

Penguin International Ltd

Cash to ride this cycle

SINGAPORE | OIL & GAS | UPDATE

- Penguin provided some business updates in their recent AGM. The outlook is challenging due to Covid-19 and collapse in oil prices.
- Charter rate for crew boats will be under pressure, demand for new vessels is down and ferry customers will suffer from the pandemic.
- We downgrade to ACCUMULATE from BUY. Our FY20e earnings is cut by 52%. The target price is dropped to \$\$0.55 (prev. \$\$0.88). We change our methodology from 5x PE (excluding cash) to a P/BV of 0.7x FY20e (historical 10-year average). The net cash of S\$60mn (end-Dec19) will allow the company to ride through this turbulence. Net cash is now 52% of market capitalisation.

Figure 1: Summary from AGM

Figure 1. Summary from Adivi					
Topic	Commentary				
Covid-19 / Oil price impact	 Demand for new vessels is down. Charter rates for crew boats reduced as oil companies slash their cost. Ferry market is the worst affected by the pandemic 				
Covid-19 Disruption	 Shipyard in Singapore is designated essential but only half the foreign workers are allowed to work. Batam shipyard is operating at full strength. 				
Existing orders	No contracts have been terminated. More than half of our stock vessels have been sold, with deposits received.				
Others	 Offshore Wind Farm Support segment is still growing and the company is making progress in this segment. Demand for Penguin Flex Fighter security vessels in Nigeria in the short term will be affected. However, oil represents a critical industry for Nigeria and piracy in the Gulf of Guinea is still rising.

Downgrade to ACCUMULATE with a lower target price of \$\$0.55 (prev. \$\$0.88).

The biggest worry will be trade receivables and inventory of vessels built to stock. During such a stressed environment, the risk will be elevated from customers defaulting payments and inventory becoming unsold. In 2016 downturn, Penguin swung into losses and revenues plunged by 72% (Figure 2). The difference in this cycle is the larger net cash on the balance sheet (from \$\$24mn end 2015 to \$\$60mn end 2019) and a more diverse portfolio of vessels built.

With such an uncertain earnings outlook, we will use price to book as a gauge to valuations. The 10-year price to book average is 0.7x, with a range of 0.5x to 1x. Penguin can ride out the downtrend in the industry with their large cash hoard.
