Investment Objective and Policy

To provide an absolute return of capital growth and income primarily through investment in a portfolio of bonds and other fixed and floating rate securities issued by governments, government agencies, supra-national and corporate issuers in emerging markets.

Risk Considerations

Investments in debt securities are primarily subject to interest rate, credit and default risks and, potentially, to currency exchange rate risk. This fund may use financial derivative instruments as a part of the investment process. This may increase the fund's price volatility by amplifying market events. Investments in emerging markets are subject to market risk and, potentially, liquidity and currency exchange rate risk. Investments in absolute return funds are primarily subject to interest rate, market, liquidity, credit and default risks and, potentially, to currency exchange rate risk.

Fund (bid to bid)	5.1	2.6	6.2
Fund (offer to bid)	3.3	1.6	5.7

Performance over 5 years (%)

Past performance is not a reliable indicator of future results, prices of shares and the income from them may fall as well as rise and investors may not get back the amount originally invested.

All fund performance data are provided on the basis that net income is reinvested. Data are not available for the time periods with no % growth stated. In case a share class is created after the fund's launch date, a simulated past performance is used, based upon the performance of an existing share class within the fund, taking into account the difference in the Total Expense Ratio and including the impact of any performance fees if applicable.
