\* Eligible for CPFIS-OA investments

\*\* Eligible for both CPFIS-OA and SA investments

The CPF interest rate for the Ordinary Account (OA) is based on the 12-month fixed deposit and month-end savings rates of the major local banks. Under the CPF Act, the CPF Board pays a minimum interest of 2.5% per annum when this interest formula yields a lower rate. The interest rate for the Special and Medisave Accounts (SMA) is pegged to the 12-month average yield of 10-year Singapore Government Securities (10YSGS) plus 1%. The interest rate to be credited to the Retirement Account (RA) will be the weighted average interest of the entire portfolio of Special Government Securities (SSGS) which the RA savings are invested in, which earn a fixed coupon equal to the 12-month average yield of the 10YSGS plus 1% at the point of issuance. The minimum interest rate for the SMA and RA is 4% per annum from 1 January to 31 March 2014 and 1 January to 31 December 2014 respectively, subject to updates from CPF board. In addition, the CPF Board will pay an extra interest rate of 1% per annum on the first \$\$60,000 of a CPF member's combined balances, including up to \$\$20,000 in the OA. The first \$\$20,000 in the OA and the first \$\$40,000 in the Special Account will not be allowed to be invested under the CPFIS.

# MANAGER'S REPORT for the period from 1 January to 31 December 2013

#### Historical performance\*

in Singapore dollars

|  | Fund<br>% | Benchmark<br>% |
|--|-----------|----------------|
| 3-mth                                      | 3.4       | 4.1            |
| 6-mth                                      | 8.3       | 9.0            |
| 1-year                                     | 7.3       | 6.8            |
| 3-year                                     | 4.1       | 1.2            |
| 5-year                                     | 15.7      | 13.8           |
| 10-year                                    | 6.3       | 3.1            |
| Since Inception – 26 November 1999         | -1.0      | -2.1           |
| (Calculated since date of first valuation) |           |                |

Note: The Fund invests all or substantially all of its asset in the First State Asia Innovation Fund (a Dublin-domiciled fund) with effect from 18 October 2002.

The performance prior to 18 October 2002 is in relation to the Fund before its conversion to a feeder fund. Performance for 1 year and above has been annualised.

The benchmark of the Fund is MSCI AC Asia ex Japan Index. It was changed from MSCI AC Asia Information Technology Index from 1 December 2008. The new benchmark is intended to be more consistent with the new investment scope of the Underlying Fund which took effect on 1 December 2008.

Accordingly, the benchmark performance set out above uses the performance of the following:

- Inception to 30 November 2008: MSCI AC Asia Information Technology Index
- From 1 December 2008: MSCI AC Asia ex Japan Index
- \* Source: Lipper, First State Investments. No initial charges with income reinvested in Singapore dollars.

Asian markets ended 2013 slightly higher, with the MSCI Asia ex-Japan Index up 3.3% in US dollar terms, underperforming the MSCI World Index which rose by 27.4%. Concerns over the reduction or 'tapering' of quantitative easing tempered risk appetite.

New Zealand and Hong Kong were the best performing markets over the year, while Thailand and Indonesia underperformed. At a sector level, Information Technology and Consumer Discretionary outperformed, while Materials and Energy lagged.

# Performance

Our performance was positively impacted by **QBE Insurance**, which rose on improving confidence in its new management team. **Hutchison Whampoa** was strong on optimism about the impact of divestments, while **Samsung Fire & Marine** rose as it reported better-than-expected results.

On the negative side, **Newcrest Mining** performed poorly as gold miners were out of favour as policy makers indicated that money printing could start to be reduced. **Cochlear** due to a product recall and rising number of competitors, and **Marico** was weak as it was affected by fears over the Indian economy.

### Transactions

Over the year major purchases included **Sembcorp Industries** which reached a reasonable valuation, and **Tata Global Beverages** where we expect a new CEO to revitalise the company and a joint-venture with Starbucks to underpin profits growth over the next few years. We purchased **Tata Consultancy**, an innovative Indian IT services company with a strong execution track record.

We sold property companies Link REIT and CapitaCommercial Trust due to the reversal in yields and rising interest rates. **QBE Insurance** was sold as the Chief Financial Officer's named successor retired.

### Outlook

China is entering a period of structural reform in an effort to rebalance its economic model. The consequences of this adjustment will be felt across the world, but in particular across the Asia-Pacific region. The impact of tighter liquidity is already clear in stock prices, but the second-order effect of slower growth and more expensive funding costs have yet to be experienced.

# DISTRIBUTION OF INVESTMENTS As at 31 December 2013

|  | Holdings | Market Value<br>S\$   | % of NAV    |

#### Others

As at 31 December 2013, the Fund did not hold any bonds, derivatives or other unit trusts, other than the First State Asia Innovation Fund Class I shares, constituting 99.3% of the Fund's Net Asset Value and at a market value of \$\$33,272,638. In addition, the Fund did not hold any investment constituting more than 5% of a company's outstanding share capital and/ or debt issue. There were also no borrowings, outstanding currency forward contracts or material information that would adversely impact the valuation of the Fund.

### Soft dollar commissions

In order to align with the policy of First State Investments internationally, the Investment Manager has ceased all of its soft dollar arrangements previously made with brokers with effect from 13 June 2005.

# MANAGER'S REPORT for the period from 1 January to 31 December 2013

#### Historical performance\*

in Singapore dollars

|  | Fund<br>% | Benchmark<br>% |
|--|-----------|----------------|
| 3-mth                                      | 0.3       | 4.1            |
| 6-mth                                      | 2.4       | 9.0            |
| 1-year                                     | -0.3      | 6.8            |
| 3-year                                     | 2.0       | 1.2            |
| 5-year                                     | 12.5      | 13.8           |
| 10-year                                    | 8.7       | 7.4            |
| Since Inception – 10 October 1984          | 7.3       | n.a.           |
| (Calculated since date of first valuation) |           |                |

Note: The Fund invests all or substantially all of its asset in the First State Asian Growth Fund (a Dublin-domiciled fund) with effect from 18 October 2002.

The performance prior to 18 October 2002 is in relation to the Fund before its conversion to a feeder fund. Performance for 1 year and above has been annualised.

The benchmark of the Fund is the MSCI AC Asia ex Japan Index. It was changed from MSCI All Country Far East ex Japan Index from 2 November 2005 in order to include India in the benchmark to be more consistent with the Fund's investment scope.

Accordingly, the benchmark performance set out above uses the performance of the following:

- Inception to 1 November 2005: MSCI All Country Far East ex Japan Index
- From 2 November 2005: MSCI AC Asia ex Japan Index
- \* Source: Lipper, First State Investments. No initial charges with income reinvested in Singapore dollars.

Asia ex-Japan markets rose moderately in 2013, underperforming global markets. The MSCI Asia ex-Japan Index was up by 3.3% in US dollar terms over the period, while the MSCI World Index rose by 27.4%. Worries about the withdrawal of quantitative easing and concerns about the outlook for the Chinese economy negatively impacted Asia Pacific markets.

Hong Kong and Taiwan were the best performing markets over the year, while Thailand and Indonesia were the weakest. At a sector level, Consumer Discretionary and Information Technology rose the most, while Energy and Materials were the weakest.

# Performance

Positive contributors to performance included **Hutchison Whampoa** which rose on optimism about the impact of divestments and **President Chain Store** which gained on strong operating performance, particularly in the Taiwan CVS (convenience value stores) business and in the Philippines. **DBS Group** outperformed after it abandoned plans to buy Bank Danamon in Indonesia and also benefited from rising interest rates.

On the negative side, **Newcrest Mining** performed poorly as the gold price fell during the year and **Amorepacific Corp** was weak on concerns about slowing growth and margin pressure. Li & Fung fell on concerns over its business model.

# Transactions

Significant new positions over the period included **Want Want**, a well-run Chinese food and beverage company, and **Infrastructure Development Finance** as the company has a well-regarded management team which should be able to build a very valuable banking franchise over the long-term. We also bought **Asustek Computer**, a quality franchise which had fallen out of favour for cyclical reasons.

We sold **E-Mart** on worries about government interference in the sector and **Hindustan Unilever** on valuation concerns. We also sold **Hopewell Holdings** as the company is facing increased competition in toll roads in China, which accounts for around half of its profits and asset value.

### Outlook

China is entering a period of structural reform in an effort to rebalance its economic model. The consequences of this adjustment will be felt globally, but in particular across the Asia-Pacific region. The impact of tighter liquidity is already clear in stock prices, but the effect of slower growth and more expensive funding costs have yet to be experienced.

#### Others

As at 31 December 2013, the Fund did not hold any bonds, derivatives or other unit trusts, other than the First State Asian Growth Fund Class I shares, constituting 99.3% of the Fund's Net Asset Value and at a market value of \$\$61,427,030. In addition, the Fund did not hold any investment constituting more than 5% of a company's outstanding share capital and/ or debt issue. There were also no borrowings, outstanding currency forward contracts or material information that would adversely impact the valuation of the Fund.

#### Soft dollar commissions

In order to align with the policy of First State Investments internationally, the Investment Manager has ceased all of its soft dollar arrangements previously made with brokers with effect from 13 June 2005.

Note: The Fund invests all or substantially all of its assets in the First State Asian Equity Plus Fund, a Dublin-domiciled fund (in relation to the equity portion) and the First State Asian Quality Bond Fund, a Dublin-domiciled fund (in relation to the fixed income portion).

Performance for 1 year and above has been annualised.

The benchmark is calculated by First State Investments comprising 50% MSCI AC Asia Pacific ex Japan Index (Unhedged) and 50% JP Morgan Asia Credit Investment Grade Index (Hedged to SGD). There has been a change in the data source for the JP Morgan Asia Credit Investment Grade Index which was computed internally by the Manager based on the index in USD as the SGD hedged version of the index was not available when the Sub-Fund was launched. With effect from 1 November 2012, the benchmark data for the JP Morgan Asia Credit Investment Grade Index (Hedged to SGD) will be sourced directly from the index compiler JP Morgan.

\* Source: Lipper, First State Investments. No initial charges with income reinvested in Singapore dollars.

Asia Pacific ex-Japan markets increased in 2013. The MSCI Asia Pacific ex-Japan Index rose by 3.6% in US dollar terms over the period, outperforming the MSCI Emerging Markets Index which fell by 2.3%, but underperforming the MSCI World Index which rose by 27.4%. The region was impacted by concerns over the impact of the withdrawal of highly accommodative monetary policy in the US and slower growth in China.

