at enhancing their credit risk assessment.

Engaging with management is a critical component of the Manager's and the Sub-Investment Manager's portfolio management teams' (the "Team") investment process. The Team maintains an active dialogue with all issuers and these discussions cover, among other things, ESG issues, capital structure, corporate strategy and business / industry trends. The Team closely monitors these engagement activities (through its ESG engagement tracker) and reports on these discussions to the Neuberger Berman credit committee. The Team believes this consistent engagement with companies can help reduce credit risk.

ESG Factors in Emerging Market Corporate Debt

ESG factors are integrated at three different levels:

1) Exclusion lists

The Manager and the Sub-Investment Manager exclude companies, which are involved in controversial weapons (as noted above), child labour, and the tobacco industry and thermal coal mining companies.

2) Integration of ESG factors in fundamental analysis

ESG scores are assigned to each issuer using the proprietary ESG scoring system.

3) Analysis of Controversies and Direct Engagement

The Manager and the Sub-Investment Manager engage with corporate issuers which have high impact controversies or which have low internal ESG scores to assess if the issues are being addressed.

ESG Factors in Emerging Market Debt Country Analysis

The Manager and the Sub-Investment Manager assess ESG factors at least quarterly with the aim of capturing the qualitative factors driving the credit quality of Emerging Market countries.

The **environmental factors** considered are (i) energy intensity of GDP, (ii) global adaption ranking, (iii) carbon emissions per GDP, (iv) carbon emissions per capita, (v) coal use in electricity generation, (vi) CO₂ emissions levels per GDP and per capita and (vii) the degree to which electricity is being produced from coal sources. The Manager and the Sub-Investment Manager also monitor countries' contributions/adherence to the UN Sustainable Development Goals.

The **social factors** considered are (i) government effectiveness, (ii) regulatory quality, (iii) political stability and security, (iv) human development and (v) voice and accountability. Other social factors considered in respect of country analysis include a country's relative position on income, education and health as tracked by local and international organisations and development banks, as well as factors related to the effectiveness and legitimacy of the administration through public opinion surveys.

The **governance factors** considered are (i) rule of law, (ii) corruption, (iii) politics and election calendar, (iv) banking system strength/non-performing loans, (v) ease of doing business and (vi) trade openness. There is also a focus on the quality of economic governance.

Municipal Bonds

The credit process focuses on four primary factors: economy, leverage, financial performance and management and/or political leadership. The quality of issuers' governance and management practices are assessed, including corruption, sound budgetary practices, and responsible use of debt. Others factors are also considered such as environmental (i.e. polluted drinking water) and social risks (i.e. crime) that may affect the borrower's ability to repay. Once a bond is found to be an acceptable credit risk, the issuer's governance, policies, and management of material social and environmental factors are reviewed. If an issuer is determined to have systemic concerns, the bond is not eligible for purchase. If the issuer meets the required standards, the Manager and the Sub-Investment Manager review the bonds' use of proceeds and score accordingly based on the proprietary methodology.

Benchmark Index

The Manager and the Sub-Investment Manager shall also apply the Controversial Weapons Policy when determining what investments to make for the Portfolio. Further details on this screening/exclusion policy is set out in the "Sustainable Investment Criteria" section of the Prospectus.

The Manager and the Sub-Investment Manager incorporate ESG factors into their sector research and security selection process. As such, the Manager and the Sub-Investment Manager have developed a proprietary ESG scoring system for corporate holdings across global developed credit markets, both investment grade and non-investment grade, as well as for emerging market debt (local rates, FX, sovereign credit and corporate credit). The Manager and the Sub-Investment Manager also integrates ESG factors into its municipal research process.

ESG Factors in Global Investment Grade Credit and Global Non-Investment Grade Credit (Developed Markets)

The Manager and the Sub-Investment Manager systematically consider and evaluate ESG factors as an important component of their credit analysis discipline when making investment decisions. Proprietary ESG scores are a key component of the internal credit ratings. These proprietary scores are assigned to all issuers. The proprietary ESG scoring system is built around the concept of sector specific criteria, which focuses on the ESG issues that are the largest drivers of credit risk in each industry. The SASB framework for sector specific criteria are used as a starting point, but the Manager and the Sub-Investment Manager customise each set of sector criteria based on their judgement, leveraging their significant sector/industry expertise. They also assign weightings to environmental, social and governance factors, which vary by sector and are aimed at enhancing their credit risk assessment.

Engaging with management is a critical component of the Manager's and the Sub-Investment Manager's portfolio management teams' (the "Team") investment process. The Team maintains an active dialogue with all issuers and these discussions cover, among other things, ESG issues, capital structure, corporate strategy and business / industry trends. The Team closely monitors these engagement activities (through its ESG engagement tracker) and reports on these discussions to the Neuberger Berman credit committee. The Team believes this consistent engagement with companies can help reduce credit risk.

ESG Factors in Emerging Market Corporate Debt

ESG factors are integrated at three different levels:

1) Exclusion lists

The Manager and the Sub-Investment Manager exclude companies, which are involved in controversial weapons (as noted above), child labour, and the tobacco industry and thermal coal mining companies.

2) Integration of ESG factors in fundamental analysis

ESG scores are assigned to each issuer using the proprietary ESG scoring system.

3) Analysis of Controversies and Direct Engagement

The Manager and the Sub-Investment Manager engage with corporate issuers which have high impact controversies or which have low internal ESG scores to assess if the issues are being addressed.

ESG Factors in Emerging Market Debt Country Analysis

The Manager and the Sub-Investment Manager assess ESG factors at least quarterly with the aim of capturing the qualitative factors driving the credit quality of Emerging Market countries.

The **environmental factors** considered are (i) energy intensity of GDP, (ii) global adaption ranking, (iii) carbon emissions per GDP, (iv) carbon emissions per capita, (v) coal use in electricity generation, (vi) CO2 emissions levels per GDP and per capita and (vii) the degree to which electricity is being produced from coal sources. The Manager and the Sub-Investment Manager also monitor countries' contributions/adherence to the UN Sustainable Development Goals.

The **social factors** considered are (i) government effectiveness, (ii) regulatory quality, (iii) political stability and security, (iv) human development and (v) voice and accountability. Other social factors considered in respect of country analysis include a country's relative position on income, education and health as tracked by local and international organisations and development banks, as well as factors related to the effectiveness and legitimacy of the administration through public opinion surveys.

The **governance factors** considered are (i) rule of law, (ii) corruption, (iii) politics and election calendar, (iv) banking system strength/non-performing loans, (v) ease of doing business and (vi) trade openness. There is also a focus on the quality of economic governance.

Municipal Bonds

The credit process focuses on four primary factors: economy, leverage, financial performance and management and/or political leadership. The quality of issuers' governance and management practices are assessed, including corruption, sound budgetary practices, and responsible use of debt. Others factors are also considered such as environmental (i.e. polluted drinking water) and social risks (i.e. crime) that may affect the borrower's ability to repay. Once a bond is found to be an acceptable credit risk, the issuer's governance, policies, and management of material social and environmental factors are reviewed. If an issuer is determined to have systemic concerns, the bond is not eligible for purchase. If the issuer meets the required standards, the Manager and the Sub-Investment Manager review the bonds' use of proceeds and score accordingly based on the proprietary methodology.

Benchmark Index

N/A the Portfolio does not have a Benchmark.

Neuberger Berman Sustainable Asia High Yield Fund

This Portfolio is classified as an Article 8 Portfolio as it promotes environmental and social characteristics and limits investments to companies that follow good governance practices.

Environmental or social characteristics promoted by the Portfolio

As noted in the Supplement, the Portfolio aims to outperform the Benchmark (as specified in the "Benchmark" section of the Supplement) before fees over a market cycle (typically 3 years) by primarily investing in below investment grade rated Hard Currency-denominated debt instruments issued in Asian countries that comply with the Sustainable Criteria.

The Manager and the Sub-Investment Manager will manage the Portfolio in accordance with the ESG Policy on a continuous basis. The Manager and the Sub-Investment Managers have fully integrated the ESG Policy into the overall investment process, in particular, the portfolio construction process. A summary of the ESG Policy is detailed above in this SFDR Annex and is also available on the Neuberger Berman website, www.nb.com/esg

The Manager and the Sub-Investment Manager apply the (i) Controversial Weapons Policy (ii) the Sustainable Exclusion Policy and (iii) the Thermal Coal Involvement Policy when determining what investments to make for the Portfolio. Companies which are involved in controversial weapons (anti-personnel mines, cluster weapons, depleted uranium, nuclear weapons, white phosphorus, biological and chemical weapons), direct child labour and the tobacco industry are excluded. Further details on these screening/exclusion policies are set out in the "*Sustainable Investment Criteria*" section of this Prospectus.

ESG factors are integral to the Manager's and the Sub-Investment Manager's investment process. A summary of how the Manager and the Sub-Investment Manager integrate ESG factors into their investment processes and portfolio construction is set out in the "*Investment Approach*" section. In particular, investment is prioritised in issuers who have a lower carbon emission intensity and which demonstrate better environmental, social and governance practices than the broader universe of Asian issuers of high yield debt.

In addition, the Portfolio will make meaningful allocations to green, social and sustainability-labelled fixed income securities, dependent on market opportunities.

ESG analysis is performed, with the support of third-party data, by the Manager and the Sub-Investment Manager and is not outsourced.

The Manager and the Sub-Investment Manager:

- (i) exclude securities issued by companies that are involved in controversial activities and behaviour and issuers which are rated worst in terms of their ESG assessment from the investment universe, such that at least 20% of the investment universe is excluded on these bases; and
- (ii) ensure at least 90% ESG coverage rate of the Net Asset Value of the Portfolio.

Benchmark Index

The Benchmark has not been designated as a reference benchmark for the purposes of SFDR. Therefore, it is not consistent with the promotion of environmental or social characteristics. For further details on the Benchmark, please refer to the Supplement.

Neuberger Berman US Large Cap Value Fund

This Portfolio is classified as an Article 8 Portfolio as it promotes environmental and social characteristics and limits investments to companies that follow good governance practices.

Environmental or social characteristics promoted by the Portfolio

As noted in the Supplement, the Portfolio will primarily invest in equity securities issued by large-capitalisation companies which have their head office or exercise an overriding part of their economic activity in the US and that are listed or traded on Recognised Markets in the US. The Portfolio's investment in large capitalisation companies will not be restricted by sector or industry.

The Sub-Investment Manager will manage the Portfolio in accordance with the ESG Policy on a continuous basis. The Sub-Investment Manager has fully integrated the ESG Policy into the overall investment process, in particular, the portfolio construction process. A summary of the ESG Policy is detailed above in this SFDR Annex and is also available on the Neuberger Berman website, www.nb.com/esg

The Sub-Investment Manager's global standards policy shall also ensure that 100% of the Portfolio will be invested in compliance with the exclusion criteria of the United Nations Global Compact (UNGC) Principles, OECD Guidelines for Multinational Enterprises (OECD Guidelines), the United Nations Guiding Principles on Business and Human Rights (UNGPs) and the International Labour Standards Conventions.

The Sub-Investment Manager shall also engage directly with a majority of the investee companies (e.g., management teams) through a robust qualitative ESG engagement program. Once specific holdings have been selected, the engagement program is focused on in-person meetings and conference calls to understand ESG risks, opportunities and assess good corporate governance practices at investee companies. The Sub-Investment Manager views this direct engagement with investee companies, as an essential part of its investment process. In addition, constructive engagements are undertaken with corporate issuers which have high impact controversies, or which have low internal NB Quotient scores (as described below), in order to assess whether those violations, controversies or weak ESG efforts are being addressed adequately. For these engagements, the Sub-Investment Manager will set out engagement targets to promote environmental, social and governance objectives. The Sub-Investment Manager will closely monitor and track these engagement activities. The team also typically includes the Sub-Investment Manager's research analyst that covers the issuers during these engagements.

The Sub-Investment Manager may also escalate its engagement via proxy voting, its [NB Votes](#) initiative, public statements and possibly divestment in cases of company unresponsiveness. NB Votes is a firm-wide initiative within the Neuberger Berman group, whereby voting intentions and supporting rationale are published in advance of select shareholder meetings for companies in which Neuberger Berman has invested on behalf of its clients, addressing a broad range of topics across key governance and engagement principles.

The Sub-Investment Manager considers financially material ESG factors (which may be climate or human capital related as noted above) as part of its investment decision making process, particularly as it relates to the Sub-Investment Manager's normalised earnings framework. ESG integration is an essential part of the Sub-Investment Manager's rigorous and disciplined investment process as outlined above.

The Sub-Investment Manager uses proprietary scenario analysis known as NB Quotient which covers the entire U.S. large cap universe including the Benchmark. NB Quotient builds on the Sub-Investment Manager's unique materiality framework and leverages specialized third party data, its own data science efforts and finally its central research analysts' judgment with respect to ESG analysis. The NB Quotient scores are relative to sector peers across over thirty-three industries and seventy-seven ESG specific factors which allows for deep ESG fundamental research. Secondly, the Sub-Investment Manager leverages the NB Quotient scores to identify material opportunities to engage portfolio companies which have time to adapt to

better understand and improve their ESG risks and opportunities.

The Sub-Investment Manager also leverages the firm's Climate Value-at-Risk (CVaR) model to better comprehend the long term climate risks embedded in the Portfolio. CVaR is defined as the present value of the aggregated future policy risk costs, technology opportunity profits, and extreme weather event costs and profits expressed as a percentage of the portfolio's market value should the climate scenario in question be realized. CVaR helps to identify climate risk and translate it into an economic value in present dollars.

Benchmark Index

The Benchmark has not been designated as a reference benchmark for the purposes of SFDR. Therefore, it is not consistent with the promotion of environmental or social characteristics. For further details on the Benchmark, please refer to the Supplement.

Neuberger Berman Sustainable Emerging Market Debt – Hard Currency Fund

This Portfolio is classified as an Article 9 Portfolio as it has Sustainable Investment as its objective. It invests in companies that contribute to both environmental and social objectives. In pursuing its sustainable investment objective the Portfolio will also take appropriate measures to ensure that (i) its investments do not significantly harm any of the environmental objectives; and (ii) that companies it invests in follow good governance practices.

Environmental or social characteristics promoted by the Portfolio

As noted in the Supplement, the Portfolio's objective is to outperform the Benchmark (as specified in the "Benchmark" section in the Supplement) before fees over a market cycle (typically 3 years) by investing primarily in Hard Currency-denominated debt securities issued in Emerging Market Countries that comply with the Sustainable Investment Criteria.

The Manager and Sub-Investment Manager apply the (i) Controversial Weapons Policy, (ii) the Sustainable Exclusion Policy and (iii) the Enhanced Sustainable Exclusion Policy, when determining what investments to make for the Portfolio. Further details on these screening/exclusion policies are set out in the "*Sustainable Investment Criteria*" section of the Prospectus.

The Manager and Sub-Investment Manager will also manage the Portfolio in accordance with the ESG Policy on a continuous basis. The Sub-Investment Manager has fully integrated the ESG Policy into the overall investment process, in particular, the portfolio construction process. A summary of the ESG Policy is detailed above in this SFDR Annex and is also available on the Neuberger Berman website, www.nb.com/esg

ESG factors are integral to the Manager and Sub-Investment Manager's investment process. A summary of how the Manager and Sub-Investment Manager integrate ESG factors into the investment process and portfolio construction is set out in the "*Investment Approach*" section. In particular, investment is prioritised in sovereign issuers which are showing relatively stronger progress towards achieving the environmental and social objective (or where there is potential for increased alignment with these goals).

The Manager and Sub-Investment Manager:

- (i) exclude securities issued by companies that are involved in controversial activities and behaviour and those issuers which are rated worst in terms of its ESG assessment from the investment universe, such that at least 20% of the investment universe is excluded on these bases; and
- (ii) ensure at least 90% ESG coverage rate of the Net Asset Value of the Portfolio.

ESG analysis is performed by the Sub-Investment Manager and is not outsourced.

Benchmark Indices

The Benchmarks have not been designated as reference benchmarks for the purposes of SFDR. Therefore, they are not consistent with the promotion of environmental or social characteristics. For further details on the Benchmarks, please refer to the Supplement.

Distribution Policy

Under normal circumstances, the Directors intend that dividends in respect of:

- each of the (Monthly) Distributing Classes in the Portfolios shall be declared on or prior to the last Business Day of each month and paid within three Business Days thereafter;
- the (CG) Distributing Classes in Neuberger Berman Strategic Income Fund shall be declared on a semi-annual basis and paid within 30 Business Days thereafter;
- each of the (Monthly) Gross Income Distributing Classes in the Portfolios shall be declared on or prior to the last Business Day of each month and paid within three Business Days thereafter;
- each of the other (Gross) Income Distributing Classes in the Portfolios shall be declared on a quarterly basis and paid within thirty Business Days thereafter; and
- each of the other Distributing Classes in the Portfolios will be declared on a quarterly basis and paid within 30 Business Days thereafter.

Additional Classes

In addition to the Classes described in Annex II to the Prospectus, certain of the Portfolios may also offer other Classes, as described below.

Shares in (CG) Distributing Classes are available in the Neuberger Berman Strategic Income Fund only.

Shares in the Category J1, J2, J3, J4 and J5 Classes in the Neuberger Berman Strategic Income Fund and the Neuberger Berman Global Flexible Credit Fund may only be acquired by investors in Japan which enter into a separate agreement with the Company or the Manager or a Distributor or a Sub-Investment Manager.

In addition to Hedged Classes and Unhedged Classes, Shares in all Categories in the Neuberger Berman Global Bond Fund are also available as Benchmark Hedged Classes. Where Hedged Classes will seek to protect against fluctuations, caused by movements in currency rates, between the class currency of the Hedged Class and the Base Currency of the Portfolio, Benchmark Hedged Classes will seek to protect against fluctuations, caused by movements in currency rates, between the class currency of the Benchmark Hedged Classes and the currencies in which the assets of the Neuberger Berman Global Bond Fund are denominated (based on the weights of the components of the Portfolio's Benchmark).

Investors in the Benchmark Hedged Classes should note that, while they should be protected from the impacts of adverse movements of the currencies in which such assets are denominated relative to their respective class currency, they may be exposed to risks associated with fluctuations between the Base Currency and their respective class currency, except to the extent that the Portfolio's assets are denominated in the Base Currency. All other features of the Benchmark Hedged Classes will be the same as those of the Hedged Classes and, with this in mind, investors should refer to the disclosures under "*Share Class Hedging*" in the "*Important Information*" section of the Prospectus.

Subscriptions and Redemptions

Subscriptions for Shares in all Classes in each Portfolio which have not already launched at the date of this Supplement will be considered during the Initial Offer Period, upon receipt by the Administrator of completed share applications and subscription monies as specified in the "*Subscriptions*" section of the Prospectus. Such Shares will be issued at the Initial Offer Price on the last day of the Initial Offer Period.

The Initial Offer Period shall run from 9.00 am on 24 December 2021 to 5.00 pm on 24 June 2022 or such earlier or later time as the Directors may determine at their discretion and notify to the Central Bank and to subscribers.

The Initial Offer Price for each of the share classes shall be as follows:

AUD Classes: AUD 10	CNY Classes: CNY 100	ILS Classes: ILS 30
BRL Classes: BRL 20	DKK Classes: DKK 50	JPY Classes: JPY 1,000
CAD Classes: CAD 10	EUR Classes: EUR 10	NOK Classes: NOK 100
CHF Classes: CHF 10	GBP Classes: GBP 10	NZD Classes: NZD 10
CLP Classes: CLP 5,000	HKD Classes: HKD 10	SEK Classes: SEK 100

SGD Classes: SGD 20

USD Classes: USD 10

ZAR Classes: ZAR 100

Thereafter and, in the case of Classes which have already launched, from the date of this Supplement, Shares will be issued at their Net Asset Value per Share, subject to the provision for Duties and Charges in respect of the issue of the Shares and rounding as provided for in the Articles on each Dealing Day.

The Company reserves the right to apply to Euronext Dublin to have the Shares in each of the Classes admitted to the Official List and to trading on the regulated market of Euronext Dublin.

The Company may, in its sole discretion, reject any subscription in whole or in part without reason.

As stated in the “*Subscriptions and Redemptions*” section of the Prospectus, redemption proceeds in respect of the Portfolios will be paid within ten (10) Business Days of the relevant Dealing Day unless payment has been suspended in the circumstances described in the “*Temporary Suspension of Dealings*” section of the Prospectus, although the Company will seek to make such payments within a shorter period of time where possible (up to and including within three (3) Business Days of the relevant Dealing Day).

Neuberger Berman Global Bond Fund

Investment Objective Achieve an attractive level of total return (income plus capital appreciation) from global fixed income markets.

Investment Approach The Portfolio will invest primarily in:

- Investment grade debt securities issued by governments and agencies from OECD countries; and
- Investment grade debt securities issued by corporations, which have their head office or exercise an overriding part of their economic activity in OECD countries.

All securities will be listed, dealt or traded on Recognised Markets without any particular focus on any one industrial sector. In addition to the Portfolio's exposure to currencies and interest rates inherent in its investments in debt securities, the Portfolio may also have significant exposures to currencies and interest rates through the use of financial derivative instruments.

There are four main differentiating factors that set the Portfolio's approach:

- Diversification through the use of multiple uncorrelated alpha sources;
- Active FX management;
- Integrated Global Macro Overlay; and
- Proprietary risk management systems.

Specialty investment teams use sector research and valuation in the decision making process and, using this, an investment view is formulated and expected returns are forecasted for each sector. Investment views are also influenced by the Manager's and the Sub-Investment Manager's macroeconomic outlook and internal analysis. Screening is used to formulate a "buy" list of opportunities and then individual securities that exhibit the desired characteristics are selected.

Decisions regarding the interest rate structure of the Portfolio's investments are based on the Manager's and the Sub-Investment Manager's outlook for the economy, a disciplined valuation of the level and direction of interest rates, the comparison of expectations of inflation which are reflected in bond yields and the prevailing level of inflation and the impact of forecasted levels of real economic activity on inflation expectations.

Global credit analysis of issuers focuses on cash generation, cash flow predictability and event risk analysis, as well as monitoring traditional credit statistics. Issuers that are the best prospects for purchase are subjected to rigorous and disciplined business and financial analysis. This analysis is used to form the basis of an investment opinion.

In addition, the Manager and the Sub-Investment Manager conduct analysis of data and seeks to exploit opportunities across multiple time horizons. Central to the investment philosophy is the Manager's and the Sub-Investment Manager's qualitative judgment, which is exercised at all stages of the investment process. This discretion enables it to take into account information and events that cannot be readily quantified, for example political events, shifts in regulatory regimes or the effects of market positioning and hedging.

The Portfolio may opportunistically invest up to 10% of its Net Asset Value in participation interests in floating or adjustable rate senior secured loans, which are securitised and freely transferable, and which meet the regulatory criteria to be considered money market instruments.

The Portfolio's net market exposure may vary in time and range from a maximum net long position of 150% to a maximum net short position of 0% of the Net Asset Value of the Portfolio, depending on the Sub-Investment Manager's analysis of the prevailing market conditions and considered in light of the investment objective of the Portfolio.

The Portfolio is actively managed and does not intend to track the Benchmark which is included here for performance comparison purposes and because the Portfolio's investment policy restricts the extent to which the Portfolio's holdings may deviate from

the Benchmark, as described in the “Risk” section. This deviation may be significant.

Benchmark	<p>Bloomberg Global Aggregate Index (Total Return, Unhedged USD), which measures global investment grade fixed-rate debt markets.</p> <p>Shareholders in a Class which is denominated in a currency other than the Base Currency should note that, where available, it may be more meaningful to compare the performance of such Class against a version of this index which is denominated in the relevant Class currency.</p>
Base Currency	US Dollars (USD).
Instruments / Asset Classes	<p>The Portfolio will invest primarily in global fixed income securities that have been rated investment grade by a Recognised Rating Agency. The Portfolio can invest in or be exposed to the following types of assets.</p> <p>Fixed Income Securities (Debt Securities). These securities may include:</p> <ul style="list-style-type: none"> • Both fixed and floating rate debt securities, including bonds, issued by governments, government related and corporate entities from OECD countries denominated in local currencies; • Corporate bonds, debentures and notes (including freely transferable and unleveraged structured notes, contingent convertible bonds and freely transferable promissory notes); • Privately issued mortgage-backed securities, asset-backed securities, structured securities (including mortgage-backed securities such as pass-through certificates, which entitle the holders to receipt of mortgage payments, collateralised mortgage obligations and interest and principal only components of mortgage-backed securities) that derive interest and principal payments from specified assets (including residential and commercial mortgages, credit card debt and pools of other kinds of receivables, such as loans, royalties or other earnings); • Collateralised mortgage obligations, payment-in-kind bonds (which are bonds that pay interest in the form of additional bonds of the same kind); and • Deferred payment securities (securities which pay regular interest after a predetermined date) and zero coupon securities. <p>Money Market Instruments. These securities may include bank deposits, fixed or floating rate instruments (including commercial paper), floating or variable rate notes, bankers acceptances, certificates of deposit, debentures and short-dated government or corporate bonds, participation interests in loans (which are securitised and freely transferable), cash and cash equivalents (including treasury bills) that are rated as investment grade by Recognised Rating Agencies or are unrated.</p> <p>Investment grade securities are highly rated securities, generally those rated Baa3, BBB- or above by one or more Recognised Rating Agencies, while high yield securities are medium or lower rated securities, generally those rated below investment grade and sometimes referred to as “junk bonds”.</p> <p>Collective Investment Schemes. The Portfolio may invest in underlying funds which are themselves exposed to investments that are similar to the Portfolio’s other investments, provided that the Portfolio may not invest more than 10% of its Net Asset Value in underlying funds (including ETFs which are structured as collective investment schemes) which themselves invest in other collective investment schemes. Such underlying funds may or may not be managed by the Manager and/or the Sub-Investment Manager or their affiliates and will comply with the requirements of the UCITS Regulations in respect of such investments.</p> <p>The underlying funds in which the Portfolio may invest will be eligible collective investment schemes in accordance with the Central Bank’s requirements, which may be domiciled in Relevant Jurisdictions or the United States of America and will qualify as UCITS or alternative investment fund schemes and will be regulated as such by their home state regulator.</p>

- Underlying funds in which the Portfolio invests may be leveraged but such collective investment schemes will not generally be leveraged: (i) in excess of 100% of their net asset value; or (ii) so that their 1 day absolute VaR exceeds 4.47% of their net asset value over a 250 day horizon with a 99% confidence level; or (iii) so that their 1 month relative VaR exceeds twice the VaR of a comparable benchmark portfolio over a 250 day horizon with a 99% confidence level, depending on how such underlying funds measure their global exposure; and
- ETFs are investment funds whose units may be bought and sold on a securities exchange. ETFs typically invest in a portfolio of securities that is designed to track the performance of particular market segment or index. The ETFs will be located in a Relevant Jurisdiction and will be authorised under the UCITS Directive or will be alternative investment funds which are eligible for investment by the Portfolio in accordance with the requirements of the Central Bank. The ETFs will represent investments that are similar to the Portfolio's other investments. The ETFs will operate on the principle of risk spreading and will not be leveraged.

Financial Derivative Instruments ("FDIs"). Subject to the conditions and limits imposed by the Central Bank as set out in the Prospectus and this Supplement, the Portfolio may use the following FDI for efficient portfolio management, investment purposes, and/or hedging. The following FDI may provide exposure to any or all of the asset classes listed above:

- Swaps may include foreign exchange swaps, credit default swaps, interest rate swaps fixed income securities swaps, UCITS eligible indices swaps, volatility swaps and total return swaps and may be used to achieve a profit as well as to hedge existing long positions. The maximum proportion of the Portfolio's Net Asset Value that can be subject to total return swaps is 20%. The expected proportion of the Portfolio's Net Asset Value that will be subject to total return swaps is 7%. The expected proportions are not limits and the actual percentages may vary over time depending on factors including, but not limited to, market conditions;
- Future contracts may be used to hedge or to gain exposure to an increase in the value of interest rates, fixed income securities, UCITS eligible bond indices or currencies;
- Options on fixed income securities may be used to achieve a profit as well as to hedge existing long positions;
- Forward contracts on fixed income securities may be used to achieve a profit, through gaining exposure to an increase in the value of such securities as well as to hedge existing long positions; and
- Forward currency contracts may be used to achieve a profit as well as to hedge existing long currency exposures.

As the Portfolio may purchase FDI generally using only a fraction of the assets that would be needed to purchase the relevant securities directly, the remainder of the assets allocated to the Manager may be invested in the other types of securities listed above. The Manager and/or the Sub-Investment Manager may therefore seek to achieve greater returns by purchasing derivative instruments and investing the remaining assets in such other securities to add excess return.

Repo Contracts and Securities Lending Agreements. Repo Contracts and Securities Lending Agreements may be used subject to the conditions and limits set out in the Prospectus.

Bond Connect

The PBoC and the HKMA have approved the CFETS, CCDC, SHCH, together with Hong Kong Exchanges and Clearing Limited and CMU to launch Bond Connect, which is a mutual bond market access programme between Mainland China and Hong Kong. Bond Connect allows investors to trade electronically between the Mainland China and Hong Kong bond markets without quota restrictions and requirements to identify the ultimate investment amount.

Currently, Bond Connect comprises a Northbound Trading Link between CFETS, the operator of the CIBM and offshore trading access platforms recognised by the PBoC, to facilitate investment by Hong Kong and overseas investors (including the Portfolio) in eligible bonds traded on the CIBM. A Southbound Trading Link, facilitating investment in overseas bond markets by Mainland Chinese investors is still under

development but is intended to form part of Bond Connect once established.

Eligible Securities

Hong Kong and overseas investors (including the Portfolio) will be able to trade over the entire range of instruments traded on the CIBM, including products on both the secondary and primary markets.

Trading Day

Northbound investors (including the Portfolio) are able to trade through Bond Connect on days upon which the CIBM is open to trade, regardless of whether they are a public holiday in Hong Kong.

Settlement and Custody

Settlement and custody of Northbound bond trades under Bond Connect will be implemented under the link between the CMU of the HKMA and Mainland China's two bond settlement systems, namely, CCDC and SHCH. The CMU settles Northbound trades and holds the CIBM bonds on behalf of its members in nominee accounts with each of CCDC and SHCH. CCDC and SHCH provide services to foreign investors, directly and indirectly, using Bond Connect.

Bonds purchased by Hong Kong and overseas investors (including the Portfolio) are recorded in an omnibus nominee account at CCDC and SHCH in the name of CMU. The CMU itself maintains the bonds in segregated sub-accounts of its members, who in turn may hold the bonds on their own account or on behalf of other investors or custodians. Accordingly, bonds purchased by Hong Kong and overseas purchasers through Bond Connect are held by the purchaser's global or local custodian in a segregated sub-account opened in their name at the CMU.

Currency

Hong Kong and overseas investors may trade through Bond Connect using offshore RMB (CNH) or by converting foreign currencies into onshore RMB (CNY) under Bond Connect.

Where an investor uses foreign currencies to invest through the Northbound Trading Link, it must open a segregated RMB capital account with an eligible RMB settlement Bank in Hong Kong to convert its foreign currencies into CNY. Where bonds are purchased in CNY in this manner, upon sale of the bonds, the sale proceeds remitted out of Mainland China must be converted back into the relevant foreign currencies.

Further information about Bond Connect is available at:

<http://www.chinabondconnect.com/en/index.htm>

Investment Restrictions

- Under normal market conditions, it is the intention of the Manager and the Sub-Investment Manager to invest at least 90% of the Portfolio's Net Asset Value in Investment Grade fixed income securities.
- The Portfolio may invest up to 10% of its Net Asset Value in securities that are issued or guaranteed by a single sovereign issuer that are below investment grade.
- The Portfolio's over or underweight exposure to securities issued by issuers from Emerging Market Countries relative to the Benchmark will not exceed 10% of its Net Asset Value.
- The Portfolio will not utilise margin lending.

Risk

- Investment in the Portfolio carries certain risks which are described in greater detail in the "Investment Risks" section of the Prospectus. While investors should read and consider the entire "Investment Risks" section of the Prospectus, the risks summarised in the following sections, namely, "Market Risks: Risks relating to Debt Securities", "Risks Associated with Investment in the China Interbank Bond Market through Bond Connect" and "Risks related to Financial Derivative Instruments" are

particularly relevant to this Portfolio. **These risks are not purported to be exhaustive and potential investors should review this Supplement and the Prospectus in their entirety and consult with their professional advisers, before making an application for Shares.**

- Investors should refer to the Company's risk management policy with respect to the use of FDI contained in the RMP Statement.
- The Portfolio is expected to be leveraged up to approximately 500% of its Net Asset Value as a result of its use of FDI, although investors should note that higher levels of leverage may be experienced. This expected leverage figure is calculated using the sum of the notional values of the derivatives used, as required by the Central Bank. Using this methodology does not reflect any netting or hedging that the Portfolio may have in place. The Portfolio's global exposure is subject to an advanced risk management process which, in compliance with the UCITS Regulations, aims to ensure that on any day the relative VaR of the Portfolio will be no greater than twice the VaR of the Benchmark. The VaR of the Portfolio is a daily estimation of the maximum loss which the Portfolio may incur over a 20 Business Day holding period and is arrived at through quantitative simulations with a 99% one tailed confidence interval and using an historical observation period of at least 250 business days. This process is described in detail in the statement of risk management procedures of the Company and its appendix in respect of the Portfolio. While the Portfolio measures and monitors its global exposure using the VaR approach, rather than by use of the Commitment Approach, the leverage of the Portfolio using the Commitment Approach is expected to be 250% of its Net Asset Value as a result of its use of FDI, although investors should note that higher levels of leverage may be experienced.
- The Manager and the Sub-Investment Manager will take a disciplined approach to investing on behalf of the Portfolio by attempting to maintain a portfolio that is typically diversified across issuers, industry sectors and, within the scope of the targeted Portfolio duration, maturities.
- The Manager and the Sub-Investment Manager will seek to anticipate spread movements in response to changes in economic conditions, industry fundamentals, issuer specific financial performance and other issuer specific factors. Investment decisions will be based on analysis of historical spread relationships, break-even yield spread analysis and total return projections.
- The Manager and the Sub-Investment Manager will use forward currency contracts in order to hedge currency risk on a discretionary basis.

Environmental, Social and Governance ("ESG")

This Portfolio meets the classification of an Article 8 Portfolio as it promotes environmental and social characteristics and limits investments to companies that follow good governance practices.

Please also refer to Annex VI of the Prospectus which contains additional information on the ESG characteristics that are applicable to this Portfolio.

Typical Investor Profile

Investment in the Portfolio may be suitable for investors who are prepared to accept the risks of the global bond market over the medium to long term, together with the level of volatility generally associated with fixed income funds.

Fees and Expenses

Category	Maximum Initial Charge	Maximum Management fee	Distribution Fee
A, X, Y	5.00%	0.80%	0.00%
C1	0.00%	1.40%	1.00%
B, C2, E	0.00%	0.70%	1.00%
C	0.00%	0.50%	1.00%
D, I, I2, I3, I4, I5	0.00%	0.40%	0.00%
M	2.00%	0.80%	0.60%

T	5.00%	1.00%	0.00%
U	3.00%	0.60%	0.00%
Z	0.00%	0.00%	0.00%

For details of the Administration Fees payable by the Portfolio, please see the “Administration Fees” heading in the “Fees and Expenses” section of the Prospectus.

Contingent deferred sales charges

Contingent deferred sales charges will be payable in respect of the following Classes at the rates specified below, depending on the period that has elapsed since the issue of the Shares being redeemed and will be charged on the lower of the Net Asset Value per Share on the relevant Dealing Day in respect of which the relevant Shares were (i) initially subscribed or (ii) redeemed. Any such contingent deferred sales charges will be paid to the relevant Distributor, the Manager or to the Sub-Investment Manager.

Class	Redemption Period in Calendar Days				
	< 365	365 - 729	730 - 1094	1095 – 1459	> 1459
B	4%	3%	2%	1%	0%

C2	2%	1%	0%	0%	0%
E	3%	2%	1%	0%	0%

Other important information for investors in Hong Kong

As the Portfolio has been authorised for public offer in Hong Kong, the Hong Kong Securities and Futures Commission (“HKSF”) requires the Company to classify the Portfolio on the basis of its expected maximum net derivative exposure (“NDE”). The HKSF requires the NDE to be calculated in accordance with the HKSF’s Code on Unit Trusts and Mutual Funds and the requirements and guidance issued by the HKSF, which may be updated from time to time. This requires the Company to convert all FDI acquired for investment purposes that would generate incremental leverage at the portfolio level of the Portfolio into their equivalent positions in the underlying assets. Applying these requirements, the Portfolio’s NDE is expected to be less than 50% but the actual level may be higher than the expected level in exceptional circumstances, for example when there are sudden movements in markets and/or investment prices.

For the avoidance of doubt, complying with the HKSF’s requirements to classify the Portfolio on the basis of its NDE does not amend the investment objectives or policies or otherwise impact the management of the Portfolio or its use of FDI, as the requirements are solely to measure the Portfolio’s expected use of FDI, as described above, using the HKSF’s methodology and disclose the results.

Neuberger Berman Strategic Income Fund

An investment in the Portfolio should not constitute a substantial proportion of an investment portfolio and may not be appropriate for all investors.

Investment Objective	Maximize total return from high current income and long-term capital appreciation by opportunistically investing in a diversified mix of fixed rate and floating rate debt securities under varying market environments with a focus on downside protection.
Investment Approach	<p>The Portfolio will invest primarily in debt securities issued by US corporations or by the US government and its agencies. Such securities will be listed, dealt, or traded on Recognised Markets and may be rated investment grade or below investment grade or non-rated by Recognised Rating Agencies.</p> <p>The Manager and the Sub-Investment Manager implement a disciplined investment process that is consistently applied across all fixed income sectors with an ongoing focus on identifying the most attractive investment opportunities in the fixed income market.</p> <p>Decision making is driven by sector research and valuation completed by specialty investment teams. For each sector the teams formulate an investment view and project expected returns which are impacted by the team's macroeconomic outlook and based on internal analysis.</p> <p>Securities are selected by screening the universe of eligible securities to formulate a "buy" list of actionable opportunities and then selecting the individual securities that exhibit the characteristics which the Manager and/or the Sub-Investment Manager consider attractive.</p> <p>The Portfolio's investment strategy and risk budgeting is critical to capturing the highest possible returns relative to the market while quantifying risk and achieving the Portfolio's investment objective.</p> <p>The portfolio construction process measures and manages the Portfolio's overall risk profile on an ongoing basis in an effort to ensure that the Portfolio's investment objective is achieved.</p> <p>In addition, although the Portfolio will concentrate its investments in the US, the Portfolio may also invest in debt securities issued by non-US governments and their agencies and corporations located globally up to one third of the Portfolio's Net Asset Value. This may include investing in debt securities issued by companies located in and governments and government agencies of Emerging Market Countries, which may involve additional risk, relative to investment in more development economies. Please refer to the "<i>Risk</i>" section below for further details in this respect.</p> <p>The Portfolio is expected to have medium to high levels of volatility due to its investment policies or portfolio management techniques.</p> <p>The Portfolio may opportunistically invest up to 10% of its Net Asset Value in participation interests in floating or adjustable rate senior secured loans, which are securitised and freely transferable, and which meet the regulatory criteria to be considered money market instruments.</p> <p>Under normal market conditions, the Manager anticipates that the Portfolio's average interest rate duration will be within a range of 2 to 8 years.</p> <p>The Portfolio's net market exposure may vary in time and range from a maximum net long position of 150% to a maximum net short position of 0% of the Net Asset Value of the Portfolio, depending on the Sub-Investment Manager's analysis of the prevailing market conditions and considered in light of the investment objective of the Portfolio.</p> <p>The Portfolio is actively managed and does not intend to track the Benchmark and is not constrained by it. The Benchmark is included here for performance comparison purposes only. The Portfolio gives some consideration to the Benchmark constituents</p>

	in the selection of securities and may not hold all or many of the Benchmark's components.
--	--

Benchmark	<p>Bloomberg U.S. Aggregate Index (Total Return, USD).</p> <p>Shareholders in a Class which is denominated in a currency other than the Base Currency should note that, where available, it may be more meaningful to compare the performance of such Class against a version of this index which is denominated in the relevant Class currency.</p>
------------------	--

Base Currency	US Dollars (USD).
----------------------	-------------------

Instruments / Asset Classes	<p>The Portfolio will invest primarily in debt securities. The Portfolio can invest in or be exposed to the following types of assets.</p> <p>Fixed Income Securities (Debt Securities). These securities may include:</p> <ul style="list-style-type: none"> • Both fixed and floating rate debt securities, including bonds, issued by US and non-US governments, government agencies and corporate entities; • Corporate bonds, debentures and notes (including freely transferable and unleveraged structured notes, contingent convertible bonds and freely transferable promissory notes); • Privately issued asset-backed securities, structured securities (including mortgage-backed securities such as pass-through certificates, collateralised mortgage obligations and interest and principal only components of mortgage-backed securities and collateralised loan obligations with respect to mezzanine floating rate debt) that derive interest and principal payments from specified assets (such as residential and commercial mortgages, credit card debt and pools of other types of receivables such as loans); • Payment-in-kind bonds (which are bonds that pay interest in the form of additional bonds of the same kind); • Deferred payment securities (securities which pay regular interest after a predetermined date) and zero coupon securities; and • Debt securities of the types described above issued by issuers in Emerging Market Countries. <p>Investment grade securities are highly rated securities, generally those rated Baa3, BBB- or above by one or more Recognised Rating Agencies, while high yield securities are medium or lower rated securities, generally those rated below investment grade and sometimes referred to as "junk bonds".</p> <p>The Portfolio may invest up to 10% of its Net Asset Value in securities that are issued or guaranteed by a single sovereign issuer that are below investment grade.</p> <p>Money Market Instruments. These Securities may include: bank deposits, fixed or floating rate instruments (including commercial paper), floating or variable rate notes, bankers acceptances, certificates of deposit, debentures and short-dated government or corporate bonds, participation interests in loans (which are securitised and freely transferable), cash and cash equivalents (including treasury bills) that are rated as investment grade by Recognised Rating Agencies.</p> <p>Collective Investment Schemes. The Portfolio may invest in underlying funds which are themselves exposed to investments that are similar to the Portfolio's other investments, provided that the Portfolio may not invest more than 10% of its Net Asset Value in underlying funds (including ETFs which are structured as collective investment schemes) which themselves invest in other collective investment schemes. Such underlying funds may or may not be managed by the Manager and/or the Sub-Investment Manager or their affiliates and will comply with the requirements of the UCITS Regulations in respect of such investments.</p> <p>The underlying funds in which the Portfolio may invest will be eligible collective investment schemes in accordance with the Central Bank's requirements, which may be domiciled in Relevant Jurisdictions or the United States of America and will qualify as UCITS or alternative investment fund schemes and will be regulated as such by</p>
------------------------------------	---

their home state regulator.

- Underlying funds in which the Portfolio invests may be leveraged but such collective investment schemes will not generally be leveraged: (i) in excess of 100% of their net asset value; or (ii) so that their 1 day absolute VaR exceeds 4.47% of their net asset value over a 250 day horizon with a 99% confidence level; or (iii) so that their 1 month relative VaR exceeds twice the VaR of a comparable benchmark portfolio over a 250 day horizon with a 99% confidence level, depending on how such underlying funds measure their global exposure; and
- ETFs are investment funds whose units may be bought and sold on a securities exchange. ETFs typically invest in a portfolio of securities that is designed to track the performance of particular market segment or index. The ETFs will be located in a Relevant Jurisdiction and will be authorised under the UCITS Directive or will be alternative investment funds which are eligible for investment by the Portfolio in accordance with the requirements of the Central Bank. The ETFs will represent investments that are similar to the Portfolio's other investments. The ETFs will operate on the principle of risk spreading and will not be leveraged.

Financial Derivative Instruments ("FDIs"). Subject to the conditions and limits imposed by the Central Bank as set out in the Prospectus and this Supplement, the Portfolio may use the following FDI may be used for efficient portfolio management, investment purposes, and/or hedging. The following FDI may provide exposure to any or all of the asset classes listed above:

- Swaps may include foreign exchange, fixed income securities swaps, UCITS eligible indices swaps, interest rate swaps, volatility swaps, credit default and total return swaps and may be used to achieve a profit as well as to hedge existing long positions. The maximum proportion of the Portfolio's Net Asset Value that can be subject to total return swaps is 20%. The expected proportion of the Portfolio's Net Asset Value that will be subject to total return swaps is 5%. The expected proportions are not limits and the actual percentages may vary over time depending on factors including, but not limited to, market conditions;
- Future contracts may be used to hedge or to gain exposure to an increase in the value of interest rates, fixed income securities, UCITS eligible bond indices or currencies;
- Options on fixed income securities may be used to achieve a profit as well as to hedge existing long positions;
- Forward contracts on fixed income securities may be used to achieve a profit, through gaining exposure to an increase in the value of such securities as well as to hedge existing long positions; and
- Forward contracts and non-deliverable forward currency contracts may be used to achieve a profit as well as to hedge existing long currency exposures.

As the Portfolio may purchase FDI generally using only a fraction of the assets that would be needed to purchase the relevant securities directly, the remainder of the assets allocated to the Manager may be invested in the other types of securities listed above. The Manager and/or the Sub-Investment Manager may therefore seek to achieve greater returns by taking exposure to the performance of such securities through purchasing FDI which give exposure to them rather than purchasing the securities themselves and investing the remaining assets in other such securities to add excess return.

Repo Contracts and Securities Lending Agreements. Repo Contracts and Securities Lending Agreements may be used subject to the conditions and limits set out in the Prospectus.

Bond Connect

The PBoC and the HKMA have approved the CFETS, CCDC, SHCH, together with Hong Kong Exchanges and Clearing Limited and CMU to launch Bond Connect, which is a mutual bond market access programme between Mainland China and Hong Kong. Bond Connect allows investors to trade electronically between the Mainland China and Hong Kong bond markets without quota restrictions and requirements to identify the ultimate investment amount.

Currently, Bond Connect comprises a Northbound Trading Link between CFETS, the

operator of the CIBM and offshore trading access platforms recognised by the PBoC, to facilitate investment by Hong Kong and overseas investors (including the Portfolio) in eligible bonds traded on the CIBM. A Southbound Trading Link, facilitating investment in overseas bond markets by Mainland Chinese investors is still under development but is intended to form part of Bond Connect once established.

Eligible Securities

Hong Kong and overseas investors (including the Portfolio) will be able to trade over the entire range of instruments traded on the CIBM, including products on both the secondary and primary markets.

Trading Day

Northbound investors (including the Portfolio) are able to trade through Bond Connect on days upon which the CIBM is open to trade, regardless of whether they are a public holiday in Hong Kong.

Settlement and Custody

Settlement and custody of Northbound bond trades under Bond Connect will be implemented under the link between the CMU of the HKMA and Mainland China's two bond settlement systems, namely, CCDC and SHCH. The CMU settles Northbound trades and holds the CIBM bonds on behalf of its members in nominee accounts with each of CCDC and SHCH. CCDC and SHCH provide services to foreign investors, directly and indirectly, using Bond Connect.

Bonds purchased by Hong Kong and overseas investors (including the Portfolio) are recorded in an omnibus nominee account at CCDC and SHCH in the name of CMU. The CMU itself maintains the bonds in segregated sub-accounts of its members, who in turn may hold the bonds on their own account or on behalf of other investors or custodians. Accordingly, bonds purchased by Hong Kong and overseas purchasers through Bond Connect are held by the purchaser's global or local custodian in a segregated sub-account opened in their name at the CMU.

Currency

Hong Kong and overseas investors may trade through Bond Connect using offshore RMB (CNH) or by converting foreign currencies into onshore RMB (CNY) under Bond Connect.

Where an investor uses foreign currencies to invest through the Northbound Trading Link, it must open a segregated RMB capital account with an eligible RMB settlement Bank in Hong Kong to convert its foreign currencies into CNY. Where bonds are purchased in CNY in this manner, upon sale of the bonds, the sale proceeds remitted out of Mainland China must be converted back into the relevant foreign currencies.

Further information about Bond Connect is available at:

<http://www.chinabondconnect.com/en/index.htm>

Investment Restrictions

The Portfolio will not utilise margin lending.

Risk

- Investment in the Portfolio carries certain risks which are described in greater detail in the "Investment Risks" section of the Prospectus. While investors should read and consider the entire "Investment Risks" section of the Prospectus, the risks summarised in the following sections, namely, "Market Risks: Risks relating to Debt Securities", "Risks Associated with Investment in the China Interbank Bond Market through Bond Connect" and "Risks related to Financial Derivative Instruments" are particularly relevant to this Portfolio. **These risks are not purported to be exhaustive and potential investors should review this Supplement and the Prospectus in their entirety and consult with their**

professional advisers, before making an application for Shares.

- Investors should refer to the Company's risk management policy with respect to the use of FDI contained in the RMP Statement.
- The Portfolio's global exposure is subject to an advanced risk management process which, in compliance with the UCITS Regulations, aims to ensure that on any day the Absolute VaR of the Portfolio will be no greater than 4.47% of its Net Asset Value. The VaR of the Portfolio is a daily estimation of the maximum loss which the Portfolio may incur over a one day holding period and is arrived at through quantitative simulations with a 99% one tailed confidence interval and using a historical observation period of at least 250 business days. This process is described in detail in the statement of risk management procedures of the Company and its appendix in respect of the Portfolio. While the Portfolio measures and monitors its global exposure using the VaR approach, rather than by use of the Commitment Approach, the leverage of the Portfolio as calculated using the Commitment Approach is not expected to exceed 100% of its Net Asset Value as a result of its use of FDI. Measuring levels of leverage using the absolute sum of the notional of the derivatives used, as required by the Central Bank, would produce a leverage percentage of approximately 200% of the Portfolio's Net Asset Value, although investors should note that higher levels of leverage may be experienced. That methodology does not reflect any netting or hedging that the Portfolio may have in place.
- The Manager and/or the Sub-Investment Manager will use forward and future currency contracts in order to hedge currency risk on a discretionary basis. The use of such hedging techniques may increase the risk profile of the Portfolio.

Environmental, Social and Governance ("ESG")

This Portfolio meets the classification of an Article 8 Portfolio as it promotes environmental and social characteristics and limits investments to companies that follow good governance practices.

Please also refer to Annex VI of the Prospectus which contains additional information on the ESG characteristics that are applicable to this Portfolio.

Typical Investor Profile

Investment in the Portfolio may be suitable for investors who are prepared to accept the risks of the global bond market over the medium to long term, together with medium to high levels of volatility due to the Portfolio's investments policies or portfolio management techniques.

Fees and Expenses

Category	Maximum Initial Charge	Maximum Management fee	Distribution Fee
A, X, Y	5.00%	1.00%	0.00%
B, C1, C2, E	0.00%	1.40%	1.00%
C	0.00%	0.70%	1.00%
D, I, I2, I3, I4, I5	0.00%	0.50%	0.00%
J1, J2, J3, J4, J5	0.00%	1.40%	0.50%
M	2.00%	1.00%	0.60%
P	5.00%	0.48%	0.00%
T	5.00%	1.40%	0.00%

Z	0.00%	0.00%	0.00%

Investors in the J Classes should note that any associated distribution fees will be payable to the relevant Distributor or the Manager or the Sub-Investment Manager at an amount of up to 0.5% of the Portfolio's Net Asset Value and for up to 2,372 days.

For details of the Administration Fees payable by the Portfolio, please see the "Administration Fees" heading in the "Fees and Expenses" section of the Prospectus.

Contingent deferred sales charges

Contingent deferred sales charges will be payable in respect of the following Classes at the rates specified below, depending on the period that has elapsed since the issue of the Shares being redeemed and will be charged on the lower of the Net Asset Value per Share on the relevant Dealing Day in respect of which the relevant Shares were (i) initially subscribed or (ii) redeemed. Any such contingent deferred sales charges will be paid to the relevant Distributor, the Manager or to the Sub-Investment Manager.

Class	Redemption Period in Calendar Days				
	< 365	365 - 729	730 - 1094	1095 – 1459	> 1459

Other important information for investors in Hong Kong

As the Portfolio has been authorised for public offer in Hong Kong, the Hong Kong Securities and Futures Commission (“HKSF”) requires the Company to classify the Portfolio on the basis of its expected maximum net derivative exposure (“NDE”). The HKSF requires the NDE to be calculated in accordance with the HKSF’s Code on Unit Trusts and Mutual Funds and the requirements and guidance issued by the HKSF, which may be updated from time to time. This requires the Company to convert all FDI acquired for investment purposes that would generate incremental leverage at the portfolio level of the Portfolio into their equivalent positions in the underlying assets. Applying these requirements, the Portfolio’s NDE is expected to be less than 50% but the actual level may be higher than the expected level in exceptional circumstances, for example when there are sudden movements in markets and/or investment prices.

For the avoidance of doubt, complying with the HKSF’s requirements to classify the Portfolio on the basis of its NDE does not amend the investment objectives or policies or otherwise impact the management of the Portfolio or its use of FDI, as the requirements are solely to measure the Portfolio’s expected use of FDI, as described above, using the HKSF’s methodology and disclose the results.

Neuberger Berman Corporate Hybrid Bond Fund

An investment in the Portfolio should not constitute a substantial proportion of an investment portfolio and may not be appropriate for all investors. The Portfolio will not use FDI extensively or primarily for investment purposes.

Investment Objective Achieve an attractive level of total return (income plus capital appreciation).

Investment Approach The Portfolio will invest primarily in investment grade and sub-investment grade corporate hybrid bonds (as described further in the “*Instruments/Asset Classes*” section). The Portfolio will seek to use fundamental bottom-up analysis principles in selecting securities for investment, meaning that the Sub-Investment Manager’s analysis will focus on the strengths of individual securities as opposed to the selection of securities by reference to broader themes, such as industries. The analysis of the strength of a security will be specific to the individual security itself, as opposed to having regard to broader themes e.g. the credit rating of the security will be analysed relative to its proposed yield. The Portfolio will focus on securities which are listed or traded on Recognised Markets globally, and not limited by industry or sector. The Portfolio may rotate its exposure to geographic regions and countries and between sectors and issuers, based on economic or regional fundamentals, such as the valuation of each security relative to other similar securities. The Portfolio may have medium levels of volatility due to its investments in subordinated debt and/or below investment grade securities.

The Sub-Investment Manager’s global credit research team is responsible for in-depth analysis of issuers (as described below), hybrid structures and security valuations. Its opinions and recommendations are then communicated to portfolio managers by the research team through regular formal and informal calls and meetings, to enable the portfolio managers to arrive at optimal portfolio components and characteristics.

The Sub-Investment Manager uses a research-based, qualitative and quantitative methodology for selecting securities, with the aim of generating an attractive total return. In terms of security selection, the Sub-Investment Manager will adopt a long term, fundamental, relative value based approach, as described in further detail below, and will exercise patience in achieving investment performance. This methodology is founded on the belief that returns from liquid assets can be attributed to changes in fundamental factors, such as changes in cash flow and issuers’ levels of borrowing.

The Sub-Investment Manager will conduct credit analysis on issuers, which will focus on cash generation, cash flow predictability and event risk analysis (relating to the likelihood of certain events, for example the bond issuer missing a coupon payment or suffering a rating downgrade). Security specific analysis focuses primarily on subordination risk, coupon deferral risk, extension risk and early redemption risk (each of which is addressed in more detail in the “*Risk*” section below). Issuers and issues that the Sub-Investment Manager considers to be the best prospects for purchase are then subjected to rigorous and thorough business and financial analysis (as described in more detail at 1 below). This analysis is used to form the basis of an investment opinion, in conjunction with downside and relative value analyses (as described in more detail at 2 and 3 below).

In order to express relative value views on corporate hybrids, the Sub-Investment Manager break down its analysis into three main components:

1. Consideration of its views on the issuer and its future credit trend, including the strategic rationale for hybrid issuance, taking into account factors such as:
 - a. Expected trends in the issuer’s credit (i.e. changes in the ability of the issuer to continue to access credit into the future);
 - b. Expectations on the development of credit spreads in respect of the issuer’s senior debt (i.e. the interest rates which the issuer has to pay on its

-
- senior debt) until the first call date of the hybrid security (for more detail see the “*Risk*” section below);
- c. The likelihood that a hybrid security may be exposed to risks of a rating downgrade, notably from Investment Grade to sub-Investment Grade;
 - d. The uses to which an issuer is likely to put the proceeds of the sale of the hybrid securities (e.g. retaining cash on the balance sheet, using it for operating needs or capital expenditure);
 - e. The importance of a given hybrid security to the issuer’s balance sheet.
2. Review of the structure of each hybrid and its potential to adversely impact the hybrid’s value. In undertaking this review, the Sub-Investment Manager combines its views on three types of risk:
 - a. **Extension risk:** The likelihood that the instrument is called at the first call date and the potential downside if it is not, as well as the factors that the issuer’s management is likely to take into account in deciding whether to call the instruments, such as solely considering economic factors.
 - b. **Covenant risk:** The likelihood that an early call option is triggered, as a result of factors such as a change of control, a change in accounting treatment, rating agency or tax treatment and the likely downside in the event of an early call.
 - c. **Deferral risk:** The likelihood of coupon payments being deferred.
 3. Assessment of the relative value positioning of each hybrid instrument in comparison to other similar instruments with the same structure and risk both within:
 - a. the broader hybrid universe; and
 - b. the capital structure of the issuer relative to the issuer’s senior bonds.

In addition, the Sub-Investment Manager will take into account the liquidity of individual securities and the overall liquidity profile of the Portfolio when making its security selections to ensure that the Portfolio is able to meet its obligations in relation to meeting Shareholders’ redemption requests.

The aim of this selection process is to create a portfolio that maximises the amount of the Portfolio’s expected return for its expected volatility, while remaining well within the investment guidelines set out in this Supplement. The Sub-Investment Manager will take a disciplined approach to investing by attempting to maintain a portfolio that is typically diversified across issuers and industry sectors. This process of security selection and portfolio optimisation is repeated on a continuous basis to ensure that the Portfolio continues to maximise expected return in light of expected volatility. As a result, if the Sub-Investment Manager considers that the expected returns from an investment are or become insufficient relative to the risks of the investment they will either not invest in or dispose of the security under consideration.

Central to the investment philosophy is the Sub-Investment Manager’s discretion, which is exercised at all stages of the investment process. This discretion enables them to take into account information and events that cannot be readily quantified, for example political events, shifts in regulatory regimes or the effects of market positioning and hedging.

The Portfolio will invest a majority of its Net Asset Value in securities denominated in Euro, GBP and/or USD. The investments will be fully hedged into its Base Currency through the use of forward and future contracts as set out below in the “*Instruments/Asset Classes*” section.

Depending on conditions and trends such as valuations and volatility in the securities markets and the economy in general, different strategies or investment techniques may be pursued or employed. For example, in exceptional circumstances, the Sub-Investment Manager may adopt a defensive position if in its view, markets, securities or corporate hybrids specifically are overvalued and not believed to reflect the

appropriate market valuations. In such circumstances, the Portfolio may, from time to time, take temporary or defensive positions in cash, cash equivalents and other short-term money market instruments to adjust for such market conditions.

In normal market conditions, it is the intention of the Sub-Investment Manager to invest at least 50% of the Portfolio's available assets in Investment Grade corporate hybrid securities. The Sub-Investment Manager will not invest in equities or in Emerging Market securities.

The Portfolio is actively managed and does not intend to track the Benchmark and is not constrained by it. The Benchmark is included here for performance comparison purposes only. The Portfolio gives some consideration to the Benchmark constituents in the selection of securities and may not hold all or many of the Benchmark's components.

Benchmark

The ICE BofA Global Hybrid Non-Financial 5% Constrained Custom Index (Total Return, Euro, Hedged), which tracks the performance of investment grade non-financial hybrid corporate debt publicly issued in major domestic and Eurobond markets and each issuer is capped at 5% maximum weight.

Shareholders in a Class which is denominated in a currency other than the Base Currency should note that, where available, it may be more meaningful to compare the performance of such Class against a version of this index which is denominated in the relevant Class currency.

Base Currency

Euro (EUR).

Instruments / Asset Classes

The Portfolio will principally invest in corporate hybrid securities, both investment grade and sub-investment grade that have been rated by a Recognised Rating Agency. The Portfolio can invest in or be exposed to the following types of assets.

Fixed Income Securities (Debt securities). These securities may include:

Corporate hybrid securities are highly structured instruments that combine both equity and fixed income features. They generally offer a means for issuers to borrow money from investors in return for interest payments. Such corporate issuers may utilise hybrid debt for a variety of reasons, including bolstering their capital levels, lowering their weighted average cost of capital, diversifying their funding sources and managing credit ratings. Though terms and conditions have become increasingly standardised, the specific characteristics of each instrument (such as payment conditions, the ratio of debt and equity-like features, time frames and applicable rates) can vary.

Hybrid capital ranks senior only to common equity. Consequently, the recovery rate for hybrid securities in the event of an issuer's liquidation or similar financial stress will be significantly lower than that of senior capital (i.e. like all other debt-related securities in the issuer's capital structure). The instruments are issued with the premise of being called on the first call date but the final maturity is typically long dated. In addition, corporate hybrid securities typically permit an issuer to defer the payment of interest for a specified period of time (in many cases, a period of five years or more) without triggering an event of default.

The Portfolio may also invest in other fixed income securities, both investment grade and sub-investment grade that have been rated by a Recognised Rating Agency, including:

- Both fixed and floating rate debt securities, including bonds, issued by governments, government related and corporate entities from OECD countries denominated in local currencies;
- Corporate bonds, debentures and notes (including freely transferable and unleveraged structured notes and freely transferable promissory notes).

The Portfolio will not invest in contingent convertible bonds.

The Portfolio may also invest in other debt securities (including without limitation commercial paper, certificates of deposit, bankers acceptances, floating rate/variable rate notes and bonds) which are rated as investment grade by a Recognised Rating Agency.

Money Market Instruments. These securities may include bank deposits, fixed or floating rate instruments (including commercial paper), debentures and short-dated government or corporate bonds, cash and cash equivalents (including treasury bills) that are rated as investment grade or below by Recognised Rating Agencies or are unrated.

Investment grade securities are highly rated securities, generally those rated Baa3, BBB- or above by one or more Recognised Rating Agencies, while high yield securities are medium or lower rated securities, generally those rated below investment grade and sometimes referred to as “junk bonds”.

Financial Derivative Instruments (“FDIs”). Subject to the conditions and limits imposed by the Central Bank as set out in the Prospectus and this Supplement, the Portfolio may use the following FDI for hedging, efficient portfolio management and/or other investment purposes:

- Swaps may include currency swaps, interest rate swaps, total return swaps and swaps on UCITS eligible indices (in respect of each of the other types of assets in which the Portfolio may invest, as described in this “*Instruments / Asset Classes*” section) to hedge existing long positions. The maximum proportion of the Portfolio’s Net Asset Value that can be subject to total return swaps is 10%. The expected proportion of the Portfolio’s Net Asset Value that will be subject to total return swaps is 0%. The expected proportions are not limits and the actual percentages may vary over time depending on factors including, but not limited to, market conditions;
- Forward and non-deliverable forward currency contracts may be used to achieve a profit as well as to hedge existing long currency exposures; and
- Future contracts on fixed income securities, UCITS eligible bond indices and interest rates may be used to hedge existing long positions.

As the Portfolio may purchase FDI generally using only a fraction of the assets that would be needed to purchase the relevant securities directly, the remainder of the Portfolio’s assets may be invested in the other types of securities listed above. The Sub-Investment Manager may therefore seek to achieve greater returns by purchasing derivative instruments and investing the remaining assets in such other securities to add excess return.

The Portfolio may be leveraged as a result of its investments in FDI but such leverage will not exceed 100% of the Portfolio’s Net Asset Value, as measured using the Commitment Approach, at any time.

Collective Investment Schemes. The Portfolio may invest in underlying funds which are themselves exposed to investments that are similar to the Portfolio’s other investments, provided that the Portfolio may not invest more than 10% of its Net Asset Value in underlying funds (including ETFs which are structured as collective investment schemes) which themselves invest in other collective investment schemes. Such underlying funds may or may not be managed by the Manager and/or the Sub-Investment Manager or their affiliates and will comply with the requirements of the UCITS Regulations in respect of such investments.

The underlying funds in which the Portfolio may invest will be eligible collective investment schemes in accordance with the Central Bank’s requirements, which may be domiciled in Relevant Jurisdictions or the United States of America and will qualify as UCITS or alternative investment fund schemes and will be regulated as such by their home state regulator.

- Underlying funds in which the Portfolio invests may be leveraged but such collective investment schemes will not generally be leveraged: (i) in excess of
-

100% of their net asset value; or (ii) so that their 1 day absolute VaR exceeds 4.47% of their net asset value over a 250 day horizon with a 99% confidence level; or (iii) so that their 1 month relative VaR exceeds twice the VaR of a comparable benchmark portfolio over a 250 day horizon with a 99% confidence level, depending on how such underlying funds measure their global exposure; and

- ETFs are investment funds whose units may be bought and sold on a securities exchange. ETFs typically invest in a portfolio of securities that is designed to track the performance of particular market segment or index. The ETFs will be located in a Relevant Jurisdiction and will be authorised under the UCITS Directive or will be alternative investment funds which are eligible for investment by the Portfolio in accordance with the requirements of the Central Bank. The ETFs will represent investments that are similar to the Portfolio's other investments. The ETFs will operate on the principle of risk spreading and will not be leveraged.

Repo Contracts and Securities Lending Agreements. Repo Contracts and Securities Lending Agreements may be used subject to the conditions and limits set out in the Prospectus.

Bond Connect

The PBoC and the HKMA have approved the CFETS, CCDC, SHCH, together with Hong Kong Exchanges and Clearing Limited and CMU to launch Bond Connect, which is a mutual bond market access programme between Mainland China and Hong Kong. Bond Connect allows investors to trade electronically between the Mainland China and Hong Kong bond markets without quota restrictions and requirements to identify the ultimate investment amount.

Currently, Bond Connect comprises a Northbound Trading Link between CFETS, the operator of the CIBM and offshore trading access platforms recognised by the PBoC, to facilitate investment by Hong Kong and overseas investors (including the Portfolio) in eligible bonds traded on the CIBM. A Southbound Trading Link, facilitating investment in overseas bond markets by Mainland Chinese investors is still under development but is intended to form part of Bond Connect once established.

Eligible Securities

Hong Kong and overseas investors (including the Portfolio) will be able to trade over the entire range of instruments traded on the CIBM, including products on both the secondary and primary markets.

Trading Day

Northbound investors (including the Portfolio) are able to trade through Bond Connect on days upon which the CIBM is open to trade, regardless of whether they are a public holiday in Hong Kong.

Settlement and Custody

Settlement and custody of Northbound bond trades under Bond Connect will be implemented under the link between the CMU of the HKMA and Mainland China's two bond settlement systems, namely, CCDC and SHCH. The CMU settles Northbound trades and holds the CIBM bonds on behalf of its members in nominee accounts with each of CCDC and SHCH. CCDC and SHCH provide services to foreign investors, directly and indirectly, using Bond Connect.

Bonds purchased by Hong Kong and overseas investors (including the Portfolio) are recorded in an omnibus nominee account at CCDC and SHCH in the name of CMU. The CMU itself maintains the bonds in segregated sub-accounts of its members, who in turn may hold the bonds on their own account or on behalf of other investors or custodians. Accordingly, bonds purchased by Hong Kong and overseas purchasers through Bond Connect are held by the purchaser's global or local custodian in a segregated sub-account opened in their name at the CMU.

Currency

Hong Kong and overseas investors may trade through Bond Connect using offshore RMB (CNH) or by converting foreign currencies into onshore RMB (CNY) under Bond Connect.

Where an investor uses foreign currencies to invest through the Northbound Trading Link, it must open a segregated RMB capital account with an eligible RMB settlement Bank in Hong Kong to convert its foreign currencies into CNY. Where bonds are purchased in CNY in this manner, upon sale of the bonds, the sale proceeds remitted out of Mainland China must be converted back into the relevant foreign currencies.

Further information about Bond Connect is available at:

<http://www.chinabondconnect.com/en/index.htm>

Investment Restrictions

- Under normal market conditions, it is the intention of the Sub-Investment Manager to invest at least 50% of the Portfolio's Net Asset Value in Investment Grade corporate hybrid securities, although the Portfolio has the flexibility to invest in excess of 30% of its Net Asset Value in sub-investment grade securities, provided that under no circumstances with the Portfolio invest in securities which are rated below B- or equivalent by a Recognised Rating Agency.
- The Portfolio will not invest in securities that are issued or guaranteed by a single sovereign issuer that are below investment grade.
- The Portfolio will not invest in issuers from Emerging Market Countries.
- Investors should note that the Portfolio will comply with the VAG Requirements as described under "VAG Requirements" in the "Investment Restrictions" section of the Prospectus, provided these VAG requirements are stricter than the investment restrictions applying to the Portfolio contained in this Supplement.
- The Portfolio will not utilise margin lending.

Risk

- Investment in the Portfolio carries certain risks which are described in greater detail in the "Investment Risks" section of the Prospectus. While investors should read and consider the entire "Investment Risks" section of the Prospectus, the risks summarised in the following sections, namely, "Market Risks: Risks relating to Debt Securities", "Risks Associated with Investment in the China Interbank Bond Market through Bond Connect" and "Concentration Risk", which is contained within the "Market Risks" section, are particularly relevant to this Portfolio. **These risks are not purported to be exhaustive and potential investors should review this Supplement and the Prospectus in their entirety and consult with their professional advisers, before making an application for Shares.**
- Investors should refer to the Company's risk management policy with respect to the use of FDI contained in the RMP Statement.

Corporate hybrid securities are complex instruments that involve a range of special risks, including but not limited to, the following:

- **Coupon Deferral Risk:** payments on coupons can be deferred at the discretion of the issuing company. Such an event does not trigger a default. These deferred coupons can be non-cumulative or cumulative, depending on the structure of the particular security (although the Sub-Investment Manager expects to invest primarily in corporate hybrids that are cumulative). As a result of the coupon deferral feature of corporate hybrid securities, the market price for such securities may be more (i) volatile and (ii) sensitive generally to adverse changes in the financial condition of the issuer of such corporate hybrid securities, in each case than the market prices of other debt securities on which original issue discount or interest payments are not subject to such deferrals.
 - **Extension Risk:** Securities can be redeemed on specified dates at the option of the issuer, meaning the investors are exposed to potential non-call risk. Hybrids are generally issued on the premise that they will be called by the issuer (i.e. the issuer will buy back the hybrid instrument from the investor at their first call date). The main aim is that the hybrid is called under a non-stressed situation but remains in place (to absorb any losses) under a stressed situation. In addition, certain corporate hybrid securities may have no specified maturity date, which
-

means the Portfolio will not be able to call for the redemption of any such securities. Accordingly, the Portfolio may be required to bear the financial risks of an investment in such securities for an indefinite or indeterminate period of time: there is uncertainty as to when (if ever) the Portfolio will receive repayment of the principal amount of such securities.

- **Early Redemption Risk:** most hybrids have a contractual clause that enables the issuing company to redeem the security prior to maturity under specified circumstances (changes in accounting treatment, rating agency methodology, taxation etc). As a result, early redemption by the issuer is likely whenever its cost of borrowing is lower than the interest rate on the corporate hybrid security it issued. At such times, the Portfolio may be unable to reinvest the redemption proceeds at an effective interest rate as high as the interest rate on the corporate hybrid securities subject to redemption and may only be able to do so at a significantly lower rate of return.
- **Subordination:** in the event of bankruptcy, holders of senior bonds will have first claim on the issuer's assets. Consequently, the recovery rate for hybrids will be significantly lower than that for senior bonds in such situations and could cause the Portfolio to lose all or a portion of its original investment. Hybrid capital ranks senior only to common equity. Corporate hybrid securities generally do not include protective financial covenants and issuers of corporate hybrid securities generally are not restricted from subsequently issuing debt or incurring liabilities that are senior in rank or have an equivalent rank to the corporate hybrid securities.
- **Liquidity and Market Characteristics:** in some circumstances, corporate hybrid securities may be relatively illiquid, making it difficult to acquire or dispose of them at the prices quoted on the various exchanges. Accordingly, the Portfolio's ability to respond to market movements may be impaired and the Portfolio may experience adverse price movements upon liquidation of its investments.
- The Sub-Investment Manager will use forward currency contracts in order to hedge currency risk on a discretionary basis.

Environmental, Social and Governance ("ESG")

This Portfolio meets the classification of an Article 8 Portfolio as it promotes environmental and social characteristics and limits investments to companies that follow good governance practices.

Please also refer to Annex VI of the Prospectus which contains additional information on the ESG characteristics that are applicable to this Portfolio.

Typical Investor Profile

Investment in the Portfolio may be suitable for investors who are prepared to accept the risks of the subordinated bond market over the medium to long term, together with the level of volatility generally associated with high yield fixed income funds.

Fees and Expenses

Category	Maximum Initial Charge	Maximum Management fee	Distribution Fee
A, X, Y	5.00%	1.20%	0.00%
B, C1, C2, E	0.00%	1.80%	1.00%
C	0.00%	0.80%	1.00%
D, I, I2, I3, I4, I5	0.00%	0.60%	0.00%
M	2.00%	1.20%	0.60%
P	5.00%	0.57%	0.00%
T	5.00%	1.80%	0.00%
U	3.00%	0.90%	0.00%
Z	0.00%	0.00%	0.00%

For details of the Administration Fees payable by the Portfolio, please see the “*Administration Fees*” heading in the “*Fees and Expenses*” section of the Prospectus.

Contingent deferred sales charges

Contingent deferred sales charges will be payable in respect of the following Classes at the rates specified below, depending on the period that has elapsed since the issue of the Shares being redeemed and will be charged on the lower of the Net Asset Value per Share on the relevant Dealing Day in respect of which the relevant Shares were (i) initially subscribed or (ii) redeemed. Any such contingent deferred sales charges will be paid to the relevant Distributor, the Manager or to the Sub-Investment Manager.

Class	Redemption Period in Calendar Days				
	< 365	365 - 729	730 - 1094	1095 – 1459	> 1459
B	4%	3%	2%	1%	0%
C, C1	1%	0%	0%	0%	0%
C2	2%	1%	0%	0%	0%
E	3%	2%	1%	0%	0%

For further information on fees, please refer to the “Fees and Expenses” section of the Prospectus.

Neuberger Berman Global Opportunistic Bond Fund

An investment in the Portfolio should not constitute a substantial proportion of an investment portfolio and may not be appropriate for all investors. An investment in the Portfolio is not in the nature of a deposit in a bank account and is not protected by any government, government agency or other guarantee scheme which may be available to protect the holder of a bank deposit account. The value of Shares may go down as well as up and investors may not get back any of the amount invested.

Investment Objective Achieve an attractive level of total return (income plus capital appreciation) by opportunistically investing in a diversified mix of fixed rate and floating rate debt securities globally under varying market environments with a focus on downside protection.

Investment Approach The Portfolio will invest in debt securities and money market instruments issued by governments and their agencies and corporations worldwide. Securities will be listed, dealt or traded on Recognised Markets globally without any particular focus on any one industrial sector. Securities may be rated investment grade or below by a Recognised Rating Agency. On an ancillary basis, the Portfolio may hold preferred stocks issued by public or corporate issuers. In light of the preferential nature of the dividends payable in respect of preferred stocks, the Manager and the Sub-Investment Manager consider certain preferred stocks to be hybrid debt securities (ie, securities that combine two or more different financial instruments, generally both debt and equity characteristics).

The Manager and the Sub-Investment Manager will employ a flexible investment approach that tactically allocates, either directly or indirectly through the use of FDI, among fixed income sectors (such as treasury security, global sovereign bond, inflation protected security/linked bond, agency-issued or investment grade and non-investment grade corporate bond) to adapt to changing market conditions. The Manager and the Sub-Investment Manager use a fundamentally driven investment process ie, comparing key fundamental measures specific to each fixed income sector (such as leverage or the expected default rate for investment grade and high yield corporate credit sectors or expected inflation in the case of inflation-linked debt securities) and the resulting valuation on a fixed income sector level to prevailing market pricing, allowing the manager to assess the attractiveness of the respective fixed income sectors relative to one another. This investment process is backed by a further suite of quantitative tools, all of which are proprietary to the Manager, used for asset allocation and security selection, such as "The Torpedo Monitor", which is a credit monitoring model that seeks to provide early warnings about potentially deteriorating investment grade credit situations from pricing information provided by listed equity markets. Expected returns and a confidence level of the return expectation are projected for each sector, in order to determine how to allocate the Portfolio's assets across sectors.

Within each sector, screening is then used to formulate a "buy" and a "sell" list of opportunities. The Manager and the Sub-Investment Manager will conduct credit analysis on the issuers of the selected securities, which will focus on cash generation, cash flow predictability and event risk analysis (relating to the likely occurrence of certain events, such as a bond issuer missing a coupon payment or suffering a rating downgrade), as well as monitoring traditional credit statistics (including leverage, interest coverage or free cash flow generation). Issuers that the Manager and/or the Sub-Investment Manager determine are the best prospects for purchase are subjected to further rigorous and thorough business and financial analysis including, for example, an assessment of the competitive position of the issuer relative to its peers and its pricing power (ie, its ability to raise prices over time), an assessment of the issuer's liquidity or a stress test of the issuer's financial statements with respect to unfavourable business conditions. This analysis will be used to form the basis of an investment opinion.

As part of the above process, the Manager and/or the Sub-Investment Manager will evaluate the duration of the fixed income securities (i.e. the measure of how sensitive a security's value is to interest rate movements) in which the Portfolio will invest. Interest rate levels across yield curves are evaluated through an economic analysis, including the use of the Manager's proprietary valuation tools for assessing

the level of available real rates (i.e. the rate of interest before allowing for inflation) and inflation expectations and the forecast of the direction of overnight rates.

Positive or negative views may be expressed through the use of FDI. For example, should the Manager and/or the Sub-Investment Manager deem US corporate credit spread (i.e. the difference in yield between a US Treasury bond and a debt security with the same maturity but of lesser quality) to be undervalued, they could take advantage of this by purchasing corporate debt securities and removing the duration risk of the position by taking duration-matched short positions in US treasury futures contracts.

Central to the investment philosophy is the Manager's and the Sub-Investment Manager's judgment, which is exercised at all stages of the investment process. This discretion enables them to take into account information and events that may not be readily quantifiable, for example political events, shifts in regulatory regimes or the effects of market positioning and hedging.

In order to manage the Portfolio's currency exposures resulting from its investment in debt securities worldwide and for investment purposes, the Manager and/or the Sub-Investment Manager may take long and/or synthetic short positions in currencies, through the use of FDI, based on a fundamentally driven, relative value approach (i.e. an approach that seeks to exploit perceived under or over valuation of assets) which is supported by a framework of indicators that the Manager and the Sub-Investment Manager use to assess relative value among currencies. The Portfolio will invest primarily in global liquid currencies (including, without limitation, Australian Dollars, Canadian Dollars, Swiss Franc, Euro, Sterling, Japanese Yen, Norwegian Krone, New Zealand Dollars, Swedish Krona and US Dollars). The four-stage investment approach of the currency strategy is discretionary in nature and is designed to achieve a diversified, highly liquid portfolio and may, depending on prevailing market conditions, combine fundamental analysis with a more quantitative approach, designed to consider a number of factors, such as opportunity for growth of a particular market, the stability of its currency, monetary policy, capital flows and the risks associated with investment in that particular currency over the short, medium and long term. Stage one of the process is the construction of the Portfolio and this includes stage two, which is the analysis of fundamental factors that may, on a discretionary basis, include such variables as opportunities for growth, currency stability, yield, monetary policy, capital flows and risk characteristics, over short-, medium- and long-term investment horizons. Following the analysis and portfolio construction stages, stages three and four of the investment process are trade implementation and risk management, conducted on a pre-trade, post-trade and ongoing basis. The Portfolio may take positions in currencies representing either a long or, using FDI, short exposure to the currency with respect to the Base Currency. The Manager and the Sub-Investment Manager believe that the ability to manage the Portfolio's currency exposures actively is a significant factor in the management of the risks associated with the Portfolio's investments, in the context of its investment objective.

The portfolio construction process measures and manages the Portfolio's overall risk profile on an on-going basis to seek to achieve the Portfolio's investment objective.

The Portfolio may opportunistically invest up to 10% of its Net Asset Value in participation interests in floating or adjustable rate senior secured loans, which are securitised and freely transferable, and which meet the regulatory criteria to be considered money market instruments.

The Portfolio may have or may be expected to have medium to high volatility due to its investment policies or portfolio management techniques.

Under normal market conditions, the Manager anticipates that the Portfolio's average interest rate duration will be within a range of +2 to +8 years.

The Portfolio is actively managed and does not intend to track the Benchmark and is not constrained by it. The Benchmark is included here for performance comparison purposes only. The Portfolio gives some consideration to the Benchmark constituents in the selection of securities and may not hold all or many of the Benchmark's components.

Benchmark	<p>Bloomberg Global Aggregate Index (Total Return, USD Hedged).</p> <p>Shareholders in a Class which is denominated in a currency other than the Base Currency should note that, where available, it may be more meaningful to compare the performance of such Class against a version of this index which is denominated in the relevant Class currency.</p>

These securities may include:</p> <ul style="list-style-type: none"> • Both fixed and floating rate debt securities, including bonds, issued by governments and their agencies and corporations worldwide denominated in local currencies; • Corporate bonds, debentures and notes (including contingent convertible bonds (ie, bonds which convert into a stock at a predetermined price and / or when certain capital conditions are met) and freely transferable promissory notes); • Privately issued mortgage-backed securities, asset-backed securities, structured securities (including mortgage-backed securities such as pass-through certificates, which entitle the holders thereof to receive mortgage payments, CDOs and interest and principal only components of mortgage-backed securities and collateralised loan obligations with respect to mezzanine floating rate debt) that derive interest and principal payments from specified assets (including residential and commercial mortgages, credit card debt and pools of other kinds of receivables, such as car or consumer loans, royalties or other earnings); • Collateralised mortgage obligations, payment-in-kind bonds (which are bonds that pay interest in the form of additional bonds of the same kind); • Deferred payment securities (securities which pay regular interest after a predetermined date such as corporate bonds with deferred interest payment or certain pay-in-kind corporate bonds ie, bonds which pay investors in the form of additional securities) and zero coupon securities <p>Money Market Instruments. These securities may include bank deposits, fixed or floating rate instruments (including commercial paper), floating or variable rate notes, bankers acceptances, certificates of deposit, debentures and short-dated government or corporate bonds, participation interests in loans (which are securitised and freely transferable), cash and cash equivalents (including treasury bills), in each case that are rated as investment grade or below by Recognised Rating Agencies or are unrated.</p> <p>Investment grade securities are highly rated securities, generally those rated Baa3, BBB- or above by one or more Recognised Rating Agencies, while high yield securities are medium or lower rated securities, generally those rated below investment grade and sometimes referred to as "junk bonds".</p> <p>Collective Investment Schemes. The Portfolio may invest in underlying funds which are themselves exposed to investments that are similar to the Portfolio's other investments, provided that the Portfolio may not invest more than 10% in underlying funds (including ETFs which are structured as collective investment schemes) which themselves invest in other collective investment schemes. Such underlying funds may or may not be managed by the Manager or its affiliates and will comply with the requirements of the UCITS Regulations in respect of such investments.</p> <p>The underlying funds in which the Portfolio may invest will be eligible collective investment schemes in accordance with the Central Bank's requirements, which may be domiciled in a Relevant Jurisdiction and will qualify as UCITS or alternative investment fund schemes and will be regulated as such by their home state regulator.</p>

Underlying funds in which the Portfolio invests may be leveraged but such collective investment schemes will not generally be leveraged: (i) in excess of 100% of their net asset value; or (ii) so that their 1 day absolute VaR exceeds 4.47% of their net asset value over a 250 day horizon with a 99% confidence level; or (iii) so that their 1 month relative VaR exceeds twice the VaR of a comparable benchmark portfolio over a 250 day horizon with a 99% confidence level, depending on how such underlying funds measure their global exposure.

ETFs are investment funds whose units may be bought and sold on a securities exchange. ETFs typically invest in a portfolio of securities that is designed to track the performance of particular market segment or index. The ETFs will be located in a Relevant Jurisdiction and will be authorised under the UCITS Directive or will be alternative investment funds which are eligible for investment by the Portfolio in accordance with the requirements of the Central Bank. The ETFs will represent investments that are similar to the Portfolio's other investments. The ETFs will operate on the principle of risk spreading and will not be leveraged.

Financial Derivative Instruments ("FDIs"). Subject to the conditions and limits imposed by the Central Bank as set out in the Prospectus and this Supplement, the Portfolio may use the following FDI for hedging, efficient portfolio management and/or investment purposes and subject to the conditions and limits imposed by the Central Bank as set out in the Prospectus and this Supplement:

- Swaps may include currency, interest rate, index, volatility, variance, credit default and total return swaps (each in respect of each of the other types of assets in which the Portfolio may invest, as described in this "*Instruments / Asset Classes*" section) and may be used to achieve a profit as well as to hedge existing long positions and exposures. The maximum proportion of the Portfolio's Net Asset Value that can be subject to total return swaps is 30%. The expected proportion of the Portfolio's Net Asset Value that will be subject to total return swaps is 5%. The expected proportions are not limits and the actual percentages may vary over time depending on factors including, but not limited to, market conditions;
- Options on fixed income securities, UCITS eligible bond indices and currencies may be used to achieve a profit as well as to hedge existing long positions and exposures;
- Future contracts based on interest rates, UCITS eligible bond indices, equity-linked securities (a hybrid debt instrument that is linked to the equity markets, such as an equity index-linked note (an instrument whose return is determined by the performance of an equity index)), and currencies may be used to achieve a profit as well as to hedge existing long positions and exposures;
- Forwards on fixed income securities may be used to achieve a profit as well as to hedge existing long positions and exposures; and
- Forward contracts and non-deliverable forward currency contracts may be used to achieve a profit as well as to hedge existing long currency exposures.

Volatility swaps are OTC FDI under which one party will agree to pay the other a return based on the volatility of an underlying asset and the other party agrees to pay the first party a fee, either periodically or upfront on entry into the swap. Volatility is defined as a statistical measure of the dispersion of returns for a given security or market index. As such the underlying of the swap is the volatility of a given asset and they allow an investor to speculate solely upon the movement of the asset's volatility without the influence of its price.

A variance swap is a contract which allows an investor to trade the realised volatility of an underlying asset (e.g. a fixed income index) against the implied volatility of that underlying asset. Variance is defined as a statistical measure of the dispersion of a set of returns around their mean value. Under the terms of a typical variance swap, parties agree to exchange, at maturity, a pre-agreed notional amount multiplied by the difference between the realised variance of a fixed income index over the lifetime of the variance swap and a pre-determined reference level. Realised variance is the mathematical square of realised volatility, i.e. if the realised volatility of the index is 5%, its realised variance will be 25%. The reference level of a variance swap is determined at the inception of the swap by reference to the implied

volatility of the relevant fixed income index. The seller of the variance swap (who is said to have a short variance position) will benefit when realised volatility is lower than the reference level over the period of the swap, in which case the buyer of the variance swap would suffer a loss. Conversely, the buyer of the variance swap (who is said to have a long variance position) will benefit when realised volatility is higher than the reference level, in which case the seller of the variance swap would suffer a loss. Realised volatility is a backward-looking measure of the amount by which the returns of an asset actually varied over a time period and is calculated by reference to the previous day's returns of that asset. Implied volatility is a forward-looking measure, which represents the market's expectation of the future volatility of a particular asset over a particular period.

Swaps, options, futures and forwards may each be used to generate synthetic short positions for investment, hedging or efficient portfolio management purposes in respect of securities which the Manager and/or the Sub-Investment Manager expects to decrease in value. Hedging via futures contracts may involve holding a position in corporate bonds and reducing the duration risk of such a position by taking an offsetting short position in the relevant treasury futures contracts so that such hedge would be expected to add value to the Portfolio should interest rates rise, offsetting any depreciation of the corporate bonds in such a scenario. Hedging through option contracts may involve reducing a long duration position by purchasing long put options on relevant treasury futures which would be expected to appreciate in value should interest rates rise. Hedging via forward transaction may involve reducing currency risk from holdings of foreign currency denominated cash securities and hedging their returns back into the base currency by entering into OTC foreign exchange forward transactions in the offsetting currency pair such that the appreciation or depreciation in the hedging forward contracts would offset any losses or gains in the underlying investments caused by fluctuations in the exchange rate between the foreign currency and the base currency.

As the Portfolio may purchase FDI generally using only a fraction of the assets that would be needed to purchase the relevant securities directly, the remainder of the assets allocated to the Manager and/or the Sub-Investment Manager may be invested in the other types of securities listed in the "Instruments/Asset Classes" section above. The Manager and/or the Sub-Investment Manager may therefore seek to achieve greater returns by purchasing derivative instruments and investing the remaining assets in such other securities to add excess return.

The counterparties to OTC FDI entered into in respect of the Portfolio will be entities (which will not be related to the Manager or its delegates) with legal personality which may be located globally. They will be subject to ongoing supervision by a public authority, be rated at or in excess of the requirements of the Central Bank by a Recognised Rating Agency and have the necessary organisational structure and resources for the relevant type of transaction.

Equities. On an ancillary basis, the Portfolio may invest in preferred stocks issued by public and private issuers.

Repo Contracts and Securities Lending Agreements. Repo Contracts and Securities Lending Agreements may be used subject to the conditions and limits set out in the Prospectus.

Bond Connect

The PBoC and the HKMA have approved the CFETS, CCDC, SHCH, together with Hong Kong Exchanges and Clearing Limited and CMU to launch Bond Connect, which is a mutual bond market access programme between Mainland China and Hong Kong. Bond Connect allows investors to trade electronically between the Mainland China and Hong Kong bond markets without quota restrictions and requirements to identify the ultimate investment amount.

Currently, Bond Connect comprises a Northbound Trading Link between CFETS, the operator of the CIBM and offshore trading access platforms recognised by the PBoC, to facilitate investment by Hong Kong and overseas investors (including the Portfolio) in eligible bonds traded on the CIBM. A Southbound Trading Link, facilitating investment in overseas bond markets by Mainland Chinese investors is

still under development but is intended to form part of Bond Connect once established.

Eligible Securities

Hong Kong and overseas investors (including the Portfolio) will be able to trade over the entire range of instruments traded on the CIBM, including products on both the secondary and primary markets.

Trading Day

Northbound investors (including the Portfolio) are able to trade through Bond Connect on days upon which the CIBM is open to trade, regardless of whether they are a public holiday in Hong Kong.

Settlement and Custody

Settlement and custody of Northbound bond trades under Bond Connect will be implemented under the link between the CMU of the HKMA and Mainland China's two bond settlement systems, namely, CCDC and SHCH. The CMU settles Northbound trades and holds the CIBM bonds on behalf of its members in nominee accounts with each of CCDC and SHCH. CCDC and SHCH provide services to foreign investors, directly and indirectly, using Bond Connect.

Bonds purchased by Hong Kong and overseas investors (including the Portfolio) are recorded in an omnibus nominee account at CCDC and SHCH in the name of CMU. The CMU itself maintains the bonds in segregated sub-accounts of its members, who in turn may hold the bonds on their own account or on behalf of other investors or custodians. Accordingly, bonds purchased by Hong Kong and overseas purchasers through Bond Connect are held by the purchaser's global or local custodian in a segregated sub-account opened in their name at the CMU.

Currency

Hong Kong and overseas investors may trade through Bond Connect using offshore RMB (CNH) or by converting foreign currencies into onshore RMB (CNY) under Bond Connect.

Where an investor uses foreign currencies to invest through the Northbound Trading Link, it must open a segregated RMB capital account with an eligible RMB settlement Bank in Hong Kong to convert its foreign currencies into CNY. Where bonds are purchased in CNY in this manner, upon sale of the bonds, the sale proceeds remitted out of Mainland China must be converted back into the relevant foreign currencies.

Further information about Bond Connect is available at:

<http://www.chinabondconnect.com/en/index.htm>

Investment Restrictions

The Portfolio will not utilise margin lending.

Risk

- Investment in the Portfolio carries certain risks which are described in greater detail in the "Investment Risks" section of the Prospectus. While investors should read and consider the entire "Investment Risks" section of the Prospectus, the risks summarised in the following sections, namely, "Market Risks: Risks relating to Debt Securities", "Risks Associated with Investment in the China Interbank Bond Market through Bond Connect" and "Risks related to Financial Derivative Instruments" are particularly relevant to this Portfolio. **These risks are not purported to be exhaustive and potential investors should review this Supplement and the Prospectus in their entirety and consult with their professional advisers, before making an application for Shares.**
- Investors should refer to the Company's risk management policy with respect to the use of FDI contained in the RMP Statement.

- The Portfolio may be leveraged up to approximately 550% of its Net Asset Value as a result of its use of FDI, although investors should note that higher levels of leverage may be experienced in certain circumstances, such as, for example, in times of increased volatility, during which the Manager and/or the Sub-Investment Manager may want to make offsetting trades to seek to manage the risks associated with existing trades. This leverage figure will be calculated using the Sum of the Notionals of the derivatives used, as required by the Central Bank. Using this methodology does not reflect any netting or hedging that the Portfolio may have in place. The Portfolio's global exposure is subject to an advanced risk management process which, in compliance with the UCITS Regulations, aims to ensure that on any day the Absolute VaR of the Portfolio will be no greater than 4.47% of its Net Asset Value. The VaR of the Portfolio is a daily estimation of the maximum loss which the Portfolio may incur over a one day holding period and is arrived at through quantitative simulations with a 99% one tailed confidence interval and using a historical observation period of at least 250 business days. This process is described in detail in the statement of risk management procedures of the Company and its appendix in respect of the Portfolio. While the Portfolio measures and monitors its global exposure using the VaR approach, rather than by use of the Commitment Approach, the leverage of the Portfolio using the Commitment Approach is expected to be 250% of its Net Asset Value as a result of its use of FDI, although investors should note that higher levels of leverage may be experienced.
- The Portfolio may invest up to 50% of its Net Asset Value in securities issued by companies located in, and governments of, Emerging Market Countries, which may involve additional risk, relative to investment in more developed economies.
- The Portfolio may take selective synthetic long or synthetic short positions in each of the asset classes listed above and the investment strategies are expected to involve leverage as a result of the use of FDI for investment, efficient portfolio management and hedging purposes as outlined above. The Portfolio's net market exposure may vary in time and range from a maximum net long position of 200% to a maximum net short position of 0% of the Net Asset Value of the Portfolio.
- The Manager and/or the Sub-Investment Manager may use forward and future currency contracts in order to hedge currency risk, for efficient portfolio management and/or for investment purposes, in each case on a discretionary basis. The use of such hedging techniques may increase the risk profile of the Portfolio.

Environmental, Social and Governance (“ESG”)

This Portfolio meets the classification of an Article 8 Portfolio as it promotes environmental and social characteristics and limits investments to companies that follow good governance practices.

Please also refer to Annex VI of the Prospectus which contains additional information on the ESG characteristics that are applicable to this Portfolio.

Typical Investor Profile

Investment in the Portfolio may be suitable for investors who are prepared to accept the risks of the global bond market over the medium to long term, together with medium to high levels of volatility given the ability of the Portfolio to invest in securities of Emerging Market Countries and/or below investment grade securities.

Fees and Expenses

Category	Maximum Initial Charge	Maximum Management fee	Distribution Fee
A, X, Y	5.00%	0.80%	0.00%
B, C1, C2, E	0.00%	1.40%	1.00%
C	0.00%	0.50%	1.00%
D, I, I2, I3, I4, I5	0.00%	0.40%	0.00%
M	2.00%	0.80%	0.60%
P	5.00%	0.38%	0.00%
T	5.00%	1.40%	0.00%
U	3.00%	0.60%	0.00%
Z	0.00%	0.00%	0.00%

For details of the Administration Fees payable by the Portfolio, please see the “Administration Fees” heading in the “Fees and Expenses” section of the Prospectus.

Contingent deferred sales charges

Contingent deferred sales charges will be payable in respect of the following Classes at the rates specified below, depending on the period that has elapsed since the issue of the Shares being redeemed and will be charged on the lower of the Net Asset Value per Share on the relevant Dealing Day in respect of which the relevant Shares were (i) initially subscribed or (ii) redeemed. Any such contingent deferred sales charges will be paid to the relevant Distributor, the Manager or to the Sub-Investment Manager.

Class	Redemption Period in Calendar Days				
	< 365	365 - 730	730 - 1095	1095 – 1460	> 1460
B	4%	3%	2%	1%	0%
C, C1	1%	0%	0%	0%	0%
C2	2%	1%	0%	0%	0%
E	3%	2%	1%	0%	0%

For further information on fees, please refer to the “Fees and Expenses” section of the Prospectus.

Neuberger Berman Global Flexible Credit Fund

An investment in the Portfolio should not constitute a substantial proportion of an investment portfolio and may not be appropriate for all investors. The difference at any one time between the issue and repurchase price of Shares in the Portfolio means that the investment should be viewed as medium to long term. An investment in the Portfolio is not in the nature of a deposit in a bank account and is not protected by any government, government agency or other guarantee scheme which may be available to protect the holder of a bank deposit account. The value of Shares may go down as well as up and investors may not get back any of the amount invested.

Investment Objective	To seek to maximise total return from current income and long-term capital appreciation by investing in a diversified mix of global fixed rate and floating rate debt securities, including high income securities.
Investment Approach	<p>The Portfolio seeks to achieve its investment objective primarily by investing in debt securities and money market instruments, including through the use of FDI, issued by governments and their agencies and corporations worldwide including within Emerging Markets. Securities will typically be dealt or traded on Recognised Markets globally without any particular focus on any one industrial sector. Securities may be rated investment grade or below by a Recognised Rating Agency.</p> <p>The Manager and the Sub-Investment Manager implement a disciplined investment process that is consistently applied across all fixed income sectors with an ongoing focus on identifying the most attractive investment opportunities in the fixed income market, building a well-diversified portfolio whilst minimising single credit issuer risk.</p> <p>In seeking to identify the most attractive fixed income sectors, the Manager and Sub-Investment Manager seek to evaluate research and sector valuations undertaken by speciality investment teams within the Manager and Sub-Investment Manager. The speciality teams formulate an investment view and project expected returns for the relevant sectors, based upon internal analysis, taking into consideration the impact of the team's macroeconomic outlook. The macroeconomic outlook is formulated by taking into account the expectations of interest rates, inflation expectations, market sentiment and geo-political issues amongst others. Securities are then selected by screening the universe of eligible securities within each sector to formulate a "buy" list of actionable opportunities by identifying the individual securities that exhibit the characteristics which the Manager and/or the Sub-Investment Manager consider attractive (eg, which are undervalued and higher yielding compared to other securities within the universe) and align with investment objective.</p> <p>The Manager and the Sub-Investment Manager will take a disciplined multi-sector investment approach by attempting to maintain a portfolio that is typically diversified across issuer type (corporate or sovereign), industry sectors, countries and maturities. The flexibility to allocate to different sectors of the global fixed income markets enables the Portfolio to attempt to position itself using the process described above to seek to achieve its investment objective.</p> <p>Under normal market conditions, the Manager anticipates that the Portfolio's average interest rate duration will be within a range of 2 to 5 years. The Portfolio is actively managed; no benchmark is used for performance comparison purposes or as a universe for selection.</p>
Benchmark	N/A.
Base Currency	US Dollars (USD).
Instruments / Asset Classes	The Portfolio will invest primarily in debt securities and money market instruments, issued by governments, government agencies and corporate issuers. The Portfolio can invest in or be exposed to the following types of assets.

