Market Overview

The MSCI India advanced 1.4%¹ in February, buoyed by the announcement of the FY2011 budget that balanced the government's need for fiscal consolidation and economic growth. It showed the government's determination to unwind the massive accommodative stance as it aims to narrow the deficit. Materials, IT and consumer discretionary outperformed on a relative basis while energy, telecom and utilities underperformed. The MSCI China advanced 2.2%¹ in U.S. dollar terms with healthcare outperforming on a relative basis while the materials sector was the worst performer. The Fund advanced 0.9% (bid-to-bid basis), underperforming its benchmark's advance of 1.9%.

Overweight Focus Media was the leading contributor to performance. Shares moved higher after the company announced that it would initiate a share buyback totalling about US\$200m. Overweight financials also helped performance. Axis Bank moved higher on the back of strong core performance, growth in savings deposits and reasonable valuation. China Pacific Insurance advanced on solid premium growth numbers, representing a solid start to the year which reinforced investor sentiment. It is the third largest insurer in Mainland China and enjoys more attractive valuation than its peers. China Zhongwang was the leading detractor from performance. The company announced the acquisition of Guoxin Aluminium, a state owned carbon alloy producer. We view this as good use of China Zhongwang's cash as the deal will boost the annual capacity by about 20%. Gome Electrical Appliances declined as a result of negative newsflow regarding a subsidiary. However, we remain fundamentally positive on the improvement of operations despite near-term pressure. AAC Acoustic's share price declined due to concerns regarding currency and labour shortage. We initiated a new position in Larsen & Toubro and expect the company to benefit from an increase in spending on infrastructure given its extensive experience in building power plants and manufacturing related equipment.
