A: distributing share class. Distribution amount not guaranteed.

The CPF interest rate for the Ordinary Account (OA) is based on the 12-month fixed deposit and month-end savings rates of the major local banks. Under the CPF Act, the Board pays a minimum interest of 2.5% per annum when this interest formula yields a lower rate. The CPF Board pays an extra interest rate of 1% per annum on the first \$60,000 of a CPF member's combined balances, including up to \$20,000 in the OA. The first \$20,000 in the Ordinary Account and the first \$40,000 in the Special Account will not be allowed to be invested under the CPF Investment Scheme.

Source: Fidelity, NAV-NAV basis, in the respective currencies, with dividends re-invested. Average annual compounded return for periods greater than 1 year. Since Inception performance is calculated from 01.10.90 and 15.05.06 for the A-USD and A-SGD share classes respectively. Benchmark changed from Standard & Poor's 500 Total Return (S&P 500) Gross Index to S&P 500 Net Index with effect from 1.3.11 and performance shown above was adjusted using the S&P 500 Net Index from 31.12.98, the date when such index was first introduced. The reason for the change is that the S&P 500 Net Index calculates performance net of withholding tax, which is more comparable with the calculation of the performance of the fund (also net of withholding tax).