Fixed Income Securities (debt securities). These securities may include:

- Both fixed and floating rate debt securities, including bonds, issued by US and non-US governments, government agencies and corporations worldwide denominated in local currencies;
- Corporate bonds, debentures and notes (freely transferable promissory notes);
- Contingent convertible bonds, subject to a limit of up to 10% of the Portfolio's Net Asset Value;
- Payment-in-kind bonds (which are bonds that pay interest in the form of additional bonds of the same kind);
- Participation interests in loans (which are securitised and freely transferable)
- Deferred payment securities (securities which pay regular interest after a predetermined date) and zero coupon securities;
- Debt securities of the types described above issued by issuers in Emerging Market Countries; and
- Collateralised loan obligations, subject to a limit of up to 10% of the Portfolio's Net Asset Value.

The Portfolio may invest up to 10% of its net assets in securities that are issued or guaranteed by a single sovereign issuer that are below investment grade.

Investment grade securities are highly rated securities, generally those rated Baa3, BBB- or above by one or more Recognised Rating Agencies, while high yield securities are medium or lower rated securities, generally those rated below investment grade and sometimes referred to as "junk bonds".

Money Market Instruments. These securities may include: bank deposits, fixed or floating rate instruments (including commercial paper), floating or variable rate notes, bankers acceptances, certificates of deposit, debentures and short-dated government or corporate bonds, cash and cash equivalents (including treasury bills) that are rated as investment grade by Recognised Rating Agencies.

Collective Investment Schemes. The Portfolio may invest in underlying funds which are themselves exposed to investments that are similar to the Portfolio's other investments, provided that the Portfolio may not invest more than 10% in underlying funds (including ETFs which are structured as collective investment schemes) which themselves invest in other collective investment schemes. Such underlying funds may or may not be managed by the Manager and/or Sub-Investment Manager or their affiliates and will comply with the requirements of the UCITS Regulations in respect of such investments.

- The underlying funds in which the Portfolio may invest will be eligible collective investment schemes in accordance with the Central Bank's requirements, which may be domiciled in the European Economic Area and will qualify as UCITS or alternative investment fund schemes and will be regulated as such by their home state regulator;
- Underlying funds in which the Portfolio invests may be leveraged but such collective investment schemes will not generally be leveraged: (i) in excess of 100% of their net asset value; or (ii) so that their 1 day absolute value-at-risk exceeds 4.47% of their net asset value over a 250 day horizon with a 99% confidence level; or (iii) so that their 1 month relative value-at-risk exceeds twice the value-at-risk of a comparable benchmark portfolio over a 250 day horizon with a 99% confidence level, depending on how such underlying funds measure their global exposure; and
- ETFs are investment funds whose units may be bought and sold on a securities exchange. ETFs typically invest in a portfolio of securities that is designed to track the performance of a particular market segment or index. The ETFs will be located in a Member State of the European Economic Area and will be authorised under the UCITS Directive or will be alternative investment funds which are eligible for investment by the Portfolio in accordance with the requirements of the Central Bank. The ETFs will represent investments that are similar to the Portfolio's other investments. The ETFs will operate on the principle of risk spreading and will not be leveraged.

Financial Derivative Instruments (“FDIs”) Subject to the conditions and limits imposed by the Central Bank as set out in the Prospectus and this Supplement, the Portfolio may use the following FDI for efficient portfolio management, investment purposes, and/or hedging. The following FDI may provide exposure to any or all of the asset classes listed above:

- Swaps may include currency swaps, interest rate swaps, fixed income swaps, credit default swaps, swaps on UCITS eligible indices and total return swaps and may be used to achieve a profit as well as to hedge existing long positions; foreign exchange swaps may be used to hedge existing long currency exposures. The maximum proportion of the Portfolio’s Net Asset Value that can be subject to total return swaps is 20%. The expected proportion of the Portfolio’s Net Asset Value that will be subject to total return swaps is 5%. The expected proportions are not limits and the actual percentages may vary over time depending on factors including, but not limited to, market conditions;
- Future contracts may be used to hedge or to gain exposure to an increase in the value of securities of currencies, interest rates, fixed income securities and UCITS eligible bond indices;
- Options on fixed income securities, futures, interest rates, UCITS eligible indices (including UCITS eligible bond indices) and equities may be used to achieve a profit as well as to hedge existing long positions;
- Swaptions on fixed income securities (including convertible bonds and convertible preferred stock), credit default swaps, interest rates and UCITS eligible indices, may be used to achieve a profit as well as to hedge existing long positions;
- Forwards on fixed income securities may be used to achieve a profit, through gaining exposure to an increase in the value of such securities as well as to hedge existing long currency exposures; and
- Forward currency contracts may be used to hedge existing long positions and exposures.

As the Portfolio may purchase FDI generally using only a fraction of the assets that would be needed to purchase the relevant securities directly, the remainder of the assets may be invested in the other types of securities listed above. The Manager and/or Sub-Investment Manager may therefore seek to achieve greater returns by taking exposure to the performance of such securities through purchasing FDI which give exposure to them rather than purchasing the securities themselves and investing the remaining assets in other such securities to add excess return.

The counterparties to OTC FDI entered into in respect of the Portfolio will be entities (which will not be related to the Manager or its delegates) with legal personality which may be located globally. They will be subject to ongoing supervision by a public authority, be rated at or in excess of the requirements of the Central Bank by a Recognised Rating Agency and have the necessary organisational structure and resources for the relevant type of transaction.

Repo Contracts and Securities Lending Agreements. Repo Contracts and Securities Lending Agreements may be used subject to the conditions and limits set out in the Prospectus.

Bond Connect

The PBoC and the HKMA have approved the CFETS, CCDC, SHCH, together with Hong Kong Exchanges and Clearing Limited and CMU to launch Bond Connect, which is a mutual bond market access programme between Mainland China and Hong Kong. Bond Connect allows investors to trade electronically between the Mainland China and Hong Kong bond markets without quota restrictions and requirements to identify the ultimate investment amount.

Currently, Bond Connect comprises a Northbound Trading Link between CFETS, the operator of the CIBM and offshore trading access platforms recognised by the PBoC, to facilitate investment by Hong Kong and overseas investors (including the Portfolio) in eligible bonds traded on the CIBM. A Southbound Trading Link, facilitating investment in overseas bond markets by Mainland Chinese investors is still under development but is intended to form part of Bond Connect once established.

Eligible Securities

Hong Kong and overseas investors (including the Portfolio) will be able to trade over the entire range of instruments traded on the CIBM, including products on both the secondary and primary markets.

Trading Day

Northbound investors (including the Portfolio) are able to trade through Bond Connect on days upon which the CIBM is open to trade, regardless of whether they are a public holiday in Hong Kong.

Settlement and Custody

Settlement and custody of Northbound bond trades under Bond Connect will be implemented under the link between the CMU of the HKMA and Mainland China's two bond settlement systems, namely, CCDC and SHCH. The CMU settles Northbound trades and holds the CIBM bonds on behalf of its members in nominee accounts with each of CCDC and SHCH. CCDC and SHCH provide services to foreign investors, directly and indirectly, using Bond Connect.

Bonds purchased by Hong Kong and overseas investors (including the Portfolio) are recorded in an omnibus nominee account at CCDC and SHCH in the name of CMU. The CMU itself maintains the bonds in segregated sub-accounts of its members, who in turn may hold the bonds on their own account or on behalf of other investors or custodians. Accordingly, bonds purchased by Hong Kong and overseas purchasers through Bond Connect are held by the purchaser's global or local custodian in a segregated sub-account opened in their name at the CMU.

Currency

Hong Kong and overseas investors may trade through Bond Connect using offshore RMB (CNH) or by converting foreign currencies into onshore RMB (CNY) under Bond Connect.

Where an investor uses foreign currencies to invest through the Northbound Trading Link, it must open a segregated RMB capital account with an eligible RMB settlement Bank in Hong Kong to convert its foreign currencies into CNY. Where bonds are purchased in CNY in this manner, upon sale of the bonds, the sale proceeds remitted out of Mainland China must be converted back into the relevant foreign currencies.

Further information about Bond Connect is available at:

<http://www.chinabondconnect.com/en/index.htm>

Investment Restrictions

- The Portfolio may invest up to 40% of its Net Asset Value in emerging markets debt securities.
- The Portfolio will not utilise margin lending.
- The Portfolio may invest without limit in below investment grade securities.
- The Portfolio may invest up to 10% of its Net Asset Value in participation interests in loans (which are securitised and freely transferable).

Risk

- Investment in the Portfolio carries certain risks which are described in greater detail in the "Investment Risks" section of the Prospectus. While investors should read and consider the entire "Investment Risks" section of the Prospectus, the risks summarised in the following sections, namely, "Market Risks: Risks relating to Debt Securities", "Risks Associated with Investment in the China Interbank Bond Market through Bond Connect" and "Risks related to Financial Derivative Instruments" are particularly relevant to this Portfolio. **These risks are not purported to be exhaustive and potential investors should review this Supplement and the Prospectus in their entirety and consult with their professional advisers, before making an application for Shares.**
 - Investors should refer to the Company's risk management policy with respect to the
-

use of FDI contained in the RMP Statement.

- The Portfolio's global exposure is subject to an advanced risk management process which, in compliance with the UCITS Regulations, aims to ensure that on any day the Absolute VaR of the Portfolio will be no greater than 4.47% of its Net Asset Value. The VaR of the Portfolio is a daily estimation of the maximum loss which the Portfolio may incur over a one day holding period and is arrived at through quantitative simulations with a 99% one tailed confidence interval and using a historical observation period of at least 250 business days. This process is described in detail in the statement of risk management procedures of the Company and its appendix in respect of the Portfolio. While the Portfolio measures and monitors its global exposure using the VaR approach, rather than by use of the Commitment Approach, the leverage of the Portfolio as calculated using the Commitment Approach is not expected to exceed 100% of its Net Asset Value as a result of its use of FDI. Measuring levels of leverage using the absolute sum of the notionals of the derivatives used, as required by the Central Bank, would produce a leverage percentage of approximately 200% of the Portfolio's Net Asset Value, although investors should note that higher levels of leverage may be experienced. That methodology does not reflect any netting or hedging that the Portfolio may have in place.
- The Manager and/or the Sub-Investment Manager will use forward and future currency contracts in order to hedge currency risk on a discretionary basis. The use of such hedging techniques may increase the risk profile of the Portfolio.

Environmental, Social and Governance ("ESG")

This Portfolio meets the classification of an Article 8 Portfolio as it promotes environmental and social characteristics and limits investments to companies that follow good governance practices.

Please also refer to Annex VI of the Prospectus which contains additional information on the ESG characteristics that are applicable to this Portfolio.

Typical Investor Profile

The Portfolio may be suitable for investors who are seeking a return over the medium to long term from exposure primarily to a portfolio of debt securities from issuers worldwide. Investors need to be comfortable with the risks associated with the Portfolio and be prepared to accept moderate levels of volatility. Investors are likely to hold the Portfolio as a complement to a diversified portfolio.

Fees and Expenses

Category	Maximum Initial Charge	Maximum Management fee	Distribution Fee
A, X, Y	5.00%	1.20%	0.00%
B, C1, C2, E	0.00%	1.80%	1.00%
C	0.00%	0.80%	1.00%
D, I, I2, I3, I4, I5	0.00%	0.60%	0.00%
J1, J2, J3, J4, J5	0.00%	1.80%	0.55%
M	2.00%	1.20%	0.80%
P	5.00%	0.57%	0.00%
T	5.00%	1.80%	0.00%
U	3.00%	0.90%	0.00%
Z	0.00%	0.00%	0.00%

Investors in the J Classes should note that any associated distribution fees will be payable to the relevant Distributor, the Manager or the Sub-Investment Manager at an amount of up to 0.55% of the Portfolio's Net Asset Value and for up to 1,459 days.

For details of the Administration Fees payable by the Portfolio, please see the "Administration Fees" heading in the "Fees and Expenses" section of the Prospectus.

Contingent deferred sales charges

Contingent deferred sales charges will be payable in respect of the following Classes at the rates specified below, depending on the period that has elapsed since the issue of the Shares being redeemed and will be charged on the lower of the Net Asset Value per Share on the relevant Dealing Day in respect of which the relevant Shares were (i) initially subscribed or (ii) redeemed. Any such contingent deferred sales charges will be paid to the relevant Distributor, the Manager or to the Sub-Investment Manager.

Class	Redemption Period in Calendar Days				
	< 365	365 - 729	730 - 1094	1095 - 1459	> 1459
B	4%	3%	2%	1%	0%
C, C1	1%	0%	0%	0%	0%
C2	2%	1%	0%	0%	0%
E	3%	2%	1%	0%	0%

Contingent deferred sales charges will be payable in respect of the following Classes at an amount up to the rate specified below, depending on the period that has elapsed since the issue of the Shares being redeemed and will be charged on the lower of the Net Asset Value per Share on the relevant Dealing Day in respect of which the relevant Shares were (i) initially subscribed or (ii) redeemed. Any such contingent deferred sales charges will be paid to the relevant Distributor, the Manager or to the Sub-Investment Manager.

Class	Redemption Period in Calendar Days								
	< 182	183 - 364	365 - 547	548 - 729	730 - 911	912-1094	1095 - 1276	1277- 1459	> 1460
J1, J2, J3, J4, J5	2.2%	1.925%	1.65%	1.375%	1.1%	0.825%	0.55%	0.275%	0%

For further information on fees, please refer to the "Fees and Expenses" section of the Prospectus.

Neuberger Berman Global Investment Grade Credit Fund

The Portfolio will not use FDI extensively or primarily for investment purposes.

Investment Objective The Portfolio aims to achieve a target average return of 1% over the Benchmark (as specified in the “*Benchmark*” section below) before fees over a market cycle (typically 3 years) from investing primarily in investment grade corporate fixed income securities globally.

Investors should note that the target return is not guaranteed over a market cycle, a 12-month or any period and the Portfolio’s capital is at risk. Investors should also note that, over the course of a market cycle, there may be significant periods of time during which the performance of the Portfolio will deviate from the targeted return and the Portfolio may experience periods of negative return. There can be no guarantee that the Portfolio will ultimately achieve its investment objective.

Investment Approach The Portfolio will invest primarily in investment grade fixed income securities issued by corporations, which have their head office or exercise an overriding part of their economic activity in OECD countries. The Portfolio will seek to use fundamental, bottom-up analysis principles in selecting securities for investment, meaning that the Manager and the Sub-Investment Manager’s analysis will focus on the strengths of individual securities as opposed to the selection of securities by reference to broader themes, such as industries. For example the credit rating of the security will be analysed relative to its proposed yield and the characteristics of the security will be analysed to determine cash flow predictability, using such factors including the issuer’s cash flow profile, debt and leverage. The Portfolio will focus on securities which are listed or traded on Recognised Markets globally, and is not limited by industry or sector. The Portfolio may rotate its exposure to geographic regions and countries and between sectors and issuers, based on economic or regional fundamentals, such as the valuation of each security relative to other similar securities.

The Manager and Sub-Investment Manager’s global credit research team is responsible for in-depth analysis of issuers, sectors and security valuations. Research focuses on cash generation, cash flow predictability, industry risk dynamics and event risk analysis (relating to the likelihood of certain events, for example the bond issuer missing a coupon payment or suffering a rating downgrade) of issuers, as well as monitoring traditional credit statistics. Key considerations in sector selection are:

1. Relative value (versus broad market) of the sector and individual credits within it.
2. Catalysts likely to change the fundamentals and/or the sentiment towards the sector (including macroeconomic events, such as geopolitics or economic growth and sector-specific events such as mergers and acquisitions).
3. Correlations between the issuers and between the sector and others in terms of credit quality and volatility.

The opinions and recommendations are then communicated to portfolio managers by the research team through regular formal and informal calls and meetings, to enable the portfolio managers to arrive at optimal portfolio components and characteristics.

The Manager and the Sub-Investment Manager use a research-based, qualitative (such as analysis of political events, shifts in regulatory regimes or the effects of market positioning and hedging) and quantitative (such as portfolio optimisation) methodology for selecting securities, with the aim of generating an attractive total return. In terms of security selection, the Manager and the Sub-Investment Manager will adopt a long-term, fundamental, relative value based approach and will exercise patience in achieving investment performance. This methodology is founded on the belief that returns from liquid assets can be attributed to changes in fundamental factors, such as changes in cash flow and issuers’ levels of borrowing.

In order to express long term, fundamental, relative value views on corporate bonds, the Manager and the Sub-Investment Manager break down their analysis into two main components:

1. Consideration of its views on the issuer and its future credit trend, including the strategic rationale for the issuance, taking into account factors such as:
 - a. Expected trends in the issuer's credit (i.e. changes in the ability of the issuer to continue to access credit into the future);
 - b. The likelihood that a security may be exposed to risks of a rating downgrade, notably from investment grade to sub-investment grade.
2. Assessment of the relative value positioning of each instrument in comparison to other similar instruments with the same structure and risk.

The Manager and the Sub-Investment Manager will take a disciplined approach to investing by attempting to maintain a portfolio that is typically diversified across issuers and industry sectors. This process of security selection and portfolio optimisation is repeated on a continuous basis to ensure that the Portfolio continues to maximise expected return in light of expected volatility. As a result, if the Manager and the Sub-Investment Manager consider that the expected returns from an investment are or become insufficient relative to the risks of the investment, they will either not invest in or dispose of the security under consideration, taking into account the relevant market conditions at that time and the best interests of Shareholders.

Central to the investment philosophy is the Manager and the Sub-Investment Manager's discretion, which is exercised at all stages of the investment process. This discretion enables them to take into account information and events that cannot be readily quantified, for example political events, shifts in regulatory regimes or the effects of market positioning and hedging.

Under normal market conditions, it is the intention of the Manager and the Sub-Investment Manager to invest at least 85% of the Portfolio's Net Asset Value in fixed income securities which are rated investment grade at their time of purchase.

The Portfolio will predominantly invest its Net Asset Value in securities denominated in Euro, GBP and/or USD. The investments will be fully hedged into its Base Currency through the use of forward and future contracts as set out below in the "*Instruments/Asset Classes*" section.

The Portfolio is actively managed and does not intend to track the Benchmark and is not constrained by it. The Benchmark is included here for performance comparison purposes only. The Portfolio gives some consideration to the Benchmark constituents in the selection of securities and may not hold all or many of the Benchmark's components.

Benchmark	<p>Bloomberg Global Aggregate Corporate Index (Total Return, Hedged USD) which measures global investment grade corporate fixed income markets.</p> <p>Shareholders in a Class which is denominated in a currency other than the Base Currency should note that, where available, it may be more meaningful to compare the performance of such Class against a version of this index which is denominated in the relevant Class currency.</p> <p>The Benchmark has not been designated as a reference benchmark for the purposes of SFDR. Therefore, it is not consistent with the promotion of environmental or social characteristics.</p>
Base Currency	US Dollars (USD).
Instruments / Asset Classes	<p>The Portfolio will invest primarily in corporate fixed income securities, that have been rated investment grade by a Recognised Rating Agency. The Portfolio can invest in or be exposed to the following types of assets.</p> <p>Fixed Income Securities (Debt securities). These securities may include:</p> <ul style="list-style-type: none"> • Corporate bonds (which may have a floating/variable rate), debentures and notes (including freely transferable and unleveraged structured notes and freely transferable promissory notes).

- Both fixed and floating rate debt securities, including bonds, issued by governments and their agencies in developed markets.

The Portfolio may also invest in other debt securities (including commercial paper, certificates of deposit and bankers acceptances) which are rated as investment grade by a Recognised Rating Agency.

Money Market Instruments. These securities may include bank deposits, fixed or floating rate instruments (including commercial paper), debentures and short-dated government or corporate bonds, cash and cash equivalents (including treasury bills) that are rated as investment grade or below by Recognised Rating Agencies or are unrated.

Investment grade securities are highly rated securities, generally those rated Baa3, BBB- or above by one or more Recognised Rating Agencies, while high yield securities are medium or lower rated securities, generally those rated below investment grade and sometimes referred to as “junk bonds”.

Collective Investment Schemes. The Portfolio may invest in underlying funds which are themselves exposed to investments that are similar to the Portfolio’s other investments, provided that the Portfolio may not invest more than 10% of its Net Asset Value in underlying funds (including ETFs which are structured as collective investment schemes) which themselves invest in other collective investment schemes. Such underlying funds may or may not be managed by the Manager and/or the Sub-Investment Manager or their affiliates and will comply with the requirements of the UCITS Regulations in respect of such investments.

The underlying funds in which the Portfolio may invest will be eligible collective investment schemes in accordance with the Central Bank’s requirements, which may be domiciled in Relevant Jurisdictions or the United States of America and will qualify as UCITS or alternative investment fund schemes and will be regulated as such by their home state regulator.

- Underlying funds in which the Portfolio invests may be leveraged but such collective investment schemes will not generally be leveraged: (i) in excess of 100% of their net asset value; or (ii) so that their 1 day absolute VaR exceeds 4.47% of their net asset value over a 250 day horizon with a 99% confidence level; or (iii) so that their 1 month relative VaR exceeds twice the VaR of a comparable benchmark portfolio over a 250 day horizon with a 99% confidence level, depending on how such underlying funds measure their global exposure; and
- ETFs are investment funds whose units may be bought and sold on a securities exchange. ETFs typically invest in a portfolio of securities that is designed to track the performance of particular market segment or index. The ETFs will be located in a Relevant Jurisdiction and will be authorised under the UCITS Directive or will be alternative investment funds which are eligible for investment by the Portfolio in accordance with the requirements of the Central Bank. The ETFs will represent investments that are similar to the Portfolio’s other investments. The ETFs will operate on the principle of risk spreading and will not be leveraged.

Financial Derivative Instruments (“FDIs”). Subject to the conditions and limits imposed by the Central Bank as set out in the Prospectus and this Supplement, the Portfolio may use the following FDI for hedging and/or efficient portfolio management:

- Swaps may include currency swaps, interest rate swaps, credit default and UCITS eligible indices swaps (in respect of each of the other types of assets in which the Portfolio may invest, as described in this “*Instruments / Asset Classes*” section) to hedge existing long positions.
- Forward contracts on currencies and non-deliverable currencies may be used to hedge existing long currency exposures.
- Future contracts on fixed income securities, UCITS eligible indices, interest rates and currencies which may be used to hedge existing long positions.

As the Portfolio may purchase FDI generally using only a fraction of the assets that would be needed to purchase the relevant securities directly, the remainder of the Portfolio’s

assets may be invested in the other types of securities listed above. The Manager and/or the Sub-Investment Manager may therefore seek to achieve greater returns by purchasing derivative instruments and investing the remaining assets in such other securities to add excess return.

Repo Contracts and Securities Lending Agreements. Repo Contracts and Securities Lending Agreements may be used subject to the conditions and limits set out in the Prospectus.

Investment Restrictions

- The Portfolio may invest up to 15% of its Net Asset Value in securities that are below investment grade at time of purchase, provided that under no circumstances will the Portfolio invest in securities which are rated below B- or equivalent by a Recognised Rating Agency.
- The Portfolio will not utilise margin lending.

Risk

- Investment in the Portfolio carries certain risks which are described in greater detail in the "Investment Risks" section of the Prospectus. While investors should read and consider the entire "*Investment Risks*" section of the Prospectus, the risks summarised in the following section, namely, "*Market Risks: Risks relating to Debt Securities*" are particularly relevant to this Portfolio. **These risks are not purported to be exhaustive and potential investors should review this Supplement and the Prospectus in their entirety and consult with their professional advisers, before making an application for Shares.**
- Investors should refer to the Company's risk management policy with respect to the use of FDI contained in the RMP Statement.
- The Portfolio may be leveraged as a result of its investments in FDI but such leverage will not exceed 100% of the Portfolio's Net Asset Value, as measured using the Commitment Approach, at any time.

Environmental, Social and Governance ("ESG")

This Portfolio is classified as an Article 8 Portfolio as it promotes environmental and social characteristics and limits investments to companies that follow good governance practices.

The Manager and Sub-Investment Manager will manage the Portfolio in accordance with the ESG Policy on a continuous basis. The Manager and Sub-Investment Manager have fully integrated the ESG Policy into the overall investment process, in particular, the portfolio construction process. A summary of the ESG Policy is detailed in the SFDR Annex of the Prospectus and is available on the Neuberger Berman website, www.nb.com/esg.

The Manager and Sub-Investment Manager shall also apply the Controversial Weapons Policy when determining what investments to make for the Portfolio. Further details on this screening policy is set out in the "*Sustainable Investment Criteria*" section of the Prospectus.

ESG analysis is an important component of the fundamental credit research and identifies business risks, which would cause deterioration in an issuer's credit profile. A proprietary ESG scoring system is utilised which focuses on the ESG issues that are the largest drivers of credit risk in each industry. These proprietary scores are assigned to all issuers. By integrating proprietary ESG analysis into internal credit ratings, there is a direct link between the analysis of material ESG factors and portfolio construction.

Material ESG factors are identified and assessed during the credit research process by:

- utilising the **environmental and social factors** identified by the Sustainability Accounting Standards Board ("**SASB**") framework as potentially material for the given industry. Not all factors identified by SASB are relevant for fixed income investors, or for the time horizon over which the Manager and Sub-Investment Manager are valuing a security and therefore the factors are modified based on specific sectors and the expert judgement of the Manager and Sub-Investment Manager.
- the factors identified are reviewed and discussed and the rationale is debated and any modifications made. This discussion also includes the relative weight to place on each factor.
- a score is given to each issuer and where possible robust data sources are used to complete this scoring.

Sector specific **environmental factors** analysed include (i) carbon footprint, (ii) ecological incidents, (iii) water usage and remediation in the exploration and production sector, (iv) carbon footprint in the pharmaceuticals sector and (v) responsible and transparent underwriting in the banking sector.

Sector specific **social factors** analysed include (i) workforce health and safety, (ii) engagement with relevant communities in the exploration and production sector, (iii) affordability and fair pricing, (iv) drug safety in the pharmaceuticals sector, (v) privacy and data security, (vi) regulatory compliance and (vii) track record of litigation and controversies in the banking sector.

A proprietary investment grade credit governance score is applied which is standardised across all sectors, which considers: (i) level of independence of board members, (ii) capability of the board, (iii) compensation tied to cash flow and long-term viability, (iv) capability of management and (v) financial statements quality and disclosures.

Assessments on these ESG factors are made on a regular basis, at least at each quarterly portfolio review and expands upon these factors from time to time.

ESG scores allow credit analysts to (i) reach more comprehensive views on relative value between issuers and (ii) prioritise additional research and engagement efforts on the specific ESG factors on which a given issuer appears to be lagging. In this way, credit analysts are focusing on the material ESG factors, which they believe are likely to be most financially material to the Portfolio as a whole.

In addition to the aforementioned internal research, other multiple sources of ESG research are utilised including company information, meetings with management, industry peers, academic organisations, trade publications and conferences, third party ESG research, government agencies, labour organisations and non-governmental organisations (NGOs).

Please also refer to Annex VI of the Prospectus which contains additional SFDR disclosures which are applicable to this Portfolio.

Typical Investor Profile The Portfolio may be suitable for investors who are seeking a return over the medium to long term from exposure primarily to a portfolio of investment grade corporate fixed income securities from issuers worldwide. Investors need to be comfortable with the risks associated with the Portfolio and be prepared to accept moderate levels of volatility. Investors are likely to hold the Portfolio as a complement to a diversified portfolio.

Fees and Expenses

Distribution Policy

Under normal circumstances, the Directors intend that dividends in respect of:

- each of the (Weekly) Distributing Classes in the Neuberger Berman High Yield Bond Fund shall be declared and paid on or prior to the last Business Day of each week. Other than in respect of the Neuberger Berman High Yield Bond Fund, there will be no (Weekly) Distributing Classes in any of the other Portfolios;
- each of the (Monthly) Distributing Classes in the Portfolios shall be declared on or prior to the last Business Day of each month and paid within three Business Days thereafter;
- each of the (Monthly) Gross Income Distributing Classes in the Portfolios shall be declared on or prior to the last Business Day of each month and paid within three Business Days thereafter;
- each of the other (Gross) Income Distributing Classes in the Portfolios shall be declared on a quarterly basis and paid within thirty Business Days thereafter; and
- each of the other Distributing Classes in the Portfolios will be declared on a quarterly basis and paid within 30 Business Days thereafter.

Subscriptions and Redemptions

Subscriptions for Shares in all Classes in each Portfolio which have not already launched at the date of this Supplement will be considered during the Initial Offer Period, upon receipt by the Administrator of completed share applications and subscription monies as specified in the “*Subscriptions*” section of the Prospectus. Such Shares will be issued at the Initial Offer Price on the last day of the Initial Offer Period.

The Initial Offer Period shall run from 9.00 am on 24 December 2021 to 5.00 pm on 24 June 2022 or such earlier or later time as the Directors may determine at their discretion and notify to the Central Bank and to subscribers.

The Initial Offer Price for each of the share classes shall be as follow:

AUD Classes: AUD 10	DKK Classes: DKK 50	NOK Classes: NOK 100
BRL Classes: BRL 20	EUR Classes: EUR 10	NZD Classes: NZD 10
CAD Classes: CAD 10	GBP Classes: GBP 10	SEK Classes: SEK 100
CHF Classes: CHF 10	HKD Classes: HKD 10	SGD Classes: SGD 20
CLP Classes: CLP 5,000	ILS Classes: ILS 30	USD Classes: USD 10
CNY Classes: CNY 100	JPY Classes: JPY 1,000	ZAR Classes: ZAR 100

Thereafter and, in the case of Classes which have already launched, from the date of this Supplement, Shares will be issued at their Net Asset Value per Share, subject to the provision for Duties and Charges in respect of the issue of the Shares and rounding as provided for in the Articles on each Dealing Day.

The Company reserves the right to apply to Euronext Dublin to have the Shares in each of the Classes admitted to the Official List and to trading on the regulated market of Euronext Dublin.

The Company may, in its sole discretion, reject any subscription in whole or in part without reason.

As stated in the “*Subscriptions and Redemptions*” section of the Prospectus, redemption proceeds in respect of the Portfolios will be paid within ten (10) Business Days of the relevant Dealing Day unless payment has been suspended in the circumstances described in the “*Temporary Suspension of Dealings*” section of the Prospectus, although the Company will seek to make such payments within a shorter period of time where possible (up to and including within three (3) Business Days of the relevant Dealing Day).

Neuberger Berman High Yield Bond Fund

An investment in the Portfolio should not constitute a substantial proportion of an investment portfolio and may not be appropriate for all investors. The Portfolio will not use FDI extensively or primarily for investment purposes.

Investment Objective Achieve an attractive level of total return (income plus capital appreciation) from the high yield fixed income market.

Investment Approach The Portfolio will aim to achieve its objective by investing primarily in:

- High yield fixed income securities issued by US and foreign corporations, which, respectively, have their head office or exercise an overriding part of their economic activity in the US; and
- High yield fixed income securities issued by governments and agencies in the US that are primarily denominated in US Dollars,

that are listed, dealt or traded on Recognised Markets without any particular focus on any one industrial sector.

The Portfolio is typically diversified across issuers and industry sectors. The Sub-Investment Manager will seek to select securities from the result of in-depth credit research, utilising proprietary analytical tools which seek to assess the strength of a company's credit profile, examples of which include but are not limited to:

- (i) their ability to pay principal and interest, their cash flow and balance sheet composition;
- (ii) their market position relative to competitors; and
- (iii) the Sub-Investment Manager's assessment of Environmental, Social, and Governance (ESG) factors through the team's proprietary scoring system as well as proactive engagement on ESG related topics.

In addition, the Sub-Investment Manager may seek to (where applicable):

- (i) capitalise on market opportunities in areas of the high yield market which the Sub-Investment Manager believes are undervalued (on the basis of the criteria outlined above); and/or
- (ii) generate added value through:
 - avoidance of credit deterioration, either as a result of a decline in credit rating based on internal research and/or external rating agencies or which occurs when the Sub-Investment Manager believes, based on research, that the fundamentals of a security are in decline and accordingly will dispose of or will not invest in such securities;
 - relative value analysis (i.e. seeking to exploit perceived under or over valuation of assets (based on views of, including, but not exhaustive, ratings, corporate fundamentals and industry) carried out as part of the Sub-Investment Manager's proprietary research; and
 - industry and quality rotation by selling out of a security in one industry or credit tier and buying into another.

The Portfolio aims to manage credit risk through disciplined credit analysis and diversification of credit quality. The Portfolio intends to opportunistically rotate quality and sector exposures throughout the credit cycle, maintaining a higher quality bias in

High-Yield Bonds when the Sub-Investment Manager believes an economic downturn is underway and increasing lower quality holdings of High-Yield Bonds when the Sub-Investment Manager believes an economic expansion is underway. With regard to interest rate risk, the Sub-Investment Manager is sensitive to the overall duration of the portfolio in relation to the Benchmark and will seek to evaluate the duration of potential new portfolio acquisitions in conjunction with credit analysis. The Portfolio invests its assets in a broad range of issuers, industry sectors and maturities.

Under normal market conditions, the Sub-Investment Manager anticipates that the Portfolio's Weighted Average Maturity will be between 5-10 years.

The Portfolio may opportunistically invest up to 10% of its Net Asset Value in participation interests in floating or adjustable rate senior secured loans, which are securitised and freely transferable, and which meet the regulatory criteria to be considered money market instruments.

The Portfolio may also invest, on an ancillary basis, in unlisted money market instruments issued by companies located throughout the world.

In addition, although the Portfolio will concentrate its investments in the US, the Portfolio may also invest in securities of companies located in and governments of Emerging Market Countries, which may involve additional risk, relative to investment in more developed economies.

The Portfolio may also invest, on an ancillary basis, in equity securities as set out below in the "*Instruments/Asset Classes*" section and unlisted money market instruments issued by companies located throughout the world.

The Portfolio is actively managed and does not intend to track the Benchmark which is included here for performance comparison purposes and because the Portfolio's investment policy restricts the extent to which the Portfolio's holdings may deviate from the Benchmark, as described above. This deviation may be significant.

Benchmark	<p>The ICE BofA US High Yield Constrained Index (Total Return, USD), which covers the universe of fixed rate, non-investment grade debt.</p> <p>Shareholders in a Class which is denominated in a currency other than the Base Currency should note that, where available, it may be more meaningful to compare the performance of such Class against a version of this index which is denominated in the relevant Class currency.</p>
Base Currency	US Dollars (USD).
Instruments / Asset Classes	<p>The Portfolio will invest mainly in high yield fixed income securities. The Portfolio can invest in or be exposed to the following types of assets.</p> <p>Fixed Income Securities (Debt securities). These securities may include:</p> <ul style="list-style-type: none"> • Both fixed and floating rate securities; • Corporate bonds, convertible bonds, debentures and notes (including freely transferable and unleveraged structured notes and freely transferable promissory notes); • Contingent convertible bonds, subject to a limit of up to 10% of the Portfolio's Net Asset Value; • Debt securities issued by governments and commercial banks; • Privately issued mortgage-backed securities, asset-backed securities, structured securities that derive interest and principal payments from specified assets or indices (including mortgage-backed securities such as pass-through certificates, collateralised mortgage obligations, and interest and principal only components of mortgage-backed securities); • Collateralised mortgage obligations, payment-in-kind bonds (which are bonds that pay interest in the form of additional bonds of the same kind); • Collateralised loan obligations, subject to a limit of up to 10% of the Portfolio's Net

Asset Value; and

- Deferred payment securities (securities which pay regular interest after a predetermined date) and zero coupon securities that are rated below investment-grade (often referred to as “junk bonds”).

Money Market Instruments. These securities may include bank deposits, fixed or floating rate instruments (including commercial paper), floating or variable rate notes, bankers acceptances, certificates of deposit, debentures and short-dated government or corporate bonds, participation interests in loans (which are securitised and freely transferable), cash and cash equivalents (including treasury bills) that are rated as investment grade or below by Recognised Rating Agencies or are unrated.

Equity Securities. Equity securities (both common and preferred) issued by US and other issuers which are listed, dealt or traded on Recognised Markets.

Financial Derivative Instruments (“FDIs”). Subject to the conditions and limits imposed by the Central Bank as set out in the Prospectus and this Supplement, the Portfolio may use the following FDI for hedging and/or efficient portfolio management:

- Swaps may include currency swaps, interest rate swaps, credit default swaps, index swaps and total return swaps to obtain exposure to the broad high yield fixed income market pending investment in the securities described above and to hedge existing long positions. The maximum proportion of the Portfolio’s Net Asset Value that can be subject to total return swaps is 10%. The expected proportion of the Portfolio’s Net Asset Value that will be subject to total return swaps is 0%. The expected proportions are not limits and the actual percentages may vary over time depending on factors including, but not limited to, market conditions;
- Future contracts based on interest rates, fixed income securities and UCITS eligible bond indices may be used to hedge interest rate risk and existing long positions;
- Options on UCITS eligible bond index futures and UCITS eligible bond indices may be used to achieve a profit as well as to hedge existing long positions;
- Forward contracts on fixed income securities may be used to achieve a profit, through gaining exposure to an increase in the value of such securities as well as to hedge existing long positions; and
- Forward currency contracts may be used to achieve a profit through gaining exposure to an increase in the value of currencies, as well as to hedge existing long currency exposures.

As the Portfolio may purchase FDI generally using only a fraction of the assets that would be needed to purchase the relevant securities directly, the remainder of the assets allocated to the Portfolio may be invested in the other types of securities listed in this “*Instrument/Asset Classes*” section. The Sub-Investment Manager may therefore seek to achieve greater returns by purchasing derivative instruments and investing the remaining assets in such other securities as listed above to add excess return. The Sub-Investment Manager may therefore seek to achieve greater returns by purchasing derivative instruments and investing the remaining assets in such other securities to add excess return. Any indices to which exposure is taken through FDI will be broad-based, UCITS-eligible indices which provide exposure to the performance of the types of assets in which the Portfolio may invest, as described in this “*Instruments/Asset Classes*” section. Details of such indices utilised by the Portfolio will be contained in the annual report of the Company.

The counterparties to OTC FDI entered into in respect of the Portfolio will be entities (which will not be related to the Manager or its delegates) with legal personality which may be located globally. They will be subject to ongoing supervision by a public authority, be rated at or in excess of the requirements of the Central Bank by a Recognised Rating Agency and have the necessary organisational structure and resources for the relevant type of transaction.

The Portfolio may be leveraged as a result of its investments in FDI but such leverage will not exceed 100% of the Portfolio’s Net Asset Value, as measured using the Commitment Approach, at any time.

Repo Contracts and Securities Lending Agreements. Repo Contracts and Securities Lending Agreements may be used subject to the conditions and limits set out in the Prospectus.

- Investment Restrictions**
- Under normal market conditions, it is the intention of the Sub-Investment Manager to invest at least 80% of the Portfolio's available assets in high yield fixed income securities. High yield fixed income securities are medium or lower rated securities, generally those rated below investment grade (Baa3, BBB- or above) by one or more Recognised Rating Agency, sometimes referred to as "junk bonds".
 - There are no restrictions on the average maturity of the Portfolio or the maturity of any single instrument. Maturities may vary widely depending on the Sub-Investment Manager's assessment of interest rate trends and other economic and market factors.
 - Any cash held by the Portfolio will be held solely as an ancillary liquid asset.
 - The Portfolio may not invest more than 10% of its Net Asset Value in equity securities.
 - The Portfolio may invest up to 10% of its Net Asset Value in securities that are issued or guaranteed by a single sovereign issuer that are below investment grade.
 - The Portfolio will not utilise margin lending.
 - The maximum holding in a single issuer is 5% of the Portfolio's Net Asset Value.

- Risk**
- Investment in the Portfolio carries certain risks which are described in greater detail in the "*Investment Risks*" section of the Prospectus. While investors should read and consider the entire "*Investment Risks*" section of the Prospectus, the risks summarised in the following section, namely, "*Market Risks: Risks relating to Debt Securities*" are particularly relevant to this Portfolio. **These risks are not purported to be exhaustive and potential investors should review this Supplement and the Prospectus in their entirety and consult with their professional advisers, before making an application for Shares.**
 - Investors should refer to the Company's risk management policy with respect to the use of FDI contained in the RMP Statement.
 - The Sub-Investment Manager will seek to anticipate spread movements in response to changes in economic conditions, industry fundamentals, issuer specific financial performance and other issuer specific factors. Investment decisions will be based on analysis of historical spread relationships, break-even yield spread analysis and total return projections.
 - The Sub-Investment Manager will use forward currency contracts in order to hedge currency risk.
 - The Portfolio may be leveraged as a result of its investments in FDI but such leverage will not exceed 100% of the Portfolio's Net Asset Value, as measured using the Commitment Approach, at any time.

Environmental, Social and Governance ("ESG") This Portfolio meets the classification of an Article 8 Portfolio as it promotes environmental and social characteristics and limits investments to companies that follow good governance practices.

ESG risks and opportunities are systematically considered in the selection of securities to be constituents of the Portfolio. The Sub-Investment Manager assesses securities in relation to their exposure to and the management of ESG risks. ESG represents governance, (being the way in which the company is run), environmental issues, (such as the impact on natural resources), and social issues (such as human rights).

Please also refer to Annex VI of the Prospectus which contains additional SFDR disclosures which are applicable to this Portfolio.

Typical Investor Profile The Portfolio may be suitable for investors who are prepared to accept the risks of the bond market together with higher levels of price volatility than generally associated with fixed income funds due to the Portfolio's investment policies or portfolio management techniques.

Fees and Expenses

E	3%	2%	1%	0%	0%

Other important information for investors in Hong Kong

As the Portfolio has been authorised for public offer in Hong Kong, the Hong Kong Securities and Futures Commission (“HKSF”) requires the Company to classify the Portfolio on the basis of its expected maximum net derivative exposure (“NDE”). The HKSF requires the NDE to be calculated in accordance with the HKSF’s Code on Unit Trusts and Mutual Funds and the requirements and guidance issued by the HKSF, which may be updated from time to time. This requires the Company to convert all FDI acquired for investment purposes that would generate incremental leverage at the portfolio level of the Portfolio into their equivalent positions in the underlying assets. Applying these requirements, the Portfolio’s NDE is expected to be less than 50% but the actual level may be higher than the expected level in exceptional circumstances, for example when there are sudden movements in markets and/or investment prices.

For the avoidance of doubt, complying with the HKSF’s requirements to classify the Portfolio on the basis of its NDE does not amend the investment objectives or policies or otherwise impact the management of the Portfolio or its use of FDI, as the requirements are solely to measure the Portfolio’s expected use of FDI, as described above, using the HKSF’s methodology and disclose the results.

Neuberger Berman Short Duration High Yield Bond Fund

An investment in the Portfolio should not constitute a substantial proportion of an investment portfolio and may not be appropriate for all investors. The Portfolio will not use FDI extensively or primarily for investment purposes.

Investment Objective Generate high current income by investing in short-duration high yield fixed income securities that comply with the terms of the Sustainable Exclusion Policy and seek to produce investment returns, support better-functioning capital markets and have a positive social and environmental impact.

Investment Approach The Portfolio will aim to achieve its objective by investing primarily in:

- Short duration, high yield fixed income securities issued by US and non-U.S. corporations, which, respectively, have their head office or exercise an overriding part of their economic activity in the US; and
- Short duration, high yield fixed income securities issued by governments and agencies in the US that are primarily denominated in US Dollars,

that comply with the terms of the Sustainable Exclusion Policy and are listed, dealt or traded on Recognised Markets without any particular focus on any one industrial sector.

The Portfolio promotes the following environmental and social characteristics:

- Contributes towards achievement of the Paris Climate Agreement by allocating capital to companies with lower carbon intensity, such that the carbon intensity of the Portfolio, on a continuous basis, is 30% lower relative to the broad U.S. high yield market, as represented by the ICE / BAML U.S. High Yield Index and to achieve a 7% per annum reduction in carbon intensity compared to a 2019 baseline level.
- Contributes towards achievement of the UN Sustainable Development Goals by engaging with at least 90% of investee issuers on incremental actions that they can take within their products, services, operations or processes which are aligned with these goals (or where there is potential for increased alignment with these goals, following engagement with these companies).
- Maintains an average ESG rating for the Portfolio that is above that of the broad U.S. high yield market, as represented by the ICE / BAML U.S. High Yield Index, which will be assessed based on third party ESG scores from an established external provider.

The Sub-Investment Manager will exclude companies that are involved in controversial activities and behaviour, such as the production of controversial weapons, fur manufacturers, gambling, nuclear power or non-compliance with the United Nations Global Compact. The application of the Sustainable Exclusion Policy, as such terms are defined in the "*Sustainable Investment Criteria*" section of the Prospectus, means that companies involved in tobacco, manufacture of civilian firearms and operation of private prisons will also be excluded. Investors should refer to the information contained in that section for further details about the application of the Sustainable Exclusion Policy to the Portfolio.

The Sub-Investment Manager will then assess the remaining investment universe, which involves in-depth research and analysis of companies' ESG profiles and will also exclude companies that show poorly on this ESG assessment. Environmental factors considered include but are not limited to: (i) environmental management system/water stress, (ii) carbon emissions/GHG reduction program and (iii) history of liabilities or wrongdoing. Social factors considered include but are not limited to: (i)

product safety, (ii) privacy and data security, (iii) human capital development and (iv) social supply chain incidents. Governance factors considered include but are not limited to (i) senior management experience and industry expertise, (ii) ownership/board experience and alignment of incentives, (iii) corporate strategy and balance sheet strategy, (iv) financial and accounting strategy & disclosure and (v) regulatory / legal track record.

The Sub-Investment Manager will ensure that securities representing at least 90% of the Net Asset Value of the Portfolio are covered by the ESG assessment. Through these two ESG exclusionary steps, the Sub-Investment Manager will exclude at least 20% of components of the investment universe which are rated the weakest in terms of their ESG assessment.

The Portfolio is typically diversified across issuers and industry sectors. Although it may invest in securities of any maturity, the Portfolio normally seeks to maintain a weighted average portfolio duration of three years or less. The Sub-Investment Manager will seek to select securities from the result of in-depth credit research, utilising proprietary analytical tools which seek to assess the strength of a company's credit profile, examples of which include but are not limited to:

- (i) their ability to pay principal and interest, their cash flow and balance sheet composition, and
- (ii) their market position relative to competitors.

In addition, the Sub-Investment Manager may seek to (where applicable):

- (i) capitalise on market opportunities in areas of the high yield market which the Sub-Investment Manager believes are undervalued (on the basis of the criteria outlined above); and/or
- (ii) generate added value through:
 - avoidance of credit deterioration, either as a result of a decline in credit rating based on internal research and/or external rating agencies or which occurs when the Sub-Investment Manager believes, based on research, that the fundamentals of a security are in decline and accordingly will dispose of or will not invest in such securities;
 - relative value analysis (i.e. seeking to exploit perceived under or over valuation of assets (based on views of, including, but not exhaustive, ratings, corporate fundamentals and industry) carried out as part of the Sub-Investment Manager's proprietary research; and
 - industry and quality rotation by selling out of a security in one industry or credit tier and buying into another.

The Portfolio endeavours to manage credit risk and minimise interest rate risk through disciplined credit analysis and emphasis on short-term and intermediate-term maturities. The Portfolio intends to focus, among other things, on issuer cash flows, management and sources of repayment and decrease exposure to securities with deteriorating fundamentals and financials.

The Portfolio may opportunistically invest up to 10% of its Net Asset Value in participation interests in floating or adjustable rate senior secured loans, which are securitised and freely transferable, and which meet the regulatory criteria to be considered money market instruments.

The Portfolio may also invest, on an ancillary basis, in equity securities as set out below in the "*Instruments/Asset Classes*" section and unlisted money market instruments issued by companies located throughout the world.

The Sub-Investment Manager anticipates that under normal market conditions the Portfolio's duration will be 3 years or less, although this may vary as market conditions change.

The Portfolio is actively managed; no benchmark is used for performance comparison purposes or as a universe for selection. ICE / BAML U.S. High Yield Index is used exclusively for ESG rating comparison purposes and carbon intensity reduction comparison purposes only.

Benchmark	N/A
Base Currency	US Dollars (USD).
Instruments / Asset Classes	<p>The Portfolio will invest primarily in short duration, high yield fixed income securities. The Portfolio can invest in or be exposed to the following types of assets.</p> <p>Fixed Income Securities (Debt securities). These securities may include:</p> <ul style="list-style-type: none"> • Both fixed and floating rate securities, issued by governments and commercial banks; • Corporate bonds, convertible bonds, debentures and notes (including freely transferable and unleveraged structured notes and freely transferable promissory notes); • Contingent convertible bonds, subject to a limit of up to 10% of the Portfolio's Net Asset Value; • Privately issued mortgage-backed securities, asset-backed securities, structured securities (including mortgage-backed securities such as pass-through certificates, collateralised mortgage obligations and interest and principal only components of mortgage-backed securities) that derive interest and principal payments from specified assets (including residential and commercial mortgages, credit card debt, pools of other kinds of loans); • Collateralised mortgage obligations, payment-in-kind bonds (which are bonds that pay interest in the form of additional bonds of the same kind); • Collateralised loan obligations, subject to a limit of up to 10% of the Portfolio's Net Asset Value; and • Deferred payment securities (securities which pay regular interest after a predetermined date) and zero coupon securities that are rated below investment-grade (often referred to as "junk bonds"). <p>High yield fixed income securities are medium or lower rated securities, generally those rated below investment grade (Baa3, BBB- or above) by one or more Recognised Rating Agency, sometimes referred to as "junk bonds".</p> <p>Money Market Instruments. The Portfolio may be leveraged as a result of its investments in FDI but such leverage will not exceed 100% of the Portfolio's Net Asset Value, as measured using the Commitment Approach, at any time.

Repo Contracts and Securities Lending Agreements. Repo Contracts and Securities Lending Agreements may be used subject to the conditions and limits set out in the Prospectus.

Investment Restrictions

- Under normal market conditions, it is the intention of the Sub-Investment Manager to invest at least 80% of the Portfolio's available assets in high yield fixed income securities which are rated below investment grade.
- Any cash held by the Portfolio will be held solely as an ancillary liquid asset.
- The Portfolio may not invest more than 10% of its Net Asset Value in equity securities.
- The Portfolio will not invest in Emerging Market Countries.
- The Portfolio may invest up to 10% of its Net Asset Value in securities that are issued or guaranteed by a single sovereign issuer that are below investment grade.
- The Portfolio will not utilise margin lending.
- The maximum holding in a single issuer is 5% of the Portfolio's Net Asset Value.

Risk

- Investment in the Portfolio carries certain risks which are described in greater detail in the "*Investment Risks*" section of the Prospectus. While investors should read and consider the entire "*Investment Risks*" section of the Prospectus, the risks summarised in the following section, namely, "*Market Risks: Risks relating to Debt Securities*" are particularly relevant to this Portfolio. **These risks are not purported to be exhaustive and potential investors should review this Supplement and the Prospectus in their entirety and consult with their professional advisers, before making an application for Shares.**
 - Investors should refer to the Company's risk management policy with respect to the use of FDI contained in the RMP Statement.
-

- The Sub-Investment Manager will take a disciplined approach to investing on behalf of the Portfolio by attempting to maintain a portfolio that is typically diversified across issuers, industry sectors and, within the scope of the targeted Portfolio duration, maturities
- The Sub-Investment Manager will seek to anticipate spread movements in response to changes in economic conditions, industry fundamentals, issuer specific financial performance and other issuer specific factors. Investment decisions will be based on analysis of historical spread relationships, break-even yield spread analysis and total return projections
- The Sub-Investment Manager will use forward currency contracts in order to hedge currency risk
- The Portfolio may be leveraged as a result of its investments in FDI but such leverage will not exceed 100% of the Portfolio's Net Asset Value, as measured using the Commitment Approach, at any time.

Environmental, Social and Governance ("ESG")

The Portfolio has been classified as an Article 8 Portfolio as it invests in securities issued by issuers that promote both environmental and social characteristics. In promoting environmental and social characteristics, the Portfolio will also take appropriate measures to ensure that (i) its investments do not significantly harm any of the social objectives or environmental objectives; and (ii) that the issuers in whose securities it invests follow good governance practices.

As noted above, the Portfolio's investment objective is to generate high current income by investing in short-duration high yield fixed income securities that comply with the Sustainable Exclusion Policy and seek to produce investment returns, support better-functioning capital markets and have a positive social and environmental impact.

Accordingly, the Sub-Investment Manager applies the (i) Controversial Weapons Policy, and (ii) the Sustainable Exclusion Policy, when determining what investments to make for the Portfolio. Further details on these screening/exclusion policies are set out in the "*Sustainable Investment Criteria*" section of the Prospectus.

The Sub-Investment Manager will also manage the Portfolio in accordance with the ESG Policy on a continuous basis. The Sub-Investment Manager has fully integrated the ESG Policy into the overall investment process, in particular, the portfolio construction process. A summary of the ESG Policy is detailed in the SFDR Annex to the Prospectus and is available on the Neuberger Berman website, www.nb.com/esg.

In respect to the Portfolio, the Sub-Investment Manager aims to achieve (i) a carbon emission intensity reduction of at least 30% relative to the broader U.S. high yield market, which is represented by the ICE / BAML U.S. High Yield Index, and (ii) a 7% per annum reduction in carbon intensity compared to a 2019 baseline.

The Sub-Investment Manager directly engages with investee companies and establishes engagement objectives for each investee company / corporate issuer, aligned with the UN Sustainable Development Goals. The investee company's / corporate issuer's progress in implementing these objectives are evaluated semi-annually. This direct engagement is an essential part of the investment process and the Portfolio's promotion of environmental and social characteristics.

ESG factors are integral to the Sub-Investment Manager's investment process. In particular, investment is prioritised in corporate issuers whose current business products and services are aligned with the UN Sustainable Development Goals (or where there is potential for increased alignment with these goals, following engagement with those companies by the Sub-Investment Manager, as described above).

ESG analysis is performed by the Sub-Investment Manager along with the support of third-party data. The research analysts use their sector expertise to customise criteria for each industry, using the SASB framework as a starting point.

The Sub-Investment Manager also utilises a proprietary ESG scoring system for corporate issuers. This scoring system includes an in-house governance assessment tool and an assessment of industry specific environmental and social factors. The ESG factors applied are sector-specific with customised sector weightings.

Companies ranked in the bottom quartile are excluded from the investment.

As noted above, the Sub-Investment Manager will ensure that securities representing at least 90% of the Net Asset Value of the Portfolio are covered by the ESG assessment. Through ESG exclusionary steps, the Sub-Investment Manager will also exclude at least 20% of components of the investment universe which are rated the weakest in terms of their ESG assessment.

Please also refer to Annex VI of the Prospectus which contains additional SFDR disclosures which are applicable to this Portfolio.

Typical Investor Profile The Portfolio may be suitable for investors who are prepared to accept the risks of the bond market together with higher levels of price volatility than generally associated with fixed income funds due to the Portfolio's investment policies or portfolio management techniques.

Other important information for investors in Hong Kong

As the Portfolio has been authorised for public offer in Hong Kong, the Hong Kong Securities and Futures Commission ("HKSF") requires the Company to classify the Portfolio on the basis of its expected maximum net derivative exposure ("NDE"). The HKSF requires the NDE to be calculated in accordance with the HKSF's Code on Unit Trusts and Mutual Funds and the requirements and guidance issued by the HKSF, which may be updated from time to time. This requires the Company to convert all FDI acquired for investment purposes that would generate incremental leverage at the portfolio level of the Portfolio into their equivalent positions in the underlying assets. Applying these requirements, the Portfolio's NDE is expected to be less than 50% but the actual level may be higher than the expected level in exceptional circumstances, for example when there are sudden movements in markets and/or investment prices.

For the avoidance of doubt, complying with the HKSFSC's requirements to classify the Portfolio on the basis of its NDE does not amend the investment objectives or policies or otherwise impact the management of the Portfolio or its use of FDI, as the requirements are solely to measure the Portfolio's expected use of FDI, as described above, using the HKSFSC's methodology and disclose the results.

Neuberger Berman European High Yield Bond Fund

An investment in the Portfolio should not constitute a substantial proportion of an investment portfolio and may not be appropriate for all investors. The Portfolio will not use FDI extensively or primarily for investment purposes.

Investment Objective Seeks to maximise current income whilst preserving capital by investing in the European high yield fixed income market.

Investment Approach The Portfolio will aim to achieve its objective by investing primarily in corporate high yield fixed income securities, which are (i) denominated in a European currency or (ii) issued or guaranteed by companies of any industrial sector that are domiciled in, or exercise the main part of their economic activity in a European country that are listed, dealt or traded on Recognised Markets. The Portfolio will invest a majority of its Net Asset Value in securities denominated in Euro and / or GBP. The Portfolio's investments will be fully hedged into its Base Currency through the use of forward and future contracts as set out below in the "Instruments/Asset Classes" section. The Portfolio may also invest, on an ancillary basis, in unlisted money market instruments and equity securities issued by companies which have their head office or exercise an overriding part of their economic activity in Europe, and which may be denominated in a European currency.

The Sub-Investment Manager will take a disciplined approach to investing on behalf of the Portfolio by attempting to maintain a portfolio that is typically diversified across issuers, industry sectors and maturities. The Sub-Investment Manager will seek to select securities from the result of in-depth credit research, utilising proprietary analytical tools which seek to assess the strength of a company's credit profile, examples of which include but are not limited to:

- (i) their ability to pay principal and interest, their cash flow and balance sheet composition,
- (ii) their market position relative to competitors,
- (iii) the Sub-Investment Manager's assessment of Environmental, Social, and Governance (ESG) factors through the team's proprietary scoring system as well as proactive engagement on ESG related topics.

The securities selected will depend on Sub-Investment Manager's analysis of the prevailing market conditions and considered in light of the investment objective of the Portfolio. In selecting securities for investment, the Sub-Investment Manager seeks to:

- capitalise on market opportunities in areas of the high yield market which the Sub-Investment Manager believes are undervalued;
- generate added value through (i) avoidance of credit deterioration, either as a result of a decline in credit rating based on internal research and/or external rating agencies or which occurs when the Sub-Investment Manager believes, based on research, that the fundamentals of a security are in decline and accordingly will dispose of or will not invest in such securities; (ii) relative value analysis (i.e. seeking to exploit perceived under or over valuation of assets (based on views of, including, but not exhaustive, ratings, corporate fundamentals and industry) carried out as part of the Sub-Investment Manager's proprietary research and (iii) industry and quality rotation by selling out of a security in one industry or credit tier and buying into another.

The Portfolio may opportunistically invest up to 10% of its Net Asset Value in participation interests in floating or adjustable rate senior secured loans, which are securitised and freely transferable, and which meet the regulatory criteria to be considered money market instruments.

The Portfolio is actively managed and does not intend to track the Benchmark which is included here for performance comparison purposes and because the Portfolio's investment policy restricts the extent to which the Portfolio's holdings may deviate from the Benchmark, as described above. This deviation may be significant.

Benchmark	<p>The ICE BofA European Currency Non-Financial High Yield 3% Constrained Index (Total Return, EUR) which measures the performance of non-financial below-investment grade corporate debt denominated in Euro and GBP, publicly issued in the eurobond, sterling domestic or euro domestic markets and caps exposure to any issuer at 3%.</p> <p>Shareholders in a Class which is denominated in a currency other than the Base Currency should note that, where available, it may be more meaningful to compare the performance of such Class against a version of this index which is denominated in the relevant Class currency.</p>
Base Currency	Euro (EUR).
Instruments / Asset Classes	<p>The Portfolio will invest mainly in high yield fixed income securities. The Portfolio can invest in or be exposed to the following types of assets.</p> <p>Fixed Income Securities (Debt securities). These securities may include:</p> <ul style="list-style-type: none"> • Corporate bonds, debentures and notes on corporate bonds (both fixed and floating rate securities) such as loan participation notes; • Contingent convertible bonds, subject to a limit of up to 10% of the Portfolio's Net Asset Value; • Privately issued mortgage-backed securities, asset-backed securities, structured securities that derive interest and principal payments from specified assets or indices (including mortgage-backed securities such as pass-through certificates, collateralised mortgage obligations, and interest and principal only components of mortgage-backed securities); • Collateralised loan obligations, subject to a limit of up to 10% of the Portfolio's Net Asset Value; and • Payment-in-kind bonds (which are bonds that pay interest in the form of additional bonds of the same kind), deferred payment securities (securities which pay regular interest after a predetermined date), and zero coupon securities. <p>High yield fixed income securities are medium or lower rated securities, generally those rated below investment grade (Baa3, BBB- or above) by one or more Recognised Agencies.</p> <p>The Portfolio may also invest in other debt securities including convertible notes, convertible bonds and equity securities (where the holding of equity securities has resulted from the conversion of convertible bonds) issued by European corporate and other corporate issuers and are listed, dealt or traded on Recognised Markets.</p> <p>Money Market Instruments. The Portfolio may also invest in money market instruments including bank deposits, fixed or floating rate instruments (including commercial paper), floating or variable rate notes, bankers acceptances, certificates of deposit, debentures and short-dated government or corporate bonds, participation interests in loans (which are securitised and freely transferable), cash and cash equivalents (including treasury bills) that are rated as investment grade or below by Recognised Rating Agencies or are unrated.</p> <p>Equity Securities. Equity securities (both common and preferred) issued by companies which have their head office or exercise an overriding part of their economic activity in Europe, and/or which may be denominated in a European currency.</p> <p>Financial Derivative Instruments ("FDIs"). Subject to the conditions and limits imposed by the Central Bank as set out in the Prospectus and this Supplement, the</p>

Portfolio may use the following FDI for hedging and/or efficient portfolio management:

- Swaps may include currency swaps, credit default swaps, interest rate swaps, UCITS eligible index swaps and total return swaps to obtain exposure to the broad European high yield fixed income market pending investment in the securities described above and to hedge existing long positions. The maximum proportion of the Portfolio's Net Asset Value that can be subject to total return swaps is 10%. The expected proportion of the Portfolio's Net Asset Value that will be subject to total return swaps is 0%. The expected proportions are not limits and the actual percentages may vary over time depending on factors including, but not limited to, market conditions;
- Future contracts based on interest rates or UCITS eligible bond indices may be used to hedge interest rate risk and existing long positions;
- Options on UCITS eligible bond index futures and UCITS eligible bond indices may be used to achieve a profit as well as to hedge existing long positions;
- Forward contracts on fixed income securities may be used to achieve a profit, through gaining exposure to an increase in the value of such securities as well as to hedge existing long positions; and
- Forward currency contracts may be used to achieve a profit through gaining exposure to an increase in the value of currencies, as well as to hedge existing long currency exposures.

As the Portfolio may purchase FDI generally using only a fraction of the assets that would be needed to purchase the relevant securities directly, the remainder of the assets allocated to the Portfolio may be invested in the other types of securities listed in this "*Instruments/Asset Classes*" section. The Sub-Investment Manager may therefore seek to achieve greater returns by purchasing derivative instruments and investing the remaining assets in such other securities as listed above to add excess return. The Sub-Investment Manager may therefore seek to achieve greater returns by purchasing derivative instruments and investing the remaining assets in such other securities to add excess return. Any indices to which exposure is taken through FDI will be broad-based, UCITS-eligible indices which provide exposure to the performance of the types of assets in which the Portfolio may invest, as described in this "*Instruments/Asset Classes*" section. Details of such indices utilised by the Portfolio will be contained in the annual report of the Company.

The counterparties to OTC FDI entered into in respect of the Portfolio will be entities (which will not be related to the Manager or its delegates) with legal personality which may be located globally. They will be subject to ongoing supervision by a public authority, be rated at or in excess of the requirements of the Central Bank by a Recognised Rating Agency and have the necessary organisational structure and resources for the relevant type of transaction. The Portfolio may be leveraged as a result of its investments in FDI but such leverage will not exceed 100% of the Portfolio's Net Asset Value, as measured using the Commitment Approach, at any time.

Repo Contracts and Securities Lending Agreements. Repo Contracts and Securities Lending Agreements may be used subject to the conditions and limits set out in the Prospectus.

Investment Restrictions

- Under normal market conditions, it is the intention of the Sub-Investment Manager to invest at least 80% of the Portfolio's Net Asset Value in high yield fixed income securities which are unrated or rated below investment grade.
- There are no restrictions on the average maturity of the Portfolio or the maturity of any single instrument. Maturities may vary widely depending on the Sub-Investment Manager's assessment of interest rate trends and other economic and market factors.
- Any cash held by the Portfolio will be held solely as an ancillary liquid asset.
- The Portfolio may not invest more than 10% of its Net Asset Value in equity securities.
- The Portfolio's investments in participation interests in loans and in unlisted loan participation notes will not exceed 10% of its Net Asset Value.
- The maximum holding in a single issuer is 5% of the Portfolio's Net Asset Value.

- The Portfolio may invest up to 10% of its Net Asset Value in securities that are issued or guaranteed by a single sovereign issuer and that are below investment grade.
- The Portfolio is prohibited from purchasing the securities of issuers that are involved in tobacco production such as cigars, cigarettes, e-cigarettes, smokeless tobacco, dissolvable and chewing tobacco. This also includes issuers that grow or process raw tobacco leaves.
- The Portfolio is prohibited from purchasing the securities of issuers which derive substantial revenue from the extraction of coal or the use of unconventional methods to extract oil and gas. Substantial revenue is defined for this purpose as follows:
 - Issuers should not derive more than 10% of revenue from the mining of thermal coal.
 - Issuers should not derive more than 10% of revenue from oil sands extraction.
- The Portfolio is prohibited from purchasing the securities of issuers that are involved in the manufacturing of civilian firearms.
- The Portfolio is prohibited from purchasing the securities of issuers that own, operate or primarily provide integral services to private prisons, given significant social controversy, reputational risks, dependency on their local government policies and facilities which are not easily reconfigurable for alternate uses.
- The Portfolio will only purchase the securities of issuers for which power generation makes up more than 10% of revenue, where they are aligned with a lower carbon emissions economy. The Portfolio is therefore prohibited from investing in generators where:
 - More than 30% of MWh generation is derived from thermal coal.
 - More than 30% of MWh generation is derived from liquid fuels (oil).
 - Natural Gas Electricity Generation. More than 90% of MWh generation is derived from natural gas. This threshold may decline over time, to align with a glide path to greater renewables penetration.
- The Portfolio will not utilise margin lending.

Risk

- Investment in the Portfolio carries certain risks which are described in greater detail in the “*Investment Risks*” section of the Prospectus. While investors should read and consider the entire “*Investment Risks*” section of the Prospectus, the risks summarised in the following section, namely, “*Market Risks: Risks relating to Debt Securities*” are particularly relevant to this Portfolio. **These risks are not purported to be exhaustive and potential investors should review this Supplement and the Prospectus in their entirety and consult with their professional advisers, before making an application for Shares.**
- Investors should refer to the Company’s risk management policy with respect to the use of FDI contained in the RMP Statement.
- The Sub-Investment Manager will seek to anticipate spread movements in response to changes in economic conditions, industry fundamentals, issuer specific financial performance and other issuer specific factors. Investment decisions will be based on analysis of historical spread relationships, break-even yield spread analysis and total return projections.
- The Sub-Investment Manager will use currency futures, currency swaps and forward currency contracts in order to hedge currency risk.
- The Portfolio may be leveraged as a result of its investments in FDI but such leverage will not exceed 100% of the Portfolio’s Net Asset Value, as measured using the Commitment Approach, at any time.

Environmental, Social and Governance (“ESG”)

This Portfolio meets the classification of an Article 8 Portfolio as it promotes environmental and social characteristics and limits investments to companies that follow good governance practices.

ESG risks and opportunities are systematically considered in the selection of securities to be constituents of the Portfolio. The Sub-Investment Manager assesses securities in relation to their exposure to and the management of ESG risks. ESG represents governance, (being the way in which the company is run), environmental issues, (such as the impact on natural resources), and social issues (such as human

rights).

Please also refer to Annex VI of the Prospectus which contains additional SFDR disclosures which are applicable to this Portfolio.

Typical Investor Profile The Portfolio may be suitable for investors with a medium to long-term horizon who are prepared to accept the risks of the bond market together with higher levels of price volatility than generally associated with fixed income funds due to the Portfolio's investment policies or portfolio management techniques.

Fees and Expenses

Category	Maximum Initial Charge	Maximum Management fee	Distribution Fee
A, X, Y	5.00%	1.20%	0.00%
B, C1, C2, E	0.00%	1.80%	1.00%

Z	0.00%	0.00%	0.00%

For details of the Administration Fees payable by the Portfolio, please see the "Administration Fees" heading in the "Fees and Expenses" section of the Prospectus.

Contingent deferred sales charges

Contingent deferred sales charges will be payable in respect of the following Classes at the rates specified below, depending on the period that has elapsed since the issue of the Shares being redeemed and will be charged on the lower of the Net Asset Value per Share on the relevant Dealing Day in respect of which the relevant Shares were (i) initially subscribed or (ii) redeemed. Any such contingent deferred sales charges will be paid to the relevant Distributor, the Manager or to the Sub-Investment Manager.

Class	Redemption Period in Calendar Days

C2	2%	1%	0%	0%	0%
E	3%	2%	1%	0%	0%

Other important information for investors in Hong Kong

As the Portfolio has been authorised for public offer in Hong Kong, the Hong Kong Securities and Futures Commission ("HKSF") requires the Company to classify the Portfolio on the basis of its expected maximum net derivative exposure ("NDE"). The HKSF requires the NDE to be calculated in accordance with the HKSF's Code on Unit Trusts and Mutual Funds and the requirements and guidance issued by the HKSF, which may be updated from time to time. This requires the Company to convert all FDI acquired for investment purposes that would generate incremental leverage at the portfolio level of the Portfolio into their equivalent positions in the underlying assets. Applying these requirements, the Portfolio's NDE is expected to be less than 50% but the actual level may be higher than the expected level in exceptional circumstances, for example when there are sudden movements in markets and/or investment prices.

For the avoidance of doubt, complying with the HKSF's requirements to classify the Portfolio on the basis of its NDE does not amend the investment objectives or policies or otherwise impact the management of the Portfolio or its use of FDI, as the requirements are solely to measure the Portfolio's expected use of FDI, as described above, using the HKSF's methodology and disclose the results.

Neuberger Berman Global High Yield Bond Fund

An investment in the Portfolio should not constitute a substantial proportion of an investment portfolio and may not be appropriate for all investors. The Portfolio will not use FDI extensively or primarily for investment purposes.

Investment Objective	Seeks to maximise current income whilst preserving capital by investing in the global high yield fixed income market.
Investment Approach	<p>The Portfolio will aim to achieve its objective by investing primarily in:</p> <ul style="list-style-type: none"> • US dollar and non-U.S. dollar denominated high yield fixed income securities that are issued or guaranteed by corporate issuers of any industrial sector; and • Short duration, high yield fixed income securities issued by governments and agencies globally that are primarily denominated in US Dollars <p>located throughout the world that are listed, dealt or traded on Recognised Markets.</p> <p>The Portfolio will invest primarily in securities denominated in the currencies included in the Benchmark.</p> <p>The Portfolio's investments will be fully hedged into its Base Currency through the use of forward and future contracts as set out below in the "<i>Instruments/Asset Classes</i>" section.</p> <p>The Portfolio may also invest, on an ancillary basis, in equity securities as set out below in the "<i>Instruments/Asset Classes</i>" section and unlisted money market instruments issued by companies located throughout the world.</p> <p>The Manager and the Sub-Investment Manager will seek to select securities from the result of in-depth credit research, utilising proprietary analytical tools which seek to assess the strength of a company's credit profile, examples of which include but are not limited to:</p> <ul style="list-style-type: none"> (i) their ability to pay principal and interest, their cash flow and balance sheet composition, (ii) their market position relative to competitors, (iii) the Sub-Investment Manager's assessment of Environmental, Social, and Governance (ESG) factors through the team's proprietary scoring system as well as proactive engagement on ESG related topics. <p>The Manager and the Sub-Investment Manager will take a disciplined approach to investing on behalf of the Portfolio by attempting to maintain a portfolio that is typically diversified across issuers, industry sectors and maturities. The securities selected will depend on the Manager and/or the Sub-Investment Manager's analysis of the prevailing market conditions and considered in light of the investment objective of the Portfolio. In selecting fixed income or equity securities for investment, the Manager and the Sub-Investment Manager may seek to (where applicable):</p> <ul style="list-style-type: none"> • capitalise on market opportunities in areas of the high yield market which the Manager and the Sub-Investment Manager believe are undervalued; and/or • generate added value through: (i) avoidance of credit deterioration, either as a result of a decline in credit rating based on internal research and/or external rating agencies or which occurs when the Manager and the Sub-Investment Manager believe, based on research, that the fundamentals of a security are in decline and accordingly will dispose of or will not invest in such securities; (ii) relative value analysis (i.e. seeking to exploit perceived under or over valuation of assets (based

on views of, including, but not exhaustive, ratings, corporate fundamentals and industry) carried out as part of the Manager and the Sub-Investment Manager's proprietary research and (iii) industry and quality rotation by selling out of a security in one industry or credit tier and buying into another.

In addition, the Portfolio may also invest in securities of companies located in and governments of Emerging Market Countries, which may involve additional risk, relative to investment in more developed economies.

The Portfolio may opportunistically invest up to 10% of its Net Asset Value in participation interests in floating or adjustable rate senior secured loans, which are securitised and freely transferable, and which meet the regulatory criteria to be considered money market instruments.

The Portfolio is actively managed and does not intend to track the Benchmark which is included here for performance comparison purposes and because the Portfolio's investment policy restricts the extent to which the Portfolio's holdings may deviate from the Benchmark, as described above. This deviation may be significant.

Benchmark	<p>The ICE BofA Global High Yield Constrained Index (Total Return, Hedged, USD) tracks the performance of USD, CAD, GBP and EUR-denominated below investment grade corporate debt publicly issued in the major domestic or Eurobond markets and limits exposure to each issuer included in the index to a maximum of 2% of the index.</p> <p>Shareholders in a Class which is denominated in a currency other than the Base Currency should note that, where available, it may be more meaningful to compare the performance of such Class against a version of this index which is denominated in the relevant Class currency.</p>
Base Currency	U.S. Dollars (USD).
Instruments / Asset Classes	<p>The Portfolio will invest mainly in high yield fixed income securities, including:</p> <p>Fixed Income Securities (Debt securities). These securities may include:</p> <ul style="list-style-type: none"> • Both fixed and floating rate securities; • Corporate bonds, bonds with warrants, convertible bonds, bonds resulting from the restructuring of syndicated loans or bank loans (e.g. "Brady" bonds), subordinated bonds, debentures and notes (including freely transferable and unleveraged structured notes and freely transferable promissory notes), asset-backed securities; • Contingent convertible bonds, subject to a limit of up to 10% of the Portfolio's Net Asset Value; • Debt securities issued by governments and commercial banks; • Deferred payment securities (securities which pay regular interest after a predetermined date), zero coupon securities that are rated below investment-grade (often referred to as "junk bonds"), payment-in-kind bonds (which are bonds that pay interest in the form of additional bonds of the same kind); and • Collateralised loan obligations, subject to a limit of up to 10% of the Portfolio's Net Asset Value. <p>Money Market Instruments. The Portfolio may also invest on an ancillary basis in money market instruments including bank deposits, fixed or floating rate instruments (including commercial paper), floating or variable rate notes, bankers acceptances, certificates of deposit, debentures and short-dated government or corporate bonds, participation interests in loans (which are securitised and freely transferable), cash and cash equivalents (including treasury bills) that are rated as investment grade or below by Recognised Rating Agencies or are unrated.</p> <p>Equity Securities. Equity securities (both common and preferred) issued by US and other issuers which are listed, dealt or traded on Recognised Markets</p> <p>Financial Derivative Instruments ("FDIs") subject to the conditions and limits</p>

imposed by the Central Bank as set out in the Prospectus and this Supplement, the Portfolio may use the following FDI for hedging and/or efficient portfolio management:

- Swaps may include currency swaps, credit default swaps, interest rate swaps, UCITS eligible index swaps and total return swaps to obtain exposure to the broad short duration, high yield fixed income market pending investment in the securities described above and to hedge existing long positions. The maximum proportion of the Portfolio's Net Asset Value that can be subject to total return swaps is 10%. The expected proportion of the Portfolio's Net Asset Value that will be subject to total return swaps is 0%. The expected proportions are not limits and the actual percentages may vary over time depending on factors including, but not limited to, market conditions;
- Future contracts based on interest rates, fixed income securities or UCITS eligible bond indices may be used to hedge interest rate risk and existing long positions;
- Options on UCITS eligible bond index futures and UCITS eligible bond indices may be used to achieve a profit as well as to hedge existing long positions;
- Forward contracts on fixed income securities may be used to achieve a profit, through gaining exposure to an increase in the value of such securities as well as to hedge existing long positions; and
- Forward and non-deliverable forward currency contracts may be used to achieve a profit through gaining exposure to an increase in the value of currencies, as well as to hedge existing long currency exposures.

As the Portfolio may purchase FDI generally using only a fraction of the assets that would be needed to purchase the relevant securities directly, the remainder of the assets allocated to the Portfolio may be invested in the other types of securities listed in this "*Instruments/Asset Classes*" section. The Manager and/or the Sub-Investment Manager may therefore seek to achieve greater returns by purchasing derivative instruments and investing the remaining assets in such other securities as listed above to add excess return. The Manager and/or the Sub-Investment Manager may therefore seek to achieve greater returns by purchasing derivative instruments and investing the remaining assets in such other securities to add excess return. Any indices to which exposure is taken through FDI will be broad-based, UCITS-eligible indices which provide exposure to the performance of the types of assets in which the Portfolio may invest, as described in this "*Instruments/Asset Classes*" section. Details of such indices utilised by the Portfolio will be contained in the annual report of the Company.

The counterparties to OTC FDI entered into in respect of the Portfolio will be entities (which will not be related to the Manager or its delegates) with legal personality which may be located globally. They will be subject to ongoing supervision by a public authority, be rated at or in excess of the requirements of the Central Bank by a Recognised Rating Agency and have the necessary organisational structure and resources for the relevant type of transaction.

The Portfolio may be leveraged as a result of its investments in FDI, but such leverage will not exceed 100% of the Portfolio's Net Asset Value at any time.

Repo Contracts and Securities Lending Agreements. Repo Contracts and Securities Lending Agreements may be used subject to the conditions and limits set out in the Prospectus.

Investment Restrictions

- Under normal market conditions, it is the intention of the Manager and the Sub-Investment Manager to invest at least 80% of the Portfolio's available assets in high yield fixed income securities. High yield fixed income securities are medium or lower rated securities, generally those rated below investment grade (Baa3, BBB- or above) by one or more Recognised Rating Agency, sometimes referred to as "junk bonds".
 - There are no restrictions on the average maturity of the Portfolio or the maturity of any single instrument. Maturities may vary widely depending on the Manager or the Sub-Investment Manager's assessment of interest rate trends and other economic and market factors.
 - Any cash held by the Portfolio will be held solely as an ancillary liquid asset.
-

- The Portfolio may not invest more than 10% of its Net Asset Value in equity securities.
- The Portfolio may invest up to 10% of its Net Asset Value in securities that are issued or guaranteed by a single sovereign issuer that are below investment grade.
- The Portfolio may invest in excess of 20% of its Net Asset Value in securities of companies located in and governments of Emerging Market Countries.
- The Portfolio will not utilise margin lending.
- The maximum holding in a single issuer is 5% of the Portfolio's Net Asset Value.

Risk

- Investment in the Portfolio carries certain risks which are described in greater detail in the “*Investment Risks*” section of the Prospectus. While investors should read and consider the entire “*Investment Risks*” section of the Prospectus, the risks summarised in the following sections, namely, “*Market Risks: Risks relating to Debt Securities*” and “*Market Risks: Risks relating to Emerging Markets*” are particularly relevant to this Portfolio. **These risks are not purported to be exhaustive and potential investors should review this Supplement and the Prospectus in their entirety and consult with their professional advisers, before making an application for Shares.**
- Investors should refer to the Company's risk management policy with respect to the use of FDI contained in the RMP Statement.
- The Manager and the Sub-Investment Manager will seek to anticipate spread movements in response to changes in economic conditions, industry fundamentals, issuer specific financial performance and other issuer specific factors. Investment decisions will be based on analysis of historical spread relationships, break-even yield spread analysis and total return projections.
- The Manager and the Sub-Investment Manager will use forward currency contracts in order to hedge currency risk.
- The Portfolio may be leveraged as a result of its investments in FDI but such leverage will not exceed 100% of the Portfolio's Net Asset Value, as measured using the Commitment Approach, at any time.

Environmental, Social and Governance (“ESG”)

This Portfolio meets the classification of an Article 8 Portfolio as it promotes environmental and social characteristics and limits investments to companies that follow good governance practices.

ESG risks and opportunities are systematically considered in the selection of securities to be constituents of the Portfolio. The Manager and the Sub-Investment Manager assess securities in relation to their exposure to and the management of ESG risks. ESG represents governance, (being the way in which the company is run), environmental issues, (such as the impact on natural resources), and social issues (such as human rights).

Please also refer to Annex VI of the Prospectus which contains additional SFDR disclosures which are applicable to this Portfolio.

Typical Investor Profile

The Portfolio may be suitable for investors with a medium to long term horizon who are prepared to accept the risks of the bond market together with higher levels of price volatility than generally associated with fixed income funds due to the Portfolio's investment policies or portfolio management techniques.

Fees and Expenses

The Manager may be entitled to receive a performance fee payable out of the Portfolio's assets in respect of each PF Class in the Portfolio.

Definitions

Benchmark	ICE BofA Global High Yield Constrained Index in relevant class currency (as detailed below)
Calculation Period	The Calculation Period shall normally run from 1 January to 31 December in each year except that:

	<ul style="list-style-type: none"> in the case of the initial issue of Shares in each PF Class, the first Calculation Period will run from the date of issue to 31 December; in the case of the termination of a PF Class, the Calculation Period will terminate on the date of the termination; and in the case of the termination of the Management Agreement in any year, the Calculation Period will terminate on the date of the termination. <p>The first value used in determining the first Performance Fee for a PF Class shall be the Initial Offer Price.</p>
Crystallisation	The point at which any performance fee becomes payable to the Manager. Crystallisation will occur either at the end of the Calculation Period or on a Dealing Day on which a Shareholder redeems or converts all or part of its Shareholding.
Outperformance	The excess performance of the Net Asset Value per Share over the performance of the Benchmark during the Calculation Period.

Methodology

For each Calculation Period, a Performance Fee in respect of each PF Class in issue becomes due in respect of any Outperformance, i.e. the excess performance of the Net Asset Value per Share (net of all costs before the deduction of any accrued Performance Fee, provided that in doing so it is in the Shareholder's best interest) over the performance of the Benchmark applicable to that particular PF Class during the Calculation Period. The Percentage Fee will be calculated on each Dealing Day and will be equal to 20% of the Outperformance applicable to that particular PF Class over the same period.

In all cases the Net Asset Value per Share used in the calculation of the Performance Fee is unswung, i.e. it does not include any adjustment for swing pricing.

In the event that the performance of a PF Class over a Calculation Period is less than that of the Benchmark, no Performance Fee shall be payable in respect of that PF Class until such cumulative underperformance relative to its Benchmark has been recovered.

In the event that the PF Class has achieved Outperformance over a Calculation Period, a Performance Fee shall be payable in respect of that PF Class. Upon payment the Benchmark will be reset, this process ensures the Net Asset Value per Share and the Benchmark start from the same place at the start of the calculation period. Accordingly for the next Calculation Period the commencing Benchmark value will equal the Net Asset Value in respect of the PF Class on which the performance fee was paid i.e. if the Net Asset Value were to equal 110 the commencing Benchmark Value would also equal 110.

Benchmark Indices

Classes	Index	Code
USD PF Classes	ICE BofA Global High Yield Constrained Index	HWOC select currency USD
EUR Hedged PF Classes	ICE BofA Global High Yield Constrained Index - EUR Hedged	HWOC select currency EUR
GBP Hedged PF Classes	ICE BofA Global High Yield Constrained Index - GBP Hedged	HWOC select currency GBP

Shareholders should note that, as the Performance Fee is payable on the outperformance over the Benchmark, they may be charged a Performance Fee where the Net Asset Value of their Shares has declined but to a lesser extent than the Benchmark.

Shareholders should note that, as the Performance Fee is calculated at Class level and not at an individual Shareholder level, they may be charged a Performance Fee even where the Net Asset Value of their Shares has remained the same or dropped, for example, where Shareholders purchase or redeem Shares at points other than the start and end of a Calculation Period.

The Performance Fee will be accrued in the Net Asset Value on each Dealing Day and will normally be payable to the Manager in arrears within 30 Business Days of the end of each Calculation Period. However, in the case of Shares redeemed during a Calculation Period, the accrued Performance Fee in respect of those Shares will be payable to the Manager within 30 Business Days of the date of redemption.

Crystallised Performance Fees shall remain in the relevant PF Class (but shall not participate in subsequent gains and losses of the relevant Class) until paid to the Manager and shall not be used or made available to satisfy redemptions or pay any fees and expenses of the relevant PF Class.

The Depositary shall verify the calculation of the performance fee and ensure that it is not open to the possibility of manipulation.

The Directors may, with the consent of the Manager, reduce the Performance Fee payable by any PF Class. Performance Fees are payable on realised and unrealised capital gains, which for the avoidance of doubt includes investment income, taking into account realised and unrealised losses at the end of the Calculation Period. Consequently, Performance Fees may be paid on unrealised gains which may subsequently never be realised.

WORKED EXAMPLES

Examples 1 to 3 show how the Performance Fee is calculated, accrued and crystallised. All valuation points fall within one Calculation Period.

Valuation point	1	2	3	4
NAV of PF Class Shares	US\$10.000	US\$10.100	US\$9.900	US\$10.200
Benchmark	US\$10.000	US\$10.050	US\$10.100	US\$10.150

Example 1

Investor A acquires PF Class Shares at valuation point 1 for US\$10.000 per Share

	Acquisition of Shares	Accrued Performance Fee	Crystallised Performance Fee
Valuation point 1	US\$10.000		
Valuation point 2		$20\% \times (\text{US}\$10.100 - \text{US}\$10.050) = \text{US}\$0.01$	Accrued in NAV
Valuation point 3		None: NAV < Benchmark	
Valuation point 4		$20\% \times (\text{US}\$10.200 - \text{US}\$10.150) = \text{US}\$0.01$	Accrued in NAV

Example 2

Investor B acquires PF Class Shares at valuation point 3 for US\$9.900 per Share

	Acquisition of Shares	Accrued Performance Fee	Crystallised Performance Fee
Valuation point 1			
Valuation point 2			
Valuation point 3	US\$9.900		
Valuation point 4		$20\% \times (\text{US}\$10.200 - \text{US}\$10.150) = \text{US}\$0.01$	Accrued in NAV

Example 3

Investor C acquires PF Class Shares at valuation point 1 for US\$10.000 per Share and redeems at valuation point 4

	Acquisition of Shares	Accrued Performance Fee	Crystallised Performance Fee
Valuation point 1	US\$10.000		
Valuation point 2		20% x (US\$10.100 - US\$10.050) = US\$0.01	Accrued in NAV
Valuation point 3		None: NAV < Benchmark	
Valuation point 4		20% x (US\$10.200 - US\$10.150) = US\$0.01	US\$0.01

SCENARIOS¹

All scenarios show the value of US\$100K invested in Shares in a PF Class

Scenario 1 illustrates the effect of the NAV performance being 5% per annum and the Benchmark return being 3% in three consecutive years

Scenario 2 illustrates the effect of the NAV growth being 6%, -4%, and 6% and the Benchmark return being 3%, -2% and 3% in three consecutive years

Scenario 3 illustrates the effect of the NAV growth at 8%, 0% and -1% and the Benchmark return being 4%, 0% and -5% in three consecutive years

Scenario 1

	Period One	Period Two	Period Three
	5% growth	5% growth	5% growth
Gross Value of PF Class Shares at year end	US\$105,000	US\$109,565	US\$114,329
Management Fee 0.10%	US\$105	US\$110	US\$114
Other expenses 0.20%	US\$210	US\$219	US\$229
Initial Net Asset Value of PF Class Shares at year end	US\$104,685	US\$109,237	US\$113,986
Benchmark	US\$103,000	US\$107,4782	US\$112,1522
Performance Fee (20% of NAV outperformance over Benchmark)	US\$337 As NAV > Benchmark, 20% x (US\$104,685 - US\$103,000)	US\$352 As NAV > Benchmark, 20% x (US\$109,237 - US\$107,478)	US\$367 As NAV > Benchmark, 20% x (US\$113,986 - US\$112,152)
Total Fees Paid	US\$652	US\$680	US\$710
Final Net Asset Value of PF Class Shares at year end	US\$104,348	US\$108,885	US\$113,619

¹ Investors should note that these scenarios are purely intended to be illustrative of the impact of different investment performance and have been simplified in some non-material respects to aid this understanding. For example, management fees and other expenses are in reality accrued on a daily basis but their calculation is presented in a simplified manner here for ease of review.

² Where a Performance Fee is paid in respect of a Calculation Period, the Benchmark is reset at the beginning of the next Calculation Period.

Scenario 2

	Period One	Period Two	Period Three
	6% growth	-4% growth	6% growth
Gross Value of PF Class Shares at year end	US\$106,000	US\$100,940	US\$106,675
Management Fee 0.10%	US\$106	US\$101	US\$107
Other expenses 0.20%	US\$212	US\$202	US\$213
Initial Net Asset Value of PF Class Shares at year end	US\$105,682	US\$100,637	US\$106,355
Benchmark	US\$103,000	US\$103,0432	US\$106,134
Performance Fee (20% of NAV outperformance over Benchmark)	US\$536 As NAV > Benchmark, 20% x (US\$105,682 - US\$103,000)	US\$0 Benchmark > NAV	US\$44 As NAV > Benchmark, 20% x (US\$106,355 - US\$106,134)
Total Fees Paid	US\$854	US\$303	US\$364
Final Net Asset Value of PF Class Shares at year end	US\$105,146	US\$100,637	US\$106,311

Scenario 3

	Period One	Period Two	Period Three
	8% growth	0% growth	-1% growth
Gross Value of PF Class Shares at year end	US\$108,000	US\$106,941	US\$105,554
Management Fee 0.10%	US\$108	US\$107	US\$106
Other expenses 0.20%	US\$216	US\$214	US\$211
Initial Net Asset Value of PF Class Shares at year end	US\$107,676	US\$106,620	US\$105,237
Benchmark	US\$104,000	US\$106,9412	US\$101,594
Performance Fee (20% of NAV outperformance over Benchmark)	US\$735 As NAV > Benchmark, 20% x (US\$107,676 - US\$104,000)	US\$0 Benchmark > NAV	US\$729 As NAV > Benchmark, 20% x (US\$105,237 - US\$101,594)
Total Fees Paid	US\$1,059	US\$321	US\$1,045
Final Net Asset Value of PF Class Shares at year end	US\$106,941	US\$106,620	US\$104,508

Performance fee share classes

Category	Maximum Initial Charge	Maximum Management fee	Distribution Fee
Z (PF)	0.00%	0.10%	0.00%

For details of the Administration Fees payable by the Portfolio, please see the “Administration Fees” heading in the “Fees and Expenses” section of the Prospectus.

Non-Performance fee share classes

The following Classes will not be subject to the Performance Fee described above and will be subject to the following fees.

Category	Maximum Initial Charge	Maximum Management fee	Distribution Fee
A, X, Y	5.00%	1.20%	0.00%
B, C1, C2, E	0.00%	1.80%	1.00%
C	0.00%	0.80%	1.00%
D, I, I2, I3, I4, I5	0.00%	0.60%	0.00%
M	2.00%	1.20%	0.60%
P	5.00%	0.57%	0.00%
T	5.00%	1.80%	0.00%

Z	0.00%	0.00%	0.00%

For details of the Administration Fees payable by the Portfolio, please see the “Administration Fees” heading in the “Fees and Expenses” section of the Prospectus.

Contingent deferred sales charges

Contingent deferred sales charges will be payable in respect of the following Classes at the rates specified below, depending on the period that has elapsed since the issue of the Shares being redeemed and will be charged on the lower of the Net Asset Value per Share on the relevant Dealing Day in respect of which the relevant Shares were (i) initially subscribed or (ii) redeemed. Any such contingent deferred sales charges will be paid to the relevant Distributor, the Manager or to the Sub-Investment Manager.

Class	Redemption Period in Calendar Days				
	< 365	365 - 729	730 - 1094	1095 – 1459	> 1459
B	4%	3%	2%	1%	0%
C, C1	1%	0%	0%	0%	0%
C2	2%	1%	0%	0%	0%
E	3%	2%	1%	0%	0%

For further information on fees, please refer to the “Fees and Expenses” section of the Prospectus.

Neuberger Berman Global High Yield Sustainable Action Fund

An investment in the Portfolio should not constitute a substantial proportion of an investment portfolio and may not be appropriate for all investors. The value of Shares may go down as well as up and investors may not get back any of the amount invested.

The Investment Objective To achieve a total return (income plus capital appreciation) with an emphasis on current income, from investments in an actively managed portfolio of global high yield fixed income securities that comply with the Sustainable Criteria.

Investment Approach The Manager and the Sub-Investment Manager will seek to achieve the Portfolio's investment objective by investing in bonds and other transferable fixed income debt securities which meet the Sustainable Criteria and which are rated below investment grade. Issuers of these securities may be located in any country, including emerging markets and may be across a variety of industry sectors and maturities.

In determining the investments which the Portfolio will make, the Manager and the Sub-Investment Manager will:

- exclude securities based upon the Sustainable Criteria;
- prioritise issuers based on total return opportunity (ie, income and capital appreciation) and sustainability profile, with an emphasis on:
 - issuers with business practices and/or products and services aligned with the Sustainable Development Goals; and/or
 - issuers where the Manager and the Sub-Investment Manager identify potential for increased alignment with the Sustainable Development Goals through active engagement.
- assess the potential for active engagement with the issuer on specific objectives aligned with the Sustainable Development Goals, which will be tracked over-time and such progress will be reported to the Shareholders.
- evaluate securities based upon the application of a fundamental, bottom-up credit research framework, seeking to identify securities that they believe are undervalued or have the ability to generate added value through:
 - the avoidance of credit deterioration, either as a result of a decline in credit rating based on research conducted by the Manager and the Sub-Investment Manager and/or external rating agencies or in circumstances where the Manager and the Sub-Investment Manager believe, based on research, that the fundamentals of a security are in decline;
 - relative value analysis (i.e. seeking to exploit perceived under or over valuation of assets), which is based on views of, including, but limited to: credit ratings, corporate fundamentals of the issuer and the industries in which the issuers are active, carried out as part of the Manager's and the Sub-Investment Manager's proprietary research; and
 - industry and quality rotation – i.e. selling out of a security in one industry or credit tier and buying another.

The Portfolio is actively managed and does not use any benchmarks for management or performance comparison purposes.

The Portfolio does not take currency views and aims to hedge any non-USD assets to USD.

There are no credit quality restrictions applicable to the investments and the Portfolio may invest up to 100% of its Net Asset Value in high yield and unrated debt securities.

The Portfolio may opportunistically invest up to 10% of its Net Asset Value in participation interests in floating or adjustable rate senior secured loans, which are securitised and

freely transferable, and which meet the regulatory criteria to be considered money market instruments.

Investors should note that this Portfolio seeks to apply the Sustainable Exclusion Policy that has been adopted by both the Manager and by the Sub-Investment Manager along with the application of the exclusions set out in the Enhanced Sustainable Exclusion Policy, as such terms are defined within the “*Sustainable Investment Criteria*” section of the Prospectus. Investors should refer to the information contained in that section for further details about the application of both the Sustainable Exclusion Policy and Enhanced Sustainable Exclusion Policy to the Portfolio.

ESG analysis: the Sub-Investment Manager will first exclude companies from the investment universe that are involved in controversial activities and behaviour, such as the production of controversial weapons, fur manufacturers, gambling, nuclear power or non-compliance with the United Nations Global Compact. The application of the Enhanced Sustainable Exclusion Policy, as such terms are defined within the “*Sustainable Investment Criteria*” section of the Prospectus, also means that companies involved in tobacco, civilian firearms, private prisons and fossil fuels will also be excluded.

The Sub-Investment Manager will then assess the investment universe, which involves in-depth research and analysis of companies’ ESG profiles and will also exclude companies that show poorly on this ESG assessment. The Sub-Investment Manager will ensure that securities representing at least 90% of the Net Asset Value of the Portfolio are covered by the ESG assessment.

Through these two ESG exclusionary steps, the Sub-Investment Manager will exclude at least 20% of components of the investment universe.

The Portfolio’s use of derivatives (for hedging and portfolio management purposes) and investments in cash and near cash may not adhere to the Sustainable Criteria restrictions, which apply to the Portfolio’s investments in global high yield fixed income securities, given the nature of the investments.

The Portfolio may have or may be expected to have medium to high volatility due to its investment policies or portfolio management techniques.

Benchmark	N/A
Base Currency	U.S. Dollars (USD).
Instruments / Asset Classes	<p>The Portfolio will primarily invest in or take exposure to high yield, fixed income securities. The Portfolio can invest in or be exposed to the following types of assets.</p> <p>Fixed Income Securities (Debt Securities). These securities may include:</p> <ul style="list-style-type: none"> • Fixed and floating rate debt securities, including bonds issued by governments, government-related and corporate entities globally, denominated in local currencies, as well as both investment grade securities which are highly rated securities, high yield securities which are medium or lower rated securities or those rated below investment grade and sometimes referred to as “junk bonds”, or unrated securities. • Corporate bonds with warrants, convertible bonds (which will not embed derivatives), bonds resulting from the restructuring of syndicated loans or bank loans (e.g. “Brady” bonds), subordinated bonds, debentures and notes (including exchange traded notes and freely transferable promissory notes). • Collateralised mortgage obligations and payment-in-kind bonds (which are bonds that pay interest in the form of additional bonds of the same kind). • Deferred payment securities (securities which pay regular interest after a predetermined date), zero coupon securities that are rated below investment-grade (often referred to as “junk bonds”) and payment-in-kind bonds (which are bonds that pay interest in the form of additional bonds of the same kind). • On an ancillary basis, preferred stocks issued by public and private issuers. <p>Money Market Instruments. These securities may include bank deposits, fixed or floating rate instruments (including commercial paper), floating or variable rate notes, bankers</p>

acceptances, certificates of deposit, debentures and short-dated government or corporate bonds, participation interests in loans (which are securitised and freely transferable), cash and cash equivalents (including treasury bills) that are rated as investment grade by Recognised Rating Agencies or are unrated.

Investment grade securities are highly rated securities, generally those rated Baa3, BBB- or above by one or more Recognised Rating Agencies, while high yield securities are medium or lower rated securities, generally those rated below investment grade and sometimes referred to as “junk bonds”.

Collective Investment Schemes. The Portfolio may invest in underlying funds which are themselves exposed to investments that are similar to the Portfolio’s other investments, provided that the Portfolio may not invest more than 10% of its Net Asset Value in underlying funds (including ETFs which are structured as collective investment schemes) which themselves invest in other collective investment schemes. Such underlying funds may or may not be managed by the Manager or its affiliates and will comply with the requirements of the UCITS Regulations in respect of such investments.

- The underlying funds in which the Portfolio may invest will be eligible collective investment schemes in accordance with the Central Bank’s requirements, which may be domiciled in a Relevant Jurisdiction and will qualify as UCITS or alternative investment fund schemes and will be regulated as such by their home state regulator.
- Underlying funds in which the Portfolio invests may be leveraged but such collective investment schemes will not generally be leveraged: (i) in excess of 100% of their net asset value; or (ii) so that their 1 day absolute value-at-risk exceeds 4.47% of their net asset value over a 250 day horizon with a 99% confidence level; or (iii) so that their 1 month relative value-at-risk exceeds twice the value-at-risk of a comparable benchmark portfolio over a 250 day horizon with a 99% confidence level, depending on how such underlying funds measure their global exposure.
- ETFs are investment funds whose units may be bought and sold on a securities exchange. ETFs typically invest in a portfolio of securities that is designed to track the performance of particular market segment or index. The ETFs will be located in a Relevant Jurisdiction and will be authorised under the UCITS Directive or will be alternative investment funds which are eligible for investment by the Portfolio in accordance with the requirements of the Central Bank. The ETFs will represent investments that are similar to the Portfolio’s other investments. The ETFs will operate on the principle of risk spreading and will not be leveraged.