Hong Kong and Taiwan were Asia's best performing markets over the year; the former principally due to buoyant Macau gaming stocks, while the latter was helped by gains in the IT sector. The main laggards were Indonesia, which was hit by heavy capital outflows, and Thailand, as a result of political unrest.

Asian credit markets posted negative returns overall in 2013. The JP Morgan Asia Credit Investment Grade Index (JACI IG) returned -2.56%. A significant increase in longer-dated US Treasury yields over the 12-month period (10-year US Treasury yield +127 bps to 3.03%) more than offset a modest tightening in spreads.

Asian credit markets performed particularly poorly in the first half of the year. This was largely driven by spread widening on the back following the US Federal Reserve's (Fed) indication in May that it could commence tapering of asset purchases later in 2013. Performance turned positive in the third quarter despite some pressure from volatile Indian and Indonesian currency markets. The Fed's September decision to maintain quantitative easing stimulus caused a rally in Asian credit markets that saw spreads tighten strongly.

Asian credits continued to perform well in the fourth quarter despite the uncertainty associated with the US government shutdown, boosted by strong primary issuance and positive economic data. Sentiment shifted in early November as rising global bond yields led to some spread widening, while weak macro data out of Indonesia and India also impacted on the sector. In December, spread tightening was largely offset by the impact of rising US Treasury yields following confirmation that the Fed will commence tapering its asset purchases in January 2014.

### Outlook

China is entering a period of structural reform in an effort to rebalance its economic model. The consequences of this adjustment will be felt across the world, but in particular across the Asia-Pacific region. The impact of tighter liquidity is already clear in stock prices, but the second-order effect of slower growth and more expensive funding costs have yet to be experienced.

#### Others

As at 31 December 2013, the Fund did not hold any bonds or other unit trusts, other than the First State Asian Quality Bond Fund Class I shares (constituting 50.9% of the Fund's Net Asset Value and at a market value of \$\$595,405,647) and First State Asian Equity Plus Fund Class I (Dist) shares (constituting 49.3% of the Fund's Net Asset Value and at a market value of \$\$576,474,110). The Fund holds forward currency contracts and the net change in fair value is (\$\$6,356,150) or (0.54%) of NAV. The total amount of realised gain on forward currency contracts is \$\$13,109,652.70 for the year. In addition, the Fund did not hold any investment constituting more than 5% of a company'S outstanding share capital and/or debt issue. There were also no borrowings or material information that would adversely impact the valuation of the Fund.

# **Financial Derivative Instruments**

a. Global Exposure

The global exposure relating to derivative instruments is calculated using the commitment approach which is calculated as the sum of:

- i) the absolute value of the exposure of each individual financial derivative not involved in netting or hedging arrangements;
- ii) the absolute value of the net exposure of each individual financial derivative after netting or hedging arrangements; and
- iii) the sum of the values of cash collateral received pursuant to:
  - (a) the reduction of exposure to counterparties of OTC financial derivatives; and
  - (b) EPM techniques relating to securities lending and repurchase transactions, and that are reinvested.

The global exposure of each Sub-Fund to financial derivatives or embedded financial derivatives will not exceed 100% of that Sub-Fund's net asset value at any time.

b. Collateral

Nil for the year ended 31 December 2013.

c. Securities Lending or Repurchase Transactions

Nil for the year ended 31 December 2013.

### Soft dollar commissions

In order to align with the policy of First State Investments internationally, the Investment Manager has ceased all of its soft dollar arrangements previously made with brokers with effect from 13 June 2005.

| (Calculated since date of first valuation) |           |                |

Note: The Fund invests all or substantially all of its assets in the First State Asian Equity Plus Fund, a Dublin-domiciled fund.

Performance for 1 year and above has been annualised.

The benchmark of the Fund is the MSCI AC Asia Pacific ex Japan Index.

\* Source: Lipper, First State Investments. No initial charges with income reinvested in Singapore dollars.

Asia Pacific ex-Japan markets increased in 2013. The MSCI Asia Pacific ex-Japan Index rose by 3.6% in US dollar terms over the period, outperforming the MSCI Emerging Markets Index which fell by 2.3%, but underperforming the MSCI World Index which rose by 27.4%. The region was impacted by concerns over the impact of the withdrawal of highly accommodative monetary policy in the US and slower growth in China.

Hong Kong and Taiwan were Asia's best performing markets over the year; the former principally due to buoyant Macau gaming stocks, while the latter was helped by gains in the IT sector. The main laggards were Indonesia, which was hit by heavy capital outflows, and Thailand, as a result of political unrest.

# Performance

Positives included strong performance from **Delta Electronics**, as the company continues to transition to new growth areas and **ENN Energy**, which climbed on the back of a positive outlook for clean energy in China and steady growth. **Samsung Fire & Marine**, an insurance company, performed well on positive results.

On the negative side, **Newcrest Mining** was sold down due to the declining gold price and asset write downs. **Manila Water Company** underperformed due to concerns over regulation in its domestic market, and **Li & Fung** fell on worries about its business model.

# Transactions

Significant purchases over the period included **Dr Reddy's Laboratories**, a well-managed Indian generic drugs company with a growing international business, and **Pigeon Corp**, a baby care products company, owing to its strong record of expanding outside its domestic market, especially in China. We also bought **China Resources Gas**, which should be a beneficiary of rising penetration of gas usage in China.

Sales included **Cochlear** on concerns about its product recall considering the valuation premium the stock carried due to product quality. We also sold **E-Mart** on worries about government interference in the sector, and **Wistron Corp**, which is structurally challenged and seeing a rapid decline in its PC business.

# Outlook

China is entering a period of structural reform in an effort to rebalance its economic model. The consequences of this adjustment will be felt across the world, but in particular across the Asia-Pacific region. The impact of tighter liquidity is already clear in stock prices, but the second-order effect of slower growth and more expensive funding costs have yet to be experienced.

| 5-year                                     | 15.9      | 12.1           |
| Since Inception – 5 July 2004              | 10.7      | 8.8            |
| (Calculated since date of first valuation) |           |                |

Note: The Fund invests all or substantially all of its assets in the First State Global Emerging Markets Leaders Fund (a subfund of the England and Wales domiciled umbrella fund known as First State Investments ICVC).

Performance for 1 year and above has been annualised.

The benchmark of the Fund is the MSCI Emerging Markets Index.

\* Source: Lipper, First State Investments. No initial charges with income reinvested in Singapore dollars.

Over the twelve months to 31 December, Emerging Markets fell. The US Federal Reserve, signalling the gradual tapering of the 'free money' of quantitative easing, unnerved markets. This had a negative effect on GEM currencies and market performance. The MSCI Emerging Markets Index declined by 2.3% in US dollar terms over the period, underperforming the MSCI World Index which gained 27.4% and the MSCI Asia Pacific ex-Japan Index which was up by 3.6%.

Within emerging markets, Emerging Asia outperformed, while EMEA and Latin America lagged. Emerging Asia was driven by positive performance in Malaysia and Taiwan. EMEA suffered from particular weakness in Turkey, while Latin America was held back by poor performance by Brazil and Chile. Much of the weakness across GEM was currency led. At a sector level, Health Care and Information Technology outperformed, while Energy and Materials lagged.

# Performance

Performance was positively impacted by **China Mengniu Dairy** which gained as a result of the government taking more steps to improve quality standards in the dairy industry. **Delta Electronics** rose as the chairman provided an optimistic outlook statement, reflecting good cost control and an improving product mix, and **Bank Pekao** was strong as competitive pressures alleviated and asset quality remained solid.

On the negative side, **Tiger Brands** suffered from a weak consumption environment in South Africa, their major market. The company made an acquisition which has been more difficult to integrate than anticipated. **Cencosud** declined on poor operational results which were exacerbated by currency weakness. **Tata Power Company** fell due to a depreciating rupee, which raises the price of imported coal at the company's power plants.

# Transactions

Over the year significant purchases included **HDFC Ltd**, a high quality financial services company trading on reasonable valuations, and **China Resources Enterprise**, the largest brewing and supermarket operator in China. We also purchased **Tullow Oil** which we believe is the best-in-class operator in an out of favour sector.

We sold and E-Mart on waning conviction about the quality of the franchise and continuing regulatory interference.

# Outlook

During the last five years we have found many good quality companies listed in the developed world which have significant and growing exposure to developing economies. We believe that the distinction between what is and what is not an emerging market company, based on place of listing, is becoming increasingly less meaningful from an investment viewpoint.

#### Others

As at 31 December 2013, the Fund did not hold any bonds, derivatives or other unit trusts, other than the First State Global Emerging Markets Leaders Fund Class A shares, constituting 99.5% of the Fund's Net Asset Value and at a market value of \$\$33,842,265. In addition, the Fund did not hold any investment constituting more than 5% of a company's outstanding share capital and/or debt issue. There were also no borrowings, outstanding currency forward contracts or material information that would adversely impact the valuation of the Fund.

#### Soft dollar commissions

In order to align with the policy of First State Investments internationally, the Investment Manager has ceased all of its soft dollar arrangements previously made with brokers with effect from 13 June 2005.

# MANAGER'S REPORT for the period from 1 January to 31 December 2013

# Historical performance\*

in Singapore dollars

|  | Fund<br>% | Benchmark<br>% |
|--|-----------|----------------|
| 3-mth                                      | 4.8       | 6.9            |
| 6-mth                                      | 6.5       | 8.7            |
| 1-year                                     | 9.1       | 13.6           |
| Since Inception – 3 May 2011               | 0.8       | 3.5            |
| (Calculated since date of first valuation) |           |                |

Note: The Fund invests all or substantially all of its assets in the First State Global Agribusiness Fund, a Dublin-domiciled fund.

Performance for 1 year and above has been annualised.

The benchmark of the Fund is the 75% DAXglobal Agribusiness Index and 25% S&P Global Timber and Forestry Index.

\* Source: Lipper, First State Investments. No initial charges with income reinvested in Singapore dollars.

Favourable weather conditions in major growing regions including the United States, the Ukraine and Brazil translated to strong wheat, corn, soy and sugar cane output putting downward pressure on prices. Fallout from the breakup of the Uralkali/Belaruskali marketing arrangement that had been pivotal to the potash industry showed few signs of ending.

# Performance

In relative terms, the portfolio underperformed its benchmark due to its underweight positions in paper and junior fertiliser companies. The portfolio's structural underweighting in the paper sector hurt as paper stocks rallied on signs of economic recovery.

