

TERMS AND RISK DISCLOSURES FOR BOND INVESTMENTS

Dear Client,

To transact in wholesale / unlisted bonds that may only be offered to Accredited Investors and other relevant persons in reliance on a relevant exemption from needing to register a prospectus for such bonds, you (the client) must be or may be deemed to be an Accredited Investor who meet the requirements set out in Section 275 of the Securities and Futures Act 2001.

Please refer to the document(s) attached (if any), and ensure that you (the client) have received and understood the applicable document(s) which contains the applicable key risks, disclosure features, terms and conditions of the wholesale / unlisted bond(s) mentioned herein.

It is essential to understand the risks of bonds before investing in them, as different types of bonds have varying levels of risks. By evaluating these risks, investors can make informed decisions about whether to invest in a particular bond or not.

The information below is only a summary of some key risk, features, terms and conditions of the bond investment product mentioned herein. Please refer to the product documentation (a copy which is available upon request) for full details of the bond investment product mentioned herein and the applicable key risks, disclosure features, terms and conditions.

| <p><u>Key risks of bond investments</u></p> <p>Product risk</p> <ul style="list-style-type: none"> · All investments carry an element of risk. Losses may be incurred as a result of buying and selling investment products. <p>Credit/Issuer risk</p> <ul style="list-style-type: none"> · Bonds are subject to the risk that the issuer of the bond will default on its repayment obligations. Credit ratings assigned by credit rating agencies can be used as a reference BUT do not guarantee the creditworthiness of the issuer / guarantor (if any). <p>Liquidity risk</p> <ul style="list-style-type: none"> · Certain illiquid bonds may not be actively traded on the secondary markets with wide bid/offer spreads. It may be difficult or impossible for investors to sell before its maturity. <p>Inflationary risk</p> | <p><u>Important Reminders and Risk Warnings (In addition to key risks of bond investment)</u></p> <p><u>High-yield bonds</u></p> <p><i>Higher credit risk</i></p> <ul style="list-style-type: none"> · High-yield bonds are typically rated below investment grade or are unrated. They are subject to market volatility and possibility of higher issuer default risk. <p><i>Increased vulnerability to economic cycles</i></p> <ul style="list-style-type: none"> · High-yield bonds are subject to higher market volatility and declining market value during economic downturns. <p><u>Perpetual bonds</u></p> <p><i>No maturity date</i></p> <ul style="list-style-type: none"> · Perpetual bonds are perpetual in nature and do not have a fixed maturity date. <p><i>Coupon payment</i></p> <ul style="list-style-type: none"> · There is possibility of coupon payment deferral or total suspension subject to the terms and conditions of the perpetual bond issuance and at the discretion of the issuer. |
|--|--|

- Inflation will undermine an investment's returns through a decline in purchasing power. Bond payments are most at inflationary risk because their payouts are generally based on fixed interest rates, meaning an increase in inflation diminishes their purchasing power.

Interest rate risk

- Bonds are more susceptible to fluctuations in interest rates. Bond prices are inversely related to interest rates. As interest rates rise, the prices of existing bonds fall, and vice versa. Therefore, when interest rates rise, the value of a bond decreases.

Currency risk

- Exchange rate fluctuations may adversely affect the investment return when the traded currency proceeds / interest coupons are converted to the original currency.

Counterparty risk

- Where a counterparty defaults in its contractual obligations, significant losses of principal may incur.

For bonds that have longer investment tenors:

- There may be potential losses of principal if investors redeem their longer tenor investments before the maturity date.

For customers with leveraged trading facilities:

- Margin / Leverage trading increases the investment risk by magnifying potential losses. The cost of borrowing may increase due to interest rate movements.

Investments in other jurisdictions

- Where the issuer is incorporated in and/or has operations in jurisdiction(s) other than the investor's home jurisdiction, the regulatory regime in such other jurisdiction(s) may offer different or diminished investor protection.

Risks linked to bond's contractual arrangement

- A bond is a contractual arrangement between the issuer and the investor. The terms and conditions governing each bond can differ significantly and investors should always read and understand these related terms and conditions before making any investment.

Investors may only take action through the Trustee

- Under the terms of the trust deed, only the trustee may pursue remedies and/or take enforcement action on behalf of the investors. Investors may not take action directly against the issuer unless the trustee has failed or neglected to do so. The trustee is not be obliged to take any action on behalf of investors unless (a) it has received instructions or directions in

There is also possibility of accrued interest being non-cumulative as a result from coupon payment deferral. For non-cumulative perpetual bonds, coupon payments that are unpaid or omitted will not be paid back later.

Non-call risk

- Perpetual bonds are callable at the discretion of the issuer. If the perpetual bond is not called, there may be no stated maturity for investors to recover their principal. Investors are exposed to market price volatility and dependency on secondary market liquidity, resulting in potential loss of principal investments.