Financial Derivative Instruments (“FDIs”). Subject to the conditions and limits imposed by the Central Bank as set out in the Prospectus and this Supplement, the Portfolio may use the following FDI for hedging, efficient portfolio management and/or other investment purposes:

- Future contracts based on interest rates, fixed income securities and UCITS eligible indices may be used to achieve a profit as well as to hedge existing long positions;
- Swaps may include currency, interest rate, UCITS eligible index, equity securities, volatility, variance, credit default and total return swaps (each in respect of each of the other types of assets in which the Portfolio may invest, as described in this “Instruments / Asset Classes” section) and may be used to achieve a profit as well as to hedge existing long positions and exposures. The maximum exposure of the Portfolio’s Net Asset Value that can be subject to total return swaps is 10%. The expected proportion of the Portfolio’s Net Asset Value that will be subject to total return swaps is 0.5%. The expected proportions are not limits and the actual percentages may vary over time depending on the factors including, but not limited to, market conditions. All revenues from the use of total return swaps, net of direct and indirect operational costs, will be returned to the Portfolio. Full details of any revenue earned and the direct and indirect operational costs and fees incurred with respect to the use of total return swaps for the Portfolio will be included in the Company’s annual report.
- Forwards on fixed income securities may be used to achieve a profit, through gaining exposure to an increase in the value of such securities as well as to hedge existing long currency exposures;

- Forward and non-deliverable forward currency contracts may be used to achieve a profit through gaining exposure to an increase in the value of currencies, as well as to hedge existing long currency exposures.
- Options on fixed income securities, interest rates, interest rate futures and UCITS eligible bond indices, UCITS eligible equity indices and volatility indices may be used to achieve a profit as well as to hedge existing long positions; and
- Where exposure is gained to a particular index or indices through the use of any of the FDI outlined above, additional information on the relevant index or indices (including information on the rebalancing frequency of the relevant index) shall be made available in the annual reports of the Company.

Swaps, options, futures and forwards may each be used for hedging or efficient portfolio management purposes in respect of securities which the Manager expects to decrease in value. Hedging via futures contracts may involve holding a position in corporate bonds and reducing the duration risk of such a position by taking an offsetting short position in the relevant treasury futures contracts so that such hedge would be expected to add value to the Portfolio should interest rates rise, offsetting any depreciation of the corporate bonds in such a scenario. Hedging through option contracts may involve reducing a long duration position by purchasing long put options on relevant treasury futures, which would be expected to appreciate should interest rates rise. Hedging via forward transaction may involve reducing currency risk from holdings of foreign currency denominated cash securities and hedging their returns back into the base currency by entering into OTC foreign exchange forward transactions in the offsetting currency pair such that the appreciation or depreciation in the hedging forward contracts would offset any losses or gains in the underlying investments caused by fluctuations in the exchange rate between the foreign currency and the base currency.

As the Portfolio may, purchase FDI generally using only a fraction of the assets that would be needed to purchase the relevant securities directly, the remainder of the assets allocated to the Manager may be invested in the other types of securities listed in the “*Instruments/Asset Classes*” section above. The Manager may therefore seek to achieve greater returns by purchasing derivative instruments and investing the remaining assets in such other securities to add excess return.

The counterparties to OTC FDI entered into in respect of the Portfolio will be entities (which will not be related to the Manager or its delegates) with legal personality which may be located globally. They will be subject to ongoing supervision by a public authority, be rated at or in excess of the requirements of the Central Bank by a Recognised Rating Agency and have the necessary organisational structure and resources for the relevant type of transaction.

Equity Securities. On an ancillary basis, the Portfolio may invest in equity securities (both common and preferred stocks) dealt or traded on Recognised Markets.

Repo Contracts and Securities Lending Agreements. At the discretion of the Manager, the Portfolio will enter into Repo Contracts subject to the conditions and limits set out in the Central Bank UCITS Regulations and in the Prospectus. Any such Repo Contracts may be used for efficient portfolio management purposes. Notwithstanding the terms of the Prospectus, the maximum proportion of the Portfolio’s Net Asset Value that can be subject to Repo Contracts is 30%. The expected proportion of the Portfolio’s Net Asset Value that will be subject to Repo Contracts is 5%. The expected proportions are not limits and the actual percentages may vary over time depending on factors including, but not limited to, market conditions.

Securities Lending Agreements may be used subject to the conditions and limits set out in the Prospectus.

Investment Restrictions

- Under normal market conditions, it is the intention of the Manager and the Sub-Investment Manager to invest at least 80% of the Portfolio’s available assets in high yield fixed income securities.
 - Any cash held by the Portfolio will be held solely as an ancillary liquid asset.
 - The Portfolio may not invest more than 10% of its Net Asset Value in equity securities.
 - The Portfolio may invest up to 10% of its Net Asset Value in securities that are issued
-

or guaranteed by a single sovereign issuer that are below investment grade.

- The Portfolio may invest in excess of 20% of its Net Asset Value in securities of companies located in and governments of Emerging Market Countries.
- The Portfolio may not invest more than 4% of its Net Asset Value in any one issuer.
- The Portfolio may not invest more than 20% in any one industry sector.
- The Portfolio will be subject to the Sustainable Exclusion Policy and exclude securities prohibited by the Enhanced Sustainable Exclusion Policy as detailed in the “*Sustainable Investment Criteria*” section of the Prospectus and the “*Environmental, Social and Governance*” section below.
- The Portfolio will not utilise margin lending.

Risk

- Investment in the Portfolio carries certain risks which are described in greater detail in the “*Investment Risks*” section of the Prospectus. While investors should read and consider the entire “*Investment Risks*” section of the Prospectus, the risks summarised in the following sections, namely, “*Market Risks: Risks relating to Debt Securities*”, “*Sustainable Investment Style Risk*” and “*Market Risks: Risks relating to Emerging Markets*” are particularly relevant to this Portfolio. **These risks are not purported to be exhaustive and potential investors should review this Supplement and the Prospectus in their entirety and consult with their professional advisers, before making an application for Shares.**
- Investors should refer to the Company’s risk management policy with respect to the use of FDI contained in the RMP Statement.
- The Manager and the Sub-Investment Manager will seek to anticipate spread movements in response to changes in economic conditions, industry fundamentals, issuer specific financial performance and other issuer specific factors. Investment decisions will be based on analysis of historical spread relationships, break-even yield spread analysis and total return projections.
- The Manager and the Sub-Investment Manager will use forward currency contracts in order to hedge currency risk.
- The Portfolio may be leveraged as a result of its investments in FDI but such leverage will not exceed 100% of the Portfolio’s Net Asset Value, as measured using the Commitment Approach, at any time.

Environmental, Social and Governance (“ESG”)

The Portfolio has been classified as an Article 9 Portfolio as it has sustainable investment as its objective.

The Portfolio invests in securities that meet the Manager’s and the Sub-Investment Manager’s criteria set out in the Sustainable Exclusion Policy and exclude securities prohibited by the Enhanced Sustainable Exclusion Policy, as detailed in the “*Sustainable Investment Criteria*” section of the Prospectus.

The Sub-Investment Manager:

- excludes securities issued by companies that are involved in controversial activities and behaviour and those which rated worst in terms of its ESG assessment from the investment universe, such that at least 20% of the investment universe is excluded on these bases; and
- ensures at least 90% ESG coverage rate of the Net Asset Value of the Portfolio.

Please also refer to Annex VI of the Prospectus which contains additional SFDR disclosures which are applicable to this Portfolio.

Typical Investor Profile

The Portfolio may be suitable for an investor seeking to increase the value of their investment, with a medium to long-term horizon, through investment in an actively managed and diversified range of predominantly global non-investment grade fixed income securities that that comply with Sustainable Criteria. Investors need to be comfortable with the risks associated with the Portfolio and be prepared to accept periods of market volatility and the risks of the capital markets in pursuit of long term goals, given the ability of the Portfolio to invest in below investment grade securities.

Fees and Expenses

Category	Maximum Initial Charge	Maximum Management fee	Distribution Fee

SHCH	Shanghai Clearing House; and
Sub-Investment Manager	Neuberger Berman Europe Limited, Neuberger Berman Investment Advisers LLC, Neuberger Berman Singapore Pte. Limited, or such other company as may be appointed by the Manager from time to time in respect any particular Portfolio, with the prior approval of the Company and the Central Bank.

Investment Risks

Investment in the Portfolios carries certain risks, which are described in the “*Investment Risks*” section of the Prospectus and in the “Risk” section of the information specific to each Portfolio, as included in this Supplement. **These risks are not purported to be exhaustive and potential investors should review this Supplement and the Prospectus in their entirety and consult with their professional advisers, before making an application for Shares.**

There can be no assurance that the Portfolios will achieve their respective objectives. While there are some risks described below that may be common to a number or all of the Portfolios, there may also be specific risk considerations which apply only to particular Portfolios.

Distribution Policy

Under normal circumstances, the Directors intend that dividends in respect of:

- each of the (Monthly) Distributing Classes in the Portfolios shall be declared on or prior to the last Business Day of each month and paid within three Business Days thereafter;
- each of the other Distributing Classes in the Portfolios will be declared on a quarterly basis and paid within 30 Business Days thereafter;

- each of the (Monthly) Gross Income Distributing Classes in the Portfolios shall be declared on or prior to the last Business Day of each month and paid within three Business Days thereafter;
- each of the other (Gross) Income Distributing Classes in the Portfolios shall be declared on a quarterly basis and paid within thirty Business Days thereafter; and
- each of the other Distributing Classes in the Neuberger Berman Asian Debt – Hard Currency Fund shall be declared on an annual basis and paid within 30 Business Days thereafter in relation to the Net Income of the Distributing Classes for the calendar year ended the previous 31 December.

Subscriptions and Redemptions

Subscriptions for Shares in all Classes in each Portfolio which have not already launched at the date of this Supplement will be considered during the Initial Offer Period, upon receipt by the Administrator of completed share applications and subscription monies as specified in the “*Subscriptions*” section of the Prospectus. Such Shares will be issued at the Initial Offer Price on the last day of the Initial Offer Period.

The Initial Offer Period shall run from 9.00 am on 24 December 2021 to 5.00 pm on 24 June 2022 or such earlier or later time as the Directors may determine at their discretion and notify to the Central Bank and to subscribers.

Except as provided below, the Initial Offer Price for each of the share classes shall be as follows:

AUD Classes: AUD 10	DKK Classes: DKK 50	NOK Classes: NOK 100
BRL Classes: BRL 20	EUR Classes: EUR 10	NZD Classes: NZD 10
CAD Classes: CAD 10	GBP Classes: GBP 10	SEK Classes: SEK 100
CHF Classes: CHF 10	HKD Classes: HKD 10	SGD Classes: SGD 20
CLP Classes: CLP 5,000	ILS Classes: ILS 30	USD Classes: USD 10
CNY Classes: CNY 100	JPY Classes: JPY 1,000	ZAR Classes: ZAR 100

Thereafter and, in the case of Classes which have already launched, from the date of this Supplement, Shares will be issued at their Net Asset Value per Share, subject to the provision for Duties and Charges in respect of the issue of the Shares and rounding as provided for in the Articles on each Dealing Day.

The Company reserves the right to apply to Euronext Dublin to have the Shares in each of the Classes admitted to the Official List and to trading on the regulated market of Euronext Dublin.

The Company may, in its sole discretion, reject any subscription in whole or in part without reason.

As stated in the “*Subscriptions and Redemptions*” section of the Prospectus, redemption proceeds in respect of the Portfolios will be paid within ten (10) Business Days of the relevant Dealing Day unless payment has been suspended in the circumstances described in the “*Temporary Suspension of Dealings*” section of the Prospectus, although the Company will seek to make such payments within a shorter period of time where possible (up to and including within three (3) Business Days of the relevant Dealing Day).

Neuberger Berman Emerging Market Debt – Local Currency Fund

An investment in the Portfolio should not constitute a substantial proportion of an investment portfolio and may not be appropriate for all investors.

Investment Objective The Portfolio aims to achieve a target average return of 1-2% over the Benchmark (as specified in the “*Benchmark*” section below) before fees over a market cycle (typically 3 years) from investing primarily in local currencies and local interest rates of Emerging Market Countries.

Investors should note that the target return is not guaranteed over a market cycle, a 12-month or any period and the Portfolio’s capital is at risk. Investors should also note that, over the course of a market cycle, there may be significant periods of time during which the performance of the Portfolio will deviate from the targeted return and the Portfolio may experience periods of negative return. There can be no guarantee that the Portfolio will ultimately achieve its investment objective.

Investment Approach The Portfolio will invest primarily in debt securities and money market instruments which are issued by governments, government agencies or corporate issuers which have their head office or exercise an overriding part of their economic activity in Emerging Market Countries and which are denominated in or are exposed to the currencies of such Emerging Market Countries.

With the exception of permitted investments in transferable securities and money market instruments which are unlisted, all securities invested in by the Portfolio will be listed, dealt or traded on Recognised Markets globally, without any particular focus on any one industrial sector or region.

Please note that, as described below in the “*Risk*” section, investments in securities issued by companies located in, and governments and government agencies of, Emerging Market Countries may involve additional risk, relative to investment in more developed economies.

Under normal market conditions, the Manager and the Sub-Investment Manager will invest at least two thirds of the Portfolio’s Net Asset Value in debt securities, money market instruments and FDI with the intention of gaining exposure to the performance of interest rates and/or currencies of Emerging Market Countries. Up to a maximum of one third of the Portfolio’s Net Asset Value may then be invested in money market instruments and debt securities issued by public or private issuers in OECD countries and/ or debt securities and money market instruments issued by public or private issuers in Emerging Market Countries which are denominated in the Hard Currency (defined for the purpose of this Portfolio as US Dollar, Euro, Sterling, Japanese Yen and Swiss Franc). On an ancillary basis, the Portfolio may hold equity securities issued by public or private issuers in Emerging Market Countries, such as shares, as a result of the conversion of convertible debt securities or restructuring of debt securities.

In addition, the Manager and the Sub-Investment Manager may use futures, options, warrants, and/or swaps (including credit default swaps and swaptions) on debt securities or money market instruments, indices and interest rates to hedge investments in such instruments. Investors should note that it may not be possible or practical to hedge the Portfolio’s exposures to such instruments perfectly and that, where it deems it appropriate, the Manager and the Sub-Investment Manager may take hedging positions in respect of other instruments which it considers to be suitable proxies for the Portfolio’s investments.

The Manager and the Sub-Investment Manager implement a systematic and disciplined framework for analysing sovereign and corporate local currency and Hard Currency debt securities. Decisions on how to allocate the Portfolio’s assets between sovereign and corporate and local currency and Hard Currency Emerging Market Country debt securities, money market instruments and FDI are dependent on the Manager’s and Sub-Investment Manager’s outlook on such securities. This outlook focuses on the global market environment, the economic environment of the relevant Emerging Market Countries, the attractiveness of the valuations available in the asset classes and their liquidity. From this

outlook, the Manager and Sub-Investment Manager determine the amount of risk that they want the Portfolio to take and allocate across security types accordingly.

The Manager and the Sub-Investment Manager believe their global presence provides a local perspective on macro as well as micro events which feeds into the respective team's overall research.

The Manager and the Sub-Investment Manager will seek to anticipate yield, spread and currency movements in response to changes in:

- Economic conditions;
- Region, country and sector fundamentals; and
- Issuer specific financial performance and other issuer specific factors.

The Manager and the Sub-Investment Manager will conduct fundamental analysis on the issuers that they track in order to identify undervalued and overvalued securities and exploit investment opportunities. The fundamental analysis used for the selection of governments or government-related issuers incorporates quantitative macroeconomic data and qualitative aspects such as political stability and structural reforms. The fundamental analysis used for the selection of corporate issuers includes quantitative factors aimed at assessing the issuer's financial performance such as revenue/EBITDA ("earnings before interest, tax, depreciation and amortisation") growth, cash flow growth and capital expenditures. Qualitative factors aim to complement the evaluation of corporate credit worthiness by including such factors as corporate governance, quality of earnings and debt structure.

The Portfolio may invest up to 20% of its Net Asset Value in PRC onshore bonds via Bond Connect.

Under normal market conditions, the Manager anticipates that the Portfolio's average interest duration will be within the range of +2 years and -2 years compared to the Benchmark.

The Portfolio may have or may be expected to have medium to high volatility due to its investment policies or portfolio management techniques.

The Portfolio is actively managed and does not intend to track the Benchmark which is included here for performance comparison purposes and because the Portfolio's investment policy restricts the extent to which the Portfolio's holdings may deviate from the Benchmark, as described above and in the "Investment Restrictions" section. This deviation may be significant.

Benchmark	<p>JPMorgan GBI Emerging Markets Global Diversified Index (Total Return, Unhedged, USD) which measures the performance of debt markets of Emerging Market Countries expressed in local currencies.</p> <p>Shareholders in a Class which is denominated in a currency other than the Base Currency should note that, where available, it may be more meaningful to compare the performance of such Class against a version of this index which is denominated in the relevant Class currency.</p>
Base Currency	US Dollars (USD).
Instruments / Asset Classes	<p>The Portfolio will invest primarily in debt securities and money market instruments, issued by governments, government agencies and corporate issuers in Emerging Market Countries. The Portfolio can invest in or be exposed to the following types of assets.</p> <p>Fixed Income Securities (Debt Securities). Such debt securities may include bonds, debentures and notes (including freely transferable and unleveraged structured notes, freely transferable promissory notes bonds with warrants and convertible bonds) and may include:</p> <ul style="list-style-type: none"> • Fixed and floating rate securities;

- Contingent convertible bonds, subject to a limit of up to 10% of the Portfolio's Net Asset Value;
- Bullet debt securities, in respect of which principal is paid upon maturity, or factor debt securities in respect of which principal is paid according to a pre-determined schedule and which can also specify that specific interest payments be added to the principal instead of being paid in cash;
- Investment grade, high yield and unrated debt securities;
- Structured products, such as credit-linked notes and structured notes, which provide indirect access to certain markets or securities;
- On an ancillary basis, privately issued asset-backed securities (including mortgage-backed securities such as pass-through certificates, collateralised mortgage obligations and interest and principal only components of mortgage-backed securities) that derive interest and principal payments from specified assets (such as residential and commercial mortgages, credit card debt and pools of other types of receivables); and
- Sukuk structures, which are Islamic finance instruments which represent a proportionate beneficial ownership in an asset or pool of assets. For a determined period, the return associated with the cash flows generated from the assets belongs to the Sukuk holders. The characteristics of a Sukuk are therefore similar to a conventional debt security, with the difference that sukuk are generally asset-based or asset-backed and carry no interest rate but rather pass the returns generated by the underlying assets to the Sukuk holder.

Money Market Instruments. Money market instruments may include bank deposits, fixed or floating rate instruments (including commercial paper), floating or variable rate notes, bankers acceptances, certificates of deposit, debentures and short-dated government or corporate bonds, cash and cash equivalents (including treasury bills) that are rated as investment grade or below by Recognised Rating Agencies or are unrated.

The Portfolio may invest up to 25% of its Net Asset Value in securities that are issued or guaranteed by a single sovereign issuer (including its government, and any public or local authority) that are below investment grade. This investment restriction does not apply to any securities issued by corporate issuers. As certain Emerging Market Countries may be rated below investment grade, the Manager and/or Sub-Investment Manager believe that it is necessary to retain the flexibility to invest in securities issued or guaranteed by each such sovereign issuer above 10% of the Portfolio's Net Asset Value in order to achieve the investment objective of the Portfolio. Currently, the single sovereign issuers with a credit rating below investment grade into whose securities the Manager and/or Sub-Investment Manager expect the Portfolio may invest more than 10% of its Net Asset Value are Brazil and South Africa.

Investment grade securities are highly rated securities, generally those rated Baa3, BBB- or above by one or more Recognised Rating Agencies, while high yield securities are medium or lower rated securities, generally those rated below investment grade and sometimes referred to as "junk bonds".

Collective Investment Schemes. In addition, the Portfolio may invest in collective investment schemes which are themselves exposed to investments that are similar to the Portfolio's other investments. Such collective investment schemes may be managed by the Manager and the Sub-Investment Manager or their affiliates and will comply with the requirements of the UCITS Regulations in respect of such investments.

Financial Derivative Instruments ("FDI"). In addition, the following FDI may be used for efficient portfolio management, investment purposes, and/or hedging and subject to the conditions and limits imposed by the Central Bank as set out in the Prospectus:

- Futures, options, warrants, rights, swaps and swaptions on debt securities or money market instruments, UCITS eligible indices and interest rates, which may be used to achieve a profit through gaining exposure to an increase in the value of such securities, indices and interest rates, as well as to hedge existing long positions;
- Total return swaps may be used to hedge or take long or short positions to help achieve specific investment objectives. In addition, total return swaps may be used to achieve a profit through gaining exposure to an increase in the value of securities, indices and interest rates. The maximum proportion of the Portfolio's Net Asset Value that can be

subject to total return swaps is 5%. The expected proportion of the Portfolio's Net Asset Value that will be subject to total return swaps is 1%. The expected proportions are not limits and the actual percentages may vary over time depending on factors including, but not limited to, market conditions;

- Credit default swaps on single issuers, indices and/or baskets of securities which may be used to hedge or take long or short credit positions to help achieve specific investment objectives. It is expected that short credit positions will predominantly be taken for hedging but they may also be used for investment purposes where the Manager or the Sub-Investment Manager identifies an attractive investment opportunity based on the Manager's or the Sub-Investment Manager's fundamental analysis which indicates deteriorating fundamentals of an issuer and/or that a security is overvalued;
- Forward contracts on fixed income securities may be used to achieve a profit, through gaining exposure to an increase in the value of such securities as well as to hedge existing long positions; and
- Forward and non-deliverable forward currency contracts, currency futures contracts and transactions, currency options, and currency swaps, which may be used to achieve a profit through gaining exposure to an increase in the value of currencies, as well as to hedge existing long currency positions.

As the Portfolio may purchase FDI generally using only a fraction of the assets that would be needed to purchase the relevant securities directly, the remainder of the assets allocated to the Manager may be invested in the other types of securities listed above. The Manager and/or Sub-Investment Manager may therefore seek to achieve greater returns by taking exposure to the performance of such securities through purchasing FDI which give exposure to them rather than purchasing the securities themselves and investing the remaining assets in other such securities to add excess return.

Repo Contracts and Securities Lending Agreements. Repo Contracts and Securities Lending Agreements may be used subject to the conditions and limits set out in the Prospectus.

Bond Connect

The PBoC and the HKMA have approved the CFETS, CCDC, SHCH, together with Hong Kong Exchanges and Clearing Limited and CMU to launch Bond Connect, which is a mutual bond market access programme between Mainland China and Hong Kong. Bond Connect allows investors to trade electronically between the Mainland China and Hong Kong bond markets without quota restrictions and requirements to identify the ultimate investment amount.

Currently, Bond Connect comprises a Northbound Trading Link between CFETS, the operator of the CIBM and offshore trading access platforms recognised by the PBoC, to facilitate investment by Hong Kong and overseas investors (including the Portfolio) in eligible bonds traded on the CIBM. A Southbound Trading Link, facilitating investment in overseas bond markets by Mainland Chinese investors is still under development but is intended to form part of Bond Connect once established.

The Portfolio may invest up to 20% of its Net Asset Value in PRC onshore bonds via Bond Connect.

Eligible Securities

Hong Kong and overseas investors (including the Portfolio) will be able to trade over the entire range of instruments traded on the CIBM, including products on both the secondary and primary markets.

Trading Day

Northbound investors (including the Portfolio) are able to trade through Bond Connect on days upon which the CIBM is open to trade, regardless of whether they are a public holiday in Hong Kong.

Settlement and Custody

Settlement and custody of Northbound bond trades under Bond Connect will be implemented under the link between the CMU of the HKMA and Mainland China's two

bond settlement systems, namely, CCDC and SHCH. The CMU settles Northbound trades and holds the CIBM bonds on behalf of its members in nominee accounts with each of CCDC and SHCH. CCDC and SHCH provide services to foreign investors, directly and indirectly, using Bond Connect.

Bonds purchased by Hong Kong and overseas investors (including the Portfolio) are recorded in an omnibus nominee account at CCDC and SHCH in the name of CMU. The CMU itself maintains the bonds in segregated sub-accounts of its members, who in turn may hold the bonds on their own account or on behalf of other investors or custodians. Accordingly, bonds purchased by Hong Kong and overseas purchasers through Bond Connect are held by the purchaser's global or local custodian in a segregated sub-account opened in their name at the CMU.

Currency

Hong Kong and overseas investors may trade through Bond Connect using offshore RMB (CNH) or by converting foreign currencies into onshore RMB (CNY) under Bond Connect.

Where an investor uses foreign currencies to invest through the Northbound Trading Link, it must open a segregated RMB capital account with an eligible RMB settlement Bank in Hong Kong to convert its foreign currencies into CNY. Where bonds are purchased in CNY in this manner, upon sale of the bonds, the sale proceeds remitted out of Mainland China must be converted back into the relevant foreign currencies.

Further information about Bond Connect is available at:

<http://www.chinabondconnect.com/en/index.htm>

Investment Restrictions

- Debt securities and money market instruments issued by public or private issuers in Emerging Market Countries which are denominated in Hard Currency are limited to a maximum of 10% of the Portfolio's Net Asset Value.
- A maximum of 25% of the Portfolio's Net Asset Value may be invested in debt securities issued by issuers located in any one country.
- A maximum of 20% of the Portfolio's Net Asset Value may be invested in debt securities issued by issuers which are not governments or government-related, with a maximum exposure of 4% of the Portfolio's Net Asset Value to any one such issuer.
- Investments in:
 - warrants on transferable securities, are limited to a maximum of 10% of the Portfolio's Net Asset Value;
 - asset-back securities are limited to a maximum of 20% of the Portfolio's Net Asset Value; and
 - units of other collective investment schemes are limited to a maximum of 10% of the Portfolio's Net Asset Value.
- The Portfolio's Net Asset Value exposure to a single Emerging Markets currency, relative to the Benchmark may not exceed +10/-10%.
- The Portfolio will not utilise margin lending.

Risk

- Investment in the Portfolio carries certain risks which are described in greater detail in the "*Investment Risks*" section of the Prospectus. While investors should read and consider the entire "*Investment Risks*" section of the Prospectus, the risks summarised in the following sections, namely, "*Market Risks: Risks relating to Debt Securities*", "*Market Risks: Risks Relating to Emerging Markets*", "*Risks Associated with Investment in the China Interbank Bond Market through Bond Connect*" and "*Risks related to Financial Derivative Instruments*" are particularly relevant to this Portfolio. **These risks are not purported to be exhaustive and potential investors should review this Supplement and the Prospectus in their entirety and consult with their professional advisers, before making an application for Shares.**
- Investors should refer to the Company's risk management policy with respect to the use of FDI contained in the RMP Statement.
- The Portfolio is expected to be leveraged up to 450% of its Net Asset Value as a result of its use of FDI, although investors should note that higher levels of leverage may be

experienced. This expected leverage figure is calculated using the Sum of the Notional values of the derivatives used, as required by the Central Bank. Using this methodology does not reflect any netting or hedging that the Portfolio may have in place.

- The Portfolio's global exposure is subject to an advanced risk management process which, in compliance with the UCITS Regulations, aims to ensure that on any day the relative VaR of the Portfolio will be no greater than twice the VaR of the Benchmark. The VaR of the Portfolio is a daily estimation of the maximum loss which the Portfolio may incur over a 20 Business Day holding period and is arrived at through quantitative simulations with a 99% one tailed confidence interval and using an historical observation period of at least 250 business days. This process is described in detail in the statement of risk management procedures of the Company and its appendix in respect of the Portfolio. While the Portfolio measures and monitors its global exposure using the VaR approach, rather than by use of the Commitment Approach, the leverage of the Portfolio using the Commitment Approach is expected to be 250% of its Net Asset Value as a result of its use of FDI, although investors should note that higher levels of leverage may be experienced.
- The Manager and the Sub-Investment Manager may use forward and non-deliverable forward currency contracts, currency futures contracts and transactions, currency options, and currency swaps in order to hedge currency risk on a discretionary basis. The use of such hedging techniques may increase the risk profile of the Portfolio.

Environmental, Social and Governance ("ESG")

This Portfolio meets the classification of an Article 8 Portfolio as it promotes environmental and social characteristics and limits investments to companies that follow good governance practices.

ESG risks and opportunities are systematically considered in the selection of securities to be constituents of the Portfolio. The Manager and the Sub-Investment Manager assesses securities in relation to their exposure to and the management of ESG risks. ESG represents governance, (being the way in which the company is run), environmental issues, (such as the impact on natural resources), and social issues (such as human rights).

Typical Investor Profile

Investment in the Portfolio may be suitable for investors who are prepared to accept the general risks associated with investing in Emerging Market Countries and the risks of bond markets over the medium to long term, together with medium to high levels of volatility due to the Portfolio's investment policies or portfolio management techniques.

Fees and Expenses

Category	Maximum Initial Charge	Maximum Management fee	Distribution Fee
A	5.00%	1.50%	0.00%
B, C1, C2, E	0.00%	1.80%	1.00%
C	0.00%	1.00%	1.00%
D, I, I2, I3, I4, I5, X, Y	0.00%	0.75%	0.00%
M	2.00%	1.50%	0.80%
P	5.00%	0.71%	0.00%
T	5.00%	1.80%	0.00%
U	3.00%	1.10%	0.00%
Z	0.00%	0.00%	0.00%

For details of the Administration Fees payable by the Portfolio, please see the "Administration Fees" heading in the "Fees and Expenses" section of the Prospectus.

Contingent deferred sales charges

Contingent deferred sales charges will be payable in respect of the following Classes at the rates specified below, depending on the period that has elapsed since the issue of the Shares being redeemed and will be charged on the lower of the Net Asset Value per Share on the relevant Dealing Day in respect of which the relevant Shares were (i) initially

subscribed or (ii) redeemed. Any such contingent deferred sales charges will be paid to the relevant Distributor, the Manager or to the Sub-Investment Manager.

Class	Redemption Period in Calendar Days				
	< 365	365 - 729	730 - 1094	1095 – 1459	> 1459
B	4%	3%	2%	1%	0%
C, C1	1%	0%	0%	0%	0%
C2	2%	1%	0%	0%	0%
E	3%	2%	1%	0%	0%

Minimum Initial Subscription Amount

Notwithstanding the information contained in Annex II to the Prospectus, Shares in the Category SEK I and all Category I5 Classes in the Portfolio will each be subject to the minimum initial subscription amount of 50,000,000.

Other important information for investors in Hong Kong

As the Portfolio has been authorised for public offer in Hong Kong, the Hong Kong Securities and Futures Commission (“HKSF”) requires the Company to classify the Portfolio on the basis of its expected maximum net derivative exposure (“NDE”). The HKSF requires the NDE to be calculated in accordance with the HKSF’s Code on Unit Trusts and Mutual Funds and the requirements and guidance issued by the HKSF, which may be updated from time to time. This requires the Company to convert all FDI acquired for investment purposes that would generate incremental leverage at the portfolio level of the Portfolio into their equivalent positions in the underlying assets. Applying these requirements, the Portfolio’s NDE is expected to be greater than 100% but the actual level may be higher than the expected level in exceptional circumstances, for example when there are sudden movements in markets and/or investment prices.

For the avoidance of doubt, complying with the HKSF’s requirements to classify the Portfolio on the basis of its NDE does not amend the investment objectives or policies or otherwise impact the management of the Portfolio or its use of FDI, as the requirements are solely to measure the Portfolio’s expected use of FDI, as described above, using the HKSF’s methodology and disclose the results.

Neuberger Berman Emerging Market Debt – Hard Currency Fund

An investment in the Portfolio should not constitute a substantial proportion of an investment portfolio and may not be appropriate for all investors.

Investment Objective

The Portfolio aims to achieve a target average return of 1-2% over the Benchmark (as specified in the “Benchmark” section below) before fees over a market cycle (typically 3 years) by investing primarily in Hard Currency-denominated debt issued in Emerging Market Countries.

Investors should note that the target return is not guaranteed over a market cycle, a 12-month or any period and the Portfolio’s capital is at risk. Investors should also note that, over the course of a market cycle, there may be significant periods of time during which the performance of the Portfolio will deviate from the targeted return and the Portfolio may experience periods of negative return. There can be no guarantee that the Portfolio will ultimately achieve its investment objective.

Investment Approach

The Portfolio will invest primarily in debt securities and money market instruments issued by public or private issuers in Emerging Market Countries which are denominated in Hard Currency. For the purposes of the Portfolio, Hard Currency is defined as US Dollar, Euro, Sterling, Japanese Yen and Swiss Franc and investors should also note that public issuers include corporate issuers that are, either directly or indirectly, 100% government-owned.

With the exception of permitted investments in transferable securities and money market instruments which are unlisted, all securities invested in by the Portfolio will be listed, dealt or traded on Recognised Markets globally, without any particular focus on any one industrial sector or region.

Please note that, as described below in the “Risk” section, investments in securities issued by companies located in, and governments and government agencies of, Emerging Market Countries may involve additional risk, relative to investment in more developed economies.

Under normal market conditions, the Manager and the Sub-Investment Manager will invest at least two thirds of the Portfolio’s Net Asset Value in Hard Currency debt securities and money market instruments issued by public or private issuers in Emerging Market Countries. Up to a maximum of one third of the Portfolio’s Net Asset Value may then be invested in money market instruments and debt securities issued by public or private issuers in OECD countries and/or debt securities and money market instruments issued by public or private issuers in Emerging Market Countries which are denominated in the local currency of the relevant Emerging Market Country. On an ancillary basis, the Portfolio may hold equity securities issued by public or private issuers in Emerging Market Countries, such as shares, as a result of the conversion of convertible debt securities or restructuring of debt securities.

The Manager and Sub-Investment Manager implement a systematic and disciplined framework for analysing sovereign and corporate local currency and Hard Currency debt securities. Decisions on how to allocate the Portfolio’s assets between sovereign and corporate and Hard Currency and local currency Emerging Market Country debt securities, money market instruments and FDI are dependent on the Manager’s and Sub-Investment Manager’s outlook on such securities. This outlook focuses on the global market environment, the economic environment of the relevant Emerging Market Countries, the attractiveness of the valuations available in the asset classes and their liquidity. From this outlook, the Manager and Sub-Investment Manager determine the amount of risk that they want the Portfolio to take and allocate across security types accordingly.

The Manager and the Sub-Investment Manager believe their global presence provides a local perspective on macro as well as micro events which feeds into the respective team's overall research.

The Manager and the Sub-Investment Manager will seek to anticipate yield, spread and currency movements in response to changes in:

- Economic conditions;
- Region, country and sector fundamentals; and
- Issuer specific financial performance and other issuer specific factors.

The Manager and the Sub-Investment Manager will conduct fundamental analysis on the issuers that they track in order to identify undervalued and overvalued securities and exploit investment opportunities. The fundamental analysis used for the selection of governments or government-related issuers incorporates quantitative macroeconomic data and qualitative aspects such as political stability and structural reforms. The fundamental analysis used for the selection of corporate issuers includes quantitative factors aimed at assessing the issuer's financial performance such as revenue/EBITDA ("earnings before interest, tax, depreciation and amortisation") growth, cash flow growth and capital expenditures. Qualitative factors aim to complement the evaluation of corporate credit worthiness by including such factors as corporate governance, quality of earnings and debt structure.

Under normal market conditions, the Manager anticipates that the Portfolio's average interest duration will be within the range of +2 years and -2 years compared to the Benchmark.

The Portfolio may have or may be expected to have medium to high volatility due to its investment policies or portfolio management techniques.

The Portfolio is actively managed and does not intend to track the Benchmark which is included here for performance comparison purposes and because the Portfolio's investment policy restricts the extent to which the Portfolio's holdings may deviate from the Benchmark, as described above. This deviation may be significant.

Benchmark

JPMorgan EMBI Global Diversified (Total Return, USD) which measures the performance of debt markets of Emerging Market Countries expressed in USD.

Shareholders in a Class which is denominated in a currency other than the Base Currency should note that, where available, it may be more meaningful to compare the performance of such Class against a version of this index which is denominated in the relevant Class currency.

Base Currency

US Dollars (USD).

Instruments / Asset Classes

The Portfolio will invest primarily in debt securities and money market instruments, issued by governments, government agencies and corporate issuers in Emerging Market Countries. The Portfolio can invest in or be exposed to the following types of assets.

Fixed Income Securities (Debt Securities). Such debt securities may include bonds, bonds with warrants, convertible bonds, bonds resulting from the restructuring of syndicated loans or bank loans (e.g. "Brady" bonds), subordinated bonds, debentures and notes (including freely transferable and unleveraged structured notes and freely transferable promissory notes) and may include:

- Fixed and floating rate securities;
 - Contingent convertible bonds, subject to a limit of up to 10% of the Portfolio's Net Asset Value;
 - Bullet debt securities, in respect of which principal is paid upon maturity, or factor debt securities in respect of which principal is paid according to a pre-determined schedule and which can also specify that specific interest payments be added to the principal instead of being paid in cash;
-

-
- Structured products, such as credit-linked notes, which provide indirect access to certain markets or securities;
 - Investment grade, high yield and unrated debt securities; and
 - Sukuk structures, which are Islamic finance instruments which represent a proportionate beneficial ownership in an asset or pool of assets. For a determined period, the return associated with the cash flows generated from the assets belongs to the Sukuk holders. The characteristics of a Sukuk are therefore similar to a conventional debt security, with the difference that sukuku are generally asset-based or asset-backed and carry no interest rate but rather pass the returns generated by the underlying assets to the Sukuk holder.

Money Market Instruments. Money market instruments may include bank deposits, fixed or floating rate instruments (including commercial paper), floating or variable rate notes, bankers acceptances, certificates of deposit, debentures and short-dated government or corporate bonds, cash and cash equivalents (including treasury bills) that are rated as investment grade or below by Recognised Rating Agencies or are unrated.

The Portfolio may invest up to 25% of its Net Asset Value in securities that are issued or guaranteed by a single sovereign issuer (including its government, and any public or local authority) that are below investment grade. This investment restriction does not apply to any securities issued by corporate issuers. As certain Emerging Market Countries may be rated below investment grade, the Manager and/or Sub-Investment Manager believe that it is necessary to retain the flexibility to invest in securities issued or guaranteed by each such sovereign issuer above 10% of the Portfolio's Net Asset Value in order to achieve the investment objective of the Portfolio. Currently, the single sovereign issuer with a credit rating below investment grade into whose securities the Manager and/or Sub-Investment Manager expect the Portfolio may invest more than 10% of its Net Asset Value is Brazil.

Investment grade securities are highly rated securities, generally those rated Baa3, BBB- or above by one or more Recognised Rating Agencies, while high yield securities are medium or lower rated securities, generally those rated below investment grade and sometimes referred to as "junk bonds".

Collective Investment Schemes. In addition, the Portfolio may invest in collective investment schemes which are themselves exposed to investments that are similar to the Portfolio's other investments. Such collective investment schemes may be managed by the Manager and/or the Sub-Investment Manager or their affiliates and will comply with the requirements of the UCITS Regulations in respect of such investments.

Financial Derivative Instruments ("FDI"). In addition, the following FDI may be used for hedging, efficient portfolio management and/or investment purposes and subject to the conditions and limits imposed by the Central Bank as set out in the Prospectus:

- Futures, options, warrants, rights, swaps and swaptions on debt securities or money market instruments, UCITS eligible indices and interest rates, which may be used to achieve a profit through gaining exposure to an increase in the value of such securities, indices and interest rates, as well as to hedge existing long positions;
 - Total return swaps may be used to hedge or take long or short positions to help achieve specific investment objectives. In addition, total return swaps may be used to achieve a profit through gaining exposure to an increase in the value of securities, indices and interest rates. The maximum proportion of the Portfolio's Net Asset Value that can be subject to total return swaps is 10%. The expected proportion of the Portfolio's Net Asset Value that will be subject to total return swaps is 1%. The expected proportions are not limits and the actual percentages may vary over time depending on factors including, but not limited to, market conditions;
 - Credit default swaps on single issuers, indices and/or baskets of securities which may be used to hedge or take long or short credit positions to help achieve specific investment objectives. It is expected that short credit positions will predominantly be taken for hedging but they may also be used for investment purposes where the
-

Manager or the Sub-Investment Manager identifies an attractive investment opportunity based on the Manager's or the Sub-Investment Manager's fundamental analysis which indicates deteriorating fundamentals of an issuer and/or that a security is overvalued;

- Forward contracts on fixed income securities may be used to achieve a profit, through gaining exposure to an increase in the value of such securities as well as to hedge existing long positions; and
- Forward and non-deliverable forward currency contracts, currency futures contracts and transactions, currency options, and currency swaps, which may be used to achieve a profit through gaining exposure to an increase in the value of currencies, as well as to hedge existing long currency positions.

As the Portfolio may purchase FDI generally using only a fraction of the assets that would be needed to purchase the relevant securities directly, the remainder of the assets allocated to the Manager may be invested in the other types of securities listed above. The Manager and/or Sub-Investment Manager may therefore seek to achieve greater returns by taking exposure to the performance of such securities through purchasing FDI which give exposure to them rather than purchasing the securities themselves and investing the remaining assets in other such securities to add excess return.

Repo Contracts and Securities Lending Agreements. Repo Contracts and Securities Lending Agreements may be used subject to the conditions and limits set out in the Prospectus.

Bond Connect

The PBoC and the HKMA have approved the CFETS, CCDC, SHCH, together with Hong Kong Exchanges and Clearing Limited and CMU to launch Bond Connect, which is a mutual bond market access programme between Mainland China and Hong Kong. Bond Connect allows investors to trade electronically between the Mainland China and Hong Kong bond markets without quota restrictions and requirements to identify the ultimate investment amount.

Currently, Bond Connect comprises a Northbound Trading Link between CFETS, the operator of the CIBM and offshore trading access platforms recognised by the PBoC, to facilitate investment by Hong Kong and overseas investors (including the Portfolio) in eligible bonds traded on the CIBM. A Southbound Trading Link, facilitating investment in overseas bond markets by Mainland Chinese investors is still under development but is intended to form part of Bond Connect once established.

Eligible Securities

Hong Kong and overseas investors (including the Portfolio) will be able to trade over the entire range of instruments traded on the CIBM, including products on both the secondary and primary markets.

Trading Day

Northbound investors (including the Portfolio) are able to trade through Bond Connect on days upon which the CIBM is open to trade, regardless of whether they are a public holiday in Hong Kong.

Settlement and Custody

Settlement and custody of Northbound bond trades under Bond Connect will be implemented under the link between the CMU of the HKMA and Mainland China's two bond settlement systems, namely, CCDC and SHCH. The CMU settles Northbound trades and holds the CIBM bonds on behalf of its members in nominee accounts with each of CCDC and SHCH. CCDC and SHCH provide services to foreign investors, directly and indirectly, using Bond Connect.

Bonds purchased by Hong Kong and overseas investors (including the Portfolio) are recorded in an omnibus nominee account at CCDC and SHCH in the name of CMU. The CMU itself maintains the bonds in segregated sub-accounts of its members, who in turn may hold the bonds on their own account or on behalf of other investors or

custodians. Accordingly, bonds purchased by Hong Kong and overseas purchasers through Bond Connect are held by the purchaser's global or local custodian in a segregated sub-account opened in their name at the CMU.

Currency

Hong Kong and overseas investors may trade through Bond Connect using offshore RMB (CNH) or by converting foreign currencies into onshore RMB (CNY) under Bond Connect.

Where an investor uses foreign currencies to invest through the Northbound Trading Link, it must open a segregated RMB capital account with an eligible RMB settlement Bank in Hong Kong to convert its foreign currencies into CNY. Where bonds are purchased in CNY in this manner, upon sale of the bonds, the sale proceeds remitted out of Mainland China must be converted back into the relevant foreign currencies.

Further information about Bond Connect is available at:

<http://www.chinabondconnect.com/en/index.htm>

Investment Restrictions

- A maximum of 25% of the Portfolio's Net Asset Value may be invested in debt securities issued by issuers located in any one country.
- A maximum of 15% of the Portfolio's Net Asset Value may be invested in debt securities issued by private corporate issuers, with a maximum exposure of 4% of the Portfolio's Net Asset Value to any one such issuer.
- An aggregate maximum of 50% of the Portfolio's Net Asset Value may be invested in securities issued by issuers which are not governments in accordance with the following limits:
 - quasi-sovereign (100% state owned or explicit sovereign guarantee) with an individual maximum of the Portfolio's Net Asset Value of 35%;
 - sub-sovereign (state, regional, municipal debt) with an individual maximum of the Portfolio's Net Asset Value of 10%; and
 - supra-national (world bank regional development banks) with an individual maximum of the Portfolio's Net Asset Value of 10%.
- Investments in:
 - debt securities and money market instruments issued by public or private issuers in Emerging Market Countries which are denominated in the local currency of the relevant Emerging Market Country;
 - warrants on transferable securities; and
 - units of other collective investment schemes,
 are each limited to a maximum of 10% of the Portfolio's Net Asset Value.
- The Portfolio will not utilise margin lending.

Risk

- Investment in the Portfolio carries certain risks which are described in greater detail in the "*Investment Risks*" section of the Prospectus. While investors should read and consider the entire "*Investment Risks*" section of the Prospectus, the risks summarised in the following sections, namely, "*Market Risks: Risks relating to Debt Securities*", "*Risks Associated with Investment in the China Interbank Bond Market through Bond Connect*" and "*Market Risks: Risks Relating to Emerging Markets*" are particularly relevant to this Portfolio. **These risks are not purported to be exhaustive and potential investors should review this Supplement and the Prospectus in their entirety and consult with their professional advisers, before making an application for Shares.**
- Investors should refer to the Company's risk management policy with respect to the use of FDI contained in the RMP Statement.
- The Portfolio is expected to be leveraged up to 150% of its Net Asset Value as a result of its use of FDI, although investors should note that higher levels of leverage may be experienced. This expected leverage figure is calculated using the Sum of the Notional values of the derivatives used, as required by the Central Bank. Using this methodology does not reflect any netting or hedging that the Portfolio may have in place
- The Portfolio's global exposure is subject to an advanced risk management process which, in compliance with the UCITS Regulations, aims to ensure that on any day

the relative VaR of the Portfolio will be no greater than twice the VaR of the Benchmark. The VaR of the Portfolio is a daily estimation of the maximum loss which the Portfolio may incur over a 20 Business Day holding period and is arrived at through quantitative simulations with a 99% one tailed confidence interval and using an historical observation period of at least 250 business days. This process is described in detail in the statement of risk management procedures of the Company and its appendix in respect of the Portfolio. While the Portfolio measures and monitors its global exposure using the VaR approach, rather than by use of the Commitment Approach, the leverage of the Portfolio using the Commitment Approach is expected to be 100% of its Net Asset Value as a result of its use of FDI, although investors should note that higher levels of leverage may be experienced.

- The Manager and/or the Sub-Investment Manager may use forward and non-deliverable forward currency contracts, currency futures contracts and transactions, currency options, and currency swaps in order to hedge currency risk on a discretionary basis. In addition, the Manager and/or the Sub-Investment Manager may use futures, options, warrants, swaps (including credit default swaps and swaptions) on debt securities or money market instruments, indices and interest rates to hedge investments in such instruments. Investors should note that it may not be possible or practical to hedge the Portfolio's exposures to such instruments perfectly and that, where it deems it appropriate, the Manager and/or the Sub-Investment Manager make take hedging positions in respect of other instruments which it considers to be suitable proxies for the Portfolio's investments. The use of such hedging techniques may increase the risk profile of the Portfolio.

Environmental, Social and Governance ("ESG")

This Portfolio meets the classification of an Article 8 Portfolio as it promotes environmental and social characteristics and limits investments to companies that follow good governance practices.

ESG risks and opportunities are systematically considered in the selection of securities to be constituents of the Portfolio. The Manager and the Sub-Investment Manager assesses securities in relation to their exposure to and the management of ESG risks. ESG represents governance, (being the way in which the company is run), environmental issues, (such as the impact on natural resources), and social issues (such as human rights).

Typical Investor Profile

Investment in the Portfolio may be suitable for investors who are prepared to accept the general risks associated with investing in Emerging Market Countries and the risks of bond markets over the medium to long term, together with medium to high levels of volatility due to the Portfolio's investment policies or portfolio management techniques.

Fees and Expenses

Category	Maximum Initial Charge	Maximum Management fee	Distribution Fee
A, X, Y	5.00%	1.40%	0.00%
B, C1, C2, E	0.00%	1.80%	1.00%
C	0.00%	0.95%	1.00%
D, I, I2, I3, I4, I5	0.00%	0.70%	0.00%
M	2.00%	1.40%	0.80%
P	5.00%	0.67%	0.00%
T	5.00%	1.80%	0.00%
U	3.00%	1.05%	0.00%
Z	0.00%	0.00%	0.00%

For details of the Administration Fees payable by the Portfolio, please see the "Administration Fees" heading in the "Fees and Expenses" section of the Prospectus.

Contingent deferred sales charges

Contingent deferred sales charges will be payable in respect of the following Classes at the rates specified below, depending on the period that has elapsed since the issue of the Shares being redeemed and will be charged on the lower of the Net Asset Value per Share on the relevant Dealing Day in respect of which the relevant Shares were (i) initially subscribed or (ii) redeemed. Any such contingent deferred sales charges will be paid to the relevant Distributor, the Manager or to the Sub-Investment Manager.

Class	Redemption Period in Calendar Days				
	< 365	365 - 729	730 - 1094	1095 – 1459	> 1459
B	4%	3%	2%	1%	0%
C, C1	1%	0%	0%	0%	0%
C2	2%	1%	0%	0%	0%
E	3%	2%	1%	0%	0%

Minimum Initial Subscription Amount

Notwithstanding the information contained in Annex II to the Prospectus, Shares in the Category SEK I and all Category I5 Classes in the Portfolio will each be subject to the minimum initial subscription amount of 50,000,000.

Other important information for investors in Hong Kong

As the Portfolio has been authorised for public offer in Hong Kong, the Hong Kong Securities and Futures Commission (“HKSF”) requires the Company to classify the Portfolio on the basis of its expected maximum net derivative exposure (“NDE”). The HKSF requires the NDE to be calculated in accordance with the HKSF’s Code on Unit Trusts and Mutual Funds and the requirements and guidance issued by the HKSF, which may be updated from time to time. This requires the Company to convert all FDI acquired for investment purposes that would generate incremental leverage at the portfolio level of the Portfolio into their equivalent positions in the underlying assets. Applying these requirements, the Portfolio’s NDE is expected to be less than 50% but the actual level may be higher than the expected level in exceptional circumstances, for example when there are sudden movements in markets and/or investment prices.

For the avoidance of doubt, complying with the HKSF’s requirements to classify the Portfolio on the basis of its NDE does not amend the investment objectives or policies or otherwise impact the management of the Portfolio or its use of FDI, as the requirements are solely to measure the Portfolio’s expected use of FDI, as described above, using the HKSF’s methodology and disclose the results.

Neuberger Berman Emerging Market Corporate Debt Fund

An investment in the Portfolio should not constitute a substantial proportion of an investment portfolio and may not be appropriate for all investors.

Investment Objective

The Portfolio aims to achieve a target average return of 1-2% over the Benchmark (as specified in the “*Benchmark*” section below) before fees over a market cycle (typically 3 years) by investing primarily in debt issued in Emerging Market Countries.

Investors should note that the target return is not guaranteed over a market cycle, a 12-month or any period and the Portfolio’s capital is at risk. Investors should also note that, over the course of a market cycle, there may be significant periods of time during which the performance of the Portfolio will deviate from the targeted return and the Portfolio may experience periods of negative return. There can be no guarantee that the Portfolio will ultimately achieve its investment objective.

Investment Approach

The Portfolio will invest primarily in debt securities and money market instruments issued by corporate issuers which have their head office or exercise an overriding part of their economic activity in Emerging Market Countries, which may be denominated in Hard Currency or the currencies of such Emerging Market Countries. For the purposes of the Portfolio, Hard Currency means US Dollar, Euro, Sterling, Japanese Yen and Swiss Franc.

With the exception of permitted investments in transferable securities and money market instruments which are unlisted, all securities invested in by the Portfolio will be listed, dealt or traded on Recognised Markets globally, without any particular focus on any one industrial sector or region.

Please note that, as described below in the “*Risk*” section, investments in securities issued by companies located in Emerging Market Countries may involve additional risk, relative to investment in more developed economies.

Under normal market conditions, the Manager and the Sub-Investment Manager will invest at least two thirds of the Portfolio’s Net Asset Value in debt securities and money market instruments issued by corporate issuers in Emerging Market Countries and denominated in Hard Currency. Up to a maximum of one third of the Portfolio’s Net Asset Value may then be invested in debt securities and money market instruments which are issued by non-corporate issuers and denominated in Hard Currency or which are denominated in the local currency of the relevant Emerging Market Country. On an ancillary basis, the Portfolio may hold equity securities issued by public or private issuers in Emerging Market Countries, such as shares, as a result of the conversion of convertible debt securities or restructuring of debt securities.

The Manager and the Sub-Investment Manager implement a systematic and disciplined framework for analysing sovereign and corporate local currency and Hard Currency debt securities. Decisions on how to allocate the Portfolio’s assets between corporate and non-corporate and local currency and Hard Currency Emerging Market Country debt securities, money market instruments and FDI are dependent on the Manager’s and the Sub-Investment Manager’s outlook on such securities. This outlook focuses on the global market environment, the economic environment of the relevant Emerging Market Countries, the attractiveness of the valuations available in the asset classes and their liquidity. From this outlook, the Manager and Sub-Investment Manager determine the amount of risk that they want the Portfolio to take and allocate across security types accordingly.

The Manager and the Sub-Investment Manager believe their global presence provides a local perspective on macro as well as micro events which feeds into the respective team’s overall research.

The Manager and the Sub-Investment Manager will seek to anticipate yield, spread and currency movements in response to changes in:

- Economic conditions;
- Region, country and sector fundamentals; and
- Issuer specific financial performance and other issuer specific factors.

The Manager and the Sub-Investment Manager will conduct fundamental analysis on the issuers that they track in order to identify undervalued and overvalued securities and exploit investment opportunities. The fundamental analysis used for the selection of governments or government-related issuers incorporates quantitative macroeconomic data and qualitative aspects such as political stability and structural reforms. The fundamental analysis used for the selection of corporate issuers includes quantitative factors aimed at assessing the issuer's financial performance such as revenue/EBITDA ("earnings before interest, tax, depreciation and amortisation") growth, cash flow growth and capital expenditures. Qualitative factors aim to complement the evaluation of corporate credit worthiness by including such factors as corporate governance, quality of earnings and debt structure.

Under normal market conditions, the Manager anticipates that the Portfolio's average interest duration will be within the range of +1.5 years and -1.5 years compared to the Benchmark.

The Portfolio may have or may be expected to have medium to high volatility due to its investment policies or portfolio management techniques.

The Portfolio is actively managed and does not intend to track the Benchmark which is included here for performance comparison purposes and because the Portfolio's investment policy restricts the extent to which the Portfolio's holdings may deviate from the Benchmark, as described above. This deviation may be significant.

Benchmark	<p>JPMorgan CEMBI Diversified (Total Return, USD) which measures the performance of corporate debt markets of Emerging Market Countries.</p> <p>Shareholders in a Class which is denominated in a currency other than the Base Currency should note that, where available, it may be more meaningful to compare the performance of such Class against a version of this index which is denominated in the relevant Class currency.</p>
Base Currency	US Dollars (USD).
Instruments / Asset Classes	<p>The Portfolio will invest primarily in debt securities and money market instruments, issued by governments, government agencies and corporate issuers in Emerging Market Countries. The Portfolio can invest in or be exposed to the following types of assets.</p> <p>Fixed Income Securities (Debt Securities). Such debt securities may include bonds, bonds with warrants, convertible bonds, bonds resulting from the restructuring of syndicated loans or bank loans (e.g. "Brady" bonds), subordinated bonds, debentures and notes (including freely transferable and unleveraged structured notes and freely transferable promissory notes) and may include:</p> <ul style="list-style-type: none"> • Fixed and floating rate securities; • Contingent convertible bonds, subject to a limit of up to 10% of the Portfolio's Net Asset Value; • Bullet debt securities, in respect of which principal is paid upon maturity, or factor debt securities in respect of which principal is paid according to a pre-determined schedule and which can also specify that specific interest payments be added to the principal instead of being paid in cash; • Structured products, such as credit-linked notes and structured notes, which provide indirect access to certain markets or securities; • Investment grade, high yield and unrated debt securities; and • Sukuk structures, which are Islamic finance instruments which represent a

proportionate beneficial ownership in an asset or pool of assets. For a determined period, the return associated with the cash flows generated from the assets belongs to the Sukuk holders. The characteristics of a Sukuk are therefore similar to a conventional debt security, with the difference that sukuk are generally asset-based or asset-backed and carry no interest rate but rather pass the returns generated by the underlying assets to the Sukuk holder.

Money Market Instruments. Money market instruments may include bank deposits, fixed or floating rate instruments (including commercial paper), floating or variable rate notes, bankers acceptances, certificates of deposit, debentures and short-dated government or corporate bonds, cash and cash equivalents (including treasury bills) that are rated as investment grade or below by Recognised Rating Agencies or are unrated.

The Portfolio will not invest more than 10% of its Net Asset Value in securities that are issued or guaranteed by a single sovereign issuer (including its government and any public or local authority) that are below investment grade. This investment restriction does not apply to any securities issued by corporate issuers.

Investment grade securities are highly rated securities, generally those rated Baa3, BBB- or above by one or more Recognised Rating Agencies, while high yield securities are medium or lower rated securities, generally those rated below investment grade and sometimes referred to as "junk bonds".

Collective Investment Schemes. In addition, the Portfolio may invest in collective investment schemes which are themselves exposed to investments that are similar to the Portfolio's other investments. Such collective investment schemes may be managed by the Manager and the Sub-Investment Manager or their affiliates and will comply with the requirements of the UCITS Regulations in respect of such investments.

Financial Derivative Instruments ("FDI"). In addition, the following FDI may be used for hedging, efficient portfolio management and/or investment purposes and subject to the conditions and limits imposed by the Central Bank as set out in the Prospectus:

- Futures, options, warrants, rights, swaps and swaptions on debt securities or money market instruments, UCITS eligible indices and interest rates, which may be used to achieve a profit through gaining exposure to an increase in the value of such securities, indices and interest rates, as well as to hedge existing long positions;
- Total return swaps may be used to hedge or take long or short positions to help achieve specific investment objectives. In addition, total return swaps may be used to achieve a profit through gaining exposure to an increase in the value of securities, indices and interest rates. The maximum proportion of the Portfolio's Net Asset Value that can be subject to total return swaps is 15%. The expected proportion of the Portfolio's Net Asset Value that will be subject to total return swaps is 1%. The expected proportions are not limits and the actual percentages may vary over time depending on factors including, but not limited to, market conditions;
- Credit default swaps on single issuers, indices and/or baskets of securities which may be used to hedge or take long or short credit positions to help achieve specific investment objectives. It is expected that short credit positions will predominantly be taken for hedging but they may also be used for investment purposes where the Manager or the Sub-Investment Manager identifies an attractive investment opportunity based on the Manager's or the Sub-Investment Manager's fundamental analysis which indicates deteriorating fundamentals of an issuer and/or that a security is overvalued;
- Forward contracts on fixed income securities may be used to achieve a profit, through gaining exposure to an increase in the value of such securities as well as to hedge existing long positions; and
- Forward and non-deliverable forward currency contracts, currency futures contracts and transactions, currency options, and currency swaps, which may be used to achieve a profit through gaining exposure to an increase in the value of currencies, as well as to hedge existing long currency positions.

As the Portfolio may purchase FDI generally using only a fraction of the assets that would be needed to purchase the relevant securities directly, the remainder of the assets

allocated to the Manager may be invested in the other types of securities listed above. The Manager and the Sub-Investment Manager may therefore seek to achieve greater returns by taking exposure to the performance of such securities through purchasing FDI which give exposure to them rather than purchasing the securities themselves and investing the remaining assets in other such securities to add excess return.

Repo Contracts and Securities Lending Agreements. Repo Contracts and Securities Lending Agreements may be used subject to the conditions and limits set out in the Prospectus.

Bond Connect

The PBoC and the HKMA have approved the CFETS, CCDC, SHCH, together with Hong Kong Exchanges and Clearing Limited and CMU to launch Bond Connect, which is a mutual bond market access programme between Mainland China and Hong Kong. Bond Connect allows investors to trade electronically between the Mainland China and Hong Kong bond markets without quota restrictions and requirements to identify the ultimate investment amount.

Currently, Bond Connect comprises a Northbound Trading Link between CFETS, the operator of the CIBM and offshore trading access platforms recognised by the PBoC, to facilitate investment by Hong Kong and overseas investors (including the Portfolio) in eligible bonds traded on the CIBM. A Southbound Trading Link, facilitating investment in overseas bond markets by Mainland Chinese investors is still under development but is intended to form part of Bond Connect once established.

Eligible Securities

Hong Kong and overseas investors (including the Portfolio) will be able to trade over the entire range of instruments traded on the CIBM, including products on both the secondary and primary markets.

Trading Day

Northbound investors (including the Portfolio) are able to trade through Bond Connect on days upon which the CIBM is open to trade, regardless of whether they are a public holiday in Hong Kong.

Settlement and Custody

Settlement and custody of Northbound bond trades under Bond Connect will be implemented under the link between the CMU of the HKMA and Mainland China's two bond settlement systems, namely, CCDC and SHCH. The CMU settles Northbound trades and holds the CIBM bonds on behalf of its members in nominee accounts with each of CCDC and SHCH. CCDC and SHCH provide services to foreign investors, directly and indirectly, using Bond Connect.

Bonds purchased by Hong Kong and overseas investors (including the Portfolio) are recorded in an omnibus nominee account at CCDC and SHCH in the name of CMU. The CMU itself maintains the bonds in segregated sub-accounts of its members, who in turn may hold the bonds on their own account or on behalf of other investors or custodians. Accordingly, bonds purchased by Hong Kong and overseas purchasers through Bond Connect are held by the purchaser's global or local custodian in a segregated sub-account opened in their name at the CMU.

Currency

Hong Kong and overseas investors may trade through Bond Connect using offshore RMB (CNH) or by converting foreign currencies into onshore RMB (CNY) under Bond Connect.

Where an investor uses foreign currencies to invest through the Northbound Trading Link, it must open a segregated RMB capital account with an eligible RMB settlement Bank in Hong Kong to convert its foreign currencies into CNY. Where bonds are purchased in CNY in this manner, upon sale of the bonds, the sale proceeds remitted out of Mainland China must be converted back into the relevant foreign currencies.

Further information about Bond Connect is available at:

<http://www.chinabondconnect.com/en/index.htm>

Investment Restrictions

- A maximum of one third of the Portfolio's Net Asset Value may be invested in debt securities and money market instruments which are issued by non-corporate issuers and denominated in Hard Currency.
- A maximum of one third of the Portfolio's Net Asset Value may be invested in debt securities and money market instruments which are denominated in the local currency of the relevant Emerging Market Country.
- A maximum of 25% of the Portfolio's Net Asset Value may be invested in securities issued by issuers located in any one country.
- A maximum of 5% of the Portfolio's Net Asset Value may be invested in securities issued by any one corporate issuer.
- Investments in:
 - other transferable securities, including warrants on transferable securities, are limited to a maximum of 10% of the Portfolio's Net Asset Value; and
 - units of other collective investment schemes are limited to a maximum of 10% of the Portfolio's Net Asset Value.
- The Portfolio will not utilise margin lending.

Risk

- Investment in the Portfolio carries certain risks which are described in greater detail in the "*Investment Risks*" section of the Prospectus. While investors should read and consider the entire "*Investment Risks*" section of the Prospectus, the risks summarised in the following sections, namely, "*Market Risks: Risks relating to Debt Securities*", "*Market Risks: Risks Relating to Emerging Markets*", "*Risks Associated with Investment in the China Interbank Bond Market through Bond Connect*" and "*Risks related to Financial Derivative Instruments*" are particularly relevant to this Portfolio. **These risks are not purported to be exhaustive and potential investors should review this Supplement and the Prospectus in their entirety and consult with their professional advisers, before making an application for Shares.**
- Investors should refer to the Company's risk management policy with respect to the use of FDI contained in the RMP Statement.
- The Portfolio is expected to be leveraged up to 150% of its Net Asset Value as a result of its use of FDI, although investors should note that higher levels of leverage may be experienced. This expected leverage figure is calculated using the Sum of the Notional values of the derivatives used, as required by the Central Bank. Using this methodology does not reflect any netting or hedging that the Portfolio may have in place.
- The Portfolio's global exposure is subject to an advanced risk management process which, in compliance with the UCITS Regulations, aims to ensure that on any day the relative VaR of the Portfolio will be no greater than twice the VaR of the Benchmark. The VaR of the Portfolio is a daily estimation of the maximum loss which the Portfolio may incur over a 20 Business Day holding period and is arrived at through quantitative simulations with a 99% one tailed confidence interval and using an historical observation period of at least 250 business days. This process is described in detail in the statement of risk management procedures of the Company and its appendix in respect of the Portfolio. While the Portfolio measures and monitors its global exposure using the VaR approach, rather than by use of the Commitment Approach, the leverage of the Portfolio using the Commitment Approach is expected to be 100% of its Net Asset Value as a result of its use of FDI, although investors should note that higher levels of leverage may be experienced.
- The Manager and the Sub-Investment Manager may use forward and non-deliverable forward currency contracts, currency futures contracts and transactions, currency options, and currency swaps in order to hedge currency risk on a discretionary basis. In addition, the Manager and/or the Sub-Investment Manager may use futures, options, warrants, swaps (including credit default swaps and swaptions) on debt securities or money market instruments, indices and interest rates to hedge investments in such instruments. Investors should note that it may not be possible or practical to hedge the Portfolio's exposures to such instruments perfectly and that, where it deems it appropriate, the Manager and the Sub-Investment Manager make

take hedging positions in respect of other instruments which it considers to be suitable proxies for the Portfolio's investments. The use of such hedging techniques may increase the risk profile of the Portfolio.

Environmental, Social and Governance (“ESG”) This Portfolio meets the classification of an Article 8 Portfolio as it promotes environmental and social characteristics and limits investments to companies that follow good governance practices.

ESG risks and opportunities are systematically considered in the selection of securities to be constituents of the Portfolio. The Manager and the Sub-Investment Manager assesses securities in relation to their exposure to and the management of ESG risks. ESG represents governance, (being the way in which the company is run), environmental issues, (such as the impact on natural resources), and social issues (such as human rights).

Typical Investor Profile Investment in the Portfolio may be suitable for investors who are prepared to accept the general risks associated with investing in Emerging Market Countries and the risks of bond markets over the medium to long term, together with medium to high levels of volatility due to the Portfolio's investment policies or portfolio management techniques.

Fees and Expenses

Category	Maximum Initial Charge	Maximum Management fee	Distribution Fee
A	5.00%	1.60%	0.00%
B, C1, C2, E	0.00%	1.80%	1.00%

For details of the Administration Fees payable by the Portfolio, please see the “Administration Fees” heading in the “Fees and Expenses” section of the Prospectus.

Contingent deferred sales charges

Contingent deferred sales charges will be payable in respect of the following Classes at the rates specified below, depending on the period that has elapsed since the issue of the Shares being redeemed and will be charged on the lower of the Net Asset Value per Share on the relevant Dealing Day in respect of which the relevant Shares were (i) initially subscribed or (ii) redeemed. Any such contingent deferred sales charges will be paid to the relevant Distributor, the Manager or to the Sub-Investment Manager.

C2	2%	1%	0%	0%	0%
E	3%	2%	1%	0%	0%

Other important information for investors in Hong Kong

As the Portfolio has been authorised for public offer in Hong Kong, the Hong Kong Securities and Futures Commission (“HKSF”) requires the Company to classify the Portfolio on the basis of its expected maximum net derivative exposure (“NDE”). The HKSF requires the NDE to be calculated in accordance with the HKSF's Code on Unit Trusts and Mutual Funds and the requirements and guidance issued by the HKSF, which may be updated from time to time. This

requires the Company to convert all FDI acquired for investment purposes that would generate incremental leverage at the portfolio level of the Portfolio into their equivalent positions in the underlying assets. Applying these requirements, the Portfolio's NDE is expected to be less than 50% but the actual level may be higher than the expected level in exceptional circumstances, for example when there are sudden movements in markets and/or investment prices.

For the avoidance of doubt, complying with the HKSFCA's requirements to classify the Portfolio on the basis of its NDE does not amend the investment objectives or policies or otherwise impact the management of the Portfolio or its use of FDI, as the requirements are solely to measure the Portfolio's expected use of FDI, as described above, using the HKSFCA's methodology and disclose the results.

Neuberger Berman Short Duration Emerging Market Debt Fund

An investment in the Portfolio should not constitute a substantial proportion of an investment portfolio and may not be appropriate for all investors. An investment in the Portfolio is not in the nature of a deposit in a bank account and is not protected by any government, government agency or other guarantee scheme which may be available to protect the holder of a bank deposit account. The value of Shares may go down as well as up and investors may not get back any of the amount invested. The Portfolio will not use FDI extensively or primarily for investment purposes.

Investment Objective

The Portfolio aims to achieve a target average return of 3% over cash (as specified in the “*Benchmark*” section below) before fees over a market cycle (typically 3 years) by investing in a diversified selection of Hard Currency-denominated short duration sovereign and corporate debt issued in Emerging Market Countries.

Investors should note that the target return is not guaranteed over a market cycle, a 12-month or any period and the Portfolio’s capital is at risk. Investors should also note that, over the course of a market cycle, there may be significant periods of time during which the performance of the Portfolio will deviate from the targeted return and the Portfolio may experience periods of negative return. There can be no guarantee that the Portfolio will ultimately achieve its investment objective.

Investment Approach

The Portfolio will invest primarily in short duration debt securities and money market instruments issued by public or corporate issuers which have their head office, or exercise an overriding part of their economic activity, in Emerging Market Countries and which are denominated in Hard Currency. For the purposes of the Portfolio, Hard Currency is defined as US Dollar, Euro, Sterling, Japanese Yen and Swiss Franc. Investors should also note that corporate issuers that are, either directly or indirectly, 100% government-owned are considered to be public issuers.

With the exception of permitted investments in transferable securities and money market instruments which are unlisted, all securities invested in by the Portfolio will be listed, dealt or traded on Recognised Markets globally, without any particular focus on any one industrial sector or region.

Please note that, as described below in the “*Risk*” section, investments in securities issued by companies located in, and governments and government agencies of, Emerging Market Countries may involve additional risk, relative to investment in more developed economies.

Under normal market conditions, the Manager and the Sub-Investment Manager will seek to invest at least 80% of the Portfolio’s Net Asset Value in Hard Currency debt securities and money market instruments issued by public or corporate issuers in Emerging Market Countries. Up to a maximum of 20% of the Portfolio’s Net Asset Value may then be invested in money market instruments and debt securities issued by public or corporate issuers in OECD countries. On an ancillary basis, the Portfolio may hold securities issued by public or corporate issuers in Emerging Market Countries, such as shares and warrants, as a result of the conversion of convertible debt securities or restructuring of debt securities.

The Manager and the Sub-Investment Manager will construct and manage the Portfolio with the goal of combining a search for yield with limited volatility, while aiming to reduce downside risk and the risk of default by the issuers of the securities invested in through the use of fundamental analysis. The Manager and the Sub-Investment Manager implement a systematic and disciplined framework for analysing sovereign and corporate Hard Currency debt securities. Decisions on how to allocate the Portfolio’s assets between sovereign and corporate Hard Currency Emerging Market Country debt securities and money market instruments are dependent on the Manager’s and the Sub-Investment Manager’s outlook on such securities. This outlook focuses on the global market environment, the economic environment of the relevant Emerging Market Countries, the attractiveness of the valuations available in the asset classes and their liquidity. From this outlook, the Manager and the Sub-

Investment Manager determine the amount of risk that they want the Portfolio to take and allocate across security types accordingly.

The Manager and the Sub-Investment Manager believe their global presence provides a local perspective on macro as well as micro events which feeds into the team's overall research.

The Manager and the Sub-Investment Manager will seek to anticipate yield, spread and currency movements in response to changes in:

- Economic conditions globally;
- Fundamental data about the relevant region, country and industrial sector; and
- Issuer specific financial performance and other issuer specific factors.

The Manager and the Sub-Investment Manager will conduct fundamental analysis on the issuers that they track to seek to identify undervalued and overvalued securities and exploit investment opportunities primarily by taking long positions in respect of undervalued securities. The fundamental analysis used for the selection of government or government-related issuers incorporates quantitative macroeconomic data and qualitative aspects such as political stability and structural reforms. The fundamental analysis used for the selection of corporate issuers includes quantitative factors aimed at assessing the issuer's financial performance such as revenue/EBITDA ("earnings before interest, tax, depreciation and amortisation") growth, cash flow growth and capital expenditures. Qualitative factors aim to complement the evaluation of corporate credit worthiness by including such factors as corporate governance, quality of earnings and debt structure.

In addition, the Manager and the Sub-Investment Manager will seek to systematically hedge, under normal market conditions, any currency exposure back to the base currency as further detailed in the "Instruments / Asset Classes" section below.

The Portfolio may have or may be expected to have medium to high volatility due to its investment policies or portfolio management techniques. However, under normal market conditions, the Manager and the Sub-Investment Manager expect the Portfolio's focus on short duration and highly rated debt securities to mitigate volatility levels.

Under normal market conditions, the Manager and the Sub-Investment Manager anticipate that the average duration of the Portfolio's investments will be within a +/- 0.75 range of 2 years.

The Portfolio is actively managed and does not intend to track the Benchmark and is not constrained by it. The Benchmark is included here for performance comparison purposes only. It is not expected that the majority of the Portfolio's assets will be components of the Benchmark. While the Portfolio may acquire securities which are components of the Benchmark, it will not do so because of their inclusion in the Benchmark.

Benchmark

The ICE BofA US 3-Month Treasury Bill Index (Total Return, USD) which is comprised of a single U.S. Treasury Bill issue purchased at the beginning of each month and held for a full month, at which time that issue is sold and rolled into a newly selected issue which has a maturity date closest to, but not beyond 90 days from the rebalance date.

Shareholders in a Class which is denominated in a currency other than the Base Currency should note that, where available, it may be more meaningful to compare the performance of such Class against a version of this index which is denominated in the relevant Class currency.

Base Currency

US Dollars (USD).

Instruments / Asset Classes

The Portfolio will invest primarily in debt securities and money market instruments, issued by governments, government agencies and corporate issuers in Emerging Market Countries. The Portfolio can invest in or be exposed to the following types of assets.

Fixed Income Securities (Debt Securities). Such debt securities may include bonds, bonds with warrants, convertible bonds, bonds resulting from the restructuring of syndicated loans or bank loans (e.g. "Brady" bonds), subordinated bonds, debentures and notes (including freely transferable and unleveraged structured notes and freely transferable promissory notes) and may include:

- Fixed and floating rate securities;
- Contingent convertible bonds, subject to a limit of up to 10% of the Portfolio's Net Asset Value;
- Bullet debt securities, in respect of which principal is paid upon maturity, or factor debt securities in respect of which principal is paid according to a pre-determined schedule and which can also specify that specific interest payments be added to the principal instead of being paid in cash;
- Investment grade, high yield and unrated debt securities; and
- Sukuk structures, which are Islamic finance instruments which represent a proportionate beneficial ownership in an asset or pool of assets. For a determined period, the return associated with the cash flows generated from the assets belongs to the Sukuk holders. The characteristics of a Sukuk are therefore similar to a conventional debt security, with the difference that sukuku are generally asset-based or asset-backed and carry no interest rate but rather pass the returns generated by the underlying assets to the Sukuk holder.

Money Market Instruments. Money market instruments may include bank deposits, fixed or floating rate instruments (including commercial paper), floating or variable rate notes, bankers acceptances, certificates of deposit, debentures and short-dated government or corporate bonds, cash and cash equivalents (including treasury bills) that are rated as investment grade or below by Recognised Rating Agencies or are unrated.

The Portfolio will not invest more than 10% of its Net Asset Value in securities that are issued or guaranteed by a single sovereign issuer (including its government and any public or local authority) that are below investment grade. This investment restriction does not apply to any securities issued by corporate issuers.

Investment grade securities are highly rated securities, generally those rated Baa3, BBB- or above by one or more Recognised Rating Agencies, while high yield securities are medium or lower rated securities, generally those rated below investment grade and sometimes referred to as "junk bonds". While there is no specific restriction on the percentage of the Portfolio's NAV which may be invested in below investment grade securities, investment in such securities will be limited to the extent that the average credit rating of the securities held by the Portfolio and rated by one or more Recognised Rating Agencies will, under normal market conditions, be Baa3, BBB- or higher.

Collective Investment Schemes. In addition, the Portfolio may invest in collective investment schemes which are themselves exposed to investments that are similar to the Portfolio's other investments. Such collective investment schemes may be managed by the Manager and/or the Sub-Investment Manager or their affiliates and will comply with the requirements of the UCITS Regulations in respect of such investments.

Financial Derivative Instruments ("FDI"). In addition, the following FDI will be used, under normal market conditions, to hedge any currency risk back to the Portfolio's base currency, subject to the conditions and limits imposed by the Central Bank as set out in the Prospectus:

- forward and non-deliverable forward currency contracts, currency futures contracts and transactions and currency swaps, may be used to achieve a profit

through gaining exposure to an increase in the value of currencies, as well as to hedge existing long currency positions; and

- forward contracts on fixed income securities may be used to achieve a profit, through gaining exposure to an increase in the value of such securities as well as to hedge existing long positions.

The Portfolio may be leveraged as a result of its investments in FDI but such leverage will not exceed 100% of the Portfolio's Net Asset Value, as measured using the Commitment Approach, at any time.

Repo Contracts and Securities Lending Agreements. Repo Contracts and Securities Lending Agreements may be used subject to the conditions and limits set out in the Prospectus. Repo Contracts may also be used for liquidity management purposes, subject to the limit of 10 % of the Portfolio's Net Asset Value. The expected proportion of the Portfolio's Net Asset Value that will be subject to Repo Contracts for liquidity management purposes is 5%.

Bond Connect

The PBoC and the HKMA have approved the CFETS, CCDC, SHCH, together with Hong Kong Exchanges and Clearing Limited and CMU to launch Bond Connect, which is a mutual bond market access programme between Mainland China and Hong Kong. Bond Connect allows investors to trade electronically between the Mainland China and Hong Kong bond markets without quota restrictions and requirements to identify the ultimate investment amount.

Currently, Bond Connect comprises a Northbound Trading Link between CFETS, the operator of the CIBM and offshore trading access platforms recognised by the PBoC, to facilitate investment by Hong Kong and overseas investors (including the Portfolio) in eligible bonds traded on the CIBM. A Southbound Trading Link, facilitating investment in overseas bond markets by Mainland Chinese investors is still under development but is intended to form part of Bond Connect once established.

Eligible Securities

Hong Kong and overseas investors (including the Portfolio) will be able to trade over the entire range of instruments traded on the CIBM, including products on both the secondary and primary markets.

Trading Day

Northbound investors (including the Portfolio) are able to trade through Bond Connect on days upon which the CIBM is open to trade, regardless of whether they are a public holiday in Hong Kong.

Settlement and Custody

Settlement and custody of Northbound bond trades under Bond Connect will be implemented under the link between the CMU of the HKMA and Mainland China's two bond settlement systems, namely, CCDC and SHCH. The CMU settles Northbound trades and holds the CIBM bonds on behalf of its members in nominee accounts with each of CCDC and SHCH. CCDC and SHCH provide services to foreign investors, directly and indirectly, using Bond Connect.

Bonds purchased by Hong Kong and overseas investors (including the Portfolio) are recorded in an omnibus nominee account at CCDC and SHCH in the name of CMU. The CMU itself maintains the bonds in segregated sub-accounts of its members, who in turn may hold the bonds on their own account or on behalf of other investors or custodians. Accordingly, bonds purchased by Hong Kong and overseas purchasers through Bond Connect are held by the purchaser's global or local custodian in a segregated sub-account opened in their name at the CMU.

Currency

Hong Kong and overseas investors may trade through Bond Connect using offshore RMB (CNH) or by converting foreign currencies into onshore RMB (CNY) under Bond Connect.

Where an investor uses foreign currencies to invest through the Northbound Trading Link, it must open a segregated RMB capital account with an eligible RMB settlement Bank in Hong Kong to convert its foreign currencies into CNY. Where bonds are purchased in CNY in this manner, upon sale of the bonds, the sale proceeds remitted out of Mainland China must be converted back into the relevant foreign currencies.

Further information about Bond Connect is available at:

<http://www.chinabondconnect.com/en/index.htm>

Investment Restrictions

Under normal market conditions:

- the Manager and the Sub-Investment Manager intend to invest the Portfolio's assets such that the average credit rating of debt securities held and rated by one or more Recognised Rating Agencies is Baa3, BBB- or above. Where no rating from a Recognised Rating Agency is available for a debt security for this purpose, the Manager or the Sub-Investment Manager will use a Recognised Rating Agency's rating of the security's issuer, the security's guarantor or another security issued by the issuer's parent (if any such rating is available). For the avoidance of doubt, unrated securities that cannot be included in the average rating calculation will not represent more than 3% of the Portfolio's Net Asset Value.
- A maximum of 25% of the Portfolio's Net Asset Value may be invested in debt securities issued by issuers located in any one country.
- A maximum of 7% of the Portfolio's Net Asset Value may be invested in debt securities issued by any one corporate issuer rated investment grade.
- A maximum of 5% of the Portfolio's Net Asset Value may be invested in debt securities issued by any one corporate issuer rated below investment grade.
- Investments in debt securities and money market instruments issued by public or corporate issuers in OECD countries are in aggregate limited to a maximum of 20% of the Portfolio's Net Asset Value.
- Investment in units of other collective investment schemes is limited to 10% of the Portfolio's Net Asset Value.

The Portfolio will not utilise total return swaps or margin lending.

Risk

- Investment in the Portfolio carries certain risks which are described in greater detail in the "*Investment Risks*" section of the Prospectus. While investors should read and consider the entire "*Investment Risks*" section of the Prospectus, the risks summarised in the following sections, namely, "*Market Risks: Risks relating to Debt Securities*", "*Risks Associated with Investment in the China Interbank Bond Market through Bond Connect*" and "*Market Risks: Risks Relating to Emerging Markets*" are particularly relevant to this Portfolio. **These risks are not purported to be exhaustive and potential investors should review this Supplement and the Prospectus in their entirety and consult with their professional advisers, before making an application for Shares.**
- Investors should refer to the Company's risk management policy with respect to the use of FDI contained in the RMP Statement.
- The Manager and the Sub-Investment Manager will use forward and non-deliverable forward currency contracts, currency futures contracts and transactions and currency swaps in order to hedge currency risk.
- The Portfolio may be leveraged as a result of its investments in FDI but such leverage will not exceed 100% of the Portfolio's Net Asset Value, as measured using the Commitment Approach, at any time.

Environmental, Social and Governance (“ESG”) This Portfolio meets the classification of an Article 8 Portfolio as it promotes environmental and social characteristics and limits investments to companies that follow good governance practices.

ESG risks and opportunities are systematically considered in the selection of securities to be constituents of the Portfolio. The Manager and the Sub-Investment Manager assesses securities in relation to their exposure to and the management of ESG risks. ESG represents governance, (being the way in which the company is run), environmental issues, (such as the impact on natural resources), and social issues (such as human rights).

Typical Investor Profile Investment in the Portfolio may be suitable for investors who are prepared to accept the general risks associated with investing in Emerging Market Countries and the risks of bond markets over the medium to long term, together with medium to high levels of volatility due to the Portfolio’s investment policies or portfolio management techniques. Under normal market conditions, the Manager and the Sub-Investment Manager expect the Portfolio’s focus on short duration and highly rated debt securities to mitigate volatility levels.

Fees and Expenses

Category	Maximum Initial Charge	Maximum Management fee	Distribution Fee

C2	2%	1%	0%	0%	0%
E	3%	2%	1%	0%	0%

Other important information for investors in Hong Kong

As the Portfolio has been authorised for public offer in Hong Kong, the Hong Kong Securities and Futures Commission (“HKSF”) requires the Company to classify the Portfolio on the basis of its expected maximum net derivative exposure (“NDE”). The HKSF requires the NDE to be calculated in accordance with the HKSF’s Code on Unit Trusts and Mutual Funds and the requirements and guidance issued by the HKSF, which may be updated from time to time. This requires the Company to convert all FDI acquired for investment purposes that would generate incremental leverage at the portfolio level of the Portfolio into their equivalent positions in the underlying assets. Applying these requirements,

the Portfolio's NDE is expected to be less than 50% but the actual level may be higher than the expected level in exceptional circumstances, for example when there are sudden movements in markets and/or investment prices.

For the avoidance of doubt, complying with the HKSF's requirements to classify the Portfolio on the basis of its NDE does not amend the investment objectives or policies or otherwise impact the management of the Portfolio or its use of FDI, as the requirements are solely to measure the Portfolio's expected use of FDI, as described above, using the HKSF's methodology and disclose the results.

Neuberger Berman Emerging Market Debt Blend Fund

An investment in the Portfolio should not constitute a substantial proportion of an investment portfolio and may not be appropriate for all investors.

Investment Objective

The Portfolio aims to achieve a target average return of 1-3% over the Benchmark (as specified in the “*Benchmark*” section below) before fees over a market cycle (typically 3 years) from a blend of Hard Currency-denominated debt issued in Emerging Market Countries, local currencies of Emerging Market Countries and debt issued by corporate issuers in Emerging Market Countries.

Investors should note that the target return is not guaranteed over a market cycle, a 12-month or any period and the Portfolio’s capital is at risk. Investors should also note that, over the course of a market cycle, there may be significant periods of time during which the performance of the Portfolio will deviate from the targeted return and the Portfolio may experience periods of negative return. There can be no guarantee that the Portfolio will ultimately achieve its investment objective.

Investment Approach

The Portfolio will invest primarily in debt securities and money market instruments which are issued by governments of, government agencies in or corporate issuers which have their head office or exercise an overriding part of their economic activity in Emerging Market Countries and which are either denominated in or are exposed to the currencies of such Emerging Market Countries (“**local currency**”) or denominated in Hard Currency. For the purposes of the Portfolio, Hard Currency means US Dollar, Euro, Sterling, Japanese Yen, and Swiss Franc.

With the exception of permitted investments in transferable securities and money market instruments which are unlisted, all securities invested in by the Portfolio will be listed, dealt or traded on Recognised Markets globally, without any particular focus on any one industrial sector or region.

Please note that, as described below in the “*Risk*” section, investments in securities issued by companies located in, and governments and government agencies of, Emerging Market Countries may involve additional risk, relative to investment in more developed economies.

Under normal market conditions, the Manager and the Sub-Investment Manager will invest at least two thirds of the Portfolio’s Net Asset Value in a blend of debt instruments issued by public or private issuers in Emerging Market Countries which are denominated in both Hard and Local Currencies. The Portfolio seeks to achieve this by varying the exposure to each of Hard Currency-denominated debt issued in Emerging Market Countries, local currencies of Emerging Market Countries and corporate debt issued in Emerging Market Countries based on the Manager’s and/or the Sub-Investment Manager’s analysis of the prevailing market conditions considered in light of the investment objective of the Portfolio. The Portfolio mainly invests in Latin American, Central and Eastern European, the Middle East, Asian and African debt instruments. Up to a maximum of one third of the Portfolio’s Net Asset Value may then be invested in money market instruments and debt securities issued by public or private issuers in OECD countries. On an ancillary basis, the Portfolio may hold equity securities issued by public or private issuers in Emerging Market Countries, as a result of the conversion of convertible debt securities or restructuring of debt securities.

The Manager and the Sub-Investment Manager implement a systematic and disciplined framework for analysing sovereign and corporate local currency and Hard Currency debt securities. Decisions on how to allocate the Portfolio’s assets between sovereign and corporate and local currency and Hard Currency Emerging Market Country debt securities, money market instruments and FDI are dependent on the Manager’s and the Sub-Investment Manager’s outlook on such securities. This outlook focuses on the global market environment, the economic environment of the relevant Emerging Market Countries, the attractiveness of the valuations available in the asset classes and their liquidity. From this outlook, the Manager and the Sub-Investment Manager determine the

amount of risk that they want the Portfolio to take and allocate across security types accordingly.

The Manager and the Sub-Investment Manager believe their global presence provides a local perspective on macro as well as micro events which feeds into the respective team's overall research.

The Manager and the Sub-Investment Manager will seek to anticipate yield, spread and currency movements in response to changes in:

- Economic conditions;
- Region, country and sector fundamentals; and
- Issuer specific financial performance and other issuer specific factors.

The Manager and the Sub-Investment Manager will conduct fundamental analysis on the issuers that they track in order to identify undervalued and overvalued securities and to exploit investment opportunities. The fundamental analysis used for the selection of governments or government-related issuers incorporates quantitative macroeconomic data and qualitative aspects such as political stability and structural reforms. The fundamental analysis used for the selection of corporate issuers includes quantitative factors aimed at assessing the issuer's financial performance such as revenue/EBITDA (earnings before interest, tax, depreciation and amortisation) growth, cash flow growth and capital expenditures. Qualitative factors aim to complement the evaluation of corporate credit worthiness by including such factors as corporate governance, quality of earnings and debt structure.

Under normal market conditions, the Manager anticipates that the Portfolio's average interest duration will be within the range of +3 years and -3 years compared to the Benchmark.

The Portfolio may have or may be expected to have medium to high volatility due to its investment policies or portfolio management techniques.

The Portfolio is actively managed and does not intend to track the Benchmark which is included here for performance comparison purposes and because the Portfolio's investment policy restricts the extent to which the Portfolio's holdings may deviate from the Benchmark, as described above. This deviation may be significant.

Benchmark

The Benchmark comprises the following blend:

- 50% weighting to JP Morgan GBI Emerging Markets Global Diversified (Total Return, Unhedged, USD) which measures the performance of debt markets of Emerging Countries expressed in local currencies;
- 25% weighting to JP Morgan EMBI Global Diversified (Total Return, USD) which measures the performance of debt markets of Emerging Market Countries expressed in USD; and
- 25% weighting to JP Morgan CEMBI Diversified (Total Return, USD) which measures the performance of corporate debt markets of Emerging Market Countries.

Shareholders in a Class which is denominated in a currency other than the Base Currency should note that, where available, it may be more meaningful to compare the performance of such Class against versions of these indices which are denominated in the relevant Class currency.

Base Currency

US Dollars (USD).

Instruments / Asset Classes

The Portfolio will invest primarily in debt securities and money market instruments, issued by governments, government agencies and corporate issuers in Emerging Market Countries. The Portfolio can invest in or be exposed to the following types of assets.

Fixed Income Securities (Debt Securities). Such debt securities may include bonds, debentures and notes (including freely transferable promissory notes, bonds with warrants and convertible bonds) and may include:

- Fixed and floating rate securities;
- Contingent convertible bonds, subject to a limit of up to 10% of the Portfolio's Net Asset Value;
- Bullet debt securities, in respect of which principal is paid upon maturity, or factor debt securities in respect of which principal is paid according to a pre-determined schedule and which can also specify that specific interest payments be added to the principal instead of being paid in cash;
- Investment grade, high yield and unrated debt securities;
- Structured products, such as credit-linked notes, which provide indirect access to certain markets or securities.
- On an ancillary basis, privately issued asset-backed securities (including mortgage-backed securities such as pass-through certificates, collateralised mortgage obligations and interest and principal only components of mortgage-backed securities) that derive interest and principal payments from specified assets (such as residential and commercial mortgages, credit card debt and pools of other types of receivables); and
- Sukuk structures, which are Islamic finance instruments which represent a proportionate beneficial ownership in an asset or pool of assets. For a determined period, the return associated with the cash flows generated from the assets belongs to the Sukuk holders. The characteristics of a Sukuk are therefore similar to a conventional debt security, with the difference that sukuk are generally asset-based or asset-backed and carry no interest rate but rather pass the returns generated by the underlying assets to the Sukuk holder.

Money Market Instruments. Money market instruments may include bank deposits, fixed or floating rate instruments (including commercial paper), floating or variable rate notes, bankers acceptances, certificates of deposit, debentures and short-dated government or corporate bonds, cash and cash equivalents (including treasury bills) that are rated as investment grade or below by Recognised Rating Agencies or are unrated.

The Portfolio may invest up to 25% of its Net Asset Value in securities that are issued or guaranteed by a single sovereign issuer (including its government, and any public or local authority) that are below investment grade. This investment restriction does not apply to any securities issued by corporate issuers. As certain Emerging Market Countries may be rated below investment grade, the Manager and/or Sub-Investment Manager believe that it is necessary to retain the flexibility to invest in securities issued or guaranteed by each such sovereign issuer above 10% of the Portfolio's Net Asset Value in order to achieve the investment objective of the Portfolio. Currently, the single sovereign issuer with a credit rating below investment grade into whose securities the Manager and/or Sub-Investment Manager expect the Portfolio may invest more than 10% of its Net Asset Value is Brazil.

Investment grade securities are highly rated securities, generally those rated Baa3, BBB- or above by one or more Recognised Rating Agencies, while high yield securities are medium or lower rated securities, generally those rated below investment grade and sometimes referred to as "junk bonds".

Collective Investment Schemes. In addition, the Portfolio may invest in collective investment schemes which are themselves exposed to investments that are similar to the Portfolio's other investments. Such collective investment schemes may be managed by the Manager and/or the Sub-Investment Manager or their affiliates and will comply with the requirements of the UCITS Regulations in respect of such investments.

Financial Derivative Instruments ("FDI"). In addition, the following FDI may be used for efficient portfolio management, investment purposes, and/or hedging and subject to the conditions and limits imposed by the Central Bank as set out in the Prospectus:

- Futures, options, warrants, rights swaps and swaptions on debt securities or money market instruments, UCITS eligible indices and interest rates, which may be used to achieve a profit through gaining exposure to an increase in the value of such securities,

indices and interest rates, as well as to hedge existing long positions;

- Total return swaps may be used to hedge or take long or short positions to help achieve specific investment objectives. In addition, total return swaps may be used to achieve a profit through gaining exposure to an increase in the value of securities, indices and interest rates. The maximum proportion of the Portfolio's Net Asset Value that can be subject to total return swaps is 20%. The expected proportion of the Portfolio's Net Asset Value that will be subject to total return swaps is 1%. The expected proportions are not limits and the actual percentages may vary over time depending on factors including, but not limited to, market conditions;
- Credit default swaps on single issuers, indices and/or baskets of securities which may be used to hedge or take long or short credit positions to help achieve specific investment objectives. It is expected that short credit positions will predominantly be taken for hedging but they may also be used for investment purposes where the Manager or the Sub-Investment Manager identifies an attractive investment opportunity based on the Manager's or the Sub-Investment Manager's fundamental analysis which indicates deteriorating fundamentals of an issuer and/or that a security is overvalued;
- Forward contracts on fixed income securities may be used to achieve a profit, through gaining exposure to an increase in the value of such securities as well as to hedge existing long positions; and
- Forward and non-deliverable forward currency contracts, currency futures contracts and transactions, currency options, and currency swaps, which may be used to achieve a profit through gaining exposure to an increase in the value of currencies, as well as to hedge existing long currency positions.

As the Portfolio may purchase FDI generally using only a fraction of the assets that would be needed to purchase the relevant securities directly, the remainder of the assets allocated to the Manager may be invested in the other types of securities listed above. The Manager and Sub-Investment Manager may therefore seek to achieve greater returns by taking exposure to the performance of such securities through purchasing FDI which give exposure to them rather than purchasing the securities themselves and investing the remaining assets in other such securities to add excess return.

Repo Contracts and Securities Lending Agreements. Repo Contracts and Securities Lending Agreements may be used subject to the conditions and limits set out in the Prospectus.

Bond Connect

The PBoC and the HKMA have approved the CFETS, CCCC, SHCH, together with Hong Kong Exchanges and Clearing Limited and CMU to launch Bond Connect, which is a mutual bond market access programme between Mainland China and Hong Kong. Bond Connect allows investors to trade electronically between the Mainland China and Hong Kong bond markets without quota restrictions and requirements to identify the ultimate investment amount.

Currently, Bond Connect comprises a Northbound Trading Link between CFETS, the operator of the CIBM and offshore trading access platforms recognised by the PBoC, to facilitate investment by Hong Kong and overseas investors (including the Portfolio) in eligible bonds traded on the CIBM. A Southbound Trading Link, facilitating investment in overseas bond markets by Mainland Chinese investors is still under development but is intended to form part of Bond Connect once established.

Eligible Securities

Hong Kong and overseas investors (including the Portfolio) will be able to trade over the entire range of instruments traded on the CIBM, including products on both the secondary and primary markets.

Trading Day

Northbound investors (including the Portfolio) are able to trade through Bond Connect on days upon which the CIBM is open to trade, regardless of whether they are a public holiday in Hong Kong.

Settlement and Custody

Settlement and custody of Northbound bond trades under Bond Connect will be implemented under the link between the CMU of the HKMA and Mainland China's two bond settlement systems, namely, CCDC and SHCH. The CMU settles Northbound trades and holds the CIBM bonds on behalf of its members in nominee accounts with each of CCDC and SHCH. CCDC and SHCH provide services to foreign investors, directly and indirectly, using Bond Connect.

Bonds purchased by Hong Kong and overseas investors (including the Portfolio) are recorded in an omnibus nominee account at CCDC and SHCH in the name of CMU. The CMU itself maintains the bonds in segregated sub-accounts of its members, who in turn may hold the bonds on their own account or on behalf of other investors or custodians. Accordingly, bonds purchased by Hong Kong and overseas purchasers through Bond Connect are held by the purchaser's global or local custodian in a segregated sub-account opened in their name at the CMU.

Currency

Hong Kong and overseas investors may trade through Bond Connect using offshore RMB (CNH) or by converting foreign currencies into onshore RMB (CNY) under Bond Connect.

Where an investor uses foreign currencies to invest through the Northbound Trading Link, it must open a segregated RMB capital account with an eligible RMB settlement Bank in Hong Kong to convert its foreign currencies into CNY. Where bonds are purchased in CNY in this manner, upon sale of the bonds, the sale proceeds remitted out of Mainland China must be converted back into the relevant foreign currencies.

Further information about Bond Connect is available at:

<http://www.chinabondconnect.com/en/index.htm>

Investment Restrictions

- A maximum of 25% of the Portfolio's Net Asset Value may be invested in debt securities issued by issuers located in any one country.
- A maximum of 60% of the Portfolio's Net Asset Value may be invested in securities issued by corporate issuers.
- A maximum of 30% of the Portfolio's Net Asset Value may be invested in quasi-sovereign (100% state owned or explicit sovereign guarantee) securities
- A maximum of 15% of the Portfolio's Net Asset Value may be invested in sub-sovereign (state, regional, municipal debt) securities.
- A maximum of 10% of the Portfolio's Net Asset Value may be invested in supra-national (world bank regional development banks) securities.
- Investments in
 - warrants on transferable securities, are limited to a maximum of 10% of the Portfolio's Net Asset Value;
 - asset-backed securities are limited to a maximum of 20% of the Portfolio's Net Asset Value; and
 - units of other collective investment schemes are limited to a maximum of 10% of the Portfolio's Net Asset Value.
- The Portfolio will not utilise margin lending.