The unravelling of the potash industry's structure also weighed on performance: our investment in IC Potash was a victim of this. IC Potash was impacted by the decline in potash prices and difficulties in obtaining project finance.

# Transactions

We initiated positions in a number of small-to mid-caps stocks with direct exposure to food production and consumption growth in emerging markets. Notable purchases included Indian generic crop protection manufacturer **UPL Ltd**, New Zealand-based dairy processor **Synlait Ltd** and Brazilian grain storage manufacturer **Kepler Webber**. The Fund also invested in select packaging companies benefiting from improving economic conditions and operational initiatives including Dublin-listed Smurfit **Kappa** and South Africa/Europe focused **Mondi**.

Exposures to **Ingredion** and **Nutreco** were cut. **Ingredion**, which makes sweeteners, starches and other ingredients, faces challenges in Argentina where political and economic conditions have increased its costs but limited its ability to raise prices. Dutch fish nutrition company **Nutreco** is also facing difficulties, particularly in Norway where it faces tough competition.

### Outlook

The coming year promises to be another strong one for crop production and the portfolio remains overweight to seed and crop protection companies, food processing and supply chain companies. Stock selection remains paramount and thus the focus is on companies with compelling valuations and sustainable earnings in these segments.

We also foresee an upbeat outlook for the forestry sector on the back of attractive valuations in concert with strong Chinese demand for logs and an improving US housing market. On the other hand, we remain underweight the nutrients sector but we will continue to monitor to see whether lower prices will encourage demand growth.

| Since Inception – 4 January 1999           | 1.6       | 3.4            |
| (Calculated since date of first valuation) |           |                |

Note: The Fund invests all or substantially all of its assets in the First State Global Opportunities Fund, a Dublin-domiciled fund (in relation to the equity portion) and the First State Global Bond Fund, a Dublin-domiciled fund (in relation to the fixed income portion) with effect from 18 October 2002.

The performance prior to 18 October 2002 is in relation to the Fund before its conversion to a feeder fund. Performance for 1 year and above has been annualised.

The benchmark of the Fund is a composite comprising 60% MSCI World Index and 40% Citigroup World Government Bond Index (Unhedged). It was changed from a composite comprising 50% MSCI World Index and 50% Citigroup World Government Bond Index (Unhedged) with effect from 1 January 2002 to reflect a change in the Fund's allocation policy.

The First State Global Balanced Fund was previously known as the "Fortune Fund" with original inception date of 13 March 1995. With the liberalisation of the CPF investment guidelines in 1998, and our communication to all unitholders, the "Fortune Fund" changed its investment objective and strategy from an Asia-focused strategy to a global balanced strategy with effect from 4 January 1999.

Accordingly, the benchmark performance set out above uses the performance of the following:

- Inception to 31 December 2001: 50% MSCI World Index and 50% Citigroup World Government Bond Index (Unhedged)
- From 1 January 2002: Composite comprising 60% MSCI World Index and 40% Citigroup World Government Bond Index (Unhedged)
- \* Source: Lipper, First State Investments. No initial charges with income reinvested in Singapore dollars.

Global markets rose strongly in 2013, with the MSCI World Index gaining 27.4% in US dollar terms, supported by a combination of highly accommodative monetary policy and steadily improving economic data. European markets performed particularly well reflecting much improved financial and economic conditions in the region. At a sector level, Consumer Discretionary and Health Care performed strongly, while Materials lagged considerably, and Utilities also underperformed.

Longer-dated sovereign bond yields in the US, Germany and the UK commenced 2013 at low levels, with the US Federal Reserve's (Fed) ongoing quantitative easing and fiscal cliff concerns contributing to a 'risk-off' environment. Improving US economic data over the first half of the year prompted the Fed to indicate its intention to commence tapering its asset purchases later in 2013. This triggered a sharp global bond sell-off. Global bond yields resumed an uptrend in the final quarter of 2013 as the US economy continued to improve, and the Fed's decision in December to commence tapering in early 2014 pushed yields higher with the 10-year US Treasury yield finishing the year 127 bps higher at 3.03%.

# Outlook

Positive fundamentals remain in place: overall equity valuations still appear favourable compared to most asset classes, inflation risk is minimal, US dataflow is encouraging and the Eurozone appears stable. Also, monetary policy will remain supportive in the developed world for some time with the US and UK central banks having committed to keeping interest rates low and Japan implementing a huge monetary stimulus programme. However, the need for difficult structural reforms in a number of emerging markets has been underlined by the recent turbulence.

#### Others

As at 31 December 2013, the Fund did not hold any bonds, derivatives or other unit trusts, other than the First State Global Bond Fund Class I shares (constituting 38.5% of the Fund's Net Asset Value and at a market value of \$\$7,235,766) and First State Global Opportunities Fund Class I shares (constituting 61.0% of the Fund's Net Asset Value and at a market value of \$\$11,454,248). In addition, the Fund did not hold any investment constituting more than 5% of a company's outstanding share capital and/or debt issue. There were also no borrowings, outstanding currency forward contracts or material information that would adversely impact the valuation of the Fund.

## Soft dollar commissions

In order to align with the policy of First State Investments internationally, the Investment Manager has ceased all of its soft dollar arrangements previously made with brokers with effect from 13 June 2005.

for the period from 1 January to 31 December 2013

# Historical performance\*

in Singapore dollars

|                                | Fund<br>% | Benchmark<br>% |
|--------------------------------|-----------|----------------|
| 3-mth                          | 3.9       | 4.1            |
| 6-mth                          | 10.9      | 9.9            |
| 1-year                         | 20.5      | 21.9           |
| 3-уеаг                         | 8.7       | 9.6            |
| 5-year                         | 9.5       | 8.0            |
| Since Inception – 3 March 2008 | 1.2       | 0.4            |

Note: The Fund invests all or substantially all of its assets in Class A shares of the First State Global Listed Infrastructure Fund (a sub-fund of the England and Wales domiciled umbrella fund known as First State Investments ICVC).

Performance for 1 year and above has been annualised.

The benchmark of the Fund is the UBS Global Infrastructure and Utilities 50-50 Index. It was changed from S&P Global Infrastructure Index with effect from 1 June 2008 as the new benchmark is more representative of the Fund.

Accordingly, the benchmark performance set out above uses the performance of the following:

- Inception to 31 May 2008: S&P Global Infrastructure Index.
- From 01 June 2008: UBS Global Infrastructure and Utilities 50-50 Index
- \* Source: Lipper, First State Investments. No initial charges with income reinvested in Singapore dollars.

Listed infrastructure generated solid returns in 2013, as investors sought the inflation-protected income and steady capital growth associated with the asset class.

# Performance

**Groupe Eurotunnel** climbed as traffic volumes grew, reflecting an increase in the departure frequency of its cross-Channel passenger vehicle shuttles and the recovering UK economy. **Vinci** and **Atlantia** were also significant contributors to performance; both stocks were boosted by positive economic data and improving traffic trends.

Exposure to **Power Asset Holdings** detracted from performance. The September announcement that it would spin off its Hong Kong regulated electric utility raised market concerns about future allowed rates of return, rising interest rates and insiders selling out of Hong Kong. The company is now trading at very appealing valuation levels. **Vopak** underperformed as it reported weaker-than-expected results and lowered earnings guidance. We anticipate that this company's pricing power and recent capacity additions in high growth markets such as Malaysia and China will deliver healthy earnings growth.

# Transactions

During the period we bought **TransCanada** and **Pembina Pipelines**. These companies own well positioned assets and have the potential to benefit from expansion projects, driven by the changing supply and demand dynamics of the North American oil and gas markets.

We sold **NextEra Energy** once its valuation reached levels which left little room for error in the execution of its wind and energy pipeline growth options. Holdings in **Osaka Gas** were also sold after Japanese macroeconomic reforms boosted the company's share price, reducing its upside potential.

## Outlook

Equities had a tremendous run in 2013. With roughly two-thirds of the return driven by multiple expansion rather than earnings growth or dividends, we would expect 2014 total returns to be more modest.

Providing some optimism for 2014, infrastructure stocks lagged broader equity markets in 2013 and forward valuation multiples are not high by historical standards. Strong cash flows have left many infrastructure companies with low leverage and the scope to return capital to shareholders through higher dividends or share buybacks.

## DISTRIBUTION OF INVESTMENTS As at 31 December 2013

|   | Holdings  | Market Value<br>S\$  | % of NAV    |

Note: The Fund invests all or substantially all of its assets in the First State Global Opportunities Fund (a Dublin-domiciled fund) with effect from 18 October 2002.

The performance prior to 18 October 2002 is in relation to the Fund before its conversion to a feeder fund. Performance for 1 year and above has been annualised.

The benchmark of the Fund is the MSCI World Index.

\* Source: Lipper, First State Investments. No initial charges with income reinvested in Singapore dollars.

Global markets rose strongly in 2013, with the MSCI World Index gaining 27.4% in US dollar terms, supported by a combination of highly accommodative monetary policy and steadily improving economic data. European markets performed particularly well reflecting much improved financial and economic conditions in the region. At a sector level, Consumer Discretionary and Health Care performed strongly, while Materials lagged considerably, and Utilities also underperformed.

## Performance

**Blackstone Group**, the US private equity company, rose strongly due to continued positive realisations, and **Incyte Corporation** gained on the back of good results from clinical trials. **Naspers** benefited from the strong performance of its Chinese internet subsidiary Tencent.

On the negative side, **Samsung Electronics** was weak on concerns over intensifying competition for smart phones. **Vopak**, a bulk liquid storage operator, lagged after cautioning that 2013 earnings growth would be slow ahead of planned major capacity additions in 2014, and **Anadarko Petroleum** was impacted by an adverse legal judgement in the Tronox spinoff case.

## Transactions

Significant purchases over the period included **Occidental Petroleum**, which is planning a restructuring that should unlock value and give the business a greater focus on North American shale. We also purchased **BNP Paribas**, one of the highest quality banking franchises in Europe and **TD Ameritrade**, a top four full service retail brokerage, strongly-positioned to increase market share in a consolidating industry.

We sold **Samsung Electronics** owing to our concerns that the rapid commoditisation of the smartphone market would lead to margin pressure and **Royal Dutch Shell** due to disappointment with the company's capital allocation strategy. We also sold **Wells Fargo** which has performed strongly resulting in an extended valuation relative to peers, while at the same time there is a concern that rising mortgage rates will put pressure on an important revenue stream.

