<b>KEY RISKS</b>

These risk factors may cause you to lose some or all of your investment:</b></p>	<p>Refer to <a href="#">paragraph 8</a> of the Prospectus for further information on risks of the product.</p>
<b>Market and Credit Risks</b>	
<ul style="list-style-type: none"> <li>• <b>You are exposed to market risks in the Japan market.</b> <ul style="list-style-type: none"> <li>◦ Prices of the securities that the Fund invests in may be affected by changes in economic conditions, interest rates and the market’s perception of the securities, which in turn may affect the value of your investment.</li> </ul> </li> <li>• <b>You have greater exposure to market risk as this is an equity fund.</b> <ul style="list-style-type: none"> <li>◦ Investments in stocks and other equity securities are subject to market risks that historically have resulted in greater volatility than that experienced by fixed income securities. This in turn may affect the value or volatility of the Fund.</li> </ul> </li> </ul>	
<b>Liquidity Risks</b>	
<ul style="list-style-type: none"> <li>• <b>The Fund is not listed and you can redeem only on Dealing Days.</b> <ul style="list-style-type: none"> <li>◦ There is no secondary market for the Fund. All realisation forms should be submitted to the Managers’ authorised agents or distributors.</li> </ul> </li> <li>• <b>You are exposed to liquidity risk in the Fund’s investments.</b> <ul style="list-style-type: none"> <li>◦ Investments by the Fund in some Asian and/or emerging markets often involve a greater degree of risk due to the nature of such markets which do not have fully developed services such as custodian and settlement services. There may be a greater degree of volatility in such markets because of the speculative element, significant retail participation and lack of liquidity.</li> </ul> </li> </ul>	
<b>Product-Specific Risks</b>	
<ul style="list-style-type: none"> <li>• <b>You are exposed to the risk of investing in a single country fund.</b> <ul style="list-style-type: none"> <li>◦ The Fund’s investments will be focused mainly in Japan. While such concentrated exposure may present greater opportunities and potential for capital appreciation, the Fund may be subject to higher risks as there may be less diversification than a regional or global portfolio.</li> </ul> </li> <li>• <b>You are exposed to small and medium capitalisation companies risk.</b> <ul style="list-style-type: none"> <li>◦ Investments in small and medium capitalisation companies generally carry greater risk than larger capitalisation companies (e.g. less public information, more limited financial resources and products, greater volatility, higher risk of failure and less liquidity). This may result in greater volatility in the share prices of such companies.</li> </ul> </li> </ul>	

- **You are exposed to political, regulatory and legal risk.**
    - The Fund's investments may be adversely affected by international political developments, exchange controls, taxation, monetary and fiscal policies, foreign investment policies, government policies, restrictions on repatriation of investments and other changes in the laws and regulations in the relevant countries.
  - **You are exposed to foreign exchange / currency risk.**
    - Where investments are denominated in a currency that is different from the currency of denomination of the Fund or the relevant Class, fluctuations of the exchange rates of such currencies against the currency of the Fund or Class may affect the value of Units. The Managers may hedge the foreign currency exposure of the Fund or Class and may adopt an active or passive currency management approach. Foreign currency exposure may not be fully hedged depending on circumstances of each case, including the outlook, hedging costs and market liquidity of the relevant currency.
    - Where a Class is not denominated in SGD, changes in the exchange rate between SGD and the Class currency may adversely affect the value of the Units of such Class, as expressed in the Class currency.
- Hedged Classes*
- Hedging may protect investors in a Hedged Class against a decrease in the value of the currency being hedged but may also preclude investors from benefiting from an increase in the value of such currency. Investors will still be exposed to the market risks that relate to the underlying investments in the Fund and any exchange rate risks of the Fund that are not fully hedged. There is no guarantee that the hedging strategy will entirely eliminate the adverse effects of changes in exchange rates between the Portfolio Currency and the Hedged Currency.
- **You are exposed to derivatives risks.**
    - An investment in a FDI (including foreign exchange forward contracts and equity index future contracts) may require the deposit of an initial margin and additional deposit of margin on short notice if the market moves against the investment position. If the required margin is not provided in time, the investment may be liquidated at a loss. Therefore, it is essential that such investments in FDIs are monitored closely. The Managers have controls for investments in FDIs and have in place systems to monitor the FDI positions of the Fund.
  - **Other risks to your investment include counterparty risk, exceptional market conditions risk, actions of institutional investors, broker risk, investment management risk and risk of using rating agencies and other third parties.**

  - If you submit the realisation form after 3 p.m. Singapore time on a Dealing Day or on a day not being a Dealing Day, you will be paid a price based on the NAV of the relevant Class of the Fund as at the Valuation Point of the next Dealing Day.
- The net realisation proceeds that you will receive will be the realisation price of the relevant Class of the Fund multiplied by the number of Units realised, less any charges. An example is as follows:

1,000.00 Units	X	S\$0.900	=	S\$900.00
Your realisation request		Notional realisation price per Unit		Gross realisation proceeds