Risk

- Investment in the Portfolio carries certain risks which are described in greater detail in the "*Investment Risks*" section of the Prospectus. While investors should read and consider the entire "*Investment Risks*" section of the Prospectus, the risks summarised in the following sections, namely, "*Market Risks: Risks relating to Debt Securities*", "*Market Risks: Risks Relating to Emerging Markets*", "*Risks Associated with Investment in the China Interbank Bond Market through Bond Connect*" and "*Risks related to Financial Derivative Instruments*" are particularly relevant to this Portfolio. **These risks are not purported to be exhaustive and potential investors should review this Supplement and the Prospectus in their entirety and consult with their professional advisers, before making an application for Shares.**
- Investors should refer to the Company's risk management policy with respect to the use of FDI contained in the RMP Statement.
- In order to manage the currency exposures inherent in the assets of the Portfolio most

efficiently, for each of the Hedged Classes of the Portfolio the Manager will seek to hedge approximately 50% of the relevant class currency exposure of each such class back to the Base Currency.

- The Portfolio is expected to be leveraged up to 400% of its Net Asset Value as a result of its use of FDI, although investors should note that higher levels of leverage may be experienced. This expected leverage figure is calculated using the Sum of the Notional values of the derivatives used, as required by the Central Bank. Using this methodology does not reflect any netting or hedging that the Portfolio may have in place.
- The Portfolio's global exposure is subject to an advanced risk management process which, in compliance with the UCITS Regulations, aims to ensure that on any day the relative VaR of the Portfolio will be no greater than twice the VaR of the Benchmark. The VaR of the Portfolio is a daily estimation of the maximum loss which the Portfolio may incur over a 20 Business Day holding period and is arrived at through quantitative simulations with a 99% one tailed confidence interval and using an historical observation period of at least 250 business days. This process is described in detail in the statement of risk management procedures of the Company and its appendix in respect of the Portfolio. While the Portfolio measures and monitors its global exposure using the VaR approach, rather than by use of the Commitment Approach, the leverage of the Portfolio using the Commitment Approach is expected to be 200% of its Net Asset Value as a result of its use of FDI, although investors should note that higher levels of leverage may be experienced.
- The Manager and the Sub-Investment Manager may use forward and non-deliverable forward currency contracts, currency futures contracts and transactions, currency options; and currency swaps in order to hedge currency risk on a discretionary basis. In addition, the Manager and/or the Sub-Investment Manager may use futures, options, warrants, swaps and swaptions on debt securities or money market instruments, UCITS eligible indices and interest rates to hedge investments in such instruments. Investors should note that it may not be possible or practical to hedge the Portfolio's exposures to such instruments perfectly and that, where it deems it appropriate, the Manager and the Sub-Investment Manager make take hedging positions in respect of other instruments which it considers to be suitable proxies for the Portfolio's investments. The use of such hedging techniques may increase the risk profile of the Portfolio.

Environmental, Social and Governance ("ESG")

This Portfolio meets the classification of an Article 8 Portfolio as it promotes environmental and social characteristics and limits investments to companies that follow good governance practices.

ESG risks and opportunities are systematically considered in the selection of securities to be constituents of the Portfolio. The Manager and the Sub-Investment Manager assesses securities in relation to their exposure to and the management of ESG risks. ESG represents governance, (being the way in which the company is run), environmental issues, (such as the impact on natural resources), and social issues (such as human rights).

Typical Investor Profile

Investment in the Portfolio may be suitable for investors who are prepared to accept the general risks associated with investing in Emerging Market Countries and the risks of bond markets over the medium to long term, together with medium to high levels of volatility due to the Portfolio's investment policies or portfolio management techniques.

Fees and Expenses

Category	Maximum Initial Charge	Maximum Management fee	Distribution Fee
A	5.00%	1.40%	0.00%
B, C1, C2, E	0.00%	1.80%	1.00%
C	0.00%	0.95%	1.00%
D, I, I2, I3, I4, I5, X, Y	0.00%	0.70%	0.00%
M	2.00%	1.40%	0.80%
P	5.00%	0.67%	0.00%
T	5.00%	1.80%	0.00%
U	3.00%	1.05%	0.00%
Z	0.00%	0.00%	0.00%

For details of the Administration Fees payable by the Portfolio, please see the “Administration Fees” heading in the “Fees and Expenses” section of the Prospectus.

Contingent deferred sales charges

Contingent deferred sales charges will be payable in respect of the following Classes at the rates specified below, depending on the period that has elapsed since the issue of the Shares being redeemed and will be charged on the lower of the Net Asset Value per Share on the relevant Dealing Day in respect of which the relevant Shares were (i) initially subscribed or (ii) redeemed. Any such contingent deferred sales charges will be paid to the relevant Distributor, the Manager or to the Sub-Investment Manager.

Class	Redemption Period in Calendar Days				
	< 365	365 - 729	730 - 1094	1095 – 1459	> 1459
B	4%	3%	2%	1%	0%
C, C1	1%	0%	0%	0%	0%
C2	2%	1%	0%	0%	0%
E	3%	2%	1%	0%	0%

Minimum Initial Subscription Amount

Notwithstanding the information contained in Annex II to the Prospectus, Shares in the Category SEK I and all Category I5 Classes in the Portfolio will each be subject to the minimum initial subscription amount of 50,000,000.

Other important information for investors in Hong Kong

As the Portfolio has been authorised for public offer in Hong Kong, the Hong Kong Securities and Futures Commission (“HKSF”) requires the Company to classify the Portfolio on the basis of its expected maximum net derivative exposure (“NDE”). The HKSF requires the NDE to be calculated in accordance with the HKSF’s Code on Unit Trusts and Mutual Funds and the requirements and guidance issued by the HKSF, which may be updated from time to time. This requires the Company to convert all FDI acquired for investment purposes that would generate incremental leverage at the portfolio level of the Portfolio into their equivalent positions in the underlying assets. Applying these requirements, the Portfolio’s NDE is expected to be greater than 100% but the actual level may be higher than the expected level in exceptional circumstances, for example when there are sudden movements in markets and/or investment prices.

For the avoidance of doubt, complying with the HKSF’s requirements to classify the Portfolio on the basis of its NDE does not amend the investment objectives or policies or otherwise impact the management of the Portfolio or its use of FDI, as the requirements are solely to measure the Portfolio’s expected use of FDI, as described above, using the HKSF’s methodology and disclose the results.

Neuberger Berman Emerging Market Debt Sustainable Investment Grade Blend Fund

An investment in the Portfolio should not constitute a substantial proportion of an investment portfolio and may not be appropriate for all investors.

Investment Objective

The Portfolio aims to achieve a target average return of 1% over the Benchmark (as specified in the “*Benchmark*” section below) before fees over a market cycle (typically 3 years) by investing primarily in a blend of investment grade rated hard and local emerging market currency denominated debt, issued by sovereigns, quasi-sovereigns, sub-sovereigns and corporate credits in Emerging Market Countries that meet the Sustainable Criteria.

Investors should note that the target return is not guaranteed over a market cycle, a 12-month or any period and the Portfolio’s capital is at risk. Investors should also note that, over the course of a market cycle, there may be significant periods of time during which the performance of the Portfolio will deviate from the targeted return and the Portfolio may experience periods of negative return. There can be no guarantee that the Portfolio will ultimately achieve its investment objective.

Investment Approach

The Portfolio will invest primarily in investment grade debt securities and money market instruments which are issued by governments of, government agencies in or corporate issuers which have their head office or exercise an overriding part of their economic activity in Emerging Market Countries and which are denominated in or are exposed to the currencies of such Emerging Market Countries (“**Local Currency**”) or denominated in Hard Currency. For the purposes of the Portfolio, Hard Currency means US Dollar, Euro, Sterling, Japanese Yen, and Swiss Franc.

With the exception of permitted investments in transferable securities and money market instruments which are unlisted, all securities invested in by the Portfolio will be listed, dealt or traded on Recognised Markets globally, without any particular focus on any one industrial sector or region.

Please note that, as described below in the “*Risk*” section, investments in securities issued by companies located in, and governments and government agencies of, Emerging Market Countries may involve additional risk, relative to investment in more developed economies.

The Portfolio mainly invests in Latin American, Central and Eastern European, Middle Eastern, Asian and African debt instruments.

Under normal market conditions, the Manager and the Sub-Investment Manager will invest at least two-thirds of the Portfolio’s Net Asset Value in a blend of debt securities and money market instruments which have been issued by public or private issuers in Emerging Market which are denominated in both hard and local currencies. Up to a maximum of one-third of the Portfolio’s Net Asset Value may then be invested in money market instruments and debt securities issued by public or private issuers in OECD countries. On an ancillary basis, the Portfolio may hold equity securities issued by public or private issuers in Emerging Market Countries, as a result of the conversion of convertible debt securities or restructuring of debt securities. The Portfolio seeks to achieve this blend by varying the exposure to each of Hard Currency-denominated debt issued in Emerging Market Countries, Local Currency of Emerging Market Countries and corporate debt issued in Emerging Market Countries based on the Manager’s and the Sub-Investment Manager’s analysis of the prevailing market conditions considered in light of the investment objective of the Portfolio.

The Manager and the Sub-Investment Manager will conduct fundamental analysis on the issuers that they track in order to identify undervalued and overvalued securities and to exploit investment opportunities. The fundamental analysis used for the selection of governments or government-related issuers incorporates quantitative macroeconomic data and qualitative aspects such as political stability, structural reforms and environmental, social and governance (“**ESG**”) metrics. The fundamental analysis used for the selection of corporate issuers includes quantitative factors aimed at assessing the issuer’s financial performance such as revenue/EBITDA (earnings before interest, tax,

depreciation and amortisation) growth, cash flow growth and capital expenditures. Qualitative factors aim to complement the evaluation of corporate credit worthiness by including such factors as corporate governance, quality of earnings, debt structure and ESG metrics. These are to be compared against credit spreads over developed market government bonds, excess of interest rates in Emerging Market Countries over developed markets, and expected default rates in prevailing market pricing. This analysis will be used to form the basis of an investment opinion which is ultimately judgemental.

Investors should note that this Portfolio seeks to apply the Sustainable Exclusion Policy that has been adopted by the Manager and the Sub-Investment Manager) along with the application of the exclusions set out in the Enhanced Sustainable Exclusion Policy, as such terms are defined within the “*Sustainable Investment Criteria*” section of the Prospectus. Investors should refer to the information contained in that section for further details about the application of both the Sustainable Exclusion Policy and Enhanced Sustainable Exclusion Policy to the Portfolio.

ESG analysis: the Manager and the Sub-Investment Manager will first exclude companies from the investment universe that are involved in controversial activities and behaviour, such as the production of controversial weapons, fur manufacturers, gambling, nuclear power or non-compliance with the United Nations Global Compact. The application of the Enhanced Sustainable Exclusion Policy, as such terms are defined within the “*Sustainable Investment Criteria*” section of the Prospectus, also means that companies involved in tobacco, civilian firearms, private prisons and fossil fuels will also be excluded.

The Manager and the Sub-Investment Manager will then assess the investment universe, which involves in-depth research and analysis of companies’ ESG profiles and will also exclude companies that show poorly on this ESG assessment. The Manager and the Sub-Investment Manager will ensure that securities representing at least 90% of the Net Asset Value of the Portfolio are covered by the ESG assessment.

Through these two ESG exclusionary steps, the Manager and the Sub-Investment Manager will exclude at least 20% of components of the investment universe.

Furthermore, the Manager and the Sub-Investment Manager will employ a flexible investment approach that tactically allocates, either directly or indirectly through the use of FDI, to emerging market debt sectors (which are emerging sovereigns, emerging market corporates and emerging local currency governments of various credit ratings) to adapt to changing market conditions and dependent on the attractiveness of the respective sectors relative to one another, as selected by comparing the aggregated premiums of debt securities in each sector.

The Manager and the Sub-Investment Manager also implement a systematic and disciplined framework for analysing sovereign and corporate Hard Currency and local currency debt securities. Decisions on how to allocate the Portfolio’s assets between sovereign and corporate Hard Currency and Local Currency Emerging Market Country debt securities, money market instruments and FDI are dependent on the Manager’s and the Sub-Investment Manager’s outlook on such securities. This outlook focuses on the global market environment, the economic environment of the relevant Emerging Market Countries, the attractiveness of the valuations available in the asset classes and relative to one another as captured by aggregated premiums and their liquidity. From this outlook, the Manager and the Sub-Investment Manager determine the amount of risk that they want the Portfolio to take and allocate across security types accordingly.

The Manager and the Sub-Investment Manager will seek to anticipate yield, spread and currency movements in response to changes in:

- Economic conditions;
- Region, country and sector fundamentals; and
- Issuer specific financial performance and other issuer specific factors.

The Manager and the Sub-Investment Manager believe their global presence provides a local perspective on macro as well as micro events which feeds into the team’s overall research.

The Portfolio may have or may be expected to have medium to high volatility due to its investment policies or portfolio management techniques.

In addition, the Manager and the Sub-Investment Manager may use futures, options, warrants, swaps (including credit default swaps and swaptions) on debt securities or money market instruments, indices and interest rates to hedge investments in such instruments. Investors should note that it may not be possible or practical to hedge the Portfolio's exposures to such instruments perfectly and that, where it deems it appropriate, the Manager and the Sub-Investment Manager make take hedging positions in respect of other instruments which it considers to be suitable proxies for the Portfolio's investments.

The Portfolio is actively managed and does not intend to track the Benchmark and is not constrained by it. The Benchmark is included here for performance comparison purposes only. The Portfolio gives some consideration to the Benchmark constituents in the selection of securities and may not hold all or many of the Benchmark's components.

Benchmark

The Benchmark comprises the following blend:

- 1/3 weighting to the JP Morgan GBI Emerging Markets Global Diversified Investment Grade 15% Cap Index (Total Return, Unhedged, USD) which measures the performance of debt markets of Emerging Countries denominated in local currencies; and
- 2/3 weighting to the JP Morgan EMBI Global Diversified Investment Grade Index (Total Return, USD) which measures the performance of debt markets of Emerging Market Countries denominated in USD.

Shareholders in a Class which is denominated in a currency other than the Base Currency should note that, where available, it may be more meaningful to compare the performance of such Class against versions of these indices which are denominated in the relevant Class currency.

Base Currency

US Dollars (USD).

Instruments / Asset Classes

The Portfolio will invest primarily in debt securities and money market instruments, issued by governments, government agencies and corporate issuers in Emerging Market Countries. The Portfolio can invest in or be exposed to the following types of assets.

Fixed Income Securities (Debt Securities). Such debt securities may include bonds, debentures and notes (including freely transferable and unleveraged structured notes, freely transferable promissory notes bonds with warrants and convertible bonds) and may include:

- Fixed and floating rate securities;
 - Contingent convertible bonds, subject to a limit of up to 10% of the Portfolio's Net Asset Value;
 - Bullet debt securities, in respect of which principal is paid upon maturity, or factor debt securities in respect of which principal is paid according to a pre-determined schedule and which can also specify that specific interest payments be added to the principal instead of being paid in cash;
 - Structured products, such as credit-linked notes and structured notes, which provide indirect access to certain markets or securities;
 - On an ancillary basis, privately issued asset-backed securities (including mortgage-backed securities such as pass-through certificates, collateralised mortgage obligations and interest and principal only components of mortgage-backed securities) that derive interest and principal payments from specified assets (such as residential and commercial mortgages, credit card debt and pools of other types of receivables); and
 - Sukuk structures, which are Islamic finance instruments which represent a proportionate beneficial ownership in an asset or pool of assets. For a determined period, the return associated with the cash flows generated from the assets belongs to the Sukuk holders. The characteristics of a Sukuk are therefore similar to a conventional debt security, with the difference that sukuks are generally asset-based or asset-backed and carry no interest rate but rather pass the returns generated by the underlying assets to the Sukuk holder.
-

Money Market Instruments. Money market instruments may include bank deposits, fixed or floating rate instruments (including commercial paper), floating or variable rate notes, bankers acceptances, certificates of deposit, debentures and short-dated government or corporate bonds, cash and cash equivalents (including treasury bills) that are rated as investment grade or below by Recognised Rating Agencies or are unrated.

Investment grade securities are highly rated securities, generally those rated Baa3, BBB- or above by one or more Recognised Rating Agencies, while high yield securities are medium or lower rated securities, generally those rated below investment grade and sometimes referred to as “junk bonds”. While the Portfolio will only invest in securities which have been rated investment grade by a Recognised Rating Agency, in the event that the credit rating of a security which the Portfolio holds is downgraded to below investment grade following its acquisition by the Portfolio, the Portfolio will dispose of it within sixty days of such downgrade, provided that its credit rating is not upgraded to investment grade before the expiry of such period. The Portfolio may also invest in unrated securities in circumstances where the unrated securities have been subject to the Manager’s or Sub-Investment Manager’s own credit risk assessment and the securities have been deemed to be investment grade.

The Portfolio will not purchase securities that are issued or guaranteed by a single sovereign issuer that are below investment grade.

Collective Investment Schemes. In addition, the Portfolio may invest in collective investment schemes which are themselves exposed to investments that are similar to the Portfolio’s other investments. Such collective investment schemes may be managed by the Manager and/or the Sub-Investment Manager or their affiliates and will comply with the requirements of the UCITS Regulations in respect of such investments.

Financial Derivative Instruments (“FDI”). In addition, the following FDI may be used for efficient portfolio management, investment purposes, and/or hedging and subject to the conditions and limits imposed by the Central Bank as set out in the Prospectus. The following FDI may provide exposure to any or all of the asset classes listed above:

- Futures, options, warrants, rights, swaps and swaptions on debt securities or money market instruments, UCITS eligible indices and interest rates, which may be used to achieve a profit through gaining exposure to an increase in the value of such securities, indices and interest rates, as well as to hedge existing long positions;
- Total return swaps may be used to hedge or take long or short positions to help achieve specific investment objectives. In addition, total return swaps may be used to achieve a profit through gaining exposure to an increase in the value of securities, indices and interest rates. The maximum proportion of the Portfolio’s Net Asset Value that can be subject to total return swaps is 20%. The expected proportion of the Portfolio’s Net Asset Value that will be subject to total return swaps is 1%. The expected proportions are not limits and the actual percentages may vary over time depending on factors including, but not limited to, market conditions;
- Credit default swaps on single issuers, indices and/or baskets of securities which may be used to hedge or take long or short credit positions to help achieve specific investment objectives. It is expected that short credit positions will predominantly be taken for hedging but they may also be used for investment purposes where the Manager’s or the Sub-Investment Manager identifies an attractive investment opportunity based on the Manager or the Sub-Investment Manager’s fundamental analysis which indicates deteriorating fundamentals of an issuer and/or that a security is overvalued;
- Forward contracts on fixed income securities may be used to achieve a profit, through gaining exposure to an increase in the value of such securities as well as to hedge existing long positions; and
- Forward and non-deliverable forward currency contracts, currency futures contracts and transactions, currency options, and currency swaps, which may be used to achieve a profit through gaining exposure to an increase in the value of currencies, as well as to hedge existing long currency positions.

As the Portfolio may purchase FDI generally using only a fraction of the assets that would be needed to purchase the relevant securities directly, the remainder of the assets allocated to the Manager may be invested in the other types of securities listed above. The Manager and/or Sub-Investment Manager may therefore seek to achieve greater returns by taking exposure to the performance of such securities through purchasing FDI which give exposure to them rather than purchasing the securities themselves and investing the remaining assets in other such securities to add excess return.

Repo Contracts and Securities Lending Agreements. Repo Contracts and Securities Lending Agreements may be used subject to the conditions and limits set out in the Prospectus.

Bond Connect

The PBoC and the HKMA have approved the CFETS, CCDC, SHCH, together with Hong Kong Exchanges and Clearing Limited and CMU to launch Bond Connect, which is a mutual bond market access programme between Mainland China and Hong Kong. Bond Connect allows investors to trade electronically between the Mainland China and Hong Kong bond markets without quota restrictions and requirements to identify the ultimate investment amount.

Currently, Bond Connect comprises a Northbound Trading Link between CFETS, the operator of the CIBM and offshore trading access platforms recognised by the PBoC, to facilitate investment by Hong Kong and overseas investors (including the Portfolio) in eligible bonds traded on the CIBM. A Southbound Trading Link, facilitating investment in overseas bond markets by Mainland Chinese investors is still under development but is intended to form part of Bond Connect once established.

Eligible Securities

Hong Kong and overseas investors (including the Portfolio) will be able to trade over the entire range of instruments traded on the CIBM, including products on both the secondary and primary markets.

Trading Day

Northbound investors (including the Portfolio) are able to trade through Bond Connect on days upon which the CIBM is open to trade, regardless of whether they are a public holiday in Hong Kong.

Settlement and Custody

Settlement and custody of Northbound bond trades under Bond Connect will be implemented under the link between the CMU of the HKMA and Mainland China's two bond settlement systems, namely, CCDC and SHCH. The CMU settles Northbound trades and holds the CIBM bonds on behalf of its members in nominee accounts with each of CCDC and SHCH. CCDC and SHCH provide services to foreign investors, directly and indirectly, using Bond Connect.

Bonds purchased by Hong Kong and overseas investors (including the Portfolio) are recorded in an omnibus nominee account at CCDC and SHCH in the name of CMU. The CMU itself maintains the bonds in segregated sub-accounts of its members, who in turn may hold the bonds on their own account or on behalf of other investors or custodians. Accordingly, bonds purchased by Hong Kong and overseas purchasers through Bond Connect are held by the purchaser's global or local custodian in a segregated sub-account opened in their name at the CMU.

Currency

Hong Kong and overseas investors may trade through Bond Connect using offshore RMB (CNH) or by converting foreign currencies into onshore RMB (CNY) under Bond Connect.

Where an investor uses foreign currencies to invest through the Northbound Trading Link, it must open a segregated RMB capital account with an eligible RMB settlement Bank in Hong Kong to convert its foreign currencies into CNY. Where bonds are purchased in CNY

in this manner, upon sale of the bonds, the sale proceeds remitted out of Mainland China must be converted back into the relevant foreign currencies.

Further information about Bond Connect is available at:

<http://www.chinabondconnect.com/en/index.htm>

Investment Restrictions

- A maximum of 25% of the Portfolio's Net Asset Value may be invested in securities issued by issuers located in any one country.
- A maximum of 15% of the Portfolio's Net Asset Value may be invested in securities issued by issuers which are not governments or government-related, with a maximum exposure of 4% of the Portfolio's Net Asset Value to any one such issuer.
- A maximum of 40% of the Portfolio's Net Asset Value may be invested in quasi-sovereign (100% state owned or explicit sovereign guarantee) securities, with a maximum exposure of 8% of the Portfolio's Net Asset Value to any one such issuer.
- A maximum of 15% of the Portfolio's Net Asset Value may be invested in sub-sovereign (state, regional, municipal debt) securities, with a maximum exposure of 3% of the Portfolio's Net Asset Value to any one such issuer. A maximum of 10% of the Portfolio's Net Asset Value may be invested in supra-national (world bank regional development banks) securities.
- Investors should note that the Portfolio will comply with the VAG Requirements, as described under "VAG Requirements" in the "Investment Restrictions" section of the Prospectus, provided these VAG requirements are stricter than the investment restrictions applying to the Portfolio contained in this Supplement.
- Investments in:
 - warrants on transferable securities, are limited to a maximum of 10% of the Portfolio's Net Asset Value;
 - asset-backed securities are limited to a maximum of 20% of the Portfolio's Net Asset Value; and
 - units of other collective investment schemes are limited to a maximum of 10% of the Portfolio's Net Asset Value.
- The Portfolio will be subject to the Sustainable Exclusion Policy and exclude securities prohibited by the Enhanced Sustainable Exclusion Policy as detailed in the "Sustainable Investment Criteria" section of the Prospectus and the "Environmental, Social and Governance" section below.
- The Portfolio will not utilise margin lending.

Risk

- Investment in the Portfolio carries certain risks which are described in greater detail in the "Investment Risks" section of the Prospectus. While investors should read and consider the entire "Investment Risks" section of the Prospectus, the risks summarised in the following sections, namely, "Market Risks: Risks relating to Debt Securities", "Market Risks: Risks Relating to Emerging Markets", "Risks Associated with Investment in the China Interbank Bond Market through Bond Connect" and "Risks related to Financial Derivative Instruments" are particularly relevant to this Portfolio. **These risks are not purported to be exhaustive and potential investors should review this Supplement and the Prospectus in their entirety and consult with their professional advisers, before making an application for Shares.**
- Investors should refer to the Company's risk management policy with respect to the use of FDI contained in the RMP Statement.
- In order to manage the currency exposures inherent in the assets of the Portfolio most efficiently, for each of the Hedged Classes of the Portfolio the Manager will seek to hedge approximately 66% of the relevant class currency exposure of each such class back to the Base Currency.
- The Portfolio is expected to be leveraged up to 400% of its Net Asset Value as a result of its use of FDI, although investors should note that higher levels of leverage may be experienced. This expected leverage figure is calculated using the Sum of the Notional values of the derivatives used, as required by the Central Bank. Using this methodology does not reflect any netting or hedging that the Portfolio may have in place.
- The Portfolio's global exposure is subject to an advanced risk management process which, in compliance with the UCITS Regulations, aims to ensure that on any day the relative VaR of the Portfolio will be no greater than twice the VaR of the Benchmark. The VaR of the Portfolio is a daily estimation of the maximum loss which the Portfolio

may incur over a 20 Business Day holding period and is arrived at through quantitative simulations with a 99% one tailed confidence interval and using an historical observation period of at least 250 business days. This process is described in detail in the statement of risk management procedures of the Company and its appendix in respect of the Portfolio. While the Portfolio measures and monitors its global exposure using the VaR approach, rather than by use of the Commitment Approach, the leverage of the Portfolio using the Commitment Approach is expected to be 200% of its Net Asset Value as a result of its use of FDI, although investors should note that higher levels of leverage may be experienced.

- The Manager and the Sub-Investment Manager may use forward and non-deliverable forward currency contracts, currency futures contracts and transactions, currency options, and currency swaps in order to hedge currency risk on a discretionary basis. The use of such hedging techniques may increase the risk profile of the Portfolio.

Environmental, Social and Governance (“ESG”)

This Portfolio meets the classification of an Article 8 Portfolio as it promotes environmental and social characteristics and limits investments to companies that follow good governance practices.

The Portfolio invests in securities that meet the Manager’s and the Sub-Investment Manager’s criteria set out in the Sustainable Exclusion Policy and exclude securities prohibited by the Enhanced Sustainable Exclusion Policy, as detailed in the “*Sustainable Investment Criteria*” section of the Prospectus.

The Manager and the Sub-Investment Manager:

- exclude securities issued by companies that are involved in controversial activities and behaviour and those which rated worst in terms of its ESG assessment from the investment universe, such that at least 20% of the investment universe is excluded on these bases; and
- ensure at least 90% ESG coverage rate of the Net Asset Value of the Portfolio.

Typical Investor Profile

Investment in the Portfolio may be suitable for investors who are prepared to accept the general risks associated with investing in Emerging Market Countries and the risks of bond markets over the medium to long term, together with medium to high levels of volatility due to the Portfolio’s investment policies or portfolio management techniques.

Fees and Expenses

Category	Maximum Initial Charge	Maximum Management fee	Distribution Fee
A, X, Y	5.00%	1.20%	0.00%
B, C1, C2, E	0.00%	1.80%	1.00%
C	0.00%	0.80%	1.00%

M	2.00%	1.20%	0.80%
P	5.00%	0.57%	0.00%
T	5.00%	1.80%	0.00%
U	3.00%	0.90%	0.00%
Z	0.00%	0.00%	0.00%

For details of the Administration Fees payable by the Portfolio, please see the “*Administration Fees*” heading in the “*Fees and Expenses*” section of the Prospectus.

Contingent deferred sales charges

Contingent deferred sales charges will be payable in respect of the following Classes at the rates specified below, depending on the period that has elapsed since the issue of the Shares being redeemed and will be charged on the lower of the Net Asset Value per Share on the relevant Dealing Day in respect of which the relevant Shares were (i) initially subscribed or (ii) redeemed. Any such contingent deferred sales charges will be paid to the relevant Distributor, the Manager or to the Sub-Investment Manager.

Class	Redemption Period in Calendar Days				
	< 365	365 - 729	730 - 1094	1095 - 1459	> 1459
B	4%	3%	2%	1%	0%

C2	2%	1%	0%	0%	0%
E	3%	2%	1%	0%	0%

Neuberger Berman Asian Debt – Hard Currency Fund

An investment in the Portfolio should not constitute a substantial proportion of an investment portfolio and may not be appropriate for all investors.

Investment Objective The Portfolio aims to achieve a target average return of 1-1.5% over the Benchmark (as specified in the “*Benchmark*” section below) before fees over a market cycle (typically 3 years) by primarily investing in Hard Currency-denominated debt issued in Asian countries.

Investors should note that the target return is not guaranteed over a market cycle, a 12-month or any period and the Portfolio’s capital is at risk. Investors should also note that, over the course of a market cycle, there may be significant periods of time during which the performance of the Portfolio will deviate from the targeted return and the Portfolio may experience periods of negative return. There can be no guarantee that the Portfolio will ultimately achieve its investment objective.

Investment Approach The Portfolio will invest primarily in debt securities and money market instruments which are issued by governments of, government agencies or corporate issuers which have their head office or exercise an overriding part of their economic activity in Asian countries and which are denominated in Hard Currency. For the purposes of the Portfolio, Hard Currency is defined as US Dollar, Euro, Sterling, Japanese Yen and Swiss Franc. Investors should note that public issuers include corporate issuers that are, either directly or indirectly, 100% government-owned.

With the exception of permitted investments in transferable securities and money market instruments which are unlisted, all securities invested in by the Portfolio will be listed, dealt or traded on Recognised Markets globally, without any particular focus on any one industrial sector.

Under normal market conditions, the Manager and the Sub-Investment Manager will invest at least two thirds of the Portfolio’s Net Asset Value in Hard Currency debt securities and money market instruments (as set out below in the “Instruments / Asset Classes section) issued by public or private issuers in Asian countries. Up to a maximum of one third of the Portfolio’s Net Asset Value may be invested in money market instruments and debt securities issued by public or private issuers in non-Asian OECD countries or non-Asian Emerging Market Countries which are denominated in the local currency of the relevant country or Hard Currency. Up to a maximum of one third of the Portfolio’s Net Asset Value may be invested in money market instruments and debt securities issued by public or private issuers in Asian countries which are denominated in the local currency of the relevant Asian country. On an ancillary basis, the Portfolio may hold equity securities issued by public or private issuers in Asian countries, such as shares, as a result of the conversion of convertible debt securities or restructuring of debt securities.

The Manager and the Sub-Investment Manager implement a systematic and disciplined framework for analysing sovereign and corporate local currency and Hard Currency debt securities. Decisions on how to allocate the Portfolio’s assets between sovereign and corporate and Hard Currency and local currency Asian country debt securities, money market instruments and FDI are dependent on the Manager’s and the Sub-Investment Manager’s outlook on such securities. This outlook focuses on the global market environment, the economic environment of the relevant Asian countries, the attractiveness of the valuations available in the asset classes and their liquidity. From this outlook, the Manager and the Sub-Investment Manager determine the amount of risk that they want the Portfolio to take and seek to allocate across security types accordingly.

The Manager and the Sub-Investment Manager believe their global presence provides a local perspective on macro as well as micro events which feeds into the team’s overall research.

The Manager and the Sub-Investment Manager will seek to anticipate yield, spread and currency movements in response to changes in:

- Economic conditions;
- Region, country and sector fundamentals; and
- Issuer specific financial performance and other issuer specific factors (as detailed in the following paragraph).

The Manager and the Sub-Investment Manager will conduct fundamental analysis on the issuers that they track to seek to identify undervalued and overvalued securities and exploit investment opportunities. The fundamental analysis used for the selection of governments or government-related issuers incorporates quantitative macroeconomic data and qualitative aspects such as political stability and structural reforms. The fundamental analysis used for the selection of corporate issuers includes quantitative factors aimed at assessing the issuer's financial performance such as revenue/EBITDA ("earnings before interest, tax, depreciation and amortisation") growth, cash flow growth and capital expenditures. Qualitative factors aim to complement the evaluation of corporate credit worthiness by including such factors as corporate governance, quality of earnings and debt structure.

Under normal market conditions, the Manager anticipates that the Portfolio's average interest duration will be within the range of +1.5 years and -1.5 years compared to the Benchmark.

The Portfolio is actively managed and does not intend to track the Benchmark which is included here for performance comparison purposes and because the Portfolio's investment policy restricts the extent to which the Portfolio's holdings may deviate from the Benchmark, as described above. This deviation may be significant.

Benchmark	<p>JP Morgan Asian Credit Index (Total Return, USD), which tracks the total return performance for actively traded USD denominated debt instruments in the Asia region (excluding Japan).</p> <p>Shareholders in a Class which is denominated in a currency other than the Base Currency should note that, where available, it may be more meaningful to compare the performance of such Class against a version of this index which is denominated in the relevant Class currency.</p>
------------------	---

Base Currency	US Dollars (USD).
----------------------	-------------------

Instruments / Asset Classes	The Portfolio will invest primarily in debt securities and money market instruments, issued by governments, government agencies and corporate issuers in Asian Countries. The Portfolio can invest in or be exposed to the following types of assets.
------------------------------------	---

Fixed Income Securities (Debt Securities). Such debt securities may include bonds, bonds with warrants, convertible bonds, bonds resulting from the restructuring of syndicated loans or bank loans (e.g. "Brady" bonds), subordinated bonds, debentures and notes (including freely transferable and structured notes and freely transferable promissory notes) and may include:

- Fixed and floating rate securities;
- Contingent convertible bonds, subject to a limit of up to 10% of the Portfolio's Net Asset Value;
- Bullet debt securities, in respect of which principal is paid upon maturity, or factor debt securities in respect of which principal is paid according to a pre-determined schedule and which can also specify that specific interest payments be added to the principal instead of being paid in cash;
- Investment grade, high yield and unrated debt securities;
- Structured products, such as credit-linked notes and structured notes, which provide indirect access to certain markets or securities; On an ancillary basis, privately issued asset-backed securities (including mortgage-backed securities such as pass-through certificates, collateralised mortgage obligations and interest and principal only components of mortgage backed securities) that derive interest and principal payments from specified assets (such as residential and commercial mortgages, credit card debt and pools of other types of receivables); and
- Sukuk structures, which are Islamic finance instruments which represent a proportionate beneficial ownership in an asset or pool of assets. For a determined period, the return associated with the cash flows generated from the assets belongs to the Sukuk holders. The characteristics of a Sukuk are therefore similar to a conventional debt security, with the difference that Sukuks are generally asset-based or asset-backed and carry no interest rate but rather pass the returns generated by the underlying assets to the Sukuk holder.

Money Market Instruments. Money market instruments may include bank deposits, fixed or floating rate instruments (including commercial paper), floating or variable rate notes, bankers acceptances, certificates of deposit, debentures and short-dated government or corporate bonds, cash and cash equivalents (including treasury bills) that are rated as investment grade or below by Recognised Rating Agencies or are unrated.

Investment grade securities are highly rated securities, generally those rated Baa3, BBB- or above by one or more Recognised Rating Agencies, while high yield securities are medium or lower rated securities, generally those rated below investment grade and sometimes referred to as “junk bonds”.

Collective Investment Schemes. In addition, the Portfolio may invest in collective investment schemes which are themselves exposed to investments that are similar to the Portfolio’s other investments. Such collective investment schemes may be managed by the Manager and/or the Sub-Investment Manager or their affiliates and will comply with the requirements of the UCITS Regulations in respect of such investments.

Financial Derivative Instruments (“FDI”). In addition, the following FDI may be used for hedging, efficient portfolio management and/or investment purposes and subject to the conditions and limits imposed by the Central Bank as set out in the Prospectus:

- Futures, options, warrants, rights, swaps and swaptions on debt securities or money market instruments, UCITS eligible indices and interest rates, which may be used to achieve a profit through gaining exposure to an increase in the value of such securities, indices and interest rates, as well as to hedge existing long positions;
- Total return swaps may be used to hedge or take long or short positions to help achieve specific investment objectives. In addition, total return swaps may be used to achieve a profit through gaining exposure to an increase in the value of securities, indices and interest rates. The maximum proportion of the Portfolio’s Net Asset Value that can be subject to total return swaps is 10%. The expected proportion of the Portfolio’s Net Asset Value that will be subject to total return swaps is 1%. The expected proportions are not limits and the actual percentages may vary over time depending on factors including, but not limited to, market conditions;
- Credit default swaps on single issuers, indices and/or baskets of securities which may be used to hedge or take long or short credit positions to help achieve specific investment objectives. It is expected that short credit positions will predominantly be taken for hedging but they may also be used for investment purposes where the Manager or the Sub-Investment Manager identifies an attractive investment opportunity based on the Manager or the Sub-Investment Manager’s fundamental analysis which indicates deteriorating fundamentals of an issuer and/or that a security is overvalued;
- Forward contracts on fixed income securities may be used to achieve a profit, through gaining exposure to an increase in the value of such securities as well as to hedge existing long positions; and
- Forward and non-deliverable forward currency contracts, currency futures contracts and transactions, currency options, and currency swaps, which may be used to achieve a profit through gaining exposure to an increase in the value of currencies, as well as to hedge existing long currency positions.

As the Portfolio may purchase FDI generally using only a fraction of the assets that would be needed to purchase the relevant securities directly, the remainder of the assets allocated to the Manager may be invested in the other types of securities listed above. The Manager and/or Sub-Investment Manager may therefore seek to achieve greater returns by taking exposure to the performance of such securities through purchasing FDI which give exposure to them rather than purchasing the securities themselves and investing the remaining assets in other such securities to add excess return.

Repo Contracts and Securities Lending Agreements. Repo Contracts and Securities Lending Agreements may be used subject to the conditions and limits set out in the Prospectus.

Bond Connect

The PBoC and the HKMA have approved the CFETS, CCDC, SHCH, together with Hong Kong Exchanges and Clearing Limited and CMU to launch Bond Connect, which is a mutual bond market access programme between Mainland China and Hong Kong. Bond Connect allows investors to trade electronically between the Mainland China and Hong Kong bond markets without quota restrictions and requirements to identify the ultimate investment amount.

Currently, Bond Connect comprises a Northbound Trading Link between CFETS, the operator of the CIBM and offshore trading access platforms recognised by the PBoC, to facilitate investment by Hong Kong and overseas investors (including the Portfolio) in eligible bonds

traded on the CIBM. A Southbound Trading Link, facilitating investment in overseas bond markets by Mainland Chinese investors is still under development but is intended to form part of Bond Connect once established.

Eligible Securities

Hong Kong and overseas investors (including the Portfolio) will be able to trade over the entire range of instruments traded on the CIBM, including products on both the secondary and primary markets.

Trading Day

Northbound investors (including the Portfolio) are able to trade through Bond Connect on days upon which the CIBM is open to trade, regardless of whether they are a public holiday in Hong Kong.

Settlement and Custody

Settlement and custody of Northbound bond trades under Bond Connect will be implemented under the link between the CMU of the HKMA and Mainland China's two bond settlement systems, namely, CCDC and SHCH. The CMU settles Northbound trades and holds the CIBM bonds on behalf of its members in nominee accounts with each of CCDC and SHCH. CCDC and SHCH provide services to foreign investors, directly and indirectly, using Bond Connect.

Bonds purchased by Hong Kong and overseas investors (including the Portfolio) are recorded in an omnibus nominee account at CCDC and SHCH in the name of CMU. The CMU itself maintains the bonds in segregated sub-accounts of its members, who in turn may hold the bonds on their own account or on behalf of other investors or custodians. Accordingly, bonds purchased by Hong Kong and overseas purchasers through Bond Connect are held by the purchaser's global or local custodian in a segregated sub-account opened in their name at the CMU.

Currency

Hong Kong and overseas investors may trade through Bond Connect using offshore RMB (CNH) or by converting foreign currencies into onshore RMB (CNY) under Bond Connect.

Where an investor uses foreign currencies to invest through the Northbound Trading Link, it must open a segregated RMB capital account with an eligible RMB settlement Bank in Hong Kong to convert its foreign currencies into CNY. Where bonds are purchased in CNY in this manner, upon sale of the bonds, the sale proceeds remitted out of Mainland China must be converted back into the relevant foreign currencies.

Further information about Bond Connect is available at:

<http://www.chinabondconnect.com/en/index.htm>

Investment Restrictions

- A maximum of one third of the Portfolio's Net Asset Value may be invested in money market instruments and debt securities issued by public or private issuers in non-Asian OECD countries or non-Asian Emerging Market Countries which are denominated in the local currency of the relevant Emerging Market Country or Hard Currency.
- A maximum of one third of the Portfolio's Net Asset Value may be invested in money market instruments and debt securities issued by public or private issuers in Asian countries which are denominated in the local currency of the relevant Asian country.
- A maximum of 10% of the Portfolio's Net Asset Value may be invested in any one corporate issuer.
- A maximum of 40% of the Portfolio's Net Asset Value may be invested in non-investment grade securities.
- Investments in units of other collective investment schemes are each limited to a maximum of 10% of the Portfolio's Net Asset Value.
- A maximum of 60% of the Portfolio's Net Asset Value may be invested in debt securities and money market instruments which are issued by non-corporate issuers and denominated in Hard Currency.
- A maximum of 35% of the Portfolio's Net Asset Value may be invested in debt securities and

money market instruments which are issued by quasi-sovereign issuers (100% state owned or explicit sovereign guarantee).

- A maximum of 10% of the Portfolio's Net Asset Value may be invested in debt securities and money market instruments which are issued by sub-sovereign issuers (state, regional, municipal debt).
- The Portfolio will not utilise margin lending.

Risk

- Investment in the Portfolio carries certain risks which are described in greater detail in the "Investment Risks" section of the Prospectus. While investors should read and consider the entire "Investment Risks" section of the Prospectus, the risks summarised in the following sections, namely, "Market Risks: Risks relating to Debt Securities", "Risks Associated with Investment in the China Interbank Bond Market through Bond Connect" and "Market Risks: Risks Relating to Emerging Markets" are particularly relevant to this Portfolio. **These risks are not purported to be exhaustive and potential investors should review this Supplement and the Prospectus in their entirety and consult with their professional advisers, before making an application for Shares.**
- Investors should refer to the Company's risk management policy with respect to the use of FDI contained in the RMP Statement.
- The Portfolio is expected to be leveraged up to 250% of its Net Asset Value as a result of its use of FDI, although investors should note that higher levels of leverage may be experienced. This expected leverage figure is calculated using the Sum of the Notional of the derivatives used, as required by the Central Bank. Using this methodology does not reflect any netting or hedging that the Portfolio may have in place. The Portfolio's global exposure is subject to an advanced risk management process which, in compliance with the UCITS Regulations, aims to ensure that on any day the relative VaR of the Portfolio will be no greater than twice the VaR of the Benchmark. The VaR of the Portfolio is a daily estimation of the maximum loss which the Portfolio may incur over a 20 Business Day holding period and is arrived at through quantitative simulations with a 99% one tailed confidence interval and using an historical observation period of at least 250 business days. This process is described in detail in the statement of risk management procedures of the Company and its appendix in respect of the Portfolio. While the Portfolio measures and monitors its global exposure using the VaR approach, rather than by use of the Commitment Approach, the leverage of the Portfolio using the Commitment Approach is expected to be 150% of its Net Asset Value as a result of its use of FDI, although investors should note that higher levels of leverage may be experienced.
- The Manager and/or the Sub-Investment Manager may use forward and non-deliverable forward currency contracts, currency futures contracts and transactions, currency options, total return swaps and currency swaps in order to hedge currency risk on a discretionary basis. In addition, the Manager and/or the Sub-Investment Manager may use futures, options, warrants, swaps (including credit default swaps and swaptions) on debt securities or money market instruments, indices and interest rates to hedge investments in such instruments. Investors should note that it may not be possible or practical to hedge the Portfolio's exposures to such instruments perfectly and that, where it deems it appropriate, the Manager and/or the Sub-Investment Manager make take hedging positions in respect of other instruments which it considers to be suitable proxies for the Portfolio's investments. The use of such hedging techniques may increase the risk profile of the Portfolio.

Environmental, Social and Governance ("ESG")

This Portfolio meets the classification of an Article 8 Portfolio as it promotes environmental and social characteristics and limits investments to companies that follow good governance practices.

ESG risks and opportunities are systematically considered in the selection of securities to be constituents of the Portfolio. The Manager and the Sub-Investment Manager assesses securities in relation to their exposure to and the management of ESG risks. ESG represents governance, (being the way in which the company is run), environmental issues, (such as the impact on natural resources), and social issues (such as human rights).

Typical Investor Profile

Investment in the Portfolio may be suitable for investors who are prepared to accept the general risks associated with investing both Asian and non-Asian Emerging Market Countries and the risks of bond markets over the medium to long term, together with medium to high volatility due to its investment policies or portfolio management techniques.

Fees and Expenses

Category	Maximum Initial Charge	Maximum Management fee	Distribution Fee
A, X, Y	5.00%	1.20%	0.00%
B, C1, C2, E	0.00%	1.80%	1.00%
C	0.00%	0.80%	1.00%
D, I, I2, I3, I4, I5	0.00%	0.60%	0.00%
M	2.00%	1.20%	0.60%
P	5.00%	0.57%	0.00%
T	5.00%	1.80%	0.00%
U	3.00%	0.90%	0.00%
Z	0.00%	0.00%	0.00%

For details of the Administration Fees payable by the Portfolio, please see the “Administration Fees” heading in the “Fees and Expenses” section of the Prospectus.

Contingent deferred sales charges

Contingent deferred sales charges will be payable in respect of the following Classes at the rates specified below, depending on the period that has elapsed since the issue of the Shares being redeemed and will be charged on the lower of the Net Asset Value per Share on the relevant Dealing Day in respect of which the relevant Shares were (i) initially subscribed or (ii) redeemed. Any such contingent deferred sales charges will be paid to the relevant Distributor, the Manager or to the Sub-Investment Manager.

Class	Redemption Period in Calendar Days				
	< 365	365 - 729	730 - 1094	1095 – 1459	> 1459
B	4%	3%	2%	1%	0%
C, C1	1%	0%	0%	0%	0%
C2	2%	1%	0%	0%	0%
E	3%	2%	1%	0%	0%

For further information on fees, please refer to the “Fees and Expenses” section of the Prospectus.

The Directors of the Company whose names appear in the “*Management and Administration*” section of the Prospectus accept responsibility for the information contained in this document. To the best of the knowledge and belief of the Directors (who have taken all reasonable care to ensure that such is the case) the information contained in this document is in accordance with the facts and does not omit anything likely to affect the importance of such information. The Directors accept responsibility accordingly.

NEUBERGER BERMAN INVESTMENT FUNDS PLC

(An investment company with variable capital constituted as an umbrella fund with segregated liability between sub-funds under the laws of Ireland and authorised by the Central Bank of Ireland pursuant to the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations 2011, as amended)

US EQUITY SUPPLEMENT

23 DECEMBER 2021

This document forms part of, and should be read in the context of and together with, the prospectus dated 23 December 2021 as may be amended from time to time (the “Prospectus”) in relation to Neuberger Berman Investment Funds plc (the “Company”) and contains information relating to the following sub-funds, each of which is a separate portfolio of the Company:

NEUBERGER BERMAN US SMALL CAP FUND

NEUBERGER BERMAN US MULTI CAP OPPORTUNITIES FUND

NEUBERGER BERMAN US SMALL CAP INTRINSIC VALUE FUND

NEUBERGER BERMAN US EQUITY FUND

NEUBERGER BERMAN US LARGE CAP VALUE FUND

(the “Portfolios”)

Distribution Policy

Under normal circumstances, the Directors intend that dividends in respect of:

- each of the (Monthly) Distributing Classes in the Portfolios shall be declared on or prior to the last Business Day of each month and paid within three Business Days thereafter; and
- each of the other Distributing Classes in the Portfolios will be declared on an annual basis and paid within 30 Business Days thereafter.

Subscriptions and Redemptions

Subscriptions for Shares in all Classes of each Portfolio which have not already launched at the date of this Supplement will be considered during the Initial Offer Period, upon receipt by the Administrator of completed share applications and subscription monies as specified in the “*Subscriptions*” section of the Prospectus. Such Shares will be issued at the Initial Offer Price on the last day of the Initial Offer Period.

The Initial Offer Period shall run from 9.00 am on 24 December 2021 to 5.00 pm on 24 June 2022 or such earlier or later time as the Directors may determine at their discretion and notify to the Central Bank and to subscribers.

Except as provided below, the Initial Offer Price for each of the share classes shall be as follows:

AUD Classes: AUD 10	DKK Classes: DKK 50	NOK Classes: NOK 100
BRL Classes: BRL 20	EUR Classes: EUR 10	NZD Classes: NZD 10
CAD Classes: CAD 10	GBP Classes: GBP 10	SEK Classes: SEK 100

Thereafter and, in the case of Classes which have already launched, from the date of this Supplement, Shares will be issued at their Net Asset Value per Share, subject to the provision for Duties and Charges in respect of the issue of the Shares and rounding as provided for in the Articles on each Dealing Day.

The Company reserves the right to apply to Euronext Dublin to have the Shares in each of the Classes admitted to the Official List and to trading on the regulated market of Euronext Dublin.

The Company may, in its sole discretion, reject any subscription in whole or in part without reason.

As stated in the “*Subscriptions and Redemptions*” section of the Prospectus, redemption proceeds in respect of the Portfolios will be paid within ten (10) Business Days of the relevant Dealing Day unless payment has been suspended in the circumstances described in the “*Temporary Suspension of Dealings*” section of the Prospectus, although the Company will seek to make such payments within a shorter period of time where possible (up to and including within three (3) Business Days of the relevant Dealing Day).

Neuberger Berman US Small Cap Fund

The Portfolio will not use FDI extensively or primarily for investment purposes.

Investment Objective	Achieve capital growth through the selection of investments applying analysis of company key metrics and macro economic factors.
Investment Approach	<p>The Portfolio will primarily invest in equity securities issued by small-capitalisation companies which have either their head office or exercise an overriding part of their economic activity in the US and that are listed or traded on Recognised Markets.</p> <p>The Sub-Investment Manager generally considers small-capitalisation companies to be those with a total market capitalisation within the market capitalisation range of companies in the Benchmark (as specified in the "<i>Benchmark</i>" section below), at the time of initial purchase. The Portfolio may continue to hold or add to a position in corporations even after their market capitalisations have grown outside of the range of the Benchmark</p> <p>The Sub-Investment Manager seeks to identify undervalued companies whose current market share and balance sheet are strong and whose financial strength is largely based on existing business lines rather than on projected growth. Factors in identifying such companies include:</p> <ul style="list-style-type: none"> • above-average returns; • an established market niche; • circumstances that may make it difficult for new competitors to enter the market; • an ability to finance their own growth; and • sound future business prospects. <p>This approach is intended to let the Portfolio benefit from potential increases in stock prices, while reducing the risks typically associated with small-capitalisation stocks.</p> <p>The Sub-Investment Manager follows a disciplined selling strategy and will consider disposing of an investment where:</p> <ul style="list-style-type: none"> • the company's stock price reaches a target price; • the company's business fails to perform as expected; or • other investment opportunities offer a more favourable return. <p>The Portfolio is actively managed and does not intend to track the Benchmark, which is included here for performance comparison purposes and because the Portfolio will use the Benchmark as a universe from which it will select the investments that it makes in accordance with its investment objective and policies. The Portfolio may not hold all or many of the Benchmark's components.</p>
Benchmark	<p>The Russell 2000 Index (Total Return, Net of Tax, USD) which is an unmanaged index comprised of the stock prices of 2000 small US companies and measures the market of smaller capitalised US stocks.</p> <p>Shareholders in a Class which is denominated in a currency other than the Base Currency should note that, where available, it may be more meaningful to compare the performance of such Class against a version of this index which is denominated in the relevant Class currency.</p>
Base Currency	US Dollars (USD).
Instruments / Asset Classes	<p>The Portfolio will invest primarily in equity securities. The Portfolio can invest in or be exposed to the following types of assets.</p> <p>Equity and Equity-linked Securities. These securities may include, without limitation, common stock, preferred stock etc. issued by small-capitalisation companies that have their head office or exercise an overriding part of their economic activity in the US and are listed or traded on Recognised Markets. Additionally, the Portfolio may also invest in equity securities issued by non-US small-capitalisation companies; although such investments will generally not</p>

exceed 10% of the Portfolio's Net Asset Value.

Collective Investment Schemes. The Portfolio may invest in eligible collective investment schemes, including ETFs, although such investments will generally not exceed 5% of Net Asset Value. ETFs are investment companies whose shares are bought and sold on a securities exchange. ETFs invest in a portfolio of securities designed to track a particular market segment or index, in this case equity markets. The ETFs will be located and listed in Relevant Jurisdictions. The ETFs and other collective investment schemes will predominately represent investments that are similar to the Fund's other investments. The ETFs will operate on the principle of risk spreading and will not be leveraged.

Money Market Instruments. Subject to a maximum of 10% of Net Asset Value, the Portfolio may invest in money market instruments, which may include bank deposits, fixed or floating rate instruments (including commercial paper), floating or variable rate notes, bankers acceptances, certificates of deposit, debentures and short-dated government or corporate bonds, cash and cash equivalents (including treasury bills), or money market funds which meet the criteria set out under "*Collective Investment Schemes*" above, in each case that are rated as investment grade or below by Recognised Rating Agencies or are unrated.

Investment grade securities are highly rated securities, generally those rated Baa3, BBB- or above by one or more Recognised Rating Agencies, while high yield securities are medium or lower rated securities, generally those rated below investment grade and sometimes referred to as "junk bonds".

Repo Contracts and Securities Lending Agreements. Repo Contracts and Securities Lending Agreements may be used subject to the conditions and limits set out in the Prospectus.

Investment Restrictions

- The Portfolio will not invest in securities that are issued or guaranteed by a single sovereign issuer that are below investment grade.
- A maximum of 20% of the Portfolio's Net Asset Value may be invested in a single industry.
- A maximum of 5% of the Portfolio's Net Asset Value may be invested in a single issuer.
- The Portfolio will not utilise total return swaps or margin lending.

Risk

- Investment in the Portfolio carries certain risks which are described in greater detail in the "*Investment Risks*" section of the Prospectus. While investors should read and consider the entire "*Investment Risks*" section of the Prospectus, the "*Small Cap Risk*", which is contained within the "*Market Risks*" section, is particularly relevant to this Portfolio. **These risks are not purported to be exhaustive and potential investors should review this Supplement and the Prospectus in their entirety and consult with their professional advisers, before making an application for Shares.**
- Investors should refer to the Company's risk management policy with respect to the use of FDI contained in the RMP Statement.
- The Portfolio may be leveraged as a result of its investments in FDI but such leverage will not exceed 100% of the Portfolio's Net Asset Value, as measured using the Commitment Approach, at any time.
- The Sub-Investment Manager will use forward currency contracts in order to hedge currency risk.
- The Portfolio will seek to reduce risk by diversifying among many companies and industries and, at times, may place emphasis on certain sectors that could benefit from potential increases in stock price.
- The Portfolio may have or may be expected to have medium to high volatility due to its investment policies or portfolio management techniques.

Environmental, Social and Governance ("ESG")

This Portfolio meets the classification of an Article 8 Portfolio as it promotes environmental and social characteristics and limits investments to companies that follow good governance practices.

ESG risks and opportunities are systematically considered in the selection of securities to be constituents of the Portfolio. The Sub-Investment Manager assesses securities in relation to their exposure to and the management of ESG risks. ESG represents governance, (being the way in which the company is run), environmental issues, (such as the impact on natural resources), and social issues (such as human rights).

Please also refer to Annex VI of the Prospectus which contains additional information on the ESG characteristics that are applicable to this Portfolio.

Typical Investor Profile The Portfolio may be suitable for investors who are prepared to accept the risks of investing in equity securities issued by small-capitalisation companies which have their head office or exercise an overriding part of their economic activity in the US.

E	3%	2%	1%	0%	0%

Other important information for investors in Hong Kong

As the Portfolio has been authorised for public offer in Hong Kong, the Hong Kong Securities and Futures Commission (“HKSF”) requires the Company to classify the Portfolio on the basis of its expected maximum net derivative exposure (“NDE”). The HKSF requires the NDE to be calculated in accordance with the HKSF’s Code on Unit Trusts and Mutual Funds and the requirements and guidance issued by the HKSF, which may be updated from time to time. This requires the Company to convert all FDI acquired for investment purposes that would generate incremental leverage at the portfolio level of the Portfolio into their equivalent positions in the underlying assets. Applying these requirements, the Portfolio’s NDE is expected to be less than 50% but the actual level may be higher than the expected level in exceptional circumstances, for example when there are sudden movements in markets and/or investment prices.

For the avoidance of doubt, complying with the HKSF’s requirements to classify the Portfolio on the basis of its NDE does not amend the investment objectives or policies or otherwise impact the management of the Portfolio or its use of FDI, as the requirements are solely to measure the Portfolio’s expected use of FDI, as described above, using the HKSF’s methodology and disclose the results.

Neuberger Berman US Multi Cap Opportunities Fund

The Portfolio will not use FDI extensively or primarily for investment purposes.

Investment Objective	Achieve capital growth through the selection of investments using systematic, sequential research.
Investment Approach	<p>The Portfolio will seek to achieve its objective primarily by investing in a portfolio, consisting mainly of equity and equity-linked securities, listed or traded on Recognised Markets in the US and related securities and American Depositary Receipts (ADRs) that are selected using a fundamental, bottom-up research approach. The Portfolio may hold stocks of companies of any market capitalisation and in any economic sector. The Portfolio may also, but to a lesser extent invest in equity related derivatives which are listed or traded on Markets in the US described in the “Instruments/Asset Classes” section.</p> <p>The Sub-Investment Manager’s portfolio construction consists of analysing three distinct types of investment categories:</p> <ul style="list-style-type: none"> • Special situation investments. Special situation investments have unique attributes (e.g., restructurings, spin-offs, post-bankruptcy equities) that require specific methodologies and customised investment research to be carried out by the Sub-Investment Manager; • Opportunistic investments. Opportunistic investments are companies that have become inexpensive for a tangible reason that the Sub-Investment Manager believes is temporary; and • Classic investments. Classic investments are those companies with long histories of shareholder-friendly policies, high-quality management teams and consistent operating performance. <p>As noted above, the Sub-Investment Manager performs both quantitative and qualitative analysis in an effort to identify companies that it believes have the potential to increase in value. This potential may be realised in many ways, some of which include: free cash flow generation, product or process enhancements, margin increases, and improved capital structure management. Investments are selected by the Sub-Investment Manager primarily based on fundamental analysis of issuers and their potential in light of their financial condition, industry position, market opportunities, senior management teams and any special situations as well as any relevant economic, political and regulatory factors.</p> <p>The Sub-Investment Manager employs disciplined valuation criteria and price limits to determine when to buy or sell a stock. The valuation criteria and price limits will change over time as a result of changes in company-specific, industry and market factors. The Sub-Investment Manager follows a disciplined selling strategy and may sell a stock when it reaches a price target, when other opportunities appear more attractive, or when the Sub-Investment Manager’s research indicates deteriorating fundamentals.</p> <p>Although the Portfolio invests primarily in assets in equity and equity-linked securities issued by companies that are listed or traded on Recognised Markets located in the US, it may also invest on an ancillary basis in stocks of companies that are listed or traded on Recognised Markets outside of the US.</p> <p>While the Portfolio has no specific sector concentration, the Sub-Investment Manager may emphasise certain sectors that the Sub-Investment Manager believes will benefit from market or economic trends at times.</p> <p>The Portfolio is actively managed and does not intend to track the Benchmark and is not constrained by it. The Benchmark is included here for performance comparison purposes only. The Portfolio gives some consideration to the Benchmark constituents in the selection of securities and may not hold all or many of the Benchmark’s components.</p>
Benchmark	The S&P 500 Index (Total Return, Net of Tax, USD) which is a capitalisation weighted index of 500 stocks is designed to measure performance of the broad economy of the US

through changes in the aggregate market value of 500 stocks representing all major industries.

Shareholders in a Class which is denominated in a currency other than the Base Currency should note that, where available, it may be more meaningful to compare the performance of such Class against a version of this index which is denominated in the relevant Class currency.

Base Currency	US Dollars (USD).
Instruments / Asset Classes	<p>The Portfolio will invest the majority of its assets in equity securities issued by US companies that are listed or traded on Recognised Markets, primarily located in the US. The Portfolio can invest in or be exposed to the following types of assets:</p> <p>Equity and Equity-linked Securities. These securities may include, without limitation, common stock, preferred stock, convertible bonds, convertible preferred stock and American, European and Global Depository Receipts, which are securities issued by a financial institution which evidence ownership interests in a security or a pool of securities deposited with the financial institution.</p> <p>Equity Real Estate Investment Trusts ("REITs"). REITs are companies or trusts that pool investor money and invest mainly in income producing real estate, although it should be noted that the Portfolio will not acquire any real estate directly. REITs may invest in a diverse range of real estate properties or may specialise in a particular type of property. The REITs in which the Portfolio will invest may be based globally but predominantly in the US and will give exposure to underlying properties located globally. They will invest the majority of their assets directly in real property and derive their income from rents and capital gains from appreciation realised through property sales.</p> <p>Financial Derivative Instruments ("FDI"). FDI will be used for investment, hedging and/or efficient portfolio management and subject to the conditions and limits imposed by the Central Bank as set out in the Prospectus and this Supplement:</p> <ul style="list-style-type: none"> • Warrants may be used to take exposure to the type of equity securities described above. • Single stock options may be used to take exposure to equity securities of the type described above and UCITS eligible index options may be used to achieve a profit as well as to hedge or efficiently manage some portions or all of the Portfolio. Call and Put options may be purchased or sold (written) and will generally be short in duration (6 months or less), and will be less than 5% of the Portfolio's Net Asset Value on a delta-adjusted basis. • Forward currency contracts may be used to achieve a profit through gaining exposure to an increase in the value of currencies, as well as to hedge existing long currency exposures. <p>Money Market Instruments. The Portfolio may invest in money market instruments, which may include bank deposits, fixed or floating rate instruments (including commercial paper), floating or variable rate notes, bankers acceptances, certificates of deposit, debentures and short-dated government or corporate bonds, cash and cash equivalents (including treasury bills) that are rated as investment grade or below by Recognised Rating Agencies or are unrated.</p> <p>Investment grade securities are highly rated securities, generally those rated Baa3, BBB- or above by one or more Recognised Rating Agencies, while high yield securities are medium or lower rated securities, generally those rated below investment grade and sometimes referred to as "junk bonds".</p> <p>Repo Contracts and Securities Lending Agreements. Repo Contracts and Securities Lending Agreements may be used subject to the conditions and limits set out in the Prospectus.</p>

Investment Restrictions

- The Sub-Investment Manager's investment in equity options will not exceed 5% of the Portfolio's Net Asset Value on a delta-adjusted basis.
- The Portfolio will not utilise total return swaps or margin lending.

Risk

- Investment in the Portfolio carries certain risks which are described in greater detail in the "Investment Risks" section of the Prospectus. Investors should read and consider the entire "Investment Risks" section of the Prospectus. **These risks are not purported to be exhaustive and potential investors should review this Supplement and the Prospectus in their entirety and consult with their professional advisers, before making an application for Shares.**
- Investors should refer to the Company's risk management policy with respect to the use of FDI contained in the RMP Statement.
- The Portfolio may be leveraged as a result of its investments in FDI but such leverage will not exceed 100% of the Portfolio's Net Asset Value, as measured using the Commitment Approach, at any time.
- The Sub-Investment Manager will use forward currency contracts in order to hedge currency risk.
- The Portfolio will seek to reduce risk by diversifying among many companies and industries.
- The Portfolio may have or may be expected to have medium to high volatility due to its investment policies or portfolio management techniques.

Environmental, Social and Governance ("ESG")

This Portfolio meets the classification of an Article 8 Portfolio as it promotes environmental and social characteristics and limits investments to companies that follow good governance practices.

ESG risks and opportunities are systematically considered in the selection of securities to be constituents of the Portfolio. The Sub-Investment Manager assesses securities in relation to their exposure to and the management of ESG risks. ESG represents governance (being the way in which the company is run), environmental issues (such as the impact on natural resources), and social issues (such as human rights).

Please also refer to Annex VI of the Prospectus which contains additional information on the ESG characteristics that are applicable to this Portfolio.

Typical Investor Profile

The Portfolio may be suitable for an investor seeking long term capital appreciation over a mid-to-long term horizon. The investor should be prepared to accept periods of market volatility and the risks of the stock market in pursuit of long term goals.

Fees and Expenses

Other important information for investors in Hong Kong

As the Portfolio has been authorised for public offer in Hong Kong, the Hong Kong Securities and Futures Commission (“HKSF”) requires the Company to classify the Portfolio on the basis of its expected maximum net derivative exposure (“NDE”). The HKSF requires the NDE to be calculated in accordance with the HKSF’s Code on Unit Trusts and Mutual Funds and the requirements and guidance issued by the HKSF, which may be updated from time to time. This requires the Company to convert all FDI acquired for investment purposes that would generate incremental leverage at the portfolio level of the Portfolio into their equivalent positions in the underlying assets. Applying these requirements, the Portfolio’s NDE is expected to be less than 50% but the actual level may be higher than the expected level in exceptional circumstances, for example when there are sudden movements in markets and/or investment prices.

For the avoidance of doubt, complying with the HKSF’s requirements to classify the Portfolio on the basis of its NDE does not amend the investment objectives or policies or otherwise impact the management of the Portfolio or its use of FDI, as the requirements are solely to measure the Portfolio’s expected use of FDI, as described above, using the HKSF’s methodology and disclose the results.

Neuberger Berman US Small Cap Intrinsic Value Fund

The Portfolio will not use FDI extensively or primarily for investment purposes.

Investment Objective	Seek to achieve long term capital growth.
Investment Approach	<p>The Portfolio will primarily invest in equity securities issued by small-capitalisation companies which have their head office or exercise an overriding part of their economic activity in the US and that are listed or traded on Recognised Markets in the US. The Portfolio's investment in small capitalisation companies will not be restricted by sector or industry.</p> <p>The Sub-Investment Manager generally considers small-capitalisation companies to be those with market capitalisations less than US\$5 billion at the time of initial purchase or companies whose stocks are within the universe of the Benchmark, or such other index as the Sub-Investment Manager may from time to time deem appropriate, at the time of initial purchase. The Portfolio may continue to hold a position in corporations even after their market capitalisations exceed US\$5 billion or where those stocks are no longer part of the universe of the Benchmark or such other index as the Sub-Investment Manager may from time to time deem appropriate.</p> <p>The Sub-Investment Manager seeks to identify undervalued securities which it believes are selling at a material discount to their intrinsic value and in respect of which a catalyst could narrow the value/price differential (ie: where a particular catalyst may result in an increase to the price of such security to reflect more closely what the Sub-Investment Manager believes to be the security's intrinsic value (i.e. it's inherent worth, as distinct from its then current market price) and thereby result in sustainable value creation over time. Such catalysts may include:</p> <ul style="list-style-type: none"> • restructuring (for example, the restructuring of management personnel and operations personnel and systems), debt restructuring and financial restructuring (including, for example, the creation of new shares, the purchase or outstanding shares or public offering of shares); • major changes to management personnel and/or management structure; • split up/spin off of a company's business operations, units, segments or branches; • share repurchases and asset sales; • capital reallocation; • corporate re-engineering, including the analysis and subsequent re-engineering of a company's business objectives, strategies, processes and workflows; and • other future business prospects which, in the Sub-Investment Manager's opinion, may result in the achievement of the Portfolio's investment objective. <p>Using the above catalyst criteria, the Sub-Investment Manager identifies a range of potential investments and analyses the significance of any relevant or potential catalyst, quantifying its potential impact on the relevant company's growth.</p> <p>The Portfolio follows a disciplined selling strategy and will consider disposing of an investment where:</p> <ul style="list-style-type: none"> • the company's stock price / value differential narrows significantly; • there is a change in strategic plan or intrinsic value assessment; or • portfolio diversification is necessary. <p>The Portfolio may also invest up to 20% of its Net Asset Value in equity securities issued by US and non-US (including Emerging Market Countries) mid-capitalisation companies. The Sub-Investment Manager generally considers mid-capitalisation companies to be those with market capitalisations of between US\$5 billion and US\$20 billion at the time of initial purchase. The Portfolio may continue to hold a position in a corporation after its market capitalisation exceeds US\$20 billion as the Sub-Investment Manager deems appropriate. The Portfolio's investment in mid-capitalisation companies will not be restricted by sector or industry.</p> <p>The Portfolio is actively managed and does not intend to track the Benchmark, which is included here for performance comparison purposes and because the Portfolio will use the Benchmark</p>

as a universe from which it will select the investments that it makes in accordance with its investment objective and policies. The Portfolio may not hold all or many of the Benchmark's components.

Benchmark The Russell 2000 Value Index (Total Return, Net of Tax, USD) which is an unmanaged index comprised of the stock prices of the small cap value segment of the US equity universe and measures the market of smaller capitalised US stocks.

Shareholders in a Class which is denominated in a currency other than the Base Currency should note that, where available, it may be more meaningful to compare the performance of such Class against a version of this index which is denominated in the relevant Class currency.

Base Currency US Dollars (USD).

Instruments / Asset Classes The Portfolio will invest primarily in equity securities. The Portfolio can invest in or be exposed to the following types of assets.

Equity and Equity-linked Securities. These securities may include, without limitation, common stock, preferred stock, issued by small-capitalisation companies that have their head office or exercise an overriding part of their economic activity in the US and are listed or traded on Recognised Markets in the US. Additionally, the Portfolio may also invest in equity securities issued by non-US (including Emerging Market Countries) small-capitalisation companies although such investments will generally not exceed 10% of the Portfolio's Net Asset Value. Total investment in equity securities issued in Emerging Market Countries, through small-capitalisation and mid-capitalisation companies, shall not exceed 20% of the Portfolio's Net Asset Value.

Money Market Instruments. The Portfolio may invest in money market instruments, which may include bank deposits, fixed or floating rate instruments (including commercial paper), floating or variable rate notes, bankers acceptances, certificates of deposit, debentures and short-dated government or corporate bonds, cash and cash equivalents (including treasury bills), or money market funds which meet the criteria set out under "*Collective Investment Schemes*" below, in each case that are rated as investment grade or below by Recognised Rating Agencies or are unrated.

Investment grade securities are highly rated securities, generally those rated Baa3, BBB- or above by one or more Recognised Rating Agencies, while high yield securities are medium or lower rated securities, generally those rated below investment grade and sometimes referred to as "junk bonds".

Collective Investment Schemes. The Portfolio may invest in collective investment schemes which are themselves exposed to investments that are similar to the Portfolio's other investments, provided that the Portfolio may not invest more than 10% in other collective investment schemes (including ETFs) which themselves invest in other collective investment schemes. Such collective investment schemes may or may not be managed by the Manager and/or the Sub-Investment Manager or its affiliates and will comply with the requirements of the UCITS Regulations in respect of such investments.

The other collective investment schemes in which the Portfolio may invest will be eligible collective investment schemes in accordance with the Central Bank's rules, which may be domiciled in Relevant Jurisdictions or the United States of America and will qualify as UCITS or AIF schemes and will be regulated as such by their home state regulator.

Collective investment schemes in which the Portfolio invests may be leveraged but such collective investment schemes will not generally be leveraged (i) in excess of 100% of their net asset value; or (ii) so that their 1 day absolute value-at-risk exceeds 4.47% of their net asset value over a 250 day horizon with a 99% confidence level; or (iii) so that their 1 month relative value-at-risk exceeds twice the value-at-risk of a comparable benchmark portfolio over a 250 day horizon with a 99% confidence level, depending on how such collective investment schemes measure their global exposure.

Repo Contracts and Securities Lending Agreements. Repo Contracts and Securities Lending Agreements may be used subject to the conditions and limits set out in the Prospectus.

Investment Restrictions

- The Portfolio will not utilise total return swaps or margin lending.

Risk

- Investment in the Portfolio carries certain risks which are described in greater detail in the “*Investment Risks*” section of the Prospectus. While investors should read and consider the entire “*Investment Risks*” section of the Prospectus, the “*Small Cap Risk*”, which is contained within the “*Market Risks*” section, is particularly relevant to this Portfolio. **These risks are not purported to be exhaustive and potential investors should review this Supplement and the Prospectus in their entirety and consult with their professional advisers, before making an application for Shares.**
- Investors should refer to the Company’s risk management policy with respect to the use of FDI contained in the RMP Statement.
- The Portfolio may be leveraged as a result of its investments in FDI but such leverage will not exceed 100% of the Portfolio’s Net Asset Value, as measured using the Commitment Approach, at any time.
- The Sub-Investment Manager will use forward currency contracts in order to hedge currency risk.
- The Portfolio will seek to reduce risk by diversifying among companies and industries and, at times, may place emphasis on certain sectors that could benefit from potential increases in stock prices.
- The Portfolio may have or may be expected to have medium to high volatility due to its investment policies or portfolio management techniques.

Environmental, Social and Governance (“ESG”)

ESG risks and opportunities are systematically considered in the selection of securities to be constituents of the Portfolio. The Sub-Investment Manager assesses securities in relation to their exposure to and the management of ESG risks. ESG represents governance, (being the way in which the company is run), environmental issues, (such as the impact on natural resources), and social issues (such as human rights).

Please also refer to Annex VI of the Prospectus which contains additional information on the ESG characteristics that are applicable to this Portfolio.

Typical Investor Profile

The Portfolio may be suitable for investors seeking long term capital appreciation over a mid-to-long term horizon. The investor should be prepared to accept the risks of investing in equity securities issued by small-capitalisation companies which have their head office or exercise an overriding part of their economic activity in the US and to accept medium to high levels of volatility due to the Portfolio’s investment policies or portfolio management techniques.

E	3%	2%	1%	0%	0%

Neuberger Berman US Equity Fund

The Portfolio will not use FDI extensively or primarily for investment purposes.

Investment Objective Seek long term capital appreciation.

Investment Approach The Portfolio will seek to achieve its objective principally by taking long positions in equity and equity-linked securities, listed or traded on Recognised Markets in the US. The Portfolio may also but to a lesser extent take long positions in equity and equity-linked securities which are listed or traded on Recognised Markets located in the countries which comprise the MSCI ACWI (All Country World Index) (which may include Emerging Market Countries) and described in the “*Instruments/Asset Classes*” section.

The equity securities in which the Portfolio invests may include those issued by corporate, governments and government related entities across all industrial sectors and market capitalisations.

The Sub-Investment Manager will employ a research driven, bottom-up, fundamental approach to stock selection, with a long term perspective that combines both quantitative analysis and qualitative judgment to identify investments that the Sub-Investment Manager considers to be attractive. From a quantitative perspective, the Sub-Investment Manager’s key financial metrics is return on invested capital through a full business cycle. Its quantitative analysis includes an assessment of the quality of an issuer’s income statement, balance sheet and cash flows and an understanding of the key drivers of its business. From a valuation perspective, a myriad of financial metrics are analysed, on a historical basis, as well as relative to the issuer’s competitors. These metrics may include the issuer’s price to earnings, price to free cash flow, price to sales, price to book value and enterprise value to EBITDA (earnings before interest, tax, depreciation and amortisation) ratios. The Sub-Investment Manager will also regularly conduct quantitative screens as one element to help identify investment candidates. Qualitatively, they conduct a fundamental business evaluation, including the durability of an issuer’s competitive advantage, in an effort to understand the risk involved with an investment. This will involve meeting with management teams (assessing quality, experience and past success), competitors, industry participants and other stakeholders. Another important factor in the overall evaluation is to understand the alignment of an issuer’s management’s interests and incentives, as assessed through meetings with management, with the achievement of the Portfolio’s investment objective.

The Sub-Investment Manager generally intends to invest in companies which it believes are undervalued. They will look for what it believes to be attractive businesses, led by strong management teams with a track record of success whose securities are available at valuations that they consider to be compelling. The investment process involves applying a valuation framework that seeks to identify investments that exhibit a demonstrated ability to produce profits that exceed the cost of capital. This measurement, known as Economic Value Added (EVA), helps gain insight into each and every business that is considered for investment by identifying profits generated by issuers using less capital which are considered to be more valuable than those generated using comparatively more capital. Key factors for EVA include understanding capital structures, cost of capital and other underlying business drivers (e.g. revenue growth and margins) that drive reinvestment rates and returns. Furthermore, the Sub-Investment Manager seeks to invest in issuers where management’s compensation framework is aligned with an EVA mindset (i.e. management pay is linked to generation of EVA). While the Sub-Investment Manager evaluates other key measures, such as price-to-earnings and price-to-book value ratios, its investment approach is primarily focussed on the principles of EVA, which the Sub-Investment Manager believes gives distinct insight when making investments.

The Sub-Investment Manager will follow a disciplined selling strategy that analyses broad based, macro-economic and/or security-specific circumstances and may sell a

security for a number of reasons, including when it reaches a target price, if the issuer's business fails to perform as expected, or when other opportunities appear more attractive. From a macro-economic perspective, the Sub-Investment Manager monitors a host of variables that include but are not limited to the fixed income markets (e.g. credit spreads in respect of equity issuers), equity market volatility, leading economic indicators, and the global geopolitical environment. From a company-specific perspective, a security may be sold when it reaches a target price, if there is a change in the Sub-Investment Manager's underlying thesis in respect of the security or the industry or country that it is located in, if the issuer's business fails to perform as expected.

Under normal market conditions, the Sub-Investment Manager will invest a minimum of 75% of the Portfolio's Net Asset Value in securities issued by companies domiciled in or governments and government related entities of the United States.

Although the Portfolio will concentrate its investments in securities issued by companies domiciled in or governments and government related entities of the US, without any particular focus on any one region within the US or industrial sector, the Portfolio may also invest in securities of issuers located in other countries, including Emerging Market Countries.

The Portfolio is actively managed and does not intend to track the Benchmark and is not constrained by it. The Benchmark is included here for performance comparison purposes only. It is not expected that the majority of the Portfolio's assets will be components of the Benchmark. While the Portfolio may acquire securities which are components of the Benchmark, it will not do so because of their inclusion in the Benchmark.

The Portfolio is also managed in reference to the MSCI ACWI (All Country World Index). The Portfolio does not intend to track this index, which is included here because the Portfolio's investment policy limits the Portfolio's ability to invest in non-US securities to those issued by issuers domiciled in countries which are represented in the index.

Benchmark

The S&P 500 Index (Total Return, Net of Tax, USD), which is a capitalisation weighted index of US 500 stocks designed to measure the performance of the broad economy of the US, through changes in the aggregate market value of 500 stocks representing all major industries.

Shareholders in a Class which is denominated in a currency other than the Base Currency should note that, where available, it may be more meaningful to compare the performance of such Class against a version of this index which is denominated in the relevant Class currency.

Base Currency

US Dollars (USD).

Instruments / Asset Classes

The Portfolio will primarily invest in the following securities which, with the exception of permitted investments in unlisted securities, may be issued and listed or traded on Recognised Markets globally. The Portfolio can invest in or be exposed to the following types of assets.

Equity and Equity-linked Securities. These securities may include, without limitation, common stock, preferred stock, convertible bonds, convertible preferred stock and UCITS eligible partnership interests. Partnership interests are effectively equivalent to shares but are issued by an issuer established as a limited partnership instead of as a company, along with the following:

- Deferred payment securities (securities which pay regular interest after a predetermined date) and zero coupon securities; and
- Recently issued securities of the types described above, which are unlisted but have been issued with an undertaking to apply for admission to listing on a Recognised Market within a year of issue.

Equity Real Estate Investment Trusts ("REITs"). REITs are companies or trusts that pool investor money and invest mainly in income producing real estate, although

it should be noted that the Portfolio will not acquire any real estate directly. REITs may invest in a diverse range of real estate properties or may specialise in a particular type of property. The REITs which the Portfolio will invest in may be based globally and will give exposure to underlying properties located in globally. They will invest the majority of their assets directly in real property and derive their income from rents and capital gains from appreciation realised through property sales.

The Portfolio may also invest in unlisted equity securities of the types described above.

Collective Investment Schemes. The Portfolio may invest in collective investment schemes which are themselves exposed to investments that are similar to the Portfolio's other investments, provided that the Portfolio may not invest more than 10% in other collective investment schemes (including ETFs) which themselves invest in other collective investment schemes. Such collective investment schemes may or may not be managed by the Manager and/or the Sub-Investment Manager or its affiliates and will comply with the requirements of the UCITS Regulations in respect of such investments.

The other collective investment schemes in which the Portfolio may invest will be eligible collective investment schemes in accordance with the Central Bank's rules, which may be domiciled in the Relevant Jurisdictions or the US and will qualify as UCITS or AIF schemes and will be regulated as such by their home state regulator.

Collective investment schemes in which the Portfolio invests may be leveraged but such collective investment schemes will not generally be leveraged (i) in excess of 100% of their net asset value; or (ii) so that their 1 day absolute value-at-risk exceeds 4.47% of their net asset value over a 250 day horizon with a 99% confidence level; or (iii) so that their 1 month relative value-at-risk exceeds twice the value-at-risk of a comparable benchmark portfolio over a 250 day horizon with a 99% confidence level, depending on how such collective investment schemes measure their global exposure.

Financial Derivative Instruments ("FDIs") subject to the conditions and limits imposed by the Central Bank as set out in this Supplement, the Portfolio may use FDI, for hedging, efficient portfolio management and/or investment purposes and subject to the conditions and limits imposed by the Central Bank, as set out in this Supplement:

- Warrants (including equity warrants), rights (including equity rights) and convertible bonds may be used for investment and efficient portfolio management purposes, including to hedge or to achieve exposure to a particular security. Convertible bonds enable the holder to convert their investment in the bonds into the issuer's common stock at a pre-agreed price;
- Futures contracts based on UCITS eligible equity indices and currencies may be used to hedge existing long positions or to achieve profit;
- Options on equity securities and eligible equity indices may be used to hedge existing long positions or to achieve profit;
- Swaps including contracts for difference, equity, total return and currency swaps may be used to hedge existing long positions or to achieve profit. The maximum proportion of the Portfolio's Net Asset Value that can be subject to total return swaps is 10%. The expected proportion of the Portfolio's Net Asset Value that will be subject to total return swaps is 0%. The expected proportions are not limits and the actual percentages may vary over time depending on factors including, but not limited to, market conditions; and
- Forward currency contracts may be used to achieve a profit through gaining exposure to an increase in the value of currencies, as well as to hedge existing long currency positions.

As the Portfolio may purchase FDI generally using only a fraction of the assets that would be needed to purchase the relevant securities directly, the remainder of the assets allocated to the Sub-Investment Manager may be invested in the other types of securities listed above. The Sub-Investment Manager may therefore seek to

achieve greater returns by taking exposure to the performance of such securities through purchasing FDI which give exposure to them rather than purchasing the securities themselves and investing the remaining assets in other such securities to seek to add excess return.

Repo Contracts and Securities Lending Agreements. Repo Contracts and Securities Lending Agreements may be used subject to the conditions and limits set out in the Prospectus.

Investment Restrictions

- Under normal market conditions, the Sub-Investment Manager will invest:
 - A minimum of 75% of the Portfolio's Net Asset Value in securities issued by companies domiciled in or governments and government related entities of the United States;
 - No more than 20% of the Portfolio's Net Asset Value in securities issued by companies domiciled in or governments and government related entities of Emerging Market Countries.
- The Portfolio may not invest more than 10% of the Portfolio's Net Asset Value in unlisted equity securities.
- The Portfolio may not invest more than 10% of the Portfolio's Net Asset Value in units of other collective investment schemes, including ETFs.
- The Portfolio will not utilise margin lending.

Risk

- Investment in the Portfolio carries certain risks which are described in greater detail in the "*Investment Risks*" section of the Prospectus. Investors should read and consider the entire "*Investment Risks*" section of the Prospectus. **These risks are not purported to be exhaustive and potential investors should review this Supplement and the Prospectus in their entirety and consult with their professional advisers, before making an application for Shares.**
- Investors should refer to the Company's risk management policy with respect to the use of FDI contained in the RMP Statement.
- The Portfolio may be leveraged as a result of its investments in FDI but such leverage will not exceed 100% of the Portfolio's Net Asset Value, as measured using the Commitment Approach, at any time.
- The Sub-Investment Manager may use forward and future currency contracts in order to hedge some currency risk on a discretionary basis. The use of such hedging techniques may increase the risk profile of the Portfolio.
- The Portfolio may have or may be expected to have medium to high volatility due to its investment policies or portfolio management techniques.

Environmental, Social and Governance ("ESG")

This Portfolio meets the classification of an Article 8 Portfolio as it promotes environmental and social characteristics and limits investments to companies that follow good governance practices.

ESG risks and opportunities are systematically considered in the selection of securities to be constituents of the Portfolio. The Sub-Investment Manager assesses companies in relation to their exposure to and the management of ESG risks. ESG represents governance, (being the way in which the company is run), environmental issues, (such as the impact on natural resources), and social issues (such as human rights).

Please also refer to Annex VI of the Prospectus which contains additional information on the ESG characteristics that are applicable to this Portfolio.

Typical Investor Profile

Investment in the Portfolio may be suitable for an investor seeking long term capital appreciation over a mid-to-long term horizon. The investor should be prepared to accept periods of market volatility and the risks of the stock market in pursuit of long term goals.

Fees and Expenses

Category	Maximum Initial Charge	Maximum Management fee	Distribution Fee
A, X, Y	5.00%	1.50%	0.00%

E	3%	2%	1%	0%	0%

For further information on fees, please refer to the “*Fees and Expenses*” section of the Prospectus.

Neuberger Berman US Large Cap Value Fund

The Portfolio will not use FDI extensively or primarily for investment purposes.

Investment Objective

Seek to achieve long term capital growth.

Investment Approach

The Portfolio will primarily invest in equity securities issued by large-capitalisation companies which have their head office or exercise an overriding part of their economic activity in the US and that are listed or traded on Recognised Markets in the US. The Portfolio's investment in large capitalisation companies will not be restricted by sector or industry.

The Sub-Investment Manager generally considers large-capitalisation companies to be those with a total market capitalisation within the market capitalisation range of companies in the Benchmark (as specified in the "*Benchmark*" section below), at the time of initial purchase. The Sub-Investment Manager may continue to hold or add to a position in corporations even after their market capitalisations have fallen below the minimum capitalisation necessary for inclusion in the Benchmark. The Sub-Investment Manager may also, to a limited extent, invest in securities which have a market capitalisation below the minimum capitalisation necessary for inclusion in the Benchmark at the time of their purchase.

The Sub-Investment Manager generally intends to invest in companies which they believe are undervalued. They will look for what they believe to be attractive businesses, led by strong management teams with a track record of success whose securities are available at valuations that they consider to be compelling.

The Sub-Investment Manager seeks to identify undervalued securities by analysing expected returns using normalised earnings. Normalised earnings represent a company's earnings that omit the effects of non-recurrent events or, for cyclical companies, remove economic cycles and helps the Sub-Investment Manager identify attractive entry-points. The analysis of normalised earnings includes analysing the impact of material ESG factors (including climate related factors (e.g. potential for a global carbon taxation system or the impact from existing regional carbon emission trading schemes) as well human capital factors (e.g., labour management policies and diversity, equity and inclusion efforts)) which may positively or negatively impact the normalised margins and discount rate of securities.

The investment process also includes identifying companies with catalysts that have the potential to improve the company's earnings. Such catalysts may include management changes, restructuring, new products, new services or new markets.

Once the Sub-Investment Manager has identified a set of undervalued securities, further analysis includes industry research and security-specific research.

Industry research aims to identify capital and capacity constrained industries in order to identify companies that face lower competition which can lead to less margin pressure, supporting earnings and dividends over time.

Security-specific research focuses on financial analysis, meetings with company's management, customers, suppliers and competitors, evaluation of barriers to entry and utilising the information network of the Sub-Investment Manager to determine company prospects, understand the consensus view and identify factors that are misunderstood by the market.

The Portfolio follows a disciplined selling strategy and will consider disposing of an investment where:

- the company's stock price appears over-valued; or
- a catalyst is no longer present or the price of the security reflects the catalyst.

Under normal market conditions, the Sub-Investment Manager will invest a minimum of 75% of the Portfolio's Net Asset Value in securities issued by companies domiciled in the United States.

Although the Portfolio will concentrate its investments in securities issued by companies

domiciled in the US, without any particular focus on any one region within the US or industrial sector, the Portfolio may also invest in securities of issuers located in other developed market countries. Such investments will be through American Depositary Receipts.

The Portfolio may also invest in money market instruments on an ancillary basis.

The Portfolio is actively managed and does not intend to track the Benchmark, which is included here for performance comparison purposes and because the Portfolio will use the Benchmark as a universe from which it will select the investments that it makes in accordance with its investment objective and policies. The Portfolio may not hold all or many of the Benchmark's components.

Benchmark	<p>The Russell 1000 Value Index (Total Return, Net of Tax, USD) which is an unmanaged index comprised of the stock prices of the large cap value segment of the US equity universe and measures the market of larger capitalised US stocks.</p> <p>Shareholders in a Class which is denominated in a currency other than the Base Currency should note that, where available, it may be more meaningful to compare the performance of such Class against a version of this index which is denominated in the relevant Class currency.</p> <p>The Benchmark has not been designated as a reference benchmark for the purposes of SFDR. Therefore, it is not consistent with the promotion of environmental or social characteristics.</p>
------------------	--

Base Currency	US Dollars (USD).
----------------------	-------------------

Instruments / Asset Classes	The Portfolio will primarily invest in the following securities which may be issued and listed or traded on Recognised Markets globally. The Portfolio can invest in or be exposed to the following types of assets.
------------------------------------	--

Equity and Equity-linked Securities. These securities may include, without limitation, common stock, preferred stock, convertible bonds, convertible preferred stock, American Depositary Receipts and UCITS eligible partnership interests. Partnership interests are effectively equivalent to shares but are issued by an issuer established as a limited partnership instead of as a company, along with deferred payment securities (securities which pay regular interest after a predetermined date) and zero coupon securities.

Equity Real Estate Investment Trusts ("REITs"). REITs are companies or trusts that pool investor money and invest mainly in income producing real estate, although it should be noted that the Portfolio will not acquire any real estate directly. REITs may invest in a diverse range of real estate properties or may specialise in a particular type of property. The REITs which the Portfolio will invest in may be based globally and will give exposure to underlying properties located in globally. They will invest the majority of their assets directly in real property and derive their income from rents and capital gains from appreciation realised through property sales.

Collective Investment Schemes. The Portfolio may invest in collective investment schemes which are themselves exposed to investments that are similar to the Portfolio's other investments, provided that the Portfolio may not invest more than 10% in other collective investment schemes (including ETFs) which themselves invest in other collective investment schemes. Such collective investment schemes may or may not be managed by the Manager and the Sub-Investment Manager or their affiliates and will comply with the requirements of the UCITS Regulations in respect of such investments.

The other collective investment schemes in which the Portfolio may invest will be eligible collective investment schemes in accordance with the Central Bank's rules, which may be domiciled in the Relevant Jurisdictions or the US and will qualify as UCITS or AIF schemes and will be regulated as such by their home state regulator.

Collective investment schemes in which the Portfolio invests may be leveraged but such collective investment schemes will not generally be leveraged (i) in excess of 100% of their net asset value; or (ii) so that their 1 day absolute value-at-risk exceeds 4.47% of their net asset value over a 250 day horizon with a 99% confidence level; or (iii) so that their 1 month relative value-at-risk exceeds twice the value-at-risk of a comparable benchmark portfolio over a 250 day horizon with a 99% confidence level, depending on how such collective investment schemes measure their global exposure.

Money Market Instruments. The Portfolio may invest in money market instruments, which may

include bank deposits, fixed or floating rate instruments (including commercial paper), floating or variable rate notes, bankers acceptances, certificates of deposit, debentures and short-dated government or corporate bonds, cash and cash equivalents (including treasury bills), or money market funds which meet the criteria set out under “*Collective Investment Schemes*” above, in each case that are rated as investment grade or below by Recognised Rating Agencies or are unrated.

Investment grade securities are highly rated securities, generally those rated Baa3, BBB- or above by one or more Recognised Rating Agencies, while high yield securities are medium or lower rated securities, generally those rated below investment grade and sometimes referred to as “junk bonds”.

Financial Derivative Instruments (“FDIs”) subject to the conditions and limits imposed by the Central Bank as set out in this Supplement, the Portfolio may use FDI, for hedging, efficient portfolio management and/or investment purposes and subject to the conditions and limits imposed by the Central Bank, as set out in this Supplement:

- Warrants (including equity warrants), rights (including equity rights) and convertible bonds may be used for investment and efficient portfolio management purposes, including to hedge or to achieve exposure to a particular security. Convertible bonds enable the holder to convert their investment in the bonds into the issuer’s common stock at a pre-agreed price;
- Futures contracts based on currencies may be used to hedge existing long positions; and
- Forward currency contracts may be used as to hedge existing long currency positions.

As the Portfolio may purchase FDI generally using only a fraction of the assets that would be needed to purchase the relevant securities directly, the remainder of the assets allocated to the Portfolio may be invested in the other types of securities listed above. The Sub-Investment Manager may therefore seek to achieve greater returns by taking exposure to the performance of such securities through purchasing FDI which give exposure to them rather than purchasing the securities themselves and investing the remaining assets in other such securities to seek to add excess return.

Repo Contracts. Repo Contracts may be used subject to the conditions and limits set out in the Prospectus.

Investment Restrictions

- Under normal market conditions, the Sub-Investment Manager will invest a minimum of 75% of the Portfolio’s Net Asset Value in securities issued by companies domiciled in the United States.
- The Portfolio may not invest more than 10% of the Portfolio’s Net Asset Value in securities whose capitalisation is less than the range of capitalisation of companies in the Benchmark at the time of their purchase.
- The Portfolio may not invest more than 10% of the Portfolio’s Net Asset Value in units of other collective investment schemes, including ETFs.
- The Portfolio may not invest more than 10% of the Portfolio’s Net Asset Value in warrants.
- The Portfolio may not invest more than 20% of the Portfolio’s Net Asset Value in REITs.
- The Portfolio will not utilise securities lending or margin lending .

Risk

- Investment in the Portfolio carries certain risks which are described in greater detail in the “*Investment Risks*” section of the Prospectus. Investors should read and consider the entire “*Investment Risks*” section of the Prospectus. **These risks are not purported to be exhaustive and potential investors should review this Supplement and the Prospectus in their entirety and consult with their professional advisers, before making an application for Shares.**
 - Investors should refer to the Company’s risk management policy with respect to the use of FDI contained in the RMP Statement.
 - The Portfolio may be leveraged as a result of its investments in FDI but such leverage will not exceed 100% of the Portfolio’s Net Asset Value, as measured using the Commitment Approach, at any time.
 - The Sub-Investment Manager may use forward and future currency contracts in order to hedge some currency risk on a discretionary basis. The use of such hedging techniques may increase the risk profile of the Portfolio.
 - The Portfolio may have or may be expected to have medium to high volatility due to its investment policies or portfolio management techniques.
-

**Environmental,
Social and
Governance
("ESG")**

This Portfolio meets the classification of an Article 8 Portfolio as it promotes environmental and social characteristics and limits investments to companies that follow good governance practices.

The Portfolio will primarily invest in equity securities issued by large-capitalisation companies which have their head office or exercise an overriding part of their economic activity in the US.

The Sub-Investment Manager will manage the Portfolio in accordance with the ESG Policy on a continuous basis. The Sub-Investment Manager has fully integrated the ESG Policy into the overall investment process, in particular, the portfolio construction process. A summary of the ESG Policy is detailed in Annex VI of the Prospectus and it is available on the Neuberger Berman website, www.nb.com/esg.

The Sub-Investment Manager's global standards policy shall also ensure that 100% of the Portfolio will be invested in compliance with the exclusion criteria of the United Nations Global Compact (UNGC) Principles, OECD Guidelines for Multinational Enterprises (OECD Guidelines), the United Nations Guiding Principles on Business and Human Rights (UNGPs) and the International Labour Standards Conventions.

The Sub-Investment Manager shall also engage directly with a majority of the investee companies (e.g., management teams) through a robust qualitative ESG engagement program. Once specific holdings have been selected, the engagement program is focused on in-person meetings and conference calls to understand ESG risks, opportunities and assess good corporate governance practices at investee companies. The Sub-Investment Manager views this direct engagement with investee companies, as an essential part of its investment process. In addition, constructive engagements are undertaken with corporate issuers which have high impact controversies, or which have low internal NB Quotient scores (as described below), in order to assess whether those violations, controversies or weak ESG efforts are being addressed adequately. For these engagements, the Sub-Investment Manager will set out engagement targets to promote environmental, social and governance objectives. The Sub-Investment Manager will closely monitor and track these engagement activities. The team also typically includes the Sub-Investment Manager's research analyst that covers the issuers during these engagements.

The Sub-Investment Manager may also escalate its engagement via proxy voting, its [NB Votes](#) initiative, public statements and possibly divestment in cases of company unresponsiveness. NB Votes is a firm-wide initiative within the Neuberger Berman group, whereby voting intentions and supporting rationale are published in advance of select shareholder meetings for companies in which Neuberger Berman has invested on behalf of its clients, addressing a broad range of topics across key governance and engagement principles.

The Sub-Investment Manager considers financially material ESG factors (which may be climate or human capital related as noted above) as part of its investment decision making process, particularly as it relates to the Sub-Investment Manager's normalised earnings framework. ESG integration is an essential part of the Sub-Investment Manager's rigorous and disciplined investment process as outlined above.

The Sub-Investment Manager uses proprietary scenario analysis known as NB Quotient which covers the entire U.S. large cap universe including the Benchmark. NB Quotient builds on the Sub-Investment Manager's unique materiality framework and leverages specialized third party data, its own data science efforts and finally its central research analysts' judgment with respect to ESG analysis. The NB Quotient scores are relative to sector peers across over thirty-three industries and seventy-seven ESG specific factors which allows for deep ESG fundamental research. Secondly, the Sub-Investment Manager leverages the NB Quotient scores to identify material opportunities to engage portfolio companies which have time to adapt to better understand and improve their ESG risks and opportunities.

The Sub-Investment Manager also leverages the firm's Climate Value-at-Risk (CVaR) model to better comprehend the long term climate risks embedded in the Portfolio. CVaR is defined as the present value of the aggregated future policy risk costs, technology opportunity profits, and extreme weather event costs and profits expressed as a percentage of the portfolio's market value should the climate scenario in question be realized. CVaR helps to identify climate risk and translate it into an economic value in present dollars.

Please also refer to Annex VI of the Prospectus which contains additional SFDR disclosures which are applicable to this Portfolio.

Typical Investor Profile The Portfolio may be suitable for investors seeking long term capital appreciation over a mid-to-long term horizon. The investor should be prepared to accept the risks of investing in equity securities issued by large-capitalisation companies which have their head office or exercise an overriding part of their economic activity in the US and to accept medium to high levels of volatility due to the Portfolio's investment policies or portfolio management techniques.

Fees and Expenses

Investment Risks

Investment in the Portfolios carries certain risks, which are described in the “*Investment Risks*” section of the Prospectus and in the “Risk” section of the information specific to the Portfolio, as included in this Supplement. **These risks are not purported to be exhaustive and potential investors should review this Supplement and the Prospectus in their entirety and consult with their professional advisers, before making an application for Shares.**

There can be no assurance that the Portfolios will achieve their respective objectives. While there are some risks described below that may be common to a number or all of the Portfolios, there may also be specific risk considerations which apply only to particular Portfolios.

Distribution Policy

Under normal circumstances, the Directors intend that dividends in respect of:

- each of the (Monthly) Distributing Classes in the Neuberger Berman China Equity Fund and the Neuberger Berman China A-Share Equity Fund shall be declared on or prior to the last Business Day of each month and paid within three Business Days thereafter; and
- each of the other Distributing Classes in the Portfolios shall be declared on an annual basis and paid within 30 Business Days thereafter in relation to the Net Income of the Distributing Classes for the calendar year ended the previous 31 December.