## Outlook

Positive fundamentals remain in place: overall equity valuations still appear favourable compared to most asset classes, inflation risk is minimal, US dataflow is encouraging and the Eurozone appears stable. Also, monetary policy will remain supportive in the developed world for some time with the US and UK central banks having committed to keeping interest rates low and Japan implementing a huge monetary stimulus programme. However, the need for difficult structural reforms in a number of emerging markets has been underlined by the recent turbulence.

Companies are generally strongly capitalised, generating surplus cash and often supported by attractive dividends. That said, the considerable increase in valuations in 2013 should be viewed with some caution.

## DISTRIBUTION OF INVESTMENTS As at 31 December 2013

#### Others

As at 31 December 2013, the Fund did not hold any bonds, derivatives or other unit trusts, other than the First State Global Opportunities Fund Class I shares, constituting 99.1% of the Fund's Net Asset Value and at a market value of \$\$22,282,743. In addition, the Fund did not hold any investment constituting more than 5% of a company's outstanding share capital and/ or debt issue. There were also no borrowings, outstanding currency forward contracts or material information that would adversely impact the valuation of the Fund.

## Soft dollar commissions

In order to align with the policy of First State Investments internationally, the Investment Manager has ceased all of its soft dollar arrangements previously made with brokers with effect from 13 June 2005.

for the period from 1 January to 31 December 2013

## Historical performance\*

| (Calculated since date of first valuation) |           |                |

Note: Performance for 1 year and above has been annualised.

The benchmark of the Fund is the UBS Global Real Estate Investors Index. It was changed from Citigroup BMI World Property Index with effect from 1 March 2008 as the new benchmark is a more accurate representation of our investment strategy for relative comparison purposes.

Accordingly, the benchmark performance set out above uses the performance of the following:

- Inception to 29 February 2008: Citigroup BMI World Property Index
- From 01 March 2008: UBS Global Real Estate Investors Index
- \* Source: Lipper, First State Investments. No initial charges with income reinvested in Singapore dollars.

Global listed property rose moderately in 2013, underperforming global equities. The announcement by the US Federal Reserve in May that it would begin to taper its asset purchase programme caused global bond yields to rise, representing a headwind for interest-rate sensitive securities including global REITs.

## Performance

Positions in **Public Storage** and **Extra Space Storage** were the main positive contributors to fund performance. These stocks benefited from favourable sector fundamentals. Supply is limited, and the improving economic environment in the US has led to increased demand for their facilities.

Exposure to **Digital Realty Trust** and **American Campus Communities** detracted from performance. Digital Realty was impacted by a growing lag between the company's lease signings and the lease commencements, while American Campus Communities declined on weaker than expected leasing levels for the 2013-14 academic year.

## Transactions

During the period we bought **Host Hotels & Resorts** which is focused on the upscale and luxury segments of the US hotel market and should benefit from the strengthening US economy. We bought **ProLogis** on expectations of healthy industrial rental growth over the next several years and **Vornado Realty Trust** when it was trading below Net Asset Value. The company is exposed to the improving New York City office market.

We sold **Health Care REIT**, a US medical office REIT, as healthy acquisition spreads between yields and funding costs had helped this sector's earnings growth. However, falling REIT prices and rising debt costs have now made acquisitions less attractive. **Public Storage** was also sold. The company's recent results and earnings growth outlook are impressive. However, this is now reflected in the price. We sold **Stockland** on a relative valuation basis.

## Outlook

Global Real Estate Investment Trusts (REITs) are in a strong position. Interest cover ratios are healthy, balance sheets are generally in good shape, and occupancy rates remain high. The expectation that long-term interest rates in developed economies (excluding Japan) will continue to rise and normalise over time is likely to result in higher capitalisation rates for commercial property, putting pressure on valuations. However, this pressure is likely to be mitigated by cash flow growth from property assets as the improving global economy drives increasing levels of re-development activity.

## Foreign exchange transacted with HSBC for the financial year ended 31 December 2013

## Others

As at 31 December 2013, the Fund did not hold any bonds, derivatives or other unit trusts. In addition, the Fund did not hold any investment constituting more than 5% of a company's outstanding share capital and/or debt issue. There were also no borrowings, outstanding currency forward contracts or material information that would adversely impact the valuation of the Fund.

## Soft dollar commissions

In order to align with the policy of First State Investments internationally, the Investment Manager has ceased all of its soft dollar arrangements previously made with brokers with effect from 13 June 2005.

## MANAGER'S REPORT for the period from 1 January to 31 December 2013

Note: The Fund invests all or substantially all of its assets in Class B shares of the First State Global Resources Fund (a subfund of the England and Wales domiciled umbrella fund known as First State Investments ICVC).

Performance for 1 year and above has been annualised.

The benchmark of the Fund is a composite comprising 75% Euromoney Global Mining Index and 25% MSCI AC World Energy Index. It was changed from Euromoney Global Mining Index from 1 November 2007. The new benchmark is intended to better reflect the Fund's investment scope.

Accordingly, the benchmark performance set out above uses the performance of the following:

- Inception to 31 October 2007: Euromoney Global Mining Index
- From 01 November 2007: Composite comprising 75% Euromoney Global Mining Index and 25% MSCI AC World Energy Index

With effect from 1 October 2013, HSBC Global Mining Index was renamed to Euromoney Global Mining Index.

\* Source: Lipper, First State Investments. No initial charges with income reinvested in Singapore dollars.

Dramas, such as fears that the US would go over the 'fiscal cliff' at the start of year, a budgetary standoff between Congress and the President, and overdone fears of a Chinese economic slowdown took a toll on global resources markets over 2013.

## Performance

Good stock selection underpinned Fund's significant market-superior return. **ExxonMobil** benefited from an improving outlook for refining margins, strong operating performance and competent management. Strong production growth and the largest acquisition in its history to expand its oil and natural-gas in the Permian Basin of New Mexico buoyed **Concho Resources**.

By contrast, **Antofagasta** suffered as its management team lost investor credibility. The company started the year by advising that operating costs would be higher on increased power costs. Furthermore, the reversal of an earlier decision to put the Antucoya project on hold bemused the market. A change of executive leadership later in the year raised the possibility of regaining market faith. Sharp falls in the gold price sideswiped **Detour Gold** and **Eldorado Gold**. The gold price declined for the first time in 13 years.

## Transactions

Exposure was increased to **Rio Tinto** and **Fortescue Metals** as they are well positioned to capture the benefits of growth in iron ore production as well as a consolidated industry structure.

We also consolidated the portfolio's copper investments around **Antofagasta**, **Lundin Mining**, **First Quantum** and **Southern Copper**. The copper industry's structure will support higher prices, demand is recovering and the supply is likely to under-shoot.

In the energy arena, we upped the portfolio's commitment to the likes of **ExxonMobil** and **Chevron**. **Tesoro**, **Valero Energy** and **Marathon Petroleum** were added as recovering US refining margins make us optimistic about the companies' earnings prospects.

## Outlook

The allocation to global resources in many institutions' portfolios is currently near a record low. This is actually a good thing as it suggests that allocations to resources are likely to move gently higher, over time, from current levels.

Management teams too are working extra-hard to grow profits and boost margins. Cost cutting and taking concerted action to improve cash flows are now being emphasised. The switch is positive for resources equity valuations, because more cash flow should equal better returns to shareholders and drive a re-rating of share prices.

| Since Inception – 1 November 1993          | 8.4       | n,.a.          |
| (Calculated since date of first valuation) |           |                |

Note: The Fund invests all or substantially all of its assets in the First State Greater China Growth Fund (a Dublin-domiciled fund) with effect from 18 October 2002.

The performance prior to 18 October 2002 is in relation to the Fund before its conversion to a feeder fund. Performance for 1 year and above has been annualised.

The benchmark of the Fund is the MSCI Golden Dragon Index. It was changed from CLSA China World Index and CLSA China B Index with effect from 2 January 2001 as the previous benchmark was not reflective of the Fund's investment scope. It did not have any weighting in Taiwan.

\* Source: Lipper, First State Investments. No initial charges with income reinvested in Singapore dollars.

The Greater China markets rose moderately over the twelve months to 31 December 2013 as concerns over the withdrawal of accommodative monetary policy in the US and slower growth in China kept returns in check. The MSCI Golden Dragon Index gained 7.2% in US dollar terms, underperforming the MSCI World Index which was up by 27.4%.

Hong Kong (+11.1%) outperformed over the period, benefiting primarily from the continued strength of the property market, as did Taiwan (+9.8%), helped by positive performance from a number of IT stocks. China (+4.0%) lagged due to concerns over slowing growth and the spectre of quantitative easing 'tapering' in the US. These factors outweighed the positive impact of market-based and environmental reforms.

## Performance

Positive contributors to performance included **ENN Energy** as it advanced on the back of a positive outlook for clean energy in China, and **China Oilfield Services**, which rose on positive earnings. **Tencent Holdings** performed well as it benefited from a growing mobile gaming user base.

On the negative side, **TPK Holding** was impacted by concerns over weak revenue and margin pressure on the back of oversupply. **Yantai Changyu** from concerns about slowing growth and increasing competition from foreign wines and **Jardine Matheson** declined due to signs that its Indonesian automobile business is facing intensifying competition.

## Transactions

Major purchases over the period included **China Resources Gas**, as it should benefit from rising gas usage in China, and **Want Want**, a well-run Chinese food and beverage company. We also bought **Lenovo Group**, which has been reporting good results as it continues to gain market share in PCs as well as making in-roads into the smartphone business.

We sold **Yantai Changyu** on concerns over slowing growth and rising competition and **Belle International** due to worries about increasing fragmentation in the shoe industry. We sold **Wistron Corp**, which is structurally challenged and seeing a rapid decline in its PC business.

## Outlook

There are grounds for optimism that Chinese companies will increasingly be run in the interests of shareholders – which is currently often not the case. One consequence of the government's economic reforms should be a more level playing field between state-owned enterprises (SOE) and private companies as the former are pushed to improve levels of operational efficiency. We see growing competitive pressure arising from slower economic growth, continued over-capacity and longer-term trends such as the growth of e-commerce. Consolidation is likely to take place as a result. We will retain a preference for companies with strong cash flows and balance sheets as well as differentiated and upgraded products.

Note: The Fund invests all or substantially all of its assets in the First State Indian Subcontinent Fund (a Dublin-domiciled fund) with effect from 18 October 2002.

The performance prior to 18 October 2002 is in relation to the Fund before its conversion to a feeder fund. Performance for 1 year and above has been annualised.

The benchmark of the Fund is the MSCI India Index.

