Manager's comment

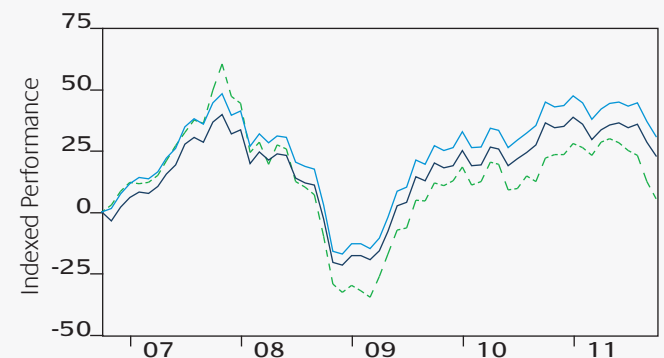

- Asia Pacific ex-Japan markets fell sharply over the month as global risk appetite receded significantly.
- Investors were concerned about the US economic recovery, the sovereign debt crisis in the eurozone and that some European banks were having liquidity problems.
- Asian currencies corrected substantially against the US dollar, especially the Indian rupee and South Korean won.
- The Chinese economy continued to show signs of a slowdown.
- We are particularly attracted by quality cyclical names which are trading at low valuations as well as companies which generate strong cash flow.
- We maintain our preference for stocks exposed to domestic demand.

The CPF interest rate for the Ordinary Account (OA) is based on the 12-month fixed deposit and month-end savings rates of the major local banks. Under the CPF Act, the CPF Board pays a minimum interest of 2.5% per annum when this interest formula yields a lower rate. The interest rate for the Special and Medisave Accounts (SMA) is pegged to the 12-month average yield of 10-year Singapore Government Securities (10YSGS) plus 1%. The interest rate to be credited to the Retirement Account (RA) will be the weighted average interest of the entire portfolio of Special Government Securities (SSGS) which the RA savings are invested in, which earn a fixed coupon equal to the 12-month average yield of the 10YSGS plus 1% at the point of issuance. For 2011, the minimum interest rate for the SMA and RA is 4% per annum. After 31 December 2011, the minimum interest rate of 2.5% per annum, as prescribed by the CPF Act, will apply to the SMA and RA. In addition, the CPF Board will pay an extra interest rate of 1% per annum on the first S\$60,000 of a CPF member's combined balances, including up to S\$20,000 in the OA. The first S\$20,000 in the OA and the first S\$40,000 in the Special Account will not be allowed to be invested under the CPFIS.