Subscriptions and Redemptions

Subscriptions for Shares in all Classes which have not already launched at the date of this Supplement will be considered during the Initial Offer Period, upon receipt by the Administrator of completed share applications and subscription monies as specified in the “*Subscriptions*” section of the Prospectus. Such Shares will be issued at the Initial Offer Price on the last day of the Initial Offer Period.

The Initial Offer Period shall run from 9.00 am on 24 December 2021 to 5.00 pm on 24 June 2022 or such earlier or later time as the Directors may determine at their discretion and notify to the Central Bank and to subscribers.

The Initial Offer Price for each of the share classes shall be as follows:

AUD Classes: AUD 10	DKK Classes: DKK 50	NOK Classes: NOK 100
BRL Classes: BRL 20	EUR Classes: EUR 10	NZD Classes: NZD 10
CAD Classes: CAD 10	GBP Classes: GBP 10	SEK Classes: SEK 100
CHF Classes: CHF 10	HKD Classes: HKD 10	SGD Classes: SGD 20
CLP Classes: CLP 5,000	ILS Classes: ILS 30	USD Classes: USD 10
CNY Classes: CNY 100	JPY Classes: JPY 1,000	ZAR Classes: ZAR 100

Thereafter and, in the case of Classes which have already launched, from the date of this Supplement, Shares will be issued at their Net Asset Value per Share, subject to the provision for Duties and Charges in respect of the issue of the Shares and rounding as provided for in the Articles on each Dealing Day.

The Company reserves the right to apply to Euronext Dublin to have the Shares in each of the Classes admitted to the Official List and to trading on the regulated market of Euronext Dublin.

The Company may, in its sole discretion, reject any subscription in whole or in part without reason.

In respect of the Neuberger Berman China Equity Fund and as stated in the “*Subscriptions and Redemptions*” section of the Prospectus, redemption proceeds in respect of the Portfolios will be paid within ten (10) Business Days of the relevant Dealing Day unless payment has been suspended in the circumstances described in the “*Temporary Suspension of Dealings*” section of the Prospectus, although the Company will seek to make such payments within a shorter period of time where possible (up to and including within three (3) Business Days of the relevant Dealing Day).

In respect of the Neuberger Berman China A-Share Equity Fund, and notwithstanding anything to the contrary in the “*Subscriptions & Redemptions*” section of the Prospectus:

- subscription monies in respect of the Neuberger Berman China A-Share Equity Fund should be sent by wire transfer to the relevant account specified in the subscription application form, or by transfer of assets in accordance with the provisions described in the Prospectus, no later than one (1) Business Day after the relevant Dealing Day;
- subscriptions in the Neuberger Berman China A-Share Equity Fund will only be accepted as subscriptions for Shares of a cash value. Subscriptions for specific numbers of Shares will not be accepted;
- redemption proceeds in respect of the Neuberger Berman China A-Share Fund will be paid within ten (10) Business Days of the relevant Dealing Day unless payment has been suspended in the circumstances described in the "*Temporary Suspension of Dealings*" section of the Prospectus, although the Company will seek to make such payments within a shorter period of time where possible (up to and including within four (4) Business Days of the relevant Dealing Day); and
- the Neuberger Berman China A-Share Equity Fund will not be available for exchange. Accordingly, Shareholders may not at any time request the exchange of Shares in the Neuberger Berman China A-Share Equity Fund for Shares in any other portfolio of the Company, nor may Shareholders request the exchange of Shares in any other portfolio of the Company for Shares in the Neuberger Berman China A-Share Equity Fund.

Neuberger Berman China Equity Fund

An investment in the Portfolio should not constitute a substantial proportion of an investment portfolio and may not be appropriate for all investors. The Portfolio will not use FDI extensively or primarily for investment purposes.

Investment Objective	Achieve an attractive level of total return (income plus capital appreciation) from the Greater China equity market.
Investment Approach	<p>The Portfolio will invest primarily in equity and equity-linked securities which are listed or traded on Recognised Markets and issued by companies that:</p> <ul style="list-style-type: none"> • are incorporated or organized under the laws of, or that have a principal office in, the PRC, Hong Kong SAR, Macau SAR or Taiwan (the “Greater China Region”); • generally derive a majority of their total revenue or profits from (a) goods that are produced or sold, (b) investments made, or (c) services performed, in the Greater China Region; or • generally hold a majority of their assets in the Greater China Region (each a “Greater China Company”). <p>The Portfolio may also invest in hybrid securities and equity-related securities, such as convertible debentures, convertible preferred stock, debt instruments with warrants attached, including FDI, which are issued by or give exposure to the performance of Greater China Companies.</p> <p>For the avoidance of doubt, the Portfolio may invest in securities as described herein and which are issued by or give exposure to Greater China Companies listed or traded on Recognised Markets located outside of the Greater China Region, including, without limitation, in the United States, the United Kingdom, Singapore and Japan.</p> <p>The Portfolio will invest primarily in mid and large capitalisation companies.</p> <p>The Sub-Investment Manager employs a research intensive, fundamental-driven and bottom-up approach. Ongoing assessments of macroeconomic and market factors augment the stock-picking discipline. The investment approach is discretionary in nature and is designed to consider multiple drivers and investment strategies over different time horizons.</p> <p>The Portfolio is primarily constructed by taking under and overweight positions to the Benchmark. Decisions on whether the Portfolio’s positions will be under- or overweight relative to the benchmark are primarily driven by valuation, quality of valuation and macroeconomic factors, including such variables as opportunities for growth, competitive advantages and risk characteristics, over short-, medium- and long-term investment horizons but the requirements of the Central Bank in respect of concentration limits as set out in the “<i>Investment Restrictions</i>” section will supersede these factors where relevant.</p> <p>As at 31 October 2019, the Portfolio’s exposure to China A Shares and China B Shares is approximately 17% of the Portfolio’s Net Asset Value.</p> <p>The Portfolio may have or may be expected to have medium to high volatility due to its investment policies or portfolio management techniques.</p> <p>The Portfolio is actively managed and does not intend to track the Benchmark, which is included here for performance comparison purposes and because the Portfolio will use the Benchmark as a universe from which it will select the investments that it makes in accordance with its investment objective and policies. The Portfolio may not hold all or many of the Benchmark’s components.</p>
Benchmark	The MSCI China All Shares Net Total Return Index, USD is a capitalisation weighted index, which can vary in its number of constituent stocks and is designed to measure performance of the broad economy of the PRC through changes in the aggregate market value of the largest stocks representing all major industries.

Shareholders in a Class which is denominated in a currency other than the Base Currency should note that, where available, it may be more meaningful to compare the performance of such Class against a version of this index which is denominated in the relevant Class currency.

Base Currency

US Dollars (USD).

Instruments / Asset Classes

The Portfolio can invest in or be exposed to the following types of assets.

Equity and Equity-linked Securities. The Portfolio will invest in equity and equity-linked securities which are listed or traded on Recognised Markets and may, subject to a limit of 10% of its Net Asset Value, invest in unlisted transferable securities which give exposure to Greater China Companies.

The Portfolio may also, up to a limit of 33% of its Net Asset Value, invest in hybrid securities and equity-related securities, such as convertible bonds, convertible debentures, convertible preferred stock, debt instruments with warrants attached, including FDI. Any such debt instruments may be issued by corporate or government issuers, may be rated or unrated (although not more than 30% of Net Asset Value will be invested in debt instruments which are rated below investment grade) and may have fixed or floating interest rates. These may also include cash or cash equivalents (including but not limited to treasury bills) and short term fixed income securities.

Participatory Notes (“P-Notes”). These are securities issued by banks or broker-dealers that are designed to replicate the performance of certain issuers and markets (in which the Portfolio can invest directly) by giving exposure to the performance of specific securities that the Portfolio may not be able to invest in directly because of local holding restrictions affecting such securities in the jurisdiction of their issue. The Portfolio shall only invest in listed P-Notes which give access to the Greater China Region.

Financial Derivative Instruments (“FDI”). The Portfolio may, subject to the conditions and limits imposed by the Central Bank as set out in the Prospectus and in this Supplement, use FDI for investment and efficient portfolio management purposes, including, without limitation:

- Future contracts may be used to hedge against market risk or to gain exposure to an underlying market;
- Forward contracts may be used to hedge or to gain exposure to an increase in the value of an asset, currency, commodity or deposit;
- Options (including on currencies) may be used to hedge or to achieve exposure to a particular market instead of using a physical security;
- Swaps and swaptions (including on currencies) may be used to achieve a profit as well as to hedge existing long positions; and
- Equity warrants and equity rights may be used for investment and efficient portfolio management purposes, including to hedge or to achieve exposure to a particular security.

As the Portfolio may purchase FDI generally using only a fraction of the assets that would be needed to purchase the relevant securities directly, the remainder of the assets allocated to the Sub-Investment Manager may be invested in the other types of securities listed above. The Sub-Investment Manager may therefore seek to achieve greater returns by purchasing FDI and investing the remaining assets in such other securities to add excess return. The Portfolio may be leveraged as a result of its investments in FDI but such leverage will not exceed the Portfolio’s Net Asset Value at any time.

Repo Contracts and Securities Lending Agreements. Repo Contracts and Securities Lending Agreements may be used subject to the conditions and limits set out in the Prospectus.

Stock Connects

The China Securities Regulatory Commission and the Securities and Futures Commission of Hong Kong have approved programs which establish mutual stock markets access between the PRC and Hong Kong, namely the Stock Connects. The Sub-Investment

Manager may pursue the Portfolio's investment objective by investing up to 100% of the Portfolio's Net Asset Value directly in certain eligible China A Shares via the Stock Connects.

The Shanghai Stock Connect is a securities trading and clearing linked program developed by the SEHK, the SSE and ChinaClear, with the aim of achieving mutual stock market access between the SEHK and the SSE. The Shenzhen Stock Connect is a securities trading and clearing linked program developed by the SEHK, the SZSE and ChinaClear, with the aim of achieving mutual stock market access between the SEHK and the SZSE.

Each of the Shanghai Stock Connect and Shenzhen Stock Connect comprises a Northbound Trading Link and a Southbound Trading Link. Under the Northbound Trading Link, Hong Kong and overseas investors (including the Portfolio), through their Hong Kong brokers and a securities trading service company established by the SEHK, may trade eligible shares listed on the SSE and the SZSE by routing orders to the SSE and the SZSE respectively.

Eligible securities

Hong Kong and overseas investors will be able to trade certain SSE Securities. Eligible securities under the Northbound Trading Link of the Shanghai Stock Connect include all the constituent stocks from time to time of the SSE 180 Index and SSE 380 Index, and all the SSE-listed China A Shares that are not included as constituent stocks of the relevant indices but which have corresponding H-Shares listed on the SEHK, except the following:

- SSE-listed shares which are not traded in CNY; and
- SSE-listed shares which are included in the "risk alert board".

Eligible securities under the Northbound Trading Link of the Shenzhen Stock Connect include any constituent stock of the SZSE Component Index and the SZSE Small/Mid Cap Innovation Index which has a market capitalisation of CNY6 billion or above and all SZSE-listed shares of companies which have issued both China A Shares and China H Shares. At the initial stage of the Northbound Trading Link of Shenzhen Stock Connect, trading shares that are listed on the ChiNext Board of SZSE under the Northbound Trading Link will be limited to institutional professional investors, as defined in the relevant Hong Kong rules and regulations.

It is expected that the list of eligible securities will be subject to review and may change from time to time.

If an eligible security ceases to be classified as such, Hong Kong and overseas investors (including the Portfolio) will only be allowed to sell holdings of such Security but will be restricted from buying any more of such Eligible Security.

Trading day

Investors (including the Portfolio) are only allowed to trade through the Stock Connects on days on which both markets (i.e. both the SEHK and the SSE for trading through Shanghai Stock Connect) are open for trading, and banking services are available in both markets on the corresponding settlement days.

Trading quota

Trading under the Stock Connects is subject to the Daily Quota. Northbound trading through each Stock Connect is subject to a separate set of Daily Quotas. The Daily Quota limits the maximum net buy value of cross-boundary trades under each of the Stock Connect per day. The Northbound Daily Quota for each Stock Connect is currently set at CNY52 billion.

The SEHK will monitor the quota and publish the remaining balance of the Northbound Daily Quota at scheduled times on the SEHK's website. The Daily Quota may change from time to time without prior notice and investors should refer to the SEHK's website and other information published by the SEHK for up-to-date information.

Settlement and Custody

The HKSCC will be responsible for the clearing, settlement and the provision of depository, nominee and other related services of the trades executed by Hong Kong market participants and investors.

The China A Shares traded through the Stock Connects are issued in scripless form, so investors do not hold any physical China A Shares. Hong Kong and overseas investors who have acquired Eligible Securities through Northbound trading should maintain the Eligible Securities with their brokers' or custodians' stock accounts with CCASS.

Corporate actions and shareholders' meetings

Notwithstanding the fact that the HKSCC does not claim proprietary interests in the Eligible Securities held in its omnibus stock account in ChinaClear, ChinaClear as the share registrar for SSE and SZSE-listed companies will still treat HKSCC as one of the shareholders when it handles corporate actions in respect of such Eligible Securities.

HKSCC monitors the corporate actions affecting Eligible Securities and keeps the relevant brokers or custodians participating in CCASS ("CCASS participants") informed of all such corporate actions that require CCASS participants to take steps in order to participate in them.

SSE and SZSE-listed companies usually announce their annual general meeting / extraordinary general meeting information about one month before the meeting date. A poll is called on all resolutions for all votes. HKSCC will advise CCASS participants of all general meeting details such as meeting date, time, venue and the number of resolutions.

Foreign shareholding restrictions

The CSRC stipulates that, when holding China A Shares through the Stock Connects, Hong Kong and overseas investors are subject to the following shareholding restrictions:

- Single foreign investors' shareholding by any Hong Kong or overseas investor in a China A Share must not exceed 10% of the total issued shares; and
- Aggregate foreign investors' shareholding by all Hong Kong and overseas investors in a China A Share must not exceed 30% of the total issue shares.

Should the shareholding of a single investor in a China A Share listed company exceed the above restriction, the investor would be required to unwind his position on the excessive shareholding according to a last-in-first-out basis within a specific period. The SSE, the SZSE and the SEHK will issue warnings or restrict the buy orders for the related China A Shares if the percentage of total shareholding is approaching the upper limit.

Currency

Hong Kong and overseas investors will trade and settle Eligible Securities in CNY only. Hence, the Portfolio will need to use CNY to trade and settle Eligible Securities.

Further information about the Stock Connects is available online at the website:

<http://www.hkex.com.hk/Mutual-Market/Stock-Connect>

Investment Restrictions

- The Portfolio invests directly in the China A Share market through the Stock Connects as described above and indirectly, mainly through investments in equity linked products issued by international investment banks and through transferable securities which may be issued by entities which are managed by affiliates of the Sub-Investment Manager. The Portfolio may invest directly in the China B Share market.
 - The Portfolio will invest at least 70% of its Net Asset Value in China A, B or H shares, red chips, or other securities listed or traded on a recognised market which generally derive a majority of their total revenue or profits from (a) goods that are produced or sold,
-

(b) investments made, or (c) services performed, in China, or generally hold a majority of their assets in China.

- The Portfolio may also invest up to 10% of its Net Asset Value in other collective investment schemes, which may be managed by the Sub-Investment Manager or its affiliates and which will comply with both the “*Investment Restrictions*” section of the Prospectus and the UCITS Regulations.
- The Portfolio may invest up to 10% of its Net Asset Value in securities that are issued or guaranteed by a single sovereign issuer that are below investment grade.
- The aggregate exposure for investments in convertibles securities will not exceed 10% of the Portfolio’s Net Asset Value.
- The Portfolio will not utilise total return swaps or margin lending.

Risk

- Investment in the Portfolio carries certain risks which are described in greater detail in the “*Investment Risks*” section of the Prospectus. While investors should read and consider the entire “*Investment Risks*” section of the Prospectus, the risks summarised in the following section, namely, “*Market Risks: Risks relating to Emerging Markets*” are particularly relevant to this Portfolio. **These risks are not purported to be exhaustive and potential investors should review this Supplement and the Prospectus in their entirety and consult with their professional advisers, before making an application for Shares.**
- Investors should refer to the Company’s risk management policy with respect to the use of FDI contained in the RMP Statement.
- The Portfolio may be leveraged as a result of its investments in FDI but such leverage will not exceed 100% of the Portfolio’s Net Asset Value, as measured using the Commitment Approach, at any time.
- The Sub-Investment Manager will take a disciplined approach to investing on behalf of the Portfolio by attempting to maintain a portfolio that is typically diversified.
- The Sub-Investment Manager will use forward currency contracts in order to hedge currency risk.
- Investors should refer to the “*Investment Risks*” section in this Supplement in relation to the risks of investing in the PRC and the Greater China Region and the risks associated with the Stock Connects.

Typical Investor Profile

The Portfolio may be suitable for investors who are prepared to accept the risks of investment in the Greater China Region together with the use of FDI.

Fees and Expenses

Category	Maximum Initial Charge	Maximum Management fee	Distribution Fee
A, X, Y	5.00%	1.85%	0.00%
B, C2	0.00%	1.80%	1.00%

C2	2%	1%	0%	0%	0%
E	3%	2%	1%	0%	0%

Other important information for investors in Hong Kong

As the Portfolio has been authorised for public offer in Hong Kong, the Hong Kong Securities and Futures Commission (“HKSF”) requires the Company to classify the Portfolio on the basis of its expected maximum net derivative exposure (“NDE”). The HKSF requires the NDE to be calculated in accordance with the HKSF’s Code on Unit Trusts and Mutual Funds and the requirements and guidance issued by the HKSF, which may be updated from time to time. This requires the Company to convert all FDI acquired for investment purposes that would generate incremental leverage at the portfolio level of the Portfolio into their equivalent positions in the underlying assets. Applying these requirements, the Portfolio’s NDE is expected to be less than 50% but the actual level may be higher than the expected level in exceptional circumstances, for example when there are sudden movements in markets and/or investment prices.

For the avoidance of doubt, complying with the HKSF’s requirements to classify the Portfolio on the basis of its NDE does not amend the investment objectives or policies or otherwise impact the management of the Portfolio or its use of FDI, as the requirements are solely to measure the Portfolio’s expected use of FDI, as described above, using the HKSF’s methodology and disclose the results.

Neuberger Berman China A-Share Equity Fund

An investment in the Portfolio should not constitute a substantial proportion of an investment portfolio and may not be appropriate for all investors. The Portfolio will not use FDI extensively or primarily for investment purposes.

Investment Objective	The Portfolio seeks to achieve long-term capital appreciation primarily through investment in a portfolio of China A Share equity holdings that provide exposure to economic development in the PRC.
Investment Approach	<p>The Portfolio seeks to achieve its investment objective by investing primarily in China A Shares that are listed on Recognised Markets in the PRC.</p> <p>The Portfolio will invest directly in China A Shares through the Stock Connects and through the qualified foreign investors (“QFI”) regime, as described below, and indirectly, mainly through investments in equity-linked securities issued by international investment banks and also through equity and debt securities of the types described below, which may be issued by entities which are managed by affiliates of the Sub-Investment Manager. The Portfolio may also invest directly in the China B Shares market.</p> <p>The Portfolio may also invest in equity-linked securities, such as convertible debentures, convertible preferred stock, which may embed FDI or leverage and which are issued by or give exposure to the performance of PRC companies.</p> <p>For the avoidance of doubt, the Portfolio may also invest in securities as described herein which are issued by or give exposure to PRC companies and are listed or traded on Recognised Markets in Hong Kong SAR, Macau SAR or Taiwan (together with the PRC, the “Greater China Region”) and located outside of the Greater China Region, including, without limitation, in the United States, the United Kingdom, Singapore and Japan.</p> <p>The Sub-Investment Manager uses a fundamental bottom-up, research-driven securities selection approach focusing on businesses while factoring in economic, legislative and business developments to identify economic sectors (such as energy, financials, health care, telecommunications and utilities) that it believes may be more profitable, in the future, in comparison to the broader set of economic sectors.</p> <p>The Sub-Investment Manager seeks to invest in companies that it believes have sustainable free cash flow growth and are trading at a price which the Sub-Investment Manager considers to be attractive relative to its perception of the long-term value of the securities, based on its discounted cash flow generation potential, its peer group or historical valuation on metrics such as price to cash flow, price to earnings or price to book value.</p> <p>The Sub-Investment Manager believes that in-depth, strategic and financial research is the key to identifying undervalued companies and seeks to identify companies with the following characteristics:</p> <ul style="list-style-type: none"> • stock prices undervalued relative to long-term cash flow growth potential; • industry leadership; • potential for significant improvement in the company’s business, for example through new lines of business, products or services or the potential for positive impacts from the introduction of new government policies or initiatives; • strong financial characteristics, including historic valuations on metrics such as price to cash flow, price to earnings or price to book value; and • proven management track record, assessed through regular meetings with management teams, in order to understand companies’ plans and strategies and reviewing such proposed plans and strategies against the actions and the performance of the company over time to identify whether they have been implemented efficiently, as evidenced by both income statements and balance sheet metrics.

The Sub-Investment Manager seeks to construct a portfolio which is well-diversified across economic sectors, in line with the sector weighting restrictions set out in the “*Investment Restrictions*” section, with securities selected based upon those that score highly following an assessment of the risk reward and conviction of each security. Investors should note that this is expected to result in a Portfolio which may be more concentrated than other portfolios which cover the same broad market, subject to the diversification requirements of the UCITS Regulations.

The Sub-Investment Manager follows a disciplined selling strategy and may sell a stock when it reaches a target price, when the company’s business fails to perform as expected, or when other opportunities appear more attractive. Where set, target prices will be determined by considering either the discounted cash flow or the relative value of a security, when compared either to securities issued by other companies in the same industry or sector or to the security’s own historical values, using either the price over earning figures, the price to book figures, the price to cash flow model or the price to earnings to growth model.

The Portfolio may invest in companies of any market capitalisation but shall typically invest in companies that have market capitalisation greater than USD 0.5bn at the time of purchase.

The Portfolio may also invest in debt securities and money market instruments on an ancillary basis.

The Portfolio is actively managed and does not intend to track the Benchmark which is included here for performance comparison purposes and because the Portfolio’s investment policy restricts the extent to which the Portfolio’s holdings may deviate from the Benchmark, as described in the “*Investment Restrictions*” section. This deviation may be significant.

Benchmark

The MSCI China A Onshore Net Index (Total Return, CNY) is a capitalisation weighted index, which consists of the large and mid-market capitalisation A-share securities of PRC companies that are listed on the Shanghai and Shenzhen exchanges.

Shareholders in a Class which is denominated in a currency other than the Base Currency should note that, where available, it may be more meaningful to compare the performance of such Class against a version of this index which is denominated in the relevant Class currency.

Base Currency

CNY

Instruments / Asset Classes

The Portfolio can invest in or be exposed to the following types of assets, which will be listed or traded on Recognised Markets globally or, if unlisted, will comply with the Central Bank requirements for such investments.

Equity and Equity-linked Securities. These securities include common stock, preferred stock, convertible bonds, convertible preferred stock and American, European and Global Depository Receipts, which are securities issued by a financial institution which evidence ownership interests in a security or a pool of securities deposited with the financial institution.

Equity Real Estate Investment Trusts (“REITs”). REITs are companies or trusts that pool investor money and invest mainly in income producing real estate, although it should be noted that the Portfolio will not acquire any real estate directly. REITs may invest in a diverse range of real estate properties or may specialise in a particular type of property. The REITs which the Portfolio will invest in may be based globally but will give exposure to underlying properties located in the PRC. They will invest the majority of their assets directly in real property and derive their income from rents and capital gains from appreciation realised through property sales.

Participatory Notes (“P-Notes”). These are securities issued by banks or broker-dealers that are designed to replicate the performance of certain issuers and markets (in which the Portfolio can invest directly) by giving exposure to the performance of specific stocks that

the Portfolio may not be able to invest in directly because of local holding restrictions affecting such stocks in the jurisdiction of their issue. The Portfolio shall only invest in listed P-Notes which give access to the Greater China Region.

Financial Derivative Instruments (“FDIs”). Subject to the conditions and limits imposed by the Central Bank as set out in the Prospectus and this Supplement, the Portfolio may use the following FDI for efficient portfolio management, investment purposes, and/or hedging. The following FDI may provide exposure to any or all of the asset classes listed above:

- Warrants and rights may be used to take exposure to equity securities of the type described above;
- Convertible bonds and convertible preferred stock and single stock options. Convertible bonds enable the holder to convert their investment in the bonds into the issuer’s common stock at a pre-agreed price and convertible preferred stock enable the holder to convert their investment in the preferred stock into the issuer’s common stock at a pre-agreed rate;
- Forward currency contracts and currency futures may be used to hedge currency risk; and
- Options on eligible UCITS indices (including equity indices) may be used to hedge or efficiently manage some portions or all of the Portfolio. Such FDI may provide exposure to any or all of the asset classes listed in this “*Instruments / Asset Classes*” section.

As the Portfolio may purchase FDI generally using only a fraction of the assets that would be needed to purchase the relevant securities directly, the remainder of the assets allocated to the Portfolio may be invested in the other types of securities listed above. The Sub-Investment Manager may therefore seek to achieve greater returns by purchasing derivative instruments and investing the remaining assets in such other securities as listed above to achieve a rate of return greater than the market. The indices utilised for hedging or efficient portfolio management purposes will be broad-based, UCITS-eligible indices which provide exposure to the performance of equities and details of such indices pertaining to the instruments utilised by the Portfolio will be contained in the annual report of the Company.

Collective Investment Schemes. The Portfolio may invest in open-ended collective investment schemes which are themselves exposed to investments that are similar to the Portfolio’s other investments, provided that the Portfolio may not invest more than 10% of its Net Asset Value in underlying funds (including ETFs) which themselves invest in other collective investment schemes. Such underlying funds may or may not be managed by the Manager or the Sub-Investment Manager or their affiliates and will comply with the requirements of the UCITS Regulations in respect of such investments.

The underlying funds in which the Portfolio may invest will be eligible collective investment schemes in accordance with the Central Bank’s requirements, which may be domiciled in a Relevant Jurisdiction and will qualify as UCITS or alternative investment fund schemes and will be regulated as such by their home state regulator.

Underlying funds in which the Portfolio invests may be leveraged but such collective investment schemes will not generally be leveraged: (i) in excess of 100% of their net asset value; or (ii) so that their 1 day absolute value-at-risk exceeds 4.47% of their net asset value over a 250 day horizon with a 99% confidence level; or (iii) so that their 1 month relative value-at-risk exceeds twice the value-at-risk of a comparable benchmark portfolio over a 250 day horizon with a 99% confidence level, depending on how such underlying funds measure their global exposure.

ETFs are investment funds whose shares are bought and sold on a securities exchange. ETFs invest in a portfolio of securities designed to track a particular market segment or index, in this case the Greater China Region. The ETFs will be located in Relevant Jurisdictions and will be authorised under the UCITS Directive or will be alternative investment funds which are eligible for investment by the Portfolio in accordance with the requirements of the Central Bank. The ETFs will represent investments that are similar to the Portfolio’s other investments. The ETFs will operate on the principle of risk spreading and will not be leveraged.

Fixed Income Securities (Debt Securities). The Portfolio may invest in debt instruments, such as bonds and notes (including freely transferable promissory notes), issued by corporate or government issuers in the Greater China Region, which may be rated or unrated and may have fixed or floating interest rates, including corporate bonds with warrants, subordinated bonds and debentures.

Money Market Instruments. These may include bank deposits, fixed or floating rate instruments (including commercial paper), floating or variable rate notes, bankers acceptances, certificates of deposit, debentures and short-dated government or corporate bonds, cash and cash equivalents (including treasury bills) that are rated as investment grade by Recognised Rating Agencies.

Repo Contracts and Securities Lending Agreements. Repo Contracts and Securities Lending Agreements may be used subject to the conditions and limits set out in the Prospectus.

Stock Connects

The China Securities Regulatory Commission and the Securities and Futures Commission of Hong Kong have approved programs which establish mutual stock markets access between the PRC and Hong Kong, namely the Stock Connects. The Sub-Investment Manager may pursue the Portfolio's investment objective by investing up to 100% of the Portfolio's Net Asset Value directly in certain eligible China A Shares via the Stock Connects.

The Shanghai Stock Connect is a securities trading and clearing linked program developed by the SEHK, the SSE and ChinaClear, with the aim of achieving mutual stock market access between the SEHK and the SSE. The Shenzhen Stock Connect is a securities trading and clearing linked program developed by the SEHK, the SZSE and ChinaClear, with the aim of achieving mutual stock market access between the SEHK and the SZSE.

Each of the Shanghai Stock Connect and Shenzhen Stock Connect comprises a Northbound Trading Link and a Southbound Trading Link. Under the Northbound Trading Link, Hong Kong and overseas investors (including the Portfolio), through their Hong Kong brokers and a securities trading service company established by the SEHK, may trade eligible shares listed on the SSE and the SZSE by routing orders to the SSE and the SZSE respectively.

Eligible securities

Hong Kong and overseas investors will be able to trade certain SSE Securities. Eligible securities under the Northbound Trading Link of the Shanghai Stock Connect include all the constituent stocks from time to time of the SSE 180 Index and SSE 380 Index, and all the SSE-listed China A Shares that are not included as constituent stocks of the relevant indices but which have corresponding H-Shares listed on the SEHK, except the following:

- SSE-listed shares which are not traded in CNY; and
- SSE-listed shares which are included in the "risk alert board".

Eligible securities under the Northbound Trading Link of the Shenzhen Stock Connect include any constituent stock of the SZSE Component Index and the SZSE Small/Mid Cap Innovation Index which has a market capitalisation of CNY6 billion or above and all SZSE-listed shares of companies which have issued both China A Shares and China H Shares. At the initial stage of the Northbound Trading Link of Shenzhen Stock Connect, trading shares that are listed on the ChiNext Board of SZSE under the Northbound Trading Link will be limited to institutional professional investors, as defined in the relevant Hong Kong rules and regulations.

It is expected that the list of eligible securities will be subject to review and may change from time to time.

If an eligible security ceases to be classified as such, Hong Kong and overseas investors (including the Portfolio) will only be allowed to sell holdings of such Security but will be restricted from buying any more of such Eligible Security.

Trading day

Investors (including the Portfolio) are only allowed to trade through the Stock Connects on days on which both markets (i.e. both the SEHK and the SSE for trading through Shanghai Stock Connect) are open for trading, and banking services are available in both markets on the corresponding settlement days.

Trading quota

Trading under the Stock Connects is subject to the Daily Quota. Northbound trading through each Stock Connect is subject to a separate set of Daily Quotas. The Daily Quota limits the maximum net buy value of cross-boundary trades under each of the Stock Connect per day. The Northbound Daily Quota for each Stock Connect is currently set at CNY52 billion.

The SEHK will monitor the quota and publish the remaining balance of the Northbound Daily Quota at scheduled times on the SEHK's website. The Daily Quota may change from time to time without prior notice and investors should refer to the SEHK's website and other information published by the SEHK for up-to-date information.

Settlement and Custody

The HKSCC will be responsible for the clearing, settlement and the provision of depository, nominee and other related services of the trades executed by Hong Kong market participants and investors.

The China A Shares traded through the Stock Connects are issued in scripless form, so investors do not hold any physical China A Shares. Hong Kong and overseas investors who have acquired Eligible Securities through Northbound trading should maintain the Eligible Securities with their brokers' or custodians' stock accounts with CCASS.

Corporate actions and shareholders' meetings

Notwithstanding the fact that the HKSCC does not claim proprietary interests in the Eligible Securities held in its omnibus stock account in ChinaClear, ChinaClear as the share registrar for SSE and SZSE-listed companies will still treat HKSCC as one of the shareholders when it handles corporate actions in respect of such Eligible Securities.

HKSCC monitors the corporate actions affecting Eligible Securities and keeps the relevant brokers or custodians participating in CCASS ("CCASS participants") informed of all such corporate actions that require CCASS participants to take steps in order to participate in them.

SSE and SZSE-listed companies usually announce their annual general meeting / extraordinary general meeting information about one month before the meeting date. A poll is called on all resolutions for all votes. HKSCC will advise CCASS participants of all general meeting details such as meeting date, time, venue and the number of resolutions.

Foreign shareholding restrictions

The CSRC stipulates that, when holding China A Shares through the Stock Connects, Hong Kong and overseas investors are subject to the following shareholding restrictions:

- Single foreign investors' shareholding by any Hong Kong or overseas investor in a China A Share must not exceed 10% of the total issued shares; and
-

-
- Aggregate foreign investors' shareholding by all Hong Kong and overseas investors in a China A Share must not exceed 30% of the total issue shares.

Should the shareholding of a single investor in a China A Share listed company exceed the above restriction, the investor would be required to unwind his position on the excessive shareholding according to a last-in-first-out basis within a specific period. The SSE, the SZSE and the SEHK will issue warnings or restrict the buy orders for the related China A Shares if the percentage of total shareholding is approaching the upper limit.

Currency

Hong Kong and overseas investors will trade and settle Eligible Securities in CNY only. Hence, the Portfolio will need to use CNY to trade and settle Eligible Securities.

Further information about the Stock Connects is available online at the website:

<http://www.hkex.com.hk/Mutual-Market/Stock-Connect>

Qualified Foreign Institutional Investors

The qualified foreign institutional investor program permits certain licensed international investors to participate in the PRC's mainland stock exchanges, allowing foreign investors access to the SSE and SZSE. Under this program, licensed investors can buy and sell CNY-denominated China A Shares, subject to specified quotas that determine the amount of money that the licensed foreign investors are permitted to invest in China's capital markets.

Neuberger Berman Europe Limited received its QFI licence on 3 May 2012.

Eligible securities

QFI permitted securities include CNY financial instruments in which QFI are allowed to invest from time to time and which may include (1) stocks, depository receipts, bonds, bond repurchases, and asset-backed securities traded or transferred on stock exchanges; (2) shares and other types of securities transferred on the National Equities Exchange and Quotations (NEEQ); (3) products and derivatives on bonds, interest rates and foreign exchange traded on the domestic inter-bank bond market which are deemed by PBOC as eligible for QFI; (4) investment funds; and (5) other financial instruments as approved by the CSRC.

Trading Day

Investors (including the Portfolio) are only allowed to trade through the QFI regime on days on which the relevant PRC markets are open for trading, and banking services are available on the corresponding settlement days.

Currency

Hong Kong and overseas investors will trade and settle eligible securities in CNY only. Hence, the Portfolio will need to use CNY to trade and settle eligible securities.

QFI Status

Neuberger Berman Europe Limited has obtained QFI status. However, under the Investment Regulations, the QFI status of Neuberger Berman Europe Limited could be suspended or revoked under certain circumstances where the PRC regulators have discretions. If the QFI status of the Sub-Investment Manager is suspended or revoked, the Portfolio may be required to dispose of its securities held through the QFI and may not be able to access the Chinese securities market via the QFI as contemplated in this Supplement, which may have an adverse effect on the Portfolio's performance.

Moreover, the Investment Regulations generally apply at the QFI level and not simply to investments made on behalf of the Portfolio. Thus investors should be aware that violations

of the Investment Regulations arising out of activities through the QFI other than those conducted by the Portfolio could result in the revocation of or other regulatory action in respect of the QFI as a whole. The regulations relating to the investment restrictions in China A Shares are also generally applied at the QFI level (as discussed in detail below), and the Portfolio may also be impacted by the actions of other investors utilising the QFI status. Hence the ability of the Portfolio to make investments utilising the QFI status of Neuberger Berman Europe Limited may be affected adversely by the investments of other investors utilising the QFI status of Neuberger Berman Europe Limited.

Custody

China A Shares traded on the Exchanges are dealt and held in dematerialised form through ChinaClear. Exchange-traded securities purchased on behalf of the Portfolio through the QFI are required to be recorded by ChinaClear as credited to a securities trading account maintained in the joint names of the QFI and the Company (or such other account name as required by the Investment Regulations which may reference also the Portfolio).

The Company/the QFI expects to receive a legal opinion from a qualified PRC law firm confirming that, as a matter of PRC law, the QFI will have no ownership interest in the securities and that the Portfolio will ultimately and exclusively be entitled to ownership of the securities.

However, given that, pursuant to the Investment Regulations, the QFI as account-holder will be the party entitled to the securities (albeit that this entitlement does not constitute an ownership interest or preclude the QFI purchasing securities on behalf of the Portfolio), the assets of the Portfolio may not be as well protected as they would be if it were possible for them to be registered and held solely in the name of the Company (or the Portfolio). In particular, given that the QFI belongs to the Neuberger Berman group, there is a risk that creditors of the Neuberger Berman group may incorrectly assume, contrary to the legal opinion referred to, that the Portfolio's assets belong to the Neuberger Berman group and such creditors may seek to gain control of the Portfolio's assets in lieu of such liabilities.

The evidence of title of exchange-traded securities in the PRC consists only of electronic book-entries in the depository and/or registry associated with the relevant Exchange. These arrangements of the depositories and registries are new and not fully tested in regard to their efficiency, accuracy and security.

In order to prevent any trading failure, ChinaClear will automatically settle any trades executed by the PRC securities trading house relating to the securities trading account maintained in the joint names of the Company (or the Portfolio) and the QFI. Accordingly all instructions issued by the PRC securities trading house relating to the securities trading account will be executed without the need of consent or direction of the Depository.

Investment Restrictions

Investments in the PRC securities market via the QFI are subject to compliance with certain investment restrictions imposed by the Investment Regulations including the following, which apply to each foreign investor (including the Portfolio) investing through the QFI and will affect the Portfolio's ability to invest in China A Shares and carry out their investment objectives:

- (i) shares held by each underlying foreign investor (such as the Portfolio) which invests (through QFI or other permissible channels) in one PRC listed company should not exceed 10% of the total shares of such company; and
- (ii) aggregate China A Shares held by all underlying foreign investors (such as the Portfolio and all other foreign investors) which invest (through QFI or other permissible channels) in one PRC listed company should not exceed 30% of the total shares of such company.

Although it has not been explicitly provided under the Investment Regulations, in practice, the 10% single foreign shareholding restriction is also applied at the QFI level, under which a QFI may not hold 10% or more shares of any listed company, regardless of the fact that

such QFI is holding such shares for a number of different clients. Accordingly, as the QFI status of Neuberger Berman Europe Limited is utilised by the Portfolio and other investors as well, the capability of the Portfolio to invest in the shares of certain listed company may be limited due to the investments in the shares of such listed company by other investors who also invest through the QFI status of Neuberger Berman Europe Limited. Specifically, when the shareholding of such other investors in a PRC listed company reaches 10%, the Portfolio may not be able to buy any such shares, even if the then effective price of such shares is advantageous to the Portfolio.

Similarly, since the 30% aggregate foreign shareholding restriction is monitored at the level of all foreign investors, the capability of the Portfolio to invest in China A Shares of certain listed company may also be limited due to the investments made by other foreign investors.

Disclosure to CSRC

In practice, structured products issued by QFI to give foreign investors access to China A Shares are required to be reported to CSRC. The information reported may include information on the Portfolio as applicable.

Disclosure to the Exchange

According to the relevant Investment Regulations, where the SSE or the SZSE spots any abnormal trading which may affect the normal trading order, it may request the involved QFI to promptly report the securities transaction and shareholding information of the QFI's relevant underlying investors, which may include information on the Portfolio.

Investment Restrictions

- The Portfolio will invest at least 70% of its Net Asset Value in China A Shares or other equity and equity-linked securities listed or traded on a Recognised Market which generally derive a majority of their total revenue or profits from (a) goods that are produced or sold, (b) investments made, or (c) services performed, in the PRC, or generally hold a majority of their assets in the PRC.
- The Portfolio may invest up to 10% of its Net Asset Value in securities that are issued or guaranteed by a single sovereign issuer that are below investment grade.
- The Portfolio's over or underweight exposure to a Global Industry Classification Standard (GICS)[®] sector, relative to the Benchmark, may not exceed 15% of the Portfolio's Net Asset Value.
- The Portfolio shall not invest in excess of 30% of its Net Asset Value in debt instruments which are rated below investment grade.
- The Portfolio will not utilise total return swaps or margin lending.

Risks

- Investment in the Portfolio carries certain risks which are described in greater detail in the "*Investment Risks*" section of the Prospectus. While investors should read and consider the entire "*Investment Risks*" section of the Prospectus, the risks summarised in the following sections, namely "*Investing in the PRC and the Greater China Region*" and "*Concentration Risk*" (which is contained within the "*Market Risks*" section) are particularly relevant to this Portfolio. **These risks are not purported to be exhaustive and potential investors should review this Supplement and the Prospectus in their entirety and consult with their professional advisers, before making an application for Shares.**
- Investors should refer to the Company's risk management policy with respect to the use of FDI contained in the RMP Statement.
- The Portfolio may be leveraged as a result of its investments in FDI but such leverage will not exceed 100% of the Portfolio's Net Asset Value, as measured using the Commitment Approach, at any time.
- The Portfolio will seek to reduce risk by diversifying among securities from a broad range of sectors and industries.
- The Sub-Investment Manager may be delayed in or prevented from investing in the PRC by local restrictions on foreign investment or registration requirements for foreign investors, such as the Portfolio.

- The Sub-Investment Manager may use forward currency contracts in order to hedge currency risk. However, investors should note that the Portfolio will be exposed to currency risk, as underlying non-USD investments may not be fully hedged.
- Investors should refer to the “*Risks Associated with the Shanghai-Hong Kong and Shenzhen-Hong Kong Stock Connects*” section of the Prospectus in relation to the risks associated with the Stock Connects.
- The Portfolio may have or may be expected to have medium to high volatility due to its investment policies or portfolio management techniques.

Environmental, Social and Governance (“ESG”)

This Portfolio meets the classification of an Article 8 Portfolio as it promotes environmental and social characteristics and limits investments to companies that follow good governance practices.

Please also refer to Annex VI of the Prospectus which contains additional information on the ESG characteristics that are applicable to this Portfolio.

Typical Investor Profile

- The Portfolio gives access to China A Shares stocks that are exposed to the economic development in China and may be suitable for investors seeking capital appreciation opportunities through equity investments. Investors need to be comfortable with the risks associated with investment in the Greater China Region, the risks associated with investment via the QFI and be prepared to accept periods of market volatility particularly over short time periods. Investors are likely to hold the Portfolio as a complement to a diversified portfolio and should have a medium to long-term investment horizon.

Fees and Expenses

Category	Maximum Initial Charge	Maximum Management Fee	Distribution Fee
A, X, Y	5.00%	1.80%	0.00%
B, C1, C2, E	0.00%	1.80%	1.00%
C	0.00%	1.20%	1.00%
D, I, I2, I3, I4, I5	0.00%	0.90%	0.00%
M	2.00%	1.80%	1.00%
P	5.00%	0.86%	0.00%
T	5.00%	1.80%	0.00%
U	3.00%	1.35%	0.00%
Z	0.00%	0.00%	0.00%

For details of the Administration Fees payable by the Portfolio, please see the “*Administration Fees*” heading in the “*Fees and Expenses*” section of the Prospectus.

Contingent deferred sales charges

Contingent deferred sales charges will be payable in respect of the following Classes at the rates specified below, depending on the period that has elapsed since the issue of the Shares being redeemed and will be charged on the lower of the Net Asset Value per Share on the relevant Dealing Day in respect of which the relevant Shares were (i) initially subscribed or (ii) redeemed. Any such contingent deferred sales charges will be paid to the relevant Distributor, the Manager or to the Sub-Investment Manager.

Class	Redemption Period in Calendar Days				
	< 365	365 - 729	730 - 1094	1095 – 1459	> 1459
B	4%	3%	2%	1%	0%

Shenzhen Stock Connect	the Shenzhen-Hong Kong Stock Connect program;
Stock Connects	the Shanghai Stock Connect and Shenzhen Stock Connect;
SEHK	the Stock Exchange of Hong Kong;
SSE	the Shanghai Stock Exchange;
SZSE	the Shenzhen Stock Exchange; and
Sub-Investment Manager	(a) with respect to the Neuberger Berman Emerging Markets Sustainable Equity Fund and the Neuberger Berman Emerging Markets Equity Fund, Neuberger Berman Europe Limited, Neuberger Berman Investment Advisers LLC and Neuberger Berman Asia Limited or such other company as may be appointed by the Manager from time to time in respect of any

particular Portfolio, with the prior approval of the Company and the Central Bank; and

- (b) with respect to the Neuberger Berman Japan Equity Engagement Fund, Neuberger Berman Europe Limited, Neuberger Berman East Asia Limited or such other company as may be appointed by the Manager from time to time in respect of the Portfolio, with the prior approval of the Company and the Central Bank.

Investment Risks

Investment in the Portfolios carries certain risks, which are described in the “*Investment Risks*” section of the Prospectus and in the “Risk” section of the information specific to each Portfolio, as included in this Supplement. **These risks are not purported to be exhaustive and potential investors should review this Supplement and the Prospectus in their entirety and consult with their professional advisers, before making an application for Shares.**

There can be no assurance that the Portfolios will achieve their respective objectives. While there are some risks described below that may be common to a number or all of the Portfolios, there may also be specific risk considerations which apply only to particular Portfolios.

Distribution Policy

Under normal circumstances, the Directors intend that dividends in respect of:

- each of the (Monthly) Distributing Classes in the Portfolios shall be declared on or prior to the last Business Day of each month and paid within three Business Days thereafter; and
- each of the other Distributing Classes in the other Portfolios shall be declared on an annual basis and paid within 30 Business Days thereafter in relation to the Net Income of the Distributing Classes for the calendar year ended the previous 31 December.

Subscriptions and Redemptions

Subscriptions for Shares in all Classes of each Portfolio which have not already launched at the date of this Supplement will be considered during the Initial Offer Period, upon receipt by the Administrator of completed share applications and subscription monies as specified in the “*Subscriptions*” section of the Prospectus. Such Shares will be issued at the Initial Offer Price on the last day of the Initial Offer Period.

The Initial Offer Period shall run from 9.00 am on 24 December 2021 to 5.00 pm on 24 June 2022 or such earlier or later time as the Directors may determine at their discretion and notify to the Central Bank and to subscribers.

The Initial Offer Price for each of the share classes shall be as follows:

AUD Classes: AUD 10	DKK Classes: DKK 50	NOK Classes: NOK 100
BRL Classes: BRL 20	EUR Classes: EUR 10	NZD Classes: NZD 10
CAD Classes: CAD 10	GBP Classes: GBP 10	SEK Classes: SEK 100
CHF Classes: CHF 10	HKD Classes: HKD 10	SGD Classes: SGD 20
CLP Classes: CLP 5,000	ILS Classes: ILS 30	USD Classes: USD 10
CNY Classes: CNY 100	JPY Classes: JPY 1,000	ZAR Classes: ZAR 100

Thereafter and, in the case of Classes which have already launched, from the date of this Supplement, Shares will be issued at their Net Asset Value per Share, subject to the provision for Duties and Charges in respect of the issue of the Shares and rounding as provided for in the Articles on each Dealing Day.

The Company reserves the right to apply to Euronext Dublin to have the Shares in each of the Classes admitted to the Official List and to trading on the regulated market of Euronext Dublin.

The Company may, in its sole discretion, reject any subscription in whole or in part without reason.

As stated in the “*Subscriptions and Redemptions*” section of the Prospectus, redemption proceeds in respect of the Portfolios will be paid within ten (10) Business Days of the relevant Dealing Day unless payment has been suspended in the circumstances described in the “*Temporary Suspension of Dealings*” section of the Prospectus, although the Company will seek to make such payments within a shorter period of time where possible (up to and including within three (3) Business Days of the relevant Dealing Day).

Neuberger Berman Emerging Markets Equity Fund

An investment in the Portfolio should not constitute a substantial proportion of an investment portfolio and may not be appropriate for all investors. The Portfolio will not use FDI extensively or primarily for investment purposes.

Investment Objective	Achieve long-term capital growth.
Investment Approach	<p>The Portfolio will invest primarily in equity and equity-linked securities which are listed or traded on Recognised Markets globally and issued by companies that: (1) trade principally on a recognised stock exchange in Emerging Market Countries; (2) are organised under the laws of and have a principal office in Emerging Market Countries; or (3) derive 50% or more of their total revenues from, and/or have 50% or more of their total assets in, goods produced, sales made, profits generated or services performed in Emerging Market Countries. The Portfolio may also invest in other collective investment schemes which provide exposure to such securities, subject to a maximum of 10% of the Portfolio's Net Asset Value.</p> <p>The Sub-Investment Manager uses a fundamental bottom-up, research-driven securities selection approach focusing on high return businesses while factoring in economic, legislative and business developments to identify countries and economic sectors (such as energy, financials, health care, telecommunications and utilities) that it believes may be particularly attractive.</p> <p>The Sub-Investment Manager seeks to invest in companies that it believes have sustainable free cash flow growth and are trading at attractive valuations.</p> <p>The Sub-Investment Manager believes that in-depth, strategic and financial research is the key to identifying undervalued companies and seeks to identify companies with the following characteristics:</p> <ul style="list-style-type: none"> • Stock prices undervalued relative to long-term cash flow growth potential; • Industry leadership; • Potential for significant improvement in the company's business; • Strong financial characteristics; • Strong corporate governance practices; and • Management track record. <p>The Portfolio seeks to reduce risk by diversifying among many industries within the countries and economic sectors it identifies. Although it has the flexibility to invest a significant portion of its assets in one country or region, it generally intends to remain diversified across countries and geographical regions.</p> <p>The Sub-Investment Manager follows a disciplined selling strategy and may sell a stock when it reaches a target price, when the company's business fails to perform as expected, or when other opportunities appear more attractive.</p> <p>The Portfolio may invest in companies of any market capitalisation and may include a broader geographical exposure than the country constituents of the index disclosed below under "Benchmark".</p> <p>The Portfolio is actively managed and does not intend to track the Benchmark which is included here for performance comparison purposes and because the Portfolio's investment policy restricts the extent to which the Portfolio's holdings may deviate from the Benchmark, as described above and in the "Investment Restrictions" section. This deviation may be significant.</p>
Benchmark	The MSCI EM Index (Total Return, Net of Tax, USD), which is a free float adjusted market capitalisation weighted index of large and mid-cap securities across a number of emerging markets globally. The index is subject to rebalancing and the list of

specific emerging market countries and names are subject to change in line with the MSCI's applicable methodology.

Shareholders in a Class which is denominated in a currency other than the Base Currency should note that, where available, it may be more meaningful to compare the performance of such Class against a version of this index which is denominated in the relevant Class currency.

Base Currency

US Dollars (USD).

Instruments / Asset Classes

The Portfolio can invest in or be exposed to the following types of assets.

Equity and Equity-linked Securities. These securities may include, without limitation, common stock, preferred stock, convertible bonds, convertible preferred stock and American, European and Global Depository Receipts, which are securities issued by a financial institution which evidence ownership interests in a security or a pool of securities deposited with the financial institution, each of which may, subject to the UCITS Regulations, be listed or unlisted.

ETFs. ETFs are investment companies whose shares are bought and sold on a securities exchange. ETFs invest in a portfolio of securities designed to track a particular market segment or index, in this case Emerging Markets with a focus on equities. The ETFs will be located in Relevant Jurisdictions and will be authorised under the UCITS Directive or will be non-UCITS which are eligible for investment by the Portfolio in accordance with the requirements of the Central Bank. The ETFs will represent investments that are similar to the Portfolio's other investments. The ETFs will operate on the principle of risk spreading and will not be leveraged.

Equity Real Estate Investment Trusts ("REITs"). REITs are companies or trusts that pool investor money and invest mainly in income producing real estate, although it should be noted that the Portfolio will not acquire any real estate directly. REITs may invest in a diverse range of real estate properties or may specialise in a particular type of property. The REITs which the Portfolio will invest in may be based globally but will give exposure to underlying properties located in Emerging Market Countries. They will invest the majority of their assets directly in real property and derive their income from rents and capital gains from appreciation realised through property sales.

Participatory Notes. Participatory Notes which are freely transferable securities issued by banks or broker-dealers that are designed to replicate the performance of certain issuers and markets by giving exposure to the performance of specific stocks that the Portfolio may not be able to invest in directly because of local holding restrictions affecting such stocks in the jurisdiction of their issue.

Fixed Income Securities (Debt Securities). Any debt instruments invested in may be issued by corporate or government issuers, may be rated or unrated (although not more than 30% of the Portfolio's Net Asset Value will be invested in debt instruments which are rated below investment grade) and may have fixed or floating interest rates.

Financial Derivative Instruments ("FDI"). The Portfolio may, subject to the conditions and limits imposed by the Central Bank as set out in the Prospectus and in this Supplement, use FDI, including, without limitation, warrants (including equity warrants), rights (including equity rights), convertible bonds, currency futures contracts, forward currency contracts and convertible preferred stock which may be used for investment purposes or to hedge or to achieve exposure to a particular security. Convertible bonds enable the holder to convert their investment in the bonds into the issuer's common stock at a pre-agreed price and convertible preferred stock enable the holder to convert their investment in the preferred stock into the issuer's common stock at a pre-agreed rate. Futures contracts based on securities of the types described above and equity indices (which meet the requirements of the Central Bank for use by UCITS), may be used to achieve a profit as well as to hedge existing positions.

The Portfolio will be leveraged as a result of its investments in FDI but such leverage will not exceed 100% of the Portfolio's Net Asset Value, as measured using the Commitment Approach, at any time.

Repo Contracts and Securities Lending Agreements. Repo Contracts and Securities Lending Agreements may be used subject to the conditions and limits set out in the Prospectus.

Stock Connects

The China Securities Regulatory Commission and the Securities and Futures Commission of Hong Kong have approved programs which establish mutual stock markets access between the PRC and Hong Kong, namely the Stock Connects. The Sub-Investment Manager may pursue the Portfolio's investment objective by investing up to 20% of the Portfolio's Net Asset Value directly in certain eligible China A Shares via the Stock Connects.

The Shanghai Stock Connect is a securities trading and clearing linked program developed by the SEHK, the SSE and ChinaClear, with the aim of achieving mutual stock market access between the SEHK and the SSE. The Shenzhen Stock Connect is a securities trading and clearing linked program developed by the SEHK, the SZSE and ChinaClear, with the aim of achieving mutual stock market access between the SEHK and the SZSE.

Each of the Shanghai Stock Connect and Shenzhen Stock Connect comprises a Northbound Trading Link and a Southbound Trading Link. Under the Northbound Trading Link, Hong Kong and overseas investors (including the Portfolio), through their Hong Kong brokers and a securities trading service company established by the SEHK, may trade eligible shares listed on the SSE and the SZSE by routing orders to the SSE and the SZSE respectively.

Eligible securities

Hong Kong and overseas investors will be able to trade certain SSE Securities. Eligible securities under the Northbound Trading Link of the Shanghai Stock Connect include all the constituent stocks from time to time of the SSE 180 Index and SSE 380 Index, and all the SSE-listed China A Shares that are not included as constituent stocks of the relevant indices but which have corresponding H-Shares listed on the SEHK, except the following:

- SSE-listed shares which are not traded in CNY; and
- SSE-listed shares which are included in the "risk alert board".

Eligible securities under the Northbound Trading Link of the Shenzhen Stock Connect include any constituent stock of the SZSE Component Index and the SZSE Small/Mid Cap Innovation Index which has a market capitalisation of CNY6 billion or above and all SZSE-listed shares of companies which have issued both China A Shares and China H Shares. At the initial stage of the Northbound Trading Link of Shenzhen Stock Connect, trading shares that are listed on the ChiNext Board of SZSE under the Northbound Trading Link will be limited to institutional professional investors, as defined in the relevant Hong Kong rules and regulations.

It is expected that the list of eligible securities will be subject to review and may change from time to time.

If an eligible security ceases to be classified as such, Hong Kong and overseas investors (including the Portfolio) will only be allowed to sell holdings of such Security but will be restricted from buying any more of such Eligible Security.

Trading day

Investors (including the Portfolio) are only allowed to trade through the Stock Connects on days on which both markets (i.e. both the SEHK and the SSE for trading

through Shanghai Stock Connect) are open for trading, and banking services are available in both markets on the corresponding settlement days.

Trading quota

Trading under the Stock Connects is subject to the Daily Quota. Northbound trading through each Stock Connect is subject to a separate set of Daily Quotas. The Daily Quota limits the maximum net buy value of cross-boundary trades under each of the Stock Connect per day. The Northbound Daily Quota for each Stock Connect is currently set at CNY52 billion.

The SEHK will monitor the quota and publish the remaining balance of the Northbound Daily Quota at scheduled times on the SEHK's website. The Daily Quota may change from time to time without prior notice and investors should refer to the SEHK's website and other information published by the SEHK for up-to-date information.

Settlement and Custody

The HKSCC will be responsible for the clearing, settlement and the provision of depository, nominee and other related services of the trades executed by Hong Kong market participants and investors.

The China A Shares traded through the Stock Connects are issued in scripless form, so investors do not hold any physical China A Shares. Hong Kong and overseas investors who have acquired Eligible Securities through Northbound trading should maintain the Eligible Securities with their brokers' or custodians' stock accounts with CCASS.

Corporate actions and shareholders' meetings

Notwithstanding the fact that the HKSCC does not claim proprietary interests in the Eligible Securities held in its omnibus stock account in ChinaClear, ChinaClear as the share registrar for SSE and SZSE-listed companies will still treat HKSCC as one of the shareholders when it handles corporate actions in respect of such Eligible Securities.

HKSCC monitors the corporate actions affecting Eligible Securities and keeps the relevant brokers or custodians participating in CCASS ("CCASS participants") informed of all such corporate actions that require CCASS participants to take steps in order to participate in them.

SSE and SZSE-listed companies usually announce their annual general meeting / extraordinary general meeting information about one month before the meeting date. A poll is called on all resolutions for all votes. HKSCC will advise CCASS participants of all general meeting details such as meeting date, time, venue and the number of resolutions.

Foreign shareholding restrictions

The CSRC stipulates that, when holding China A Shares through the Stock Connects, Hong Kong and overseas investors are subject to the following shareholding restrictions:

- Single foreign investors' shareholding by any Hong Kong or overseas investor in a China A Share must not exceed 10% of the total issued shares; and
- Aggregate foreign investors' shareholding by all Hong Kong and overseas investors in a China A Share must not exceed 30% of the total issue shares.

Should the shareholding of a single investor in a China A Share listed company exceed the above restriction, the investor would be required to unwind his position

on the excessive shareholding according to a last-in-first-out basis within a specific period. The SSE, the SZSE and the SEHK will issue warnings or restrict the buy orders for the related China A Shares if the percentage of total shareholding is approaching the upper limit.

Currency

Hong Kong and overseas investors will trade and settle Eligible Securities in CNY only. Hence, the Portfolio will need to use CNY to trade and settle Eligible Securities.

Further information about the Stock Connects is available online at the website:

<http://www.hkex.com.hk/Mutual-Market/Stock-Connect>

Investment Restrictions

- The Portfolio may invest in China A Shares up to 20% of its Net Asset Value or in China B Shares up to 10% of its Net Asset Value. The Portfolio may invest directly in the China A Share market through the Stock Connects as described above and indirectly, mainly through investments in equity linked products issued by financial institutions such as QFIs and through transferable securities which may be issued by entities which are managed by affiliates of the Manager. The Portfolio may invest directly in the China B Share market.
- The Portfolio may invest up to 10% of its Net Asset Value in securities that are issued or guaranteed by a single sovereign issuer that are below investment grade.
- Investments in units of other collective investment schemes are limited to a maximum of 10% of the Portfolio's Net Asset Value.
- The Portfolio may not invest greater than 20% of its Net Asset Value in non-Emerging Market Countries securities.
- The Portfolio's over or underweight exposure to a particular country, relative to the Benchmark, may not exceed 10% of the Portfolio's Net Asset Value.
- The Portfolio's over or underweight exposure to a Global Industry Classification Standard (GICS)[®] sector, relative to the Benchmark, may not exceed 10% of the Portfolio's Net Asset Value.
- The Portfolio will not utilise total return swaps or margin lending.

Risk

- Investment in the Portfolio carries certain risks which are described in greater detail in the "Investment Risks" section of the Prospectus. While investors should read and consider the entire "Investment Risks" section of the Prospectus, the risks summarised in the following section, namely, "*Market Risks: Risks relating to Emerging Markets*" are particularly relevant to this Portfolio. **These risks are not purported to be exhaustive and potential investors should review this Supplement and the Prospectus in their entirety and consult with their professional advisers, before making an application for Shares.**
- Investors should refer to the Company's risk management policy with respect to the use of FDI contained in the RMP Statement.
- The Portfolio may be leveraged as a result of its investments in FDI but such leverage will not exceed 100% of the Portfolio's Net Asset Value, as measured using the Commitment Approach, at any time.
- The Portfolio will seek to reduce risk by diversifying among securities from a broad range of countries, sectors and industries.
- The Sub-Investment Manager may be delayed in or prevented from investing in certain Emerging Market Countries by local restrictions on foreign investment. or registration requirements for foreign investors, such as the Portfolio
- The Sub-Investment Manager will use forward currency contracts in order to hedge currency risk.
- The Portfolio may have or may be expected to have medium to high volatility due to its investment policies or portfolio management techniques.

Environmental, Social and Governance (“ESG”)

This Portfolio meets the classification of an Article 8 Portfolio as it promotes environmental and social characteristics and limits investments to companies that follow good governance practices.

ESG risks and opportunities are systematically considered in the selection of securities to be constituents of the Portfolio. The Sub-Investment Manager assesses securities in relation to their exposure to and the management of ESG risks. ESG represents governance, (being the way in which the company is run), environmental issues, (such as the impact on natural resources), and social issues (such as human rights).

Please also refer to Annex VI of the Prospectus which contains additional information on the ESG characteristics that are applicable to this Portfolio.

Typical Investor Profile

The Portfolio may be suitable for investors seeking an exposure to emerging market equities through an investment approach that is diversified across industries, countries and regions.

Fees and Expenses

Category	Maximum Initial Charge	Maximum Management fee	Distribution Fee
A, X, Y	5.00%	2.00%	0.00%
B, C1, C2, E	0.00%	2.00%	1.00%
C	0.00%	1.30%	1.00%
D, I, I2, I3, I4, I5	0.00%	1.00%	0.00%
M	2.00%	2.00%	1.00%
P	5.00%	0.95%	0.00%
T	5.00%	2.00%	0.00%

C, C1	1%	0%	0%	0%	0%
C2	2%	1%	0%	0%	0%
E	3%	2%	1%	0%	0%

Other important information for investors in Hong Kong

As the Portfolio has been authorised for public offer in Hong Kong, the Hong Kong Securities and Futures Commission (“HKSF”) requires the Company to classify the Portfolio on the basis of its expected maximum net derivative exposure (“NDE”). The HKSF requires the NDE to be calculated in accordance with the HKSF’s Code on Unit Trusts and Mutual Funds and the requirements and guidance issued by the HKSF, which may be updated from time to time. This requires the Company to convert all FDI acquired for investment purposes that would generate incremental leverage at the portfolio level of the Portfolio into their equivalent positions in the

underlying assets. Applying these requirements, the Portfolio's NDE is expected to be less than 50% but the actual level may be higher than the expected level in exceptional circumstances, for example when there are sudden movements in markets and/or investment prices.

For the avoidance of doubt, complying with the HKSF's requirements to classify the Portfolio on the basis of its NDE does not amend the investment objectives or policies or otherwise impact the management of the Portfolio or its use of FDI, as the requirements are solely to measure the Portfolio's expected use of FDI, as described above, using the HKSF's methodology and disclose the results.

Neuberger Berman Emerging Markets Sustainable Equity Fund

An investment in the Portfolio should not constitute a substantial proportion of an investment portfolio and may not be appropriate for all investors. The Portfolio will not use FDI extensively or primarily for investment purposes.

Investment Objective The Portfolio aims to achieve long-term capital growth by investing primarily in Emerging Market companies.

Investment Approach The Portfolio seeks to achieve its investment objective by investing primarily in equity and equity-linked securities which are listed or traded on Recognised Markets globally and issued by companies that: (1) trade principally on a recognised stock exchange in Emerging Market Countries; (2) are organised under the laws of and have a principal office in Emerging Market Countries; or (3) derive 50% or more of their total revenues from, and/or have 50% or more of their total assets in, goods produced, sales made, profits generated or services performed in Emerging Market Countries. The Portfolio may also invest in other collective investment schemes which provide exposure to such securities, subject to a maximum of 10% of the Portfolio's Net Asset Value. The Portfolio may seek exposure to a country or region within Emerging Markets through investment in securities traded on stock exchanges or markets located in other jurisdictions through participatory notes.

The Portfolio may invest in companies of any market capitalisation but shall typically invest in companies that have market capitalisation greater than USD 1bn at time of purchase.

Investors should note that this Portfolio seeks to apply the Sustainable Exclusions Policy, as such term is defined within the "Sustainable Investment Criteria" section of the Prospectus. Investors should refer to the information contained in that section for further details about the application of the Sustainable Exclusion Policy to the Portfolio.

The Sub-Investment Manager uses a fundamental bottom-up, research-driven securities selection approach focusing on businesses while factoring in economic, legislative and business developments to identify countries and economic sectors that it believes may be more profitable, in the future, in comparison to the broader set of countries and economic sectors.

The Sub-Investment Manager seeks to invest in companies that it believes have sustainable free cash flow growth and are trading at a price which the Sub-Investment Manager considers to be attractive relative to its perception of the long-term value of the securities, based on its discounted cash flow generation potential, its peer group or historical valuation on metrics such as price to cash flow, price to earnings or price to book value.

The Sub-Investment Manager believes that in-depth, strategic and financial research is the key to identifying undervalued companies. The Sub-Investment Manager uses data analysis to evaluate the ESG characteristics of the companies within its investment universe on their exposure to and management of ESG risks. The Sub-Investment Manager considers ESG risks to include environmental issues, (such as impact on natural resources), social issues, (such as human rights) and governance (the way in which the company is run). The ESG evaluation favours companies with lower ESG risks but also credits companies which are actively improving their focus on ESG issues. The ESG evaluation is part of the fundamental research to determine the overall attractiveness of each company, which also seeks to identify companies with the following characteristics:

Stock prices undervalued relative to long-term cash flow growth potential;

- Industry leadership;
- Potential for significant improvement in the company's business;
- Strong financial characteristics, including historic valuations on metrics such as price to cash flow, price to earnings or price to book value; and

- Proven management track record.

ESG analysis: the Sub-Investment Manager will first exclude companies from the investment universe that are involved in controversial activities and behaviour, such as the production of controversial weapons, fur manufacturers, gambling, nuclear power or non-compliance with the United Nations Global Compact. The application of the Enhanced Sustainable Exclusion Policy, as such terms are defined within the “Sustainable Investment Criteria” section of the Prospectus, also means that companies involved in tobacco, civilian firearms, private prisons and fossil fuels will also be excluded.

The Sub-Investment Manager will then assess the investment universe, which involves in-depth research and analysis of companies’ ESG profiles and will also exclude companies that show poorly on this ESG assessment. The Sub-Investment Manager will ensure that securities representing at least 90% of the Net Asset Value of the Portfolio are covered by the ESG assessment.

Through these two ESG exclusionary steps, the Sub-Investment Manager will exclude at least 20% of components of the investment universe.

The Portfolio seeks to reduce risk by diversifying among many industries within the countries and economic sectors it identifies. Although it has the flexibility to invest a significant portion of its assets in one country or region, it generally intends to remain diversified across countries and geographical regions.

The Sub-Investment Manager follows a disciplined selling strategy and may sell a stock when it reaches a target price, when the company’s business fails to perform as expected, or when other opportunities appear more attractive.

The Portfolio may invest up to 100% of its Net Asset Value in Emerging Market equity and equity-linked securities.

The Portfolio is actively managed and does not intend to track the Benchmark which is included here for performance comparison purposes and because the Portfolio’s investment policy restricts the extent to which the Portfolio’s holdings may deviate from the Benchmark, as described above and in the “Investment Restrictions” section. This deviation may be significant.

Benchmark

The MSCI EM Index (Total Return, Net of Tax, USD), which is a free float-adjusted market capitalisation weighted index of large and mid-cap securities across a number of emerging markets globally. The index is subject to rebalancing and the list of specific emerging market countries and names are subject to change in line with the MSCI’s applicable methodology.

Shareholders in a Class which is denominated in a currency other than the Base Currency should note that, where available, it may be more meaningful to compare the performance of such Class against a version of this index which is denominated in the relevant Class currency.

Base Currency

US Dollars (USD).

Instruments / Asset Classes

The Portfolio can invest in or be exposed to the following types of assets.

Equity and Equity-linked Securities. These securities may include, without limitation, common stock, preferred stock, convertible bonds, convertible preferred stock and American, European and Global Depository Receipts, which are securities issued by a financial institution which evidence ownership interests in a security or a pool of securities deposited with the financial institution.

ETFs. ETFs are investment funds whose shares are bought and sold on a securities exchange. ETFs invest in a portfolio of securities designed to track a particular market segment or index, in this case emerging equity markets. The ETFs will be located in Relevant Jurisdictions and will be authorised under the UCITS Directive or will be alternative investment funds which are eligible for investment by the Portfolio in accordance with the requirements of the Central Bank. The ETFs will represent investments that are similar to the Portfolio’s other investments. The ETFs will

operate on the principle of risk spreading and will not be leveraged.

Equity Real Estate Investment Trusts ("REITs"). REITs are companies or trusts that pool investor money and invest mainly in income producing real estate, although it should be noted that the Portfolio will not acquire any real estate directly. REITs may invest in a diverse range of real estate properties or may specialise in a particular type of property. The REITs which the Portfolio will invest in may be based globally but will give exposure to underlying properties located in Emerging Market Countries. They will invest the majority of their assets directly in real property and derive their income from rents and capital gains from appreciation realised through property sales.

Participatory Notes ("P-Notes"). P-Notes are securities issued by banks or broker-dealers that are designed to replicate the performance of certain issuers and markets by giving exposure to the performance of specific stocks that the Portfolio may not be able to invest in directly because of local holding restrictions affecting such stocks in the jurisdiction of their issue. The Portfolio shall only invest in listed P-Notes.

Financial Derivative Instruments ("FDIs"). Subject to the conditions and limits imposed by the Central Bank as set out in the Prospectus and in this Supplement, the Portfolio may use FDI, including warrants (including equity warrants), convertible bonds and convertible preferred stock, currency futures contracts, forward currency contracts, options on UCITS eligible equity indices, equity rights and single stock options which may be used for investment purposes in pursuing the investment objective, efficient portfolio management or to hedge. Convertible bonds enable the holder to convert their investment in the bonds into the issuer's common stock at a pre-agreed price and convertible preferred stock enable the holder to convert their investment in the preferred stock into the issuer's common stock at a pre-agreed rate. Forward currency contracts and currency futures may be used in order to hedge currency risk. Index Options may be used to hedge or efficiently manage some portions or all of the Portfolio. Futures contracts based on securities of the types described above and equity indices (which meet the requirements of the Central Bank for use by UCITS), may be used to achieve a profit as well as to hedge existing positions. Such FDI may provide exposure to any or all of the asset classes listed above.

Collective Investment Schemes. The Portfolio may invest in collective investment schemes which are themselves exposed to investments that are similar to the Portfolio's other investments, provided that the Portfolio may not invest more than 10% of its Net Asset Value in other collective investment schemes (including ETFs which are structured as collective investment schemes) which themselves invest in other collective investment schemes. Such collective investment schemes may or may not be managed by the Manager and the Sub-Investment Manager or their affiliates and will comply with the requirements of the UCITS Regulations in respect of such investments.

The other collective investment schemes in which the Portfolio may invest will be eligible collective investment schemes in accordance with the Central Bank's rules, which may be domiciled in Relevant Jurisdictions or the United States of America and will qualify as UCITS or AIF schemes and will be regulated as such by their home state regulator.

Collective investment schemes in which the Portfolio invests may be leveraged but such collective investment schemes will not generally be leveraged (i) in excess of 100% of their net asset value; or (ii) so that their 1 day absolute value-at-risk exceeds 4.47% of their net asset value over a 250 day horizon with a 99% confidence level; or (iii) so that their 1 month relative value-at-risk exceeds twice the value-at-risk of a comparable benchmark portfolio over a 250 day horizon with a 99% confidence level, depending on how such collective investment funds measure their global exposure.

Fixed Income Securities (Debt Securities). The Portfolio may invest in debt instruments issued by corporate or government issuers, which may be rated or unrated (although not more than 30% of NAV will be invested in debt instruments which are rated below investment grade) and may have fixed or floating interest rates.

Repo Contracts and Securities Lending Agreements. The Portfolio may use Repo Contracts and Securities Lending Agreements subject to the conditions and limits set out in the Prospectus.

Stock Connects

The China Securities Regulatory Commission and the Securities and Futures Commission of Hong Kong have approved programs which establish mutual stock markets access between the PRC and Hong Kong, namely the Stock Connects. The Sub-Investment Manager may pursue the Portfolio's investment objective by investing up to 20% of the Portfolio's Net Asset Value directly in certain eligible China A Shares via the Stock Connects.

The Shanghai Stock Connect is a securities trading and clearing linked program developed by the SEHK, the SSE and ChinaClear, with the aim of achieving mutual stock market access between the SEHK and the SSE. The Shenzhen Stock Connect is a securities trading and clearing linked program developed by the SEHK, the SZSE and ChinaClear, with the aim of achieving mutual stock market access between the SEHK and the SZSE.

Each of the Shanghai Stock Connect and Shenzhen Stock Connect comprises a Northbound Trading Link and a Southbound Trading Link. Under the Northbound Trading Link, Hong Kong and overseas investors (including the Portfolio), through their Hong Kong brokers and a securities trading service company established by the SEHK, may trade eligible shares listed on the SSE and the SZSE by routing orders to the SSE and the SZSE respectively.

Eligible securities

Hong Kong and overseas investors will be able to trade certain SSE Securities. Eligible securities under the Northbound Trading Link of the Shanghai Stock Connect include all the constituent stocks from time to time of the SSE 180 Index and SSE 380 Index, and all the SSE-listed China A Shares that are not included as constituent stocks of the relevant indices but which have corresponding H-Shares listed on the SEHK, except the following:

- SSE-listed shares which are not traded in CNY; and
- SSE-listed shares which are included in the "risk alert board".

Eligible securities under the Northbound Trading Link of the Shenzhen Stock Connect include any constituent stock of the SZSE Component Index and the SZSE Small/Mid Cap Innovation Index which has a market capitalisation of CNY6 billion or above and all SZSE-listed shares of companies which have issued both China A Shares and China H Shares. At the initial stage of the Northbound Trading Link of Shenzhen Stock Connect, trading shares that are listed on the ChiNext Board of SZSE under the Northbound Trading Link will be limited to institutional professional investors, as defined in the relevant Hong Kong rules and regulations.

It is expected that the list of eligible securities will be subject to review and may change from time to time.

If an eligible security ceases to be classified as such, Hong Kong and overseas investors (including the Portfolio) will only be allowed to sell holdings of such Security but will be restricted from buying any more of such Eligible Security.

Trading day

Investors (including the Portfolio) are only allowed to trade through the Stock Connects on days on which both markets (i.e. both the SEHK and the SSE for trading through Shanghai Stock Connect) are open for trading, and banking services are available in both markets on the corresponding settlement days.

Trading quota

Trading under the Stock Connects is subject to the Daily Quota. Northbound trading through each Stock Connect is subject to a separate set of Daily Quotas. The Daily Quota limits the maximum net buy value of cross-boundary trades under each of the Stock Connect per day. The Northbound Daily Quota for each Stock Connect is currently set at CNY52 billion.

The SEHK will monitor the quota and publish the remaining balance of the Northbound Daily Quota at scheduled times on the SEHK's website. The Daily Quota may change from time to time without prior notice and investors should refer to the SEHK's website and other information published by the SEHK for up-to-date information.

Settlement and Custody

The HKSCC will be responsible for the clearing, settlement and the provision of depository, nominee and other related services of the trades executed by Hong Kong market participants and investors.

The China A Shares traded through the Stock Connects are issued in scripless form, so investors do not hold any physical China A Shares. Hong Kong and overseas investors who have acquired Eligible Securities through Northbound trading should maintain the Eligible Securities with their brokers' or custodians' stock accounts with CCASS.

Corporate actions and shareholders' meetings

Notwithstanding the fact that the HKSCC does not claim proprietary interests in the Eligible Securities held in its omnibus stock account in ChinaClear, ChinaClear as the share registrar for SSE and SZSE-listed companies will still treat HKSCC as one of the shareholders when it handles corporate actions in respect of such Eligible Securities.

HKSCC monitors the corporate actions affecting Eligible Securities and keeps the relevant brokers or custodians participating in CCASS ("CCASS participants") informed of all such corporate actions that require CCASS participants to take steps in order to participate in them.

SSE and SZSE-listed companies usually announce their annual general meeting / extraordinary general meeting information about one month before the meeting date. A poll is called on all resolutions for all votes. HKSCC will advise CCASS participants of all general meeting details such as meeting date, time, venue and the number of resolutions.

Foreign shareholding restrictions

The CSRC stipulates that, when holding China A Shares through the Stock Connects, Hong Kong and overseas investors are subject to the following shareholding restrictions:

- Single foreign investors' shareholding by any Hong Kong or overseas investor in a China A Share must not exceed 10% of the total issued shares; and
- Aggregate foreign investors' shareholding by all Hong Kong and overseas investors in a China A Share must not exceed 30% of the total issue shares.

Should the shareholding of a single investor in a China A Share listed company exceed the above restriction, the investor would be required to unwind his position on the excessive shareholding according to a last-in-first-out basis within a specific period. The SSE, the SZSE and the SEHK will issue warnings or restrict the buy

orders for the related China A Shares if the percentage of total shareholding is approaching the upper limit.

Currency

Hong Kong and overseas investors will trade and settle Eligible Securities in CNY only. Hence, the Portfolio will need to use CNY to trade and settle Eligible Securities.

Further information about the Stock Connects is available online at the website:

<http://www.hkex.com.hk/Mutual-Market/Stock-Connect>

Investment Restrictions

- The Portfolio may invest in China A Shares up to 20% of its Net Asset Value or in China B Shares up to 10% of its Net Asset Value. The Portfolio may invest directly in the China A Share market through the Stock Connects as described above and indirectly, mainly through investments in equity linked products issued by financial institutions such as QFIs and through transferable securities which may be issued by entities which are managed by affiliates of the Manager. The Portfolio may invest directly in the China B Share market.
- The Portfolio may not invest no more than 10% of its net assets in securities that are issued or guaranteed by a single sovereign issuer that are below investment grade.
- Investments in units of other collective investment schemes are limited to a maximum of 10% of the Portfolio's Net Asset Value.
- The Portfolio may not invest greater than 10% of its Net Asset Value in securities traded on Russian markets. Investment will only be made in securities that are listed/traded on the Moscow exchange.
- The Portfolio may not invest greater than 20% of its Net Asset Value in non-Emerging Market Countries securities.
- The Portfolio's over or underweight exposure to a particular country, relative to the Benchmark, may not exceed 15%.
- The Portfolio's over or underweight exposure to a Global Industry Classification Standard (GICS)[®] sector, relative to the Benchmark, may not exceed 15%.
- The Portfolio will be subject to the Sustainable Exclusion Policy as detailed in the "Sustainable Investment Criteria" section of the Prospectus and the "Environmental, Social and Governance" section below.
- The Portfolio will not utilise total return swaps or margin lending.

Risk

- Investment in the Portfolio carries certain risks which are described in greater detail in the "Investment Risks" section of the Prospectus. While investors should read and consider the entire "Investment Risks" section of the Prospectus, the risks summarised in the following section, namely, "Market Risks: Risks relating to Emerging Markets" are particularly relevant to this Portfolio. **These risks are not purported to be exhaustive and potential investors should review this Supplement and the Prospectus in their entirety and consult with their professional advisers, before making an application for Shares.**
- Investors should refer to the Company's risk management policy with respect to the use of FDI contained in the RMP Statement.
- The Portfolio may be leveraged as a result of its investments in FDI but such leverage will not exceed 100% of the Portfolio's Net Asset Value, as measured using the commitment approach, at any time.
- The Portfolio will seek to reduce risk by diversifying among securities from a broad range of countries, sectors and industries.
- The Sub-Investment Manager may be delayed in or prevented from investing in certain Emerging Market Countries by local restrictions on foreign investment or registration requirements for foreign investors, such as the Portfolio.
- The Sub-Investment Manager may use forward currency contracts in order to hedge currency risk. However, investors should note that the Portfolio will be exposed to currency risk, as underlying non-USD investments may not be fully hedged.
- The Portfolio may have or may be expected to have medium to high volatility due

to its investment policies or portfolio management techniques.

Environmental, Social and Governance (“ESG”)

This Portfolio meets the classification of an Article 8 Portfolio as it promotes environmental and social characteristics and limits investments to companies that follow good governance practices.

The Portfolio invests in securities that meet criteria set out in the Sustainable Exclusions Policy, as detailed in the “Sustainable Investment Criteria” section of the Prospectus.

The Sub-Investment Manager:

- (i) excludes securities issued by companies that are involved in controversial activities and behaviour and those which rated worst in terms of its ESG assessment from the investment universe, such that at least 20% of the investment universe is excluded on these bases; and
- (ii) ensures at least 90% ESG coverage rate of the Net Asset Value of the Portfolio.

Please also refer to Annex VI of the Prospectus which contains additional information on the ESG characteristics that are applicable to this Portfolio.

Typical Investor Profile

The Portfolio gives access to global emerging market stocks and may be suitable for investors seeking capital appreciation opportunities through equity investments. Investors need to be comfortable with the risks associated with the Portfolio and be prepared to accept period of market volatility particularly over short time periods. Investors are likely to hold the Portfolio as a complement to a diversified portfolio and should have a medium to long-term investment horizon.

Fees and Expenses

Category	Maximum Initial Charge	Maximum Management fee	Distribution Fee
A, C1, X, Y	5.00%	1.70%	0.00%

T	5.00%	2.00%	0.00%
U	3.00%	1.25%	0.00%
Z	0.00%	0.00%	0.00%

For the details of the Administration Fees payable by the Portfolio, please see the “Administration Fees” heading in the “Fees and Expenses” section of the Prospectus.

Contingent deferred sales charges

Contingent deferred sales charges will be payable in respect of the following Classes at the rates specified below, depending on the period that has elapsed since the issue of the Shares being redeemed and will be charged on the lower of the Net Asset Value per Share on the relevant Dealing Day in respect of which the relevant Shares were (i) initially subscribed or (ii) redeemed. Any such contingent deferred sales charges will be paid to the relevant Distributor, the Manager or to the Sub-Investment Manager.

Class	Redemption Period in Calendar Days

C2	2%	1%	0%	0%	0%
E	3%	2%	1%	0%	0%

For further information on fees, please refer to the “*Fees and Expenses*” section of the Prospectus.

Neuberger Berman Japan Equity Engagement Fund

The Portfolio will not use FDI extensively or primarily for investment purposes. The value of Shares may go down as well as up and investors may not get back any of the amount invested.

Investment Objective The Portfolio aims to achieve a target average return of 3% over the Benchmark (as specified in the “*Benchmark*” section below) before fees over a market cycle (typically 3 years) from investing primarily in a portfolio of Japanese equity holdings.

Investors should note that the target return is not guaranteed over a market cycle, a 12-month or any period and the Portfolio’s capital is at risk. Investors should also note that, over the course of a market cycle, there may be significant periods of time during which the performance of the Portfolio will deviate from the targeted return and the Portfolio may experience periods of negative return. There can be no guarantee that the Portfolio will ultimately achieve its investment objective.

Investment Approach The Portfolio will primarily invest in equity securities issued by small and mid-capitalisation companies which have either their head office or exercise an overriding part of their economic activity in Japan and that are listed or traded on Recognised Markets globally.

The Sub-Investment Manager generally considers small and mid-capitalisation companies to be those with a total market capitalisation of less than 1 trillion Japanese Yen at the time of initial purchase. The Portfolio may continue to hold a position in corporations even after their market capitalisations exceed 1 trillion Japanese Yen

As described in greater detail below, the Sub-Investment Manager will employ a research driven, bottom-up, fundamental approach to stock selection, with a long term perspective that combines both quantitative analysis and qualitative judgment to identify investments that the Sub-Investment Manager considers to be attractive and have the potential to increase their corporate value and achieve sustainable growth, through active engagement i.e. constructive and purposeful dialogue, based upon a deep understanding of the investment company and their business environment.

In seeking to achieve the Portfolio’s investment objective, the Sub-Investment Manager pursues the following three step investment process to identify a universe of securities:

- **Quantitative screening:** to identify high quality companies i.e. those with a high return on equity or sustainable profit margins or companies that the Sub-Investment Manager believes are priced at a deep discount to their intrinsic value and with identifiable reasons for the discount, for example because of low analyst coverage of the smaller company universe;
- **Qualitative business analysis:** to identify companies which the Sub-Investment Manager believes have the most durable business models and those with opportunities for value creation through active engagement with those companies, for example through dialogue with company management on optimising business practice and active shareholder voting on corporate issues; and
- **Strategic valuation and analysis:** to evaluate the stocks identified through the first two steps and rate them using the Sub-Investment Manager’s proprietary system of in-depth research and analysis of companies, including of company/business models, quality of management, competitive strength and record of success.

The Sub-Investment Manager applies a score to each stock which is generated on the basis of: (i) the above three step investment process; (ii) ESG factors (as referred to below); and (iii) valuation. Stocks are then ranked using these scores, which are reviewed at least six times a year, through the review of quarterly financial results

and company visits. The Sub-Investment Manager reviews the constituents of this 'watch list' four times a year.

The Sub-Investment Manager will then seek to construct a portfolio which is well-diversified across economic sectors with securities selected based upon those that score highly in the ranking system and following an assessment of the risk exposures. Investors should note that this is expected to result in a Portfolio which may be relatively more concentrated than other portfolios which cover the same broad market, subject to the diversification requirements of the UCITS Regulations.

The Portfolio may also invest in money market instruments on an ancillary basis.

The Portfolio is actively managed and does not intend to track the Benchmark which is included here for performance comparison purposes and because the Portfolio's investment policy restricts the extent to which the Portfolio's holdings may deviate from the Benchmark, as described in the "Investment Restrictions" section. This deviation may be significant.

Benchmark	<p>The MSCI Japan Small Cap Net Index (Total Return, JPY), which measures the performance of the small-capitalisation segment of the Japanese market.</p> <p>Shareholders in a Class which is denominated in a currency other than the Base Currency should note that, where available, it may be more meaningful to compare the performance of such Class against a version of this index which is denominated in the relevant Class currency.</p>
Base Currency	Japanese Yen (JPY).
Instruments / Asset Classes	<p>The Portfolio can invest in or be exposed to the following types of assets, which will be listed or traded on Recognised Markets globally or, if unlisted, will comply with the Central Bank requirements for such investments.</p> <p>Equity and Equity-linked Securities. These securities may include, without limitation, common stock, preferred stock, convertible bonds, convertible preferred stock and American, European and Global Depository Receipts, which are securities issued by a financial institution which evidence ownership interests in a security or a pool of securities deposited with the financial institution.</p> <p>Equity Real Estate Investment Trusts ("REITs"). REITs are companies or trusts that pool investor money and invest mainly in income producing real estate, although it should be noted that the Portfolio will not acquire any real estate directly. REITs may invest in a diverse range of real estate properties or may specialise in a particular type of property. The REITs which the Portfolio will invest in may be based globally but will give exposure to underlying properties located in Japan. They will invest the majority of their assets directly in real property and derive their income from rents and capital gains from appreciation realised through property sales.</p> <p>Financial Derivative Instruments ("FDIs"). Subject to the conditions and limits imposed by the Central Bank as set out in the Prospectus and in this Supplement, the Portfolio may use FDI for hedging, efficient portfolio management and/or investment purposes and subject to the conditions and limits imposed by the Central Bank as set out in this Supplement:</p> <ul style="list-style-type: none"> • Convertible bonds and convertible preferred stock. Convertible bonds enable the holder to convert their investment in the bonds into the issuer's common stock at a pre-agreed price and convertible preferred stock enable the holder to convert their investment in the preferred stock into the issuer's common stock at a pre-agreed rate; • Forward currency contracts may be used for efficient portfolio management and to hedge existing long currency exposures; • Equity warrants and equity rights may be used for investment and efficient portfolio management purposes, including to hedge or to achieve exposure to a particular security;

- Options on equity securities may be used to hedge existing long positions or to achieve profit; and
- Futures contracts based on securities of the types described above and UCITS eligible equity indices, may be used to achieve a profit as well as to hedge existing positions.

As the Portfolio may purchase FDI generally using only a fraction of the assets that would be needed to purchase the relevant securities directly, the remainder of the assets allocated to the Portfolio may be invested in the other types of securities listed above. The Sub-Investment Manager may therefore seek to achieve greater returns by purchasing derivative instruments and investing the remaining assets in such other securities as listed above to achieve a rate of return greater than the market. The indices utilised for hedging or efficient portfolio management purposes will be broad-based, UCITS-eligible indices which provide exposure to the performance of equities and details of such indices pertaining to the instruments utilised by the Portfolio will be contained in the annual report of the Company.

Collective Investment Schemes. The Portfolio may invest in collective investment schemes (including ETFs which are structured as collective investment schemes) which are themselves exposed to investments that are similar to the Portfolio's other investments, provided that the Portfolio may not invest more than 10% of its Net Asset Value in other collective investment schemes which themselves invest in other collective investment schemes. Such collective investment schemes may or may not be managed by the Manager and the Sub-Investment Manager or their affiliates and will comply with the requirements of the UCITS Regulations in respect of such investments.

The other collective investment schemes in which the Portfolio may invest will be eligible collective investment schemes in accordance with the Central Bank's rules, which may be domiciled in Relevant Jurisdictions, will qualify as UCITS or AIF schemes and will be regulated as such by their home state regulator.

Collective investment schemes in which the Portfolio invests may be leveraged but such collective investment schemes will not generally be leveraged: (i) in excess of 200% of their net asset value; (ii) so that their 1 day absolute value-at-risk exceeds 4.47% of their net asset value over a 250 day horizon with a 99% confidence level; or (iii) so that their 1 month relative value-at-risk exceeds twice the value-at-risk of a comparable benchmark portfolio over a 250 day horizon with a 99% confidence level, depending on how such collective investment funds measure their global exposure.

ETFs. ETFs are investment companies whose shares are bought and sold on a securities exchange. ETFs invest in a portfolio of securities designed to track a particular market segment or index, in this case Japanese equities. The ETFs will be located in Relevant Jurisdictions and will be authorised under the UCITS Directive or will be non-UCITS which are eligible for investment by the Portfolio in accordance with the requirements of the Central Bank. The ETFs will represent investments that are similar to the Portfolio's other investments. The ETFs will operate on the principle of risk spreading and will not be leveraged.

Money Market Instruments. The Portfolio may invest in money market instruments, which may include bank deposits, fixed or floating rate instruments (including commercial paper), floating or variable rate notes, bankers acceptances, certificates of deposit, debentures and short-dated government or corporate bonds, cash and cash equivalents (including treasury bills), or money market funds which meet the criteria set out under "Collective Investment Schemes" above, in each case that are rated as investment grade or below by Recognised Rating Agencies or are unrated.

Investment grade securities are highly rated securities, generally those rated Baa3, BBB- or above by one or more Recognised Rating Agencies, while high yield securities are medium or lower rated securities, generally those rated below investment grade and sometimes referred to as "junk bonds".

Repo Contracts and Securities Lending Agreements. The Portfolio may use Repo Contracts and Securities Lending Agreements subject to the conditions and limits set

out in the Prospectus.

Investment Restrictions

- The Portfolio may expose up to 10% of its Net Asset Value in aggregate to the performance of other collective investment schemes which will comply with both the “*Investment Restrictions*” section of the Prospectus and the UCITS Regulations.
- The Portfolio's over or underweight exposure to a particular Global Industry Classification (GICS) economic sector, relative to the Benchmark, may not exceed 20%.
- The Portfolio will not utilise total return swaps or margin lending.

Risk

- Investment in the Portfolio carries certain risks which are described in greater detail in the “*Investment Risks*” section of the Prospectus. While investors should read and consider the entire “*Investment Risks*” section of the Prospectus, the risks summarised in the following section, namely, “*Market Risks: Risks relating to Concentration Risk*” are particularly relevant to this Portfolio. **These risks are not purported to be exhaustive and potential investors should review this Supplement and the Prospectus in their entirety and consult with their professional advisers, before making an application for Shares.**
- Investors should refer to the Company's risk management policy with respect to the use of FDI contained in the RMP Statement.
- The Portfolio may have or may be expected to have medium to high volatility due to its investment policies or portfolio management techniques.
- The Portfolio may be leveraged as a result of its investments in FDI but such leverage will not exceed 100% of the Portfolio's Net Asset Value, as measured using the Commitment Approach, at any time.

Environmental, Social and Governance (“ESG”)

This Portfolio meets the classification of an Article 8 Portfolio as it promotes environmental and social characteristics and limits investments to companies that follow good governance practices.

ESG risks and opportunities are systematically considered in the selection of securities to be constituents of the Portfolio. The Manager and the Sub-Investment Manager assess securities in relation to their exposure to and the management of ESG risks. ESG represents governance, (being the way in which the company is run), environmental issues, (such as the impact on natural resources), and social issues (such as human rights).

Please also refer to Annex VI of the Prospectus which contains additional information on the ESG characteristics that are applicable to this Portfolio.

Typical Investor Profile

The Portfolio may be suitable for investors seeking capital appreciation opportunities through equity investments in smaller Japanese companies. Investors need to be comfortable with the risks associated with the Portfolio, in particular risks of investing in small-capitalisation companies and be prepared to accept periods of market volatility particularly over short time periods. Investors are likely to hold the Portfolio as a complement to a diversified portfolio and should have a long-term investment horizon.

Fees and Expenses

Distribution Policy

Under normal circumstances, the Directors intend that dividends in respect of:

- each of the (Monthly) Distributing Classes in the Portfolios shall be declared on or prior to the last Business Day of each month and paid within three Business Days thereafter; and
- each of the other Distributing Classes in the Portfolios shall be declared on a quarterly basis and will be paid within 30 Business Days.

Subscriptions and Redemptions

Subscriptions for Shares in all Classes in each Portfolio which have not already launched at the date of this Supplement will be considered during the Initial Offer Period, upon receipt by the Administrator of completed share applications and subscription monies as specified in the “*Subscriptions*” section of the Prospectus. Such Shares will be issued at the Initial Offer Price on the last day of the Initial Offer Period.

The Initial Offer Period shall run from 9.00 am on 24 December 2021 to 5.00 pm on 24 June 2022 or such earlier or later time as the Directors may determine at their discretion and notify to the Central Bank and to subscribers.

The Initial Offer Price for each of the share classes shall be as follows:

AUD Classes: AUD 10
BRL Classes: BRL 20
CAD Classes: CAD 10
CHF Classes: CHF 10

CLP Classes: CLP 5,000
CNY Classes: CNY 100
DKK Classes: DKK 50
EUR Classes: EUR 10

GBP Classes: GBP 10
HKD Classes: HKD 10
ILS Classes: ILS 30
JPY Classes: JPY 1,000

NOK Classes: NOK 100
NZD Classes: NZD 10

SEK Classes: SEK 100
SGD Classes: SGD 20

USD Classes: USD 10
ZAR Classes: ZAR 100

Thereafter and, in the case of Classes which have already launched, from the date of this Supplement, Shares will be issued at their Net Asset Value per Share, subject to the provision for Duties and Charges in respect of the issue of the Shares and rounding as provided for in the Articles on each Dealing Day.

The Company reserves the right to apply to Euronext Dublin to have the Shares in each of the Classes admitted to the Official List and to trading on the regulated market of Euronext Dublin.

The Company may, in its sole discretion, reject any subscription in whole or in part without reason.

As stated in the “*Subscriptions and Redemptions*” section of the Prospectus, redemption proceeds in respect of the Portfolios will be paid within ten (10) Business Days of the relevant Dealing Day unless payment has been suspended in the circumstances described in the “*Temporary Suspension of Dealings*” section of the Prospectus, although the Company will seek to make such payments within a shorter period of time where possible (up to and including within three (3) Business Days of the relevant Dealing Day).

Neuberger Berman US Real Estate Securities Fund

The Portfolio will not use FDI extensively or primarily for investment purposes.

Investment Objective	Seek total return through investment in real estate securities, emphasising both capital appreciation and current income.
-----------------------------	---

Investment Approach	The Portfolio seeks to achieve its investment objective by investing in a concentrated portfolio principally in securities (including convertible bonds) issued by real estate investment trusts ("REITs"). It should be noted that the Portfolio will not acquire any real estate directly.
----------------------------	--

REITs are listed and traded regularly on major stock markets in the US, including the New York Stock Exchange. REITs are companies or trusts that pool investor money and invest mainly in income producing real estate. REITs may invest in a diverse range of real estate properties or may specialise in a particular type of property, for example, office and industrial properties, shopping centres etc.

The Portfolio may at times emphasise particular sub-sectors of the real estate business (for example, apartments, regional malls, offices, infrastructure, industrial, and health care).

The Sub-Investment Manager seeks to select securities through a fundamental analysis of each REIT, using proprietary analytical tools. The Sub-Investment Manager reviews each REIT's current financial condition and industry position, as well as economic and market conditions. In doing so, they evaluate the REIT's growth potential, earnings estimates and quality of management, as well as other factors.

The Sub-Investment Manager typically seeks to make long-term investments, however it may sell securities regardless of how long they have been held for, if the Sub-Investment Manager finds an opportunity which it believes is more compelling; if the Sub-Investment Manager's outlook on a REIT or the market changes; if a stock reaches a target price; if a REIT's business fails to perform as expected; or when other opportunities appear more attractive to the Sub-Investment Manager.

The Portfolio may invest in companies of any market capitalisation but shall typically invest in REITs that have market capitalisation greater than USD \$300m at the time of purchase.

The Portfolio will invest at least 80% of its Net Asset Value in REITs and other REIT-like entities at all times. "REIT-like entities" are those with similar characteristics to REITs but which generally do not pay dividends to investors and therefore are not eligible to be classified as REITs for US taxation purposes. The remaining 20% of the Portfolio's Net Asset Value may be invested in debt securities.

Some of the REITs and other real estate securities in which the Fund invests may be preferred stock, which receives preference in the payment of dividends.

The Portfolio may invest up to 15% of its Net Asset Value in REITS and debt securities which are deemed to be illiquid. Illiquid securities are securities that cannot be expected to be sold within seven (7) days in the ordinary course of business for approximately the amount at which the Portfolio has valued the securities. These may include unlisted or other restricted securities, namely privately placed securities which qualify under Rule 144A of the Securities Exchange Commission rules or Regulation S Securities, which at all times will be in accordance with the requirements of the Central Bank.

The Portfolio is actively managed and does not intend to track the Benchmark and is not constrained by it. The Benchmark is included here for performance comparison purposes only. The Portfolio gives some consideration to the Benchmark constituents in the selection of securities and may not hold all or many of the Benchmark's components.