\* Source: Lipper, First State Investments. No initial charges with income reinvested in Singapore dollars.

The Indian market fell over 2013 as fears over slowing economic growth and the withdrawal of US stimulus measures weighed on risk appetite. The MSCI India Index fell by 3.8% in US dollar terms, underperforming the MSCI Asia Pacific ex-Japan Index which gained 3.6% and the MSCI Emerging Markets Index which was down by 2.3%.

## Performance

Key positive contributors to performance included **Tech Mahindra**, which continued to make progress with restructuring, while delivering strong organic growth and sealing new contracts. **Eicher Motors** advanced as strong performance in its motorcycles business continued. **GlaxoSmithKline Consumer** rose after MSCI decided to include it in the index, so index trackers had no choice but to buy the illiquid stock at any cost.

On the negative side, **Marico** was weak as it was affected by fears over the Indian economy while **Trent** fell due to high short-term valuations.

## Transactions

Over the six-month period significant new positions included **Bosch**, an extremely strong growth franchise going through a downturn. We also bought **Linde India**, a well-managed company experiencing a cyclical downturn which should be a beneficiary of an upturn in the capital expenditure cycle.

We sold **GlaxoSmithKline Consumer** and **Hindustan Unilever** as they became expensively valued, and **Tata Power** due to concerns about its long-term profitability.

## Outlook

In the last few months, we have been trying to find industrial companies which should benefit from a revival of capital expenditure (capex) in both manufacturing and infrastructure where investment is badly needed. As ever, we look for businesses which have high quality management, are cash generative and have done well through different cycles. We also look for those which have experienced a tough time in this cycle and are now available at reasonable valuations. We have taken or increased stakes in a number of such companies over recent months and are still evaluating a few more new ideas.

| Since Inception – 28 July 1969             | 9.0       | n.a.           |
| (Calculated since date of first valuation) |           |                |

Note: The Fund invests all or substantially all of its assets in the First State Singapore and Malaysia Growth Fund (a Dublindomiciled fund) with effect from 18 October 2002.

The performance prior to 18 October 2002 is in relation to the Fund before its conversion to a feeder fund. Performance for 1 year and above has been annualised.

The benchmark of the Fund is the market capitalisation weighted of MSCI Singapore Free Index and MSCI Malaysia Index. It was changed from DBS 50 Index and KLCI with effect from 1 December 2001 due to the discontinuation of the DBS 50 Index.

Accordingly, the benchmark performance set out above uses the performance of the following:

- Inception to 30 November 2001: DBS 50 Index and KLCI
- From 01 December 2001: Market cap weighted of MSCI Singapore Free Index and MSCI Malaysia Index
- \* Source: Lipper, First State Investments. No initial charges with income reinvested in Singapore dollars.

Malaysia (7.7%) and Singapore (1.7%) both rose over the year, with Malaysia's more defensive characteristics showing more appeal to investors. Meanwhile, the MSCI Asia Pacific ex-Japan Index gained 3.6%. Gains were moderate as investors were wary of the anticipated withdrawal of US stimulus measures.

## Performance

Positive drivers included **Tenaga Nasional** which outperformed in anticipation of reform initiatives, and **DBS Group** which rose after it abandoned plans to buy Bank Danamon in Indonesia. **Ezion Holdings** benefited from earnings momentum.

On the negative side, **SMRT** declined as it continued to struggle with an incoherent government transport policy, while **Airasia** fell due to rising competition, with new low cost carriers being launched and mixed results. **Jardine Matheson** declined due to signs that its Indonesian automobile business is facing intensifying competition.

## Transactions

Over the year significant new positions included **Glow Energy**, a high-quality business controlled by GDF-Suez, and **Eu Yan Sang International**, a reasonably valued and well-run traditional Chinese Medicine retailer. **Airasia** bought as we view it as one of Malaysia's most successful regional businesses.

We sold **Ezion Holdings** as it had reached a full valuation, and **Guocoland** as its problems in China remain unresolved and the controlling shareholder is not productively aligned with minority shareholders. **Sabana REIT** was sold as we believe there is limited growth potential.

## Outlook

China is entering a period of structural reform in an effort to rebalance its economic model. The consequences of this adjustment will be felt across the world, but in particular across the Asia-Pacific region. The impact of tighter liquidity is already clear in stock prices, but the second-order effect of slower growth and more expensive funding costs have yet to be experienced.

## Report of the Trustee

The Trustee is under a duty to take into custody and hold the assets of the sub-funds of First State Global Growth Funds, comprising First State Asia Innovation Fund, First State Asian Growth Fund, First State Bridge, First State Dividend Advantage, First State Global Agribusiness, First State Global Balanced Fund, First State Global Infrastructure, First State Global Opportunities Fund, First State Global Property Investments, First State Global Resources, First State Regional China Fund, First State Regional India Fund and First State Singapore Growth Fund (collectively, the "Fund"), in trust for the unitholders. In accordance with the Securities and Futures Act (Cap. 289), its subsidiary legislation and the Code on Collective Investment Schemes, the Trustee shall monitor the activities of the Manager for compliance with the limitations imposed on the investment and the borrowing powers as set out in the Trust Deed in each annual accounting year and report thereon to unitholders in an annual report.

To the best knowledge of the Trustee, the Manager has, in all material respects, managed the Fund during the year covered by these financial statements, set out on pages 72 to 161, in accordance with the limitations imposed on the investment and borrowing powers set out in the Trust Deed.

For and on behalf of the Trustee HSBC INSTITUTIONAL TRUST SERVICES (SINGAPORE) LIMITED

Authorised signatory

## Statement by the Manager

In the opinion of the directors of First State Investments (Singapore), the accompanying financial statements set out on pages 72 to 161, comprising the Statements of Total Return, Statements of Financial Position, Statements of Movements of Unitholders' Funds, Statements of Portfolio and Notes to the Financial Statements are drawn up so as to present fairly, in all material respects, the financial position of the sub-funds of First State Global Growth Funds, comprising First State Asia Innovation Fund, First State Asian Growth Fund, First State Bridge, First State Dividend Advantage, First State Global Agribusiness, First State Global Balanced Fund, First State Global Infrastructure, First State Global Opportunities Fund, First State Global Property Investments, First State Global Resources, First State Regional China Fund, First State Regional India Fund and First State Singapore Growth Fund (collectively, the "Fund"), as at 31 December 2013 and the total return/(deficit) and changes in unitholders' funds for the year then ended in accordance with the recommendations of Statement of Recommended Accounting Practice 7 "Reporting Framework for Unit Trusts" issued by the Institute of Singapore Chartered Accountants (formerly known as the Institute of Certified Public Accountants of Singapore).

At the date of this statement, there are reasonable grounds to believe that the Fund will be able to meet its financial obligations as and when they materialise.

For and on behalf of the directors of FIRST STATE INVESTMENTS (SINGAPORE)

**Alexis Ng** Director

14 March 2014

(Constituted under a Trust Deed in the Republic of Singapore on 16 April 1998)

# Independent Auditor's Report to The Unitholders of First State Global Growth Funds

We have audited the accompanying financial statements of the sub-funds of First State Global Growth Funds, comprising First State Asia Innovation Fund, First State Asian Growth Fund, First State Bridge, First State Dividend Advantage, First State GEM Leaders, First State Global Agribusiness, First State Global Balanced Fund, First State Global Infrastructure, First State Global Opportunities Fund, First State Global Property Investments, First State Global Resources, First State Regional China Fund, First State Regional India Fund and First State Singapore Growth Fund (collectively, the "Fund"), which comprise the Statements of Financial Position and Statements of Portfolio as at 31 December 2013, the Statements of Total Return and Statements of Movements of Unitholders' Funds for the year then ended, and a summary of significant accounting policies and other explanatory information, as set out on pages 72 to 161.

## Manager's Responsibility for the Financial Statements

The Fund's Manager (the "Manager") is responsible for the preparation and fair presentation of these financial statements in accordance with the recommendations of Statement of Recommended Accounting Practice 7 "Reporting Framework for Unit Trusts" issued by the Institute of Singapore Chartered Accountants (formerly known as the Institute of Certified Public Accountants of Singapore), and for such internal control as the Manager determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

## Auditor's Responsibility

Our responsibility is to express an opinion on these financial statements based on our audit. We conducted our audit in accordance with Singapore Standards on Auditing. Those standards require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement, whether due to fraud or error.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the Fund's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Fund's internal control. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates made by the Manager, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

## Opinion

In our opinion, the financial statements present fairly, in all material respects, the financial position of the Fund as at 31 December 2013 and the total return/(deficit) for the year then ended in accordance with the recommendations of Statement of Recommended Accounting Practice 7 "Reporting Framework for Unit Trusts" issued by the Institute of Singapore Chartered Accountants.

(1) These sub-funds are invested wholly or substantially into other underlying funds domiciled in Dublin, Ireland and denominated in US dollars.

(2) These sub-funds are invested wholly or substantially into other underlying funds domiciled in England and Wales and denominated in Great British Pounds.

Note: As all the sub-funds, except for First State Global Property Investments, are invested wholly or substantially into other underlying funds, it is not meaningful to classify these investments by industry.

### **First State Global Growth Funds** (Constituted under a Trust Deed in the Republic of Singapore on 16 April 1998)

### Notes to the Financial Statements

For the financial year ended 31 December 2013

These notes form an integral part of and should be read in conjunction with the accompanying financial statements.

### 1. General

First State Global Growth Funds (the "Fund") is a Singapore domiciled umbrella fund constituted by a Trust Deed dated 16 April 1998 between First State Investments (Singapore) (the "Manager") and HSBC Institutional Trust Services (Singapore) Limited (the "Trustee"). The Trust Deed and all supplemental deeds are governed by the laws of the Republic of Singapore.

The financial statements of the Fund for the year ended 31 December 2013 comprise the following sub-funds which were launched prior to 31 December 2013:

First State Asia Innovation Fund ("AIAT") First State Asian Growth Fund ("APGF") First State Bridge ("BRDG") First State Dividend Advantage ("DIVA") First State GEM Leaders ("GEML") First State Global Agribusiness ("AGRI") First State Global Balanced Fund ("GBFD") First State Global Infrastructure ("GIFT") First State Global Opportunities Fund ("G100") First State Global Property Investments ("GLPR") First State Global Resources ("GRES") First State Regional China Fund ("RIFD") First State Regional India Fund ("RIFD") First State Singapore Growth Fund ("SPGF")

Except for GLPR, the sub-funds are established as feeder funds investing directly into corresponding sub-funds (the "underlying funds") under the First State Global Umbrella Fund plc ("GUFD"), an umbrella fund domiciled in Dublin, Ireland or under the First State Investments ICVC ("ICVC"), an umbrella fund domiciled in England and Wales.

