## Aberdeen Global Opportunities Fund

### Fund manager's report

- Global equities fell in August owing to worldwide growth concerns, the worsening debt crises in Europe and the US, and the US credit rating downgrade. The Federal Reserve's pledge to keep interest rates near zero until mid-2013 failed to restore confidence.
- Signs of global weakness remained: the US revised down its second-quarter GDP growth to an annualized rate of 1.0% from 1.3%. The Eurozone economy grew by 0.2% in the same period, its weakest pace of growth since 2009. Japan's economy contracted owing to lower export growth.
- Inflation worsened in the UK and China but eased in India and Japan. The European Central Bank (ECB) and the Bank of England left interest rates unchanged. The ECB also reopened its programme of government bond buying for the first time in five months. Japan intervened in its currency market to temper gains in the yen.
- In August, we divested Adidas and Philips Electronics because of better opportunities elsewhere. Against this, we added to HSBC, Oracle, PepsiCo and Petrobras at attractive valuations.

### Important information

The CPF interest rate for the Ordinary Account ("OA") is based on the 12-month fixed deposit and month-end savings rates of the major local banks. Under the CPF Act, the Board pays a minimum interest of 2.5% per annum when this interest formula yields a lower rate. In addition, from 1 January 2008, the CPF Board will pay an extra interest rate of 1% per annum on the first \$60,000 of a CPF member's combined balances, including up to \$20,000 in the OA. From 1 April 2008, the first \$20,000 in the OA will not be allowed to be invested under the CPF Investment Scheme.