Benchmark	<p>The FTSE NAREIT All Equity REITs Index (Total Return, Net of tax, USD) which is an index of publicly traded REITs that own commercial property.</p> <p>Shareholders in a Class which is denominated in a currency other than the Base Currency should note that, where available, it may be more meaningful to compare the performance of such Class against a version of this index which is denominated in the relevant Class currency.</p>
Base Currency	US Dollars (USD).
Instruments / Asset Classes	<p>The Portfolio will primarily invest in REITs. The Portfolio can invest in or be exposed to the following types of assets.</p> <p>Real Estate Investment Trusts (“REITs”). REITs are companies or trusts that pool investor money and invest mainly in income producing real estate. REITs may invest in a diverse range of real estate properties or may specialise in a particular type of property. They will invest the majority of their assets directly in real property and derive their income from rents and capital gains from appreciation realised through property sales. The REITs which the Portfolio will invest in are as follows:</p> <ul style="list-style-type: none"> • Equity REITs, which invest the majority of their assets directly in real property and derive their income from rents, and capital gains from appreciation realised through property sales; • Mortgage REITs, which invest the majority of their assets in real estate mortgages and derive their income mainly from interest payments; and • Hybrid REITs, which combine the characteristics of both equity and mortgage REITs. <p>Equity and Equity-linked Securities. These securities may include, without limitation, common stock, preferred stock, convertible bonds, convertible preferred stock and American, European and Global Depository Receipts, which are securities issued by a financial institution which evidence ownership interests in a security or a pool of securities deposited with the financial institution. Many of these securities may be issued by other real estate companies, which invest the majority of their assets directly in real property and derive their income from rents, and capital gains from appreciation realised through property sales. Common stocks issued by other real estate companies have similar characteristics to REITs but are not required to pay dividends to investors and therefore are not eligible to be classified as REITs for US and international taxation purposes.</p> <p>Fixed Income Securities (Debt securities). These securities may include both fixed and floating rate debt securities, including bonds and debentures issued by US private and government issuers (including any political subdivisions, agencies or instrumentalities of the US Government). Debt securities can be fixed or floating rate and either investment grade or below investment grade, provided that, at the time of purchase, they are rated at least B by a Recognised Rating Agency or, if unrated by any of these, deemed by the Sub-Investment Manager to be of comparable quality.</p> <p>Investment grade securities are securities which are rated in one of the four highest rating categories by a Recognised Rating Agency (without regard to incremental gradations) or determined to be of similar creditworthiness by the Sub-Investment Manager. The Portfolio may continue to hold such securities that are downgraded to below investment grade after purchase. In addition, where the Sub-Investment Manager perceives there to be added value, the Portfolio may invest in securities which are rated below investment grade or are unrated.</p> <p>Money Market Instruments. These securities may include bank deposits, fixed or floating rate instruments (including commercial paper), floating or variable rate notes, bankers acceptances, certificates of deposit, debentures and short-dated government or corporate bonds, cash and cash equivalents (including treasury bills) that are rated as investment grade or below by Recognised Rating Agencies or are unrated.</p> <p>Repo Contracts and Securities Lending Agreements. Repo Contracts and Securities Lending Agreements may be used subject to the conditions and limits set out in the Prospectus.</p>

Investment Restrictions

- The Portfolio can invest up to a total of 10% of assets in mortgage REITs and hybrid REITs.
- No more than 20% of the Portfolio can be invested in securities rated below investment grade by Recognised Rating Agencies or in securities, which subsequent to their purchase, are downgraded to below investment grade.
- The Portfolio may invest a proportion of its assets in REITs and debt securities which are not listed or traded on Recognised Markets, subject to the limits contained in UCITS Regulations and set out in the Prospectus.
- The Portfolio may invest up to 10% of its net assets in securities that are issued or guaranteed by a single sovereign issuer that are below investment grade.
- The Portfolio will not utilise total return swaps or margin lending.

Risk

- Investment in the Portfolio carries certain risks which are described in greater detail in the “*Investment Risks*” section of the Prospectus. While investors should read and consider the entire “*Investment Risks*” section of the Prospectus, the “*REITS*” risk, which is contained within the “*Market Risks*” section, is particularly relevant to this Portfolio. **These risks are not purported to be exhaustive and potential investors should review this Supplement and the Prospectus in their entirety and consult with their professional advisers, before making an application for Shares.**
- Investors should refer to the Company’s risk management policy with respect to the use of FDI contained in the RMP Statement.
- The Portfolio may be leveraged as a result of its investments in FDI but such leverage will not exceed 100% of the Portfolio’s Net Asset Value, as measured using the Commitment Approach, at any time.
- When the Sub-Investment Manager anticipates adverse market, economic, political or other conditions, it may temporarily depart from the Portfolio’s investment objective and invest substantially in high-quality, short-term investments.
- Illiquid securities may be difficult for the Portfolio to value or dispose of due to the absence of an active trading market, and consequently may have an adverse impact on the investment performance of the Portfolio.
- Investors should refer to the “*Investment Risks*” section of the Prospectus for further information on the characteristics of REITs.
- The Sub-Investment Manager will use forward currency contracts in order to hedge currency risk.
- The Portfolio may have or may be expected to have medium to high volatility due to its investment policies or portfolio management techniques.

Environmental, Social and Governance (“ESG”)

This Portfolio meets the classification of an Article 8 Portfolio as it promotes environmental and social characteristics and limits investments to companies that follow good governance practices.

ESG risks and opportunities are systematically considered in the selection of securities to be constituents of the Portfolio as part of an ESG integration process. ESG represents governance, (being the way in which the company is run), environmental issues, (such as the impact on natural resources), and social issues (such as human rights) and regard will be had to risks and opportunities which may arise from these factors. Governance issues that may create risks can include a low proportion of independent directors or staggered elections to the board of directors of a REIT, external management structures and business relationships with other entities owned by the management of a REIT, while opportunities may be created by compensation policies that link senior management compensation to long term investor returns and proxy access for investor proposals. Environmental issues that create risks can include risks to REITs caused by climate change and reputational risks associated with REITs which display poor environmental policies, while opportunities may be created by energy management, reducing greenhouse gas emissions and waste management. Social issues that may create risks can include the physical safety of tenants of a REIT from natural disasters and fires and the introduction of local regulation of rental rates and evictions within the residential real estate sectors, while opportunities may be created when a REIT effectively partners with and supports local communities or demonstrates strong employee retention or a diverse management team or board. The Sub-Investment Manager assesses securities in relation to their exposure to and the management of ESG risks and opportunities.

As part of this analysis, the Sub-Investment Manager utilises a broad range of sources

combining company-reported and third-party research to manage the ESG performance of the Portfolio. In conjunction with its research department and ESG team, the Sub-Investment Manager assigns proprietary ESG ratings to each issuer in the investable universe of the Portfolio. The ESG scores are integrated into its valuation model and influence the rankings of the issuers and thereby the securities included in the investment portfolio of the Portfolio. The Sub-Investment Manager also maintains a consistent engagement with issuers in the investment portfolio to assist management teams in improving their ESG practices and reporting of material ESG factors.

Please also refer to Annex VI of the Prospectus which contains additional information on the ESG characteristics that are applicable to this Portfolio.

Typical Investor Profile

The Portfolio may be suitable for investors seeking capital appreciation over the long-term with current income, through investing on a diversified basis primarily in securities (including convertible bonds) issued by US real estate investment trusts and should be prepared to accept a higher level of such volatility.

Fees and Expenses

Category	Maximum Initial Charge	Maximum Management fee	Distribution Fee
A, X, Y	5.00%	1.50%	0.00%

C2	2%	1%	0%	0%	0%
E	3%	2%	1%	0%	0%

Other important information for investors in Hong Kong

As the Portfolio has been authorised for public offer in Hong Kong, the Hong Kong Securities and Futures Commission (“HKSF”) requires the Company to classify the Portfolio on the basis of its expected maximum net derivative exposure (“NDE”). The HKSF requires the NDE to be calculated in accordance with the HKSF’s Code on Unit Trusts and Mutual Funds and the requirements and guidance issued by the HKSF, which may be updated from time to time. This requires the Company to convert all FDI acquired for investment purposes that would generate incremental leverage at the portfolio level of the Portfolio into their equivalent positions in the underlying assets. Applying these requirements, the Portfolio’s NDE is expected to be less than 50% but the actual level may be higher than the expected level in exceptional circumstances, for example when there are sudden movements in markets and/or investment prices.

For the avoidance of doubt, complying with the HKSFCA's requirements to classify the Portfolio on the basis of its NDE does not amend the investment objectives or policies or otherwise impact the management of the Portfolio or its use of FDI, as the requirements are solely to measure the Portfolio's expected use of FDI, as described above, using the HKSFCA's methodology and disclose the results.

Neuberger Berman Global Real Estate Securities Fund

An investment in the Portfolio should not constitute a substantial proportion of an investment portfolio and may not be appropriate for all investors. The Portfolio will not use FDI extensively or primarily for investment purposes.

Investment Objective	The Portfolio seeks total return through investment in securities of real estate companies located globally, emphasizing both capital appreciation and current income.
-----------------------------	--

Investment Approach	<p>The Portfolio seeks to achieve its investment objective by investing at least 80% of its net assets in US and non-US equity securities issued by real estate investment trusts ("REITs") and common stocks and other securities issued by other real estate companies. A REIT is an entity dedicated to owning, and usually operating, income-producing real estate, or to financing real estate. The Portfolio defines a real estate entity as one that derives at least 50% of its revenue from, or has at least 50% of its assets in, real estate. It should be noted that the Portfolio will not acquire any real estate directly.</p>
----------------------------	---

Under normal market conditions, the Portfolio will invest a minimum of 40% of its Net Asset Value in REITs and real estate companies organized or located outside the US or doing a substantial amount of business outside the US. Where the Sub-investment Manager deems market conditions unfavourable, the Portfolio will invest at least 30% of its Net Asset Value in REITs and real estate companies organized or located outside the United States or doing a substantial amount of business outside the United States. The Sub-investment Manager considers a company that derives at least 50% of its revenue from business outside the United States or has at least 50% of its assets outside the United States as doing a substantial amount of business outside the United States.

The Portfolio will allocate its assets among various regions and countries, including the United States but will at all times invest in a minimum of three different countries.

The Sub-Investment Manager seeks to select securities through a fundamental analysis of each company, using proprietary analytical tools. The Sub-Investment Manager reviews each company's current financial condition and industry position, as well as economic and market conditions. In doing so, they evaluate the company's growth potential, earnings estimates and quality of management, as well as other factors.

The Sub-Investment Manager typically seeks to make long-term investments, however it may sell securities regardless of how long they have been held for, if the Sub-Investment Manager finds an opportunity which it believes is more compelling; if the Sub-Investment Manager's outlook on a REIT or the market changes; if a stock reaches a target price; if a REIT's business fails to perform as expected; or when other opportunities appear more attractive to the Sub-Investment Manager. The Portfolio may invest up to 20% of its Net Asset Value in real estate equity securities issued by companies domiciled in emerging market countries.

The Portfolio may invest up to 20% of its Net Asset Value in debt securities of real estate companies.

The Portfolio may invest up to 15% of its assets in REITS and debt securities which are deemed to be illiquid. Illiquid securities are securities that cannot be expected to be sold within seven (7) days in the ordinary course of business for approximately the amount at which the Portfolio has valued the securities. These may include unlisted or other restricted securities, namely privately placed securities which qualify under Rule 144A of the Securities Exchange Commission rules or Regulation S Securities, which at all times will be in accordance with the requirements of the Central Bank

Under normal market conditions, the Sub-Investment Manager anticipates that the Portfolio's:

- Regional exposures will on average be between 50%-150% relative to the Benchmark's weighting; and
- For countries with the Benchmark's weightings below 5%, weightings can be +/- 5%

relative to the Benchmark's weighting. Property sector exposures will on average be between 50%-150% relative to the Benchmark's weighting.

The Portfolio is actively managed and does not intend to track the Benchmark which is included here for performance comparison purposes and because the Portfolio's investment policy restricts the extent to which the Portfolio's holdings may deviate from the Benchmark, as described above. This deviation may be significant.

Benchmark	<p>The FTSE EPRA/NAREIT Developed Real Estate Index (Total Return, Net of Tax, USD), which is an index designed to track the performance of listed real estate companies and REITS worldwide.</p> <p>Shareholders in a Class which is denominated in a currency other than the Base Currency should note that, where available, it may be more meaningful to compare the performance of such Class against a version of this index which is denominated in the relevant Class currency.</p>
Base Currency	US Dollars (USD).
Instruments / Asset Classes	<p>The Portfolio will primarily invest in REITs. The Portfolio can invest in or be exposed to the following types of assets.</p> <p>Real Estate Investment Trusts ("REITs"). REITs are companies or trusts that pool investor money and invest mainly in income producing real estate. REITs may invest in a diverse range of real estate properties or may specialise in a particular type of property. They will invest the majority of their assets directly in real property and derive their income from rents and capital gains from appreciation realised through property sales. The REITs which the Portfolio will invest in are as follows:</p> <ul style="list-style-type: none"> • Equity REITs, which invest the majority of their assets directly in real property and derive their income from rents, and capital gains from appreciation realised through property sales; • Mortgage REITs, which invest the majority of their assets in real estate mortgages and derive their income mainly from interest payments; and • Hybrid REITs, which combine the characteristics of both equity and mortgage REITs. <p>Equity and Equity-linked Securities. These securities may include, without limitation, common stock, preferred stock, convertible bonds, convertible preferred stock and American, European and Global Depository Receipts, which are securities issued by a financial institution which evidence ownership interests in a security or a pool of securities deposited with the financial institution. Many of these securities may be issued by other real estate companies, which invest the majority of their assets directly in real property and derive their income from rents, and capital gains from appreciation realised through property sales. Common stocks issued by other real estate companies have similar characteristics to REITs but are not required to pay dividends to investors and therefore are not eligible to be classified as REITs for US and international taxation purposes.</p> <p>Fixed Income Securities (Debt securities). These securities may include both fixed and floating rate debt securities, including bonds and debentures issued by US private and government issuers (including any political subdivisions, agencies or instrumentalities of the US Government). Debt securities can be fixed or floating rate and either investment grade or below investment grade, provided that, at the time of purchase, they are rated at least B by a Recognised Rating Agency or, if unrated by any of these, deemed by the Sub-Investment Manager to be of comparable quality.</p> <p>Investment grade securities are highly rated securities, generally those rated Baa3, BBB- or above by one or more Recognised Rating Agencies, while high yield securities are medium or lower rated securities, generally those rated below investment grade and sometimes referred to as "junk bonds". The Portfolio may continue to hold investment grade securities that are downgraded to below investment grade after purchase.</p> <p>Money Market Instruments. These securities may include bank deposits, fixed or floating rate instruments (including commercial paper), floating or variable rate notes, bankers</p>

acceptances, certificates of deposit, debentures and short-dated government or corporate bonds, cash and cash equivalents (including treasury bills) that are rated as investment grade or below by Recognised Rating Agencies or are unrated.

Repo Contracts and Securities Lending Agreements. Repo Contracts and Securities Lending Agreements may be used subject to the conditions and limits set out in the Prospectus.

Stock Connects

The China Securities Regulatory Commission and the Securities and Futures Commission of Hong Kong have approved programs which establish mutual stock markets access between the PRC and Hong Kong, namely the Stock Connects. The Sub-Investment Manager may pursue the Portfolio's investment objective by investing up to 10% of the Portfolio's Net Asset Value directly in certain eligible China A Shares via the Stock Connects.

The Shanghai Stock Connect is a securities trading and clearing linked program developed by the SEHK, the SSE and ChinaClear, with the aim of achieving mutual stock market access between the SEHK and the SSE. The Shenzhen Stock Connect is a securities trading and clearing linked program developed by the SEHK, the SZSE and ChinaClear, with the aim of achieving mutual stock market access between the SEHK and the SZSE.

Each of the Shanghai Stock Connect and Shenzhen Stock Connect comprise a Northbound Trading Link and a Southbound Trading Link. Under the Northbound Trading Link, Hong Kong and overseas investors (including the Portfolio), through their Hong Kong brokers and a securities trading service company established by the SEHK, may trade eligible shares listed on the SSE and the SZSE by routing orders to the SSE and the SZSE respectively.

Eligible securities

Hong Kong and overseas investors will be able to trade certain SSE Securities. Eligible securities under the Northbound Trading Link of the Shanghai Stock Connect include all the constituent stocks from time to time of the SSE 180 Index and SSE 380 Index, and all the SSE-listed China A Shares that are not included as constituent stocks of the relevant indices but which have corresponding H-Shares listed on SEHK, except the following:

- SSE-listed shares which are not traded in CNY; and
- SSE-listed shares which are included in the "risk alert board".

Eligible securities under the Northbound Trading Link of the Shenzhen Stock Connect include any constituent stock of the SZSE Component Index and the SZSE Small/Mid Cap Innovation Index which has a market capitalisation of CNY6 billion or above and all SZSE-listed shares of companies which have issued both China A Shares and China H Shares. At the initial stage of the Northbound Trading Link of Shenzhen Stock Connect, trading shares that are listed on the ChiNext Board of SZSE under the Northbound Trading Link will be limited to institutional professional investors, as defined in the relevant Hong Kong rules and regulations.

It is expected that the list of eligible securities will be subject to review and may change from time to time.

If an eligible security ceases to be classified as such, Hong Kong and overseas investors (including the Portfolio) will only be allowed to sell holdings of such Security but will be restricted from buying any more of such Eligible Security.

Trading day

Investors (including the Portfolio) are only allowed to trade through the Stock Connects on days on which both markets (i.e. both the SEHK and the SSE for trading through Shanghai Stock Connect) are open for trading, and banking services are available in both markets on the corresponding settlement days.

Trading quota

Trading under the Stock Connects is subject to the Daily Quota. Northbound trading through each Stock Connect is subject to a separate set of Daily Quota. The Daily Quota limits the maximum net buy value of cross-boundary trades under each of the Stock Connect per day.

The Northbound Daily Quota for each Stock Connect is currently set at CNY52 billion.

The SEHK will monitor the quota and publish the remaining balance of the Northbound Daily Quota at scheduled times on the SEHK's website. The Daily Quota may change from time to time without prior notice and investors should refer to the SEHK's website and other information published by the SEHK for up-to-date information.

Settlement and Custody

The HKSCC will be responsible for the clearing, settlement and the provision of depository, nominee and other related services of the trades executed by Hong Kong market participants and investors.

The China A Shares traded through the Stock Connects are issued in scripless form, so investors do not hold any physical China A Shares. Hong Kong and overseas investors who have acquired Eligible Securities through Northbound trading should maintain the Eligible Securities with their brokers' or custodians' stock accounts with CCASS.

Corporate actions and shareholders' meetings

Notwithstanding the fact that the HKSCC does not claim proprietary interests in the Eligible Securities held in its omnibus stock account in ChinaClear, ChinaClear as the share registrar for SSE and SZSE-listed companies will still treat HKSCC as one of the shareholders when it handles corporate actions in respect of such Eligible Securities.

HKSCC monitors the corporate actions affecting Eligible Securities and keeps the relevant brokers or custodians participating in CCASS ("CCASS participants") informed of all such corporate actions that require CCASS participants to take steps in order to participate in them.

SSE and SZSE-listed companies usually announce their annual general meeting / extraordinary general meeting information about one month before the meeting date. A poll is called on all resolutions for all votes. HKSCC will advise CCASS participants of all general meeting details such as meeting date, time, venue and the number of resolutions.

Foreign shareholding restrictions

The CSRC stipulates that, when holding China A Shares through the Stock Connects, Hong Kong and overseas investors are subject to the following shareholding restrictions:

- Single foreign investors' shareholding by any Hong Kong or overseas investor in a China A Share must not exceed 10% of the total issued shares; and
- Aggregate foreign investors' shareholding by all Hong Kong and overseas investors in a China A Share must not exceed 30% of the total issue shares.

Should the shareholding of a single investor in a China A Share listed company exceed the above restriction, the investor would be required to unwind his position on the excessive shareholding according to a last-in-first-out basis within a specific period. The SSE, the SZSE and the SEHK will issue warnings or restrict the buy orders for the related China A Shares if the percentage of total shareholding is approaching the upper limit.

Currency

Hong Kong and overseas investors will trade and settle Eligible Securities in CNY only. Hence, the Portfolio will need to use CNY to trade and settle Eligible Securities.

Further information about the Stock Connects is available online at the website:

<http://www.hkex.com.hk/Mutual-Market/Stock-Connect>

Investment Restrictions

- The Portfolio can invest up to a total of 10% of Net Asset Value in mortgage REITs and hybrid REITs.
- The Portfolio may invest in China A Shares up to 10% of its Net Asset Value. The Portfolio may invest directly in the China A Share market through the Stock Connects as described above and indirectly, mainly through investments in equity linked products issued by QFIs and through transferable securities which may be issued by entities which are managed by affiliates of the Sub-Investment Manager.
- The Portfolio will invest at least 80% of its Net Asset Value in REITs and common stocks

issued by other real estate companies at all times.

- Up to 20% of Net Asset Value may be invested in real estate equity securities issued by companies domiciled in emerging market countries.
- Up to 20% of Net Asset Value may be invested in debt securities of real estate companies.
- No more than 20% of the Portfolio's Net Asset Value can be invested in securities rated below investment grade by Recognised Rating Agencies or in securities, which subsequent to their purchase, are downgraded to below investment grade.
- The Portfolio may invest a proportion of its assets in REITs, securities issued by REITs and debt securities which are not listed or traded on Recognised Markets, subject to the limits contained in UCITS Regulations and set out in the Prospectus.
- The Portfolio may invest up to 10% of its Net Asset Value in securities that are issued or guaranteed by a single sovereign issuer that are below investment grade.
- The Portfolio will not utilise total return swaps or margin lending.

Risk

- Investment in the Portfolio carries certain risks which are described in greater detail in the "*Investment Risks*" section of the Prospectus. While investors should read and consider the entire "*Investment Risks*" section of the Prospectus, the "*REITS*" risk, which is contained within the "*Market Risks*" section, is particularly relevant to this Portfolio. **These risks are not purported to be exhaustive and potential investors should review this Supplement and the Prospectus in their entirety and consult with their professional advisers, before making an application for Shares.**
- Investors should refer to the Company's risk management policy with respect to the use of FDI contained in the RMP Statement.
- The Portfolio may be leveraged as a result of its investments in FDI but such leverage will not exceed 100% of the Portfolio's Net Asset Value, as measured using the Commitment Approach, at any time.
- When the Sub-Investment Manager anticipates extreme adverse market, economic, political or other conditions, it may temporarily depart from the Portfolio's investment objective and invest substantially in high-quality, short-term investments.
- Illiquid securities may be difficult for the Portfolio to value or dispose of due to the absence of an active trading market and consequently may have an adverse impact on the investment performance of the Portfolio.
- The Sub-Investment Manager may use forward currency contracts in order to hedge currency risk.
- The Portfolio may have or may be expected to have medium to high volatility due to its investment policies or portfolio management techniques.

Environmental, Social and Governance ("ESG")

This Portfolio meets the classification of an Article 8 Portfolio as it promotes environmental and social characteristics and limits investments to companies that follow good governance practices.

ESG risks and opportunities are systematically considered in the selection of securities to be constituents of the Portfolio as part of an ESG integration process. ESG represents governance, (being the way in which the company is run), environmental issues, (such as the impact on natural resources), and social issues (such as human rights) and regard will be had to risks and opportunities which may arise from these factors. Governance issues that may create risks can include a low proportion of independent directors or staggered elections to the board of directors of a REIT, external management structures and business relationships with other entities owned by the management of a REIT, while opportunities may be created by compensation policies that link senior management compensation to long term investor returns and proxy access for investor proposals. Environmental issues that create risks can include risks to REITs caused by climate change and reputational risks associated with REITs which display poor environmental policies, while opportunities may be created by energy management, reducing greenhouse gas emissions and waste management. Social issues that may create risks can include the physical safety of tenants of a REIT from natural disasters and fires and the introduction of local regulation of rental rates and evictions within the residential real estate sectors, while opportunities may be created when a REIT effectively partners with and supports local communities or demonstrates strong employee retention or a diverse management team or board. The Sub-Investment Manager assesses securities in relation to their exposure to and the management of ESG risks and opportunities.

As part of this analysis, the Sub-Investment Manager utilises a broad range of sources combining company-reported and third-party research to manage the ESG performance of the Portfolio. In conjunction with its research department and ESG team, the Sub-Investment Manager assigns proprietary ESG ratings to each issuer in the investable universe of the Portfolio. The ESG scores are integrated into its valuation model and influence the rankings of the issuers and thereby the securities included in the investment portfolio of the Portfolio. The Sub-Investment Manager also maintains a consistent engagement with issuers in the investment portfolio to assist management teams in improving their ESG practices and reporting of material ESG factors.

Please also refer to Annex VI of the Prospectus which contains additional information on the ESG characteristics that are applicable to this Portfolio.

Typical Investor Profile

The Portfolio may be suitable for investors seeking total return through investment in securities of real estate companies located globally, emphasising both capital appreciation and current income. Investors should be prepared to accept additional risks associated with investing in Emerging Market Countries.

For details of the Administration Fees payable by the Portfolio, please see the “Administration Fees” heading in the “Fees and Expenses” section of the Prospectus.

Contingent deferred sales charges

Contingent deferred sales charges will be payable in respect of the following Classes at the rates specified below, depending on the period that has elapsed since the issue of the Shares being redeemed and will be charged on the lower of the Net Asset Value per Share on the relevant Dealing Day in respect of which the relevant Shares were (i) initially subscribed or (ii) redeemed. Any such contingent deferred sales charges will be paid to the relevant Distributor, the Manager or to the Sub-Investment Manager.

Class	Redemption Period in Calendar Days				
	< 365	365 - 729	730 - 1094	1095 – 1459	> 1459
B	4%	3%	2%	1%	0%
C, C1	1%	0%	0%	0%	0%
C2	2%	1%	0%	0%	0%
E	3%	2%	1%	0%	0%

The Directors of the Company whose names appear in the “*Management and Administration*” section of the Prospectus accept responsibility for the information contained in this document. To the best of the knowledge and belief of the Directors (who have taken all reasonable care to ensure that such is the case) the information contained in this document is in accordance with the facts and does not omit anything likely to affect the importance of such information. The Directors accept responsibility accordingly.

NEUBERGER BERMAN INVESTMENT FUNDS PLC

(An investment company with variable capital constituted as an umbrella fund with segregated liability between sub-funds under the laws of Ireland and authorised by the Central Bank of Ireland pursuant to the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations 2011, as amended)

LIQUID ALTERNATIVES SUPPLEMENT

23 DECEMBER 2021

This document forms part of, and should be read in the context of and together with, the prospectus dated 23 December 2021 as may be amended from time to time (the “Prospectus”) in relation to Neuberger Berman Investment Funds plc (the “Company”) and contains information relating to the following sub-funds, each of which is a separate portfolio of the Company:

NEUBERGER BERMAN US LONG SHORT EQUITY FUND

NEUBERGER BERMAN U.S. EQUITY INDEX PUTWRITE FUND

NEUBERGER BERMAN MACRO OPPORTUNITIES FX FUND

(the “Portfolios”)

Definitions

In this Supplement the following words and phrases shall have the meanings indicated below:

Business Day	with respect to: <ul style="list-style-type: none"> (a) the Neuberger Berman US Long Short Equity Fund and the Neuberger Berman U.S. Equity Index Putwrite Fund, a day (except Saturday or Sunday) on which the relevant financial markets in London and New York are open for business; and (b) the Neuberger Berman Macro Opportunities FX Fund, a day (except Saturday or Sunday) on which the relevant financial markets in London and Paris are open for business;
Dealing Day	each Business Day or such other day or days as the Directors may determine and notify to the Administrator and to Shareholders in advance, provided there shall be at least two (2) Dealing Days per month in each Portfolio;
Dealing Deadline	<ul style="list-style-type: none"> (a) 11:00 am (Irish time) on the relevant Dealing Day in respect of the Neuberger Berman Macro Opportunities FX Fund; and (b) 3.00 pm (Irish time) on the relevant Dealing Day in respect of each other Portfolio. <p>In exceptional circumstances a Director may authorise the acceptance of a subscription or redemption application, up to 4.30 pm (Irish time) on the relevant Dealing Day for each Portfolio.</p>
Net Asset Value Calculation Time	10.00 pm (Irish time) on the relevant Dealing Day in respect of each Portfolio or such other time as the Directors may determine in respect of a Portfolio;
Portfolios	the Neuberger Berman US Long Short Equity Fund, the Neuberger Berman U.S. Equity Index Putwrite Fund and the Neuberger Berman Macro Opportunities FX Fund; and
Sub-Investment Manager	Neuberger Berman Europe Limited and Neuberger Berman Investment Advisers LLC or such other company as may be appointed by the Manager from time to time in respect any particular Portfolio, with the prior approval of the Company and the Central Bank.

Investment Risks

Investment in the Portfolios carries certain risks, which are described in the “*Investment Risks*” section of the Prospectus and in the “Risk” section of the information specific to each Portfolio, as included in this Supplement. **These risks are not purported to be exhaustive and potential investors should review this Supplement and the Prospectus in their entirety and consult with their professional advisers, before making an application for Shares.**

There can be no assurance that the Portfolios will achieve their respective objectives. While there are some risks described below that may be common to a number or all of the Portfolios, there may also be specific risk considerations which apply only to particular Portfolios.

Distribution Policy

Under normal circumstances, the Directors intend that dividends in respect of:

- each of the (Monthly) Distributing Classes in the Portfolios shall be declared on or prior to the last Business Day of each month and paid within three Business Days thereafter;
- each of the other Distributing Classes in the Neuberger Berman U.S. Equity Index Putwrite Fund shall be declared on a quarterly basis and will be paid within 30 Business days thereafter;

- each of the other Distributing Classes in the Neuberger Berman US Long Short Equity Fund will be declared on a semi-annual basis and paid within 30 Business Days thereafter; and
- each of the other Distributing Classes in the other Portfolios shall be declared on an annual basis and paid within 30 Business Days thereafter in relation to the Net Income of the Distributing Classes for the calendar year ended the previous 31 December.

Subscriptions and Redemptions

Subscriptions for Shares in all Classes in each Portfolio which have not already launched at the date of this Supplement will be considered during the Initial Offer Period, upon receipt by the Administrator of completed share applications and subscription monies as specified in the “*Subscriptions*” section of the Prospectus. Such Shares will be issued at the Initial Offer Price on the last day of the Initial Offer Period.

The Initial Offer Period shall run from 9.00 am on 24 December to 5.00 pm on 24 June 2022 or such earlier or later time as the Directors may determine at their discretion and notify to the Central Bank and to subscribers.

The Initial Offer Price for each of the Classes shall be as follows:

AUD Classes: AUD 10	DKK Classes: DKK 50	NOK Classes: NOK 100
BRL Classes: BRL 20	EUR Classes: EUR 10	NZD Classes: NZD 10
CAD Classes: CAD 10	GBP Classes: GBP 10	SEK Classes: SEK 100
CHF Classes: CHF 10	HKD Classes: HKD 10	SGD Classes: SGD 20
CLP Classes: CLP 5,000	ILS Classes: ILS 30	USD Classes: USD 10
CNY Classes: CNY 100	JPY Classes: JPY 1,000	ZAR Classes: ZAR 100

Thereafter and, in the case of Classes which have already launched, from the date of this Supplement, Shares will be issued at their Net Asset Value per Share, subject to the provision for Duties and Charges in respect of the issue of the Shares and rounding as provided for in the Articles on each Dealing Day.

The Company reserves the right to apply to Euronext Dublin to have the Shares in each of the Classes admitted to the Official List and to trading on the regulated market of Euronext Dublin.

The Company may, in its sole discretion, reject any subscription in whole or in part without reason.

As stated in the “*Subscriptions and Redemptions*” section of the Prospectus, redemption proceeds in respect of the Portfolios will be paid within ten (10) Business Days of the relevant Dealing Day unless payment has been suspended in the circumstances described in the “*Temporary Suspension of Dealings*” section of the Prospectus, although the Company will seek to make such payments within a shorter period of time where possible (up to and including within three (3) Business Days of the relevant Dealing Day).

Neuberger Berman US Long Short Equity Fund

An investment in the Portfolio should not constitute a substantial proportion of an investment portfolio and may not be appropriate for all investors.

Investment Objective	Seek long term capital appreciation with a secondary objective of principal preservation.
-----------------------------	---

Investment Approach	<p>The Portfolio will seek to achieve its objective by taking long and synthetic short positions in equity and equity-linked securities listed or traded in US equity markets and in Exchange Traded Funds (“ETFs”), which are exposed to such securities. The Portfolio may also, but to a lesser extent take long and synthetic short positions in equity, equity-linked securities and ETFs which are listed or traded on Recognised Markets located in the countries comprising the MSCI ACWI (All Country World Index) (which may include Emerging Market Countries) and described in the “<i>Instruments/Asset Classes</i>” section.</p>
----------------------------	--

Equity securities in which the Portfolio invests generally include those of companies across all industrial sectors with a market capitalization of at least USD250 million, measured at the time the Portfolio first invests in them. The Portfolio may continue to hold or add to an existing position in a stock after the company’s market value has fallen below USD250 million.

The net market exposure (sum of long and synthetic short positions) of the Portfolio will typically be positive, meaning that long positions will generally be in greater proportion than synthetic short positions. However, the Portfolio’s net market exposure may vary in time and range from a maximum net long position of 150% to a maximum net short position of 20% of the Net Asset Value of the Portfolio, depending on the Sub-Investment Manager’s analysis of the prevailing market conditions and considered in light of the investment objective of the Portfolio.

With respect to any portion of the Portfolio invested in long equity positions, the Sub-Investment Manager generally intends to invest in companies which it believes to be undervalued and which possess one or more of the following characteristics: (i) companies with strong competitive positions in industries with attractive growth prospects; (ii) companies with the ability to generate sustainable cash flows which are growing at a modest rate over the long-term; (iii) companies whose market price is below the Sub-Investment Manager’s estimate of the company’s intrinsic value; and (iv) companies with the potential for a catalyst, such as a merger, liquidation, spin off, or management change. The Sub-Investment Manager’s estimate of a company’s intrinsic value represents the Sub-Investment Manager’s view of the company’s true, long-term economic value (the value of both its tangible and intangible assets), which may be currently distorted by market inefficiencies.

As noted above, the Portfolio can seek to achieve its objective by taking synthetic short positions. For these purposes, “synthetic” short positions are generally investments in FDI made by the Sub-Investment Manager to hedge risk or enhance returns in anticipation of a reference asset or security declining in value. The Portfolio’s synthetic short positions may include, among others: (i) synthetic short sales of ETFs representing macro-economically challenged markets, industries, countries or regions; (ii) synthetic short sales of the equity securities of companies that the Sub-Investment Manager expects to decline in price, lose economic value or generally underperform; or (iii) synthetically short positions designed to offset cyclical, currency, or country-specific risks, including, but not limited to, synthetic short positions in stock index futures and options on securities.

The Portfolio may take such positions by investments in FDI that include contracts for differences, options and other derivatives (see “*Instruments/Asset Classes*” below).

The Portfolio may also, but generally to a lesser extent, take long positions in fixed

income securities of US and non-US companies, including below investment grade securities (sometimes referred to as “junk bonds”), without any particular focus on any one industrial sector. The Portfolio does not generally take synthetic short positions in respect of fixed income securities; however, it may take synthetic short positions in ETFs which themselves invest in fixed income securities. In selecting fixed income securities, the Sub-Investment Manager generally looks for securities issued by companies that are believed to have strong management and compelling valuation. In doing so, the Sub-Investment Manager analyses such factors as: ability to generate free cash flow; a demonstrated commitment to use that cash flow to pay down existing debt; and an improving credit profile. As such, the Sub-Investment Manager focuses on securities issued by companies that it believes to have demonstrated improvements in their leverage and asset coverage ratios, are not unreasonably constrained by their existing financing arrangements and have debt with manageable payment schedules.

Although the Portfolio will concentrate its investments in securities issued by companies domiciled in or governments and government related entities of North America, without any particular focus on any one region or industrial sector, the Portfolio may also invest in securities of issuers located in Emerging Market Countries and/or below investment grade debt securities, which may involve additional risk, relative to investment in more developed economies and/or investment grade debt securities.

The Portfolio is actively managed and does not intend to track the Benchmarks and are not constrained by them. The Benchmarks are included here for performance comparison purposes only. It is not expected that the majority of the Portfolio's assets will be components of either of the Benchmarks. While the Portfolio may acquire securities which are components of the Benchmarks, it will not do so because of their inclusion in the Benchmarks.

Benchmarks

HFRX Equity Hedge Index (Total Return, USD) an index that is designed to be representative of equity hedge fund strategies which maintain positions both long and short in primarily equity and equity derivative securities. Equity Hedge managers would typically maintain at least 50%, and may in some cases be substantially entirely invested in equities, both long and short.

The S&P 500 Index (Total Return, Net of tax, USD) which is a capitalisation weighted index of 500 stocks designed to measure performance of the broad economy of the US through changes in the aggregate market value of 500 stocks representing all major industries.

Shareholders in a Class which is denominated in a currency other than the Base Currency should note that, where available, it may be more meaningful to compare the performance of such Class against a version of this index which is denominated in the relevant Class currency.

Base Currency

US Dollars (USD).

Instruments / Asset Classes

The Portfolio will primarily invest in the following securities which may be issued and listed or traded on Recognised Markets globally. The Portfolio can invest in or be exposed to the following types of assets.

Equity and Equity-linked Securities. These securities may include, without limitation, common stock, preferred stock, depositary receipts, and UCITS eligible partnership interests (which are effectively equivalent to shares but are issued by an issuer established as a limited partnership instead of as a company), rights, warrants, and recently issued securities of the types described above, which are unlisted but have been issued with an undertaking to apply for admission to listing on a Recognised Market within a year of issue.

Equity Real Estate Investment Trusts ("REITs"). REITs are companies or trusts that pool investor money and invest mainly in income producing real estate, although it should be noted that the Portfolio will not acquire any real estate directly. REITs may invest in a diverse range of real estate properties or may specialise in a particular type of property. The REITs which the Portfolio will invest in may be

based globally and will give exposure to underlying properties located in globally. They will invest the majority of their assets directly in real property and derive their income from rents and capital gains from appreciation realised through property sales.

Fixed Income Securities (Debt securities). These securities may include:

- Fixed and floating rate debt securities, including bonds, convertible bonds, debentures and notes (including freely transferable notes and freely transferable promissory notes) issued by governments, government agencies and corporate entities. Debt securities may be rated investment grade, high yield or unrated; and
- Deferred payment securities (securities which pay regular interest after a predetermined date) and zero coupon securities.

Money Market Instruments. The Portfolio may invest in money market instruments, which may include bank deposits, fixed or floating rate instruments (including commercial paper), floating or variable rate notes, bankers acceptances, certificates of deposit, debentures and short-dated government or corporate bonds, cash and cash equivalents (including treasury bills), or money market funds which meet the criteria set out under “Collective Investment Schemes” below, in each case that are rated as investment grade or below by Recognised Rating Agencies or are unrated.

Investment grade securities are highly rated securities, generally those rated Baa3, BBB- or above by one or more Recognised Rating Agencies, while high yield securities are medium or lower rated securities, generally those rated below investment grade and sometimes referred to as “junk bonds”.

Collective Investment Schemes. The Portfolio may invest in collective investment schemes which are themselves exposed to investments that are similar to the Portfolio’s other investments, provided that the Portfolio may not invest more than 10% in other collective investment schemes (including ETFs which are structured as collective investment schemes) which themselves invest in other collective investment schemes. Such collective investment schemes may or may not be managed by the Manager or the Sub-Investment Manager or their affiliates and will comply with the requirements of the UCITS Regulations in respect of such investments.

The other collective investment schemes in which the Portfolio may invest will be eligible collective investment schemes in accordance with the Central Bank’s rules, which may be domiciled in Relevant Jurisdictions or the United States of America and will qualify as UCITS or AIF schemes and will be regulated as such by their home state regulator.

Collective investment schemes in which the Portfolio invests may be leveraged but such collective investment schemes will not generally be leveraged (i) in excess of 100% of their net asset value; or (ii) so that their 1 day absolute VaR exceeds 4.47% of their net asset value over a 250 day horizon with a 99% confidence level; or (iii) so that their 1 month relative VaR exceeds twice the VaR of a comparable benchmark portfolio over a 250 day horizon with a 99% confidence level, depending on how such collective investment funds measure their global exposure.

Financial Derivative Instruments (“FDIs”). Subject to the conditions and limits imposed by the Central Bank as set out in the Prospectus and in this Supplement, the Portfolio may use the following FDI, for hedging, risk or efficient portfolio management and/or investment purposes:

- Futures contracts based on fixed income securities, UCITS eligible bond indices, UCITS eligible equity indices and interest rates and currencies may be used to achieve a profit as well as to hedge existing long positions;
- Options on equity securities, UCITS eligible equity indices, UCITS eligible bond indices and fixed income securities may be used to achieve a profit as well as to hedge existing long positions;

- Swaps including contract for difference, interest rate, credit default and total return may be used to achieve a profit as well as to hedge existing long positions. The maximum proportion of the Portfolio's Net Asset Value that can be subject to total return swaps is 90%. The expected proportion of the Portfolio's Net Asset Value that will be subject to total return swaps is 45%. The expected proportions are not limits and the actual percentages may vary over time depending on factors including, but not limited to, market conditions;
- Forwards on currencies contract may be used to hedge existing long positions;
- Warrants (including equity warrants) and rights (including equity rights) may be used to achieve a profit as well as to hedge existing long positions; and
- Convertible bonds may be used for investment and efficient portfolio management purposes, including to hedge or to achieve exposure to a particular security.

As the Portfolio may purchase FDI generally using only a fraction of the assets that would be needed to purchase the relevant securities directly, the remainder of the assets allocated to the Sub-Investment Manager may be invested in the other types of securities listed above. The Sub-Investment Manager may therefore seek to achieve greater returns by taking exposure to the performance of such securities through purchasing FDI which give exposure to them rather than purchasing the securities themselves and investing the remaining assets in other such securities to add excess return.

Repo Contracts and Securities Lending Agreements. Repo Contracts and Securities Lending Agreements may be used subject to the conditions and limits set out in the Prospectus.

Investment Restrictions

- Under normal market conditions, the Sub-Investment Manager will invest:
 - A minimum of 75% of the Portfolio's total gross notional exposure in securities issued by companies domiciled in or governments and government related entities of North America defined as the US, Canada and Mexico;
 - No more than 30% of the Portfolio's total gross notional exposure in fixed income securities issued by US and non- US companies or governments and government related entities; and
 - No more than 20% of the Portfolio's total gross notional exposure in securities issued by companies or governments and government related entities in Emerging Market Countries.
- The Portfolio may not invest in stocks issued by companies with a market capitalization less than USD250 million, measured at the time the Portfolio first invests in them. The Portfolio may not invest more than 10% of the Portfolio's Net Asset Value in units of other collective investment schemes including ETFs.
- The Portfolio will not utilise margin lending.

Risk

- Investment in the Portfolio carries certain risks which are described in greater detail in the "*Investment Risks*" section of the Prospectus. While investors should read and consider the entire "*Investment Risks*" section of the Prospectus, the risks summarised in the following section, namely, "*Risks related to Financial Derivative Instruments*" are particularly relevant to this Portfolio. **These risks are not purported to be exhaustive and potential investors should review this Supplement and the Prospectus in their entirety and consult with their professional advisers, before making an application for Shares.**
- Investors should refer to the Company's risk management policy with respect to the use of FDI contained in the RMP Statement.
- The Portfolio's global exposure is subject to an advanced risk management process which, in compliance with the UCITS Regulations, aims to ensure that on any day the Absolute VaR of the Portfolio will be no greater than 4.47% of its Net Asset Value (or maximum 20% 1 Month 99% confidence VaR). The VaR of the Portfolio is a daily estimation of the maximum loss which the Portfolio may incur over a one day holding period and is arrived at through quantitative

simulations with a 99% one tailed confidence interval and using a historical observation period of at least 250 business days. This process is described in detail in the statement of risk management procedures of the Company and its appendix in respect of the Portfolio. While the Portfolio measures and monitors its global exposure using the VaR approach, rather than by use of the Commitment Approach, the leverage of the Portfolio as calculated using the Commitment Approach is not expected to exceed 100% of its Net Asset Value as a result of its use of FDI. Measuring levels of leverage using the absolute Sum of the Notionals of the derivatives used, as required by the Central Bank, would produce a leverage percentage of approximately 200% of the Portfolio's Net Asset Value, although investors should note that higher levels of leverage may be experienced. That methodology does not reflect any netting or hedging that the Portfolio may have in place.

- The Sub-Investment Manager may use forward and future currency contracts in order to hedge some currency risk on a discretionary basis. The use of such hedging techniques may increase the risk profile of the Portfolio.

Environmental, Social and Governance (“ESG”)

This Portfolio meets the classification of an Article 8 Portfolio as it promotes environmental and social characteristics and limits investments to companies that follow good governance practices.

ESG risks and opportunities are considered in the selection of securities to be constituents of the Portfolio. The Sub-Investment Manager assess securities in relation to their exposure to and the management of ESG risks. ESG represents governance, (being the way in which the company is run), environmental issues, (such as the impact on natural resources), and social issues (such as human rights).

Please also refer to Annex VI of the Prospectus which contains additional information on the ESG characteristics that are applicable to this Portfolio.

Typical Investor Profile

Investment in the Portfolio may be suitable for investors who are prepared to accept the risks of a diversified portfolio, mainly invested in US equities by taking long and synthetic short positions. This includes investing in global equity and bond markets, with the potential to allocate to the securities of Emerging Market Countries and/or below investment grade securities together with medium to high levels of volatility due to the Portfolio's investment policies or portfolio management techniques.

Fees and Expenses

The Manager may be entitled to receive a performance fee payable out of the Portfolio's assets in respect of each PF Class in the Portfolio.

DEFINITIONS

Calculation Period	<p>The Calculation Period shall normally run from 1 January to 31 December in each year except that:</p> <ul style="list-style-type: none"> • in the case of the initial issue of Shares in each PF Class, the first Calculation Period will run from the date of issue to 31 December; • in the case of the termination of a PF Class, the Calculation Period will terminate on the date of the termination; and • in the case of the termination of the Management Agreement in any year, the Calculation Period will terminate on the date of the termination. <p>The first value used in determining the first Performance Fee for a PF Class shall be the Initial Offer Price.</p>
Crystallisation	<p>The point at which any Performance Fee becomes payable to the Manager. Crystallisation will occur either at the end of the Calculation Period or on a Dealing Day on which a Shareholder redeems or exchanges all or part of its Shareholding.</p>
High Water Mark	<p>The greater of: (i) the initial offer price per Share; and (ii) the Net Asset Value per Share at the end of any previous Calculation Period in respect of which a Performance Fee was paid.</p>

METHODOLOGY

For each Calculation Period, a Performance Fee in respect of each PF Class in issue becomes due in the event that the Net Asset Value per Share at the end of the Calculation Period exceeds the High Water Mark (net of all costs before the deduction of any accrued Performance Fee, provided that in doing so it is in the Shareholder's best interest) for that particular PF Class.

The Performance Fee will be calculated on each Dealing Day and will be equal to 15% of the amount by which the percentage growth in the Net Asset Value per Share over the Calculation Period exceeds that of the High Water Mark. The Performance Fee will be accrued on each Dealing Day and will form part of the Net Asset Value per Share for each PF Class where applicable. Any Performance Fee accrual on a Dealing Day will be superseded by any accrual made on the following Dealing Day up to the last Dealing Day of the Calculation Period.

In all cases the Net Asset Value per Share used in the calculation of the Performance Fee is unswung, i.e. it does not include any adjustment for swing pricing.

No Performance Fee will be paid until the Net Asset Value per Share exceeds the High Water Mark and such fee is only payable on the outperformance of the Net Asset Value per Share over the Hurdle Rate as described above.

Shareholders should note that, as the Performance Fee is calculated at Class level and not at an individual Shareholder level, they may be charged a Performance Fee even where the Net Asset Value of their Shares has remained the same or dropped, for example, where Shareholders purchase or redeem Shares at points other than the start and end of the Calculation Period.

The Performance Fee will be accrued in the Net Asset Value on each Dealing Day and will normally be payable to the Manager in arrears within 30 Business Days of the end of each Calculation Period. However, in the case of Shares redeemed during a Calculation Period, the accrued performance fee in respect of those Shares will be payable to the Manager within 30 Business Days of the date of redemption.

Crystallised Performance Fees shall remain in the relevant PF Class (but shall not participate in subsequent gains and losses of the relevant Class) until paid to the Manager and shall not be used or made available to satisfy redemptions or pay any fees and expenses of the relevant PF Class.

The Depositary shall verify the calculation of the Performance Fee and ensure that it is not open to the possibility of manipulation.

The Directors may, with the consent of the Manager, reduce the Performance Fee payable by any PF Class. Performance Fees are payable on realised and unrealised capital gains, which for the avoidance of doubt includes investment income, taking into account realised and unrealised losses at the end of the Calculation Period. Consequently, Performance Fees may be paid on unrealised gains which may subsequently never be realised.

WORKED EXAMPLES

Examples 1 to 3 show how the Performance Fee is calculated, accrued and crystallised. All valuation points fall within one Calculation Period.

Valuation point	1	2	3	4
NAV of PF Class Shares	US\$10.000	US\$10.100	US\$9.900	US\$10.200
High Water Mark	US\$10.000	US\$10.000	US\$10.000	US\$10.000

Example 1

Investor A acquires PF Class Shares at valuation point 1 for US\$10.000

	Acquisition of Shares	Accrued Performance Fee	Crystallised Performance Fee
Valuation point 1	US\$10.000		
Valuation point 2		$15\% \times (\text{US}\$10.100 - \text{US}\$10.000) = \text{US}\$0.015$	Accrued in NAV

Valuation point 3		None: NAV < High Water Mark	
Valuation point 4		15% x (US\$10.200 - US\$10.000) = US\$0.030	Accrued in NAV

Example 2

Investor B acquires PF Class Shares at valuation point 3 for US\$9.900

	Acquisition of Shares	Accrued Performance Fee	Crystallised Performance Fee
Valuation point 1			
Valuation point 2			
Valuation point 3	US\$9.900		
Valuation point 4		15% x (US\$10.200 - US\$10.000) = US\$0.030	Accrued in NAV

Example 3

Investor C acquires PF Class Shares at valuation point 1 for US\$10.000 and redeems at valuation point 4

	Acquisition of Shares	Accrued Performance Fee	Crystallised Performance Fee
Valuation point 1	US\$10.000		
Valuation point 2		15% x (US\$10.100 - US\$10.000) = US\$0.015	Accrued in NAV
Valuation point 3		None: NAV < High Water Mark	
Valuation point 4		15% x (US\$10.200 - US\$10.000) = US\$0.030	US\$0.030

SCENARIOS¹

All scenarios show the value of US\$100K invested in Shares in a PF Class

Scenario 1 illustrates the effect of the NAV performance being 5% per annum in three consecutive years

Scenario 2 illustrates the effect of the NAV growth being 10%, -5%, and 4% in three consecutive years

Scenario 3 illustrates the effect of the NAV growth at 4%, 0% and -2% in three consecutive years

Scenario 1

	Period One	Period Two	Period Three
	5% growth	5% growth	5% growth
Gross Value of PF Class Shares at year end	US\$105,000	US\$108,244	US\$111,589
Management Fee 1.00%	US\$1,050	US\$1,082	US\$1,116
Other expenses 0.30%	US\$315	US\$325	US\$335
Initial Net Asset Value of PF Class Shares at year end (NAV)	US\$103,635	US\$106,837	US\$110,138
High Water Mark	US\$100,000	US\$103,090	US\$106,275

¹ Investors should note that these scenarios are purely intended to be illustrative of the impact of different investment performance and have been simplified in some non-material respects to aid this understanding. For example, management fees and other expenses are in reality accrued on a daily basis but their calculation is presented in a simplified manner here for ease of review.

Performance Fee (15% over the High Water Mark)	US\$545 As NAV > High Water Mark, 15% x (US\$103,635 - US\$100,000)	US\$562 As NAV > High Water Mark, 15% x (US\$106,837 - US\$103,090)	US\$579 As NAV > High Water Mark, 15% x (US\$110,138 - US\$106,275)
Total Fees Paid	US\$1,910	US\$1,969	US\$2,030
Final Net Asset Value of PF Class Shares at year end	US\$103,090	US\$106,275	US\$109,559

Scenario 2

	Period One	Period Two	Period Three
	10% growth	-5% growth	4% growth
Gross Value of PF Class Shares at year end	US\$110,000	US\$101,920	US\$104,619
Management Fee 1.00%	US\$1,100	US\$1,019	US\$1,046
Other expenses 0.30%	US\$330	US\$306	US\$314
Initial Net Asset Value of PF Class Shares at year end (NAV)	US\$108,570	US\$100,595	US\$103,259
High Water Mark	US\$100,000	US\$107,285	US\$107,285
Performance Fee (15% over the High Water Mark)	US\$1,286 As NAV > High Water Mark, 15% x (US\$108,570 - US\$100,000)	US\$0 High Water Mark > NAV	US\$0 High Water Mark > NAV
Total Fees Paid	US\$2,716	US\$1,325	US\$1,360
Final Net Asset Value of PF Class Shares at year end	US\$107,285	US\$100,595	US\$103,259

Scenario 3

	Period One	Period Two	Period Three
	4% growth	0% growth	-2% growth
Gross Value of PF Class Shares at year end	US\$104,000	US\$102,251	US\$98,903
Management Fee 1.00%	US\$1,040	US\$1,023	US\$989
Other expenses 0.30%	US\$312	US\$307	US\$297
Initial Net Asset Value of PF Class Shares at year end (NAV)	US\$102,648	US\$100,922	US\$97,617
High Water Mark	US\$100,000	US\$102,251	US\$102,251
Performance Fee (15% over the Hurdle Rate)	US\$397 As NAV > High Water Mark, 15% x (US\$102,648 - US\$100,000)	US\$0 High Water Mark > NAV	US\$0 High Water Mark > NAV
Total Fees Paid	US\$1,749	US\$1,329	US\$1,286
Final Net Asset Value of PF Class Shares at year end	US\$102,251	US\$100,922	US\$97,617

Share Classes

With effect from 6 February 2015, the USD A Accumulating Shares and the SGD A Accumulating Shares in the Portfolio were renamed as the “USD A1 Accumulating Shares” and the “SGD A1 Accumulating Shares” respectively. All other features of these Classes, including fee levels and minimum initial subscription and minimum holding amounts remain unchanged.

A1 Classes are available in the Portfolio in the following currencies, subject to the following minimum initial subscription and minimum holding amounts.

2. The Class A1 Shares are a legacy share class whereby investment is subject to the Shareholder entering into a separate agreement with the Sub-Investment Manager or a Distributor.

Category	Currency	Minimum Initial Subscription Amount	Minimum Holding Amount
A1	AUD	1,000	1,000
	BRL	2,500	2,500
	CAD	1,000	1,000
	CHF	1,000	1,000
	CLP	500,000	500,000
	CNY	10,000	10,000
	DKK	5,000	5,000
	EUR	1,000	1,000
	GBP	1,000	1,000
	HKD	10,000	10,000
	ILS	5,000	5,000
	JPY	100,000	100,000
	NZD	1,000	1,000
	SEK	5,000	5,000
	SGD	1,000	1,000
	USD	1,000	1,000
	ZAR	10,000	10,000

Contingent deferred sales charges

Contingent deferred sales charges will be payable in respect of the following Classes at the rates specified below, depending on the period that has elapsed since the issue of the Shares being redeemed and will be charged on the lower of the Net Asset Value per Share on the relevant Dealing Day in respect of which the relevant Shares were (i) initially subscribed or (ii) redeemed. Any such contingent deferred sales charges will be paid to the relevant Distributor, the Manager or to the Sub-Investment Manager.

Class	Redemption Period in Calendar Days				
	< 365	365 - 729	730 - 1094	1095 – 1459	> 1459
B	4%	3%	2%	1%	0%
C, C1	1%	0%	0%	0%	0%
C2	2%	1%	0%	0%	0%
E	3%	2%	1%	0%	0%

Neuberger Berman U.S. Equity Index Putwrite Fund

An investment in the Portfolio should not constitute a substantial proportion of an investment portfolio and may not be appropriate for all investors. The Portfolio is not equivalent to a deposit; the value of Shares may go down as well as up and investors may not get back any of the amount invested. Investors should note that the Portfolio may achieve its investment objective by investing principally in FDI as described below which may be complex and sophisticated in nature.

Investment Objective	To seek long term growth of capital and income generation.
Investment Approach	<p>The Portfolio seeks to achieve its goal primarily through a strategy of writing collateralized put options on global equity indices and exchanged traded funds (“ETFs”) providing exposure to U.S., equity indices, such as the S&P 500 and Russell 2000. The put options will be traded on Recognised Markets.</p> <p>The strategy is intended to generate returns through the receipt of option premiums, which in turn is intended to reduce volatility relative to holding the underlying equity index, or ETF, on which the options are written. Volatility should be reduced because index exposure achieved through the options generally exhibits lower sensitivity to the underlying equity index than simply holding the underlying equity exposure directly.</p> <p>The Portfolio will collect premiums on written put options while maintaining a collateral portfolio, consisting primarily of fixed income instruments of any duration, including U.S. Treasury securities, Non-U.S. government bonds, cash and cash equivalents, securities issued by the U.S. government and its agencies, bank certificates of deposit, mortgage-backed securities, asset-backed securities, corporate debt securities, and money market mutual funds and ETFs (such money market mutual funds and ETFs, “Underlying Funds”), as more particularly described in the section entitled “<i>Instruments/Asset Classes</i>”.</p> <p>Because the Portfolio will use derivatives to gain exposure to the equity markets, and because derivatives may not require the Portfolio to deposit the full notional amount of the investment, the Portfolio may invest a significant amount of its assets in collateral instruments. The collateral instruments held by the Portfolio will be primarily investment grade fixed income instruments. Assets are chosen to provide liquidity and preserve capital, while at the same time serving as collateral for the put options written by the Portfolio. When selecting assets, the Sub-Investment Manager considers relevant factors to build a diversified portfolio of short term bonds, including the maturity of a particular asset, as well as the credit rating of the issuer and whether or not the Portfolio already holds assets issued by that issuer.</p> <p>The Portfolio may, on a limited basis, buy directly equity securities or ETFs, as more particularly described in the section entitled “<i>Instruments/Asset Classes</i>”, that provide exposure consistent with the Portfolio’s U.S. equity index exposures. The Portfolio may do so to maintain equity exposures (in both performance and weighting) consistent with the Portfolio’s strategic benchmark (detailed below under “Benchmark”) and investment objective.</p> <p><i>Put-writing</i></p> <p>In a put-writing strategy, the Portfolio (as the seller of the option) receives premiums from the purchaser of the option in exchange for providing the purchaser with the right to sell the underlying instrument to the Portfolio at a specific price (i.e., the exercise price or strike price). If the market price of the instrument underlying the option exceeds the strike price, it is anticipated that the option would go unexercised and the Portfolio would earn the full premium upon the option’s expiration or a portion of the premium upon the option’s early termination. If the market price of the instrument underlying the option drops below the strike price, it is anticipated that the option would be exercised and the Portfolio would pay the option buyer the difference between the market value of the underlying instrument and the strike price.</p> <p>Expiry date is the last date on which the holder of the option may exercise it according to its terms. The Sub-Investment Manager will be using exchange-traded option contracts. Typically exchange-traded option contracts expire according to a</p>

pre-determined calendar. The strike price (or exercise price) of a put option is the fixed price at which the owner of the option can sell the underlying security.

The proceeds received by the Portfolio for writing put options will be invested in the fixed income instruments, money market mutual funds and ETFs described above (and below in the section entitled “*Instruments/Asset Classes*”) in order to seek to meet any liabilities the Portfolio may incur from writing put options (eg, where the Portfolio is called by the purchaser of an option to pay the difference between the market value of the underlying instrument and the strike price of the option).

By writing options on the index-based underlying securities described above, the Portfolio is exposed to the same market risks as holding the underlying security in the event of a fall in the market price of that security.

Portfolio management

The Sub-Investment Manager will select option investments based on their estimate of market volatility levels, underlying instrument valuations and market risks. The Sub-Investment Manager will draw upon the resources of its internal team of analysts as well as external sources of market data to determine these estimates. Further, the Sub-Investment Manager will evaluate relative option premiums in determining preferred option contract terms, such as exercise prices and expiration dates.

The Sub-Investment Manager will seek to maintain option notional exposures (ie, will seek to write options with underlying exposures that are) consistent with the regional exposure of the benchmark detailed in the section entitled “*Benchmark*”. Allocation to specific indexes may vary over time based on current and expected option premiums and index volatility levels. The Sub-Investment Manager will draw upon the resources of its internal team of analysts as well as external sources of market data to evaluate expected option premium and index volatility levels.

The Sub-Investment Manager will seek to diversify option exposures in the following ways.

1. Using diversified equity index options such as, but not limited to, the S&P 500 and Russell 2000.
2. Laddering option exposures across multiple expirations. Exchange traded option contracts typically expire according to a fixed calendar. Laddering across multiple expirations means not all options will expire at the same time and expiry will be ‘laddered’ / spread across expiry dates. To seek to control the option expiry the Sub-Investment Manager will, where possible, use European-style options which can be exercised only at expiration. This is as opposed to American-style options which can be exercised at any time prior to the option’s expiration.
3. Diversifying across option strike prices. Typically exchange traded option contracts have a pre-determined strike or exercise price. The Sub-Investment Manager will look for option contracts with differing strike prices to seek to ensure, in the case of exercise, that not all options are exercised at the same time when the underlying index or security reaches a certain level.
4. Rolling options at different points in time. Option positions that are not exercised can be ‘rolled’ to (ie, closed out and replaced with) an option that preserves the portfolio’s term structure exposure across expiration dates. The Sub-Investment Manager will seek to ensure that not all option positions will be rolled at the same time and that the cost of rolling options does not outweigh the benefits.

Gains may be harvested prior to expiration, by closing out an existing position and writing a new put option corresponding to the existing position but with the new strike price set at a more conservative level. The proceeds from the new option sold are an additional premium over the original premium collected.

Risk Management

The Sub-Investment Manager follows a systematic risk management process that seeks to close out high risk positions to limit downside exposure to underlying equity indexes. This discipline aims to close out in-the-money option positions and rolls the positions to new option positions. This is driven by several factors including the

options' correlation with the underlying positions, the remaining days to expiration (and how that affects the value) and notional exposures (size of position). In closing out the positions, the strategy seeks to reduce its downside exposure to the underlying index and repositions the strategy to a lower risk exposure by writing new options with different strike prices and collecting additional option premiums. Further, the Sub-Investment Manager will also look to close out options that they determine have little or no remaining risk exposure (i.e. options that are out-of-the-money) to rebalance exposure to the underlying equity index(es) and roll the positions to new positions to collect additional premiums with intent of increasing the Portfolio's return potential.

The Portfolio will utilize cash settled index options to avoid delivery of the underlying index or security. However, in the event the Portfolio is delivered a position in the underlying security when an option is exercised, the Portfolio will liquidate the resulting long position and re-establish the option exposure.

The processes of the Sub-Investment Manager seeks to maintain a balance of setting option strike prices near to the current level of the underlying asset, while limiting the impact of short-term reversals in underlying index prices which might trigger exercise.

The Sub-Investment Manager rolls option positions in a methodical manner that aims to balance the risks between short term market reversals, causing the underlying index or security to fall in value for a short period of time, and risk of loss from continued market declines.

For positions rolled in the days prior to their expiration dates, the Sub-Investment Manager seek to roll the positions that have the limited time value remaining. Rolling a portion of the portfolio in days prior to expiration can improve diversification of strike prices and volatility levels.

Collateral management

The Portfolio's fixed income instruments will be primarily investment grade and are intended to provide liquidity and preserve capital and will serve as collateral for the Portfolio's investments in options. The Sub-Investment Manager considers fixed income instruments to be investment grade if, at the time of investment, they are rated within the four highest categories by at least one independent credit rating agency or, if unrated, are determined by the Sub-Investment Manager to be of comparable quality. Because the Portfolio will use options to gain exposure to the equity markets, and because options will not require the Portfolio to deposit the full notional amount of the investment, the Portfolio will invest a significant amount of its total assets in fixed income instruments, money market mutual funds and ETFs. Its investments in options generally will not constitute a significant amount of its total assets, however, the aggregate investment exposure of its investments in options, as discussed above, will be not be greater than 100% of its total assets.

The Portfolio is actively managed and does not intend to track the Benchmark and is not constrained by it. The Benchmark is included here for performance comparison purposes only. It is not expected that the majority of the Portfolio's assets will be components of the Benchmark. While the Portfolio may acquire securities which are components of the Benchmark, it will not do so because of their inclusion in the Benchmark.

Benchmark

The Benchmark comprises the following blend:

42.5% CBOE S&P 500 One-Week PutWrite Index, 42.5% CBOE S&P 500 PutWrite Index, 7.5% CBOE Russell 2000 One-Week PutWrite Index, 7.5% CBOE Russell 2000 PutWrite Index.

The CBOE S&P 500 One-Week PutWrite Index tracks the performance of put options (collateralised by cash reserves held in a money market account) sold against the S&P500 Index on a weekly basis.

The CBOE S&P 500 PutWrite Index tracks the performance of put options (collateralised by cash reserves held in a money market account) sold against the S&P500 Index on a monthly basis.

The CBOE Russell 2000 PutWrite Index tracks the performance of put options (collateralised by one-month US Treasury bills) sold against the Russell 2000 Index on a monthly basis.

The CBOE Russell 2000 One-Week PutWrite Index tracks the performance of put options (collateralised by one-month US Treasury bills) sold against the Russell 2000 Index on a weekly basis.

Each index above embeds leverage, which is taken into account when calculating the Portfolio's leverage, as described below in the "Risk" section.

Shareholders in a Class which is denominated in a currency other than the Base Currency should note that, where available, it may be more meaningful to compare the performance of such Class against a version of this index which is denominated in the relevant Class currency.

Base Currency	US Dollars (USD).
----------------------	-------------------

Instruments / Asset Classes	As described above, the Portfolio will primarily write put options and will also maintain a collateral portfolio. The Portfolio's collateral portfolio will be invested across the following types of asset. The Portfolio can invest in or be exposed to the following types of assets.
------------------------------------	--

Fixed Income Securities (Debt Securities). These securities may include:

- Both fixed and floating rate debt securities, including bonds issued by governments and government related and corporate entities worldwide denominated in local currencies. Debt securities will not embed FDI and / or leverage;
- Corporate bonds with warrants, convertible bonds, contingent convertible bonds, bonds resulting from the restructuring of syndicated loans or bank loans (e.g. "Brady" bonds), subordinated bonds, debentures and notes (including freely transferable and unleveraged structured notes, exchange traded notes and freely transferable promissory notes). Convertible bonds and contingent convertible bonds may embed FDI and / or leverage; and
- Privately issued mortgage-backed securities, asset-backed securities, structured securities, exchange traded certificates and notes (including mortgage-backed securities such as pass-through certificates, which entitle the holders to receipt of mortgage payments and interest and principal only components of mortgage-backed securities) that derive interest and principal payments from specified assets (including residential and commercial mortgages, credit card debt and pools of other kinds of receivables, such as loans, royalties or other earnings). Mortgage-backed securities, asset-backed securities and structured securities may embed FDI and / or leverage.

Equity and Equity-linked Securities. These Securities may include, without limitation, common stock, preferred stock, convertible preferred stock, American, European and Global Depository Receipts (securities issued by a financial institution which evidence ownership interests in a security or a pool of securities deposited with the financial institution), units in real estate investment trusts (REITs) (investment vehicles which own, operate, or finance income-producing real estate assets) and units in Master Limited Partnerships (MLPs) (an MLP is a US partnership structure that principally derives cash flows from real estate, natural resources and commodities and that issues publicly traded units, such units being, in effect, equivalent to shares issued by a company). Equity and equity-linked securities will not embed FDI and / or leverage;

Collective Investment Schemes. The Portfolio may invest in collective investment schemes which are themselves exposed to investments that are similar to the Portfolio's other investments, provided that the Portfolio may not invest more than 5% in other collective investment schemes (including ETFs which are structured as collective investment schemes) which themselves invest in other collective investment schemes. Such collective investment schemes may or may not be managed by the Manager or the Sub-Investment Manager or their affiliates and will comply with the requirements of the UCITS Regulations in respect of such

investments.

The other collective investment schemes in which the Portfolio may invest will be eligible collective investment schemes in accordance with the Central Bank's rules, which may be domiciled in Relevant Jurisdictions or the United States of America and will qualify as UCITS or AIF schemes and will be regulated as such by their home state regulator.

ETFs, which are investment funds whose units may be bought and sold on a securities exchange. ETFs typically invest in a portfolio of securities which is designed to track the performance of particular market segment or index. The ETFs will be located in Relevant Jurisdictions and will be authorised under the UCITS Directive or will be AIFs which are eligible for investment by the Portfolio in accordance with the requirements of the Central Bank. The ETFs will represent investments that are similar to the Portfolio's other investments. The ETFs will operate on the principle of risk spreading and will not be leveraged.

Collective investment schemes in which the Portfolio invests may be leveraged but such collective investment schemes will not generally be leveraged (i) in excess of 100% of their net asset value; or (ii) so that their 1 day absolute VaR exceeds 4.47% of their net asset value over a 250 day horizon with a 99% confidence level; or (iii) so that their 1 month relative VaR exceeds twice the VaR of a comparable benchmark portfolio over a 250 day horizon with a 99% confidence level, depending on how such collective investment funds measure their global exposure.

Money Market Instruments. These may include bank deposits, fixed or floating rate instruments (including commercial paper), floating or variable rate notes, bankers acceptances, certificates of deposit, debentures and short-dated government or corporate bonds, cash and cash equivalents (including treasury bills) that are rated as investment grade or below by Recognised Rating Agencies or are unrated. Money market instruments will not embed FDI and / or leverage.

Investment grade securities are highly rated securities, generally those rated Baa3, BBB- or above by one or more Recognised Rating Agencies, while high yield securities are medium or lower rated securities, generally those rated below investment grade and sometimes referred to as "junk bonds".

Financial Derivative Instruments ("FDIs"). Subject to the conditions and limits imposed by the Central Bank as set out in the Prospectus and in this Supplement, the Portfolio may use the following FDI for hedging, efficient portfolio management and/or investment purposes:

- Options on fixed income securities, interest rates, UCITS eligible bond indices, equity securities, UCITS eligible equity indices and currencies may be used to achieve a profit as well as to hedge existing long positions;
- Futures contracts based on fixed income securities, interest rates, UCITS eligible bond indices and currencies may be used to achieve a profit as well as to hedge existing long positions; and
- Forwards on fixed income securities and currency contracts may be used to achieve a profit as well as to hedge existing long currency exposures.

As the Portfolio may purchase FDI generally using only a fraction of the assets that would be needed to purchase the relevant securities directly, the remainder of the assets allocated to the Sub-Investment Manager may be invested in the other types of securities listed above. The Sub-Investment Manager may therefore seek to achieve greater returns by purchasing derivative instruments and investing the remaining assets in such other securities to add excess return.

The counterparties to OTC FDI entered into in respect of the Portfolio will be entities (which will not be related to the Sub-Investment Manager or its delegates) with legal personality which may be located globally. They will be subject to ongoing supervision by a public authority and have the necessary organisational structure and resources for the relevant type of transaction. They will be subject to a credit

assessment and, where the counterparty is subject to a credit rating by any Recognised Rating Agency, that rating shall be taken into account in the credit assessment. Where a counterparty is downgraded to A2 or below (or comparable rating) by such a Recognised Rating Agency, a new credit assessment in respect of the counterparty will be undertaken without delay. Collateral received by the Portfolio in the context of FDI transactions will be marked to market daily and valued in accordance with the provisions set out in the Prospectus under “*Determination of Net Asset Value*”.

Repo Contracts and Securities Lending Agreements. Repo Contracts and Securities Lending Agreements may be used subject to the conditions and limits set out in the Prospectus.

- Investment Restrictions**
- Under normal market conditions, it is the intention of the Sub-Investment Manager to invest a maximum of 30% of the Portfolio’s available assets in sub investment grade fixed income securities.
 - Under normal market conditions, it is the intention of the Sub-Investment Manager to maintain a small allocation to cash, but may increase that allocation up to 100% of the Portfolio’s Net Asset Value at certain times for temporary defensive purposes or in circumstances of very high volatility or if they believe adverse market circumstances require.
 - The Portfolio will not utilise total return swaps or margin lending.

- Risk**
- Investment in the Portfolio carries certain risks which are described in greater detail in the “*Investment Risks*” section of the Prospectus. While investors should read and consider the entire “*Investment Risks*” section of the Prospectus, the risks summarised in the following section, namely, “*Risks related to Financial Derivative Instruments*” are particularly relevant to this Portfolio. **These risks are not purported to be exhaustive and potential investors should review this Supplement and the Prospectus in their entirety and consult with their professional advisers, before making an application for Shares.**
 - Investors should refer to the Company’s risk management policy with respect to the use of FDI contained in the RMP Statement.
 - The Portfolio may be leveraged up to approximately 200% of its Net Asset Value as a result of its use of FDI and any leverage inherent in any index to which the Portfolio may be exposed, although investors should note that higher levels of leverage may be experienced. This expected leverage figure is calculated using the Sum of the Notional values of the derivatives used, as required by the Central Bank. Using this methodology does not reflect any netting or hedging that the Portfolio may have in place. The Portfolio’s global exposure is subject to an advanced risk management process which, in compliance with the UCITS Regulations, aims to ensure that on any day the Absolute VaR of the Portfolio will be no greater than 4.47% of its Net Asset Value (or maximum 20% 1 Month 99% confidence VaR). The VaR of the Portfolio is a daily estimation of the maximum loss which the Portfolio may incur over a one day holding period and is arrived at through quantitative simulations with a 99% one tailed confidence interval and using a historical observation period of at least 250 business days. This process is described in detail in the statement of risk management procedures of the Company and its appendix in respect of the Portfolio. While the Portfolio measures and monitors its global exposure using the VaR approach, rather than by use of the Commitment Approach, the leverage of the Portfolio using the Commitment Approach is expected to be 180% of its Net Asset Value as a result of its use of FDI and any leverage inherent in any index to which the Portfolio may be exposed, although investors should note that higher levels of leverage may be experienced.
 - The Sub-Investment Manager may use forward and future currency contracts in order to hedge currency risk on a discretionary basis. The use of such hedging techniques may increase the risk profile of the Portfolio.

- Typical Investor Profile**
- The Portfolio may be suitable for an investor seeking income and capital appreciation over a mid-to-long term horizon. The investor should be prepared to accept periods of market volatility and the risks of the capital markets in pursuit of long term goals.

Fees and Expenses

Category	Maximum Initial Charge	Maximum Management fee	Distribution Fee
A, X, Y	5.00%	1.20%	0.00%
B, C1, C2, E	0.00%	1.80%	1.00%

For details of the Administration Fees payable by the Portfolio, please see the “Administration Fees” heading in the “Fees and Expenses” section of the Prospectus.

Contingent deferred sales charges

Contingent deferred sales charges will be payable in respect of the following Classes at the rates specified below, depending on the period that has elapsed since the issue of the Shares being redeemed and will be charged on the lower of the Net Asset Value per Share on the relevant Dealing Day in respect of which the relevant Shares were (i) initially subscribed or (ii) redeemed. Any such contingent deferred sales charges will be paid to the relevant Distributor, the Manager or to the Sub-Investment Manager.

For further information on fees, please refer to the “Fees and Expenses” section of the Prospectus.

Neuberger Berman Macro Opportunities FX Fund

Investors should note that the Portfolio may achieve its investment objective by investing principally in financial derivative instruments as described below which may be complex and sophisticated in nature. An investment in the Portfolio should not constitute a substantial proportion of an investment portfolio and may not be appropriate for all investors. An investment in the Portfolio is not in the nature of a deposit in a bank account and is not protected by any government, government agency or other guarantee scheme, which may be available to protect the holder of a bank deposit account. The value of Shares may go down as well as up and investors may not get back any of the amount invested.

Investment Objective The Portfolio aims to achieve a target average return of 5-6% over cash (as specified in the “*Benchmark*” section below) before fees over a market cycle (typically 3 years).

Investors should note that the target return is not guaranteed over a market cycle, a 12-month or any period and the Portfolio’s capital is at risk. Investors should also note that, over the course of a market cycle, there may be significant periods of time during which the performance of the Portfolio will deviate from the targeted return and the Portfolio may experience periods of negative return. There can be no guarantee that the Portfolio will ultimately achieve its objective.

Investment Approach The Manager and Sub-Investment Manager will seek to achieve the objective:

- Firstly, by obtaining long and short exposures to a range of global liquid currencies, predominantly but not limited to the G10 currencies and opportunistically, in the most liquid Emerging Market Country currencies (these are typically the most heavily traded e.g. Brazilian Real (BRL), Singapore Dollar (SGD) and South Korean Won (KRW)) using a range of financial derivative instruments (as detailed in the *Instruments/Asset Classes* section). The Manager and the Sub-Investment Manager seek to anticipate changes in the value of currencies, using the process described below. The Manager and the Sub-Investment Manager will seek to purchase (i.e. take long positions in respect of) currencies when they are expected to appreciate and to sell (i.e. take short positions in respect of) those currencies which are expected to depreciate; and
- Secondly, through investing in global fixed income debt securities and short-dated Euro-denominated bonds to opportunistically seek to enhance cash returns and to provide liquidity and collateral cover for exposures created through the use of financial derivative instruments as outlined above.

The Manager and the Sub-Investment Manager follow a relative value fundamental process and manages the Portfolio according to a disciplined, consistent investment approach, designed to generate a highly diversified portfolio of currencies, incorporating four stages:

Stage one: The Manager and the Sub-Investment Manager seek to identify relative value opportunities in currencies, driven by differences between currency prices and currency values which are referred to below as dislocations. Currency prices are affected by factors that the market has priced in and currency values are estimated by the Manager and the Sub-Investment Manager through in depth daily analysis using a proprietary framework of multiple fundamental indicators over multiple time horizons such as:

- growth - countries with strong growth prospects should see their currencies outperform;
- yield - currencies with higher interest rates are attractive;
- capital flows - investment opportunities attract capital and developments in equity and commodity markets have significant influence on currency performance;
- stability - overvaluation could lead to deterioration in the value of a currency and the risk the currency will revert to its correct market range. Countries running large fiscal deficits increase their currency vulnerability;
- risk aversion - volatile markets reduce the attractiveness of higher yielding currencies. Investors look for currencies with strong fundamentals when risk aversion is high; and
- monetary policy - monetary policy expectations from the relevant national regulatory authorities

influence short term dynamics.

Stage two: The Manager and the Sub-Investment Manager seek to understand the reasons for the dislocations between currency prices and currency values identified in stage one at each different time horizon. The size of the dislocations between currency value and currency price are then assessed and ranked. When assessing the reasons for the dislocation the Manager and the Sub-Investment Manager exercise qualitative judgment to evaluate information and events that cannot be readily quantified or modelled, for example, political events e.g. escalating political tensions between two countries or shifts in regulatory regimes e.g. the implementation of more restrictive capital markets laws.

Stage three: The Sub-Investment Manager will determine portfolio positioning based upon the assessment of the level of differential between the currency value and the currency price and the confidence they have in the data and information events that explain this. A significant differential between currency value and currency price in conjunction with a high degree of confidence in the factors that explain the dislocation, will result in a more significant portfolio position. A smaller differential or a lower level of confidence in the factors that explain the dislocation is likely to result in a less significant portfolio position. The Manager and the Sub-Investment Manager will implement the portfolio positioning through liquid currency forwards.

Stage four: The Manager and the Sub-Investment Managers will then utilise a variety of risk management tools (i.e. scenario analysis – the analysis of how proposed position would react to certain situations, including economic crises; stress testing – the analysis of the losses which a proposed position would have suffered in the past and how long it would have taken to recover and correlation measures – the analysis of how the movement of prices of two securities have behaved historically in relation to each other) to assess each of the portfolio positions' individual contribution to risk and overall portfolio diversification and resize weightings if necessary.

The Manager and the Sub-Investment Manager will implement the currency exposures selected through the process above through the use of currency derivatives, as specified in the "*Instruments/Asset Class*" section. The exposures achieved through the derivatives will be supported by the retention of cash collateral in the Portfolio and the Manager and the Sub-Investment Manager will allocate the management of this collateral to the Manager and the Sub-Investment Managers. The Manager and the Sub-Investment Manager will allocate the management of the collateral between the Sub-Investment Managers based upon the currency of the collateral, i.e. Euro collateral will be managed by the Manager and US Dollar collateral will be managed by Neuberger Berman Investment Advisers LLC.

The Manager and the Sub-Investment Managers will manage the collateral by investing, subject to the set out under "*Management of Collateral*" in the "*Portfolio Investment Techniques*" section in the Prospectus, in global fixed income debt securities and short-dated Euro-denominated bonds, to seek to opportunistically enhance the cash returns and provide liquidity and collateral cover. The Manager and the Sub-Investment Managers will seek to select issuers through fundamental analysis (i.e. changes in the level of issuers' indebtedness and their impact on the creditworthiness of the issuers) and technical analysis (i.e. changes in the flows of the issue of debt securities) to seek to identify undervalued securities (i.e. those which the Manager and the Sub-Investment Managers think are available at prices which are below their true value) and exploit investment opportunities. The process incorporates credit analysis on the issuers of the selected securities, issuers' liquidity and risk analysis, as well as monitoring traditional credit statistics, for example, coverage ratios (looking at the factor by which an issuer's liability can be covered by its income) or leverage ratios (looking at the factor by which the loss or return on an investment may exceed the initial investment).

The Portfolio is designed to generate positive returns across a range of market conditions and is generally expected to have low correlations with the performance of traditional equity and debt investments over long-term periods. The investment approach enables the Manager and the Sub-Investment Manager to identify dislocations, usually caused by currency flows, predominantly from non-profit seeking market participants (such as tourism flows, corporate hedging and cross-border mergers and acquisitions). Investors should note that, over the course of a market cycle, there may be significant period of time during which the performance of the Portfolio will deviate from the targeted return set out in the objective and there can be no guarantee that the Portfolio will ultimately achieve its objective.

The relative value fundamental views are mainly expressed through use of liquid currency forward contracts and, to a lesser extent, may also be implemented, at the Manager's and the Sub-Investment

Manager's discretion, by investing in currency options.

The contribution to risk in developed currencies is expected to be around 80% of the overall Portfolio risk, defined as a contribution based on ex-ante (i.e. predicted future) volatility.

The securities, ETFs and exchange traded FDI in which the Portfolio invests will be listed on Recognised Markets globally.

The Portfolio may have or can be expected to have medium to high volatility due to its investment policies or portfolio management techniques.

The Portfolio may take synthetic long or synthetic short positions and the investment strategies are expected to involve substantial leverage as a result of the use of FDI for investment and hedging purposes as outlined in this Supplement. The anticipated maximum of the ratio of the value of the long positions to the absolute value of the short positions is 2:1.

The Portfolio is actively managed and does not intend to track the Benchmark and is not constrained by it. The Benchmark is included here for performance comparison purposes only. It is not expected that the majority of the Portfolio's assets will be components of the Benchmark. While the Portfolio may acquire securities which are components of the Benchmark, it will not do so because of their inclusion in the Benchmark.

Benchmark The ICE BofA 0-1 Year AAA Euro Government Index (EUR Total Return).

Shareholders in a Class which is denominated in a currency other than the Base Currency should note that, where available, it may be more meaningful to compare the performance of such Class against a version of this index which is denominated in the relevant Class currency.

Base Currency Euro (EUR)

Instruments / Asset Classes The Portfolio will invest in or be exposed to the following types of assets:

Financial Derivative Instruments ("FDIs") Subject to the conditions and limits imposed by the Central Bank as set out in the Prospectus and this Supplement, the Portfolio may use the following FDI for hedging, including synthetic short hedging, efficient portfolio management and/or other investment purposes:

- Future contracts based on interest rates, UCITS eligible bond indices and currencies may be used to achieve a profit as well as to hedge existing long positions;
- Swaps and swaptions may include currency, interest rate, UCITS eligible indices, volatility, variance, credit default, excess return, cross currency and total return swaps (in respect of each of the other types of assets in which the Portfolio may invest, as described in this "Instruments/Asset Classes" section) and may be used to achieve a profit as well as to hedge existing long positions. Excess return swaps are OTC FDI under which one party will agree to pay the other the return of an underlying asset and the other party agrees to pay the first party a fee, either periodically or upfront on entry into the swap. An excess return swap differs from a total return swap because the payment that the other party receives will be based solely on the performance of the underlying asset, while the payment to the other party under a total return swap will also include an element to reflect the return which cash to the value of the notional amount of the swap would have earned on deposit. The maximum proportion of the Portfolio's Net Asset Value that can be subject to total return swaps is 10%. The expected proportion of the Portfolio's Net Asset Value that will be subject to total return swaps is 5%. The expected proportions are not limits and the actual percentages may vary over time depending on factors including, but not limited to, market conditions;
- Forwards on fixed income securities and currency contracts may be used to achieve a profit as well as to hedge existing long currency exposures;
- Convertible bonds may be used for investment and efficient portfolio management purposes, including to hedge or to achieve exposure to a particular security; and
- Options on fixed income securities, interest rates, interest rate futures and UCITS eligible bond indices, UCITS eligible bond indices, volatility indices and currencies may be used to achieve a profit as well as to hedge existing long positions.

Swaps, swaptions, options, futures and forwards may each be used to generate synthetic short

positions for investment, hedging or efficient portfolio management purposes in respect of assets which the Manager and the Sub-Investment Manager expect to decrease in value.

As the Portfolio may purchase FDI generally using only a fraction of the assets that would be needed to purchase the relevant securities directly, the remainder of the assets allocated to the Manager and the Sub-Investment Manager may be invested in the other types of securities listed in the “*Instruments/Asset Classes*” section above. The Manager and the Sub-Investment Manager may therefore seek to achieve greater returns by purchasing derivative instruments and investing the remaining assets in such other securities to add excess return.

The counterparties to OTC FDI entered into in respect of the Portfolio will be entities (which will not be related to the Manager and the Sub-Investment Manager or their delegates) with legal personality which may be located globally. They will be subject to ongoing supervision by a public authority, be rated at or in excess of the requirements of the Central Bank by a Recognised Rating Agency and have the necessary organisational structure and resources for the relevant type of transaction.

Any indices to which exposure is taken through FDI will be broad-based, UCITS-eligible indices which provide exposure to the performance of the types of assets in which the Portfolio may invest, as described in this “*Instruments/Asset Classes*” section. Where exposure is gained to a particular index or indices through the use of any of the FDI outlined above, additional information on the relevant index or indices (including information on the rebalancing frequency of the relevant index) shall be made available in the annual reports of the Company.

Fixed Income Securities (Debt Securities). These securities may include both fixed and floating rate debt securities, including bonds issued by governments, government-related and corporate entities, denominated in local currencies, as well as investment grade securities, which are highly rated securities, generally those rated Baa3, BBB- or above by one or more Recognised Rating Agencies.

- (i) Corporate bonds with warrants, convertible bonds (which will not embed derivatives), bonds resulting from the restructuring of syndicated loans or bank loans (e.g. “Brady” bonds), subordinated bonds, debentures, exchange traded notes and freely transferable promissory notes);
- (ii) Mortgage-backed securities, asset-backed securities, structured securities (including covered bonds, which are bonds which give investors recourse to a pool of collateral in the event of default by their issuer, mortgage-backed securities such as pass-through certificates, which entitle the holders to receipt of mortgage payments and interest and principal only components of mortgage-backed securities), exchange traded certificates and notes that derive interest and principal payments from specified assets (including residential and commercial mortgages, credit card debt and pools of other kinds of receivables, such as loans, royalties or other earnings); and
- (iii) Deferred payment securities (securities which pay regular interest after a predetermined date) and zero coupon securities.

Money Market Instruments. These securities may include bank deposits, fixed or floating rate instruments (including commercial paper), floating or variable rate notes, bankers acceptances, certificates of deposit, debentures and short-dated government or corporate bonds, cash and cash equivalents (including treasury bills) that are rated as investment grade by Recognised Rating Agencies or are unrated.

Collective Investment Schemes. The Portfolio may invest in underlying funds which are themselves exposed to investments that are similar to the Portfolio’s other investments, provided that the Portfolio may not invest more than 10% in underlying funds (including ETFs) which themselves invest in other collective investment schemes. Such underlying funds may or may not be managed by the Manager or the Sub-Investment Manager or their affiliates and will comply with the requirements of the UCITS Regulations in respect of such investments.

- The underlying funds in which the Portfolio may invest will be eligible collective investment schemes in accordance with the Central Bank’s requirements, which may be domiciled in Relevant Jurisdictions and will qualify as UCITS or alternative investment fund schemes and will be regulated as such by their home state regulator;
- Underlying funds in which the Portfolio invests may be leveraged but such collective investment

schemes will not generally be leveraged: (i) in excess of 100% of their net asset value; or (ii) so that their 1 day absolute value-at-risk exceeds 4.47% of their net asset value over a 250 day horizon with a 99% confidence level; or (iii) so that their 1 month relative value-at-risk exceeds twice the value-at-risk of a comparable benchmark portfolio over a 250 day horizon with a 99% confidence level, depending on how such underlying funds measure their global exposure; and

- ETFs are investment funds whose units may be bought and sold on a securities exchange. ETFs typically invest in a portfolio of securities that is designed to track the performance of particular market segment or index. The ETFs will be located in a Relevant Jurisdiction and will be authorised under the UCITS Directive or will be alternative investment funds which are eligible for investment by the Portfolio in accordance with the requirements of the Central Bank. The ETFs will represent investments that are similar to the Portfolio's other investments. The ETFs will operate on the principle of risk spreading and will not be leveraged.

Repo Contracts and Security Lending Agreements. At the discretion of the Manager and the Sub-Investment Manager, the Portfolio will enter into Repo Contracts subject to the conditions and limits set out in the Central Bank UCITS Regulations. Any such Repo Contracts may be used for efficient portfolio management purposes. Notwithstanding the terms of the Prospectus, the maximum proportion of the Portfolio's Net Asset Value that can be subject to Repo Contracts is 30%. The expected proportion of the Portfolio's Net Asset Value that will be subject to Repo Contracts is 10%. The expected proportions are not limits and the actual percentages may vary over time depending on factors including, but not limited to, market conditions.

Securities Lending Agreements may be used subject to the conditions and limits set out in the Prospectus.

Investment Restrictions

- The Portfolio will not invest more than 5% of its Net Asset Value in underlying funds which are not ETFs and not more than 10% of its Net Asset Value in underlying funds in aggregate.
- A maximum of 20% of the Portfolio's risk (as measured by contribution to ex-ante (predicted future) volatility) may be allocated to positions taken in Emerging Market Country currencies.
- The Portfolio will not utilise margin lending.

Risk

- Investment in the Portfolio carries certain risks which are described in greater detail in the "Investment Risks" section of the Prospectus. While investors should read and consider the entire "Investment Risks" section of the Prospectus, the risks summarised in the following sections, namely, "Risks related to Financial Derivative Instruments" and "Market Risks: Risks relating to Debt Securities" are particularly relevant to this Portfolio. **These risks are not purported to be exhaustive and potential investors should review this Supplement and the Prospectus in their entirety and consult with their professional advisers, before making an application for Shares.**
- Investors should note that the Portfolio's target return is not guaranteed and that the Portfolio's capital is at risk. Over the course of a market cycle, the performance of the Portfolio may deviate from the targeted return and experience negative return for significant periods of time. There can be no guarantee that the Portfolio will ultimately achieve its objective.
- Investors should refer to the Company's risk management policy with respect to the use of FDI contained in the RMP Statement.
- The Portfolio's global exposure is subject to an advanced risk management process which, in compliance with the UCITS Regulations, aims to ensure that on any day the Absolute VaR of the Portfolio will be no greater than 4.47% of its Net Asset Value. The VaR of the Portfolio is a daily estimation of the maximum loss which the Portfolio may incur over a one day holding period and is arrived at through quantitative simulations with a 99% one tailed confidence interval and using a historical observation period of at least 250 business days. This process is described in detail in the statement of risk management procedures of the Company and its appendix in respect of the Portfolio.
- The Portfolio may be leveraged up to approximately 1500% of its Net Asset Value as a result of its use of FDI, although investors should note that higher levels of leverage may be experienced in certain circumstances, such as, for example, in times of increased volatility, during which the Manager and the Sub-Investment Manager may want to make offsetting trades to seek to manage the risks associated with existing trades. This leverage figure is calculated using the sum of the notionals of the derivatives used, as required by the Central Bank. Using this methodology does not reflect any netting or hedging that the Portfolio may have in place, which will result in a reduction of risk. It is therefore not a risk-adjusted method of measuring leverage, which means this figure is higher than it otherwise would be if such netting and hedging positions would be taken into account.

- For example, the notional value of a US\$1 million USD/EUR FX forward contract will reflect both legs of the contract: the buy leg of €1 million and the sell leg of US\$ 1 million, giving a notional value of greater than US\$2 million notional in total. However only the non-base currency leg (i.e. the Euro leg) of this instrument generates exposure for the Portfolio, meaning that the exposure is €1 million, which is significantly less than the notional value of the instrument. Consequently, using the notional values of FDI in order to measure leverage can lead to leverage figures that are much higher than the level of exposure which the FDI actually generate for the Portfolio. By contrast and notwithstanding that the Portfolio measures, monitors and manages its global exposure using the VaR approach, rather than by use of the Commitment Approach, the leverage of the Portfolio using the Commitment Approach, which does reflect netting and hedging arrangements, is expected to be 400% of its Net Asset Value as a result of its use of FDI, although investors should note that higher levels of leverage may be experienced.
- The Manager and the Sub-Investment Manager may use forward and future currency contracts in order to hedge currency risk, for efficient portfolio management and/or for investment purposes, in each case on a discretionary basis. The use of such hedging techniques may increase the risk profile of the Portfolio.

Typical Investor Profile

The Portfolio may be suitable for the needs of investors seeking to increase the value of their investment over the course of a market cycle, typically three years or longer, through exposure to a diversified portfolio of global currencies that can be readily bought and sold. This is a medium-to-high risk product and investors need to be comfortable with the risks associated with the Portfolio and be prepared to accept periods of market volatility particularly over short time periods. The investor should be prepared to accept periods of market volatility and the risks of the capital markets in pursuit of long term goals. The target return is not guaranteed over a market cycle, a 12-month or any period and the Portfolio may experience periods of negative return. The Portfolio's capital is at risk.

Fees and Expenses

Category	Maximum Initial Charge	Maximum Management fee	Distribution Fee
A, X, Y	5.00%	1.20%	0.00%
B, C1, C2, E	0.00%	1.80%	1.00%

Distribution Policy

Under normal circumstances, the Directors intend that dividends in respect of:

- each of the (Monthly) Distributing Classes in the Portfolio shall be declared on or prior to the last Business Day of each month and paid, notwithstanding the timeframe set out in the “*Distribution Policy*” section of the Prospectus, within five Business Days thereafter;
- each of the (Monthly) Gross Income Distributing Classes in the Portfolio shall be declared on or prior to the last Business Day of each month and paid within three Business Days thereafter;
- each of the other (Gross) Income Distributing Classes in the Portfolio shall be declared on a quarterly basis and paid within thirty Business Days thereafter; and
- each of the other Distributing Classes of the Portfolio shall be declared on a quarterly basis and paid within 30 Business Days thereafter in relation to the Net Income of the Distributing Classes for the previous quarter.

Subscriptions and Redemptions

Subscriptions for Shares in all Classes will be considered during the Initial Offer Period, upon receipt by the Administrator of completed share applications and subscription monies as specified in the “*Subscriptions and Redemptions*” section of the Prospectus. Such Shares will be issued at the Initial Offer Price on the last day of the Initial Offer Period.

Subscriptions in the Portfolio will only be accepted as subscriptions for Shares of a cash value. Subscriptions for specific numbers of Shares will not be accepted.

The Initial Offer Period shall run from 9.00 am on 24 December 2021 to 5.00 pm on 24 June 2022 or such earlier or later time as the Directors may determine at their discretion and notify to the Central Bank and to subscribers.

The Initial Offer Price for each of the share classes shall be as follows:

AUD Classes: AUD 10	DKK Classes: DKK 50	NOK Classes: NOK 100
BRL Classes: BRL 20	EUR Classes: EUR 10	NZD Classes: NZD 10
CAD Classes: CAD 10	GBP Classes: GBP 10	SEK Classes: SEK 100
CHF Classes: CHF 10	HKD Classes: HKD 10	SGD Classes: SGD 20
CLP Classes: CLP 5,000	ILS Classes: ILS 30	USD Classes: USD 10
CNY Classes: CNY 100	JPY Classes: JPY 1,000	ZAR Classes: ZAR 100

Thereafter, Shares will be issued at their Net Asset Value per Share, subject to the provision for Duties and Charges in respect of the issue of the Shares and rounding as provided for in the Articles on each Dealing Day.

The Company reserves the right to apply to Euronext Dublin to have the Shares in each of the Classes admitted to the Official List and to trading on the regulated market of Euronext Dublin.

Notwithstanding anything to the contrary in the “*Subscriptions and Redemptions*” section of the Prospectus:

- subscription monies in respect of the Portfolio should be sent by wire transfer to the relevant account specified in the subscription application form, or by transfer of assets in accordance with the provisions described below, no later than one (1) Business Day after the relevant Dealing Day;
- redemption proceeds in respect of the Portfolio will be paid within ten (10) Business Days of the relevant Dealing Day unless payment has been suspended in the circumstances described under “Temporary Suspension of Dealings” below, although the Company will seek to make such payments within a shorter period of time where possible (up to and including within four (4) Business Days of the relevant Dealing Day); and
- the Portfolio will not be available for exchange. Accordingly, Shareholders may not at any time request the exchange of Shares in the Portfolio for Shares in any other portfolio of the Company, nor may Shareholders request the exchange of Shares in any other portfolio of the Company for Shares in the Portfolio.

Please refer to the “*China PRC QFI Risks*” section of the Prospectus for further information about the QFI regime and potential impact on subscriptions and redemptions.

Neuberger Berman China Bond Fund

An investment in the Portfolio should not constitute a substantial proportion of an investment portfolio and may not be appropriate for all investors.

Investment Objective

The Portfolio aims to achieve a target average return of 3% over the Benchmark (as specified in the “*Benchmark*” section below) before fees over a market cycle (typically 3 years) by primarily investing in fixed income instruments issued in the Chinese local currency markets.

Investors should note that the target return is not guaranteed over a market cycle, a 12-month or any period and the Portfolio’s capital is at risk. Investors should also note that, over the course of a market cycle, there may be significant periods of time during which the performance of the Portfolio will deviate from the targeted return and the Portfolio may experience periods of negative return. There can be no guarantee that the Portfolio will ultimately achieve its investment objective.

Investment Approach

The Portfolio will invest primarily in debt securities and money market instruments which are issued within the PRC by PRC government, PRC government agencies or corporate issuers which have their head office or exercise an overriding part of their economic activity in the PRC and which are denominated in or are exposed to the currency of the PRC via the qualified foreign investor (“**QFI**”) regime, including the Qualified Foreign Institutional Investor (“**QFII**”) and the Renminbi Qualified Foreign Institutional Investor (“**RQFII**”) regimes. For the purposes of the Portfolio, investors should note that public issuers include corporate issuers that are, either directly or indirectly, 100% government-owned. The Portfolio may also invest up to 100% of its Net Asset Value in urban investment bonds, which are debt instruments issued by local government financing vehicles (“**LGFVs**”), as discussed in greater detail in the “*Instruments / Asset Classes*” section below. In respect of the Portfolio’s investment in the PRC, the Portfolio (a) may invest up to 100% of its Net Asset Value via the RQFII capacity of Neuberger Berman Singapore Pte. Limited, a Sub-Investment Manager (b) currently does not intend to invest more than 30% of its Net Asset Value via Bond Connect.

With the exception of permitted investments in transferable securities and money market instruments which are unlisted, all securities invested in by the Portfolio will be listed, dealt or traded on Recognised Markets globally, without any particular focus on any one industrial sector or region. Securities may be rated investment grade or below investment grade by Recognised Rating Agencies or by domestic rating agencies in the PRC or may be unrated.

Under normal market conditions, the Sub-Investment Manager will invest at least two thirds of the Portfolio’s Net Asset Value in debt securities, money market instruments and FDI (as detailed in the “*Instruments / Asset Classes*” section below) with the intention of gaining exposure to the performance of interest rates, credit and/or currency of the PRC. Up to a maximum of one third of the Portfolio’s Net Asset Value may be invested in money market instruments, debt securities and FDI (as detailed in the “*Instruments / Asset Classes*” section below) issued outside the PRC which are denominated in CNH or Hard Currency (defined for the purpose of this Portfolio as US Dollar, Euro, Sterling, Japanese Yen and Swiss Franc). On an ancillary basis, the Portfolio may hold equity securities issued by public or private issuers in the PRC, as a result of the conversion of convertible debt securities or restructuring of debt securities.