The investment objective of GLPR is to maximise the total return to investors by investing in a broad selection of securities of real estate investment trusts or companies that own, develop or manage real property from around the world.

The investment objectives of the remaining sub-funds have been detailed below:

| <u>Sub-funds</u> | Launch date     | <u>Underlying</u><br><u>Fund(s)</u>        | Investment objectives   |
|------------------|-----------------|--|---|
| AIAT             | 18 October 1999 | GUFD – First State<br>Asia Innovation Fund | The sub-fund aims to achieve long-term capital<br>appreciation by investing all or substantially all of its<br>assets in the underlying fund. The underlying fund<br>invests primarily in equity and equity-related securities<br>in the Asia region (excluding Australia, New Zealand<br>and Japan), focusing on those companies which are<br>considered especially innovative in terms of what they<br>produce, or services they provide, and/or the way in<br>which they carry out their business. The underlying fund<br>shall not specialise in any particular sector. |

(Constituted under a Trust Deed in the Republic of Singapore on 16 April 1998)

### Notes to the Financial Statements

For the financial year ended 31 December 2013

### 1. General (continued)

| Sub-funds                    | Launch date       | <u>Underlying</u><br><u>Fund(s)</u>                              | Investment objectives  |
|------------------------------|-------------------|--|--|
| APGF                         | 17 September 1984 | GUFD – First State<br>Asian Growth Fund                          | The sub-fund aims to achieve long term capital<br>appreciation by investing all or substantially all of its<br>assets in the underlying fund, which invests primarily in<br>securities in the Asian region excluding Japan.  |
| BRDG                         | 2 June 2003       |  | The sub-fund aims to provide investors with an annual distribution and medium term capital stability from investments focused in the Asia-Pacific ex Japan region by investing all or substantially all of its assets in the underlying funds.   |
| – Fixed<br>income<br>portion |                   | GUFD – First State<br>Asian Quality Bond<br>Fund                 | This fund invests primarily in debt securities of issuers organised, headquartered or having their primary business operations in Asia.  |
| – Equity<br>portion          |                   | GUFD – First State<br>Asian Equity Plus<br>Fund                  | This fund invests primarily in securities in the Asia Pacific<br>region (excluding Japan). Such companies will be<br>selected on the basis of their high dividend yields and<br>their potential for long-term capital appreciation.  |
| DIVA                         | 16 November 2004  | GUFD – First State<br>Asian Equity Plus<br>Fund                  | The sub-fund aims to provide investors with regular<br>distributions and long-term growth from high dividend<br>yielding equity investments focused in the Asia-Pacific<br>region (excluding Japan), by investing all or substantially<br>all of its assets in the underlying fund, First State Asian<br>Equity Plus Fund (a Dublin- domiciled fund), which<br>invests primarily in securities in the Asia Pacific region<br>(excluding Japan). Such companies will be selected on<br>the basis of their high dividend yields and their potential<br>for long-term capital appreciation. |
| GEML                         | 1 June 2004       | ICVC – First State<br>Global Emerging<br>Markets Leaders<br>Fund | The sub-fund aims to achieve long term capital<br>growth by investing all or substantially all of its assets<br>in the underlying fund, which invests in large and<br>mid capitalisation equities in emerging economies,<br>including those companies listed on developed market<br>exchanges whose activities predominantly take place in<br>emerging market countries.   |

(Constituted under a Trust Deed in the Republic of Singapore on 16 April 1998)

| SPGF             | July 1969         | GUFD – First State<br>Singapore and<br>Malaysia Growth<br>Fund | The sub-fund aims to achieve long term capital<br>appreciation by investing all or substantially all of its<br>assets in the underlying fund, which invests primarily in<br>securities issued by companies that are listed, traded or<br>dealt in on regulated markets in Singapore or Malaysia<br>or companies that are listed, traded or dealt in on<br>another regulated market but are incorporated in, with<br>substantial assets in, or derive significant revenues from<br>operations in Singapore or Malaysia.                     |

First State Global Umbrella Fund plc ("GUFD") is an open-ended investment company incorporated under the laws of the Republic of Ireland and structured as an umbrella fund. GUFD is managed by First State Investments (Hong Kong) Limited, a related corporation of the Manager and incorporated in Hong Kong.

(Constituted under a Trust Deed in the Republic of Singapore on 16 April 1998)

### Notes to the Financial Statements

For the financial year ended 31 December 2013

### 1. General (continued)

First State Investments ICVC ("ICVC") is an open-ended investment company incorporated under the laws of England and Wales and structured as an umbrella fund. ICVC is managed by First State Investments Management (UK) Limited, a related corporation of the Manager and incorporated in the United Kingdom.

### 2. Significant accounting policies

The principal accounting policies in the preparation of these financial statements are set out below:

#### (a) Basis of preparation

The financial statements have been prepared under the historical cost convention, as modified by the revaluation of financial instruments at fair value through profit or loss. The Fund has adopted the recommendations of Recommended Accounting Practice 7 "Reporting Framework for Unit Trusts" revised and issued by the Institute of Singapore Chartered Accountants (formerly known as the Institute of Certified Public Accountants of Singapore) in June 2012 ("RAP7") for the financial year beginning 1 January 2013.

The adoption of the RAP7 did not result in substantial changes to the Fund's accounting policies and had no material effect on the amounts reported for the current or prior financial years except as disclosed below:

#### (i) Net gains or losses on value of investments and financial derivatives

RAP7 recommends that the investment gains or losses should be analysed to show separately the net gains or losses on investments and the net gains or losses on financial derivatives. Previously, the realised gains or losses and the change in fair value of investments and financial derivatives were separately presented in the Statement of Total Return. This change has been applied retrospectively.

#### (ii) Transaction costs

RAP7 recommends that transaction costs, including all expenses relating to the purchase and sale of financial instruments, should be charged against income. Previously, the Fund had capitalised such expenses and recognised realised gains or losses on a net basis.

This change has been applied prospectively and, therefore, reclassification of comparative figures is not required.

#### (iii) Classification of net assets attributable to unitholders

Net assets attributable to unitholders, which represented the total value of the units in issue of the Fund, was previously classified as liabilities and the movements in the value of the Fund were presented in the Notes to the Financial Statements. RAP7 recommends that the Fund should classify its units in issue as equity and present a Statement of Movements of Unitholders' Funds, summarising the movements in the value of the Fund. On the adoption of the RAP7, the Fund has reclassified its units in issue from liabilities to equity. Consequently, the Fund's distributions will no longer be classified as a finance cost in the Statement of Total Return, but will be recorded as a distribution in the Statement of Movement in Unitholders' Funds.

(Constituted under a Trust Deed in the Republic of Singapore on 16 April 1998)

#### Notes to the Financial Statements

For the financial year ended 31 December 2013

#### 2. Significant accounting policies (continued)

#### (a) Basis of preparation (continued)

(iv) Distributions

RAP7 recommends that distributions should be accrued for at the point in time when the necessary approvals have been obtained and a legal or constructive obligation has been created. Previously, the Fund had recognised distributions on an ex-date basis.

The change in accounting policy has been applied retrospectively.

(v) Fair value measurement of financial instruments

RAP7 recommends disclosures and presentation of financial instruments in accordance with Singapore Financial Reporting Standard 107 "Financial Instruments: Disclosures" ("FRS 107") wherever possible.

Apart from enhanced disclosures to present fair value measurements by level of a fair value measurement hierarchy, the Manager has previously presented disclosures of the Fund's financial instruments in accordance with FRS 107 voluntarily. The adoption of this recommendation results in additional disclosures but does not have an impact on the accounting policies and measurement bases of the Fund.

In addition, the Fund has adopted FRS 113 'Fair value measurement' which is effective for annual periods beginning on or after 1 January 2013. If an asset or a liability measured at fair value has a bid price and an ask price, the standard requires valuation to be based on a price within the bid-ask spread that is most representative of fair value and allows the use of mid-market pricing or other pricing conventions that are used by market participants as a practical expedient for fair value measurement within a bid-ask spread. On adoption of the standard, the Fund changed its valuation inputs for listed financial assets traded in an active market to last traded prices to be consistent with the inputs prescribed in the Fund's prospectus for the calculation of its per unit trading value for subscriptions and redemptions. In the prior year, the Fund utilised bid prices for its listed financial assets. The change in valuation inputs is considered to be a change in estimate and is applied prospectively.

(vi) Reconciliation of net assets attributable to unitholders per unit per financial statements and for issuing/ redeeming units

The application of different valuation and accounting policies may result in differences between pricing net asset values and accounting net asset values.

Where the difference is considered material, RAP7 further recommends that a reconciliation of the net assets attributable to unitholders per unit per the financial statements and the net assets attributable to unitholders per unit for issuing/redeeming units at the financial year end date should be presented in the Notes to the Financial Statements. The adoption of this recommendation results in additional disclosures but does not have an impact on the valuation policies of the Fund.

The financial statements are prepared in Singapore dollars (S\$), which is the functional currency of the Fund.

(Constituted under a Trust Deed in the Republic of Singapore on 16 April 1998)

#### Notes to the Financial Statements

For the financial year ended 31 December 2013

#### 2. Significant accounting policies (continued)

#### (b) <u>Recognition of income</u>

Dividend income is recorded gross in the Statement of Total Return in the financial year in which a dividend is declared payable by the investee company. Interest income on deposits is recognised on a time proportion basis using the effective interest method.

#### (c) Investments

Investments are classified as financial assets held at fair value through profit or loss. Purchases of investments are recognised on trade date. Investments are recorded at fair value on initial recognition, and subsequently carried at fair value. The fair value of financial assets and liabilities traded in active markets is based on quoted market prices at the close of trading on the reporting date. Prior to 1 January 2013, the quoted market price used for investments held by the Fund was the current bid price. On adoption of FRS 113 'Fair value measurement' the Fund changed its fair valuation input to utilise the last traded market price for financial assets traded in an active market where the last traded price falls within the bid-ask spread. In circumstances where the last traded price is not within the bid-ask spread, the Manager will determine the point within the bid-ask spread that is most representative of fair value. The fair value of investments held in underlying funds is the quoted net asset value of the underlying fund as determined by the underlying fund 's administrator. Net changes in fair value of investments are included in the Statement of Total Return in the year in which they arise.

