Liquidity	5.2	Liquidity	5.2		

Manager's comment

- Asian stock markets rose in April despite concerns about the crisis in Greece and interest rate rises in several countries.
- Inflation in India reached 9.9% in March and interest rates were raised by a further 25 basis points, although this was less than expected and the stock market rallied.
- The Hong Kong market fell over the month and China suffered as a result of government measures to curb property speculation, while Singapore performed well.
- Economic data continued to improve across the Asian region, with better than expected growth and increasing inflationary pressures remaining a common theme.
- The economic recovery continues in the US but flight to quality on sovereign risk concerns resulted in falling yields.
- Asian dollar bonds posted a positive performance and credit spreads tightened across most major markets and quality segments in the region.
- Credit remains attractive from a risk return perspective and we continue to see opportunities to add securities to the portfolio.
- We believe that the recent stock market correction is a positive development as investors take a more realistic view of risk.
- We intend to selectively add to companies with solid fundamental businesses on further weakness.

DISCLAIMER

Except for the benchmark index, performance stated for relevant indices are quoted in the respective local currency unless otherwise specified.

Note: The above asset allocation pertains to the underlying fund. This report is prepared by First State Investments (Singapore) and is provided for information purposes only. Investors should read the Prospectus before deciding whether to subscribe for or purchase units in the Fund. The prospectus is available and copies may be obtained from the Manager and Distributors. The value of the units in the Fund and the income from them may rise as well as fall. Past performance figures are not necessarily a guide to future performance. Neither is any forecast made necessarily indicative of the future or likely performance of the Fund. Where information is provided on top holdings, such information does not constitute a recommendation to buy these securities. Units are not available to U.S. persons.

The CPF interest rate for the Ordinary Account (OA) is based on the 12-month fixed deposit and month-end savings rates of the major local banks. Under the CPF Act, the Board pays a minimum interest of 2.5% per annum when this interest formula yields a lower rate. From 1 January 2008, the new interest rate for the Special, Medisave and Retirement Accounts (SMRA) will be pegged to the yield of 10-year Singapore government bond plus 1%. For 2008 to 2010, the minimum interest rate for the SMRA will be 4.0% per annum. After 2010, the 2.5% per annum minimum interest rate, as prescribed by the CPF Act, will apply to the SMRA. In addition, from 1 January 2008, the CPF Board will pay an extra interest rate of 1% per annum on the first \$60,000 of a CPF member's combined balances, including up to \$20,000 in the OA. From 1 April 2008, the first \$20,000 in the Ordinary Account will not be allowed to be invested under the CPF Investment Scheme; and from 1 May 2009, the first \$30,000 in the Special Account will not be allowed for investments.
