## Emerging Markets Debt Absolute Return

### A Distribution SGD Hedged Share Class

#### Investment Objective, Policy and Risk

To provide an absolute return of capital growth and income primarily through investment in a portfolio of bonds and other fixed and floating rate securities issued by governments, government agencies, supra-national and corporate issuers in emerging markets.

The value of investments and the income from them may go down as well as up and investors may not get back the amounts originally invested. Investments in debt securities are primarily subject to interest rate, credit and default risks and, potentially, to currency exchange rate risk. This fund may use financial derivative instruments as a part of the investment process. This may increase the fund's price volatility by amplifying market events. Investments in emerging markets are subject to market risk and, potentially, liquidity and currency exchange rate risk. Investments in absolute return funds are primarily subject to interest rate, market, liquidity, credit and default risks and, potentially, to currency exchange rate risk.