Investments are derecognised on the trade date of disposal. The resultant realised gains and losses on the disposal of investments are taken up in the Statement of Total Return as at trade date.

#### (d) Foreign currency translation

Foreign currency transactions during the year are translated into Singapore dollars at the rates of exchange ruling on the transaction dates. Foreign currency monetary assets and liabilities are translated into Singapore dollars at the rates of exchange ruling at the balance sheet date. Foreign exchange gains and losses resulting from the settlement of foreign currency transactions and from the translation at year end exchange rates of foreign currency monetary assets and liabilities, are taken to the Statement of Total Return.

#### (e) Financial derivatives

Financial derivatives are recognised at fair value on the date in which a derivative contract is entered into and are subsequently re-measured at their fair values. Fair values are obtained from quoted market prices in active markets, including recent market transactions, and valuation techniques, including discounted cash flow models and options pricing models, as appropriate. A derivative is carried as an asset when its fair value is positive, and as a liability when its fair value is negative. Subsequent changes in the fair value of any derivative instruments are recognised immediately in the Statement of Total Return.

Net gains and losses on financial derivatives held for protection or enhancement of investments are taken to the Statement of Total Return as gains or losses on financial derivatives. Such gains or losses on financial derivatives held for generating or protecting income are taken to the Statement of Total Return as income gains or losses.

#### (f) Distribution

The Manager shall have the absolute discretion to determine whether a distribution is to be made. In the event that the Manager determines that a distribution will be made, an amount required to effect such a distribution shall be transferred to a distribution account for payment on distribution date. This amount shall not be treated as part of the property of the Fund. Distributions are accrued for at the point in time when the necessary approvals have been obtained and a legal or constructive obligation has been created.

(Constituted under a Trust Deed in the Republic of Singapore on 16 April 1998)

### Notes to the Financial Statements

For the financial year ended 31 December 2013

#### 3. Income Tax

|  | First State Glo<br>Investi |                      |
|--|----------------------------|----------------------|
|  | 2013<br>\$\$               | 2012<br>\$\$         |
| Singapore income tax<br>Foreign income tax | (1,038)<br>(100,357)       | (3,305)<br>(110,066) |
|  | (101,395)                  | (113,371)            |

The Fund was granted the status of Designated Unit Trusts ("DUT") in Singapore and, therefore, the following income is not taxable in accordance with section 35(12) and (12A) of the Income Tax Act (Cap 134) including:

- (a) gains or profits derived from Singapore or elsewhere from the disposal of securities;
- (b) interest (other than interest for which tax has been deducted under section 45 of the Income Tax Act);
- (c) dividends derived from outside Singapore and received in Singapore;
- (d) gains or profits derived from foreign exchange transactions, transactions in futures contracts, transactions in interest rate or currency forwards, swaps or option contracts and transactions in forwards, swaps or option contracts relating to any securities or financial index; and
- (e) distributions from foreign unit trusts derived from outside Singapore and received in Singapore.

The Singapore income tax represents tax deducted at source for Singapore sourced dividends. The foreign income tax represents tax deducted at source on dividends derived from outside Singapore and received in Singapore and tax deducted with respect to gains on disposal of investments.

The Fund is required to recognise a tax liability when it is probable that the tax laws of foreign countries require a tax liability to be assessed on the Fund's gains on investments sourced from such foreign countries, assuming the relevant taxing authorities have full knowledge of all the facts and circumstances. The tax liability is then measured at the amount expected to be paid to the relevant taxation authorities using the tax laws and rates that have been enacted or substantively enacted by the end of the reporting period. There is sometimes uncertainty about the way enacted tax law is applied to offshore investment funds. This creates uncertainty about whether or not a tax liability will ultimately be paid by the Fund. Therefore when measuring any uncertain tax liabilities management considers all of the relevant facts and circumstances available at the time which could influence the likelihood of payment, including any formal or informal practices of the relevant tax authorities.

As at 31 December 2013 and 2012, the Fund has uncertain tax exposure with respect to gains on investment of which the tax liability is estimated to be nil. While this represents the Manager's best estimate, the estimated value could differ significantly from the amount ultimately payable.

The following sub-funds are included under the Central Provident Fund Investment Scheme ("CPFIS"):

First State Asian Growth Fund First State Bridge First State Dividend Advantage First State Global Resources First State Regional China Fund

(Constituted under a Trust Deed in the Republic of Singapore on 16 April 1998)

As a result of the adoption of the revised RAP7, the fair value of investments traded in an active market is based on the last traded prices as at the valuation date and distributions are accrued at the point in time when the necessary approvals have been obtained and a legal or constructive obligation has been created for the purpose of determining the Fund's pricing net asset values. As disclosed in Note 2, the fair value of investments traded in an active market was previously based on the current bid prices and distributions were accrued for based on an ex-date basis for the purpose of determining the accounting net asset values in the financial statements. The effect of the adoption of revised RAP 7 is presented below:

| First State Dividend Advantage                               | 2012<br>S\$   |

(Constituted under a Trust Deed in the Republic of Singapore on 16 April 1998)

### Notes to the Financial Statements

For the financial year ended 31 December 2013

### 9. Financial risk management

The Fund's activities expose it to a variety of financial risks including but not limited to market risk (including currency risk, interest rate risk and price risk), liquidity risk and credit risk. The Fund comprises the sub-funds as disclosed in Note 1. The First State Global Property Investments ("GLPR") is a standard fund investing directly into real estate investment trusts and securities. The remaining sub-funds (collectively, the "Feeder Funds"), invest all or substantially all of their assets into underlying funds as disclosed in Note 1. These underlying funds are separately managed by their respective manager and the Manager does not view the risk exposures of the Feeder Funds to be the same as those of the underlying funds in which they hold investments.

The overall responsibility for the management of the Fund's financial risks lies with the Manager. The Fund's overall risk management programme seeks to minimise potential adverse effects on the Fund's financial performance. The Fund may use financial futures contracts, financial options contracts and/or forward foreign exchange contracts subject to the terms of the Trust Deed to moderate certain risk exposures. Specific guidelines on exposures to individual securities and certain industries are in place for the Fund at any time as part of the overall financial risk management to reduce the Fund's risk exposures.

The Fund's assets are held in accordance with the published investment policies of the Fund. The allocation of assets between the various types of investments is determined by the Manager to achieve their investment objectives.

The data used and assumptions made in the sensitivity analyses below may not reflect actual market conditions, nor is it representative of any potential future market conditions. The sensitivity analyses can be complex and the disclosures made here are not exhaustive. The market exposures change regularly and the assumptions made below may not be representative of the risk taken throughout the year. The sensitivity analyses below should not be solely relied upon by investors in making their investment decisions.

At the balance sheet date, the Fund's financial risks comprise market risk (mainly price risk and currency risk), liquidity risk and credit risk.

#### a. Market risk

Market risk is the risk of loss arising from uncertainty concerning movements in market prices and rates, including interest rates, credit spreads and exchange rates. Market risk includes such factors as changes in the economic environment, consumption pattern and investor's expectation which may have a significant impact on the value of the investments. The Fund's investments are substantially dependent on changes in market prices. The Fund's investments are monitored by the Manager on a regular basis so as to assess changes in fundamentals and valuation. Although the Manager makes reasonable efforts in the choice of investments, events beyond reasonable control of the Manager could affect the prices of the underlying investments and hence the net asset value of the Fund. Guidelines are set to reduce the Fund's risk exposures to market volatility such as diversifying the portfolio by investing across various industry sectors and geographies. Alternatively, the Fund may be hedged using derivative strategies.

(i) Price Risk

Price risk is the risk that the fair values of equities or future cash flows of a financial instrument will fluctuate because of changes in market prices (other than those arising from interest rate risk or currency risk).

#### First State Global Property Investments ("GLPR")

The investments of GLPR are subject to normal market fluctuations and the risks inherent in investing in international securities markets and there can be no assurance that appreciation will occur. It is the policy of the Manager to maintain a diversified portfolio of investments for GLPR so as to minimise the risk.

(Constituted under a Trust Deed in the Republic of Singapore on 16 April 1998)

### Notes to the Financial Statements

For the financial year ended 31 December 2013

#### 9. Financial risk management (continued)

#### a. Market risk (continued)

#### (i) Price Risk (continued)

GLPR strives to invest in strong businesses with quality management and at sensible prices. GLPR's preferred strategy is to hold equity investments for the medium-to-long term. The Manager is therefore not concerned about the short-term equity price volatility with respect to its investments provided that the underlying business, economic and management characteristics of its investments remain favourable.

The carrying values of investments subject to price risk are, in almost all instances, based on quoted market prices as of the balance sheet date. Market prices are subject to fluctuation and, consequently, the amount realised in the subsequent sale of an investment may significantly differ from the reported market value. Fluctuation in the market price of a security may result from perceived changes in the underlying economic characteristics of the investment, the relative price of alternative investments and general market conditions. Furthermore, the amount realised in the sale of a particular security may be affected by the relative quantity of the security being sold.

The exposure to price risk is managed by constructing a diversified portfolio from which it expects the underlying companies it invests in to perform differently in reaction to different risk influences. The Manager monitors the price risk in GLPR's portfolio through both the volatility of the underlying holdings and their combined volatility, both at an absolute level and relative to GLPR's benchmark. The Manager expects the portfolio to carry a certain level of equity price risk and uses such risk measurement to highlight unintended risks in the portfolio.

#### Feeder Funds

The Feeder Funds invest all or substantially all of their assets into the respective underlying funds whose investment objectives are disclosed in Note 1.

The investments held by the Feeder Funds in the underlying funds are subject to the fluctuations in the quoted net asset value of the underlying funds. Such risk is primarily managed by the respective manager of the underlying funds. The Manager also monitors the performance of the Feeder Funds against their respective benchmarks on a regular basis. A Feeder Fund Review Committee has also been established to ensure that there is appropriate and adequate oversight on the performance of the underlying sub-funds.

The Feeder Fund Review Committee of the Manager meets on a quarterly basis to perform an overall review of the Feeder Funds. Areas under review include performance of the Feeder Funds as well as their underlying funds, operational and compliance matters and specific issues that occurred in the relevant year. The objective of this meeting is to ensure delegation and management of the Feeder Funds have been performed in accordance with constituted documents and regulatory requirements.

The table below summarises the effect on the net assets attributable to unitholders for each sub-fund, as at 31 December 2013 and 31 December 2012, from a reasonable possible change in the benchmark market indices as applied to the respective beta reported by Lipper.