The Sub-Investment Manager implements a systematic and disciplined framework for analysing PRC and Hard Currency debt securities. Decisions on how to allocate the Portfolio’s assets between sovereign, agencies and corporate and PRC and Hard Currency Asian country debt securities, money market instruments and FDI are dependent on the Sub-Investment Manager’s outlook on such securities. This outlook focuses on the global market environment, the economic environment of the PRC, the attractiveness of the valuations available in the asset classes and their liquidity. From this outlook, the Sub-Investment Manager determines the amount of

risk that they want the Portfolio to take and seek to allocate across security types accordingly.

Credit analysis of issuers focuses on cash generation, cash flow predictability and event risk analysis, as well as monitoring traditional credit statistics. Issuers that are the best prospects for purchase are subjected to rigorous and thorough business and financial analysis. This analysis is used to form the basis of an investment opinion.

Decisions regarding the interest rate structure of the Portfolio's investments (i.e. the types and diversity of the interest rates which the investments have) are based on the Sub-Investment Manager's outlook for the PRC economy, an in depth valuation of the level and direction of interest rates, the comparison of expectations of inflation which are reflected in bond yields and the prevailing level of inflation and the impact of forecasted levels of real economic activity on inflation expectations.

Central to the investment philosophy is the Sub-Investment Manager's qualitative judgment, which is exercised at all stages of the investment process. This discretion enables them to take into account information and events that cannot be readily quantified, for example political events, shifts in regulatory regimes or the effects of market positioning and hedging.

In order to manage the Portfolio's currency exposures resulting from its investment in debt securities, the Sub-Investment Manager may take positions in currencies, through the use of FDI (as detailed in the "Instruments / Asset Classes" section below), based on a fundamentally driven, relative value approach which is supported by a quantitative framework of indicators that the Sub-Investment Manager uses to assess relative value among currencies. Indicators used include, but are not limited to, economic growth, currency stability, yield, monetary policy, capital flows and risk characteristics, over short-, medium- and long-term investment horizons. The Sub-Investment Manager believes that the ability to manage the Portfolio's currency exposures actively is a significant factor in the management of the risks associated with the Portfolio's investments, in the context of its investment objective.

The portfolio construction process measures and manages the Portfolio's overall risk profile on an on-going basis so that the Portfolio's investment objective may be achieved.

Under normal market conditions, the Sub-Investment Manager anticipates that the Portfolio's:

- Average interest duration will be within the range of 0.5 years and 5 years; and
- Average volatility (a measure of how much the Portfolio's returns may vary over a year) will be within a range of 1-4%.

The Portfolio is actively managed and does not intend to track the Benchmark and is not constrained by it. The Benchmark is included here for performance comparison purposes only. It is not expected that the majority of the Portfolio's assets will be components of the Benchmark. While the Portfolio may acquire securities which are components of the Benchmark, it will not do so because of their inclusion in the Benchmark.

Benchmark

FTSE Chinese Government and Policy Bank Bond 0-1 Year Select Index (CNY, Total Return) which measures the performance of CNY-denominated fixed-rate book entry government bonds as well as policy bank bonds issued in Mainland China.

Shareholders in a Class which is denominated in a currency other than the Base Currency should note that, where available, it may be more meaningful to compare the performance of such Class against a version of this index which is denominated in the relevant Class currency.

Base Currency

CNY.

Instruments / Asset Classes The Portfolio will invest primarily in debt securities and money market instruments, issued by governments, government agencies and corporate issuers in PRC. The Portfolio can invest in or be exposed to the following types of assets.

Fixed Income Securities (Debt Securities). These debt securities may include bonds, bonds with warrants, convertible bonds, bonds resulting from the restructuring of syndicated loans or bank loans (e.g. "Brady" bonds), subordinated bonds, debentures and notes (including freely transferable and unleveraged structured notes and freely transferable promissory notes) and may include:

- Fixed and floating rate securities;
- Bullet debt securities, in respect of which principal is paid upon maturity, or factor debt securities in respect of which principal is paid according to a pre-determined schedule and which can also specify that specific interest payments be added to the principal instead of being paid in cash;
- Investment grade, high yield and unrated debt securities;
- Structured products, such as credit-linked notes and structured notes, which provide indirect access to certain markets or securities;
- On an ancillary basis, privately issued asset-backed securities (including mortgage-backed securities such as pass-through certificates, collateralised mortgage obligations and interest and principal only components of mortgage-backed securities) that derive interest and principal payments from specified assets (such as residential and commercial mortgages, credit card debt and pools of other types of receivables);
- Sukuk structures, which are Islamic finance instruments which represent a proportionate beneficial ownership in an asset or pool of assets. For a determined period, the return associated with the cash flows generated from the assets belongs to the Sukuk holders. The characteristics of a Sukuk are therefore similar to a conventional debt security, with the difference that Sukuks are generally asset-based or asset-backed and carry no interest rate but rather pass the returns generated by the underlying assets to the Sukuk holder; and
- Urban investment bonds issued by LGFVs, which are issued in the PRC Mainland listed bond and interbank bond market and may be rated investment grade or below investment grade by domestic rating agencies in the PRC. These LGFVs are separate legal entities established by local governments and / or their affiliates to raise financing for public welfare investment or infrastructure projects. Although local governments may be seen to be closely connected to urban investment bonds, such bonds are typically not guaranteed by local governments or the central government of the PRC. In this case, investing in urban investment bonds will involve credit risk.

Money Market Instruments. Money market instruments may include bank deposits, fixed or floating rate instruments (including commercial paper), floating or variable rate notes, bankers acceptances, certificates of deposit, debentures and short-dated government or corporate bonds, cash and cash equivalents (including treasury bills) that are rated as investment grade or below by Recognised Rating Agencies or are unrated.

Investment grade securities are highly rated securities, generally those rated Baa3, BBB- or above by one or more Recognised Rating Agencies or rated AA or above by one or more domestic rating agencies in the PRC, while high yield securities are medium or lower rated securities, generally those rated below investment grade and sometimes referred to as "junk bonds".

Collective Investment Schemes. The Portfolio may invest in collective investment schemes which are themselves exposed to investments that are similar to the Portfolio's other investments, provided that the Portfolio may not invest more than 10% of its Net Asset Value in underlying funds (including ETFs which are structured as collective investment schemes) which themselves invest in other collective investment schemes. Such underlying funds may or may not be managed by the Manager and/or the Sub-Investment Manager or its affiliates and will comply with the requirements of the UCITS Regulations in respect of such investments.

The underlying funds in which the Portfolio may invest will be eligible collective investment schemes in accordance with the Central Bank's requirements, which may be domiciled in a Relevant Jurisdiction and will qualify as UCITS or alternative investment fund schemes and will be regulated as such by their home state regulator.

Underlying funds in which the Portfolio invests may be leveraged but such collective investment schemes will not generally be leveraged: (i) in excess of 100% of their net asset value; or (ii) so that their 1 day absolute value-at-risk exceeds 4.47% of their net asset value over a 250 day horizon with a 99% confidence level; or (iii) so that their 1 month relative value-at-risk exceeds twice the value-at-risk of a comparable benchmark portfolio over a 250 day horizon with a 99% confidence level, depending on how such underlying funds measure their global exposure.

ETFs are investment funds whose units may be bought and sold on a securities exchange. ETFs typically invest in a portfolio of securities that is designed to track the performance of particular market segment or index. The ETFs will be located in a Relevant Jurisdiction and will be authorised under the UCITS Directive or will be alternative investment funds which are eligible for investment by the Portfolio in accordance with the requirements of the Central Bank. The ETFs will represent investments that are similar to the Portfolio's other investments. The ETFs will operate on the principle of risk spreading and will not be leveraged.

Financial Derivative Instruments ("FDIs"). Subject to the conditions and limits imposed by the Central Bank as set out in the Prospectus and this Supplement, the Portfolio may use, the following FDI may be used for hedging, efficient portfolio management and/or investment purposes and subject to the conditions and limits imposed by the Central Bank as set out in this Prospectus:

- Futures, options, warrants, rights, swaps and swaptions on debt securities or money market instruments, interest rates and UCITS eligible indices, which may be used to achieve a profit through gaining exposure to an increase in the value of such securities, indices and interest rates, as well as to hedge existing long positions;
- Total return swaps may be used to hedge or take long or short positions to help achieve specific investment objectives. In addition, total return swaps may be used to achieve a profit through gaining exposure to an increase in the value of securities, indices and interest rates. The maximum proportion of the Portfolio's Net Asset Value that can be subject to total return swaps is 10%. The expected proportion of the Portfolio's Net Asset Value that will be subject to total return swaps is 1%. The expected proportions are not limits and the actual percentages may vary over time depending on factors including, but not limited to, market conditions;
- Credit default swaps on single issuers, UCITS eligible indices and/or baskets of securities which may be used to hedge or take long or short credit positions to help achieve specific investment objectives. It is expected that short credit positions will predominantly be taken for hedging but they may also be used for investment purposes where the Sub-Investment Manager identifies an attractive investment opportunity based on the Sub-Investment Manager's fundamental analysis which indicates deteriorating fundamentals of an issuer and/or that a security is overvalued;
- Forward currency contracts and interest rate swaps may be used to take short currency positions;
- Interest rate swaps may be used to take short positions on interest rates; and
- Forward and non-deliverable forward currency contracts, currency futures contracts and transactions, currency options, and currency swaps, which may be used to achieve a profit through gaining exposure to an increase in the value of currencies, as well as to hedge existing long currency positions.

As the Portfolio may purchase FDI generally using only a fraction of the assets that would be needed to purchase the relevant securities directly, the remainder of the assets allocated to the Sub-Investment Manager may be invested in the other types of securities listed above. The Sub-Investment Manager may therefore seek to

achieve greater returns by taking exposure to the performance of such securities through purchasing FDI which give exposure to them rather than purchasing the securities themselves and investing the remaining assets in other such securities to add excess return.

Repo Contracts and Securities Lending Agreements. At the discretion of the Sub-Investment Manager, the Portfolio will enter into Repo Contracts subject to the conditions and limits set out in the Central Bank UCITS Regulations and the Prospectus. Any such Repo Contracts may be used for efficient portfolio management purposes. Notwithstanding the terms of the Prospectus, the maximum proportion of the Portfolio's Net Asset Value that can be subject to Repo Contracts is 90%. The expected proportion of the Portfolio's Net Asset Value that will be subject to Repo Contracts is 60%. The expected proportions are not limits and the actual percentages may vary over time depending on factors including, but not limited to, market conditions.

Securities Lending Agreements may be used subject to the conditions and limits set out in the Prospectus.

Bond Connect

The PBoC and the HKMA have approved the CFETS, CCDC, SHCH, together with Hong Kong Exchanges and Clearing Limited and CMU to launch Bond Connect, which is a mutual bond market access programme between Mainland China and Hong Kong. Bond Connect allows investors to trade electronically between the Mainland China and Hong Kong bond markets without quota restrictions and requirements to identify the ultimate investment amount.

Currently, Bond Connect comprises a Northbound Trading Link between CFETS, the operator of the CIBM and offshore trading access platforms recognised by the PBoC, to facilitate investment by Hong Kong and overseas investors (including the Portfolio) in eligible bonds traded on the CIBM. A Southbound Trading Link, facilitating investment in overseas bond markets by Mainland Chinese investors is still under development but is intended to form part of Bond Connect once established.

Eligible Securities

Hong Kong and overseas investors (including the Portfolio) will be able to trade over the entire range of instruments traded on the CIBM, including products on both the secondary and primary markets.

Trading Day

Northbound investors (including the Portfolio) are able to trade through Bond Connect on days upon which the CIBM is open to trade, regardless of whether they are a public holiday in Hong Kong.

Settlement and Custody

Settlement and custody of Northbound bond trades under Bond Connect will be implemented under the link between the CMU of the HKMA and Mainland China's two bond settlement systems, namely, CCDC and SHCH. The CMU settles Northbound trades and holds the CIBM bonds on behalf of its members in nominee accounts with each of CCDC and SHCH. CCDC and SHCH provide services to foreign investors, directly and indirectly, using Bond Connect.

Bonds purchased by Hong Kong and overseas investors (including the Portfolio) are recorded in an omnibus nominee account at CCDC and SHCH in the name of CMU. The CMU itself maintains the bonds in segregated sub-accounts of its members, who in turn may hold the bonds on their own account or on behalf of other investors or custodians. Accordingly, bonds purchased by Hong Kong and overseas purchasers through Bond Connect are held by the purchaser's global or local custodian in a segregated sub-account opened in their name at the CMU.

Currency

Hong Kong and overseas investors may trade through Bond Connect using offshore RMB (CNH) or by converting foreign currencies into onshore RMB (CNY) under Bond Connect.

Where an investor uses foreign currencies to invest through the Northbound Trading Link, it must open a segregated RMB capital account with an eligible RMB settlement Bank in Hong Kong to convert its foreign currencies into CNY. Where bonds are purchased in CNY in this manner, upon sale of the bonds, the sale proceeds remitted out of Mainland China must be converted back into the relevant foreign currencies.

Further information about Bond Connect is available at:

<http://www.chinabondconnect.com/en/index.htm>

Investment Restrictions

- A maximum of one third of the Portfolio's Net Asset Value may be invested in securities issued outside PRC which are denominated in CNH or Hard Currency (defined for the purpose of this Portfolio as US Dollar, Euro, Sterling, Japanese Yen and Swiss Franc).
- A maximum of 40% of the Portfolio's Net Asset Value may be invested in non-investment grade securities rated by Recognised Rating Agencies or domestic rating agencies in the PRC. For avoidance of doubt, the Sub-Investment Manager may internally assign an unrated debt security the credit rating of its issuer as provided by Recognised Rating Agencies or domestic rating agencies in the PRC at the time of investment, if available. If the issuer credit rating is also not available, the Sub-Investment Manager may assign its own internal rating.
- The Portfolio will not utilise margin lending.

Risk

- The Portfolio is expected to be leveraged up to 200% of its Net Asset Value as a result of its use of FDI, although investors should note that higher levels of leverage may be experienced. This expected leverage figure is calculated using the Sum of the Notionals of the derivatives used, as required by the Central Bank. Using this methodology does not reflect any netting or hedging that the Portfolio may have in place. The Portfolio's global exposure is subject to an advanced risk management process which, in compliance with the UCITS Regulations, aims to ensure that on any day the Absolute VaR of the Portfolio will be no greater than 4.47% of its Net Asset Value (or a maximum 20% over 1 Month). The VaR of the Portfolio is a daily estimation of the maximum loss which the Portfolio may incur over a 20 Business Day holding period and is arrived at through quantitative simulations with a 99% one tailed confidence interval and using an historical observation period of at least 250 business days. This process is described in detail in the statement of risk management procedures of the Company and its appendix in respect of the Portfolio. While the Portfolio measures and monitors its global exposure using the VaR approach, rather than by use of the Commitment Approach, the leverage of the Portfolio using the Commitment Approach is expected to be 140% of its Net Asset Value as a result of its use of FDI, although investors should note that higher levels of leverage may be experienced.
- The Sub-Investment Manager will take a disciplined approach to investing on behalf of the Portfolio by attempting to maintain a portfolio that is typically diversified.
- The Sub-Investment Manager will use forward currency contracts in order to hedge currency risk.
- Investors should refer to the "Investment Restrictions", "Investment Risks" and "Risks Associated with Investment in the China Interbank Bond Market through Bond Connect" sections for information in relation to the risks of investing in mainland China, risks associated with the use of derivative instruments and the Company's risk management policy with respect to FDI contained in the RMP Statement.

Environmental, Social and Governance ("ESG")

This Portfolio meets the classification of an Article 8 Portfolio as it promotes environmental and social characteristics and limits investments to companies that

follow good governance practices.

ESG risks and opportunities are systematically considered in the selection of securities to be constituents of the Portfolio. The Sub-Investment Manager assess securities in relation to their exposure to and the management of ESG risks. ESG represents governance, (being the way in which the company is run), environmental issues, (such as the impact on natural resources), and social issues (such as human rights).

Please also refer to Annex VI of the Prospectus which contains additional information on the ESG characteristics that are applicable to this Portfolio.

Typical Investor Profile

The Portfolio seeks to give access to China bond markets by investing in Chinese debt securities and may be suitable for investors who are seeking a total return (capital appreciation and income) through fixed income investments. Investors need to be comfortable with the risks associated with investment in debt securities within the Greater China region and be prepared to accept periods of market volatility, particularly over short term periods. In addition investors need to be comfortable with the risks associated with the use of FDI. Investors are likely to hold the Portfolio as a compliment to a diversified portfolio and should have a medium or long-term investment horizon. The Portfolio may or may be expected to have medium to high levels of volatility due to its investment policies or portfolio management techniques.

Fees and Expenses

Category	Maximum Initial Charge	Maximum Management fee	Distribution Fee
A, X, Y	5.00%	1.30%	0.00%
B, C1, C2, E	0.00%	1.80%	1.00%
C	0.00%	0.85%	1.00%
D, I, I2, I3, I4, I5	0.00%	0.65%	0.00%

Definitions

In this Supplement the following words and phrases shall have the meanings indicated below:

Business Day	a day (except Saturday or Sunday) on which the relevant financial markets in London and New York are open for business;
Dealing Day	each Business Day or such other day or days as the Directors may determine and notify to the Administrator and to Shareholders in advance, provided there shall be at least two (2) Dealing Days per month in the Portfolio at regular intervals;
Dealing Deadline	3.00 pm (Irish time) on the relevant Dealing Day. In exceptional circumstances a Director may authorise the acceptance of a subscription or redemption application, up to 4.30 pm (Irish time) on the relevant Dealing Day;
Net Asset Value Calculation Time	10.00 pm (Irish time) on the relevant Dealing Day or such other time as the Directors may determine in respect of the Portfolio;
Portfolio	the Neuberger Berman Uncorrelated Strategies Fund;
Portfolio Costs	all fees and expenses of the Portfolio (including the management fee but excluding the distribution fee (where such distribution fee is applicable)). Notwithstanding the fact that different management fees apply to each Class, a management fee of 0.75% shall be assumed for the purpose of the Portfolio's investment objective in the statement above;
Sub-Investment Manager	Neuberger Berman Europe Limited, Neuberger Berman Investment Advisers LLC, or such other company as may be appointed by the Manager from time to time in respect to the Portfolio, with the prior approval of the Company and the Central Bank; and
Uncorrelated	with respect to each strategy identified in the " <i>Investment Approach</i> " section, shall mean strategies which are expected by the Sub-Investment Manager to demonstrate low correlation to traditional asset classes (such as global equity and global fixed income markets) over a full investment cycle.

Investment Risks

Investment in the Portfolio carries certain risks, which are described in the "*Investment Risks*" section of the Prospectus and in the "Risk" section in this Supplement. **These risks are not purported to be exhaustive and potential investors should review this Supplement and the Prospectus in their entirety and consult with their professional advisers, before making an application for Shares.**

There can be no assurance that the Portfolio will achieve its objective.

Distribution Policy

Under normal circumstances, the Directors intend that dividends in respect of:

- each of the (Monthly) Distributing Classes in the Portfolio shall be declared on or prior to the last Business Day of each month and paid within three Business Days thereafter; and
- each of the other Distributing Classes shall be declared on an annual basis and paid within 30 Business Days thereafter.

Subscriptions and Redemptions

Subscriptions for Shares in all Classes in the Portfolio which have not already launched at the date of this Supplement will be considered during the Initial Offer Period, upon receipt by the Administrator of completed share applications and subscription monies as specified in the “*Subscriptions*” section of the Prospectus. Such Shares will be issued at the Initial Offer Price on the last day of the Initial Offer Period.

The Initial Offer Period shall run from 9.00 am on 24 December 2021 to 5.00 pm on 24 June 2022 or such earlier or later time as the Directors may determine at their discretion and notify to the Central Bank and to subscribers.

The Initial Offer Price for each of the share classes shall be as follows:

AUD Classes: AUD 10	DKK Classes: DKK 50	NOK Classes: NOK 100
BRL Classes: BRL 20	EUR Classes: EUR 10	NZD Classes: NZD 10
CAD Classes: CAD 10	GBP Classes: GBP 10	SEK Classes: SEK 100
CHF Classes: CHF 10	HKD Classes: HKD 10	SGD Classes: SGD 20
CLP Classes: CLP 5,000	ILS Classes: ILS 30	USD Classes: USD 10
CNY Classes: CNY 100	JPY Classes: JPY 1,000	ZAR Classes: ZAR 100

Thereafter and, in the case of Classes which have already launched, from the date of this Supplement, Shares will be issued at their Net Asset Value per Share, subject to the provision for Duties and Charges in respect of the issue of the Shares and rounding as provided for in the Articles on each Dealing Day.

The Company reserves the right to apply to Euronext Dublin to have the Shares in each of the Classes admitted to the Official List and to trading on the regulated market of Euronext Dublin.

The Company may, in its sole discretion, reject any subscription in whole or in part without reason.

As stated in the “*Subscriptions and Redemptions*” section of the Prospectus, redemption proceeds in respect of the Portfolio will be paid within ten (10) Business Days of the relevant Dealing Day unless payment has been suspended in the circumstances described in the “*Temporary Suspension of Dealings*” section of the Prospectus, although the Company will seek to make such payments within a shorter period of time where possible (up to and including within three (3) Business Days of the relevant Dealing Day).

Neuberger Berman Uncorrelated Strategies Fund

An investment in the Portfolio should not constitute a substantial proportion of an investment portfolio and may not be appropriate for all investors. Investors should note that the Portfolio may achieve its investment objective by investing principally in financial derivative instruments as described below which may be complex and sophisticated in nature. An investment in the Portfolio is not in the nature of a deposit in a bank account and is not protected by any government, government agency or other guarantee scheme which may be available to protect the holder of a bank deposit account. The value of Shares may go down as well as up and investors may not get back any of the amount invested.

Investment Objective

The Portfolio aims to achieve a target average return of 5% over cash (as specified in the “*Benchmark*” section below) after Portfolio Costs over a market cycle (typically 3 years) from a diversified portfolio of Uncorrelated investment strategies.

Investors should note that the target return is not guaranteed over a market cycle, a 12-month or any period and the Portfolio’s capital is at risk. Investors should also note that, over the course of a market cycle, there may be significant periods of time during which the performance of the Portfolio will deviate from the targeted return and the Portfolio may experience periods of negative return. There can be no guarantee that the Portfolio will ultimately achieve its investment objective.

Investment Approach

The Portfolio will allocate its assets to fully discretionary investment advisers, outlined in the “*Advisers*” sub-section below, which employ a variety of investment strategies and will invest globally without a focus on any particular industrial sector.

The Sub-Investment Manager is responsible for selecting each adviser to which assets will be allocated, for determining the amount of the Portfolio’s assets to allocate to each adviser and for managing such portion of the Portfolio’s assets that are not allocated to an adviser. Unless otherwise indicated, the term “*Adviser*” will be used in the supplement to mean (i) an external adviser appointed by the Sub-Investment Manager, as described above (an “*External Adviser*”), (ii) the Sub-Investment Manager acting as an adviser as described above or (iii) an affiliate of the Sub-Investment Manager appointed to act as an adviser by the Sub-Investment Manager (an “*Internal Adviser*”), in respect of a portion of the assets of the Portfolio. The Sub-Investment Manager will allocate the Portfolio’s assets to Advisers whose strategies the Sub-Investment Manager believes, when combined to form a single portfolio, can provide attractive risk-adjusted returns consistent with the Portfolio’s Investment Objective.

Exposure may be taken to a country or region through investment in companies or instruments that are listed or traded on stock exchanges or markets globally.

The Sub-Investment Manager will review a range of qualitative and quantitative factors when determining or reviewing the allocations to Advisers, including each Adviser’s investment style and historical performance and the holdings in the Adviser’s allocated assets. The Sub-Investment Manager will typically seek to target Advisers with Uncorrelated investment strategies, with a goal of building an overall portfolio of strategies which will have a low correlation to global equity and global fixed income markets over a full investment cycle. The Portfolio will invest in strategies that the Sub-Investment Manager believes will be sufficiently liquid to facilitate the daily dealing cycle of the Portfolio and capable of being priced accurately on a daily basis. The Sub-Investment Manager will monitor the performance of each Adviser and may, in their absolute discretion discontinue and adjust the allocation of assets to all or any of the Advisers at any time subsequent to their appointment. This will include taking into consideration whether the strategies followed by the Advisers continue, in the view of the Sub-Investment Manager, to be consistent with the Investment Objective of the Portfolio. The Advisers will each be regulated in their country of domicile for the purposes of investment management and have been approved to act as discretionary investment managers in respect of Irish collective investment schemes by the Central Bank.

The Sub-Investment Manager intends to allocate the Portfolio’s assets among a selection of the following strategies, which they believe are appropriate for the Portfolio and will assist in delivery of the Investment Objective, as set out above. Subject to agreed risk parameters established with the Sub-Investment Manager and which will be consistent with those

described below (including, amongst others, the VaR and leverage limits disclosed in the “*Risk*” section below) in respect of the Portfolio, the relevant Adviser will have full discretion, in executing each of these strategies, to select the assets that it purchases on behalf of the Portfolio based on its experience of implementing the relevant strategy, current market conditions and the Investment Objective of the Portfolio. The assets of the Portfolio will be diversified across the strategies so that no more than 50% of the Net Asset Value of the Portfolio will be allocated to any one strategy at any one time. In addition, no more than 30% of the Net Asset Value of the Portfolio will be allocated to any one Adviser at any one time. When allocating assets among the Advisers, the Sub-Investment Manager will take into account the expected volatility of returns on the portion of the Portfolio’s assets allocated to an Adviser (which will be based on the expected volatility of the strategy which the Adviser will employ), as compared both to the other appointed Advisers and to traditional asset classes, such as global equity and global fixed income markets. None of the strategies will be regarded as a principal strategy of the Portfolio. Unless otherwise indicated, each of the strategies may invest in or employ any of the asset classes or instruments set out below in the “*Instruments / Asset Classes*” sub-section.

• **Trend Following:**

This strategy employs a range of quantitative algorithms, which are proprietary to the Adviser, that seek to identify long and synthetic short investment opportunities based on trends in the global financial markets. The strategy involves using a wide variety of FDI and securities to invest across multiple asset classes, seeking absolute returns with limited correlation to the broad equity and fixed income markets. The strategy seeks to identify price trends which occur over trading time horizons which are typically medium to long term, defined as having an investment horizon of multi-week to multi-month time periods.

• **Short Term Futures Trading:**

This strategy employs a range of quantitative algorithms, which are proprietary to the Adviser, that seek to identify long and synthetic short investment opportunities based on short term price patterns in the global financial markets and involves using futures contracts relating to equity, bond, currency and interest rate markets and currency forwards and securities to invest across multiple asset classes, seeking absolute returns with limited correlation to the broad equity and fixed income markets. Trading time horizons are typically short term, defined as having an investment horizon of intra-day to multi-week time periods.

• **Global Macro Investing:**

This strategy involves a top-down global approach to investing. The Adviser will typically take long and synthetic short positions in equity and fixed income securities and FDI referencing equity and/or fixed income securities, in an effort to benefit from those investments which the Adviser believes have the highest probability to increase in value (long positions) and those that have the highest probability to decrease in value (synthetic short positions). The Adviser seeks to identify such opportunities by applying fundamental macro-economic theory to consider and analyse factors such as the economic and political environments in countries and/or regions around the world. Specifically, the Adviser will consider factors such as: interest rate levels, monetary and fiscal policy, currency exchange rates, unemployment levels, GDP and geopolitical events and their effect on the economy of the country, region or the world.

• **Quantitative Equity Market Neutral:**

This strategy takes long and synthetic short positions in equity securities and FDI referencing equity securities based on a statistical approach to assessing whether the securities are likely to increase or decrease in value, respectively, in an attempt to generate an absolute return. The proprietary models used by the Adviser to make these assessments will attempt to assess the value of securities based on analysing information such as company accounting data from profit and loss account, balance sheet and cash flow statements, data from public guidance and statements by company management teams, earnings estimates provided by external equity sell-side analysts and price movements of the securities being analysed. The proprietary models will use this data to assign ratings in order to rank securities by perceived value and will then take long positions in securities with high ratings and synthetic short positions in those with low ratings. The net market exposure (the sum of long and synthetic short positions) of this strategy will typically aim to be neutral, meaning that long positions will generally be of a similar market exposure to synthetic short positions.

• Discretionary Equity Market Neutral:

This strategy takes long and synthetic short positions in equity securities and FDI referencing equity securities, based on whether the Adviser believes the securities are likely to increase or decrease in value, respectively. The net market exposure (the sum of long and synthetic short positions) of this strategy will typically aim to be neutral, meaning that long positions will generally be of a similar market exposure to synthetic short positions. The Adviser will not use a statistical approach to selecting long and synthetic short positions, but will use discretionary judgement to determine over or under-valuation based on an assessment of factors such as the outlook for a company's industry, a company's management strategy, the company's competitive position versus peers, trends and levels of revenues, cash-flow, earnings and margins relative to the company's stock price, as well as considering other information from the company's financial statements and management guidance.

• Statistical Arbitrage:

This strategy takes long and synthetic short positions in equity securities and FDI referencing equity securities in an attempt to generate an absolute return while maintaining a low net exposure to the general direction of the market (i.e. rising or falling). The Adviser will deploy a model-driven approach based on an analysis of the price behaviour of different securities and FDI and the relationship between this price behaviour and that of other securities or FDI expected to demonstrate correlated behaviour ("related securities"). The goal is to identify price relationships or ranges between securities and related securities and therefore to understand when one security is over- or underpriced relative to the related securities, based on their historic traded prices. The model will then seek to take synthetic short positions in securities expected to decrease in value relative to related securities or long positions in securities expected to rise in value relative to related securities

• Options Arbitrage:

This strategy takes long and synthetic short positions in equity and fixed income securities and options referencing equity and fixed income securities in an attempt to generate an absolute return maintaining a low net exposure to the general direction of the market (i.e. rising or falling). The Adviser will focus on analysing different options markets to attempt to identify mis-pricings within options contracts using fundamental and/or statistical techniques. Fundamental techniques will entail a discretionary analysis of the underlying security or market referenced by an option, to take a view on whether the value of that security or market is likely to rise or fall. Statistical techniques will use quantitative models to analyse option pricing data in order to identify whether options contracts are over- or underpriced.

• Insurance / Reinsurance:

This strategy takes long and synthetic short positions in catastrophe (or "Cat") bonds and are linked to specifically defined loss events caused by the natural catastrophes of earthquake, windstorm or similar phenomena. The principal of a given Cat bond is potentially redeemable (and subject to partial, or in some cases total, loss) upon the occurrence of an insured loss event to which the bond is contractually linked, but should no insured loss event occur the Cat bond will pay out a pre-determined coupon that is expected to be uncorrelated to global equity and fixed income markets. The strategy seeks to build a diversified portfolio of select securities and FDI in order to capture the risk premium embedded in them (i.e. the higher levels of return which are available from investment in these securities to reflect the level of risk associated with them). The Advisers take positions based upon their assessment of whether the relevant FDI or Cat bond is over- or underpriced relative to the risk of loss.

• Other Strategies:

From time to time, where the Sub-Investment Manager deems such strategies to be consistent with the Portfolio's Investment Objective and overall investment policies and uncorrelated to traditional asset classes such as global equity and global fixed income markets, the Portfolio may invest in other investment strategies. In such circumstances, the investment policies of the Portfolio will be updated in advance of the implementation of any such other strategies.

At present the Sub-Investment Manager does not anticipate the above strategies becoming correlated (i.e. showing a high correlation to global equity and global fixed income markets over a full investment cycle). However, in the event that this should occur, the Sub-Investment Manager will consider whether a particular strategy should continue to be used and will exclude strategies which demonstrate persistent correlation with global equity and global fixed income markets over a full investment cycle. Investors should note that whilst the Sub-

Investment Manager does not anticipate the Portfolio as a whole or the above strategies becoming correlated to traditional asset classes over a full investment cycle, there is a risk that over a short term period that the Portfolio as a whole or that some of the strategies invested in may demonstrate correlation to traditional asset classes.

As the Portfolio may employ strategies which use a large number of FDI (as more fully described in the “*Instruments / Asset Classes*” section below), particularly futures, it may hold a significant proportion of its assets in cash or money market instruments to ensure that it has adequate cover for the margin requirements associated with such investments. Furthermore, in exceptional circumstances when the Sub-Investment Manager and/or any adviser anticipate adverse market, economic, political or other conditions, the Portfolio may invest primarily in cash or money market instruments or leave a significant portion of the Portfolio’s Net Asset Value of its assets uninvested for defensive purposes. The Sub-Investment Manager may also use FDIs such as put options including purchasing puts on UCITS eligible indices and put spreads on indices (i.e. buying and selling an equal number of puts on the same index with differing strike prices or expiration dates) and futures contracts based on indices for defensive purposes and such indices may include commodity indices that have been cleared in advance by the Central Bank for use by UCITS. The Sub-Investment Manager will do so in cases where this would reduce the Portfolio’s exposure to a particular security, sector, region, market or asset class in order to help avoid losses. However, if markets move in opposition to the Sub-Investment Manager’s analysis, then this could result in lost opportunity to the Portfolio.

At all times the Sub-Investment Manager retains the discretion to invest the Portfolio’s assets directly including in the event that an Adviser is terminated.

Under normal market conditions, the Sub-Investment Manager anticipates that the Portfolio’s average volatility (a measure of how much the Portfolio’s returns may vary over a year) will be within a range of 7-10%.

Although the Portfolio will concentrate its investments in the US or other OECD countries, the Portfolio may also invest in securities of companies located in and governments of Emerging Market Countries, which may involve additional risk, relative to investment in more developed economies.

The Portfolio is actively managed and does not intend to track the Benchmark and is not constrained by it. The Benchmark is included here for performance comparison purposes only. It is not expected that the majority of the Portfolio’s assets will be components of the Benchmark. While the Portfolio may acquire securities which are components of the Benchmark, it will not do so because of their inclusion in the Benchmark.

Benchmark	ICE BofA US Dollar 3-Month Deposit Offered Rate Constant Maturity Index (USD). Shareholders in a Class which is denominated in a currency other than the Base Currency should note that, where available, it may be more meaningful to compare the performance of such Class against a version of this index which is denominated in the relevant Class currency.
Base Currency	US Dollars (USD).
Instruments / Asset Classes	The Portfolio will, through the Advisers and the Sub-Investment Manager primarily invest in or take exposure to the following assets, which may be issued and listed or traded on Recognised Markets globally. The Portfolio can invest in or be exposed to the following types of assets. Equity and Equity-linked Securities. Equity securities of companies of any market capitalisation and industrial sector, which may include common and preferred stocks, rights and warrants to purchase common stock, depositary receipts, real estate investment trusts (“REITs”), exchange traded funds (“ETFs”), partnership interests and interests in special purpose acquisition vehicles. Fixed Incomes Securities (Debt Securities). Both fixed and floating rate debt securities, including bonds, convertible bonds which may embed FDI and / or leverage, debentures, contingent convertible bonds (subject to a maximum of 10% of the Net Asset Value),

catastrophe bonds and notes (including freely transferable and unleveraged structured notes and freely transferable promissory notes) issued by governments, government agencies and corporate entities. Debt securities may be rated investment grade, high yield or unrated and include the following:

- Asset-backed securities issued by non-governmental issuers in the OECD (including mortgage-backed securities such as pass-through certificates, collateralised mortgage obligations and interest and principal only components of mortgage-backed securities) that derive interest and principal payments from specified assets (such as agency and/or non-agency residential mortgages and commercial mortgages, credit card debt and pools of other types of receivables) which may embed FDI and / or leverage;
- Global liquid currencies (including, without limitation, Australian Dollars, Canadian Dollars, Swiss Franc, Euro, Sterling, Japanese Yen, Norwegian Krone, New Zealand Dollars, Swedish Krona and US Dollars);
- Payment-in-kind bonds (which are bonds that pay interest in the form of additional bonds of the same kind); and
- Deferred payment securities (securities which pay regular interest after a predetermined date) and zero coupon securities.

Money Market Instruments. Money market instruments, which may include bank deposits, fixed or floating rate instruments (including commercial paper), floating or variable rate notes, bankers acceptances, certificates of deposit, debentures and short-dated government or corporate bonds, participation interests in loans (which are securitised and freely transferable), cash and cash equivalents (including treasury bills) that are rated as investment grade or below by Recognised Rating Agencies or are unrated. Money market instruments will not embed FDI and / or leverage.

Investment grade securities are highly rated securities, generally those rated Baa3, BBB- or above by one or more Recognised Rating Agencies, while high yield securities are medium or lower rated securities, generally those rated below investment grade and sometimes referred to as "junk bonds".

Collective Investment Schemes. In addition, the Portfolio may invest in collective investment schemes which are themselves exposed to investments that are similar to the Portfolio's other investments, provided that the Portfolio may not invest more than 10% in other collective investment schemes which themselves invest in other collective investment schemes. Such collective investment schemes may or may not be managed by the Manager or the Sub-Investment Manager or their affiliates and will comply with the requirements of the UCITS Regulations in respect of such investments.

The other collective investment schemes in which the Portfolio may invest will be eligible collective investment schemes in accordance with the Central Bank's rules, which may be domiciled in Relevant Jurisdictions or the United States of America and will qualify as UCITS or AIF schemes and will be regulated as such by their home state regulator.

Collective investment schemes in which the Portfolio invests may be leveraged but such collective investment schemes will not generally be leveraged (i) in excess of 200% of their net asset value; or (ii) so that their 1 day absolute VaR exceeds 4.47% of their net asset value over a 250 day horizon with a 99% confidence level; or (iii) so that their 1 month relative VaR exceeds twice the VaR of a comparable benchmark portfolio over a 250 day horizon with a 99% confidence level, depending on how such collective investment funds measure their global exposure.

Financial Derivative Instruments ("FDI"). The following FDI will be used for hedging, efficient portfolio management and/or investment purposes and subject to the conditions and limits imposed by the Central Bank as set out in this Prospectus. The following FDI may provide exposure to any or all of the asset classes listed above:

- Futures contracts based on fixed income securities, equity securities, UCITS eligible equity indices, UCITS eligible bond indices, UCITS eligible commodity indices, interest rates and currencies may be used to achieve a profit as well as to hedge existing long positions;
- Options on fixed income securities, interest rates, equity securities, UCITS eligible equity

indices, UCITS eligible volatility indices, UCITS eligible bond indices and UCITS eligible commodity indices, volatility and currencies may be used to achieve a profit as well as to hedge existing long positions;

- Swaps (including contracts for difference and swaptions), interest rate, volatility, variance, credit default, UCITS eligible indices, total return and currency swaps (each in respect of each of the other types of assets in which the Portfolio may invest, as described in this “*Instruments / Asset Classes*” section) may be used to achieve a profit as well as to hedge existing long positions. The maximum proportion of the Portfolio’s Net Asset Value that can be subject to total return swaps is 30%. The expected proportion of the Portfolio’s Net Asset Value that will be subject to total return swaps is 10%. The expected proportions are not limits and the actual percentages may vary over time depending on factors including, but not limited to, market conditions;
- Forwards on securities of the types described above, equity indices (which meet the requirements of and have been cleared by the Central Bank for use by UCITS), interest rates and currencies and non-delivery currency forwards may be used to achieve a profit as well as to hedge existing long positions;
- Notes (including structured notes and index linked notes) and convertible bonds may be used to achieve a profit as well as to hedge existing long positions; and
- Warrants may be used to achieve a profit as well as to hedge existing long positions.

The Portfolio may invest in swap agreements, futures, options on futures and structured notes and commodity-index-linked notes (which may be listed or OTC), which embed FDI, including swap agreements, futures or options to gain exposures to any indices and sub-indices referencing commodities (including but not limited to any index within the Dow Jones-UBS Commodity family of indices) which meet with the requirements of and have been cleared by the Central Bank for use by UCITS. Details of the specific indices utilised by the Portfolio and the types of commodities they reference will be available from the Sub-Investment Manager on request and contained in the annual report produced in respect of the Portfolio. These FDI will provide exposure to the investment returns of the commodities markets without investing directly in physical commodities. The Portfolio may also invest in common and preferred stocks as well as convertible securities of issuers in commodity-related industries. Any indices in which the Portfolio invests will be rebalanced monthly or less frequently, but no less frequently than annually. Rebalancing may result in an increase in the costs of the Portfolio.

In the event that market movements in respect of constituents of an index result in such index becoming over concentrated in one or more constituents such that the index no longer complies with relevant UCITS diversification requirements, the Adviser in question will review the Portfolio’s exposure to such index in conjunction with the Sub-Investment Manager and may terminate this exposure until such time as the index comes back into compliance with the UCITS diversification requirements.

As the Portfolio may purchase FDI generally using only a fraction of the assets that would be needed to purchase the relevant securities directly, the remainder of the assets allocated to the Adviser may be invested in the other types of securities listed above. The Adviser may therefore seek to achieve greater returns by taking exposure to the performance of such securities through purchasing FDI which give exposure to them rather than purchasing the securities themselves and investing the remaining assets in other such securities to add excess return.

Repo Contracts and Security Lending Agreements. At the discretion of the Sub-Investment Manager, the Portfolio will enter into Repo Contracts subject to the conditions and limits set out in the Central Bank UCITS Regulations and in the Prospectus. Any such Repo Contracts may be used for efficient portfolio management purposes. Notwithstanding the terms of the Prospectus, the maximum proportion of the Portfolio’s Net Asset Value that can be subject to Repo Contracts is 30%. The expected proportion of the Portfolio’s Net Asset Value that will be subject to Repo Contracts is 5%. The expected proportions are not limits and the actual percentages may vary over time depending on factors including, but not limited to, market conditions.

Securities Lending Agreements may be used subject to the conditions and limits set out in the Prospectus.

Investment Restrictions

- Although the Portfolio has no constraint in terms of credit rating or country exposure, the Sub-Investment Manager and the Advisers will take a disciplined approach to investing on behalf of the Portfolio with the intention of maintaining a portfolio that is typically diversified across strategies, issuers, industry sectors, regions and within the scope of the Portfolio's investment objective.
- No more than 50% of the Net Asset Value of the Portfolio will be allocated to any one strategy at any one time.
- No more than 30% of the Net Asset Value of the Portfolio will be allocated to any one Adviser at any one time.
- No more than 15% of the Portfolio's Net Asset Value will be invested in catastrophe bonds.
- Only Portman Square (as defined in the "Advisers" section below) will be permitted to invest in contingent convertible bonds on behalf of the Portfolio, subject to a limit of 10% of the Portfolio's Net Asset Value.
- Only Portman Square and AllianceBernstein (as defined in the "Advisers" section below) will be permitted to invest in interests in special purpose acquisition vehicles on behalf of the Portfolio, subject to a limit of 5% of the Portfolio's Net Asset Value.
- The Portfolio will not utilise margin lending.

Risk

- Investment in the Portfolio carries certain risks which are described in greater detail in the "Investment Risks" section of the Prospectus. While investors should read and consider the entire "Investment Risks" section of the Prospectus, the risks summarised in the following section, namely, "Risks related to Financial Derivative Instruments" are particularly relevant to this Portfolio. **These risks are not purported to be exhaustive and potential investors should review this Supplement and the Prospectus in their entirety and consult with their professional advisers, before making an application for Shares.**
 - Investors should refer to the Company's risk management policy with respect to the use of FDI contained in the RMP Statement.
 - The Portfolio may be leveraged up to approximately 750% of its Net Asset Value as a result of its use of FDI, although investors should note that higher levels of leverage may be experienced. This leverage figure is calculated using the sum of the notional values of the derivatives used, as required by the Central Bank. Using this methodology does not reflect any netting or hedging that the Portfolio may have in place. The Portfolio's global exposure is subject to an advanced risk management process which, in compliance with the UCITS Regulations, aims to ensure that on any day the Absolute VaR of the Portfolio will be no greater than 4.47% of its Net Asset Value. The VaR of the Portfolio is a daily estimation of the maximum loss which the Portfolio may incur over a one day holding period and is arrived at through quantitative simulations with a 99% one tailed confidence interval and using a historical observation period of at least 250 business days. This process is described in detail in the statement of risk management procedures of the Company and its appendix in respect of the Portfolio. While the Portfolio measures and monitors its global exposure using the VaR approach, rather than by use of the Commitment Approach, the leverage of the Portfolio using the Commitment Approach is expected to be 500% of its Net Asset Value as a result of its use of FDI, although investors should note that higher levels of leverage may be experienced.
 - The Portfolio may take synthetic long or synthetic short positions and the investment strategies are expected to involve leverage as a result of the use of FDI for investment and hedging purposes as outlined above. The Portfolio's net market exposure may vary in time, however the Portfolio's net long positions are not expected to exceed 175% of its Net Asset Value and its net short positions are not expected to exceed -175% of its Net Asset Value, depending on the Sub-Investment Manager's and/or the relevant Adviser's analysis of the prevailing market conditions and considered in light of the investment objective of the Portfolio.
 - Total return swaps and Repo Contracts may embed leverage as a result of their exposure to underlying securities. Therefore, the exposure limits set out above in relation to total return swaps and Repo Contracts should be considered in conjunction with the other leverage disclosures earlier in this "Risk" section.
 - The Sub-Investment Manager and/or the Advisers may use forward and future currency contracts in order to hedge some currency risk on a discretionary basis. The use of such hedging techniques may increase the risk profile of the Portfolio.
 - The Portfolio's returns may deviate from overall market returns to a greater degree than other funds that do not employ an absolute return focus. Thus, the Portfolio might not benefit as much as funds following other strategies during periods of strong market
-

-
- performance. Also, the employment of hedging strategies, if any, in an attempt to mitigate risk may cause the Portfolio's returns to be lower than if hedging had not been employed.
- The Portfolio's performance is dependent upon the success of the Sub-Investment Manager and the Advisers in implementing the Portfolio's investment strategies in pursuit of its goal. To a significant extent, the Portfolio's performance will depend on the success of the Sub-Investment Manager's methodology in allocating the Portfolio's assets to Advisers and its selection and oversight of the Advisers. The Advisers' investment styles may not always be complementary, which could adversely affect the performance of the Portfolio. Some Advisers have little experience managing mutual funds which, unlike the hedge funds these Advisers have been managing, are subject to daily inflows and outflows of investor cash and are subject to certain legal and tax-related restrictions on their investments and operations.
 - The Portfolio may be invested in arbitrage strategies which involve the risk that underlying relationships between securities in which investment positions are taken may change in an adverse manner or in a manner not anticipated by Adviser, in which case the Portfolio may realise losses.
 - The Portfolio may invest in strategies which may engage in active and frequent trading and may have a high portfolio turnover rate, which may increase the Portfolio's transaction costs and may affect the Portfolio's performance adversely, in comparison to strategies which would result in a lower portfolio turnover rate.
 - Futures trading investment strategies may employ quantitative algorithms that rely heavily on the use of proprietary and non-proprietary data, software and intellectual property that may be licensed from a variety of sources. The quality of the investment selections produced by the portfolio construction process depends on a number of factors including the accuracy of voluminous data inputs into the quantitative models used in the investment process, the mathematical and analytical underpinnings of the coding, the accuracy in translating those analytics into program code, the speed that market conditions change and the successful integration of the various quantitative models in the portfolio selection process. To a significant extent, the performance of a strategy that utilises quantitative investment techniques will depend on the success of implementing and managing the investment models that assist in allocating assets of the Portfolio which are exposed to such strategy. Models that have been formulated on the basis of past market data may not be predictive of future price movements. Models may not be reliable if unusual or disruptive events cause market moves the nature or size of which are inconsistent with the historic performance of individual markets and their relationship to one another or to other macroeconomic events. Models may also have hidden biases or exposure to broad structural or sentiment shifts. In the event that actual events fail to conform to the assumptions underlying such models, losses could be incurred. Each component of the investment process has elements that present the possibility for human error. Because the financial markets are constantly evolving, most trading systems and models require continual monitoring and enhancements. There is no guarantee that such enhancements to the various quantitative models will be identified or implemented on a timely basis or that they will be successful. The use of a trading system or model that is not effective could at any time have a material adverse effect on the performance of the Portfolio. The successful deployment of the portfolio construction process could be severely compromised by unforeseeable software or hardware malfunction and other technological failures, power loss, software bugs, malicious code such as "worms," viruses or system crashes or various other events or circumstances within or beyond the control of the relevant Adviser. Quantitative investment techniques also present the risk that errors may occur and such errors may be extremely hard to detect. In some cases, an error can go undetected for a long period of time. In many cases it is not possible to fully quantify the impact of an error given the dynamic nature of the quantitative models and changing markets. Analytical errors, software errors, development errors and implementation errors as well as data errors are inherent risks. Quantitative investment techniques often require timely and efficient execution of transactions. Inefficient execution of trades can eliminate the ability to capture the pricing differentials that the strategy seeks to capture.
 - The incentive arrangements for the Portfolio involve the payment of performance fees to Advisers and could create an incentive for the Advisers to select riskier or more speculative trades than would be the case in the absence of such an arrangement. The payment of the performance fee will be based on performance which may include net realised and net unrealised gains and losses as at the end of each Calculation Period. As a result, payments of performance fees may be made in respect of unrealised gains which may subsequently never be realised.
-

- The methodology used by the Company in calculating the performance fees in respect of the Portfolio may result in inequalities as between Shareholders in relation to the payment of performance fees (with some investors paying disproportionately higher or lower performance fees in certain circumstances) and may also result in certain Shareholders having more or less of their capital at risk at any time than others.

Advisers

The Sub-Investment Manager will engage Advisers to provide investment management services. Each Adviser makes investment decisions in respect of the assets of the Portfolio which it has been allocated to manage, subject to the overall supervision of the Sub-Investment Manager. The Sub-Investment Manager oversees the Advisers for compliance with the Portfolio's investment objective, policies, the strategies (as set out at "*Investment Approach*" above) and restrictions, and monitors each adviser's adherence to its investment style.

Details of the Internal Adviser appointed by the Sub-Investment Manager are as follows:

- NB Alternatives Advisers LLC ("NBAA") located at 325 N Saint Paul Street, Suite 4900 Dallas, TX 75201, USA. As of 30 June 2021, NBAA managed approximately US\$73.3 billion in total assets.

Details of the External Advisers appointed by the Sub-Investment Manager are as follows:

- Altiq LLP ("Altiq") located at 29 Farm Street, London W1J 5RL, United Kingdom. As of 30 June 2021, Altiq managed approximately US\$725 million in total assets.
- BH-DG Systematic Trading LLP ("BH-DG") located at 3rd Floor, 10 Grosvenor Street, London, W1K 4QB, United Kingdom. As of 30 June 2021, BH-DG managed approximately US\$2,148 million in total assets.
- P/E Global LLC ("P/E Global") located at 75 State Street, 31st Floor, Boston, MA 02109, USA. As of 30 June 2021, P/E Global managed approximately US\$15,100 million in total assets.
- True Partner Capital USA Holding Inc ("True Partner") located at 111 West Jackson boulevard, Suite 1700, Chicago, IL 60604, USA. As of 30 June 2021, True Partner managed approximately US\$1,568 million in total assets.
- Alcova Asset Management LLP ("Alcova") located at 21 Knightsbridge, London SW1X 7LY, United Kingdom. As of 30 June 2021, Alcova managed approximately US\$404 million in total assets.
- Sandbar Asset Management LLP ("Sandbar") located at Warnford Court, 29 Throgmorton Street, London, EC2N 2AT, United Kingdom. As of 30 June 2021, Sandbar managed approximately US\$2,319 million in total assets.
- Crabel Capital Management, LLC ("Crabel") located at 10250 Constellation Blvd., Suite 2650, Los Angeles, CA 90067. As of 30 June 2021, Crabel managed approximately US\$7,911 million in total assets.
- AllianceBernstein L.P. ("AllianceBernstein") located at 1345 Avenue of the Americas, New York, NY 10105. As of 30 June 2021, AllianceBernstein managed approximately US\$2,557 million in total assets.
- Portman Square Capital LLP ("Portman Square") located at 116 Park Street, London, W1K 6SS. As of 30 June 2021, Portman Square managed approximately US\$503 million in total assets.
- Soloda Investment Advisors LLP ("Soloda") located at 3rd Floor Strand Bridge House, 138-142 Strand, London, WC2R 1HH. As of 30 June 2021, Soloda managed approximately US\$141 million in total assets.

Typical Investor Profile

Investment in the Portfolio may be suitable for investors who are prepared to accept the risks of an absolute return investment approach to multiple asset classes over the medium to long term. This includes investing in global equity and bond markets, with the potential to allocate to securities of Emerging Market Countries and/or below investment grade securities together with medium to high levels of volatility due to the Portfolio's investment policies or portfolio management techniques.

Fees and Expenses

Category	Maximum Initial Charge	Maximum Management Fee	Distribution Fee
A, X, Y	5.00%	1.50%	0.00%
B, C1, C2, E	0.00%	1.80%	1.00%
C	0.00%	1.00%	1.00%
D, I, I2, I3, I4, I5	0.00%	0.75%	0.00%

For details of the Administration Fees payable by the Portfolio, please see the “Administration Fees” heading in the “Fees and Expenses” section of the Prospectus.

Contingent deferred sales charges

Contingent deferred sales charges will be payable in respect of the following Classes at the rates specified below, depending on the period that has elapsed since the issue of the Shares being redeemed and will be charged on the lower of the Net Asset Value per Share on the relevant Dealing Day in respect of which the relevant Shares were (i) initially subscribed or (ii) redeemed. Any such contingent deferred sales charges will be paid to the relevant Distributor, the Manager or to the Sub-Investment Manager.

Class	Redemption Period in Calendar Days				
	< 365	365 - 729	730 - 1094	1095 – 1459	> 1459
B	4%	3%	2%	1%	0%
C, C1	1%	0%	0%	0%	0%
C2	2%	1%	0%	0%	0%
E	3%	2%	1%	0%	0%

Adviser Fees

An External Adviser may be entitled to receive a performance fee (the “Adviser Performance Fee”) payable out of the Portfolio’s assets and as described more fully below. However, for the avoidance of doubt, no performance fees will be paid to the Sub-Investment Manager or the Internal Adviser on any portion of the Portfolio’s assets which is managed by the Sub-Investment Manager or the Internal Adviser acting in the capacity of an Adviser. All Classes in the Portfolio are PF Classes.

Definitions

Allocated Portion	The part of the Portfolio for which an External Adviser is responsible.
Calculation Period	<p>The Calculation Period shall normally run from 1 January to 31 December in each year except that:</p> <ul style="list-style-type: none"> in the case of the initial appointment of an External Advisor, the Calculation Period will run from the date of appointment to 31 December; in the case of the termination of an External Adviser, the Calculation Period will terminate on the date of the termination; and in the case of the termination of the Sub-Investment Management Agreement in any year, the Calculation Period will terminate on the date of the termination.

Crystallisation	The point at which any Adviser Performance Fee becomes payable to the External Adviser. Crystallisation in respect of an External Adviser will occur either (i) at the end of the Calculation Period; (ii) due to the Sub-Investment Manager reducing the capital allocated to the relevant Allocated Portion (iii) termination of the appointment of that External Adviser
High Water Mark	In respect of an External Adviser, the greater of: (i) the Net Asset Value of its Allocated Portion at its appointment; and (ii) the value that that Allocated Portion has achieved at the end of any previous Calculation Period in respect of which an Adviser Performance Fee was paid, adjusted for any subscriptions and/or redemptions affecting the Allocated Portion.

Methodology

An Adviser Performance Fee is payable to an External Adviser only with respect to the relevant Allocated Portion and only from the time that the Sub-Investment Manager appoints that External Adviser to manage the Allocated Portion until such time, if ever, that the External Adviser ceases to manage the Allocated Portion.

For each Calculation Period in which the net asset value of the Allocated Portion exceeds the High Water Mark (net of all allocated costs before the deduction of any accrued Performance Fee, provided that in doing so it is in the Shareholder's best interest), the Adviser Performance Fee payable will be equal to the increase in the Allocated Portion's net asset value above the High Water Mark, multiplied by the relevant External Adviser's Adviser Performance Fee rate, as agreed with the Sub-Investment Manager, which shall not exceed 20%.

The Adviser Performance Fee will be calculated and accrued daily as at each Valuation Point. The Adviser Performance Fee is calculated on the unswung net asset value of the relevant Allocated Portion, i.e. before any adjustment for swing pricing (for more information on "swing pricing" please see the "*Determination of Net Asset Value – Adjustments of Valuations and Swing Pricing*" section of the Prospectus).

Portfolio expenses (excluding Management Fees) are allocated pro rata to each Allocated Portion and to the portion of the Portfolio's assets that are not allocated to an External Adviser and the Adviser Performance Fee in respect of each Allocated Portion is calculated and paid after the deduction of the portion of such expenses which is attributable to the relevant Allocated Portion.

The Adviser Performance Fee will normally be payable to an External Adviser in arrears within 30 Business Days of 31 December each year. However, in the event of the Crystallisation of an Adviser Performance Fee during a Calculation Period, the accrued Adviser Performance Fee in respect of such amounts will be payable within 30 Business Days of the end of the calendar quarter during which the Crystallisation occurred.

Crystallised Adviser Performance Fees shall remain in the Portfolio until paid to the External Adviser and shall not participate in subsequent gains and losses of the Allocated Portion. Crystallised Adviser Performance Fees shall not be used or made available to satisfy redemptions or pay any fees and expenses of the relevant Allocated Portion, the Portfolio or the Company (other than Adviser Performance Fees payable to the External Adviser).

The Depositary shall verify the calculation of any Adviser Performance Fee and ensure that it is not open to the possibility of manipulation.

Investors should note that, as the Adviser Performance Fee is calculated and may be payable to an External Adviser with respect to the performance of its Allocated Portion and not the performance of the Portfolio as a whole, it is possible that the Portfolio could pay an Adviser Performance Fee to an External Adviser in circumstances where the overall performance of the Portfolio as a whole is negative. This could occur where, for example, during a Calculation Period one External Adviser's Allocated Portion performs well but the remaining External Advisers' Allocated Portions perform negatively and the aggregate total of the negative performance exceeds that of the positive performance of the External Adviser receiving the Adviser Performance Fee.

Adviser Performance Fees are payable on realised and unrealised capital gains, which for the avoidance of doubt includes investment income, taking into account realised and unrealised losses at the end of the Calculation Period. Consequently, Adviser Performance Fees may be paid on unrealised gains which may subsequently never be realised.

External Advisers may charge research expenses to the Portfolio through the provision of an annual research budget for the Portfolio, as agreed with the Company.

Worked Examples

Examples 1 to 3 show how the Adviser Performance Fee is calculated, accrued and crystallised.

- All valuation points fall within one Calculation Period, hence the High Water Mark is solely adjusted from allocations to or from an External Adviser.
- The examples are based on starting capital of US\$100,000,000 and the Allocable Portfolio Capital is adjusted for inflows or outflows from the Portfolio.
- The Allocated Portion Net Value reflects the expenses that have been assigned to each External Adviser.
- The Net Asset Value per Share reflects the accrual of the Adviser Performance Fee.

Portfolio

Valuation point	1	2	3	4
NAV per Share	US\$10.000	US\$10.100	US\$9.900	US\$10.300

High Water Mark Allocations	US\$25,000,000	US\$27,500,000	US\$27,500,000	US\$27,500,000
		US\$2,500,000		

Example 1

Investor A acquires Shares at valuation point 1 for US\$10.000 each.

	Acquisition of Shares	Accrual of Adviser Performance Fees				
		Adviser A	Adviser B	Adviser C	Adviser D	Portfolio
Valuation point 1	US\$10.000	US\$0	US\$0	US\$0	US\$0	US\$0
Valuation point 2		US\$240,000	US\$45,000	US\$0	US\$0	US\$285,000
Valuation point 3		US\$187,000	US\$43,890	US\$0	US\$99,000	US\$329,890
Valuation point 4		US\$334,030	US\$0	US\$0	US\$0	US\$334,030

Example 2

Investor B acquires Shares at valuation point 3 for US\$9.900 each, with US\$329,775 of Adviser Performance Fees accrued within the NAV.

	Acquisition of Shares	Accrual of Adviser Performance Fees				
		Adviser A	Adviser B	Adviser C	Adviser D	Portfolio
Valuation point 1		US\$0	US\$0	US\$0	US\$0	US\$0
Valuation point 2		US\$240,000	US\$45,000	US\$0	US\$0	US\$285,000
Valuation point 3	US\$9.900	US\$187,000	US\$43,890	US\$0	US\$99,000	US\$329,890
Valuation point 4		US\$334,030	US\$0	US\$0	US\$0	US\$334,030

Example 3

Investor C acquires Shares at valuation point 1 for US\$10.000 each and redeems at valuation point 4 with US\$334,336 of Adviser Performance Fees accrued within the NAV. The Sub-Investment Manager instructs the redemption to be withdrawn from the Allocated Portions of Adviser A and Adviser C, therefore a Crystallisation will occur for the Adviser Performance Fee for those External Advisers and the Adviser Performance Fee will be reflected in the NAV that Investor C receives.

	Acquisition of Shares	Accrual of Adviser Performance Fees				
		Adviser A	Adviser B	Adviser C	Adviser D	Portfolio
Valuation point 1	US\$10.000	US\$0	US\$0	US\$0	US\$0	US\$0
Valuation point 2		US\$240,000	US\$45,000	US\$0	US\$0	US\$285,000
Valuation point 3		US\$187,000	US\$43,890	US\$0	US\$99,000	US\$329,890
Valuation point 4	US\$10.300	US\$334,030	US\$0	US\$0	US\$0	US\$334,030

SCENARIOS¹

All scenarios show the value of the entire Portfolio, each External Adviser has an allocation of US\$25,000,000

Management Fee

A management fee may, depending upon the arrangements with that Adviser, also be paid to an Adviser in respect of its Allocated Portion. The Sub-Investment Manager shall pay the management fee payable to any Adviser out of the fees payable to the Sub-Investment Manager by the Manager.

For further information on fees, please refer to the "Fees and Expenses" section of the Prospectus.

The Directors of the Company whose names appear in the “*Management and Administration*” section of the Prospectus accept responsibility for the information contained in this document. To the best of the knowledge and belief of the Directors (who have taken all reasonable care to ensure that such is the case) the information contained in this document is in accordance with the facts and does not omit anything likely to affect the importance of such information. The Directors accept responsibility accordingly.

NEUBERGER BERMAN INVESTMENT FUNDS PLC

(An investment company with variable capital constituted as an umbrella fund with segregated liability between sub-funds under the laws of Ireland and authorised by the Central Bank of Ireland pursuant to the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations 2011, as amended)

THEMATIC EQUITY SUPPLEMENT

23 DECEMBER 2021

This document forms part of, and should be read in the context of and together with, the prospectus dated 23 December 2021 as may be amended from time to time (the “Prospectus”) in relation to Neuberger Berman Investment Funds plc (the “Company”) and contains information relating to the following sub-funds, each of which is a separate portfolio of the Company:

NEUBERGER BERMAN GLOBAL THEMATIC EQUITY FUND

NEUBERGER BERMAN NEXT GENERATION MOBILITY FUND

NEUBERGER BERMAN 5G CONNECTIVITY FUND

NEUBERGER BERMAN INNOVASIA 5G FUND

Distribution Policy

Under normal circumstances, the Directors intend that dividends in respect of:

- each of the (Monthly) Distributing Classes in the Portfolios shall be declared on or prior to the last Business Day of each month and paid within three Business Days thereafter;
- each of the other Distributing Classes of the Neuberger Berman Global Thematic Equity Fund shall be declared on

a quarterly basis and paid within 30 Business Days thereafter in relation to the Net Income of the Distributing Classes for the previous quarter; and

- each of the other Distributing Classes in the other Portfolios shall be declared on an annual basis and paid within 30 Business Days thereafter in relation to the Net Income of the Distributing Classes for the calendar year ended the previous 31 December.

Subscriptions and Redemptions

Subscriptions for Shares in all Classes of each Portfolio which have not already launched at the date of this Supplement will be considered during the Initial Offer Period, upon receipt by the Administrator of completed share applications and subscription monies as specified in the “*Subscriptions*” section of the Prospectus. Such Shares will be issued at the Initial Offer Price on the last day of the Initial Offer Period.

The Initial Offer Period shall run from 9.00 am on 24 December 2021 to 5.00 pm on 24 June 2022 or such earlier or later time as the Directors may determine at their discretion and notify to the Central Bank and to subscribers.

The Initial Offer Price for each of the share classes shall be as follows:

AUD Classes: AUD 10	DKK Classes: DKK 50	NOK Classes: NOK 100
BRL Classes: BRL 20	EUR Classes: EUR 10	NZD Classes: NZD 10
CAD Classes: CAD 10	GBP Classes: GBP 10	SEK Classes: SEK 100
CHF Classes: CHF 10	HKD Classes: HKD 10	SGD Classes: SGD 20
CLP Classes: CLP 5,000	ILS Classes: ILS 30	USD Classes: USD 10
CNY Classes: CNY 100	JPY Classes: JPY 1,000	ZAR Classes: ZAR 100

Thereafter and, in the case of Classes which have already launched, from the date of this Supplement, Shares will be issued at their Net Asset Value per Share, subject to the provision for Duties and Charges in respect of the issue of the Shares and rounding as provided for in the Articles on each Dealing Day.

The Company reserves the right to apply to Euronext Dublin to have the Shares in each of the Classes admitted to the Official List and to trading on the regulated market of Euronext Dublin.

The Company may, in its sole discretion, reject any subscription in whole or in part without reason.

As stated in the “*Subscriptions and Redemptions*” section of the Prospectus, redemption proceeds in respect of the Portfolios will be paid within ten (10) Business Days of the relevant Dealing Day unless payment has been suspended in the circumstances described in the “*Temporary Suspension of Dealings*” section of the Prospectus, although the Company will seek to make such payments within a shorter period of time where possible (up to and including within three (3) Business Days of the relevant Dealing Day).

Neuberger Berman Global Thematic Equity Fund

Investors should note that the Portfolio may achieve its investment objective by investing in financial derivative instruments as described below. The Portfolio will not use FDI extensively or primarily for investment purposes.

Investment Objective	The Portfolio seeks to achieve long-term capital appreciation through investment in a portfolio of equity holdings that are exposed to global long-term themes.
-----------------------------	---

Investment Approach	The Portfolio will seek to achieve its objective by investing primarily in equity securities that are listed or traded on Recognised Markets globally (which may include Emerging Market Countries) and issued by companies across all market capitalisations and industrial sectors.
----------------------------	---

In seeking to achieve the Portfolio's investment objective, the Sub-Investment Manager pursues the following investment process which are described in further detail below:

- Identifies secular themes (i.e. broad changes and trends affecting societies, economies and industries) that have the potential for long-term influence (e.g. the rising value of water).
- Undertakes qualitative business analysis to identify companies which operate within those identified themes: Conducts in-depth research and analysis of companies, including of company/business models, quality of management, competitive strength and record of success.
- Undertakes quantitative screening: Screens for stocks that it believes have the potential for high return on equity and cash flow strength that stand to benefit from a particular theme.
- Transaction Discipline: Seeks companies that it believes have 50% - 100% capital appreciation potential over three to five years and determine entry and exit price targets based on current market prices for the securities and the preceding analysis, that guide buy and sell decisions.

The Sub-Investment Manager conducts fundamental research to seek to identify multiple globally applicable long-term themes that result from secular shifts based on factors such as demographic, technological, environmental and societal changes. The themes identified by the Sub-Investment Manager are expected to typically have a minimum time horizon of 7-10 years.

After creating a universe of companies that it determines offer exposure to a specific theme, the Sub-Investment Manager evaluates the companies seeking to identify the best in class companies with sustainable advantages around the world. The Sub-Investment Manager believes sustainable advantages are demonstrated through best in class product, technology, processes and market access. The Sub-Investment Manager will review the financial position and results of the companies. In-person management meetings are then conducted with members of senior management of the relevant companies to assess business metrics and quality of management team.

The Portfolio seeks to adopt a high conviction approach, which is expected to result in a concentrated portfolio of 20-30 stocks.

The Portfolio seeks to reduce risk by diversifying among many industries within the countries and economic sectors. Although, it has the flexibility to invest a significant portion of its assets in one country or region, it generally intends to remain diversified across countries and geographical regions.

The Portfolio is actively managed and does not intend to track the Benchmark and is not constrained by it. The Benchmark is included here for performance comparison purposes only. It is not expected that the majority of the Portfolio's assets will be components of the Benchmark. While the Portfolio may acquire securities which are components of the Benchmark, it will not do so because of their inclusion in the Benchmark.

Benchmark	The MSCI World Index (Total Return, Net of Tax, USD) is a free float-adjusted market capitalisation weighted index that is designed to measure the equity market
------------------	--

performance of developed markets.

Shareholders in a Class which is denominated in a currency other than the Base Currency should note that, where available, it may be more meaningful to compare the performance of such Class against a version of this index which is denominated in the relevant Class currency.

Base Currency	US Dollars (USD).
Instruments / Asset Classes	<p>The Portfolio can invest in or be exposed to the following types of assets.</p> <p>Equity and Equity-linked Securities. These securities may include, without limitation, common stock, preferred stock, convertible bonds, convertible preferred stock and American, European and Global Depository Receipts, which are securities issued by a financial institution which evidence ownership interests in a security or a pool of securities deposited with the financial institution.</p> <p>ETFs. ETFs are investment funds whose shares are bought and sold on a securities exchange. ETFs invest in a portfolio of securities designed to track a particular market segment or index, in this case global equity markets. The ETFs will be located in Relevant Jurisdictions and will be authorised under the UCITS Directive or will be alternative investment funds which are eligible for investment by the Portfolio in accordance with the requirements of the Central Bank. The ETFs will represent investments that are similar to the Portfolio's other investments. The ETFs will operate on the principle of risk spreading and will not be leveraged.</p> <p>Equity Real Estate Investment Trusts ("REITs"). REITs are companies or trusts that pool investor money and invest mainly in income producing real estate, although it should be noted that the Portfolio will not acquire any real estate directly. REITs may invest in a diverse range of real estate properties or may specialise in a particular type of property. The REITs which the Portfolio will invest in may be based globally and will give exposure to underlying properties located in globally. They will invest the majority of their assets directly in real property and derive their income from rents and capital gains from appreciation realised through property sales.</p> <p>Participatory Notes ("P-Notes") which are securities issued by banks or broker-dealers that are designed to replicate the performance of certain issuers and markets by giving exposure to the performance of specific stocks that the Portfolio may not be able to invest in directly because of local holding restrictions affecting such stocks in the jurisdiction of their issue. The Portfolio shall only invest in listed P-Notes.</p> <p>Financial Derivative Instruments ("FDIs") subject to the conditions and limits imposed by the Central Bank as set out in this Supplement, the Portfolio may use FDI, including warrants (including equity warrants), equity rights, convertible bonds and convertible preferred stock and single stock options which may be used for investment purposes in pursuing the investment objective, efficient portfolio management or to hedge. Convertible bonds enable the holder to convert their investment in the bonds into the issuer's common stock at a pre-agreed price and convertible preferred stock enable the holder to convert their investment in the preferred stock into the issuer's common stock at a pre-agreed rate. Forward currency contracts and currency futures may be used in order to hedge currency risk. UCITS eligible indices options may be used to hedge or efficiently manage some portions or all of the Portfolio. Such FDI may provide exposure to any or all of the asset classes listed above.</p> <p>Collective Investment Schemes. The Portfolio may invest in collective investment schemes which are themselves exposed to investments that are similar to the Portfolio's other investments, provided that the Portfolio may not invest more than 10% in other collective investment schemes (including ETFs which are structured as collective investment schemes) which themselves invest in other collective investment schemes. Such collective investment schemes may or may not be managed by Sub-Investment Manager or its affiliates and will comply with the requirements of the UCITS Regulations in respect of such investments.</p> <p>The other collective investment schemes in which the Portfolio may invest will be</p>

eligible collective investment schemes in accordance with the Central Bank's rules, which may be domiciled in Relevant Jurisdictions or the United States of America, will qualify as UCITS or AIF schemes and will be regulated as such by their home state regulator.

Collective investment schemes in which the Portfolio invests may be leveraged but such collective investment schemes will not generally be leveraged (i) in excess of 100% of their net asset value; or (ii) so that their 1 day absolute value-at-risk exceeds 4.47% of their net asset value over a 250 day horizon with a 99% confidence level; or (iii) so that their 1 month relative value-at-risk exceeds twice the value-at-risk of a comparable benchmark portfolio over a 250 day horizon with a 99% confidence level, depending on how such collective investment funds measure their global exposure.

Fixed Income Securities (Debt Securities). The Portfolio may invest in debt instruments issued by corporate or government issuers, which may be rated or unrated (although not more than 30% of NAV will be invested in debt instruments which are rated below investment grade) and may have fixed or floating interest rates.

Repo Contracts and Securities Lending Agreements. The Portfolio may use Repo Contracts and Securities Lending Agreements subject to the conditions and limits set out in the Prospectus.

Investment Restrictions

The Portfolio may expose up to 10% of its Net Asset Value in aggregate to the performance of other collective investment schemes which will comply with both the "Investment Restrictions" section of the Prospectus and the UCITS Regulations.

It is the intention of the Sub-Investment Manager to invest a maximum of 20% of the Portfolio's available assets in Emerging Market Countries.

The Portfolio will not utilise total return swaps or margin lending.

Risk

- Investment in the Portfolio carries certain risks which are described in greater detail in the "Investment Risks" section of the Prospectus. Investors should read and consider the entire "Investment Risks" section of the Prospectus, the risks summarised in the following section, namely "Concentration Risk", which is contained within the "Market Risks" section, are particularly relevant to the Portfolio. **These risks are not purported to be exhaustive and potential investors should review this Supplement and the Prospectus in their entirety and consult with their professional advisers, before making an application for Shares.**
- Investors should refer to the Company's risk management policy with respect to the use of FDI contained in the RMP Statement.
- The Sub-Investment Manager may use future foreign currency exchange contracts in order to hedge some currency risk.
- The Portfolio may have or may be expected to have medium to high volatility due to its investment policies or portfolio management techniques.
- The Portfolio may be leveraged as a result of its investments in FDI but such leverage will not exceed 100% of the Portfolio's Net Asset Value, as measured using the Commitment Approach, at any time.

Environmental, Social and Governance ("ESG")

This Portfolio meets the classification of an Article 8 Portfolio as it promotes environmental and social characteristics and limits investments to companies that follow good governance practices.

ESG risks and opportunities are considered in the selection of securities to be constituents of the Portfolio. The Sub-Investment Manager assesses companies in relation to their exposure to and the management of ESG risks. ESG represents governance, (being the way in which the company is run), environmental issues, (such as the impact on natural resources), and social issues (such as human rights).

Please also refer to Annex VI of the Prospectus which contains additional information on the ESG characteristics that are applicable to this Portfolio.

Typical Investor Profile

The Portfolio may be suitable for investors seeking capital appreciation opportunities through equity investments in global securities exposed to long-term investment themes. Investors need to be comfortable with the risks associated with the Portfolio

and be prepared to accept periods of market volatility particularly over short time periods. Investors are likely to have a medium to long-term investment horizon.

Fees and Expenses

Category	Maximum Initial Charge	Maximum Management fee	Distribution Fee
A, Y	5.00%	1.70%	0.00%
X	5.00%	0.85%	1.00%

For details of the Administration Fees payable by the Portfolio, please see the “Administration Fees” heading in the “Fees and Expenses” section of the Prospectus.

Contingent deferred sales charges

Contingent deferred sales charges will be payable in respect of the following Classes at the rates specified below, depending on the period that has elapsed since the issue of the Shares being redeemed and will be charged on the lower of the Net Asset Value per Share on the relevant Dealing Day in respect of which the relevant Shares were (i) initially subscribed or (ii) redeemed. Any such contingent deferred sales charges will be paid to the relevant Distributor, the Manager or to the Sub-Investment Manager.

E	3%	2%	1%	0%	0%

Neuberger Berman Next Generation Mobility Fund

An investment in the Portfolio should not constitute a substantial proportion of an investment portfolio and may not be appropriate for all investors. Investors should note that the Portfolio may achieve its investment objective by investing in financial derivative instruments as described below. The Portfolio will not use FDI extensively or primarily for investment purposes. An investment in the Portfolio is not in the nature of a deposit in a bank account and is not protected by any government, government agency or other guarantee scheme which may be available to protect the holder of a bank deposit account. The value of Shares may go down as well as up and investors may not get back any of the amount invested.

Investment Objective	The Portfolio seeks to achieve long-term capital appreciation through investing primarily in a portfolio of global equity holdings, focusing on companies that are involved or derive benefit from Next Generation Mobility.
-----------------------------	--

Investment Approach	The Portfolio will seek to achieve its objective by primarily investing in equity securities that are listed or traded on Recognised Markets globally (which may include Emerging Market Countries) and issued by companies across all market capitalisations and economic sectors. The Portfolio may invest in companies of any market capitalisation but shall typically invest in companies that have market capitalisation greater than USD 500 million at time of purchase.
----------------------------	--

In seeking to achieve the Portfolio's investment objective, the Sub-Investment Manager pursues the following investment process (which is described in further detail below) to identify a universe of companies that offer exposure to Next Generation Mobility:

- Qualitative business analysis: to identify companies which operate within the long-term trend of the proliferation of autonomous, electric and connected vehicles ("Next Generation Mobility"), as well as companies that are well-positioned to benefit from the new business models related to Next Generation Mobility;
- Quantitative screening: to identify stocks that it believes may be too illiquid or have too small a market capitalisation;
- Strategic valuation and analysis: in-depth research and analysis of companies, including of company/business models, quality of management, competitive strength and record of success; and
- Security selection and portfolio construction: Selects companies with the ability to provide solutions to drive Next Generation Mobility that it believes have 50% - 100% capital appreciation potential over three to five years and determine entry and exit price targets based on current market prices for the securities and the preceding analysis, that guide buy and sell decisions.

Using this universe, the Sub-Investment Manager further evaluates those companies, seeking to identify the best in class companies, with sustainable advantages around the world. The Sub-Investment Manager believes sustainable advantages are demonstrated through best in class product, technology, processes and market access. The Sub-Investment Manager will review the financial position and results of the companies. In-person management meetings, where possible, are then conducted with members of senior management of the relevant companies to assess financial and operating metrics (e.g. sales growth and product offering) and the quality of the company's management team.

The fundamental research seeks to identify companies with the following characteristics:

- Stock prices which are undervalued relative to long-term cash flow growth potential;
- Industry leadership companies with high market share, pricing power, or better technology/business models relative to peers, or new entrants gaining market share;
- Potential for significant improvement in the company's business (e.g. top line growth greater than market/peers, margin expansion, and/or increased cash flow generation);
- Strong financial characteristics, including growth, margins, and/or capital returns and historic valuations on metrics such as price to cash flow, price to earnings or price to book value; and

- Proven management track record.

The Portfolio seeks to reduce risk by diversifying across countries and economic sectors. Although, it has the flexibility to invest a significant portion of its assets in one country or region, it generally intends to remain diversified across countries and geographical regions.

The Portfolio may invest directly in China A Shares through the Stock Connects, as described below.

The Portfolio may also invest in debt instruments and money market instruments on an ancillary basis.

Investors should note that this Portfolio seeks to apply the Sustainable Exclusion Policy that has been adopted by the Sub-Investment Manager along with the application of the exclusions set out in the Enhanced Sustainable Exclusion Policy, as such terms are defined within the “*Sustainable Investment Criteria*” section of the Prospectus. Investors should refer to the information contained in that section for further details about the application of both the Sustainable Exclusion Policy and Enhanced Sustainable Exclusion Policy to the Portfolio.

The Portfolio is actively managed and does not intend to track the Benchmark and is not constrained by it. The Benchmark is included here for performance comparison purposes only. It is not expected that the majority of the Portfolio’s assets will be components of the Benchmark. While the Portfolio may acquire securities which are components of the Benchmark, it will not do so because of their inclusion in the Benchmark.

Benchmark

The MSCI All-Country World Index (ACWI) (Total Return, Net of Tax, USD) is a free float-adjusted market capitalisation weighted index that is designed to measure the equity market performance of developed and emerging markets.

Shareholders in a Class which is denominated in a currency other than the Base Currency should note that, where available, it may be more meaningful to compare the performance of such Class against a version of this index which is denominated in the relevant Class currency.

Base Currency

US Dollars (USD).

Instruments / Asset Classes

The Portfolio can invest in or be exposed to the following types of assets.

Equity and Equity-linked Securities. These securities may include, without limitation, common stock, preferred stock, convertible bonds, convertible preferred stock and American, European and Global Depository Receipts, which are securities issued by a financial institution which evidence ownership interests in a security or a pool of securities deposited with the financial institution.

Equity Real Estate Investment Trusts (“REITs”). REITs are companies or trusts that pool investor money and invest mainly in income producing real estate, although it should be noted that the Portfolio will not acquire any real estate directly. REITs may invest in a diverse range of real estate properties or may specialise in a particular type of property. The REITs which the Portfolio will invest in may be based globally and will give exposure to underlying properties located in globally. They will invest the majority of their assets directly in real property and derive their income from rents and capital gains from appreciation realised through property sales. Exposure to REITs may also arise when the Sub-Investment Manager identifies opportunities in such securities which are linked / support the evolution of Next Generation Mobility (such as data centre REITs).

Participatory Notes (“P-Notes”). P-Notes are securities issued by banks or broker-dealers that are designed to replicate the performance of issuers and markets (in which the Portfolio can invest directly) by giving exposure to the performance of specific stocks that the Portfolio may not be able to invest in directly because of local holding restrictions affecting such stocks in the jurisdiction of their issue. The Portfolio shall only invest in listed P-Notes for India.

Financial Derivative Instruments (“FDI”). FDI will be used for investment, hedging and/or efficient portfolio management and subject to the conditions and limits imposed by the Central Bank as set out in the Prospectus and this Supplement:

- Warrants and rights may be used to take exposure to equity securities of the type described above.
- Single stock options may be used to take exposure to equity securities of the type described above and UCITS eligible equity index options may be used to hedge or efficiently manage some portions or all of the Portfolio
- Convertible Bonds and Convertible Preferred Stock. Convertible bonds enable the holder to convert their investment in the bonds into the issuer’s common stock at a pre-agreed price and convertible preferred stock enable the holder to convert their investment in the preferred stock into the issuer’s common stock at a pre-agreed rate.
- Forward currency contracts may be used to hedge currency risk.

As the Portfolio may purchase FDI generally using only a fraction of the assets that would be needed to purchase the relevant securities directly, the remainder of the assets allocated to the Portfolio may be invested in the other types of securities listed above. The Sub-Investment Manager may therefore seek to achieve greater returns by purchasing derivative instruments and investing the remaining assets in such other securities as listed above to achieve a rate of return greater than the market. The indices utilised for hedging or efficient portfolio management purposes will be broad-based, UCITS-eligible indices which provide exposure to the performance of equities and details of such indices pertaining to the instruments utilised by the Portfolio will be contained in the annual report of the Company.

Collective Investment Schemes. The Portfolio may invest in collective investment schemes (including ETFs which are structured as collective investment schemes) which are themselves exposed to investments that are similar to the Portfolio’s other investments, provided that the Portfolio may not invest more than 10% of its Net Asset Value in other collective investment schemes which themselves invest in other collective investment schemes. Such collective investment schemes may or may not be managed by the Manager and/or the Sub-Investment Manager or its affiliates and will comply with the requirements of the UCITS Regulations in respect of such investments.

The other collective investment schemes in which the Portfolio may invest will be eligible collective investment schemes in accordance with the Central Bank’s rules, which may be domiciled in Relevant Jurisdictions or the United States of America, will qualify as UCITS or AIF schemes and will be regulated as such by their home state regulator.

Collective investment schemes in which the Portfolio invests may be leveraged but such collective investment schemes will not generally be leveraged (i) in excess of 200% of their net asset value; or (ii) so that their 1 day absolute value-at-risk exceeds 4.47% of their net asset value over a 250 day horizon with a 99% confidence level; or (iii) so that their 1 month relative value-at-risk exceeds twice the value-at-risk of a comparable benchmark portfolio over a 250 day horizon with a 99% confidence level, depending on how such collective investment funds measure their global exposure.

ETFs. ETFs are investment funds whose shares are bought and sold on a securities exchange. ETFs invest in a portfolio of securities designed to track a particular market segment or index. The ETFs will be located in Relevant Jurisdictions and will be authorised under the UCITS Directive or will be alternative investment funds which are eligible for investment by the Portfolio in accordance with the requirements of the Central Bank. The ETFs will represent investments that are similar to the Portfolio’s other investments. The ETFs will operate on the principle of risk spreading and will not be leveraged.

Fixed Income Securities (Debt Securities). The Portfolio may invest in debt instruments, such as bonds and notes, issued by corporate or government issuers, which may be rated or unrated (although not more than 10% of NAV will be invested in debt instruments which are rated below investment grade) and may have fixed or

floating interest rates and will not embed derivatives.

Money Market Instruments. The Portfolio may invest in money market instruments, which may include bank deposits, fixed or floating rate instruments (including commercial paper), floating or variable rate notes, bankers acceptances, certificates of deposit, debentures and short-dated government or corporate bonds, cash and cash equivalents (including treasury bills), or money market funds which meet the criteria set out under “Collective Investment Schemes” above, in each case that are rated as investment grade or below by Recognised Rating Agencies or are unrated.

Investment grade securities are highly rated securities, generally those rated Baa3, BBB- or above by one or more Recognised Rating Agencies, while high yield securities are medium or lower rated securities, generally those rated below investment grade and sometimes referred to as “junk bonds”.

Repo Contracts and Securities Lending Agreements. The Portfolio may use Repo Contracts and Securities Lending Agreements subject to the conditions and limits set out in the Prospectus.

Stock Connects

The China Securities Regulatory Commission and the Securities and Futures Commission of Hong Kong have approved programs which establish mutual stock markets access between the PRC and Hong Kong, namely the Stock Connects. The Sub-Investment Manager may pursue the Portfolio’s investment objective by investing up to 30% of the Portfolio’s Net Asset Value directly in certain eligible China A Shares via the Stock Connects.

The Shanghai Stock Connect is a securities trading and clearing linked program developed by the SEHK, the SSE and ChinaClear, with the aim of achieving mutual stock market access between the SEHK and the SSE. The Shenzhen Stock Connect is a securities trading and clearing linked program developed by the SEHK, the SZSE and ChinaClear, with the aim of achieving mutual stock market access between the SEHK and the SZSE.

Each of the Shanghai Stock Connect and Shenzhen Stock Connect comprises a Northbound Trading Link and a Southbound Trading Link. Under the Northbound Trading Link, Hong Kong and overseas investors (including the Portfolio), through their Hong Kong brokers and a securities trading service company established by the SEHK, may trade eligible shares listed on the SSE and the SZSE by routing orders to the SSE and the SZSE respectively.

Eligible securities

Hong Kong and overseas investors will be able to trade certain SSE Securities. Eligible securities under the Northbound Trading Link of the Shanghai Stock Connect include all the constituent stocks from time to time of the SSE 180 Index and SSE 380 Index, and all the SSE-listed China A Shares that are not included as constituent stocks of the relevant indices but which have corresponding H-Shares listed on the SEHK, except the following:

- SSE-listed shares which are not traded in CNY; and
- SSE-listed shares which are included in the “risk alert board”.

Eligible securities under the Northbound Trading Link of the Shenzhen Stock Connect include any constituent stock of the SZSE Component Index and the SZSE Small/Mid Cap Innovation Index which has a market capitalisation of CNY6 billion or above and all SZSE-listed shares of companies which have issued both China A Shares and China H Shares. At the initial stage of the Northbound Trading Link of Shenzhen Stock Connect, trading shares that are listed on the ChiNext Board of SZSE under the Northbound Trading Link will be limited to institutional professional investors, as defined in the relevant Hong Kong rules and regulations.

It is expected that the list of eligible securities will be subject to review and may change from time to time.

If an eligible security ceases to be classified as such, Hong Kong and overseas investors (including the Portfolio) will only be allowed to sell holdings of such Security but will be restricted from buying any more of such Eligible Security.

Trading day

Investors (including the Portfolio) are only allowed to trade through the Stock Connects on days on which both markets (i.e. both the SEHK and the SSE for trading through Shanghai Stock Connect) are open for trading, and banking services are available in both markets on the corresponding settlement days.

Trading quota

Trading under the Stock Connects is subject to the Daily Quota. Northbound trading through each Stock Connect is subject to a separate set of Daily Quotas. The Daily Quota limits the maximum net buy value of cross-boundary trades under each of the Stock Connect per day. The Northbound Daily Quota for each Stock Connect is currently set at CNY52 billion.

The SEHK will monitor the quota and publish the remaining balance of the Northbound Daily Quota at scheduled times on the SEHK's website. The Daily Quota may change from time to time without prior notice and investors should refer to the SEHK's website and other information published by the SEHK for up-to-date information.

Settlement and Custody

The HKSCC will be responsible for the clearing, settlement and the provision of depository, nominee and other related services of the trades executed by Hong Kong market participants and investors.

The China A Shares traded through the Stock Connects are issued in scripless form, so investors do not hold any physical China A Shares. Hong Kong and overseas investors who have acquired Eligible Securities through Northbound trading should maintain the Eligible Securities with their brokers' or custodians' stock accounts with CCASS.

Corporate actions and shareholders' meetings

Notwithstanding the fact that the HKSCC does not claim proprietary interests in the Eligible Securities held in its omnibus stock account in ChinaClear, ChinaClear as the share registrar for SSE and SZSE-listed companies will still treat HKSCC as one of the shareholders when it handles corporate actions in respect of such Eligible Securities. HKSCC monitors the corporate actions affecting Eligible Securities and keeps the relevant brokers or custodians participating in CCASS ("CCASS participants") informed of all such corporate actions that require CCASS participants to take steps in order to participate in them.

SSE and SZSE-listed companies usually announce their annual general meeting/extraordinary general meeting information about one month before the meeting date. A poll is called on all resolutions for all votes. HKSCC will advise CCASS participants of all general meeting details such as meeting date, time, venue and the number of resolutions.

Foreign shareholding restrictions

The CSRC stipulates that, when holding China A Shares through the Stock Connects, Hong Kong and overseas investors are subject to the following shareholding restrictions:

- Single foreign investors' shareholding by any Hong Kong or overseas investor in a China A Share must not exceed 10% of the total issued shares; and
- Aggregate foreign investors' shareholding by all Hong Kong and overseas investors in a China A Share must not exceed 30% of the total issue shares.

Should the shareholding of a single investor in a China A Share listed company exceed

the above restriction, the investor would be required to unwind his position on the excessive shareholding according to a last-in-first-out basis within a specific period. The SSE, the SZSE and the SEHK will issue warnings or restrict the buy orders for the related China A Shares if the percentage of total shareholding is approaching the upper limit.

Currency

Hong Kong and overseas investors will trade and settle Eligible Securities in CNY only. Hence, the Portfolio will need to use CNY to trade and settle Eligible Securities.

Further information about the Stock Connects is available online at the website:

<http://www.hkex.com.hk/Mutual-Market/Stock-Connect>

Investment Restrictions

The Portfolio may expose up to 10% of its Net Asset Value in aggregate to the performance of other collective investment schemes which will comply with both the “*Investment Restrictions*” section of the Prospectus and the UCITS Regulations.

The Portfolio may invest up to 30% of its Net Asset Value in China A Shares.

It is the intention of the Sub-Investment Manager to invest a maximum of 50% of the Portfolio’s Net Asset Value in Emerging Market Countries.

The Portfolio may invest up to 10% of its Net Asset Value in REITs.

The Portfolio may not invest greater than 5% of its Net Asset Value in securities traded on Russian markets. Investment will only be made in securities that are listed/traded on the Moscow exchange.

The Portfolio will not utilise total return swaps or margin lending.

Risk

- Investment in the Portfolio carries certain risks which are described in greater detail in the “*Investment Risks*” section of the Prospectus. In particular, investors should note that investments in companies which operate within the long-term trend of the proliferation of next generation mobility are likely to be affected by regulatory, environment concerns, world-wide rapid technological developments, taxation and price and supply changes. The products or services of companies that offer exposure to next generation mobility may rapidly fall into obsolescence (or may be dependent on technologies which rapidly fall into obsolescence) and so the value of the securities of these companies may be negatively impacted as a result. In other words, the Portfolio may be subject to greater volatilities due to its novel and untested nature. In addition, there may not always be appropriate investment opportunities in this sector for the Portfolio, which may impact on the ability of the Portfolio to fully deploy its assets in this sector. Companies that offer exposure to next generation mobility are heavily dependent on patent and intellectual property rights and/or licences, the loss or impairment of which may adversely affect profitability. Companies in this sector may face dramatic and often unpredictable changes in growth rates and competition among the companies themselves. In addition, these companies are subject to cyber security risks which may cause issues including system breakdown, suspension of offering of products or services and result in undesirable legal, financial, operational and reputational consequences. All of these may have an adverse impact on the value of the Portfolio’s investments in such companies. Investments in next generation mobility may not achieve the desired results under all circumstances and market conditions. Investors should read and consider the entire “*Investment Risks*” section of the Prospectus, in particular the risks identified in the “*Investment Risks*” section of this Supplement which are relevant to the Portfolio. **These risks are not purported to be exhaustive and potential investors should review this Supplement and the Prospectus in their entirety and consult with their professional advisers, before making an application for Shares.**
- Investors should refer to the Company’s risk management policy with respect to the use of FDI contained in the RMP Statement.
- The Sub-Investment Manager may use future foreign currency exchange contracts in order to hedge some currency risk.

- The Portfolio may have or may be expected to have medium to high volatility due to its investment policies or portfolio management techniques.
- The Portfolio may be leveraged as a result of its investments in FDI but such leverage will not exceed 100% of the Portfolio's Net Asset Value, as measured using the Commitment Approach, at any time.

Environmental, Social and Governance ("ESG")

This Portfolio meets the classification of an Article 8 Portfolio as it promotes environmental and social characteristics and limits investments to companies that follow good governance practices.

The Portfolio invests in securities that meet the Sub-Investment Manager's criteria set out in the Sustainable Exclusion Policy and exclude securities prohibited by the Enhanced Sustainable Exclusion Policy, as detailed in the "*Sustainable Investment Criteria*" section of the Prospectus.

Please also refer to Annex VI of the Prospectus which contains additional information on the ESG characteristics that are applicable to this Portfolio.

Typical Investor Profile

The Portfolio may be suitable for investors seeking capital appreciation opportunities through equity investments in global securities exposed to long-term investment themes. Investors need to be comfortable with the risks associated with the Portfolio and be prepared to accept periods of market volatility particularly over short time periods. Investors are likely to have a medium to long-term investment horizon.

Fees and Expenses

Category	Maximum Initial Charge	Maximum Management Fee	Distribution Fee
A, X, Y	5.00%	1.70%	0.00%
B, C1, C2, E	0.00%	1.80%	1.00%
C	0.00%	1.10%	1.00%
D, I, I2, I3, I4, I5	0.00%	0.85%	0.00%
M	2.00%	1.70%	0.80%
P	5.00%	0.81%	0.00%
T	5.00%	1.80%	0.00%
U	3.00%	1.28%	0.00%
Z	0.00%	0.00%	0.00%

For details of the Administration Fees payable by the Portfolio, please see the "*Administration Fees*" heading in the "*Fees and Expenses*" section of the Prospectus.

Contingent deferred sales charges

Contingent deferred sales charges will be payable in respect of the following Classes at the rates specified below, depending on the period that has elapsed since the issue of the Shares being redeemed and will be charged on the lower of the Net Asset Value per Share on the relevant Dealing Day in respect of which the relevant Shares were (i) initially subscribed or (ii) redeemed. Any such contingent deferred sales charges will be paid to the relevant Distributor, the Manager or to the Sub-Investment Manager.

Class	Redemption Period in Calendar Days				
	< 365	365 - 729	730 - 1094	1095 - 1459	> 1459

C2	2%	1%	0%	0%	0%
E	3%	2%	1%	0%	0%

For further information on fees, please refer to the "*Fees and Expenses*" section of the Prospectus.

Neuberger Berman 5G Connectivity Fund

An investment in the Portfolio should not constitute a substantial proportion of an investment portfolio and may not be appropriate for all investors. Investors should note that the Portfolio may achieve its investment objective by investing in financial derivative instruments as described below. The Portfolio will not use FDI extensively or primarily for investment purposes. An investment in the Portfolio is not in the nature of a deposit in a bank account and is not protected by any government, government agency or other guarantee scheme which may be available to protect the holder of a bank deposit account. The value of Shares may go down as well as up and investors may not get back any of the amount invested.

Investment Objective

The Portfolio aims to achieve a target average return of 3-5% over the Benchmark (as specified in the “*Benchmark*” section below) before fees over a market cycle (typically 3 years) from investing primarily in a portfolio of global equity holdings, focusing on companies that are involved or derive benefit from Next Generation Connectivity (as defined below).

Investors should note that the target return is not guaranteed over a market cycle, a 12-month or any period and the Portfolio’s capital is at risk. Investors should also note that, over the course of a market cycle, there may be significant periods of time during which the performance of the Portfolio will deviate from the targeted return and the Portfolio may experience periods of negative return. There can be no guarantee that the Portfolio will ultimately achieve its investment objective.

Investment Approach

The Portfolio will seek to achieve its objective by primarily investing in equity securities that are listed or traded on Recognised Markets globally (which may include Emerging Market Countries) and issued by companies across all market capitalisations and economic sectors. The Portfolio may invest in companies of any market capitalisation but shall typically invest in companies that have market capitalisation greater than USD 500 million at time of purchase.

In seeking to achieve the Portfolio’s investment objective, the Sub-Investment Managers pursue the following investment process (which is described in further detail below) to identify a universe of companies that offer exposure to the development and enhancement of mobile internet and 5G connectivity (“**Next Generation Connectivity**”):

- Qualitative business analysis: to identify companies which are key enablers of Next Generation Connectivity, as well as companies that are well-positioned to benefit from the new business models related to Next Generation Connectivity (for example, autonomous vehicles or smart home technology);
- Quantitative screening: to identify stocks that it believes may be too illiquid or have too small a market capitalisation;
- Strategic valuation and analysis: in-depth research and analysis of companies, including of company/business models, quality of management, competitive strength and record of success which is determined by reference to existing financial data (eg, market share data); and
- Security selection and portfolio construction: Selects companies with the ability to provide solutions to drive Next Generation Connectivity that it believes have 50% - 100% capital appreciation potential over three to five years and determine entry and exit price targets based on current market prices for the securities and the preceding analysis, that guide buy and sell decisions.

Using this universe, the Sub-Investment Managers further evaluate those companies, seeking to identify the best in class companies, with sustainable advantages around the world, such as market leading technology, existing products or market access. The Sub-Investment Managers believe sustainable advantages are demonstrated through best in class product, technology, processes and market access. The Sub-Investment Managers will review the financial position and results of the companies. In-person management meetings, where possible, are then conducted with members of senior management of the relevant companies to assess financial and operating metrics (e.g. sales growth and product offering) and the quality of the company’s management team.

The fundamental research seeks to identify companies with the following characteristics:

- Stock prices which are undervalued relative to long-term cash flow growth potential;
- Industry leadership companies with high market share, pricing power, or better technology/business models relative to peers, or new entrants gaining market share;
- Potential for significant improvement in the company's business (e.g. top line growth greater than market/peers, margin expansion, and/or increased cash flow generation);
- Strong financial characteristics, including growth, margins, and/or capital returns and historic valuations on metrics such as price to cash flow, price to earnings or price to book value; and
- Proven management track record.