Lower priority of claims

- Bonds issued as subordinated debts have a lower priority of claims in the event of liquidation of the issuer. Investors can only get back the principal after other senior creditors are paid.

Reinvestment risk

- Bonds with a callable feature increase an investor's reinvestment risk when the issuer exercises its right to redeem the bond before it matures or when the issuer exercises a make-whole call provision on a bond allowing the issuer to pay off remaining debt early.

Convertible bonds

Equity investment risk

- Investments in convertible bonds are subject to both equity and bond investment risk.

Equity volatility risk

- The market price of the convertible bond is likely to be affected by fluctuations in the market price of the underlying stock.

Callable bonds

Reinvestment risk

- Bonds with a callable feature increase an investor's reinvestment risk when the issuer exercises its right to redeem the bond before it matures or when the issuer exercises a make-whole call provision on a bond allowing the issuer to pay off remaining debt early.

Subordinated bonds

Lower priority of claims

- Bonds issued as subordinated debts have a lower priority of claims in the event of liquidation of the issuer. Investors can only get back the principal after other senior creditors are paid.

Disclaimer:

This information/document is provided to you for general information only and does not constitute a recommendation, an offer or solicitation to buy or sell the investment product mentioned. It does not have any regard to your specific investment objectives, financial situation or any of your particular needs. Accordingly, no warranty whatsoever is given and no liability whatsoever is accepted for any loss arising whether directly or indirectly as a result of your acting based on this information. The products referred to herein are intended only for accredited investors, institutional investors and certain other persons who meet the requirements set out in section 275 of the Securities and Futures Act 2001.

Investments are subject to investment risks including the possible loss of the principal amount invested. Past performance figures as well as any projection or forecast used in this publication, are not necessarily indicative of future or likely performance of any securities.

You may wish to obtain advice from a qualified financial adviser, pursuant to a separate engagement, before making a commitment to purchase any of the investment products mentioned herein. In the event that you choose not to obtain advice from a qualified financial adviser, you should assess and consider whether the investment product is suitable for you before proceeding to invest and we do not offer any advice in this regard unless mandated to do so by way of a separate engagement. You are advised to read the trading account Terms & Conditions, Risk Disclosure Statement (available online at www.poems.com.sg/docs/RiskDisclosure.pdf) and associated product offering documents including risk factors) before trading in this product. Where the product is issued by a third party issuer, such third party issuer and not PSPL will be liable to the investor. PSPL shall not be responsible for any inaccuracy, incompleteness or incorrectness of any information contained in the offering documents prepared by a third party product issuer. The product offering documents are provided to you on the understanding that you have sufficient knowledge, experience, and/or professional advice to make your own evaluation of the merits and risks of the product.

Reminders:

Phillip Securities Pte Ltd (“PSPL”) will generally provide you “execution only” services - see **Guide and Cautionary Notes for Trading Accounts** on www.poems.com.sg. You are therefore personally responsible to make your own decisions on the suitability of every transaction you do through PSPL. One exception is if you specifically apply and pay for advice from PSPL. The other exception is Execution-Related Advice on listed Excluded Investment Products (“ERA”) which may be given to you, but only

subject to (a) you accepting personal responsibility to ensure any such advice is suitable before you act on it, and (b) you ensuring that you receive and understand the rationale for every ERA given to you. Materials (including market and analyst reports) are provided to you as information on an execution only basis for you to make your own suitability decisions. Materials which are not ERA are provided strictly as you asked.

These reminders apply to the contents of this e-mail as well as any accompanying materials sent under its cover.

General Disclaimer:

The information/materials provided (whether as attachments to this e-mail or in its body), where they are not ERA, are provided for general information/circulation only and not intended and therefore should not be taken as any offer or solicitation to do any investment or trade. No assessment has been made by PSPL as to the suitability for you of any materials in this e-mail. As always, the decision to trade and/or invest remains solely with you. Information/materials in this e-mail are provided "as is" without warranty of any kind, either express or implied. Such information/materials provided have been procured from sources believed to be reliable and accurate (but whose reliability and accuracy **cannot be and are not warranted**); and may have been acted on by PSPL or members of the PhillipCapital group before being made available to you. All investments are subject to investment risks. Ideally you should and you may wish to seek advice from a financial adviser before making a commitment to purchase or invest in the investment product(s) mentioned in this e-mail or its attachment(s). If you choose not to do so, you are then choosing to make your own decision on whether any of the said investment product(s) are suitable for you. Neither PSPL nor any fellow member of the PhillipCapital group of entities shall, in any event, be liable to you for any direct/indirect or any other damages of any kind arising from or in connection with your reliance on any information in and/or materials attached to this email.

Confidentiality Note:

This e-mail and its attachment(s) are intended **only** for the use of the recipient(s) named above. If you have received this message in error, please notify the sender immediately and delete all copies of it.