The reasonable possible change in the benchmark market indices has been determined by using the one year benchmark returns for the financial year ended 31 December 2013 and 31 December 2012, respectively. This is a reasonable possible change in the benchmark assuming similar volatility in the respective financial markets will be experienced in the next twelve months.

(Constituted under a Trust Deed in the Republic of Singapore on 16 April 1998)

The disclosure above is shown in absolute terms. Changes and impacts could be positive or negative.

(ii) Currency Risk

Currency risk is the risk that the fair value of future cash flows of a financial instrument will fluctuate because of changes in foreign exchange rates.

(Constituted under a Trust Deed in the Republic of Singapore on 16 April 1998)

### Notes to the Financial Statements

For the financial year ended 31 December 2013

#### 9. Financial risk management (continued)

#### a. Market risk (continued)

#### (ii) Currency Risk (continued)

The Fund may hold assets and liabilities denominated in currencies other than Singapore dollars and therefore the Fund may be affected favourably or unfavourably by exchange rate regulators or changes in the exchange rates between the Singapore dollar and such other currencies. The Fund may enter into forward foreign exchange contracts designed to either hedge some or all of this exposure having regard to factors such as the currency denomination of units issued by the fund, or alternatively increase exposure to preferred foreign currencies.

The table below summarises the Fund's exposure to key foreign currencies from its monetary and nonmonetary assets and liabilities.

(Constituted under a Trust Deed in the Republic of Singapore on 16 April 1998)

### Notes to the Financial Statements

For the financial year ended 31 December 2013

### 9. Financial risk management (continued)

#### a. Market risk (continued)

#### (ii) Currency Risk (continued)

Portfolio of investments, which is the most significant item on the balance sheet is exposed to currency risk and price risk. The price risk sensitivity analyses in note 9(a)(i) include the impact of currency risk on portfolio of investments which are non-monetary financial assets. The Fund's net financial assets comprise mainly portfolio of investments which are non-monetary financial assets, hence currency risk analyses have not been performed on the remaining financial assets.

#### (iii) Interest rate Risk

Interest rate risk is the risk that the fair value of future cash flows of a financial instrument will fluctuate because of changes in market interest rates.

The majority of the Fund's financial assets and liabilities are non-interest bearing and therefore the Fund is not exposed to significant interest rate risk. No interest rate risk sensitivity analysis is presented.

#### b. Liquidity risk

The Fund's liquidity risk arises mainly from redemption of units. The Fund invests the majority of its assets in investments that are traded in an active market and can be readily disposed.

The Fund's policy with regard to liquidity is to ensure continuity of funding. The Manager has developed cash management guidelines to maintain a working capital cash balance within each sub-fund. Each sub-fund is not allowed to be in an overdraft position at all times.

Units are redeemable at the holder's option. However, the Manager also has the option to limit redemption requests to 10% of the total number of units then in issue, with the approval of the Trustee.

Aside from the redeemable units issued by the Fund, the tables below analyse the Fund's financial liabilities and net settled derivative financial liabilities into relevant maturity groupings based on the remaining year at the balance sheet date to the contractual maturity date. The amounts in the table are the contractual undiscounted cash flows. Balances due within 12 months approximate their carrying values, as the impact of discounting is not significant.

(Constituted under a Trust Deed in the Republic of Singapore on 16 April 1998)

The table below analyse the Fund's derivative financial instruments in a loss position that will be settled on a gross basis into relevant maturity groupings based on the remaining period at the balance sheet date to the contractual maturity date. The amounts in the table are the contractual undiscounted cash flows. Balances due within 3 months equal their carrying balances, as the impact of discounting is not significant.

(Constituted under a Trust Deed in the Republic of Singapore on 16 April 1998)

### Notes to the Financial Statements

For the financial year ended 31 December 2013

### 9. Financial risk management (continued)

#### c. Credit risk

The Fund takes on exposure to credit risk, which is the risk that a counterparty will be unable to pay amounts in full when due, including transactions with counterparties such as issuers, brokers, custodians and banks. Impairment provisions are provided for losses that have been incurred by the balance sheet date, if any.

Concentrations of credit risk are minimised primarily by:

- ensuring counterparties, together with the respective credit limits, are approved,
- ensuring that transactions are undertaken with a large number of counterparties, and
- ensuring that the majority of transactions are undertaken on recognised exchanges.

All transactions in listed securities and collective investment schemes (underlying funds) are settled or paid upon delivery using approved brokers or the Fund's dealer. The risk of default is considered minimal, as delivery of securities is only made once the broker or Fund's dealer has received payment. Payment is made on a purchase once the securities have been received by the broker or Fund's dealer. The trade will fail if either party fails to meet its obligation.

The Fund's credit risk exposure arises mainly from portfolio of investments and cash and bank balances held with custodians and financial institutions. The maximum exposure to credit risk at the reporting date is the carrying amount of the financial assets. As at 31 December 2013, all investments are placed in custody with HSBC Institutional Trust Services (Singapore) Limited and UBS AG which had a credit rating of B (31 December 2012: B) and C- (31 December 2012: C-), respectively. There are risks involved in dealing with custodians who settle trades with regard to segregation of assets. It is expected that all investments and other assets deposited with custodians will be clearly identified as being assets of the Fund; the Fund should not therefore be exposed to credit risk with respect to such parties. However, it may not always be possible to achieve this segregation, so the portfolio of the Fund may experience increased exposure to credit risk associated with the applicable custodian. The custodian of the underlying funds under GUFD and ICVC (the "underlying custodians") is The Hongkong Shanghai Banking Corporation Limited.

As at 31 December 2013, the underlying custodian had a credit rating of B (2012: B) based on the Bank Financial Strength ratings of Moody's. The table below summarises the credit rating of banks with whom each sub-fund's cash and bank balances are held as at 31 December 2013 and 31 December 2012 and other key counterparties, where applicable.

The credit ratings are based on the Bank Financial Strength ratings published by the rating agency.

#### Notes to the Financial Statements

For the financial year ended 31 December 2013

#### 9. Financial risk management (continued)

#### d. Capital management

The Fund's capital is represented by the net assets attributable to unitholders. The Fund strives to invest the subscriptions of redeemable participating units in investments that meet the Fund's investment objectives while maintaining sufficient liquidity to meet unitholders' redemptions.

#### e. Fair value estimation

The Fund classifies fair value measurements using a fair value hierarchy that reflects the significance of the inputs used in making the measurements. The fair value hierarchy has the following levels:

- Quoted prices (unadjusted) in active markets for identical assets or liabilities (Level 1).
- Inputs other than quoted prices included within level 1 that are observable for the asset or liability, either directly (that is, as prices) or indirectly (that is, derived from prices) (Level 2).
- Inputs for the asset or liability that are not based on observable market data (that is, unobservable inputs) (Level 3).

The following table analyses within the fair value hierarchy the Fund's financial assets and liabilities (by class) measured at fair value at 31 December 2013 and 2012:

| As at 31 December 2013  | Level 1<br>\$ | Level 2<br>\$ | Level 3<br>\$ | Total<br>\$ |

Investments in listed equities whose values are based on quoted market prices in active markets are classified within level 1. Investments in open-ended investment funds whose net asset value is struck daily, price information is published and readily available and units are subscribed and redeemable on demand at the published price, are classified within level 1. The Fund does not adjust the quoted price for these instruments.

Financial derivatives that trade in markets that are not considered to be active but are valued based on quoted market prices, dealer quotations or alternative pricing sources supported by observable inputs are classified within level 2.

Except for cash and cash equivalents which are classified as Level 1, the Fund's assets and liabilities not measured at fair value at 31 December 2013 and 2012 have been classified as Level 2. The carrying amounts of these assets and liabilities approximate their fair values as at the statement of financial position date.

(Constituted under a Trust Deed in the Republic of Singapore on 16 April 1998)

### Notes to the Financial Statements

1. The expense ratios have been computed based on the guidelines laid down by the Investment Management Association of Singapore ("IMAS"). This is the sum of the Funds' expense ratio and the weighted average of the underlying funds' unaudited expense ratio.

The calculation of the Funds' expense ratios at financial year end was based on total operating expenses divided by the average net asset value respectively for the year. The total operating expenses do not include (where applicable) brokerage and other transaction costs, performance fee, interest expense, distribution paid out to unitholders, foreign exchange gains/losses, front or back end loads arising from the purchase or sale of other funds and tax deducted at source or arising out of income received. The Funds do not pay any performance fee. The average net asset value is based on the published daily balances.

The unaudited expense ratio of the underlying funds are obtained from the Underlying Funds' Manager.

\*GLPR's portfolio of investments as at 31 December 2013 and 2012 include holdings in Real Estate Investment Trusts (REITs), for which the expense ratios were unavailable or not published. As such, GLPR's expense ratio comprises only the expense ratio of the Fund.

Total operating expenses, average net asset value of the Fund and weighted average of the underlying funds' unaudited expense ratio are as below:

#### 12. Comparatives

Certain comparatives have been reclassified to conform with changes in the current presentation in relation to the revised RAP 7 issued by the Institute of Singapore Chartered Accountants in June 2012.

The effect of the adoption of the revised RAP 7 as disclosed in Note 8 of the financial statements, has resulted in corresponding restatement of the amount payable for dividend distribution for the comparative period for DIVA and GIFT.

Consequently, the relevant comparative amounts in the Statements of Financial Position, Statements of Movements of Unitholders' Funds, Statements of Portfolio and notes to the financial statements have been restated accordingly.

#### 13. Events occurring after balance sheet date

#### First State Global Property Investments

Subsequent to the financial year-end, the Fund's investment policy was changed so that going forward all or substantially all of its assets will be invested into the First State Global Property Securities USD – Class 1 Accumulation. This change in portfolio was effected from 17 January 2014.

The First State Global Property Securities USD – Class 1 Accumulation is a sub-fund of the First State Global Umbrella Fund plc which is registered in Ireland under the Companies Acts, 1963 to 2012, the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations, 2011 (as amended) and the Hong Kong Securities and Futures Commission ("SFC") Code on Unit Trust and Mutual Funds (the "Code"), as an open-ended umbrella investment Company.

There will be no change to the investment objective of the First State Global Property Investments. The underlying fund currently aims to achieve its investment objective by investing at least 90% of its assets in the securities of real estate investment trusts or companies which invest in commercial, retail and industrial properties and, to a lesser extent, in car parks, hotels, leisure properties and appropriate infrastructure projects worldwide.