The Portfolio seeks to reduce risk by diversifying across countries and economic sectors. Although, it has the flexibility to invest a significant portion of its assets in one country or region, it generally intends to remain diversified across countries and geographical regions.

The Portfolio may invest directly in China A Shares through the Stock Connects and through the qualified foreign investors ("QFI") regime, as described below.

The Portfolio may also invest in debt instruments and money market instruments on an ancillary basis.

Investors should note that this Portfolio seeks to apply the Sustainable Exclusion Policy that has been adopted by the Sub-Investment Manager along with the application of the exclusions set out in the Enhanced Sustainable Exclusion Policy, as such terms are defined within the "Sustainable Investment Criteria" section of the Prospectus. Investors should refer to the information contained in that section for further details about the application of both the Sustainable Exclusion Policy and Enhanced Sustainable Exclusion Policy to the Portfolio.

The Portfolio is actively managed and does not intend to track the Benchmark and is not constrained by it. The Benchmark is included here for performance comparison purposes only. It is not expected that the majority of the Portfolio's assets will be components of the Benchmark. While the Portfolio may acquire securities which are components of the Benchmark, it will not do so because of their inclusion in the Benchmark.

Benchmark

The MSCI All-Country World Index (ACWI) (Total Return, net of tax, USD) is a free float-adjusted market capitalisation weighted index that is designed to measure the equity market performance of developed and emerging markets.

Shareholders in a Class which is denominated in a currency other than the Base Currency should note that, where available, it may be more meaningful to compare the performance of such Class against a version of this index which is denominated in the relevant Class currency.

Base Currency

US Dollars (USD).

Instruments / Asset Classes

The Portfolio can invest in or be exposed to the following types of assets, which will be listed or traded on Recognised Markets or, if unlisted, will comply with the Central Bank requirements.

Equity and Equity-linked Securities. These securities may include, without limitation, common stock, preferred stock, convertible bonds, convertible preferred stock and American, European and Global Depository Receipts, which are securities issued by a financial institution which evidence ownership interests in a security or a pool of securities deposited with the financial institution.

Equity Real Estate Investment Trusts ("REITs"). REITs are companies or trusts that pool investor money and invest mainly in income producing real estate, although it should be noted that the Portfolio will not acquire any real estate directly. REITs may invest in a diverse range of real estate properties or may specialise in a particular type of property (eg, data centres). The REITs which the Portfolio will invest in may be based

globally and will give exposure to underlying properties located globally. They will invest the majority of their assets directly in real property and derive their income from rents and capital gains from appreciation realised through property sales. Exposure to REITs may arise when the Sub-Investment Managers identify opportunities in such securities which are linked / support the evolution of Next Generation Connectivity (such as data centre REITs).

Participatory Notes (“P-Notes”) which are securities issued by banks or broker-dealers that are designed to replicate the performance of issuers and markets (in which the Portfolio can invest directly) by giving exposure to the performance of specific stocks that the Portfolio may not be able to invest in directly because of local holding restrictions affecting such stocks in the jurisdiction of their issue. The Portfolio shall only invest in listed P-Notes for India, China and Vietnam.

FDI will be used for investment, hedging and/or efficient portfolio management and subject to the conditions and limits imposed by the Central Bank as set out in the Prospectus and this Supplement:

- Warrants and rights may be used to take exposure to equity securities of the type described above.
- Single stock options may be used to take exposure to equity securities of the type described above and UCITS eligible equity index options may be used to hedge or efficiently manage some portions or all of the Portfolio
- Convertible Bonds and Convertible Preferred Stock. Convertible bonds enable the holder to convert their investment in the bonds into the issuer’s common stock at a pre-agreed price and convertible preferred stock enable the holder to convert their investment in the preferred stock into the issuer’s common stock at a pre-agreed rate.
- Forward currency contracts may be used to hedge currency risk.

As the Portfolio may purchase FDI generally using only a fraction of the assets that would be needed to purchase the relevant securities directly, the remainder of the assets allocated to the Portfolio may be invested in the other types of securities listed above. The Sub-Investment Managers may therefore seek to achieve greater returns by purchasing derivative instruments and investing the remaining assets in such other securities as listed above to achieve a rate of return greater than the market. The indices utilised for hedging or efficient portfolio management purposes will be broad-based, UCITS-eligible indices which provide exposure to the performance of equities and details of such indices pertaining to the instruments utilised by the Portfolio will be contained in the annual report of the Company.

Collective Investment Schemes. The Portfolio may invest in collective investment schemes (including ETFs which are structured as collective investment schemes) which are themselves exposed to investments that are similar to the Portfolio’s other investments, provided that the Portfolio may not invest more than 10% of its Net Asset Value in other collective investment schemes which themselves invest in other collective investment schemes. Such collective investment schemes may or may not be managed by the Sub-Investment Managers or their affiliates and will comply with the requirements of the UCITS Regulations in respect of such investments.

The other collective investment schemes in which the Portfolio may invest will be eligible collective investment schemes in accordance with the Central Bank’s rules, which may be domiciled in Relevant Jurisdictions or the United States of America, will qualify as UCITS or AIF schemes and will be regulated as such by their home state regulator.

Collective investment schemes in which the Portfolio invests may be leveraged but such collective investment schemes will not generally be leveraged: (i) in excess of 200% of their net asset value; (ii) so that their 1 day absolute value-at-risk exceeds 4.47% of their net asset value over a 250 day horizon with a 99% confidence level; or (iii) so that their 1 month relative value-at-risk exceeds twice the value-at-risk of a comparable benchmark portfolio over a 250 day horizon with a 99% confidence level, depending on how such collective investment funds measure their global exposure.

ETFs. ETFs are investment funds whose shares are bought and sold on a securities exchange. ETFs invest in a portfolio of securities designed to track a particular market segment or index. The ETFs will be located in Relevant Jurisdictions and will be authorised under the UCITS Directive or will be alternative investment funds which are eligible for investment by the Portfolio in accordance with the requirements of the Central Bank. The ETFs will represent investments that are similar to the Portfolio's other investments. The ETFs will operate on the principle of risk spreading and will not be leveraged.

Fixed Income Securities (Debt Securities). The Portfolio may invest in debt instruments, such as bonds and notes, issued by corporate or government issuers, which may be rated or unrated (although not more than 10% of NAV will be invested in debt instruments which are rated below investment grade) and may have fixed or floating interest rates and will not embed derivatives.

Money Market Instruments. The Portfolio may invest in money market instruments, which may include bank deposits, fixed or floating rate instruments (including commercial paper), floating or variable rate notes, bankers acceptances, certificates of deposit, debentures and short-dated government or corporate bonds, cash and cash equivalents (including treasury bills), or money market funds which meet the criteria set out under "Collective Investment Schemes" above, in each case that are rated as investment grade or below by Recognised Rating Agencies or are unrated.

Investment grade securities are highly rated securities, generally those rated Baa3, BBB- or above by one or more Recognised Rating Agencies, while high yield securities are medium or lower rated securities, generally those rated below investment grade and sometimes referred to as "junk bonds".

Repo Contracts and Securities Lending Agreements. The Portfolio may use Repo Contracts and Securities Lending Agreements subject to the conditions and limits set out in the Prospectus.

Stock Connects

The China Securities Regulatory Commission and the Securities and Futures Commission of Hong Kong have approved programs which establish mutual stock markets access between the PRC and Hong Kong, namely the Stock Connects. The Sub-Investment Managers may pursue the Portfolio's investment objective by investing up to 30% of the Portfolio's Net Asset Value directly in certain eligible China A Shares via the Stock Connects.

The Shanghai Stock Connect is a securities trading and clearing linked program developed by the SEHK, the SSE and ChinaClear, with the aim of achieving mutual stock market access between the SEHK and the SSE. The Shenzhen Stock Connect is a securities trading and clearing linked program developed by the SEHK, the SZSE and ChinaClear, with the aim of achieving mutual stock market access between the SEHK and the SZSE.

Each of the Shanghai Stock Connect and Shenzhen Stock Connect comprises a Northbound Trading Link and a Southbound Trading Link. Under the Northbound Trading Link, Hong Kong and overseas investors (including the Portfolio), through their Hong Kong brokers and a securities trading service company established by the SEHK, may trade eligible shares listed on the SSE and the SZSE by routing orders to the SSE and the SZSE respectively.

Eligible securities

Hong Kong and overseas investors will be able to trade certain SSE Securities. Eligible securities under the Northbound Trading Link of the Shanghai Stock Connect include all the constituent stocks from time to time of the SSE 180 Index and SSE 380 Index, and all the SSE-listed China A Shares that are not included as constituent stocks of the relevant indices but which have corresponding H-Shares listed on the SEHK, except the following:

- SSE-listed shares which are not traded in CNY; and
 - SSE-listed shares which are included in the "risk alert board".
-

Eligible securities under the Northbound Trading Link of the Shenzhen Stock Connect include any constituent stock of the SZSE Component Index and the SZSE Small/Mid Cap Innovation Index which has a market capitalisation of CNY6 billion or above and all SZSE-listed shares of companies which have issued both China A Shares and China H Shares. At the initial stage of the Northbound Trading Link of Shenzhen Stock Connect, trading shares that are listed on the ChiNext Board of SZSE under the Northbound Trading Link will be limited to institutional professional investors, as defined in the relevant Hong Kong rules and regulations.

It is expected that the list of eligible securities will be subject to review and may change from time to time.

If an eligible security ceases to be classified as such, Hong Kong and overseas investors (including the Portfolio) will only be allowed to sell holdings of such Security but will be restricted from buying any more of such Eligible Security.

Trading day

Investors (including the Portfolio) are only allowed to trade through the Stock Connects on days on which both markets (i.e. both the SEHK and the SSE for trading through Shanghai Stock Connect) are open for trading, and banking services are available in both markets on the corresponding settlement days.

Trading quota

Trading under the Stock Connects is subject to the Daily Quota. Northbound trading through each Stock Connect is subject to a separate set of Daily Quotas. The Daily Quota limits the maximum net buy value of cross-boundary trades under each of the Stock Connect per day. The Northbound Daily Quota for each Stock Connect is currently set at CNY52 billion.

The SEHK will monitor the quota and publish the remaining balance of the Northbound Daily Quota at scheduled times on the SEHK's website. The Daily Quota may change from time to time without prior notice and investors should refer to the SEHK's website and other information published by the SEHK for up-to-date information.

Settlement and Custody

The HKSCC will be responsible for the clearing, settlement and the provision of depository, nominee and other related services of the trades executed by Hong Kong market participants and investors.

The China A Shares traded through the Stock Connects are issued in scripless form, so investors do not hold any physical China A Shares. Hong Kong and overseas investors who have acquired Eligible Securities through Northbound trading should maintain the Eligible Securities with their brokers' or custodians' stock accounts with CCASS.

Corporate actions and shareholders' meetings

Notwithstanding the fact that the HKSCC does not claim proprietary interests in the Eligible Securities held in its omnibus stock account in ChinaClear, ChinaClear as the share registrar for SSE and SZSE-listed companies will still treat HKSCC as one of the shareholders when it handles corporate actions in respect of such Eligible Securities. HKSCC monitors the corporate actions affecting Eligible Securities and keeps the relevant brokers or custodians participating in CCASS ("CCASS participants") informed of all such corporate actions that require CCASS participants to take steps in order to participate in them.

SSE and SZSE-listed companies usually announce their annual general meeting/extraordinary general meeting information about one month before the meeting date. A poll is called on all resolutions for all votes. HKSCC will advise CCASS participants of all general meeting details such as meeting date, time, venue and the number of resolutions.

Foreign shareholding restrictions

The CSRC stipulates that, when holding China A Shares through the Stock Connects, Hong Kong and overseas investors are subject to the following shareholding restrictions:

- Single foreign investors' shareholding by any Hong Kong or overseas investor in a China A Share must not exceed 10% of the total issued shares; and
- Aggregate foreign investors' shareholding by all Hong Kong and overseas investors in a China A Share must not exceed 30% of the total issue shares.

Should the shareholding of a single investor in a China A Share listed company exceed the above restriction, the investor would be required to unwind his position on the excessive shareholding according to a last-in-first-out basis within a specific period. The SSE, the SZSE and the SEHK will issue warnings or restrict the buy orders for the related China A Shares if the percentage of total shareholding is approaching the upper limit.

Currency

Hong Kong and overseas investors will trade and settle Eligible Securities in CNY only. Hence, the Portfolio will need to use CNY to trade and settle Eligible Securities.

Further information about the Stock Connects is available online at the website: <http://www.hkex.com.hk/Mutual-Market/Stock-Connect>

Qualified Foreign Institutional Investors

The qualified foreign institutional investor program permits certain licensed international investors to participate in the PRC's mainland stock exchanges, allowing foreign investors access to the SSE and SZSE. Under this program, licensed investors can buy and sell CNY-denominated China A Shares, subject to specified quotas that determine the amount of money that the licensed foreign investors are permitted to invest in China's capital markets.

Neuberger Berman Europe Limited received its QFI licence on 3 May 2012.

Eligible securities

QFI permitted securities include CNY financial instruments in which QFI are allowed to invest from time to time and which may include (1) stocks, depository receipts, bonds, bond repurchases, and asset-backed securities traded or transferred on stock exchanges; (2) shares and other types of securities transferred on the National Equities Exchange and Quotations (NEEQ); (3) products and derivatives on bonds, interest rates and foreign exchange traded on the domestic inter-bank bond market which are deemed by PBOC as eligible for QFI; (4) investment funds; and (5) other financial instruments as approved by the CSRC.

Trading Day

Investors (including the Portfolio) are only allowed to trade through the QFI regime on days on which the relevant PRC markets are open for trading, and banking services are available on the corresponding settlement days.

Currency

Hong Kong and overseas investors will trade and settle eligible securities in CNY only. Hence, the Portfolio will need to use CNY to trade and settle eligible securities.

QFI Status

Neuberger Berman Europe Limited has obtained QFI status. However, under the Investment Regulations, the QFI status of Neuberger Berman Europe Limited could be

suspended or revoked under certain circumstances where the PRC regulators have discretions. If the QFI status of the Sub-Investment Manager is suspended or revoked, the Portfolio may be required to dispose of its securities held through the QFI and may not be able to access the Chinese securities market via the QFI as contemplated in this Supplement, which may have an adverse effect on the Portfolio's performance.

Moreover, the Investment Regulations generally apply at the QFI level and not simply to investments made on behalf of the Portfolio. Thus investors should be aware that violations of the Investment Regulations arising out of activities through the QFI other than those conducted by the Portfolio could result in the revocation of or other regulatory action in respect of the QFI as a whole. The regulations relating to the investment restrictions in China A Shares are also generally applied at the QFI level (as discussed in detail below), and the Portfolio may also be impacted by the actions of other investors utilising the QFI status. Hence the ability of the Portfolio to make investments utilising the QFI status of Neuberger Berman Europe Limited may be affected adversely by the investments of other investors utilising the QFI status of Neuberger Berman Europe Limited.

Custody

China A Shares traded on the Exchanges are dealt and held in dematerialised form through ChinaClear. Exchange-traded securities purchased on behalf of the Portfolio through the QFI are required to be recorded by ChinaClear as credited to a securities trading account maintained in the joint names of the QFI and the Company (or such other account name as required by the Investment Regulations which may reference also the Portfolio).

The Company/the QFI expects to receive a legal opinion from a qualified PRC law firm confirming that, as a matter of PRC law, the QFI will have no ownership interest in the securities and that the Portfolio will ultimately and exclusively be entitled to ownership of the securities.

However, given that, pursuant to the Investment Regulations, the QFI as account-holder will be the party entitled to the securities (albeit that this entitlement does not constitute an ownership interest or preclude the QFI purchasing securities on behalf of the Portfolio), the assets of the Portfolio may not be as well protected as they would be if it were possible for them to be registered and held solely in the name of the Company (or the Portfolio). In particular, given that the QFI belongs to the Neuberger Berman group, there is a risk that creditors of the Neuberger Berman group may incorrectly assume, contrary to the legal opinion referred to, that the Portfolio's assets belong to the Neuberger Berman group and such creditors may seek to gain control of the Portfolio's assets in lieu of such liabilities.

The evidence of title of exchange-traded securities in the PRC consists only of electronic book-entries in the depository and/or registry associated with the relevant Exchange. These arrangements of the depositories and registries are new and not fully tested in regard to their efficiency, accuracy and security.

In order to prevent any trading failure, ChinaClear will automatically settle any trades executed by the PRC securities trading house relating to the securities trading account maintained in the joint names of the Company (or the Portfolio) and the QFI. Accordingly all instructions issued by the PRC securities trading house relating to the securities trading account will be executed without the need of consent or direction of the Depository.

Investment Restrictions

Investments in the PRC securities market via the QFI are subject to compliance with certain investment restrictions imposed by the Investment Regulations including the following, which apply to each foreign investor (including the Portfolio) investing through the QFI and will affect the Portfolio's ability to invest in China A Shares and carry out their investment objectives:

-
- (i) shares held by each underlying foreign investor (such as the Portfolio) which invests (through QFI or other permissible channels) in one PRC listed company should not exceed 10% of the total shares of such company; and
 - (ii) aggregate China A Shares held by all underlying foreign investors (such as the Portfolio and all other foreign investors) which invest (through QFI or other permissible channels) in one PRC listed company should not exceed 30% of the total shares of such company.

Although it has not been explicitly provided under the Investment Regulations, in practice, the 10% single foreign shareholding restriction is also applied at the QFI level, under which a QFI may not hold 10% or more shares of any listed company, regardless of the fact that such QFI is holding such shares for a number of different clients. Accordingly, as the QFI status of Neuberger Berman Europe Limited is utilised by the Portfolio and other investors as well, the capability of the Portfolio to invest in the shares of certain listed company may be limited due to the investments in the shares of such listed company by other investors who also invest through the QFI status of Neuberger Berman Europe Limited. Specifically, when the shareholding of such other investors in a PRC listed company reaches 10%, the Portfolio may not be able to buy any such shares, even if the then effective price of such shares is advantageous to the Portfolio.

Similarly, since the 30% aggregate foreign shareholding restriction is monitored at the level of all foreign investors, the capability of the Portfolio to invest in China A Shares of certain listed company may also be limited due to the investments made by other foreign investors.

Disclosure to CSRC

In practice, structured products issued by QFI to give foreign investors access to China A Shares are required to be reported to CSRC. The information reported may include information on the Portfolio as applicable.

Disclosure to the Exchange

According to the relevant Investment Regulations, where the SSE or the SZSE spots any abnormal trading which may affect the normal trading order, it may request the involved QFI to promptly report the securities transaction and shareholding information of the QFI's relevant underlying investors, which may include information on the Portfolio.

Investment Restrictions

- The Portfolio may expose up to 10% of its Net Asset Value in aggregate to the performance of other collective investment schemes which will comply with both the "*Investment Restrictions*" section of the Prospectus and the UCITS Regulations.
- The Portfolio may invest up to 10% of its Net Asset Value in fixed income securities.
- The Portfolio may invest up to 30% of its Net Asset Value in China A Shares.
- It is the intention of the Sub-Investment Managers to invest a maximum of 50% of the Portfolio's Net Asset Value in Emerging Market Countries.
- The Portfolio may invest up to 10% of its Net Asset Value in REITs.
- The Portfolio may not invest greater than 5% of its Net Asset Value in securities traded on Russian markets. Investment will only be made in securities that are listed/traded on the Moscow exchange.
- The Portfolio will not utilise total return swaps or margin lending.

Risk

- Investment in the Portfolio carries certain risks which are described in greater detail in the "*Investment Risks*" section of the Prospectus. Investors should read and consider the entire "*Investment Risks*" section of the Prospectus, in particular the risks identified in the "*Investment Risks*" section of this Supplement which are relevant to the Portfolio. In particular, investors should note that companies related to Next Generation Connectivity may be subject to significant volatility in growth rates due to rapidly changing market conditions and/or participants, more advanced or new technologies, new competing products and/or enhancements in existing
-

products. The success of this sector is heavily dependent on patents and intellectual property rights and/or licences. The profitability of companies related to Next Generation Connectivity may be adversely impacted by the loss or impairment of these intellectual property assets. Such companies may also be subject to unpredictable changes in competition. There is no assurance that products or services offered by Next Generation Connectivity companies will not be rendered obsolete or be adversely affected by competing products, or that such companies will not be adversely affected by other challenges, such as instability, fluctuation, or an overall decline within the industry. Companies related to Next Generation Connectivity may also be affected by regulatory risks, cyber security risks, government intervention and political risks. **These risks are not purported to be exhaustive and potential investors should review this Supplement and the Prospectus in their entirety and consult with their professional advisers, before making an application for Shares.**

- Investors should refer to the Company's risk management policy with respect to the use of FDI contained in the RMP Statement.
- The Sub-Investment Managers may use future foreign currency exchange contracts in order to hedge some currency risk.
- The Portfolio may have or may be expected to have medium to high volatility due to its investment policies or portfolio management techniques.
- The Portfolio may be leveraged as a result of its investments in FDI but such leverage will not exceed 100% of the Portfolio's Net Asset Value, as measured using the Commitment Approach, at any time.

Environmental, Social and Governance ("ESG")

This Portfolio meets the classification of an Article 8 Portfolio as it promotes environmental and social characteristics and limits investments to companies that follow good governance practices.

The Portfolio invests in securities that meet the Sub-Investment Manager's criteria set out in the Sustainable Exclusion Policy and exclude securities prohibited by the Enhanced Sustainable Exclusion Policy, as detailed in the "*Sustainable Investment Criteria*" section of the Prospectus.

Please also refer to Annex VI of the Prospectus which contains additional information on the ESG characteristics that are applicable to this Portfolio.

Typical Investor Profile

The Portfolio may be suitable for investors seeking capital appreciation opportunities through equity investments in global securities exposed to long-term investment themes. Investors need to be comfortable with the risks associated with the Portfolio and be prepared to accept periods of market volatility particularly over short time periods. Investors are likely to have a medium to long-term investment horizon.

Fees and Expenses

Category	Maximum Initial Charge	Maximum Management Fee	Distribution Fee
A, X, Y	5.00%	1.70%	0.00%
B, C2, E	0.00%	1.70%	1.00%
C1	0.00%	1.80%	1.00%
C	0.00%	1.10%	1.00%
D, I, I2, I3, I4, I5	0.00%	0.85%	0.00%
M	2.00%	1.70%	0.80%
P	5.00%	0.81%	0.00%
T	5.00%	1.70%	0.00%
U	3.00%	1.28%	0.00%
Z	0.00%	0.00%	0.00%

For details of the Administration Fees payable by the Portfolio, please see the "*Administration Fees*" heading in the "*Fees and Expenses*" section of the Prospectus.

Contingent deferred sales charges

Contingent deferred sales charges will be payable in respect of the following Classes at the rates specified below, depending on the period that has elapsed since the issue of the Shares being redeemed and will be charged on the lower of the Net Asset Value per Share on the relevant Dealing Day in respect of which the relevant Shares were (i) initially subscribed or (ii) redeemed. Any such contingent deferred sales charges will be paid to the relevant Distributor, the Manager or to the Sub-Investment Manager.

Class	Redemption Period in Calendar Days

Neuberger Berman InnovAsia 5G Fund

An investment in the Portfolio should not constitute a substantial proportion of an investment portfolio and may not be appropriate for all investors. Investors should note that the Portfolio may achieve its investment objective by investing in financial derivative instruments as described below. The Portfolio will not use FDI extensively or primarily for investment purposes. An investment in the Portfolio is not in the nature of a deposit in a bank account and is not protected by any government, government agency or other guarantee scheme which may be available to protect the holder of a bank deposit account. The value of Shares may go down as well as up and investors may not get back any of the amount invested.

Investment Objective	The Portfolio aims to invest primarily in a portfolio of equity holdings, focusing on companies that are involved in or derive benefit from Innovative Technologies (as defined below).
-----------------------------	---

Investment Approach	The Portfolio will seek to achieve its objective by investing primarily in equity securities which are listed or traded on Recognised Markets globally (which may include Emerging Market Countries) and issued by companies across all market capitalisations and economic sectors with innovative technologies or business models that:
----------------------------	---

- are incorporated or organized under the laws of a country in Asia, or that have a principal office in Asia;
- generally derive a majority of their incremental growth from (a) goods that are produced or sold, (b) investments made, or (c) services performed, in Asia; or
- generally hold a majority of their assets in Asia.

The Portfolio may invest in companies of any market capitalisation but shall typically invest in companies that have market capitalisation greater than USD 500 million at time of purchase.

In seeking to achieve the Portfolio's investment objective, the Sub-Investment Managers pursue the following investment process (which is described in further detail below) to identify a universe of companies that offer exposure to disruptive technologies, innovative business models with a relatively low penetration rate in Asia or which are in a relatively early growth phase as well as long-term, structural trends and themes such as 5G / internet of things, (including but not limited to data infrastructure, connected devices or advanced semiconductors), digital lifestyle (including but not limited to healthcare, education or internet and consumer) and industrial innovations (including but not limited to robotics, clean tech or smart logistics) ("**Innovative Technologies**"):

- Qualitative business analysis: to identify companies which are key enablers of Innovative Technologies, as well as companies that are well-positioned to benefit from new business models related to Innovative Technologies;
- Quantitative screening: to identify stocks that the Sub-Investment Managers believe may be too illiquid or have too small a market capitalisation;
- Strategic valuation and analysis: in-depth research and analysis of companies, including of company/business models, quality of management, competitive strength and record of success which is determined by reference to existing financial data (eg, market share data); and
- Security selection and portfolio construction: to select companies with the ability to provide solutions to drive Innovative Technologies that the Sub-Investment Managers believe have significant capital appreciation potential over three to five years and determine entry and exit price targets based on current market prices for the securities and the preceding analysis, that guide buy and sell decisions.

Using this universe, the Sub-Investment Managers further evaluate those companies, seeking to identify the best in class companies, with sustainable advantages primarily in Asia, such as market leading technology, existing products or market access. The Sub-Investment Managers believe sustainable advantages are demonstrated through best in class product, technology, processes and market access. The Sub-Investment Managers will review the financial position and results of the companies. In-person management meetings, where possible, are then conducted with members of senior management of the relevant companies to assess financial and operating metrics (e.g. sales growth and product offering) and the quality of the company's management team.

The fundamental research seeks to identify companies with the following characteristics:

- Stock prices which are undervalued relative to long-term cash flow growth potential;
- Industry leadership companies with high market share, pricing power, or better technology/business models relative to peers, or new entrants gaining market share;
- Potential for significant improvement in the company's business (e.g. top line growth greater than market/peers, margin expansion, and/or increased cash flow generation);
- Strong financial characteristics, including growth, margins, and/or capital returns and historic valuations on metrics such as price to cash flow, price to earnings or price to book value; and
- Proven management track record.

The Sub-Investment Managers seek to reduce risk by building a portfolio typically in a range of 30-60 stocks, which is diversified across countries and economic sectors. Although, the Sub-Investment Managers have the flexibility to invest a significant portion of the Portfolio's assets in one country, the Sub-Investment Managers generally intend to remain diversified across countries.

The Portfolio may invest directly in China A Shares through the Stock Connects and through the qualified foreign investors ("QFI") regime, as described below.

The Portfolio may also invest in debt instruments and money market instruments on an ancillary basis.

Investors should note that this Portfolio seeks to apply the Sustainable Exclusion Policy along with the application of the exclusions set out in the Enhanced Sustainable Exclusion Policy, as such terms are defined within the "*Sustainable Investment Criteria*" section of the Prospectus. Investors should refer to the information contained in that section for further details about the application of both the Sustainable Exclusion Policy and Enhanced Sustainable Exclusion Policy to the Portfolio.

The Portfolio is actively managed and does not intend to track the Benchmark and is not constrained by it. The Benchmark is included here for performance comparison purposes only. It is not expected that the majority of the Portfolio's assets will be components of the Benchmark. While the Portfolio may acquire securities which are components of the Benchmark, it will not do so because of their inclusion in the Benchmark.

Benchmark	<p>The MSCI All-Country World Index (ACWI) (Total Return, net of tax, USD) is a free float-adjusted market capitalisation weighted index that is designed to measure the equity market performance of developed and emerging markets.</p> <p>Shareholders in a Class which is denominated in a currency other than the Base Currency should note that, where available, it may be more meaningful to compare the performance of such Class against a version of this index which is denominated in the relevant Class currency.</p> <p>The Benchmark has not been designated as a reference benchmark for the purposes of SFDR. Therefore, it is not consistent with the promotion of environmental or social characteristics.</p>
------------------	--

Base Currency	US Dollars (USD).
----------------------	-------------------

Instruments / Asset Classes	The Portfolio can invest in or be exposed to the following types of assets, which will be listed or traded on Recognised Markets or, if unlisted, will comply with the Central Bank requirements.
------------------------------------	---

Equity and Equity-linked Securities. These securities may include, without limitation, common stock, preferred stock, convertible bonds, convertible preferred stock and American, European and Global Depository Receipts, which are securities issued by a financial institution which evidence ownership interests in a security or a pool of securities deposited with the financial institution.

Equity Real Estate Investment Trusts ("REITs"). REITs are companies or trusts that pool investor money and invest mainly in income producing real estate, although it should be noted that the Portfolio will not acquire any real estate directly. REITs may invest in a diverse range of real estate properties or may specialise in a particular type of property (eg, data centres). The REITs which the Portfolio will invest in may be based globally and will give exposure to underlying properties located globally. They will invest the majority of their assets directly in real property and derive their income from rents and capital gains from appreciation realised through property sales. Exposure to REITs may arise when the Sub-Investment Managers identify opportunities in such

securities which are linked to or support Innovative Technologies (such as data centre REITs).

Participatory Notes (“P-Notes”) which are securities issued by banks or broker-dealers that are designed to replicate the performance of issuers and markets (in which the Portfolio can invest directly) by giving exposure to the performance of specific stocks that the Portfolio may not be able to invest in directly because of local holding restrictions affecting such stocks in the jurisdiction of their issue. The Portfolio shall only invest in listed P-Notes for India, China and Vietnam.

Financial Derivative Instruments (“FDIs”). FDIs will be used for investment, hedging and/or efficient portfolio management and subject to the conditions and limits imposed by the Central Bank as set out in the Prospectus and this Supplement:

- Warrants and rights may be used to take exposure to equity securities of the type described above.
- Single stock options may be used to take exposure to equity securities of the type described above and UCITS eligible equity index options may be used to hedge or efficiently manage some portions or all of the Portfolio
- Convertible Bonds and Convertible Preferred Stock. Convertible bonds enable the holder to convert their investment in the bonds into the issuer’s common stock at a pre-agreed price and convertible preferred stock enable the holder to convert their investment in the preferred stock into the issuer’s common stock at a pre-agreed rate.
- Forward currency contracts may be used to hedge currency risk.

As the Portfolio may purchase FDIs generally using only a fraction of the assets that would be needed to purchase the relevant securities directly, the remainder of the assets allocated to the Portfolio may be invested in the other types of securities listed above. The Sub-Investment Managers may therefore seek to achieve greater returns by purchasing derivative instruments and investing the remaining assets in such other securities as listed above to achieve a rate of return greater than the market. The indices utilised for hedging or efficient portfolio management purposes will be broad-based, UCITS-eligible indices which provide exposure to the performance of equities and details of such indices pertaining to the instruments utilised by the Portfolio will be contained in the annual report of the Company.

Collective Investment Schemes. The Portfolio may invest in collective investment schemes (including ETFs which are structured as collective investment schemes) which are themselves exposed to investments that are similar to the Portfolio’s other investments, provided that the Portfolio may not invest more than 10% of its Net Asset Value in other collective investment schemes which themselves invest in other collective investment schemes. Such collective investment schemes may or may not be managed by the Manager and the Sub-Investment Managers or their affiliates and will comply with the requirements of the UCITS Regulations in respect of such investments.

The other collective investment schemes in which the Portfolio may invest will be eligible collective investment schemes in accordance with the Central Bank’s rules, which may be domiciled in Relevant Jurisdictions or the United States of America, will qualify as UCITS or AIF schemes and will be regulated as such by their home state regulator.

Collective investment schemes in which the Portfolio invests may be leveraged but such collective investment schemes will not generally be leveraged: (i) in excess of 200% of their net asset value; (ii) so that their 1 day absolute value-at-risk exceeds 4.47% of their net asset value over a 250 day horizon with a 99% confidence level; or (iii) so that their 1 month relative value-at-risk exceeds twice the value-at-risk of a comparable benchmark portfolio over a 250 day horizon with a 99% confidence level, depending on how such collective investment funds measure their global exposure.

ETFs. ETFs are investment funds whose shares are bought and sold on a securities exchange. ETFs invest in a portfolio of securities designed to track a particular market segment or index. The ETFs will be located in Relevant Jurisdictions and will be authorised under the UCITS Directive or will be alternative investment funds which are eligible for investment by the Portfolio in accordance with the requirements of the Central Bank. The ETFs will represent investments that are similar to the Portfolio’s other investments. The ETFs will operate on the principle of risk spreading and will not be leveraged.

Fixed Income Securities (Debt Securities). The Portfolio may invest in debt instruments, such as

bonds and notes, issued by corporate or government issuers, which may be rated or unrated (although not more than 10% of NAV will be invested in debt instruments which are rated below investment grade) and may have fixed or floating interest rates and will not embed derivatives.

Money Market Instruments. The Portfolio may invest in money market instruments, which may include bank deposits, fixed or floating rate instruments (including commercial paper), floating or variable rate notes, bankers acceptances, certificates of deposit, debentures and short-dated government or corporate bonds, cash and cash equivalents (including treasury bills), or money market funds which meet the criteria set out under “Collective Investment Schemes” above, in each case that are rated as investment grade or below by Recognised Rating Agencies or are unrated.

Investment grade securities are highly rated securities, generally those rated Baa3, BBB- or above by one or more Recognised Rating Agencies, while high yield securities are medium or lower rated securities, generally those rated below investment grade and sometimes referred to as “junk bonds”.

Repo Contracts and Securities Lending Agreements. The Portfolio may use Repo Contracts and Securities Lending Agreements subject to the conditions and limits set out in the Prospectus.

Stock Connects

The China Securities Regulatory Commission and the Securities and Futures Commission of Hong Kong have approved programs which establish mutual stock markets access between the PRC and Hong Kong, namely the Stock Connects. The Sub-Investment Managers may pursue the Portfolio’s investment objective by investing up to 30% of the Portfolio’s Net Asset Value directly in certain eligible China A Shares via the Stock Connects.

The Shanghai Stock Connect is a securities trading and clearing linked program developed by the SEHK, the SSE and ChinaClear, with the aim of achieving mutual stock market access between the SEHK and the SSE. The Shenzhen Stock Connect is a securities trading and clearing linked program developed by the SEHK, the SZSE and ChinaClear, with the aim of achieving mutual stock market access between the SEHK and the SZSE.

Each of the Shanghai Stock Connect and Shenzhen Stock Connect comprises a Northbound Trading Link and a Southbound Trading Link. Under the Northbound Trading Link, Hong Kong and overseas investors (including the Portfolio), through their Hong Kong brokers and a securities trading service company established by the SEHK, may trade eligible shares listed on the SSE and the SZSE by routing orders to the SSE and the SZSE respectively.

Eligible securities

Hong Kong and overseas investors will be able to trade certain SSE Securities. Eligible securities under the Northbound Trading Link of the Shanghai Stock Connect include all the constituent stocks from time to time of the SSE 180 Index and SSE 380 Index, and all the SSE-listed China A Shares that are not included as constituent stocks of the relevant indices but which have corresponding H-Shares listed on the SEHK, except the following:

- SSE-listed shares which are not traded in CNY; and
- SSE-listed shares which are included in the “risk alert board”.

Eligible securities under the Northbound Trading Link of the Shenzhen Stock Connect include any constituent stock of the SZSE Component Index and the SZSE Small/Mid Cap Innovation Index which has a market capitalisation of CNY6 billion or above and all SZSE-listed shares of companies which have issued both China A Shares and China H Shares. At the initial stage of the Northbound Trading Link of Shenzhen Stock Connect, trading shares that are listed on the ChiNext Board of SZSE under the Northbound Trading Link will be limited to institutional professional investors, as defined in the relevant Hong Kong rules and regulations.

It is expected that the list of eligible securities will be subject to review and may change from time to time.

If an eligible security ceases to be classified as such, Hong Kong and overseas investors (including the Portfolio) will only be allowed to sell holdings of such Security but will be restricted from buying any more of such Eligible Security.

Trading day

Investors (including the Portfolio) are only allowed to trade through the Stock Connects on days on which both markets (i.e. both the SEHK and the SSE for trading through Shanghai Stock Connect) are open for trading, and banking services are available in both markets on the corresponding settlement days.

Trading quota

Trading under the Stock Connects is subject to the Daily Quota. Northbound trading through each Stock Connect is subject to a separate set of Daily Quotas. The Daily Quota limits the maximum net buy value of cross-boundary trades under each of the Stock Connect per day. The Northbound Daily Quota for each Stock Connect is currently set at CNY52 billion.

The SEHK will monitor the quota and publish the remaining balance of the Northbound Daily Quota at scheduled times on the SEHK's website. The Daily Quota may change from time to time without prior notice and investors should refer to the SEHK's website and other information published by the SEHK for up-to-date information.

Settlement and Custody

The HKSCC will be responsible for the clearing, settlement and the provision of depository, nominee and other related services of the trades executed by Hong Kong market participants and investors.

The China A Shares traded through the Stock Connects are issued in scripless form, so investors do not hold any physical China A Shares. Hong Kong and overseas investors who have acquired Eligible Securities through Northbound trading should maintain the Eligible Securities with their brokers' or custodians' stock accounts with CCASS.

Corporate actions and shareholders' meetings

Notwithstanding the fact that the HKSCC does not claim proprietary interests in the Eligible Securities held in its omnibus stock account in ChinaClear, ChinaClear as the share registrar for SSE and SZSE-listed companies will still treat HKSCC as one of the shareholders when it handles corporate actions in respect of such Eligible Securities.

HKSCC monitors the corporate actions affecting Eligible Securities and keeps the relevant brokers or custodians participating in CCASS ("CCASS participants") informed of all such corporate actions that require CCASS participants to take steps in order to participate in them.

SSE and SZSE-listed companies usually announce their annual general meeting/extraordinary general meeting information about one month before the meeting date. A poll is called on all resolutions for all votes. HKSCC will advise CCASS participants of all general meeting details such as meeting date, time, venue and the number of resolutions.

Foreign shareholding restrictions

The CSRC stipulates that, when holding China A Shares through the Stock Connects, Hong Kong and overseas investors are subject to the following shareholding restrictions:

- Single foreign investors' shareholding by any Hong Kong or overseas investor in a China A Share must not exceed 10% of the total issued shares; and
- Aggregate foreign investors' shareholding by all Hong Kong and overseas investors in a China A Share must not exceed 30% of the total issue shares.

Should the shareholding of a single investor in a China A Share listed company exceed the above restriction, the investor would be required to unwind his position on the excessive shareholding according to a last-in-first-out basis within a specific period. The SSE, the SZSE and the SEHK will issue warnings or restrict the buy orders for the related China A Shares if the percentage of total shareholding is approaching the upper limit.

Currency

Hong Kong and overseas investors will trade and settle Eligible Securities in CNY only. Hence, the Portfolio will need to use CNY to trade and settle Eligible Securities.

Further information about the Stock Connects is available online at the website:
<http://www.hkex.com.hk/Mutual-Market/Stock-Connect>

**Qualified
Foreign
Institutional
Investors**

The qualified foreign institutional investor program permits certain licensed international investors to participate in the PRC's mainland stock exchanges, allowing foreign investors access to the SSE and SZSE. Under this program, licensed investors can buy and sell CNY-denominated China A Shares, subject to specified quotas that determine the amount of money that the licensed foreign investors are permitted to invest in China's capital markets.

Neuberger Berman Europe Limited received its QFI licence on 3 May 2012.

Eligible securities

QFI permitted securities include CNY financial instruments in which QFI are allowed to invest from time to time and which may include (1) stocks, depository receipts, bonds, bond repurchases, and asset-backed securities traded or transferred on stock exchanges; (2) shares and other types of securities transferred on the National Equities Exchange and Quotations (NEEQ); (3) products and derivatives on bonds, interest rates and foreign exchange traded on the domestic inter-bank bond market which are deemed by PBOC as eligible for QFI; (4) investment funds; and (5) other financial instruments as approved by the CSRC.

Trading Day

Investors (including the Portfolio) are only allowed to trade through the QFI regime on days on which the relevant PRC markets are open for trading, and banking services are available on the corresponding settlement days.

Currency

Hong Kong and overseas investors will trade and settle eligible securities in CNY only. Hence, the Portfolio will need to use CNY to trade and settle eligible securities.

QFI Status

Neuberger Berman Europe Limited has obtained QFI status. However, under the Investment Regulations, the QFI status of Neuberger Berman Europe Limited could be suspended or revoked under certain circumstances where the PRC regulators have discretions. If the QFI status of the Sub-Investment Manager is suspended or revoked, the Portfolio may be required to dispose of its securities held through the QFI and may not be able to access the Chinese securities market via the QFI as contemplated in this Supplement, which may have an adverse effect on the Portfolio's performance.

Moreover, the Investment Regulations generally apply at the QFI level and not simply to investments made on behalf of the Portfolio. Thus investors should be aware that violations of the Investment Regulations arising out of activities through the QFI other than those conducted by the Portfolio could result in the revocation of or other regulatory action in respect of the QFI as a whole. The regulations relating to the investment restrictions in China A Shares are also generally applied at the QFI level (as discussed in detail below), and the Portfolio may also be impacted by the actions of other investors utilising the QFI status. Hence the ability of the Portfolio to make investments utilising the QFI status of Neuberger Berman Europe Limited may be affected adversely by the investments of other investors utilising the QFI status of Neuberger Berman Europe Limited.

Custody

China A Shares traded on the Exchanges are dealt and held in dematerialised form through ChinaClear. Exchange-traded securities purchased on behalf of the Portfolio through the QFI are

required to be recorded by ChinaClear as credited to a securities trading account maintained in the joint names of the QFI and the Company (or such other account name as required by the Investment Regulations which may reference also the Portfolio).

The Company/the QFI expects to receive a legal opinion from a qualified PRC law firm confirming that, as a matter of PRC law, the QFI will have no ownership interest in the securities and that the Portfolio will ultimately and exclusively be entitled to ownership of the securities.

However, given that, pursuant to the Investment Regulations, the QFI as account-holder will be the party entitled to the securities (albeit that this entitlement does not constitute an ownership interest or preclude the QFI purchasing securities on behalf of the Portfolio), the assets of the Portfolio may not be as well protected as they would be if it were possible for them to be registered and held solely in the name of the Company (or the Portfolio). In particular, given that the QFI belongs to the Neuberger Berman group, there is a risk that creditors of the Neuberger Berman group may incorrectly assume, contrary to the legal opinion referred to, that the Portfolio's assets belong to the Neuberger Berman group and such creditors may seek to gain control of the Portfolio's assets in lieu of such liabilities.

The evidence of title of exchange-traded securities in the PRC consists only of electronic book-entries in the depository and/or registry associated with the relevant Exchange. These arrangements of the depositories and registries are new and not fully tested in regard to their efficiency, accuracy and security.

In order to prevent any trading failure, ChinaClear will automatically settle any trades executed by the PRC securities trading house relating to the securities trading account maintained in the joint names of the Company (or the Portfolio) and the QFI. Accordingly all instructions issued by the PRC securities trading house relating to the securities trading account will be executed without the need of consent or direction of the Depository.

Investment Restrictions

Investments in the PRC securities market via the QFI are subject to compliance with certain investment restrictions imposed by the Investment Regulations including the following, which apply to each foreign investor (including the Portfolio) investing through the QFI and will affect the Portfolio's ability to invest in China A Shares and carry out their investment objectives:

- (iii) shares held by each underlying foreign investor (such as the Portfolio) which invests (through QFI or other permissible channels) in one PRC listed company should not exceed 10% of the total shares of such company; and
- (iv) aggregate China A Shares held by all underlying foreign investors (such as the Portfolio and all other foreign investors) which invest (through QFI or other permissible channels) in one PRC listed company should not exceed 30% of the total shares of such company.

Although it has not been explicitly provided under the Investment Regulations, in practice, the 10% single foreign shareholding restriction is also applied at the QFI level, under which a QFI may not hold 10% or more shares of any listed company, regardless of the fact that such QFI is holding such shares for a number of different clients. Accordingly, as the QFI status of Neuberger Berman Europe Limited is utilised by the Portfolio and other investors as well, the capability of the Portfolio to invest in the shares of certain listed company may be limited due to the investments in the shares of such listed company by other investors who also invest through the QFI status of Neuberger Berman Europe Limited. Specifically, when the shareholding of such other investors in a PRC listed company reaches 10%, the Portfolio may not be able to buy any such shares, even if the then effective price of such shares is advantageous to the Portfolio.

Similarly, since the 30% aggregate foreign shareholding restriction is monitored at the level of all foreign investors, the capability of the Portfolio to invest in China A Shares of certain listed company may also be limited due to the investments made by other foreign investors.

Disclosure to CSRC

In practice, structured products issued by QFI to give foreign investors access to China A Shares are required to be reported to CSRC. The information reported may include information on the

Portfolio as applicable.

Disclosure to the Exchange

According to the relevant Investment Regulations, where the SSE or the SZSE spots any abnormal trading which may affect the normal trading order, it may request the involved QFI to promptly report the securities transaction and shareholding information of the QFI's relevant underlying investors, which may include information on the Portfolio.

Investment Restrictions

- The Portfolio may expose up to 10% of its Net Asset Value in aggregate to the performance of other collective investment schemes which will comply with both the "Investment Restrictions" section of the Prospectus and the UCITS Regulations.
- The Portfolio may invest up to 10% of its Net Asset Value in fixed income securities.
- The Portfolio may invest up to 30% of its Net Asset Value in China A Shares.
- The Portfolio may invest up to 10% of its Net Asset Value in REITs.
- The Portfolio will not utilise total return swaps or margin lending.

Risk

- Investment in the Portfolio carries certain risks which are described in greater detail in the "*Investment Risks*" section of the Prospectus. Investors should read and consider the entire "*Investment Risks*" section of the Prospectus, in particular the risks identified in the "Investment Risks" section of this Supplement which are relevant to the Portfolio. In particular, investors should note that companies related to Innovative Technologies may be subject to significant volatility in growth rates due to rapidly changing market conditions and/or participants, more advanced or new technologies, new competing products and/or enhancements in existing products. The success of this sector is heavily dependent on patents and intellectual property rights and/or licences. The profitability of companies related to Innovative Technologies may be adversely impacted by the loss or impairment of these intellectual property assets. Such companies may also be subject to unpredictable changes in competition. There is no assurance that products or services offered by Innovative Technologies companies will not be rendered obsolete or be adversely affected by competing products, or that such companies will not be adversely affected by other challenges, such as instability, fluctuation, or an overall decline within the industry. Companies related to Innovative Technologies may also be affected by regulatory risks, cyber security risks, government intervention and political risks. **These risks are not purported to be exhaustive and potential investors should review this Supplement and the Prospectus in their entirety and consult with their professional advisers, before making an application for Shares.**
- Investors should refer to the Company's risk management policy with respect to the use of FDI contained in the RMP Statement.
- The Sub-Investment Managers may use future foreign currency exchange contracts in order to hedge some currency risk.
- The Portfolio may have or may be expected to have medium to high volatility due to its investment policies or portfolio management techniques.
- The Portfolio may be leveraged as a result of its investments in FDI but such leverage will not exceed 100% of the Portfolio's Net Asset Value, as measured using the Commitment Approach, at any time.

Environmental, Social and Governance

This Portfolio meets the classification of an Article 8 Portfolio as it promotes environmental and social characteristics and only invests in companies that follow good governance practices.

The Sub-Investment Managers will manage the Portfolio in accordance with the ESG Policy on a continuous basis. The Sub-Investment Managers have fully integrated the ESG Policy into the overall investment process, in particular, the portfolio construction process. A summary of the ESG Policy is detailed in the SFDR Annex of the Prospectus and it is available on the Neuberger Berman website, www.nb.com/esg.

ESG themed investing is a core component of the Sub-Investment Managers' strategy for the Portfolio. The Sub-Investment Managers shall also apply the (i) Controversial Weapons Policy, (ii) the Sustainable Exclusion Policy and (iii) the Enhanced Sustainable Exclusion Policy, when determining what investments to make for the Portfolio. Further details on these screening/exclusion policies are set out in the "*Sustainable Investment Criteria*" section of the Prospectus.

Systematic evaluation of material ESG factors is embedded in the investment decision-making

process pre- and post-investment and is undertaken for every company within the initial investment universe, which the Sub-Investment Managers follow. The Sub-Investment Managers further evaluate those companies, seeking to identify the best in class companies, with sustainable advantages primarily in Asia, such as market leading technology, existing products or market access. The Sub-Investment Managers believe sustainable advantages are demonstrated through best in class product, technology, processes and market access.

In addition to integrating the aforementioned screening/exclusion policies into the portfolio construction process, the Sub-Investment Managers utilise a proprietary ESG scoring system for each company in the strategy that is generated through collaboration with Neuberger Berman's centralised ESG team. The ratings on this scoring system leverage existing third party ESG data sources, non-traditional ESG data and analyst judgment particularly on hard to measure factors to create materiality-driven industry relative ratings. The Sub-Investment Managers prefer higher ESG rated companies over lower if the higher rated companies would better advance the theme of Innovative Technologies in a sustainable way. For the avoidance of doubt, while the Sub-Investment Managers will collaborate with Neuberger Berman's centralised ESG team, no entity other than the Sub-Investment Managers will have discretion over the investment policy of the Portfolio.

A comprehensive written ESG analysis is created for every company that is in the bottom 25% of this scoring system, to assess risks highlighted by the rating and the steps the Sub-Investment Managers plan to take to address or mitigate potential issues.

The Sub-Investment Managers also participate in direct engagement with investee companies (e.g. face-to-face meetings, frequent phone contact with senior management, discussions with customers, suppliers and competitors and attendance at industry and company conferences). Engagement with investee companies is encouraged to mitigate risks and improve ESG and financial outcomes. The Sub-Investment Managers view this direct engagement, as an essential part of its investment process.

Please also refer to Annex VI of the Prospectus which contains additional SFDR disclosures which are applicable to this Portfolio.

Typical Investor Profile

The Portfolio may be suitable for investors seeking capital appreciation opportunities through equity investments primarily in Asian securities exposed to long-term investment themes. Investors need to be comfortable with the risks associated with the Portfolio and be prepared to accept periods of market volatility particularly over short time periods. Investors are likely to have a medium to long-term investment horizon.

Fees and Expenses

Category	Maximum Initial Charge	Maximum Management Fee	Distribution Fee
A, X, Y	5.00%	1.70%	0.00%
B, C1, C2, E	0.00%	1.80%	1.00%
C	0.00%	1.10%	1.00%
D, I, I2, I3, I4, I5	0.00%	0.85%	0.00%
M	2.00%	1.70%	0.80%
P	5.00%	0.81%	0.00%
T	5.00%	1.80%	0.00%
U	3.00%	1.28%	0.00%
Z	0.00%	0.00%	0.00%

For details of the Administration Fees payable by the Portfolio, please see the "Administration Fees" heading in the "Fees and Expenses" section of the Prospectus.

Contingent deferred sales charges

Contingent deferred sales charges will be payable in respect of the following Classes at the rates specified below, depending on the period that has elapsed since the issue of the Shares being redeemed and will be charged on the lower of the Net Asset Value per Share on the relevant Dealing Day in respect of which the relevant Shares were (i) initially subscribed or (ii) redeemed. Any such contingent deferred sales charges will be paid to the relevant Distributor, the Manager or to the Sub-Investment Manager.

Class	Redemption Period in Calendar Days				
	< 365	365 - 729	730 - 1094	1095 – 1459	> 1459
B	4%	3%	2%	1%	0%
C, C1	1%	0%	0%	0%	0%
C2	2%	1%	0%	0%	0%
E	3%	2%	1%	0%	0%

For further information on fees, please refer to the “*Fees and Expenses*” section of the Prospectus.

The Directors of the Company whose names appear in the “*Management and Administration*” section of the Prospectus accept responsibility for the information contained in this document. To the best of the knowledge and belief of the Directors (who have taken all reasonable care to ensure that such is the case) the information contained in this document is in accordance with the facts and does not omit anything likely to affect the importance of such information. The Directors accept responsibility accordingly.

NEUBERGER BERMAN INVESTMENT FUNDS PLC

(An investment company with variable capital constituted as an umbrella fund with segregated liability between sub-funds under the laws of Ireland and authorised by the Central Bank of Ireland pursuant to the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations 2011, as amended)

QUANTITATIVE AND MULTI ASSET SUPPLEMENT

23 DECEMBER 2021

This document forms part of, and should be read in the context of and together with, the prospectus dated 23 December 2021 as may be amended from time to time (the “Prospectus”) in relation to Neuberger Berman Investment Funds plc (the “Company”) and contains information relating to the following sub-funds which are separate portfolios of the Company

NEUBERGER BERMAN MULTI-ASSET INCOME FUND

NEUBERGER BERMAN SYSTEMATIC GLOBAL SUSTAINABLE VALUE FUND

Definitions

In this Supplement the following words and phrases shall have the meanings indicated below:

Business Day	with respect to each Portfolio, a day (except Saturday or Sunday) on which the relevant financial markets in London and New York are open for business;
CCDC	China Central Depository & Clearing Co., Ltd;
CFETS	China Foreign Exchange Trade System & National Interbank Funding Centre;
ChinaClear	China Securities Depository and Clearing Corporation Limited;
CIBM	China Interbank Bond Market;
CMU	Central Moneymarkets Unit;
CSRC	the China Securities Regulatory Commission of the PRC, the government agency responsible for matters relating to securities regulation;
Dealing Day	each Business Day or such other day or days as the Directors may determine and notify to the Administrator and to Shareholders in advance, provided there shall be at least two (2) Dealing Days per month for each Portfolio;
Dealing Deadline	3.00 pm (Irish time) on the relevant Dealing Day in respect of each Portfolio. In exceptional circumstances a Director may authorise the acceptance of a subscription or redemption application, up to 4.30 pm (Irish time) on the relevant Dealing Day for each Portfolio;
HKMA	Hong Kong Monetary Authority;
HKSCC	Hong Kong Securities Clearing Company Limited;
Net Asset Value Calculation Time	10.00 pm (Irish time) on the relevant Dealing Day or such other time as the Directors may determine in respect of the Portfolio;
PBoC	People's Bank of China;
Portfolios	the Neuberger Berman Multi-Asset Income Fund and the Neuberger Berman Systematic Global Sustainable Value Fund;
SEHK	the Stock Exchange of Hong Kong;
Shanghai Stock Connect	the Shanghai-Hong Kong Stock Connect program;
Shenzhen Stock Connect	the Shenzhen-Hong Kong Stock Connect program;
SSE	the Shanghai Stock Exchange;
Stock Connects	the Shanghai Stock Connect and Shenzhen Stock Connect;
SZSE	the Shenzhen Stock Exchange; and
Sub-Investment Manager	Neuberger Berman Europe Limited, Neuberger Berman Investment Advisers LLC, Neuberger Berman Canada ULC, and such other company as may be appointed by the Manager from time to time in respect of any particular Portfolio, with the prior approval of the Company and the Central Bank.

Investment Risks

Investment in the Portfolios carries certain risks, which are described in the “*Investment Risks*” section of the Prospectus and in the “Risk” section of the information specific to each Portfolio, as included in this Supplement. **These risks are not purported to be exhaustive and potential investors should review this Supplement and the Prospectus in their entirety and consult with their professional advisers, before making an application for Shares.**

There can be no assurance that the Portfolios will achieve their respective objectives. While there are some risks described below that may be common to a number or all of the Portfolios, there may also be specific risk considerations which apply only to particular Portfolios.

Distribution Policy

Under normal circumstances, the Directors intend that dividends in respect of:

- each of the (Monthly) Distributing Classes in the Portfolios shall be declared on or prior to the last Business Day of each month and paid within three Business Days thereafter;
- each of the other Distributing Classes in the Portfolios (except for the Neuberger Berman Systematic Global Sustainable Value Fund) shall be declared on a quarterly basis and paid within 30 Business Days thereafter; and
- in respect to the Neuberger Berman Systematic Global Sustainable Value Fund, each of the other Distributing Classes shall be declared on an annual basis and paid within 30 Business Days thereafter in relation to the Net Income of the Distributing Classes for the calendar year ended the previous 31 December.

Subscriptions and Redemptions

Subscriptions for Shares in all available Classes of each Portfolio, which have not already launched at the date of this Supplement will be considered during the Initial Offer Period, upon receipt by the Administrator of completed share applications and subscription monies as specified in the “*Subscriptions*” section of the Prospectus. Such Shares will be issued at the Initial Offer Price on the last day of the Initial Offer Period.

The Initial Offer Period shall run from 9.00 am on the Business Day following the date of this Supplement to 5.00 pm on 24 June 2022 or such earlier or later time as the Directors may determine at their discretion and notify to the Central Bank and to subscribers.

The Initial Offer Price for each of the share classes shall be as follows:

AUD Classes: AUD 10	DKK Classes: DKK 50	NOK Classes: NOK 100
BRL Classes: BRL 20	EUR Classes: EUR 10	NZD Classes: NZD 10
CAD Classes: CAD 10	GBP Classes: GBP 10	SEK Classes: SEK 100
CHF Classes: CHF 10	HKD Classes: HKD 10	SGD Classes: SGD 20
CLP Classes: CLP 5,000	ILS Classes: ILS 30	USD Classes: USD 10
CNY Classes: CNY 100	JPY Classes: JPY 1,000	ZAR Classes: ZAR 100

Thereafter and, in the case of Classes which have already launched from the date of this Supplement, Shares will be issued at their Net Asset Value per Share, subject to the provision for Duties and Charges in respect of the issue of the Shares and rounding as provided for in the Articles on each Dealing Day.

The Company reserves the right to apply to Euronext Dublin to have the Shares in each of the Classes admitted to the Official List and to trading on the regulated market of Euronext Dublin.

The Company may, in its sole discretion, reject any subscription in whole or in part without reason.

As stated in the “*Subscriptions and Redemptions*” section of the Prospectus, redemption proceeds in respect of the Portfolios will be paid within ten (10) Business Days of the relevant Dealing Day unless payment has been suspended in the circumstances described in the “*Temporary Suspension of Dealings*” section of the Prospectus, although the Company will seek to make such payments within a shorter period of time where possible (up to and including within three (3) Business Days of the relevant Dealing Day).

Neuberger Berman Multi-Asset Income Fund

The value of Shares may go down as well as up and investors may not get back any of the amount invested. Investors should note that the Portfolio may achieve its investment objective by investing principally in FDI as described below which may be complex and sophisticated in nature. An investment in the Portfolio should not constitute a substantial proportion of an investment portfolio and may not be appropriate for all investors.

Investment Objective

The Portfolio aims to provide an income distribution of 7% per annum before fees, whilst also seeking to preserve capital and offering the potential for capital growth over a market cycle (typically 3 years) by investing in a diversified range of assets and markets worldwide.

Investors should note that the income distribution is not guaranteed over a market cycle, a 12-month or any period and the Portfolio's capital is at risk. Investors should also note that, over the course of a market cycle, there may be significant periods of time during which the income generated by the Portfolio will deviate from the targeted distribution and the Portfolio may experience periods of negative return. There can be no guarantee that the Portfolio will ultimately achieve its investment objective.

Investment Approach

The Manager and the Sub-Investment Manager will allocate the Portfolio's assets amongst multiple asset classes. It will invest in strategies which are intended to generate income for the Portfolio using global equity and debt securities, currencies and UCITS eligible exposures to commodities, as described in greater detail in the "Instruments/Asset Classes" section below. The Portfolio may obtain exposure to these asset classes through direct investment in such securities (other than in the case of commodities), investment in exchange traded notes and certificates or other eligible collective investment schemes ("Underlying Funds"), including exchange traded funds ("ETFs"), which are themselves exposed to such assets, or through the use of FDI as described in greater detail below. Exposure to commodities will be achieved through exposure to commodity indices that have been cleared in advance by the Central Bank for use by UCITS.

Securities invested in by the Portfolio will be listed, dealt or traded on Recognised Markets globally, without any particular focus on any one industrial sector and, in the case of debt securities, may be rated investment grade or below by a Recognised Rating Agency. The Portfolio may invest in securities issued by companies located in, and governments of, Emerging Market Countries, which may involve additional risk, relative to investment in more developed economies.

The Manager is responsible for allocating some or all of the assets of the Portfolio to the Sub-Investment Managers who will employ the investment strategies outlined below. The Manager is also responsible for determining the amount of the Portfolio's assets to be allocated to each Sub-Investment Manager and for managing any portion of the Portfolio's assets that are not allocated to one of the Sub-Investment Managers.

The Portfolio seeks to achieve its investment objective primarily through investing in a basket of income generation-focused strategies across traditional and alternative sources of income and through incorporating tactical asset allocation views to take advantage of changes in economic and market conditions, utilising the Manager and the Sub-Investment Managers' collective investment expertise.

In constructing the basket of income generation-focused strategies, the Manager and the Sub-Investment Managers will leverage the collective insights of Neuberger Berman's wider investment teams to identify the most compelling opportunities to generate income and capital appreciation. Once income opportunities have been identified, they are evaluated based on their expected contribution to return, risk reduction, correlation and other risk factors in order to construct a diversified collection of strategies, which are not closely correlated to each other, to meet the Portfolio's investment objective.

In addition to building a portfolio of income generation-focused and absolute return strategies, the Manager and the Sub-Investment Managers will also express their strategic and tactical asset allocation views in the Portfolio. The asset allocation process is forward looking, dynamic and may be expressed in several ways. The Manager and the Sub-Investment Managers' portfolio management teams meet on a regular basis to review and identify opportunities across asset classes and markets. The team make their decisions based on internal research and analysis, such as the asset class forecasts provided by Neuberger Berman's asset allocation committee (which contains

representatives of both the Manager and the Sub-Investment Managers), as well as other inputs such as macroeconomic factors (e.g. GDP growth, unemployment, inflation) and fundamental market assumptions (i.e. the markets' expectations for assets' prices).

The Manager and the Sub-Investment Managers use this forward looking analysis to construct a strategic overall portfolio of exposures for the Portfolio comprising the traditional income generating assets, such as fixed income and capital appreciation strategies such as the equities and alternative strategies as described below. The Manager and the Sub-Investment Managers will combine these strategies to seek to achieve the Portfolio's investment objective.

The Manager and the Sub-Investment Managers may tactically adjust the Portfolio's asset allocation and security selection in response to, or in anticipation of, publication of market statistics such as inflation expectation data, central bank monetary policies or economic growth expectation data. The Manager and the Sub-Investment Managers may also tactically adjust the asset allocation and strategy selection in response to their own analysis of historic and projected relative returns, economic factors, industry cycles, volatility forecasts and political trends and other factors impacting global financial markets.

The Portfolio may opportunistically invest up to 10% of its Net Asset Value in participation interests in floating or adjustable rate senior secured loans, which are securitised and freely transferable, and which meet the regulatory criteria to be considered money market instruments.

The Manager and the Sub-Investment Managers will begin with traditional sources of income, such as higher dividend paying global equities and higher yielding corporate or government fixed income securities. To select higher dividend paying global equities, the Manager and the Sub-Investment Managers will screen for equity securities with a high dividend yield and what they consider to be an attractive price compared to their evaluation of their economic value. To select higher yielding corporate or government fixed income securities, the Manager and the Sub-Investment Managers will screen for what they consider to be undervalued securities with an attractive yield. The Manager and the Sub-Investment Managers will also incorporate the following ancillary sources of income and capital appreciation: absolute return strategies providing exposure to Risk Premia (as described immediately below), an option writing strategy and a currency strategy.

Risk Premia

Risk Premia are rules-based, non-discretionary, systematic alternative strategies (which proprietary to the Manager) that are designed to capture returns or premia by exploiting well known risks such as investing in smaller issuers, higher yielding securities or less liquid securities, as described in greater detail below, and behavioural patterns in financial markets to provide returns that have a low level of correlation to returns from traditional markets such as broad-based stock markets. Examples of Risk Premia that the Portfolio may seek exposure to are set out below and these will express one or a combination of the characteristics referenced above:

- Value. These Risk Premia seek to make returns from the tendency of relatively cheaper assets to outperform relatively more expensive assets, for example, a long (positive) exposure to an equity value index and a synthetic short (negative) exposure to an equity growth index which are equal in value. The equity value index is made up of companies which are considered by the provider of such index to be valued relatively cheaply whereas the equity growth index is made up of companies which are considered by the index provider to be valued relatively expensively. The exposure to the two indices gives a broad market neutral position (in that it should not be impacted by general changes in the market) but also gives exposure to the desired value factor, as an increase in the value of the index relative to the growth index, which is expected in light of the tendency referred to above, should result in a gain.
- Momentum. These Risk Premia seek to make returns from the tendency of assets which have recently performed well or badly to continue to perform well or badly, for example a long exposure to fixed income securities that have displayed positive performance over the previous six months or more and synthetic short exposures to securities with negative performance over the same period on the expectation that those trends will continue.
- Carry. These Risk Premia seek to make returns from the tendency for assets which

provide higher yields (e.g. interest payments or dividends) to outperform assets which provide lower yields, for example, a long exposure to a currency with higher interest rates and synthetic short exposure to currencies with lower interest rates, expecting the higher interest rate currency to increase in value relative to the lower interest rate currency.

- Liquidity. These Risk Premia seek to make returns from the tendency for less liquid assets (i.e. those which are traded less frequently) to outperform more liquid assets, for example a long exposure to an index comprised of securities issued by issuers with smaller market capitalisation (i.e. with fewer shares in issue) and a synthetic short exposure to an index comprised of securities issued by issuers with larger market capitalisations, on the expectation that the smaller capitalisation shares will be less liquid than the larger capitalisation shares and may therefore be expected to perform better, in line with the tendency described above.

For these purposes, “synthetic short” exposures are investments in FDI which reference certain assets in anticipation of those assets declining in value and which will generate a return in the event that the value of those assets does in fact decline.

The Portfolio may seek to exploit Risk Premia across a globally diversified range of equities, government and corporate fixed income securities, commodities and currencies to generate absolute returns. The Portfolio will follow a flexible approach in relation to asset exposure to achieve its investment objective, which at times may result in the Portfolio having no exposure to particular asset classes.

The Portfolio may achieve its exposure to Risk Premia through the use of excess return swaps in respect of broad-based, UCITS-eligible indices which provide a variable synthetic exposure to a diversified range of the Risk Premia described above across the asset classes described above or through a combination of direct investments in securities of the types described in the “*Instruments/Asset Classes*” section below and synthetic exposures through the use of FDI to assets, namely commodities, which may not be held directly by UCITS.

Option Trading Strategy

The Manager and the Sub-Investment Manager may selectively sell call and put options on financial indices, in order to generate additional income for the Portfolio. The Manager and the Sub-Investment Manager will seek to implement an option trading strategy, known as an “Index Strangle Strategy”, which involves selling call and put options in respect of financial indices and setting target exercise or ‘strike’ prices at which the purchasers of those options may sell or buy exposure to those indices in the future.

Call options offer the buyer the right, but not the obligation, to buy specified assets at a pre-agreed price during a certain period of time or on a specific date. Put options offer the buyer the right, but not the obligation, to sell specified assets at a pre-agreed price during a certain period of time or on a specific date. The Index Strangle Strategy will focus on financial indices which reflect securities markets in the United States of America (e.g. S&P 500 Index), Europe (e.g. EuroStoxx 50 Index, DAX Index or FTSE 100 Index) and / or Japan (e.g. Nikkei 225 Index) and other financial indices. The strike price of an option is the fixed price at which the owner of the option can purchase (in the case of a call option) or sell (in the case of a put option) the underlying financial index. Details of any financial indices to which exposure is taken by the Fund will be provided to Shareholders in the Fund’s semi-annual and annual accounts.

To implement the Index Strangle Strategy, the Manager and the Sub-Investment Manager will sell both call options and put options on the same index with different strike prices but with the same maturity (the combination of these trades is called a “Strangle”). The Portfolio will earn premiums from the sale of the options. Put options will only be exercised by their purchasers if the prices of the underlying financial indices fall below the strike price and call options will only be exercised by their purchasers if the prices of the underlying financial indices exceed the strike price. The Index Strangle Strategy will make a profit if the prices of the underlying financial indices stay above the put option strike prices minus the total premiums received (“Lower Break-Even Point”) and below the call option strike prices plus the total premiums received (“Upper Break-Even Point”). In turn, the Index Strangle Strategy will result in a loss if the prices of the underlying financial indices either fall below the Lower Break-Even Point or exceed the Upper Break-Even Point. If the prices of the underlying financial indices fall below the Lower Break-Even Point, the potential loss of the Index Strangle Strategy will be limited to the difference between the strike price and settlement price of the indices net of premiums

collected. However, if the price of an underlying index exceeds the Upper Break-Even Point of a Strangle, the potential loss may be unlimited, as the price of the index could theoretically increase by an unlimited amount and losses are defined by the difference of the price of the index on the date on which the option is exercised and the strike price net of the premium received by the Portfolio.

Currency Strategy

The Manager and/or the Sub-Investment Managers may also actively invest in global liquid currencies seeking absolute returns with a lower level of volatility and lower correlation to the other strategies within the Portfolio. The Manager and/or the Sub-Investment Managers may take long and synthetic short positions in respect of these currencies, through the use of FDI, as described below, based on the Manager and/or the Sub-Investment Managers' views of the strength of currencies and their likely value relative to one another. These views are supported by a framework of indicators that the Manager and/or Sub Investment Manager use to assess this relative value. Indicators used include the economic growth, stability, yield, monetary policy, capital flows and risk characteristics effecting the issuers of the currency, over short-, medium- and long-term investment horizons. The Manager and/or Sub Investment Manager believe that the ability to manage the Portfolio's currency exposures actively is a significant factor in the management of the risks associated with the Portfolio's investments, in the context of its investment objective.

Risk Monitoring

The Portfolio's risk is monitored daily by an independent risk management team within the Manager and the Sub-Investment Managers to ensure that the levels of risk associated with the Portfolio's investments is in line with the overall risk objectives that have been set by the Manager and the Sub-Investment Managers. The independent risk management team uses a third party multi-asset class risk management system for risk management and monitoring, as well as its own proprietary analyses.

The risk management system allows for real-time views into the components of the Portfolio across all asset classes invested in and also allows for customised reporting based on how the portfolio management teams within the Manager and the Sub-Investment Managers view risk.

Under normal market conditions, the Manager and Sub-Investment Managers anticipate that the Portfolio's volatility (a measure of how much the Portfolio's returns may vary over a year) will be between 6-9%.

The Portfolio is actively managed; no benchmark is used for performance comparison purposes or as a universe for selection.

Benchmark	N/A.
Base Currency	US Dollars (USD).
Instruments / Asset Classes	<p>The Portfolio can invest or be exposed to the following types of assets:</p> <p>Fixed Income Securities (Debt Securities). The Portfolio may invest in the following:</p> <ul style="list-style-type: none"> • Both fixed and floating rate debt securities, including bonds issued by governments, government related and corporate entities worldwide denominated in local currencies; • Corporate bonds with warrants, convertible bonds, contingent convertible bonds (ie, bonds which convert into a stock at a predetermined price and / or when certain capital conditions are met), bonds resulting from the restructuring of syndicated loans or bank loans (e.g. "Brady" bonds), subordinated bonds, debentures and notes (including freely transferable and unleveraged structured notes, exchange traded notes and freely transferable promissory notes); • Privately issued mortgage-backed securities, asset-backed securities, structured securities (including mortgage-backed securities such as pass-through certificates, which entitle the holders to receipt of mortgage payments and interest and principal only components of mortgage-backed securities), exchange traded certificates and notes that derive interest and principal payments from specified assets (including residential and commercial mortgages, credit card debt and pools of other kinds of receivables, such as loans, royalties or other earnings); • Collateralised mortgage obligations, collateralised loan obligations and payment-in-kind bonds (which are bonds that pay interest in the form of additional bonds of the

same kind);

- Deferred payment securities (securities which pay regular interest after a predetermined date) and zero coupon securities;

Equity and Equity-linked Securities. Equity and equity-linked securities, which may include, without limitation, common stock, preferred stock, convertible preferred stock, American, European and Global Depository Receipts (securities issued by a financial institution which evidence ownership interests in a security or a pool of securities deposited with the financial institution), units in real estate investment trusts (REITs) (investment vehicles which own, operate, or finance income-producing real estate assets) and units in Master Limited Partnerships (MLPs) (an MLP is a US partnership structure that principally derives cash flows from real estate, natural resources and commodities and that issues publicly traded units, such units being, in effect, equivalent to shares issued by a company).

Money Market Instruments. Money market instruments may include bank deposits, fixed or floating rate instruments (including commercial paper), floating or variable rate notes, bankers acceptances, certificates of deposit, debentures and short-dated government or corporate bonds, participation interests in loans (which are securitised and freely transferable), cash and cash equivalents (including treasury bills) that are rated as investment grade or below by Recognised Rating Agencies or are unrated.

Investment grade securities are highly rated securities, generally those rated Baa3, BBB- or above by one or more Recognised Rating Agencies, while high yield securities are medium or lower rated securities, generally those rated below investment grade and sometimes referred to as “junk bonds”.

Collective Investment Schemes. In addition, the Portfolio may invest in Underlying Funds which are themselves exposed to investments that are similar to the Portfolio's other investments, provided that the Portfolio may not invest more than 10% in Underlying Funds which themselves invest in other collective investment schemes. Such Underlying Funds may or may not be managed by the Manager and/or the Sub-Investment Managers or its affiliates and will comply with the requirements of the UCITS Regulations in respect of such investments.

The Underlying Funds in which the Portfolio may invest will be eligible collective investment schemes in accordance with the Central Bank's rules, which may be domiciled in Relevant Jurisdictions or the United States of America and will qualify as UCITS or alternative investment fund schemes and will be regulated as such by their home state regulator.

Underlying Funds in which the Portfolio invests may be leveraged but such collective investment schemes will not generally be leveraged: (i) in excess of 100% of their net asset value; or (ii) so that their 1 day absolute VaR exceeds 4.47% of their net asset value over a 250 day horizon with a 99% confidence level; or (iii) so that their 1 month relative VaR exceeds twice the VaR of a comparable benchmark portfolio over a 250 day horizon with a 99% confidence level, depending on how such Underlying Funds measure their global exposure.

ETFs, which are investment funds whose units may be bought and sold on a securities exchange. ETFs typically invest in a portfolio of securities which is designed to track the performance of particular market segment or index. The ETFs will be located in Relevant Jurisdictions and will be authorised under the UCITS Directive or will be alternative investment funds which are eligible for investment by the Portfolio in accordance with the requirements of the Central Bank. The ETFs will represent investments that are similar to the Portfolio's other investments. The ETFs will operate on the principle of risk spreading and will not be leveraged.

Financial Derivative Instruments (“FDIs”). FDI will be used for hedging, including synthetic short hedging, efficient portfolio management and/or investment purposes and subject to the conditions and limits imposed by the Central Bank as set out in the Prospectus and this Supplement:

- Swaps may include currency, interest rate, UCITS eligible indices, volatility, variance, credit default, excess return and total return swaps (in respect of each of the other types of assets in which the Portfolio may invest, as described in this “*Instruments/Asset Classes*” section) and may be used to achieve a profit as well as

to hedge existing long positions. Excess return swaps are OTC FDI under which one party will agree to pay the other the return of an underlying asset, in this case the Index and the other party agrees to pay the first party a fee, either periodically or upfront on entry into the swap. An excess return swap differs from a total return swap because the payment that the other party receives will be based solely on the performance of the underlying asset, while the payment to the other party under a total return swap will also include an element to reflect the return which cash to the value of the notional amount of the swap would have earned on deposit. The maximum proportion of the Portfolio's Net Asset Value that can be subject to total return swaps is 30%. The expected proportion of the Portfolio's Net Asset Value that will be subject to total return swaps is 15%. The expected proportions are not limits and the actual percentages may vary over time depending on factors including, but not limited to, market conditions;

- Options on fixed income securities, interest rates, UCITS eligible bond indices, equity securities, UCITS eligible equity indices, volatility and currencies may be used to achieve a profit as well as to hedge existing long positions;
- Futures contracts based on equity securities, interest rates, UCITS eligible bond indices, UCITS eligible equity indices and currencies may be used to achieve a profit as well as to hedge existing long positions; and
- Forwards on fixed income securities, forward and non-deliverable forward currency contracts may be used to achieve a profit as well as to hedge existing long currency exposures.

Volatility swaps are OTC FDI under which one party will agree to pay the other a return based on the volatility of an underlying asset and the other party agrees to pay the first party a fee, either periodically or upfront on entry into the swap. As such the underlying of the swap is the volatility of a given asset and they allow an investor to speculate solely upon the movement of the asset's volatility without the influence of its price.

A variance swap is a contract which allows an investor to trade the realised volatility of an underlying asset (e.g. an equity index) against the implied volatility of that underlying asset. Under the terms of a typical variance swap, parties agree to exchange, at maturity, a pre-agreed notional amount multiplied by the difference between the realised variance of an equity index over the lifetime of the variance swap and a pre-determined reference level. Realised variance is the mathematical square of realised volatility, i.e. if the realised volatility of the index is 5%, its realised variance will be 25%. The reference level of a variance swap is determined at the inception of the swap by reference to the implied volatility of the relevant equity index. The seller of the variance swap (who is said to have a short variance position) will benefit when realised volatility is lower than the reference level over the period of the swap, in which case the buyer of the variance swap would suffer a loss. Conversely, the buyer of the variance swap (who is said to have a long variance position) will benefit when realised volatility is higher than the reference level, in which case the seller of the variance swap would suffer a loss. Realised volatility is a backward-looking measure of the amount by which the returns of an asset actually varied over a time period and is calculated by reference to the previous day's returns of that asset. Implied volatility is a forward-looking measure, which represents the market's expectation of the future volatility of a particular asset over a particular period.

Swaps, options, futures and forwards may each be used to generate synthetic short positions for investment, hedging or efficient portfolio management purposes in respect of securities which the Manager expects to decrease in value.

As the Portfolio may purchase FDI generally using only a fraction of the assets that would be needed to purchase the relevant securities directly, the remainder of the assets allocated to the Manager and/or the Sub-Investment Managers may be invested in the other types of securities listed above. The Manager and/or the Sub-Investment Managers may therefore seek to achieve greater returns by purchasing derivative instruments and investing the remaining assets in such other securities to add excess return.

The counterparties to OTC FDI entered into in respect of the Portfolio will be entities (which will not be related to the Manager or its delegates) with legal personality which may be located globally. They will be subject to ongoing supervision by a public authority, be rated at or in excess of the requirements of the Central Bank by a Recognised Rating Agency and have the necessary organisational structure and resources for the relevant type of transaction.

Repo Contracts and Securities Lending Agreements. Repo Contracts and Securities Lending Agreements may be used subject to the conditions and limits set out in the

Prospectus.

Bond Connect

The PBoC and the HKMA have approved the CFETS, CCDC, SHCH, together with Hong Kong Exchanges and Clearing Limited and CMU to launch Bond Connect, which is a mutual bond market access programme between Mainland China and Hong Kong. Bond Connect allows investors to trade electronically between the Mainland China and Hong Kong bond markets without quota restrictions and requirements to identify the ultimate investment amount.

Currently, Bond Connect comprises a Northbound Trading Link between CFETS, the operator of the CIBM and offshore trading access platforms recognised by the PBoC, to facilitate investment by Hong Kong and overseas investors (including the Portfolio) in eligible bonds traded on the CIBM. A Southbound Trading Link, facilitating investment in overseas bond markets by Mainland Chinese investors is still under development but is intended to form part of Bond Connect once established.

Eligible Securities

Hong Kong and overseas investors (including the Portfolio) will be able to trade over the entire range of instruments traded on the CIBM, including products on both the secondary and primary markets.

Trading Day

Northbound investors (including the Portfolio) are able to trade through Bond Connect on days upon which the CIBM is open to trade, regardless of whether they are a public holiday in Hong Kong.

Settlement and Custody

Settlement and custody of Northbound bond trades under Bond Connect will be implemented under the link between the CMU of the HKMA and Mainland China's two bond settlement systems, namely, CCDC and SHCH. The CMU settles Northbound trades and holds the CIBM bonds on behalf of its members in nominee accounts with each of CCDC and SHCH. CCDC and SHCH provide services to foreign investors, directly and indirectly, using Bond Connect.

Bonds purchased by Hong Kong and overseas investors (including the Portfolio) are recorded in an omnibus nominee account at CCDC and SHCH in the name of CMU. The CMU itself maintains the bonds in segregated sub-accounts of its members, who in turn may hold the bonds on their own account or on behalf of other investors or custodians. Accordingly, bonds purchased by Hong Kong and overseas purchasers through Bond Connect are held by the purchaser's global or local custodian in a segregated sub-account opened in their name at the CMU.

Currency

Hong Kong and overseas investors may trade through Bond Connect using offshore RMB (CNH) or by converting foreign currencies into onshore RMB (CNY) under Bond Connect.

Where an investor uses foreign currencies to invest through the Northbound Trading Link, it must open a segregated RMB capital account with an eligible RMB settlement Bank in Hong Kong to convert its foreign currencies into CNY. Where bonds are purchased in CNY in this manner, upon sale of the bonds, the sale proceeds remitted out of Mainland China must be converted back into the relevant foreign currencies.

Further information about Bond Connect is available at:

<http://www.chinabondconnect.com/en/index.htm>

Investment Restrictions

- Under normal market conditions, it is the intention of the Manager and the Sub-Investment Managers to invest a maximum of 30% of the Portfolio's Net Asset Value in sub Investment grade fixed income securities.
 - Under normal market conditions, it is the intention of the Manager and the Sub-Investment Managers to maintain a small allocation to cash, but may increase that allocation up to 100% of its Net Asset Value at certain times for temporary defensive
-

purposes or in circumstances of very high volatility or if adverse market circumstances require.

- A maximum of 50% of the Portfolio's Net Asset Value may be invested in securities of Emerging Market Countries.
- The Portfolio will not invest more than 5% of its Net Asset Value in Underlying Funds which are not ETFs and not more than 10% of its Net Asset Value in Underlying Funds in aggregate.
- The Portfolio will not utilise margin lending.

Risk

- Investment in the Portfolio carries certain risks which are described in greater detail in the "Investment Risks" section of the Prospectus. While investors should read and consider the entire "Investment Risks" section of the Prospectus, the risks summarised in the following section, namely, "Risks related to Financial Derivative Instruments" and "Risks Associated with Investment in the China Interbank Bond Market through Bond Connect" are particularly relevant to this Portfolio. **These risks are not purported to be exhaustive and potential investors should review this Supplement and the Prospectus in their entirety and consult with their professional advisers, before making an application for Shares.**
- Investors should refer to the Company's risk management policy with respect to the use of FDI contained in the RMP Statement.
- The Portfolio may be leveraged up to approximately 400% of its Net Asset Value as a result of its use of FDI and any leverage inherent in any index in which the Sub-Fund may be exposed, although investors should note that higher levels of leverage may be experienced. This expected leverage figure is calculated using the Sum of the Notional values of the derivatives used, as required by the Central Bank. Using this methodology does not reflect any netting or hedging that the Portfolio may have in place. The Portfolio's global exposure is subject to an advanced risk management process which, in compliance with the UCITS Regulations, aims to ensure that on any day the Absolute VaR of the Portfolio will be no greater than 4.47% of its Net Asset Value (or maximum 20% 1 Month 99% confidence VaR). The VaR of the Portfolio is a daily estimation of the maximum loss which the Portfolio may incur over a one day holding period and is arrived at through quantitative simulations with a 99% one tailed confidence interval and using a historical observation period of at least 250 business days. This process is described in detail in the statement of risk management procedures of the Company and its appendix in respect of the Portfolio. While the Portfolio measures and monitors its global exposure using the VaR approach, rather than by use of the Commitment Approach, the leverage of the Portfolio using the Commitment Approach is expected to be 300% of its Net Asset Value as a result of its use of FDI and any leverage inherent in any index in which the Sub-Fund may be exposed, although investors should note that higher levels of leverage may be experienced.
- The Manager and/or the Sub-Investment Managers may use forward and future currency contracts in order to hedge currency risk on a discretionary basis. The use of such hedging techniques may increase the risk profile of the Portfolio.
- The Portfolio may take synthetic long or synthetic short positions and the investment strategies are expected to involve substantial leverage as a result of the use of FDI for investment and hedging purposes as outlined above. The Portfolio's long positions are not expected to exceed 250% of its Net Asset Value and its short positions are not expected to exceed 150% of its Net Asset Value.
- Certain written derivative contracts give the right of potential exercise to a third party. This creates exposure for the Portfolio as they may have to deliver out the underlying investments and should the market move unfavourably result in a loss. The maximum loss for the writer of a put option is equal to the strike price less the premium received. The maximum loss for the writer of an uncovered call option is unlimited. In the case of a written option or a future the notional underlying is not delivered upon exercise as the contract is cash settled. The Portfolio's financial liability is therefore linked to the marked-to market value of the notional underlying investments.

Environmental, Social and Governance ("ESG")

This Portfolio meets the classification of an Article 8 Portfolio as it promotes environmental and social characteristics and limits investments to companies that follow good governance practices.

ESG risks and opportunities are considered in the selection of securities to be constituents of the Portfolio. The Manager and the Sub-Investment Manager assess securities in relation to their exposure to and the management of ESG risks. ESG represents governance, (being the way in which the company is run), environmental

issues, (such as the impact on natural resources), and social issues (such as human rights).

Please also refer to Annex VI of the Prospectus which contains additional information on the ESG characteristics that are applicable to this Portfolio.

Typical Investor Profile

The Portfolio may be suitable for an investor seeking income and capital appreciation over a mid-to-long term horizon. The investor should be prepared to accept periods of market volatility and the risks of the capital markets in pursuit of long term goals, given the ability of the Portfolio to invest in emerging market securities and/or below investment grade securities.

Fees and Expenses

Category	Maximum Initial Charge	Maximum Management fee	Distribution Fee
A, X, Y	5.00%	1.30%	0.00%
B, C1, C2, E	0.00%	1.80%	1.00%
C	0.00%	0.85%	1.00%
D, I, I2, I3, I4, I5	0.00%	0.65%	0.00%
M	2.00%	1.30%	0.80%
P	5.00%	0.62%	0.00%
T	5.00%	1.80%	0.00%
U	3.00%	0.95%	0.00%
Z	0.00%	0.00%	0.00%

For details of the Administration Fees payable by the Portfolio, please see the “Administration Fees” heading in the “Fees and Expenses” section of the Prospectus.

Contingent deferred sales charges

Contingent deferred sales charges will be payable in respect of the following Classes at the rates specified below, depending on the period that has elapsed since the issue of the Shares being redeemed and will be charged on the lower of the Net Asset Value per Share on the relevant Dealing Day in respect of which the relevant Shares were (i) initially subscribed or (ii) redeemed. Any such contingent deferred sales charges will be paid to the relevant Distributor, the Manager or to the Sub-Investment Manager.

Class	Redemption Period in Calendar Days

C2	2%	1%	0%	0%	0%
E	3%	2%	1%	0%	0%

For further information on fees, please refer to the “Fees and Expenses” section of the Prospectus.

Neuberger Berman Systematic Global Sustainable Value Fund

An investment in the Portfolio should not constitute a substantial proportion of an investment portfolio and may not be appropriate for all investors. Investors should note that the Portfolio may achieve its investment objective by investing in financial derivative instruments as described below. The Portfolio will not use FDI extensively or primarily for investment purposes.

Investment Objective	The Portfolio seeks to achieve long term capital growth from investing primarily in a portfolio of global equity holdings that comply with the Sustainable Criteria (as this term is defined within the “ <i>Sustainable Investment Criteria</i> ” section of the Prospectus).
Investment Approach	<p>The Manager delegates the management of the Portfolio to Neuberger Berman Canada ULC who in turn sub-delegates an allocation of those assets to Neuberger Berman Investment Advisers LLC. The Sub-Investment Managers will employ the investment strategy as outlined below. Neuberger Berman Europe Limited is appointed to manage any portion of the Portfolio’s assets that is not allocated to Neuberger Berman Canada ULC or any other sub-investment manager which is appointed to the Portfolio.</p> <p>The Portfolio will seek to achieve its objective by investing primarily in equity securities issued by companies that are listed or traded on Recognised Markets globally (which include both developed and Emerging Market Countries). The Sub-Investment Managers may select from an investable universe which consists of equity securities issued by companies domiciled in countries which are represented in the Benchmarks (the “Investable Universe”).</p> <p>The Portfolio seeks to reduce risk by diversifying among many industries within the countries and economic sectors it identifies. Although it has the flexibility to invest a significant portion of its assets in any one country or region, it generally intends to remain diversified across countries and geographical regions.</p> <p>The Portfolio may invest in excess of 20% of its Net Asset Value in equity securities issued by companies domiciled in Emerging Market Countries.</p> <p>The investment process has six phases:</p> <ol style="list-style-type: none"> (i) identify bottom-up investment themes which are believed to be persistent drivers of excess return (i.e. characteristics of stocks that the Sub-Investment Manager believes are systematically linked to the generation of better than average returns) (“return factors”). Return factors used to assess the characteristics of security issuers and to drive individual stock selection include but are not limited to valuation, quality, income, and technical price dynamics such as momentum and volatility; (ii) determine the exposure of every equity in the Investable Universe to each return factor using the Sub-Investment Managers’ analysis as outlined at (i) above; (iii) rate each such equity, based on its aggregate exposure to each of the return factors, as determined at step (ii) above; (iv) evaluate risk in respect of net sector exposure, net country exposure and single name exposure limits, relative to the wider Investable Universe, as relevant. Country and economic sector allocations will be based on the security selection process described above, subject to the aforementioned risk monitoring considerations. (v) reduce exposure to equities that are poorly rated in comparison to the other equities in the Investable Universe or that are considered to carry higher risk relative to the other equities in the Investable Universe; and

- (vi) increase exposure to equities that are comparatively highly rated or that are considered to carry relatively lower risk, respectively, relative to the other equities in the Investable Universe.

The return factors outlined above will be selected based on their being generally (i) backed by sound economic and fundamental rationale, (ii) persistent over time, (iii) diversified relative to more traditional sources of returns, and (iv) capable of being implemented in a cost efficient way.

The Portfolio is reassessed on a regular basis to incorporate new information as it arises, at least monthly and more frequently if market conditions require. The Portfolio's investments are monitored daily and individual stocks can be sold at the discretion of the Sub-Investment Managers, due to significant changes in business, environment or company events. New purchases are derived from the reassessment of the investment universe, using the investment processes described above.

The Portfolio may invest in securities which provide exposure to the Investable Universe, where they meet, at a minimum, the Sustainability Criteria, as this term is defined within the "Sustainable Investment Criteria" section of the Prospectus. A list of securities which do not fulfil the Sustainability Criteria is provided to the Sub-Investment Managers by the Manager. The Sub-Investment Managers consider ESG risks and opportunities (as described below and in the "ESG" section below), among other risk and return factors described above, in the evaluation of securities for the purposes of holding and weighting securities in the Portfolio.

ESG analysis: the Sub-Investment Manager will first exclude companies from the investment universe that are involved in controversial activities and behaviour, such as the production of controversial weapons, fur manufacturers, gambling, nuclear power or non-compliance with the United Nations Global Compact. The application of the Sustainable Criteria also means that companies involved in tobacco, civilian firearms, private prisons and fossil fuels will also be excluded.

The Sub-Investment Manager will then assess the investment universe, which involves in-depth research and analysis of companies' ESG profiles and will also exclude companies that show poorly on this ESG assessment. The Sub-Investment Manager will ensure that securities representing at least 90% of the Net Asset Value of the Portfolio are covered by the ESG assessment.

Through these two ESG exclusionary steps, the Sub-Investment Manager will exclude at least 20% of components of the investment universe.

Collective investment schemes may be used to take certain regional exposures which would be inefficient to obtain via individual securities or for cash management purposes. Some constituents of these collective investment schemes may not comply with the Sustainable Criteria.

Exposure will be obtained through direct investments and/or through investment in collective investment schemes and/or FDI as described below.

The Portfolio is actively managed and does not intend to track the Benchmarks which are included here for performance comparison purposes and because the Portfolio's investment policy restricts the extent to which the Portfolio's holdings may deviate from the Benchmarks, as described above. This deviation may be significant.

Benchmarks

The MSCI ACWI (All Country World Index) (Total Return, Net of Tax, USD) is a free float-adjusted market capitalisation weighted index that is designed to measure the equity market performance of developed and emerging markets. As of January 2021, the index covered more than 2,900 constituents across 11 sectors, across 23 developed and 27 emerging market country indices.

The MSCI ACWI (All Country World Index) Value (Total Return, Net of Tax, USD) is a free float-adjusted market capitalisation weighted index that is designed to represent performance of large- and mid-cap stocks exhibiting overall value style characteristics across 23 developed and 27 emerging markets. The value investment style characteristics for this index are defined using three variables: book value to price, 12-month forward earnings to price and dividend yield. As of January

2021, it covered more than 2,000 constituents across 11 sectors.

Shareholders in a Class which is denominated in a currency other than the Base Currency should note that, where available, it may be more meaningful to compare the performance of such Class against a version of these indices which is denominated in the relevant Class currency.

Base Currency

US Dollars (USD).

**Instruments / Asset
Classes**

The Portfolio will invest primarily in equity securities issued by issuers in any industrial sector globally. The Portfolio can invest in or be exposed to the following types of assets.

Equity and Equity-linked Securities. These securities may include common and preferred stocks, rights and warrants to purchase common stock, depository receipts, and UCITS eligible partnership interests, which are listed or traded on Recognised Markets globally. Partnership interests are effectively equivalent to shares but are issued by an issuer established as a limited partnership instead of as a company.

ETFs. ETFs are investment funds whose shares are bought and sold on a securities exchange. ETFs invest in a portfolio of securities designed to track a particular market segment or index, in this case global markets with a focus on equities. The ETFs will be located in Relevant Jurisdictions and will be authorised under the UCITS Directive or will be non-UCITS which are eligible for investment by the Portfolio in accordance with the requirements of the Central Bank. The ETFs will represent investments that are similar to the Portfolio's other investments. The ETFs will operate on the principle of risk spreading and will not be leveraged.

Equity Real Estate Investment Trusts ("REITs"). REITs are companies or trusts that pool investor money and invest mainly in income producing real estate, although it should be noted that the Portfolio will not acquire any real estate directly. REITs may invest in a diverse range of real estate properties or may specialise in a particular type of property. The REITs which the Portfolio will invest in may be based globally but will give exposure to underlying properties located in Emerging Market Countries. They will invest the majority of their assets directly in real property and derive their income from rents and capital gains from appreciation realised through property sales.

Collective Investment Schemes. The Portfolio may invest in collective investment schemes which are themselves exposed to investments that are similar to the Portfolio's investments in equity securities, as described above, provided that the Portfolio may not invest in other collective investment schemes (including ETFs) which themselves invest more than 10% of its Net Asset Value in other collective investment schemes. Such collective investment schemes may or may not be managed by the Manager and/or the Sub-Investment Managers or their affiliates and will comply with the requirements of the UCITS Regulations in respect of such investments.

The collective investment schemes in which the Portfolio may invest will be eligible collective investment schemes in accordance with the Central Bank's rules, which may be domiciled in Relevant Jurisdictions or the United States of America and will qualify as UCITS or non-UCITS schemes and will be regulated as such by their home state regulator.

Collective investment schemes in which the Portfolio invests may be leveraged but such collective investment schemes will not generally be leveraged: (i) in excess of 100% of their net asset value; or (ii) so that their 1 day absolute VaR exceeds 4.47% of their net asset value over a 250 day horizon with a 99% confidence level; or (iii) so that their 1 month relative VaR exceeds twice the VaR of a comparable benchmark portfolio over a 250 day horizon with a 99% confidence level, depending on how such collective investment schemes measure their global exposure.

Financial Derivative Instruments ("FDIs"). Subject to the conditions and limits imposed by the Central Bank as set out in the Prospectus and in this Supplement, the Portfolio may use FDI for hedging, efficient portfolio management and/or

investment purposes and subject to the conditions and limits imposed by the Central Bank as set out in this Supplement:

- Forward currency contracts may be used to achieve a profit as well as to hedge existing long currency exposures; and
- Warrants (including equity warrants and, rights (including equity rights) may be used for investment and efficient portfolio management purposes, including to hedge or to achieve exposure to a particular security.

As the Portfolio may purchase FDI generally using only a fraction of the assets that would be needed to purchase the relevant securities directly, the remainder of the assets allocated to the Sub-Investment Managers may be invested in the other types of securities listed above. The Sub-Investment Managers may therefore seek to achieve greater returns by taking exposure to the performance of such securities through purchasing FDI which give exposure to them rather than purchasing the securities themselves and investing the remaining assets in other such securities to add excess return.

The Portfolio may be leveraged as a result of its investments in FDI but such leverage will not exceed 100% of the Portfolio's Net Asset Value, as measured using the Commitment Approach, at any time.

Repo Contracts and Securities Lending Agreements. Repo Contracts and Securities Lending Agreements may also be used subject to the conditions and limits set out in the Prospectus.

Investment Restrictions

The Portfolio may expose up to 10% of its Net Asset Value in aggregate to the performance of other collective investment schemes which will comply with both the "*Investment Restrictions*" section of the Prospectus and the UCITS Regulations.

The Portfolio will not utilise total return swaps or margin lending.

Risk

- Investment in the Portfolio carries certain risks which are described in greater detail in the "*Investment Risks*" section of the Prospectus. Investors should read and consider the entire "*Investment Risks*" section of the Prospectus. **These risks are not purported to be exhaustive and potential investors should review this Supplement and the Prospectus in their entirety and consult with their professional advisers, before making an application for Shares.**
- Investors should refer to the Company's risk management policy with respect to the use of FDI contained in the RMP Statement.
- The Portfolio may be leveraged as a result of its investments in FDI but such leverage will not exceed 100% of the Portfolio's Net Asset Value, as measured using the Commitment Approach, at any time.
- The Sub-Investment Managers may use forward currency contracts in order to hedge currency risk.
- The Portfolio may have or may be expected to have medium to high volatility due to its investment policies or portfolio management techniques.
- The Portfolio may be leveraged as a result of its investments in FDI but such leverage will not exceed 100% of the Portfolio's Net Asset Value, as measured using the Commitment Approach, at any time.

Environmental, Social and Governance ("ESG")

The Portfolio has been classified as an Article 9 Portfolio as it has sustainable investment as its objective.

ESG risks and opportunities are considered in the selection of securities to be constituents of the Portfolio. The Manager and the Sub-Investment Manager assess securities in relation to their exposure to and the management of ESG risks. ESG represents governance, (being the way in which the company is run), environmental issues, (such as the impact on natural resources), and social issues (such as human rights).

The Sub-Investment Manager applies the (i) Controversial Weapons Policy, (ii) the Sustainable Exclusion Policy and (iii) the Enhanced Sustainable Exclusion Policy, when determining what investments to make for the Portfolio. Further details on

these screening/exclusion policies are set out in the "*Sustainable Investment Criteria*" section of the Prospectus.

The Sub-Investment Manager:

(i) excludes securities issued by companies that are involved in controversial activities and behaviour and those which rated worst in terms of its ESG assessment from the investment universe, such that at least 20% of the investment universe is excluded on these bases; and

(ii) ensures at least 90% ESG coverage rate of the Net Asset Value of the Portfolio.

Please also refer to Annex VI of the Prospectus which contains additional information on the ESG characteristics that are applicable to this Portfolio.

Typical Investor Profile

The Portfolio may be suitable for an investor seeking long term capital appreciation over a mid-to-long term horizon. The investor should be prepared to accept periods of market volatility and the risks of the stock market in pursuit of long term goals, given the ability of the Portfolio to invest in securities of issued by Emerging Market Countries.
